## What's New

### Section A - Mechanical

UNITAP™ Clear UL Listed for Code and Flex

A-38

VERSIPOLE™ Configurable Power Distribution Blocks for Copper and Aluminum

A-48

### Section C - Compression Connectors

Compression Cable Pulling Heads

C-217

### Section E - Grounding

HandyBug™ The Survival Tool of Electrical Connections (Type SB)

E-33

Fence Fabric Ground Clamps (Type FFG)

E-36

Aluminum Lay-in Lugs (Type BGBS)

E-39

4" Fence Post Ground Clamp (Type GA-H)

E-46

Expanded Wiley Solutions

E-116

# What's New (Continued)

## Section F - Accessories

PENETROX™ with brush lid

Cold Seal Splice Kits

F-3

F-6

## Section H - Overhead Distribution

FASTAP™ with Lineman Assist™ for Copper Conductors

H-18

## Section J - In-Line Disconnect Switches

Bolted Wedge In-Line Disconnect Switch

J-17

## Section N - Tooling

EP (Enhanced Power) PATRIOT® Tools

*Designed to accept an expanded range of Makita batteries (larger capacity 5.0Ah to smaller 2.0Ah) providing more choice and flexibility. See Individual Tool Pages for details.*

### ⚡ LIGHTNING PROTECTION INFO.

Basic rules for selection are:

1. Must be like material to the conductor.
  2. Two bolts to ground rod - minimum.
  3. Cable to cable connections can be anything, one bolt, two bolt, compression, etc.
  4. Cable to steel structure must have 8 square inch contact with steel.
  5. Heavy duty stacks - mechanical only.
  6. On all connectors with heavy duty stack rating, we must offer 1/16" thick lead plating as an option. The reason for that is closest 25 ft. to stack opening must use lead coated product.
- ~ Complies with NFPA 78-86 Ordinary Structures.  
~ ~ Complies with NFPA 78-86 Heavy Duty Stacks. (Order: LD for Lead Plating for Heavy Duty Stack applications.)

### SPECIAL FEATURES

Other features are also available for products listed, such as undrilled or special drilling, 45° or 90° pad angles, belling for extra flexible cable, smooth or special threaded studs, special label-

ing or packaging, extra long braid, and nuclear certification. Please contact BURNDY Customer Service for any inquiries.

### REVOLUTIONARY BURNDY® DESIGN MEETS STRICT UL486B STANDARDS

For use on all combinations

- Aluminum to aluminum
- Aluminum to copper
- Copper to copper

Patented

... and puts the bite on  
aluminum connections  
forever!

Unique “bite and grip”  
TRITAP™ SERVIT® contact  
delivers safe, long-term  
reliability — even without  
scratch brushing ... without  
oxide inhibiting compounds.†

† When used in NEC applications of insulated cables only.

Available in sizes from #10 through 500 kcmil

Triangular edges bite into cable to break through surface oxides:

- provide low contact resistance
- produces gas tight seal

Tin-plated contact surface inhibits oxide formation

Special heat-treated hard, aluminum alloy

Spacer provides built-in separation to retard galvanic corrosion

Anti-galling, high efficiency threaded components result in high contact force. Easily installed using standard, everyday wrenches.

**TYPES KS & KS-3**

**SERVIT®**

For Copper, Copperweld

Compact, high strength, high copper alloy SERVIT® split-bolt has free-running threads and easy to grip wrench flats. Highly resistant to season cracking and corrosion, the SERVIT® provides maximum pressure and assures a secure connection on all combinations of run and tap conductors. Type KS-3 accommodates 3 maximum size conductors.

▲ Listed torque values are for maximum conductor combinations accommodated. Consult UL486 Tables 7-4, 7-5, 7-6 for smaller conductor combinations.  
See note LIGHTNING PROTECTION INFO.  
\* Not UL Listed or CSA Certified.  
† In addition to UL Listed for wire connectors and CSA Certified, these items are also UL rated for direct burial.

**TYPE SC**

**SERVIT® COVER**

HUG-A-BUG

Used indoors or outdoors, this compact, one-piece plastic SERVIT® cover saves time and material, eliminates costly taping of split-bolts. Positive latch snaps easily and quickly over connector, ideal for tight quarters. Self-positioning plastic fingers wrap around wires fully insulating joint. UL Listed for 600 volt indoor application with type KS. Three covers accommodate a range of 6 SERVIT® sizes through 2/0 Str.

### TYPE KSU

#### UNIVERSAL SERVIT®

For Use On All Combinations of Copper, Aluminum, ACSR, AAAC, 5005, and Steel

Tin-plated, high strength, copper alloy SERVIT® split-bolt with spacer. Spacer separates dissimilar conductors and provides long contact length that prevents high pressure point contacts between run and tap conductors.

Use of PENETROX™ joint compound recommended with Aluminum and ACSR.

TYPE KSA

TRITAP™ SERVIT®

For All Combinations of Aluminum to Aluminum, Aluminum to Copper and Copper to Copper, Aluminum Alloy Tin Plated

PATENTED TRIANGULAR PENETRATION TECHNOLOGY CONTACT

Features & Benefits

- No scratch brushing required.
- No oxide inhibitor required.
- Orients the conductor.
- Provides maximum pressure and assures a secure connection of run and tap conductors.
- Facilitates piercing the aluminum conductor surface oxides.
- UL 486B listed, 90°C rated.
- Provides a low contact resistance.
- Provides equal coefficient of expansion
- Inhibits the reformation of oxides by producing a gas-tight seal.
- Provides improved retention of minimum to maximum conductor combinations.

### TYPE KVSU

#### UNIVERSAL OKLIP™

Mechanical Connector All Combinations of Copper, Aluminum, ACSR, AAAC & 5005

Compact, high strength, tin plated copper alloy two-piece connector with spacer and tin-plated silicon bronze DURIMUM™ hardware. Recommended for heavy duty connections. Spacer separates

dissimilar conductors and provides long contact length. Neoprene ring prevents loss of shorter bolt during installation. Longer peened bolt

permits swivel action for easier installation. Use of PENETROX™ joint compound recommended with aluminum and ACSR.

Accommodates compressed conductors within diameter range. ✓ See note LIGHTNING PROTECTION INFO.

**TYPE KVS**

**OKLIP™**

Mechanical Connector  
For Copper and Copperweld

Similar to OKLIP™ Type KVS except for a high copper alloy spacer that separates run and tap conductors. Provides high contact pressure, confines conductor strands, and assures vibration-proof connection. Longer peened bolt, permits swivel action for easier installation. Silicon bronze DURIUM™ hardware.

↗ See note LIGHTNING PROTECTION INFO.

**TYPE KVS-A**

**ALUMINUM OKLIP™**

For Use On All Combinations of  
Copper, Aluminum†, ACSR†, AAAC  
and 5005

Three-piece, high-conductivity, non-copper bearing aluminum alloy connector with thick spacer and aluminum hardware. Hardware in KVS26A and KVS28A is stainless steel. Recommended for heavy duty dissimilar metal applications. Spacer separates conductors and provides long contact

length. Belled entrances prevent chafing, permit easier assembly of conductors. Longer peened bolt permits swivel action for easier installation. Neoprene ring prevents loss of shorter bolt. PENETROX™ joint compound recommended with aluminum and ACSR.

**THESE CONNECTORS CAN ACCOMMODATE ACSR CONDUCTORS OVER ARMOR ROD WITHIN THE DIAMETER RANGE INDICATED.**

† Accommodates compressed conductors within diameter range. ↗ See note LIGHTNING PROTECTION INFO.

### TYPE QPX

#### VERSITAP™

Parallel Clamp For Copper, Copperweld, Copperweld-Copper

The VERSITAP™ Type QPX is recommended for Tee, Cross, Parallel, Butt and Tap connections. Range-taking, only 10 connectors required to accommodate conductor sizes from #6 Str. to 1000 kcmil. Edges are rounded for easy taping. Made of high strength, high-conductivity copper alloy and silicon bronze DURIMUM™ hardware.

Fig. 1

\* For various configurations, see page TYPE QPX-Y

\* Can be installed side by side or in-line on NEMA drilled bar.

**TYPE FCB**

**TRANSFORMER TAP ADAPTER**

Copper and Aluminum

Cast in one piece from copper alloy. Transformer tap adapter designed to accommodate from 1 to 6 NEMA drilled copper or aluminum terminal taps from a single secondary transformer outlet. Tin-plated. Order mounting hardware and tap terminals separately.

### TYPE BIPC

Insulation Piercing Connector for Copper and Aluminum

UL Listed 90° C, \*600 Volt

The Type BIPC, BURNDY® Insulation Piercing Connector is ideally suited for splicing and tapping aluminum and copper conductor wire sizes: #10 AWG to 500 kcmil.

