1

Open weave design for easy, 1-step mortar installation

- Order Custom TapeMat to match your floor plan or select a standard TapeMat roll size
- ShowerMat is sized to fit standard shower base sizes and includes an opening for the drain
- All offer 1-step application with thinset or self-leveler
- Open-weave mesh allows mortar to easily bond with underlying material
- 1/8" thickness added to a typical tile installation
- Simple to adjust for curves, angles, & cutouts
- Double-sided tape adheres to subfloor for faster layouts
- UL listed at 12 watts/square foot
- Operated by any SunStat thermostat
- 25-year limited warranty

Selecting a standard TapeMat roll size:

- Calculate the total wall-to-wall square footage of the room.
- Subtract the square footage of all built-ins (closets, tub, toilet, cabinets).
- Multiply the result by .9 and round down to the nearest 5 ft².
- Select TapeMat to match roll width, voltage & square footage.

TapeMat is available in 2' & 3' roll widths with 120 VAC or 240 VAC power.

How to Order Custom TapeMat

- **1.** Send a complete drawing to <u>designs@wattswater.com</u> or call our design team toll-free at 1-888-432-8932 for assistance
- 2. Drawing must include the following:
 - ☐ Complete, accurate dimensions of the area to be heated. Include all wall dimensions from start to finish around the perimeter of the room
 - ☐ Thermostat location
 - ☐ Dimensions & locations of any obstructions in the heated area (vents, plumbing, cabinets, steps, etc.)
- **3.** A design showing the Custom TapeMat layout will be faxed back for customer approval
- **4.** Once the design is approved, please send SunTouch a purchase order, including:
 - ☐ Custom TapeMat order number
 - ☐ Custom TapeMat project number
 - ☐ Customer's approved signature on the design drawing
- **5.** Mats will ship within 3 business days of receipt of purchase order with the customer-approved, signed drawing

ShowerMat™

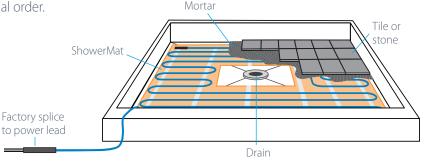

Tile and stone feel warm and soothing when installed over an operating ShowerMat. With this simple addition, you can improve comfort and floor surface drying times. ShowerMats are installed in thinset mortar above the shower pan liner. They can be individually controlled or operated by the same control as other floor heated areas of the bathroom. ShowerMats make it easy to install a separate heating system in the shower.

120 VAC ShowerMat

| Shower base size | ower base Actual mat size size | | Model# | Amps |
|------------------|-----------------------------------|----------|-------------------|------|
| 36" x 60" | 28" x 52" | 81017075 | C12120010ST-S3660 | 1.0 |
| 48" x 48" | 39" x 39" | 81017076 | C12120010ST-S4848 | 1.0 |

- Secure to liner with glue gun or double-sided tape
- 4" center drain cut-out
- 10' power lead for installation outside of the shower

Other sizes are available by special order.

3

A winning combination

TapeMat® Kits include everything needed for a quick & simple floor warming installation.

TapeMat Kits Include:

- 2' wide TapeMat
- SunStat® Command Thermostat
- Extra Double-sided Tape
- LoudMouth™ Installation Monitor
- Installation Manual

TapeMat Kits are available for a full range of room sizes.

The flexibility to fit any floor plan at a cost effective price

- Wire is easily secured with CableStrap[™] or HeatMatrix[™] uncoupling membrane
- Wire spacing can be adjusted to match rooms with different heating needs.
- Approved for shower installation where permitted by the local authority having jurisdiction (AHJ)
- Constant diameter wire allows for increased jobsite toughness and durability
- Constant diameter wire makes installation with HeatMatrix quick and easy
- 25-year warranty

WarmWire® Spools

WarmWire coverage depends on the selected wire spacing.

- 2.5" spacing is recommended for high heat loss areas like sunrooms or basement rec rooms.
- 3" spacing is recommended for kitchens, bathrooms, and living rooms over wood-framed subfloors.
- 3.5" spacing may be used in lower heat loss areas such as hallways.

