

Electric Floor Heating and Snow Melting Price Guide

Effective 1/1/2017

1/13/2017

SunTouch now offers a quicker way to bring electric floor warming to your customers. The new SunTouch Custom TapeMat is the next generation in electric floor warming mats. *Among the many advantages to a SunTouch Custom TapeMat:*

- Quicker, Simpler, Easier installation – The TapeMat is pre-shaped to fit any area
- Open Weave TapeMat allows for a one-step application w/ thinset or self-leveler
- Ability to alter TapeMat configuration if dimensions of the heated area change
- Double sided tape adheres to subfloor for faster layouts
- All of the other features and benefits of our standard TapeMat product
- UL Listed at 12 Watts / square foot

Tile & stone feel warm & soothing when installed over an operating ShowerMat™. With this simple addition, you can improve comfort & floor surface drying times.

ShowerMats are installed in thinset mortar above the shower pan liner. They can be individually controlled, or operated by the same control as other floor heated areas of the bathroom. ShowerMat™ makes it easy to install separate heating in the shower, as recommended by UL.

Electric Floor Heating and Snow Melting Price Guide

Effective 1/1/2017

1/13/2017

SunTouch mats have a long history of being the safest and easiest-to-install heating mats in the industry. With the addition of double-sided tape and a mesh that lays flatter, TapeMats are easier to install than ever. TapeMats are listed by UL® for the U.S. and Canada, and are manufactured in Springfield, MO in an ISO 9001:2008 registered facility. All mats have the "S-pattern" wire construction and produce 12 watts/sq. ft. (41 Btu/hr/sq. ft.), which is enough to heat many spaces. SunTouch offers the largest selection of mats in the industry with 36 sizes manufactured in two widths (2 ft. and 3 ft. wide) in lengths covering up to 160 sq. ft.

Electric Floor Heating and Snow Melting Price Guide

Effective 1/1/2017

1/13/2017

WarmWire® is a simple, economical way to warm floors and heat spaces to provide years of lasting comfort. It will warm all kinds of floor coverings: ceramic & porcelain tile, stone, wood, laminates, vinyl, or carpet. Lay out and attach the CableStraps. Fasten the WarmWire to the CableStraps as you weave it back and forth across the floor. Put down a layer of thin-set mortar and set your tile or stone. Install a layer of self-leveling cement over the cables for hardwood, laminate, vinyl, or carpeted floors.

Now with standard spacing at 3" on center and new thicker diameter wire, our wire can easily snap into uncoupling membranes designed for heating wire or WarmWire CableStraps.

Electric Floor Heating and Snow Melting Price Guide

Effective 1/1/2017

1/13/2017

Each kit contains:

- WarmWire® Spool(s)
- SunStat® Command Programmable Thermostat
- CableStrap(s)™
- Double-sided Tape
- LoudMouth™ Installation Monitor
- Installation Manual

Notes:

1. WarmWire Kits larger than 300 Sq. Ft. include a SunStat Relay C3, as well as a SunStat Command thermostat.
2. WarmWire Kits larger than 300 Sq. Ft. are not packaged in full-color boxes.
3. As of August 1, 2015 all kits contain a Command thermostat

WarmWire HeatMatrix uncoupling membrane protects your tile investment while offering a fast, easy method of installing WarmWire electric heating cables. The HeatMatrix's polypropylene construction provides a barrier against surface water while deep grooved channels allow evaporation of moisture from below the membrane.

UnderFloor™ mats are the perfect solution to warm nearly every type of floor covering. These special mats warm existing floors without having to replace the floor coverings. If you have access under a floor, simply staple UnderFloor mats between the joists. These effective, UL-listed mats produce 10 watts/sq. ft. of floor area (about 34 BTU/hr/sq. ft.). UnderFloor mats will warm wood, vinyl, laminates, or tile floor coverings.

With UnderFloor mats, most floors can be heated 12°F to 15°F (6.6°C to 8.3°C) warmer than they would be otherwise.

Electric Floor Heating and Snow Melting Price Guide

Effective 1/1/2017

1/13/2017

SlabHeat™ is engineered with the capability to produce enough BTUs to heat a slab, the space, and the surface people walk on. Regardless of size, shape, or thickness, SlabHeat is the way to provide heat to just about any environment.

SlabHeat cable can be installed over an existing slab in a "slab cap" or in a new slab. Insulation is recommended to improve efficiency and to improve response time.

The polyurethane outer jacket offers superior flexibility, abrasion and tear resistance, impact resistance, resiliency, and better low temperature stability than the PVC used in other similar products.

Electric Floor Heating and Snow Melting Price Guide

Effective 1/1/2017

1/13/2017

ProMelt mats melt snow and install quickly. All you need for a typical small-to-medium size project is a control and mat. And a ProMelt system only costs about \$4.00 per 100 sq. ft. to operate for a typical snowfall (50 Watts/sq. ft. operating for 8 hours at \$0.10 per KW-hr).

ProMelt heating elements are surrounded with high-temperature ETFE insulation and the engineered polyurethane outer jacket tolerates 300°F (149°C) asphalt and the machines that roll it in place.

Each mat holds dual heating elements on 3 inch centers on a reinforced tape grid. There's a grounded power lead on one end for a fast, single-point electrical connection.

Electric Floor Heating and Snow Melting Price Guide

Effective 1/1/2017

1/13/2017

ProMelt cables give you more flexible layout options than mats, especially for areas with larger dimensions.

As with ProMelt Mats, the heating elements are surrounded with the same high-temperature ETFE and engineered polyurethane outer jacket for long life and jobsite toughness, including installation in asphalt.

ProMelt cables are usually tied to reinforcing wire 3 or 4 inches on center. That provides either 50 or 38 Watts per square foot. ProMelt cable can go perimeter to perimeter or fill odd-shaped areas for complete snow melting coverage.

There are a lot of ProMelt cable sizes in stock in four single-phase voltage options. All the cables terminate at one end with a power lead so you only make one connection to your electrical source.