Typical View Showing Breakaway Tab

### Features & Benefits

- Insulation piercing capability
  - ◇ Eliminates the need for conductor insulation stripping.
- UL486B Listed, AL9CU rated
  - ◇ For copper and aluminum conductor combinations up to 90° \*600 Volt applications.
- Insulation piercing design
  - ◇ For use on hot-line applications - eliminates the need for taping.
- Easy snap-out tabs
  - ◇ Eases installation, protects connection from dirt and debris.
- Simple bolt-on connection
  - ◇ Eases installation.

\* 600 Volt

TYPE KPA

SCRULUG™

For Copper Cable

High copper alloy tin-plated terminal for joining a wide range of cable to equipment pads or terminal blocks. Especially good in light industrial applications. The tongue and body are a one-piece design. The pressure bar equalizes pressure over the conductor and prevents the screw from cutting into the cable.

Fig. 1

NOTE: For unplated version add "UNPL" suffix.

TYPE KPA-UP

SCRULUG™

For Copper Cable

High copper alloy terminal for joining a wide range of cable to equipment pads or terminal blocks. Plain copper finish.

Fig. 1

Features & Benefits

- One piece design.
  - ◊ Superior torque and pull out performance.
- Convenient range taking design.
  - ◊ Reduces catalog numbers. One catalog number accommodates several conductor sizes.
- High conductivity copper alloy.
  - ◊ Long lasting, reliable contact.
- Compact design.
  - ◊ Easy to use.
- Slot Robertson screw, hex head, hex socket bolt.
  - ◊ No special installation tools required. Eliminates over-torquing/potential conductor damage.

Catalog Number	Wire Range	Fig. No.	C	D	H	K	Stud Hole Size	L	N	T	Hardware	Recommended Tightening Torque (in-lb)

KPA4CUP	14 Sol. - 4 Str.		0.50	0.71	1.00	0.28	1/4	1.28	0.33		5/16 DIA.SLOT ROBERTSON	45

NOTE: For tin plating drop "-UP" suffix and add "-TP" suffix (example: KPA4CTP).

For use in grounding applications with a green screw, contact factory. Listed for grounding per UL467.

### TYPE KLU

#### SCRULUG™

FOR COPPER CABLE -  
OFFSET TONGUE - NON-PLATED

High copper alloy terminal with offset tongue for joining a wide range of cable to equipment pads or bar. Easy to install with screwdriver or wrench. Connector is reusable. Plain copper finish.

#### Features & Benefits

- Convenient range-taking design.
  - ◇ Reduces catalog numbers.
  - One conductor accommodates several conductor sizes.
- High conductivity copper alloy
  - ◇ Long lasting reliable contact.
- Compact design
  - ◇ Easy to use. Reduces labor time.
- Slot Robertson screw, hex head/hex socket bolt
  - ◇ No special installation tools required.
  - eliminates over-torquing/potential conductor damage.

\* "N" indicates NEMA standard stud holes.

Consult UL486 Tables 7-4, 7-5, 7-6 for smaller conductor sizes.

▲ Listed torque values are for maximum conductor sizes accommodated.

### TYPES QA, QQA

#### QIKLUG™

#### Copper Cable

Type QA heavy duty, compact, high copper alloy terminal for joining a wide range of cable to equipment pads or bar. Fast one-wrench installation. Type QQA heavy duty, high copper alloy terminal for joining cable to equipment pads or bar. Twin clamping elements secure joint vibration and flexing. One-wrench installation.

TYPE HFB-P1

BAR CLAMP ASSEMBLY COMPONENTS

For Copper Bar

To build your own high strength clamp assembly for multiple flat bar using type HFB-P1 bar clamps and clamping hardware, the following tables have been provided. The clamp assembly eliminates the need for drilling the flat bar and is used in indoor and outdoor applications.

One Clamp Half							
Bar Clamp Bar			"J" Bolt Dia.	L	W	Z	Recommended Tightening Torque in-lb
Catalog Number	Run 'A'	Tap 'AA'

NOTE: When ordering assembly bolts specify correct bolt length in catalog number as indicated in table.

**TYPE HFB-N**

**BAR CLAMP TAP PAD ADAPTER**

For Copper Bar

High conductivity copper, tap pad adapter provides a NEMA drilled contact pad when assembled to the HFB-P1 clamps. Tap connections can be made from copper bus bar(s) without drilling, by bolting standard mechanical or compression terminal pads directly to the pre-drilled tap pad adapter.

TYPE CL50-1 & CL50-1TN

COPPER LAY-IN QIKLUG™

For Copper

The Lay-In QIKLUG™ is manufactured from high strength pure electrolytic copper to ensure maximum strength and conductivity. UL467 Listed for direct burial in earth or concrete. The open-faced design allows for fast lay-in of the conductor without the need for cutting or breaking. Stainless steel screws used for excellent corrosion resistance.

Catalog Number	Conductor Range	Stud Hole
CL50-1	14 AWG-4 AWG	#10
CL50-1TN	14 AWG-4 AWG	#10

Photo above shows a typical solar panel installation using CL50-1 connectors.

TYPE CL

COPPER LAY-IN QIKLUG™

For Copper

Manufactured for maximum strength and conductivity, these lay-in lugs allow for continuous runs of conductor and are well suited as terminations as well. Tin-plated, set screw style connectors, three sizes cover a range from #14AWG to 250 kcmil. CL3/0-516TN and CL250-516TN are UL Listed and CSA certified. CL1/0-14TN UL Listed for grounding and CSA certified. 90° C rated. Suitable for copper conductors only.

### TYPE KPU-AC

#### POLYTAP™

Insulated Gutter Tap for All Copper and Aluminum Combinations

Wide range-taking tin-plated aluminum parallel clamp and insulating cover assembly for industrial and multiple story structure applications. Only six connectors cover the entire 14 Sol.-750 kcmil range. Covers having flexible fingers that conform to conductor, fully insulating the connection. UL486B Listed for 600 volts maximum 90° C service. Cover and connector are packaged together. No taping required.

600 Volt Max. 90° C

**TYPE BGBL**

**LAY-IN QIKLUG™**

UL LISTED 90° C, 600 V

The Lay-In QIKLUG™, Type BGBL is manufactured from high strength 6061-T6 aluminum, and is ideally suited for grounding and bonding applications accommodating both copper and aluminum conductor sizes #14 AWG to 250 kcmil. The BGBL4SS with Stainless Steel screw is UL 467 Listed for grounding and bonding.

**Features & Benefits**

- UL 486B listed, AL9CU rated
  - ◇ For copper and aluminum conductor combinations up to 90° C, 600 Volt applications.
- UL Recognized for grounding and bonding
  - ◇ Ensures reliability.
- Electro-tin plated
  - ◇ Provides low contact resistance.
- Lay-in feature
  - ◇ Eases installation.

♦ Listed torque values are for maximum conductor sizes accommodated. Consult UL486 Tables 7-4, 7-5, & 7-6 for smaller conductor sizes

### TYPE KAU-KIT

#### TRANSFORMER LUG KIT

These dual-rated lugs are constructed from high strength aluminum alloy and electro tin-plated to provide low contact resistance. Lugs and mounting hardware packaged together in these kits.

#### Features & Benefits

- UL Listed AL9CU dual rated set screw terminals and CSA Certified
  - ◊ Ensure the transformer feeders and taps are terminated properly.
- Plated steel cap screws and hex nuts with captive conical washers or individual Belleville washers
  - ◊ Terminal to bus connections are made using proper hardware resulting in true torque to pressure performance - compensates for dissimilar metal expansion and contraction.
- Hardware packed in plastic bag
  - ◊ No lost hardware prior to installation.
- Larger 800 kcmil lugs in KIT3 and KIT4
  - ◊ Accommodates common 750 kcmil tap conductors in larger transformers.

**TYPE AMS**

**DUAL RATED SPLICER/REDUCER**

For Copper and Aluminum Cable

All splicer/reducers are dual rated for use with aluminum and copper conductors and are constructed from high strength, tin plated aluminum. PENETROX™ oxide inhibiting joint compounds are recommended for all aluminum applications.

**Features & Benefits**

- All connectors are tin-plated
  - ◊ Provide low contact resistance and prevents galvanic corrosion
- Connectors feature rounded bottoms
  - ◊ Facilitates taping
- Solid center barrier
  - ◊ Prevents contact of dissimilar metals
- Large screw diameters
  - ◊ Ensures greater surface contact with wires for maximum pullout force
- Large cable ranges
  - ◊ Each splice is also an effective reducing connector

\* Slotted Screws. H2 measured with maximum conductors, reference only. ✓ Complies with NFPA 78-86.

### TYPE AGSKIT

#### ABOVE GRADE SPLICE KITS

For all Aluminum or Copper/Aluminum Combinations

Type AGS Above Grade Splice Kit consists of a standard AMS splice/reducer and a heavy wall heat-shrink sleeve. The AMS Splice is dual rated for use with aluminum and copper conductors and are constructed from high strength, tin plated aluminum that provides low contact resistance and reduces the effects of galvanic corrosion. Connector is installed with common installation tools. The heavy wall heat shrink sleeve is lined with adhesive material, providing a positive seal against moisture egress. Heat shrink sleeve is installed with standard propane torch, or electric heat gun.