Select a Kit for easy ordering

WarmWire® Kits make it easy to select products to match your installation.

WarmWire Kits include:

- WarmWire Cable(s)
- SunStat® Command Thermostat
- CableStrap™
- LoudMouth® Installation Monitor
- Double-sided Tape
- Installation Manual

*WarmWire Kits larger than 300 ft² include a SunStat Relay C3, as well as a SunStat Command thermostat. These sizes are not packaged in full color boxes.

Standard spacing

For fast, easy installation of WarmWire® under tile & stone

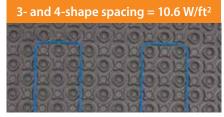

- Simply press WarmWire into the HeatMatrix channels at the selected spacing
- Protect tile and stone from cracking with a sheer stress control layer that isolates the surface from subfloor movement
- Provide a barrier against surface water with durable polypropylene construction
- HeatMatrix is ideal for below grade installations with deep-grooved channels that allow evaporation of moisture from below the membrane

High heat loss areas like sunrooms, basements, or near windows.

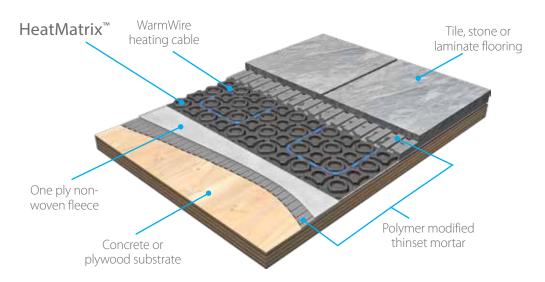

Recommended for kitchens, bathrooms, & living areas.

Lower heat loss areas such as hallways, second floor interior spaces, or low traffic areas.

HeatMatrix[™] uncoupling membrane

Protect your investment in flooring while reducing WarmWire installation time. Flexible spacing options let you adjust the heat output and easily fit WarmWire within the space.

Roll selection

HeatMatrix is installed in both unheated and heated areas to provide crack-isolation, vapor management, and waterproofing. Order a quantity that will cover the full square footage of the area to be tiled. For areas where the floor is exposed to surface water, HeatMatrix Joint Tape is recommended to seal the seams.

HeatMatrix roll sizes

| Coverage | L x W | Order# | Model# |
|--------------------|----------------------------------|----------|---------------|
| 161 ft² | 49.2' x 3.28' (15 m x 1 m) | 81019454 | 8006GRY161-ST |

| 10.4 ft ² | 25' x 5' (7.62 m x .127 m) | 81019457 | 8006HJS-ST |

Enjoy heated floors without replacing flooring.

- No need to replace flooring installs between floor joists to warm the floor above
- Works under any type of flooring including nail down hardwood
- Up to 15°F warmer with hard-surface flooring
- Between 6°F and 10°F warmer with carpet

UnderFloor™ Mats

These easy-to-install mats come in two widths for common joist spacing. For the best performance, follow the installation manual recommendations for insulating between joists under the mats.

The comfort of radiant without the mechanical room

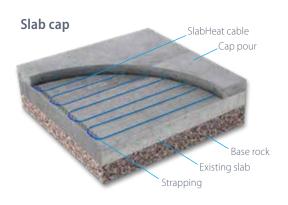

- Offers enough capacity for space heating (verify heat loss calculation with our technical team)
- Installs over an existing slab in a "slab cap" or in a new slab
- Comfortable, even heat without the drying effects of forced air
- Does not promote circulation of pathogens or allergens
- Silent, maintenance-free heat with no vents or duct-work
- Engineered to handle the rigors of any concrete installation
- Polyurethane outer jacket offers superior flexibility, abrasion and tear resistance

SlabHeat®

Regardless of the size, shape, or thickness of the concrete slab, SlabHeat is a simple way to provide the comfort of radiant heat. SlabHeat is engineered to produce enough BTUs to heat the slab, the space and the surface that people walk on.

- 4" on center (15 Watts/ft²) is typical for basement floor heating & high heat loss areas.
- 6" on center (10 Watts/ft²) is typical for basement floor warming & moderate heat loss areas.

