FASTAP™ with Lineman Assist™

ACCOMMODATES: AAC, AAAC, ACSR, ACAR, Messenger Guy and Copper Conductors

MATERIAL: Aluminum
Galvanized steel hardware

The BURNDY FASTAP™ with Lineman Assist™ utilizes a spring system that acts as a third hand to assist in installation. This system helps secure the tap conductor while installing on Primary, Secondary, and service applications. Duck bill handle simplifies installation by providing a handle to easily hold the connector while wearing dielectric gloves. Conductor side entry facilitates installation and helps keep inhibitor in the connector. Strip sealed and prefilled with PENETROX™ joint compound to limit oxide growth and increase the life of the connection.

Available Options:
Remove "S" for no PENETROX™
Add "SS" for stainless steel hardware
Add "C" to include a cover
Add "HN" for shear nut
Cover may be ordered separately (UCTCOVER)

Not recommended for Copper to Copper applications; use copper connector.

To ensure proper tightening torque, use BURNDY® BTW Torque Wrenches.

Meets ANSI C119.4 Class A Heat Cycle & Class 3 Tension.

UCTCOVER

FASTAP™ COVER

For Selected UCT and UCG Tap Connectors

High density Polyethylene cover accommodates all FASTAP™ connectors and select UCG connectors. One piece design. Simply slip over the connection and snap shut. Supplied in black.

UCTCOVER for use with: **UCT26RS**

UCT32RS

UCG32RS

UCG25RS