Fig. 1

Fig. 2

Catalog Number	Figure Number	Wire Range
AGSKIT2	1	8 AWG-2 AWG
AGSKIT250	2	1 AWG-250 kcmil

### TYPE UGSKIT

#### WATERTIGHT/ UNDERGROUND SPLICE KITS

For all Aluminum or Copper/Aluminum Combinations

Type UGS Watertight Underground Splice Kit consists of a standard AMS splice/reducer and two heavy wall heat-shrink sleeves. The AMS Splice is dual rated for use with aluminum and copper conductors and are constructed from high strength, tin plated aluminum that provides low contact resistance and reduces the effects of galvanic corrosion. Connector installed with common installation tools. Both heavy wall heat shrink sleeves are lined with adhesive material, providing a watertight splice that can withstand abrasions that may occur during direct burial applications. Heat shrink sleeve installed with standard propane torch, or electric heat gun.

\*UL486D Listed for Direct Burial

**TYPE UGSKIT8**

**UF DIRECT BURIAL SPLICE KIT**

Type UGS UF Splice Kit consists of a UF splice connector and a heavy wall heat-shrink sleeve. The UF splice connector can accommodate up to four UF conductors and is installed with common installation tools. The heavy wall heat shrink sleeve is lined with an adhesive material, providing a water-tight splice that can withstand abrasions that may occur during direct burial applications. Heat shrink sleeve installed with standard propane torch, or electric heat gun.

### BURNDY UNITAP™

#### THE MOLE™

For Direct Burial

600V, 90° C

Designed specifically for direct burial applications, the MOLE™ in-line splice/reducer is made with a specialized plastisol material that forms a rugged weathertight connection.

#### Features & Benefits

- UL486D Listed for direct burial.
- AL9CU Dual-rated for copper and aluminum applications. 600V 90°C.
- Plastisol covered AL6061-T6 aluminum body saves time by eliminating the need for heat shrink.
- Oxide inhibitor pre-installed preventing moisture and contaminants from entering contact area.
- Range-taking capability reduces the number of connectors carried in inventory.

BISR-DB = BURNDY Inline Splice/Reducer Direct Burial.  
 UNITAP™ rated for code conductor only.

**Direct Burial UNITAP™  
Connectors**

**UNITAP™**

**Dual Rated Multiple Tap Connector**

These rubber insulated, dual rated connectors are for use in networks up to 600V. Suitable in light fixture pole bases in commercial, industrial, or residential markets. Distribution within strip malls, for use in any multi-tenant facility. No taping or heat shrink required.

**Features & Benefits**

- Dual rated for aluminum or copper conductors
- Each unit is individually marked for ease of identification
- Supplied with aluminum set-screws
- Covering is the highest quality EPDM rubber
- Supplied with oxide inhibitor pre-installed
- Submersible rated
- Suitable for direct burial
- Meets ANSI C119.1 and C119.4 requirements
- Rated 600V and 90° C; UL Listed and CSA Certified
- For use in wet or damp locations
- Silicone provided for conductor insertion

### UNITAP™ Clear Insulated Multi-Tap

#### UL Listed 486A-486B

UNITAP™ Clear Insulated Multi-Tap is UL Listed to the UL Wire Connector Standard UL486A-486B and CSA Certified for use with flexible (fine stranded) conductor - with no ferrules required! Featuring color coordinated conductor port and screw port caps making it easy to identify the maximum conductor size accommodated by the connector.

A disc-pad screw has also been incorporated to prevent damage to the fine strands as the conductor is compressed during installation. The connectors are shipped with the 'pad' attached to the screw by a thin stem; during installation the pad is sheared from the stem as it makes contact with the conductor and remains stationary as the screw continues to rotate until the recommended installation torque is achieved.

The color coordinated conductor port caps display the wire range and classes of conductor accepted by the specific connector. The screw port caps show the installation torque information for quick and easy reference during installation.

#### Features & Benefits

- 600 Volt Rated
- Fully Insulated Aluminum 6061-T6 connector body saves time and lowers installation costs by eliminating the need for taping
- Listed to UL486A-B (File E9498)
- CSA Certified to C22.2, No. 65 (File 042860\_c\_00)
- Rated for use with flex conductor (No Ferrules Required!)
- AL9CU dual rated for use with copper and aluminum conductors
- Range taking designs will accommodate wire sizes from #14-750 kcmil Class B & C, and #14-535 DLO Flex
- Configurations include Taps, In-Line Splice Reducers, Single-Sided Entry, and Double-Sided Entry with the number of ports from 2 to 14
- Clear Plastisol Insulation allows visual confirmation that conductor is properly inserted into port
- Operating temperature from -40°C to 135°C
- Conductor ports are pre-filled with oxide inhibitor
- Screw Port and Conductor Port caps provided to protect against contamination and accidental contact of energized parts
- Caps are color coordinated to quickly identify maximum conductor size accommodated
- Screw Port caps contain recommended installation torque values for quick and easy reference
- Conductor Port caps contain the accommodated wire range and allowable conductor classes

TYPES BIT, BITO, BISR

UNITAP™

Clear Insulated Multiple Tap Connectors

Tap connections and in-line splice/reductions are made quickly and easily with the UNITAP™ line of connectors. UL486B Listed. Dual-rated AL9CU for any stranded copper or stranded aluminum applications. 600 Volt, 90° C.

Fig. 1

Fig. 2

Features & Benefits

- Clear Plastisol covered AL6061-T6 aluminum body
  - ◊ Saves time, lowers installation costs, eliminates taping.
- Clear Plastisol
  - ◊ Allows visual confirmation that conductor is properly inserted.
- Oxide inhibitor pre-installed
  - ◊ Inhibits moisture and contaminants from entering the contact area.
- Range-taking
  - ◊ Reduces number of connectors carried in inventory.

### TYPE BIBS-MT, BIBD-MT

#### UNITAP™

#### Clear Insulated Multiple Tap Connectors Mounting Version

The BIBS-MT and BIBD-MT series UNITAP™ offer the same multi-port capabilities as the standard UNITAP™ connectors except these -MT types are provided with two isolated mounting holes at both ends of the connector for direct mounting to a trough, gutter or wireway. They will accommodate up to standard 1/4" hardware.

UNITAP™ rated for code conductor only.

UV RATED  
BLACK UNITAP™

UNITAP™

600V, 90°C

Features & Benefits

- UV Rated Plastisol covered AL6061-T6 aluminum body saves time by eliminating the need for taping.
- Oxide inhibitor pre-installed inhibits moisture and contaminants from entering the contact area.
- Range-taking capability reduces the number of connectors carried in inventory.
- UL486B Listed, AL9CU, 600V 90°C.

### VERSIPOLE™

**UL Listed 1953**  
**Finger-Safe IEC 60527; IP-20**  
**Rating**

The VERSIPOLE™ Configurable Series Power Distribution Blocks are used for splicing and distributing power from primary run(s) to secondary/branch circuits. They are offered in standard one, two, or three pole configurations. Each configuration is available in either an "Open" or "Finger-Safe" style. The configurable series can also be designed to accommodate an infinite number of made-to-order combinations.

Figure 1

Finger-Safe Style comes with covers & end plates

### Features & Benefits

- 1000 Volt rated
- Listed to UL1953
- Rated for use with both code and flex conductor without requiring ferrules
- Available in three sizes for space optimization
- AL9CU dual rated for use with copper and aluminum conductors
- Range taking designs accommodate wire sizes up to 535 DLO and can support 1 or 2 run conductors and up to 12 taps for secondary circuits
- Allow for panel mounting; medium and large sizes also allow for DIN rail mounting
- Finger-Safe style are provided with translucent polycarbonate top covers and end plates to permit easy visual inspection and provide IEC 60529 IP-20 Rating
- High Short-Circuit Current rating up to 100kA with proper fusing
- Bases and side barriers of glass-reinforced nylon 6/6 for extra durability and excellent insulating properties; carry a UL94 flammability rating of V0

Finger-Safe Kits include only covers & end plates

Figure 3

### Ordering Information & Footnotes:

**Finger-Safe Kits** include translucent top cover and end plates only. Order 1 kit per pole. The kits are used in conjunction with Open style distribution blocks. (Distribution blocks are not included.)

† To achieve Finger-Safe style Addder order Open style Addder and Finger-Safe Kit

**Optional Hinged Covers** are available for use with Open style blocks and are ordered 1 cover per pole.

Optional Hinged Covers:	
Catalog Number	Size
<a href="#">BDBSCCOVER</a>	Small
<a href="#">BDBMCOVER</a>	Medium
<a href="#">BDBLCCOVER</a>	Large

**UL LISTED  
POWER DISTRIBUTION  
BLOCKS**

VERSIPOLE™

These Power Distribution Blocks are Listed to the Power Distribution Block Standard UL 1953. They contain the same features and characteristics as the non-Listed blocks however, these have spacings that are suitable for installations in most industrial control panel feeder and branch circuits, HVAC systems, and Wireways (with optional cover; sold separately). They are available in one, two, or three pole configurations. An “Adder” is also available with optional End Barrier (sold separately), to allow user customized configurations.

