

FEATURES

- Optical design provides one-for-one replacement of metal halide and fluorescent high bays with substantial energy savings
- Three LED color choices and 84 CRI
- High efficacy LEDs provide up to 138 Lumens Per Watt
- Available in narrow or wide distribution
- Long-Life LED's 60,000 hours at L80 with projected life over 100,000 hours for reduced life cycle maintenance costs
- Easy center driver cover allows tool-less access to electrical components for modular replaceability
- Extremely low profile—only 2" overall height
- Quick and simple hanging systems include chain, tong or aircraft cable mounting
- Access cover in channel for easy wiring access
- "Plug and play" occupancy sensor, daylight sensor, cord and plug
- Wire guard and/or lens option
- ControlScope® compatible
- DesignLights Consortium® (DLC) qualified
- CSA listed and suitable for damp locations
- Up to 55°C ambient operation; see table provided for details
- 5 Year Warranty

PROJECT INFORMATION

Project Name _____

Type _____

Catalog No. _____

Date _____

CONSTRUCTION

Code gauge steel construction for durability to withstand shipping and job site handling. End caps include hemmed edges for ease of handling. Fixture provides easy access to electrical components via removal of channel cover. Tool-less access with one quarter-turn fastener. Oversized access plate conveniently mounted on back of channel for easy access to wiring compartment.

REFLECTOR

Narrow version features multi-faceted specular aluminum reflector for aisle lighting and areas where tighter lighting beam spread is desired. Wide distribution model provides maximum light distribution for open areas. Reflector removal is not required to gain access to electrical components.

PERFORMANCE

VersaBay® LED provides high efficacy, reduced input wattage compared to HID or fluorescent, and the excellent lighting quality needed for task visibility, material characteristic and color differentiation.

FINISH

All metal parts processed with a phosphate bonding treatment. Pre-painted with high gloss baked white enamel, 86% reflective. Polyester powder coat paint after fabrication (PAF) option available for product housing and ends, reflectance 90%.

SHIELDING

Optional lens shielding is virgin acrylic or polycarbonate.

MOUNTING

Fixture to be suspended a minimum of 28" from solid surface. Mounting options include aircraft cable, tong hanger, pipe hanger, or chain.

CERTIFICATION

All luminaires are built to UL1598 and 2108 standard, and bear appropriate CSA labels. Damp location labeling is standard. Emergency equipped fixtures built to UL942. Adheres to LM79, LM80 and TM21 industry standards. . DesignLights Consortium® (DLC) qualified. Please refer to the DLC website for specific product qualifications at www.designlights.org.

WARRANTY

5 Year Warranty (Terms and Conditions apply).