Complete your system with a SunStat® thermostat

- Model options include energy saving schedules & touchscreens
- Can operate 120 or 240 VAC systems
- Built-in GFCI improves safety
- Air & floor temperature sensing
- Solutions for systems from 10 ft² to 3000 ft²

SunStat Thermostats & Relays

Get all the features you need to provide warmth when & where you want it! Simply select one thermostat for every area requiring individual control. Add SunStat Relays for areas that need more than 15 Amps of power. SunStats can be used with any of the electric floor warming systems in this brochure.

Heating Wire Repair Kit for Custom TapeMat, TapeMat, UnderFloor Mat & WarmWire

Before ordering this kit consult with the factory to make sure it is suitable for the type of repair you are making. This kit is used for Custom TapeMat, TapeMat, UnderFloor Mat & WarmWire systems. <u>Do not</u> use it for ShowerMat, SlabHeat or ProMelt systems. Kit includes materials for one repair: 2 jumper wires, 1 ground jumper wire, 2 ground solder tubes, and 4 heating wire solder tubes. Detailed written instructions are included.

Order# 81007142

Model# 200299ST

Heating Wire Repair Kit for SlabHeat

Before ordering this kit, consult with the factory to ensure it suits your type of repair. This kit is used for SlabHeat systems. Kit includes materials to make one repair: 2 jumper wires, 1 ground jumper wire, 2 ground solder tubes, 4 heating wire solder tubes, and 1 shrink sleeve. Detailed written instructions are included.

Safe, Reliable Electric Snow Melting

- Reduce liability & provide safe access for visitors.
- Eliminate the time & physical strain of shoveling.
- Melt snow without salt or chemicals.
- Prevent potential damage caused by clearing equipment.

• World-class design, manufacturing & technical support

• Assembled in USA & backed by a 10-year warranty

SunTouch.com

Simplify electric snow melting installation

- Reduce installation time with these simple-to-install mats
- Mats eliminate the need to secure every row of cable
- Embed in concrete, asphalt or sand
- Use for snow melting & patio heating
- 2' or 3' wide rolls
- 120, 208, and 240 VAC model options
- Multiple mats can be controlled by one contactor

Simply unroll the mat and secure to rewire or rebar. ProMelt Mats offer the fastest install option for rectangular shaped areas.

ProMelt offers a wide range of sizes to fit your project

Site-specific design calculations are recommended to ensure the system performs as expected. 38 watt/ft² mats are typically used in milder climates. 50 watt/ft² mats are better suited for colder climates and critical melting applications.

50 watts/ft² (170 btu/h/ft²)

277 VAC ProMelt Mats are available via Special Order only. Please allow additional lead time.

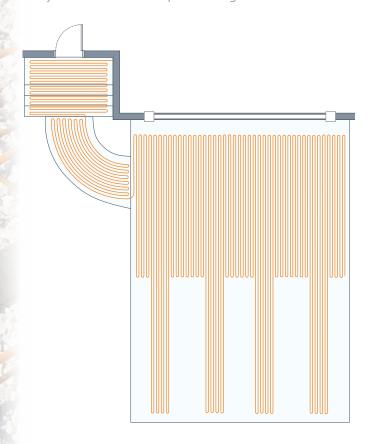

Curves, stairs, custom shapes — no problem

- Best option for stairs, curves & free-form areas
- Easily attached to rebar or rewire with ties
- Secures to existing concrete with CableStrap for patio heating applications
- For use with concrete, pavers, asphalt or tile
- Cable spaced at 3" OC for 50 Watts/ft² output or 4" OC for 38 watts/ft²
- Select from 120, 208 or 240 VAC cables
- Multiple cables controllable by one contactor

ProMelt® Cable

ProMelt Cable offers full flexibility in design. Cables are spaced at either 3" or 4" on center depending on the required heating output. The typical 3" spacing provides 50 watts/ft² (170 btu/ft²). For milder climates, the 4" (38 watt/ft²) spacing may be considered. Site specific design calculations are recommended to ensure the system will perform as expected.