**Features & Benefits**

- Single or dual run connections allow the user to minimize the number of connections required
- Suitable for use with aluminum or copper conductors providing maximum versatility
- Available in 3 sizes for optimization of space
- 600V, ALCU Rated; meets or exceeds industry standard requirements
- Range taking designs to accommodate wire sizes up to 600 kcmil
- High Short-Circuit Rating up to 100kA with proper fusing
- Meets spacing requirements of Industrial Control Panel Standard UL 508A (spacing of 1” through air and 2” over surface)
- Adders and End Barriers available separately for all 3 sizes providing capability to create as many poles as required
- Hinged Covers available separately to cover 3 sizes providing user protection and easy access to connector terminal block

TYPE K-AG1

ALUMINUM NEUTRAL BAR

These aluminum neutral bars are dual rated for copper and aluminum conductors, and are manufactured from high strength 6061-T6 aluminum alloy and are electro tin plated to provide low contact resistance and protection against corrosion.

For bulk pack contact factory.

**TYPE BWTE**

**WALL-MOUNTED TERMINATION ENCLOSURES**

These are three-phase, NEMA 3R (rain-proof), 600 Volt Rated wall mounted termination enclosures.

**Features and Benefits**

- Aluminum mechanical bar connectors eliminates need for compressions tools, lugs, and bolt assemblies
- Aluminum enclosure is lightweight, low maintenance and has excellent corrosion resistance
- Ample working space, allowing for easier termination with a removeable swinging door
- All-welded construction: welds and seams are ground smooth
- Manufactured to meet or exceed ANSI C57-12.28 for wall-mounted equipment enclosure integrity
- Three-point positive latch mechanism (secured and operated by a half-turn, captive and recessed penta-head bolt) and shielded padlock shackle
- Finish meets or exceeds proposed EEI paint specification
- Finish is gray, oven cured powder coat
- All mounting hardware is 18-8 stainless steel

**TYPE BPTE**

**PAD-MOUNTED TERMINATION ENCLOSURES**

These are three-phase, NEMA 3R (rain-proof), 600 Volt Rated pad mounted termination enclosures.

**Features and Benefits**

- Aluminum mechanical bar connectors eliminates need for compressions tools, lugs and bolt assemblies
- Aluminum enclosure is lightweight, low maintenance and has excellent corrosion resistance
- Ample working space, allowing for easier termination with a removeable swinging door
- All-welded construction: welds and seams are ground smooth
- Manufactured to meet or exceed ANSI C57-12.28 for wall-mounted equipment enclosure integrity
- Removable swinging doors - doors have stainless steel lift off hinges with stainless steel three point locking handles and recessed stainless steel penta-head bolts for security
- Finish is Munsell green, oven cured powder coat
- All mounting hardware is 18-8 stainless steel

**TYPE BPCL**

**Disposable Enclosure Locks**

Disposable enclosure locks provide quick locking and serve as an alternative to using padlocks. Generally, disposable locks are used to ensure tamper-proof safety and are less expensive. Used where entry is not required on a regular basis, such as electric meters, truck/trailer doors, electrical cabinets, and shipping containers, these locks provide the security of a shear head screw during installation. Available in 4 different designs, they are packaged 20 pieces to a bag.

**Features and Benefits**

- Alternative to padlocks
- Economical
- Corrosion free
- Adjustable to fit any hasp
- Excellent for locking points that are accessed infrequently
- Provide a more substantial solution than a wire seal
- Shear head screw provides easy installation and tamper proof security

Catalog Number	Figure #	Dimensions in Inches

**POWER DISTRIBUTION BLOCKS**

**U-BLOK™**

For Junction Box Applications

The U-BLOK™ system is a modern, state-of-the-art approach to multi-load power distribution applications. Among typical uses are multi-story or multi-unit buildings, HVAC, refrigeration, control panels, motor control, switch gear, elevator systems and materials handling equipment. U-BLOK™ is UL Listed for Copper or Aluminum conductors and rated for 600-volt applications. U-BLOK™ can be mounted on bases for use in troughs or bolted directly to junction boxes. AL9CU rated.

**FT4B500**

**FT3B4/0**

**3S**

**3U**

**Features & Benefits**

- Connector top slides OFF/ON for quick cable lay-in
  - ◊ Labor savings. Easy access for installation, modifications or retrofit.
- Electro-tin plated connectors in each pole
  - ◊ Durability. High-conductivity and resistance to corrosion.
- Compact size
  - ◊ Requires less space than traditional connection methods.
- Trough installations can be mounted on

- raised platforms
  - ◊ Passage of cables under block means through-cables need not be terminated
- Insulating covers and mounting blocks rated 94-VO
  - ◊ Saves costly taping, time and material. Conforms to or exceeds building codes.
- Connectors accommodate a wide range of wire sizes
  - ◊ Reduces parts inventory requirements.
- Feeder conductors can be cut or fed through on a continuous run
  - ◊ Ease of installation.

\*\* NOTE: Values referenced from Article 310 of the National Electric Code, Table 310-16, 1996. The above chart is to be used for REFERENCE ONLY. Please consult Table 310-16 of the National Electric Code (latest revision) for information regarding insulation type, voltage range, and conductor housings/surroundings. U-TAP™, U-BLOK™, and SPEC-BLOK™ connectors are rated for 90 deg. C by Underwriters' Laboratories. Use of 60 deg. C and 75 deg. C conductor(s) is valid, though only as determined by the National Electric Code.

## SPEC-BLOK™ POWER DISTRIBUTION CONNECTORS

Unique, modular, made-to-order, power distribution assemblies accommodate any number of supply and load conductors in any number of poles. Capacity matches the conductors accommodated and SPEC-BLOK™ assures uniform loading. Adjacent poles are separated by easy-to handle, wrap-around insulating covers which eliminate taping and reduce heat build-up by allowing air to flow freely around connectors. SPEC-BLOK™ is UL Listed for copper or aluminum conductors for 600 volts. (AL9CU) Assemblies are mounted on platforms suitable for easy installation in wireway or junction box.

### Features & Benefits

- Accommodate unlimited conductors
  - ◇ Fits wide range of applications.
  - Eliminates need for non-UL-Listed improvisation.
- Connector elements tin-plated
  - ◇ Provides high reliability, low-resistance connections.
- User friendly, space-saving design
  - ◇ Easy to install - saves labor.
- 94-VO rated insulation folds into place insulating the components
  - ◇ Saves time and material. Allows easy installation.
- Connector caps removable for easy cable lay-in
  - ◇ Saves labor. Makes installation easier - allows installation of straight-through conductors.
  - Eases retrofit.
- Belleville washers built-in on pressure screw assemblies, except in assemblies installed with a 5/32" Allen wrench
  - ◇ Provides high-integrity connections.
- Conductors can be cut or fed straight through
  - ◇ Straight through installation ideal for riser applications.

### SPEC-BLOK™

### Features & Benefits

- The SPEC-BLOK™ system includes 12 connector elements
  - ◊ A wide variety of conductor sizes can be accommodated
- Each element can be bolted together in parallel
  - ◊ Provides an efficient flow of current from one element to another
- AL9CU rated for Copper or Aluminum conductors
  - ◊ Dual-rated system, with UL486B's highest temperature rating
- 2 Wire (series), 4 (parallel), and Multi-Tap versions available
  - ◊ Nearly any conductor combination can be terminated
- Tin-plated Aluminum Alloy Construction
  - ◊ High-strength, corrosion-resistant connector elements
- All SPEC-BLOK™ connectors are custom made for nearly any Power Distribution system requirement
  - ◊ Time savings — pre-assembled in our factory for immediate installation!

SPEC-BLOK™ CONNECTORS

Catalog Designation (Maximum Conductor)	Number of Conductors Accommodated	Large Groove	Small Grooves**	Height On Maximum Conductors	Width	Length Without Insulator	Allen Wrench Size
P (1/0)	1 to 8 (0, 1 or 2 under each screw)	—	6 - 1/0	3-1/2"	2"	1-3/4"	5/32"
U (1/0 & 500)	2 to 9 (0, 1 or 2 under each screw plus one large conductor)	3/0 - 500	6 - 1/0	4-1/8"	2"		

\*\* This range may be expanded to include #8 provided two conductors are being installed in that particular element.

**SPEC-BLOK™**

**MOUNTING PLATFORMS**

SPEC-BLOK™ Mounting Platforms are rigid steel construction with a black finish.

They can be supplied for junction box mounting or wireway construction allowing trough conductors to pass underneath the assemblies.

