

Product family features

- Can be used in conjunction with the following dimmer(s), switch(es), sensor(s), and accessories: Maestro®, Maestro IR®, Maestro Wireless®, Caséta® Wireless, Pico® wireless, Diva®, Skylark Contour® and Skylark® controls, and Claro® and Satin Colors® accessories
- All Lutron wallplates are screwless, seamless, and have no visible hardware; the front plate securely snaps into the alignment adapter plate
- Full line of wiring devices in Designer style opening
- Blank inserts available for Gloss (DV-BI-) and Satin Colors (SC-BI-)

Ganging and derating

- Designer wallplates use standard ganging
- Requires fins to be removed from dimmers for proper spacing (“Fins Broken” ganging)
- May require derating (i.e., reduction of dimmer capacity due to fin removal), see Derating Tables

USB receptacles

- Includes two USB ports
- Ports are rated for a minimum of 10,000 insertions and removals
- Wallplate sold separately

Tamper-resistant USB receptacles

15A 125V	CAR-15-UBTR- XX ¹
15A 125V	SCR-15-UBTR- XX ²

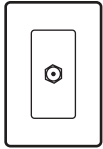

Important notes

- Receptacles and plugs for dimming use are UL listed for use with all Lutron wallbox dimmers included in this catalog.
- If there is only one electrical feed to the receptacle, then the duplex DFDU must be used.
- If the hot and dimmed hot feeds to the split duplex HFDU are supplied from different circuits or split-wired with separate switch-legs, a means to simultaneously disconnect these circuits must be provided at the panel board where they originate (NEC 210.7(C) 2002 Edition). A 2-pole circuit breaker or two single-pole circuit breakers with an approved handle tie can be used to accomplish this simultaneous disconnect. Feed-through dimming panels, which are those without breakers, are recommended when using the HFDU.