120 VAC Cable

| Covera | ge (Tt²) | | | | |
|---------------------------|---------------------------|--------|----------|------------|------|
| 3" o.c. (50 W/ft²) | 4" 0.C. (38 W/ft²) | Length | Order# | Model# | Amps |
| 8 | 10 | 29' | 81011367 | SC50120008 | 3.3 |
| 15 | 20 | 59' | 81011369 | SC50120015 | 6.3 |

| 30 | 39 | 118' | 81011373 | SC50120030 | 12.5 |
| 40 | 53 | 158' | 81011376 | SC50120040 | 16.7 |
| 53 | 69 | 208' | 81011378 | SC50120053 | 22.1 |

Cable Selection

- Calculate the required watts per square foot.
- Select a spacing option that will provide enough output for the expected performance of the snow melt system.
- Calculate the total area to be melted for each individually controlled zone.
- Determine which voltage will be used.
- Select a cable long enough to cover the melting area.

208 VAC Cable

277 VAC ProMelt Cables are available via Special Order only. Please allow additional lead time.

Safe, reliable control for ProMelt systems

- Compatible with ProMelt Cables & Mats
- Automatic and manual melting options
- Pole-mount, in-slab or surface-mount sensing
- Control options from 30 to 200 amps per unit
- 'All-in-one' control for smaller systems
- 24 VAC control with connection to ContactorPro for larger systems

Select the best control package for your installation.

- Total the amps of the mat and cable for each zone before comparing control options.
- Zones with less than 60 amps can use an all-in-one control solution (PM-2C or PM-5).
- The PM-L1 to L3 & PM-519 kits connect to a ContactorPro panel to control zones of any size.

| System Size | Operation | Sensor | Control | Required | Recommended |
|--------------|--|---------------|---------|--------------------|-------------|
| Up to 30 amp | Automatic start/timed stop melting | Pole-Mount | PM-2C | - | PM-DP |
| Up to 60 amp | Automatic start/timed stop melting | Pole-Mount | PM-5 | - | PM-DP |
| Any Size | Automatic start & stop melting with slab temperature control | Surface-Mount | PM-L3 | ContactorPro Panel | - |
| Any Size | Automatic start/timed stop melting | Pole-Mount | PM-L2 | ContactorPro Panel | - |
| Any Size | Manual start & stop melting with slab temperature control | In-Slab | PM-L1 | ContactorPro Panel | - |
| Any Size | Outdoor patio heating (no snow melting) | In-Slab | PM-519 | ContactorPro Panel | - |

ProMelt Snow Sensor Control PM-2C

The PM-2C operates on line voltage with a 30 amp capacity. This all-in-one control includes a snow sensor on the top-facing side. Features include automatic or manual operation, adjustable trigger temperature and an adjustable drying cycle.

Order# 81011699 Model# 300600

ProMelt Snow Sensor Control PM-5

The PM-5 operates on line voltage with a 60 amp capacity. This all-in-one control includes a snow sensor on the top facing side. Features include automatic or manual operation, adjustable trigger temperature and an adjustable drying cycle.

Order# 81014247 Model# 300580

ProMelt Snow Melting Control Kit PM-L3

The PM-L3 kit provides the best combination of efficiency & automated operation. Kit includes a touch screen control, surface-mounted snow/ice sensor with socket & outdoor temperature sensor. This control combination reduces the cost of snow melting by operating at the lowest possible temperature to melt snow & ice. A ContactorPro panel is required to provide power for the mats, cables & control.

Order# 81018910 Model# 300160

ProMelt Snow Melting Control Kit PM-L2

Th PM-L2 kit provides automatic start & timed stop operation for an electric snow melting system. The kit includes an easy-to-use touchscreen control, a pole-mounted snow sensor & outdoor temperature sensor. A ContactorPro panel is required to provide power for the mats, cables & control.

Order# 81018911 Model# 300161

ProMelt Snow Melting Control Kit PM-L1

The PM-L1 kit offers manual operation & monitoring of a snow melting system using a touchscreen control. The PM-L1 Kit reduces the cost of snow melting by operating the system at the lowest possible temperature required to clear snow & ice. Kit includes control, slab sensor and outdoor temperature sensor. A ContactorPro panel is required to provide power for the mats, cables & control.