Catalog Number	L (Nominal)	L (Overall)	W (Overall)
CPB6	6	7-3/4	2-1/2
CPB8	8	9-3/4	2-1/2
CPB10	10	11-3/4	2-1/2
CPB12	12	13-3/4	3-1/2
CPB14	14	15-3/4	3-1/2

CPT12	11-7/8	4	3-1/2
CPT16	15-7/8	4	3-1/2

**SPEC-BLOK™ catalog numbers describe exactly how the distribution block is assembled:**

- 5 Total number of poles in the completed assembly
- DR One 'D' unit and one 'R' unit, bolted in parallel, forming each phase pole (3 phase poles)
- N Denotes the beginning of the neutral pole (where required)
- DST One 'D' unit, one 'S' unit, and one 'T' unit, bolted in parallel, forming the neutral pole
- G Denotes the beginning of the ground pole description (where required)
- QP One 'Q' unit and one 'P' unit, bolted in parallel, forming the ground pole
- 12 Size (inches) of the wireway or trough that is needed to enclose the assembly. If a junction box enclosure is used, no number is used to denote the size of the enclosure

5DR-NDST-GQP-12 (assembly pictured)

**SPEC-BLOK™ IS A SYSTEM THAT CAN SOLVE MOST POWER DISTRIBUTION APPLICATIONS!**

# Questionnaire

## For SPEC-BLOK™ Applications

How many poles in the system? (3-wire, 4-wire, single phase, etc.)? \_\_\_\_\_ poles

Are neutral conductors (when required) different sizes (AWG/kcmil) than the phase conductors?

\_\_\_\_\_ same size      \_\_\_\_\_ different size

Is a ground connection required?  Yes  No

What are the quantities, sizes (AWG/kcmil) and material (Al/Cu) of the incoming line conductors and outgoing load conductors?

		QUANTITY	SIZE	CONDUCTOR TYPE
PER PHASE	LINE			
	LOAD			
NEUTRAL <input type="checkbox"/> Yes <input type="checkbox"/> No	LINE			
	LOAD			
GROUND <input type="checkbox"/> Yes <input type="checkbox"/> No	LINE			
	LOAD			

Are any conductors continuous?  Yes  No

If yes, which ones? \_\_\_\_\_  
\_\_\_\_\_

What kind of enclosure is the connection assembly being mounted in and what are the inside space dimensions?

Wireway/trough size \_\_\_\_\_

Box, panel, cabinet, other size \_\_\_\_\_

When is a quotation required? Date \_\_\_\_\_ When is the material required? Date \_\_\_\_\_

Name of requestor \_\_\_\_\_ Job name/reference \_\_\_\_\_

Is there a preference for a particular BURNDY distributor?  Yes  No

If yes, please give the name, location and telephone number

Name \_\_\_\_\_ Phone \_\_\_\_\_

Address \_\_\_\_\_

## Performance

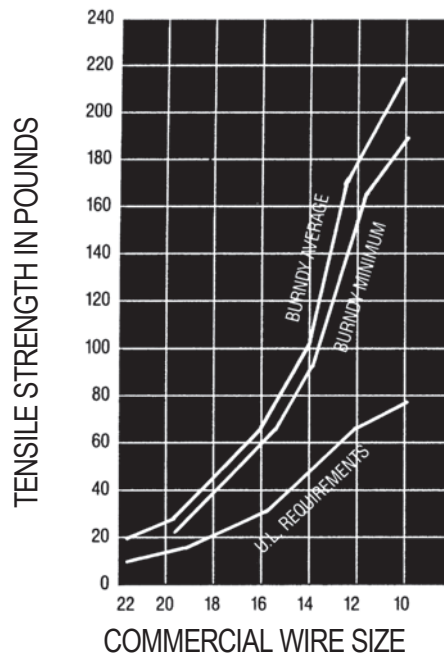

B-2

The terminals and splices in this catalog are approved, per SAE-AS7928 and/or UL486, where indicated. Table 1 shows the performance requirements for terminals used in military and commercial equipment. The voltage drops listed are maximum allowable values taken at currents well above rated current for the wires. Tensile values assure that the wires will not become separated from the terminals under reasonably expected stresses. UL tensile values are chosen to reflect the severest expected duty. MIL Specification tensile values apply only to crimp terminations and reflect minimum values that are obtained in good crimp joints. Actual performance of BURNDY terminals exceeds the requirements of Table 1. Typical values are shown in Figures 1-5. For High Temperature applications BURNDY® YAV series with nickel plating “-NK” suffix provide for continuous operation to 650° F and 750° F intermittent service.

TYPES T AND YAD

HYLUG™

Uninsulated Compression Ring Tongue Terminal

The Type T uninsulated terminals are constructed of pure electrolytic copper. Designed with a long brazed seam barrel, standard neck, deep V groove inner serrations and electro-tin plated. The terminals are ideal for control wiring and other standard duty applications.

The ring tongue provides a secure termination under the screw head that cannot be removed without the complete removal of the screw. Two or more terminals can easily be stacked on a common stud.

**NOTE:** Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

Features & Benefits

- Constructed of pure electrolytic copper
  - ◇ Provides maximum conductivity, low resistance and ductility for excellent crimp forming properties
- Long brazed seam barrel and deep V groove inner serrations
  - ◇ Provides optimum conductivity reliability and holding power after crimping
- Electro-tin plated
  - ◇ Provides durable long-lasting corrosion resistance
- Wire range is clearly marked on terminal
  - ◇ Provides easy identification
- Inspection hole
  - ◇ Provides an easy visual check of wire insertion
- Long neck terminal
  - ◇ Permits easy bending and stacking of several terminals on a common stud

## TYPE YAD

B-6

### HYLUG™

#### Uninsulated Compression Terminal

The YAD uninsulated OEM lug terminal is constructed of electrolytic copper. Designed with a brazed seam barrel, standard neck, V-groove inner serrations and electro-tin plated. The round ring tongue provides for a secure termination under the screw head that cannot be removed without the complete removal of the screw. Two or more terminals can easily be stacked on a common stud. These terminals are ideal for use with code or flex cable.

#### Features & Benefits

- Terminals utilize a brazed seam
- Provide excellent high conductivity connections
- Electro-tin plated for durable long lasting corrosion resistance

- Vibration resistance and tensile strength is well within the limits of commercial specifications

**NOTE:** Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

## TYPES TP AND BA

B-8

### VINYLUG™

Terminal — Polyvinylchloride Insulated, Ring Tongue

600 Volts Max., 105° C Max.

VINYLUG™ Type TP is designed for commercial and light duty industrial control and power circuit applications. Supplied with an expanded polyvinyl chloride (PVC) insulation shroud, many tongue variations and rated 600V makes TP terminals versatile and economical.

**NOTE:** Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

### Features & Benefits

- Expanded insulation support accepts standard and large wire diameters
  - ◇ Lowers inventory requirements, permits greater flexibility and provides insulation support
- Funnel entry
  - ◇ Easy wire insertion
- Manufactured of pure electrolytic copper
  - ◇ Provides maximum conductivity, low resistance and ductility for excellent crimp forming properties
- Deep V groove serrations in the inner barrel
  - ◇ Provides added holding strength and better conductivity
- Electro-tin plated
  - ◇ Provides durable long-lasting corrosion resistance

TYPES TN AND YAES

INSULUG™

Terminal - Nylon Insulated,  
Ring Tongue  
600 Volts Max., 105° C Max.

B-9

INSULUG™ type TN Nylon-insulated terminals are designed for heavy duty industrial, utility and military power and control-circuit applications for wire sizes 26 AWG through 10 AWG. They offer high dielectric strength and stability in oily conditions and meet military CLASS 1 and CLASS 2 requirements per SAE-AS25036 and the requirements of military specifications SAE-AS7928.

**NOTE:** Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

Features & Benefits

- An integral one-piece copper barrel / insulation grip and wire strain relief design
  - ◊ Provides improved physical strength characteristics over a multi-piece design
- Manufactured of pure electrolytic copper
  - ◊ Provides maximum conductivity, low resistance and ductility for excellent crimp forming properties
- Brazed seam
  - ◊ Provides a stronger barrel design to minimize any possible splitting and eliminates folding
- Deep inner barrel serrations
  - ◊ Provides excellent electrical conductivity and pullout strength values

- Smooth funnel entry
  - ◊ Easy wire insertion
- The insulation is locked in place
  - ◊ Will not twist off, thereby maintains proper dielectric values
- Electro-tin plated
  - ◊ Provides durable long-lasting resistance to corrosion
- Color-coded and clearly marked
  - ◊ Provides quick, easy wire size identification
- Ring Tongue
  - ◊ Provides a secure termination under the screw head that can not be removed without complete removal of the screw
- Two or more terminals may be stacked on a common stud easily
  - ◊ Provides flexibility and versatility

TYPES YAE-G

B-10

INSULUG™

Terminal — Nylon Insulated, Ring-Tongue Multi-Finger Insulation Grip

300 Volts Max., 105° C Max.

INSULUG™ Types YAE-G and YAE-N nylon insulated terminals are designed with a multi-finger insulation grip for paper, EPR and other elastic or hard to grip insulations. The metal fingers firmly grip the insulation providing superior holding characteristics, cable support and strain relief. Types YAE-G and YAE-N terminals are rated 105° C and meet military standard AS25036 Class 2 and SAE-AS7928 requirements.

