ENHANCE PERFORMANCE

MAXIMIZE CONVENIENCE

SIMPLIFY MAINTENANCE

# ACCESSORIES CATALOG

# better power. more choices.

Enhance your Generac standby generator's performance with accessories from the leader in standby power. Products are available to maximize convenience and simplify maintenance for years of reliable standby power.

**Generac Power Systems** 

## Nexus™ Wireless Remote Monitor

No need to go outside during inclement weather to check the generator status. Generac's wireless remote gives you instant status updates without ever leaving the house. Available for use on generators 8-150 kW\*. Choose from two option:

#### ADVANCED

- LCD, trilingual display
- Sleek appearance with flush LED indicator for smooth contour
- Virtually full control panel simulated control pad
- A/C powered with battery back-up
- · Includes cradle for desk or wall mounting

\*Remote monitor adapter required for 22 kW to 150 kW. Not compatible with CorePower or Centurion ES models. BASIC

- Small and compact, approximately the width and height of a credit card
- Indicator lights and audible cues relay generator status
- Audible feature when attention is needed or battery is low
- Magnetic back for refrigerator mounting
- · Completely wire-free, battery powered

## **GENERATOR MAINTENANCE**

A scheduled maintenance program will ensure that your system is always in top operating condition and that your warranty requirements are met. Please refer to the service chart for our recommended service and maintenance schedule.

## **Scheduled Maintenance Kits**

Generac offers a comprehensive line of scheduled maintenance kits to ensure long life and top performance of your standby generator system. Kits include:

Kit contents may vary by model.

- Air Filter
  Oil Funnel
  - Reminder Sticker
- Spark Plug(s)
  Chamois

## **COLD WEATHER KITS**

Oil Filter

Optimize the performance of your standby generator in colder climates. Kit consists of battery warmer with an automatically controlled thermostat built in. When temperatures fall below an acceptable level, the thermostat activates the battery warmer, maintaining optimum battery temperature, and also activates the crank case oil heater for smooth engine starting.\*

## **Cold Weather Kit**

Highly recommended for areas where the temperature drops below 32° F. Air-cooled kits also include an adhesive engine crankcase warmer.

## Extreme Cold Weather Kit (Liquid-cooled units only)

Includes block heater for climates where the temperature falls below 32° F for extended periods of time. To be used in conjunction with the appropriate cold weather kit.

\* Air-cooled units only.

#### **DLM™** Module

Manage up to four additional large 240V loads by adding individual DLM modules. These modules are 50 amps each and are housed in a NEMA 3R enclosure, giving the option to install them anywhere inline indoors or outdoors between the panel and appliance. After loads are shed, they are brought back individually to assure generator capacity and eliminate the potential for overload.

## **Auxiliary Transfer Switch Contacts**

Manage the operation of your standby power supply efficiently. The auxiliary transfer switch contact kit allows a single large electrical load to be locked out from generator operation. If a home is equipped with electrical heat or multiple central air conditioning units, this device allows the generator transfer switch to interrupt the appliance's control wire, breaking the signal needed for the appliance to start. Works with 100-200 amp switches.

## **MISCELLANEOUS**

#### **Battery**

Every standby generator requires a battery to start the system. Generac offers the recommended 26R, wet cell battery for use with all air-cooled standby product.

## **Base Plug Kits**

The base plug kits offer an easy way to fill the lifting holes in the liquid-cooled generator base. Create a streamlined look and protect your generator from weather and animal-related damage.

## **Paint Kits**

The enclosure is the generator's first line of defense against the elements and it's important to keep it in good condition. Touch up scratches and other damage to protect from future corrosion. Kits include the necessary paint to properly maintain or touch up a generator enclosure. Please check with your sales representative to verify proper color coordination.

## **Air-cooled Generator Transport Cart**

Moving a 400 lb generator can be hard work. The Generator Transport Cart will assist with moving the generator from the truck to the installation site. Allows for a single person to easily maneuver any air-cooled product to the desired location.

• Works with all Generac, Guardian Series and Centurion air-cooled models (Excludes CorePower and Centurion ES Series).

## **Fascia for Air-cooled Units**

Complement the contoured enclosure with a fascia base wrap that snaps together around the bottom of the generator. Fascia continues the sleek, contoured appearance as well as offering protection from rodents and insects by covering the lifting holes located in the base. Standard on 20 kW air-cooled model. Available in grey or bisque.

(Excludes CorePower and Centurion ES Series).

## **Extended Warranty Option**

Up to five years extended warranty coverage available through Generac Industrial and Residential/ Commercial Dealers.

## **Air-Cooled Service Schedule**

ATTENTION: It is recommended that all service work be performed by an Authorized Dealer.

## Innovative Products from the MARKET LEADER

For over 50 years, Generac Power Systems has led the industry with innovative design and superior manufacturing. When it comes to developing products that are both durable and reliable, we stand head and shoulders above our competition. The result of our efforts can be seen in every inch of our product offerings. Generac sells more home standby generators than all of its competitors combined!

# Generac's Customer **COMMITMENT**

Generac's commitment to its customers extends beyond the generator purchase. A nationwide dealer network, staffed with factory trained technicians, provides unsurpassed service and support. They also maintain inventories of Generac parts and accessories so your home continues to be protected from power outages for years to come.