Order# 81018912 Model# 300162

ProMelt Outdoor Heating Control Kit PM-519

Extend the patio season with ProMelt mats or cables. This control has a sensing range of -58°F to 140°F (-50°C to 60°C) and an adjustment range of 40 to 122°F (4.5 to 50°C). The included PM-072 sensor is used to measure the temperature under the heated outdoor slab or paver surface.

Order# 81018840 Model# 300152S

ProMelt ContactorPro Panels

Control systems of any size when connected to a compatible ProMelt Control. ContractorPro Panels are available in 50, 100 and 200 amp models to operate systems with 120, 208, 240 or 277 VAC power. Panels include a 'System On' indicator light & manual override dial with a 4-hour timer. A built-in 24 VAC transformer provides power to the connected control. Each NEMA Type 1 panel measures 12" wide by 12" high by 4" deep & includes knockouts for conduit.

| ContactorPro Panel | CP-50 | CP-100 | CP-200 |
|-----------------------|----------|----------|----------|
| Built-in amp capacity | 50 | 100 | 200 |
| Order# | 81012215 | 81012216 | 81012217 |
| Model# | 300050 | 300100 | 300200 |

Outdoor Sensor PM-070

Replacement model for outdoor sensor included with the ProMelt control kits.

Order# 81018904 Model# 300070

Slab Sensor PM-072

This weather-resistant sensor is designed for installation in conduit within a concrete slab or in mortar between pavers.

Order# 81018905 Model# 300072

Snow / Ice Sensor PM-090

Detects the presence of snow & ice to enable fully automatic melting operation. Install within a Sensor Socket 091 once the surface is finished. Comes with 65' (20m) of wire.

Order# 81018906 Model# 300090

Sensor Socket PM-091

This socket includes an insert that keeps the socket free of debris during concrete or asphalt finishing. Secure conduit to cutout area to allow for installation of the Snow/Ice Sensor 090 once the surface is finished.

Order# 81018907 Model# 300091

Snow Sensor PM-095

The PM-095 enables automatic start/timed stop operation when connected to a Snow Melting Control PM-653. This pole-mounted sensor is commonly used in systems that require a sensor to be installed after the snow melt surface is finished.

Order# 81018908 Model# 300095

ProMelt Display Panel PM-DP

Connect to ProMelt PM-2C or PM-5 Snow Sensor Controls for remote adjustment and monitoring of the system. Panel includes buttons to switch between manual on, standby (off) and automatic operation. The ProMelt Display Panel also provides a connection for home automation systems to enable melting operation.

Order# 81012360 Model# 300650

Snow Melting Plaque

Permanent aluminum plaque to indicate where a snow melting system has been installed.

Order# 81012381 Model# 100123

Cable Ties

6" cable ties are used to tie ProMelt Mat & Cable to rewire or rebar. 100 ties are included in a package.

Order# 81012001 Model# 321400

CableStrap™

CableStrap makes it easy to install WarmWire & SlabHeat at the desired spacing. Each 25 ft roll covers approximately 40 ft^2 to 50 ft^2 of heated area.

Order# 81005523 Model# 321301ST

Heating Wire Repair Kit for SlabHeat & ProMelt

Before ordering this kit, consult with the factory to ensure it suits your type of repair. This kit is used for SlabHeat & ProMelt systems. Kit includes materials to make one repair: jumper wires, 1 ground jumper wire, 2 ground solder tubes, 4 heating wire solder tubes, and 1 shrink sleeve. Detailed written instructions are included.

Order# 81012263 Model# 200400

A CAUTION

This brochure is not intended to provide full installation instructions and safety information. In order to avoid property damage or injury, please refer to the complete installation manual and product safety information provided with the product.

21

Heated Tile Display

How warm does a heated tile feel? Let customers feel the difference for themselves with this countertop heated tile display.

Order# 81002504

Smaller display gives an attractive sales focus to WarmWire & TapeMat kits.

Order# 81011474

SunTouch HeatMatrix™ Countertop Display

Customers can feel the warmth of a heated tile and see how HeatMatrix and WarmWire are installed. Includes literature holder.

Order# MF10698

Showcase floor heating with promotional displays from SunTouch.