Features & Benefits

- Multi-finger insulation grip
  - ◊ Provides superior insulation holding characteristics, especially on EPR and other elastic-type insulations
- Brazed seam
  - ◊ Provides stronger more durable termination
- Manufactured of pure electrolytic copper
  - ◊ Provides maximum conductivity, low resistance and ductility for excellent crimp forming properties
- Deep V groove, inner barrel serrations
  - ◊ Provide optimum conductivity, reliability, and holding power
- Smooth funnel entry
  - ◊ Easy wire insertion

**NOTE:** Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

TYPE YAE-N

INSULUG™

Terminal - Nylon Insulated,  
Ring Tongue Multi-Finger  
Insulation Grip  
600 Volts Max., 105° C Max.

B-11

INSULUG™ Type YAE-N nylon insulated terminals are designed with a multi-finger insulation grip for paper, EPR and other elastic or hard to grip insulations. The metal fingers firmly grip the insulation providing superior holding characteristics, cable support and strain relief. Type YAE-N terminals are rated 105° C and meet military standard AS25036 Class 2 and SAE-AS7928 requirements.

Features & Benefits

- Multi-finger insulation grip
- Provides superior insulation holding characteristics, especially on EPR and other elastic-type insulations
- Brazed seam
- Provides stronger more durable termination
- Manufactured of pure electrolytic copper
- Provides maximum conductivity, low

resistance and ductility for excellent crimp forming properties

- Deep V groove, inner barrel serrations
- Provide optimum conductivity, reliability, and holding power
- Smooth funnel entry
- Easy wire insertion

**NOTE:** Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

## TYPE YHSA

B-12

### HYDENT™ HEAT SHRINK RING TERMINALS

#### For Use on Copper Conductor

Standard crimp terminals leave the wire exposed allowing in moisture or other contaminants which can result in corrosion. Corrosion reduces the amount of current the wire can carry safely. The integrity of the electrical system can be compromised when unsealed electrical connections are utilized. Heat shrink terminals provide a durable seal blocking out contaminants ensuring a better connection.

#### Features & Benefits

- Made from pure copper, annealed for maximum strength
- Color-coded, imprinted with wire size
- Serrated barrels offer maximum wire contact and tensile strength
- Electro tin plated for corrosion resistance
- Wire Strip Length 5/16"

**NOTE:** Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

TYPE YAES-K

INSULUG™

200 MEGARADS, -60° THROUGH 150° C, 600 VOLTS

The type YAES-K, radiation resistant insulated terminals are designed and have been tested to meet the requirements for class 1E critical circuits as set by the Nuclear Regulatory Commission (NRC). Additional testing for compatibility under loss of coolant accident (LOCA) conditions with cross-link polyethylene (XLP) and HYPALON® insulations was completed successfully. Compatibility with ethylene propylene rubber (EPR) insulation was determined by analysis. Each terminal is manufactured of pure electrolytic copper per QQ-C 576 and bright tin-plated per MIL-T-10727 and meets or exceeds MIL-T-7928 using stranded copper AWG wire. The KYNAR® insulation offers 200 megarad radiation resistance.

The Type YAES-K radiation resistant insulated terminals are suitable for class 1E critical circuits and non-critical nuclear associated applications.

**NOTE:** Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

KYNAR - is a registered trademark of the Pennwalt Corp. for Polyvinylindene Floride (PVF<sub>2</sub>)  
 HYPALON - Is a registered trademark of the E.I. DuPont deNemours & Co., Inc.

Features & Benefits

- Insulation provides 200 megarad radiation resistance plus successfully tested for insulation compatibility
  - ◇ Provides improved physical strength characteristics over a multi-piece design.
- An integral one-piece copper barrel/insulation grip and wire strain relief design
  - ◇ Provides improved physical strength characteristics over a multi-piece design.
- The insulation is locked in place
  - ◇ The insulation will not move or twist off, thereby maintains proper dielectric values.
- Manufactured from pure electrolytic copper
  - ◇ Provides maximum conductivity, low resistance and ductility for excellent crimp forming properties.
- Bright tin-plated per MIL-T-10727
  - ◇ Provides durable long-lasting resistance to corrosion.
- Deep inner barrel serrations
  - ◇ Provides excellent electrical conductivity and tensile strength values.
- Brazed seam
  - ◇ Provides a stronger barrel design to minimize any possible splitting and eliminates folding.
- Smooth funnel entry
  - ◇ Easy wire insertion.
- Color coded terminals
  - ◇ Provides easy wire size identification and inspection.
- Coded raised dots in the die area of the connection after compression
  - ◇ Provides visual identification that the correct tool and die were used for proper installation.
- Inspection hole
  - ◇ Permits visual check for proper wire insertion.
- Ring tongue design
  - ◇ Provides a secure termination under screw head that cannot be removed without the complete removal of the screw.
- Multiple terminals may be stacked on a common stud easily
  - ◇ Provides flexibility and versatility.

**TYPES YAV BOX AND YAV**

**HYLUG™**

**Seamless Uninsulated Compression Heavy Duty Ring Tongue Terminal**

HYLUG™ type YAV is a seamless, heavy duty uninsulated compression ring tongue terminal manufactured from pure electrolytic copper tubing and is for use on copper commercial (code) cable, type AN aircraft cable and extra flexible conductors. Because of its seamless design, the YAV HYLUG™ also accommodates solid conductors.

The seamless tubing produces a double thick tongue and a strong connector for demanding applications that require high reliability. Applications include industrials, hospitals, electric utilities, aircraft, shipboard and marine, computers, steel mills, mining equipment and other equipment that is subject to vibration or requiring dependable electrical performance.

The YAV HYLUG™ terminals meet the requirements of SAE-AS7928.

**Features & Benefits**

- Manufactured from seamless pure electrolytic copper tubing
- Provides maximum conductivity, low resistance and excellent ductility for crimping
- Seamless tubular crimp barrel design
- No seams to split resulting in a very high quality electrical connection, also can be used on solid conductor
- Double thick tongue
- Provides a very strong terminal tongue
- Produced from tubular copper
- Extra copper material assures the compression connector will operate cooler than the conductors it connects
- Internally bevelled barrel
- Provides easy cable entry, especially for flexible conductors

- Inspection hole
- Provides easy visual check for proper conductor insertion
- Electro-tin plated
- Provides long lasting durable corrosion resistance
- Nickel plating available, add "NK" suffix
- Nickel plated HYLUG™ provide high temperature applications up to 650° F continuous service and 750° F intermittent service

**NOTE:** Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

## TYPES YAV-L BOX AND YAV-L

### HYLUG™

Large Size Uninsulated Compression Terminals Seamless Uninsulated Compression Ring Tongue Terminal

#8-4/0 Str. Copper

HYLUG™ Type YAV is a seamless, heavy duty uninsulated compression terminal manufactured from electrolytic copper and is for use on Type AN aircraft cable, extra flexible conductors and commercial (code) conductors. The seamless tubing produces a double thick tongue and seamless barrel design provides a strong connector for demanding applications requiring high reliability.

Applications include aircraft, industrials, hospitals, electric utilities, marine, computers, and other equipment subject to vibration or requiring dependable electrical performance. The YAV HYLUG™ terminals meet the requirements of SAE-AS7928 and are listed per AS20659 for use with copper aircraft cable per MIL-WV-5086

The benefits of YAV-L connectors are the same as YAV connectors for stranded conductors.

**NOTE:** Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

## TYPES YAV-H BOX AND YAV-H

B-18

### HYLUG™

### Seamless Uninsulated Compression Ring Tongue Terminal With Shroud

The type YAV-H HYLUG™ is a seamless heavy duty uninsulated compression ring tongue terminal with a shroud for an insulation grip and cable support. They are manufactured from pure electrolytic copper tubing for use on copper commercial (code) cable, Type AN aircraft cable and extra flexible conductors.

The seamless design produces a double thick tongue and the seamless barrel provides a strong highly reliable connection. Meets the requirements of SAE-AS7928. The benefits of the Type YAV apply to the YAV-H HYLUG™.

### Features & Benefits

- Shroud/insulation grip cable support and strain relief
  - ◇ Protects the wire against breaking under vibration or flexing conditions
- Electro-tin plated
  - ◇ Provides long-lasting corrosion resistance

**NOTE:** Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

**TYPES YAEV AND YAEV-L**

**INSULUG™**

Terminal — Nylon Insulated — Ring-Tongue

600 Volts Max., 105° C Max.

The INSULUG™ type YAEV is designed for very demanding high vibration applications encountered in aircraft and aboard ships as well as motor lead applications in hospitals, industrials and generating plants. The nylon insulated seamless, electrolytic copper barrel with double thick tongue provides an extra strong insulated connection. The terminal is rated 105°C and meets MIL-T-7928 requirements.

