

HOW/does it.

Halo LED Downlight

wireless controlled

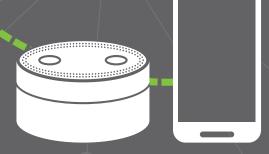

Hub

- Compatible with Wink Hub 2 and SAMSUNG SmartThings
- Works with Echo Plus with built-in hub

4 Easy Steps

- 1. Install light fixture into ceiling.
- 2. Open Wink, SmartThings or Echo Plus App.
- 3. Add the smart device to the Hub.
- 4. Control your lighting.

Smart device

Virtual assistant or smart device

Color adjustment

- Adjust color temperature (CCT) from 2700K (warm) to 5000K (cool) using the hub app.
- Maintains 90 CRI throughout color adjustment.
- Factory default 3000K.

Automate and control lighting remotely

Set automations or scheduled actions through the hub app. Use geo-fencing to have the light perform commands based on your phones location.

Geo-fencing

The use of GPS to create a virtual geographic boundary, enabling software to trigger a response when a mobile device enters or leaves a particular area.

ON/OFF functions

Perform ON/OFF functions from anywhere.

The RL4 & RL56 Wireless can perform dimming, white tuning, scheduling, grouping, geo-fencing, automations and remote access through any mobile device in a ZigBee® based system.

Set the mood

The downlight will dim to 5% using the hub app. Do not connect the downlight to a wall dimmer.

Existing wall switch must remain on or use 3rd party cover plate.

Create scenes by grouping

Choose multiple Halo RL wireless downlights and control them all together using the hub app.

Light scheduling while you're away

Create a schedule within the app for individual products or groups of products.

Uses ZigBee

Allows the RL downlight to be controlled by a smart device and hub (both required and sold separately.)

What is ZigBee?

Zigbee is the language of connected products in homes and businesses. It is in innovative products that provide new ways to use light, improve comfort and convenience, and save energy.

Zigbee allows consumers easy-to-use control over all their LED fixtures. Products based on Zigbee let consumers change lighting remotely to reflect ambiance, task or season, all while managing energy use and making their homes greener.

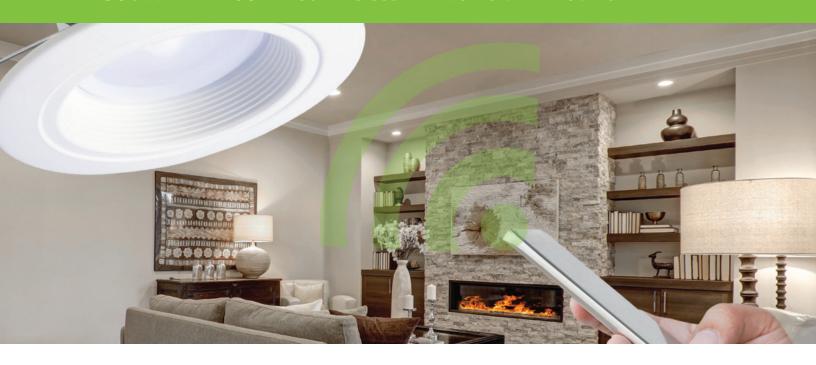

- Compatible with Wink and SAMSUNG SmartThings.
- Works directly with Echo Plus with built-in hub.
