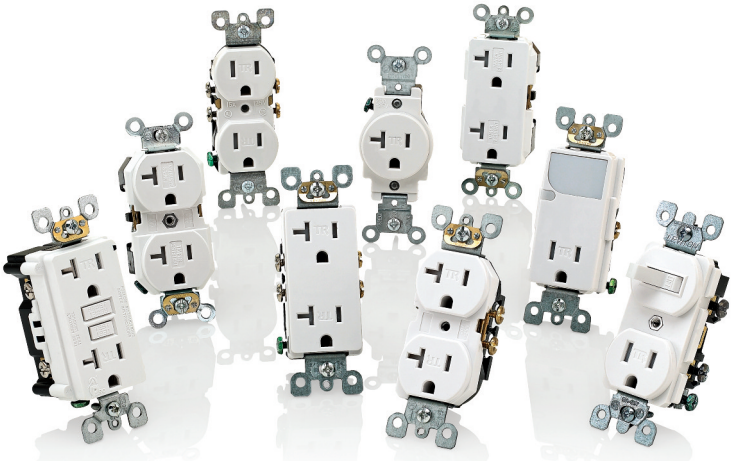
The Smart Choice in Tamper-Resistant Receptacles

Our Expanded Line Has Your Code Needs Covered

Plug Into Safety® with Leviton's Line of Tamper-Resistant (TR) Receptacles

Child safety is a priority at Leviton, where we've increased our Tamper-Resistant (TR) Receptacle selection. Since 2008, the National Electrical Code® has required tamper-resistant receptacles in new or renovated housing. The 2011 NEC also mandates TR Receptacles in childcare facilities, guest rooms and guest suites as well as when replacing existing receptacles in required locations. TR devices have a shutter mechanism inside the receptacle that blocks access to the contacts from most foreign objects. Leviton leads the way in safety advances with a wide range of tamper-resistant devices in Residential and Commercial Grades. To help you meet the demand for upgrades, we provide a handy cross-reference of standard and TR catalog numbers on the following page.



Features and Benefits:

- Shutter mechanism inside the receptacle blocks access to the contacts unless a two-prong plug is inserted, helping ensure hairpins, keys, etc., will be locked out
- TR symbol on residential receptacles assures they meet the NEC requirement
- TR Selection includes Residential and Commercial Grade receptacles
- Heavy-duty construction offers long, trouble-free service life
- Limited Two-Year Warranty

Applications:

- New or renovated single- and multi-family housing
- Schools, libraries, childcare facilities
- Guest rooms and guest suites

Agency Standards:

UL Listed: TR and Weather Resistant Receptacles
TWR15 and TWR20 (File #E-13399)
TR Combination Devices (File #E-7458)
SmartlockPro® TR GFCI (File #E-48380)

CSA Certified: All TR Devices (File #152105)