**NOTE:** Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

**Features & Benefits**

- Double thick tongue.
  - ◇ Provides maximum reliability and electrical capacity plus an extra strong terminal tongue.
- Manufactured from one-piece pure electrolytic copper.
  - ◇ Provides high conductivity, low resistance with no seams to split plus ductility for excellent crimp forming properties.
- Electro-tin plated.
  - ◇ Provides long-lasting corrosion resistance.
- Nylon insulation is locked in place.
  - ◇ Insulation will not move or twist off
- 300 volt nylon insulation.
  - ◇ High dielectric strength and stability in demanding oily environmental conditions.
- Color Coded.
  - ◇ Provides quick, easy wire size connector selection.

TYPES YAV-R, YAV-RS

HYLUG™

Heavy Duty Right-Angle Terminals

B-23

Factory formed right angle HYLUG™ connectors made of seamless pure copper tubing. These rugged terminals withstand the most severe applications. Inspection hole in barrel permits visual check of wire insertion. Tin plated to resist corrosion. Meets requirements of SAE-AS7928.

**NOTE:** Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

TYPE T-F AND YAD-F

HYLUG™

Uninsulated Compression Terminal,  
Fork Tongue

B-27

Type T-F is constructed in the same manner as the type "T" and employs a fork tongue. The fork permits rapid installation of the terminal under a screw head without completely removing the screw. Two or more terminals may be stacked easily on a common stud.

Features & Benefits

- Fork tongue design.
- ◊ Faster installation-screw needs only to be loosened for termination.

NOTE: Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

## TYPES TP-F AND BA-EF

B-28

### VINYLUG™

Terminal - Polyvinylchloride Insulated, Fork Tongue

600 Volts Max., 105° C Max.

The Type TP-F is a fork tongue variation of the TP design and makes installation easier.

**NOTE:** Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

### Features & Benefits

- Fork tongue design
- ◇ Faster installation-screw needs only to be loosened for termination

\* 1000/Box

MRE1022NV Ergonomic Hand Tool perfect for use with the TP-F; suitable for most nylon and vinyl insulated small terminals. MRE1022B is designed for use with bare (uninsulated) terminals. Part of the BURNDY Engineered System of coordinating connectors, tools and dies for a quality, reliable, repeatable connection.

See the Tooling section for more information on this and other BURNDY Tools.

TYPES TN-F AND YAES-F

INSULUG™

Terminal - Nylon Insulated,  
Fork Tongue

600 Volts Max., 105° C Max.

The type TN-F, nylon insulated fork tongue terminal has the same high quality as the TN. It is designed to meet the heavy-duty requirements of industrial and utility applications.

Used on both power and control circuits for wire sizes #26 AWG through #10 AWG. The TN-F provides high dielectric strength and stability in oily conditions.

The TN-F is identical to the TN with the addition of a fork tongue which allows installation without complete removal of its supporting screw.

Features & Benefits

- Fork tongue
  - ◇ Provides faster and easier installation by permitting insertion under the screw head without completely removing it.

NOTE: Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

## TYPES YAE-N-F BOX AND YAE-N-F

### INSULUG™

Terminal - Nylon Insulated, Fork Tongue

Multi-Finger Insulation Grip

600 Volts Max. 105° C Max.

INSULUG™ type YAE-N-F nylon insulated terminals are designed with a Multi-Finger Insulation grip, are rated 105° C and are supplied with a fork tongue for easy terminal insertion and removal.

### Features & Benefits

- Fork tongue
  - ◊ Permits rapid easy installation of the terminal under the screw head without complete removal of the screw

NOTE: Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

TYPE YHSA-F

HYDENT™ HEAT SHRINK  
FORK TONGUE TERMINALS

For Use on Copper Conductor

B-31

Standard crimp terminals leave the wire exposed allowing in moisture or other contaminants which can result in corrosion. Corrosion reduces the amount of current the wire can carry safely. The integrity of the electrical system can be compromised when unsealed electrical connections are utilized. Heat shrink terminals provide a durable seal blocking out contaminants ensuring a better connection.

Features & Benefits

- Made from pure copper, annealed for maximum strength
- Color-coded, imprinted with wire size
- Serrated barrels offer maximum wire contact and tensile strength
- Electro tin plated for corrosion resistance
- Wire Strip Length 5/16"

**NOTE:** Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

## TYPE T-LF

B-32

### HYLUG™

#### Uninsulated Compression Terminal Locking Fork Tongue

Type T-LF employs a locking fork tongue for fast installation and security.

#### Features & Benefits

- Locking fork tongue design allows fast installation - screw only has to be loosened for termination
- Internal configuration of the fork prevents the terminal from coming off the screw without applying a pulling force
- Locking fork is made from a copper alloy; permits many installations while maintaining proper spring retention of forks

**NOTE:** Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

TYPE TP-LF AND BA-EL

VINYLUG™

Terminal - Polyvinylchloride Insulated, Locking Fork Tongue

600 Volts Max., 105° C Max.

Type TP-LF is a variation of the Type TP design and employs a locking fork tongue for fast installation and security.

B-33

Features & Benefits

- Locking fork tongue design
  - ◇ Allows fast installation-screw only has to be loosened for termination.
- Internal configuration of the fork
  - ◇ Prevents the terminal from coming off the screw without applying a pulling force.
- Locking fork is made from a copper alloy
  - ◇ Permits many installations while maintaining proper spring retention of forks.

**NOTE:** Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

## TYPE TN-LF

B-34

### INSULUG™

Terminal - Nylon Insulated,  
Locking Fork Tongue  
300 Volts Max., 105° C Max.

The Type TN-LF, nylon insulated fork tongue terminal has the same high quality as the TN. It is designed to meet the heavy-duty requirements of industrial and utility applications.

Used on both power and control circuits for wire sizes #26 AWG through #10 AWG. The TN-LF provides high dielectric strength and stability in oily conditions.

The TN-LF is identical to the TN with the addition of a fork tongue which allows installation without complete removal of its supporting screw.

### Features & Benefits

- Locking fork tongue design
  - ◇ Allows fast installation-screw only has to be loosened for termination
- Internal configuration of the fork
  - ◇ Prevents the terminal from coming off the screw without applying a pulling force
- Locking fork is made from a copper alloy
  - ◇ Permits many installations while maintaining proper spring retention of forks

**NOTE:** Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

TYPE YAE-N-LF

INSULUG™

Terminal - Nylon Insulated,  
Locking Fork Tongue  
300 Volts Max., 105° C Max.

B-35

The YAE-N-LF Locking Fork is nylon insulated with an insulation grip and accepts a 22-10 AWG wire. The spring-like tongue locks into place around the stud even when the mount screw is not tightened.

Features & Benefits

- Locking Fork Tongue
- Rapid easy installation of terminal without complete removal of screw

NOTE: Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

## TYPE YAE-N-BF

B-40

### INSULUG™

Terminal - Nylon Insulated  
Block Fork Tongue

600 Volts Max., 105° C Max.

Type YAE-N-BF terminals are a block spade design featuring squared-off ends.

### Features & Benefits

- Rapid easy installation of terminal under the screw head without complete removal of the screw

**NOTE:** Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

TYPE YHSA-K-BF

HYDENT™ HEAT SHRINK  
BLOCK FORK

For Use on Copper Conductor

Standard crimp terminals leave the wire exposed allowing in moisture or other contaminants which can result in corrosion. Corrosion reduces the amount of current the wire can carry safely. The integrity of the electrical system can be compromised when unsealed electrical connections are utilized. Heat shrink terminals provide a durable seal blocking out contaminants ensuring a better connection.

Features & Benefits

- Made from copper, annealed for maximum strength
- Color-coded, imprinted with wire size
- Serrated barrels offer maximum wire contact and tensile strength
- Electro tin plated for corrosion resistance

**NOTE:** Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

## TYPE TP-Z AND BA-EZ

B-42

### VINYLUG™

Terminal - Polyvinylchloride Insulated,  
Flanged Fork Tongue

600 Volts Max., 105° C Max.

VINYLUG™ Type TP-Z is a variation of the Type TP and employs a flanged fork tongue for fast installation and security.

**NOTE:** Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

### Features & Benefits

- Flange fork tongue design
  - ◊ Allows fast installation—screw only has to be loosened for termination.
- The flanges on the end of the fork terminal aid in preventing a slightly loose terminal from becoming fully disconnected from the screw
  - ◊ Flanges make re-securing a loose terminal easier.

**TYPES YAE-Z BOX AND YAE-Z**

**INSULUG™**

Terminal - Nylon Insulated, Flanged Fork, Multi-Finger Insulation Grip

600 Volts Max. 105° C Max.

INSULUG™ type YAE-Z is identical to type YAE-N and employs a flanged fork tongue for faster installation while maintaining security if supporting screw becomes loose.

**Features & Benefits**

- Flanged fork
  - ◊ permits rapid, easy installation of the terminal under the screw head without complete removal of the screw.
  - ◊ Additionally, it may not be removed with only a slight loosening of the screw.

**NOTE:** Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

## TYPES YAV-T-F BOX AND YAV-T-F

### HYLUG™

#### Seamless Uninsulated Compression Fork Tongue Terminal

The type YAV-T-F HYLUG™ is a seamless heavy duty uninsulated compression fork-tongue terminal manufactured from electrolytic copper for use on copper commercial (code) cable, Type AN aircraft cable and extra flexible conductors.

The seamless design produces a double thick tongue and the seamless barrel provides a strong highly reliable connection.

All the benefits of the Type YAV apply for the same wire sizes.

#### Features & Benefits

- Fork tongue
  - Allows installation of compression terminal under screw head without complete removal of the screw.

**NOTE:** Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

**TYPES YAV-H-F BOX,  
YAV-H-F AND YAV-Z**

**HYLUG™**

**Uninsulated Compression  
Terminal Fork Tongue With  
Seamless Shroud**

The type "YAV-H-F" HYLUG™ is a seamless heavy duty uninsulated compression fork tongue terminal with a shroud for an insulation grip and cable support. Manufactured from electrolytic copper tubing for use on copper commercial (code) cable, Type "AN" aircraft and extra flexible conductors.

The seamless tubing produces a double thick tongue while the seamless barrel design provides a very strong connector for very demanding applications that require highly reliable connections.

In addition to the benefits described for the YAV box series of connectors the YAVH-F Box and YAV-Z terminals provide the following benefits.

**Features & Benefits**

- Fork tongue
- ◇ Allows installation of compression terminal under screw head without complete removal of the screw thereby lowering installation costs
- Flanged fork tongue
- ◇ Allows installation of compression terminal under screw head without complete removal of the screw plus aids in maintaining the terminal on the stud should the screw loosen slightly

TYPE YSV-B

B-46

HYDENT™

Uninsulated Butt Splice

HYLINK™ type YSV-B rolled splice connector is used to splice stranded and solid copper conductors in virtually all heavy duty industrial and general purpose applications.

Features & Benefits

- Constructed of pure electrolytic copper
- Provides maximum conductivity, low resistance and ductility for excellent crimp forming properties
- Long brazed seam barrel
- Provides optimum conductivity, reliability and holding power after crimping
- Electro-tin plated
- Provides durable long-lasting corrosion resistance

**TYPE SP**

**VINYLINK™**

Splice, Polyvinylchloride Insulated

600 Volts Max., 105° C Max.

The Type SP VINYLINK™ is a PVC insulated seamless butt splice. Type SP VINYLINK™ is designed to accommodate a broad range of 600 volt cables.

B-47

**Features & Benefits**

- Manufactured from seamless electrolytic copper tubing
  - ◇ Provides maximum conductivity and tensile strength, in a high quality design with NO seams to split
- Funnel entry
  - ◇ Provides easy wire insertion
- Electro-tin plated
  - ◇ Provides durable long lasting resistance to corrosion

- Expanded insulation support
  - ◇ Lower inventory requirements
- Red wire range of 22-16
  - ◇ Lower inventory requirements
- Vinyl insulator
  - ◇ Economical means of providing high dielectric values and cable insulation support

## TYPE SN

B-48

### INSULINK™

Butt Splice, Nylon Insulated

600 Volts Max., 105° C Max.

The Type SN INSULINK™ is a high quality nylon-insulated butt splice designed to meet heavy duty application requirements.

Meets the functional requirements of MIL-T-7928 (ASG) and conforms to the requirements of NAS1388.

### Features & Benefits

- Manufactured from seamless tubing
  - ◊ A high quality design with no seams to split
- Pure electrolytic copper
  - ◊ Provides maximum conductivity, low resistance and ductility for excellent crimp forming properties
- Electro-tin plated
  - ◊ Provides durable long-lasting resistance to corrosion
- Positive center wire stops
  - ◊ Provides for proper depth of wire insertion
- Color-coded in red, blue and yellow
  - ◊ Provides easy wire size identification
- Manufactured from one-piece tin-plated seamless copper tubing with an integral barrel/insulation grip
  - ◊ Provides maximum tensile strength, plus excellent cable support and strain relief and eliminates failures due to vibration
- Smooth funnel entry
  - ◊ Provides easy wire insertion
- Window position locator for full cycle ratchet tool crimp
  - ◊ Provides proper tool/connector alignment for correct crimp
- Nylon insulation offers high dielectric strength and stability in oily environmental conditions
  - ◊ Maintains a high quality connection in demanding applications
- The nylon is locked into position
  - ◊ The connector will not move

B-50

### INSULINK™

600 Volts Max., 105° C Max.

The Types YSE and YSE-H INSULINK™ splices are high quality nylon insulated designed for splicing aircraft and commercial flexible cables.

### Features & Benefits

- Manufactured from tin plated, seamless electrolytic copper tubing with integral barrel/insulation grip
  - ◊ Provides maximum conductivity and tensile strength, plus excellent cable support and strain relief
- Split heavy wall insulation grip
  - ◊ Provides stronger insulation grip and strain relief
- Smooth funnel entry
  - ◊ Provides easy wire insertion
- Transparent nylon insulation
  - ◊ Permits easy wire inspection

B-52

### INSULINK™

Radiation Resistant Insulated Butt Splice, Polyvinylidene Flouride (PVF2) Insulated

200 Megarads - 60° C  
Through 150° C, 600 Volts

The Type YSES-K radiation resistant insulated splices are suitable for class 1E applications plus non critical nuclear associated applications. The splice is manufactured from pure electrolytic copper seamless tubing which eliminates potential splitting of seams. A color code stripe is used for wire size identification and a window is provided for inspection of proper wire insertion.

### Features & Benefits

- These insulated splices are suitable for class 1E applications
- Pure electrolytic copper seamless tubing eliminates potential splitting of seams
- Color coded stripe identifies wire size
- Window is provided for inspection of proper wire insertion
- Suitable for 200 Megarads Rated 60°C - 150°C
- 600 Volt rated

HYLINK™

Uninsulated Butt Splice

HYLINK™ Type YSV seamless splice connector is used to splice stranded and solid copper conductors in virtually all heavy duty industrial and general purpose applications.

B-53

Features & Benefits

- Manufactured from seamless tubing
  - ◊ A high quality design with no seams to split
- Electrolytic copper
  - ◊ Provides maximum conductivity, low resistance and ductility for excellent crimp forming properties
- Electro-tin plated
  - ◊ Provides durable long lasting resistance to corrosion
- Positive center wire stops
  - ◊ Provides proper depth of wire insertion
- Marked with wire size
  - ◊ Provides easy wire size identification
- The HYLINK™ splice connectors have inspection holes
  - ◊ Provides easy visual inspection for proper wire insertion

TYPE YSV-L

B-54

HYLINK™

Uninsulated Butt Splice  
#8 Through 4/0 Copper

HYLINK™ Type YSV-L seamless splice connector is used to splice Type AN aircraft cables plus commercial stranded and solid AWG conductors. Suitable for aircraft, light duty industrial and general purpose applications.

Features & Benefits

- Manufactured from seamless tubing
  - ◇ A high quality design with no seams to split
- Electrolytic copper
  - ◇ Provides maximum conductivity, low resistance and ductility for excellent crimp forming properties
- Electro-tin plated
  - ◇ Provides durable long lasting resistance to corrosion
  - ◇ Provides proper depth of wire insertion
- Marked with wire size
  - ◇ Provides easy wire size identification
- The HYLINK™ splice connectors have inspection holes
  - ◇ Provides easy visual inspection for proper wire insertion

## TYPE YSM

B-56

### HYLINK™

#### Uninsulated Parallel Splice

HYLINK™ Type YSM seamless parallel splice connector permits wires to be laid parallel inside the connector and spliced together with the BURNDY family of HYTOOL™ installation tooling. Each YSM connector accommodates a wide combination of round, square, and rectangular copper conductors that have a total combined circular mil area listed in the table below. The conductors to be spliced must physically fit within title splice without being forced.

#### Features & Benefits

- Seamless tubing
- Beveled barrel for ease of wire entry
- Tin plated
- Parallel design results in only one crimp
- Uninsulated barrel provides an economical termination solution when insulation is not specified

TYPE YSCM

HYLINK™

Color-Coded  
Uninsulated Parallel Splice

Type YSCM HYLINK™ seamless parallel splice connectors permit stranded wires to be laid parallel inside the connector and spliced together with BURNDY® compression tools. Each YSCM connector accommodates a wide range of conductors and is color-coded to ensure proper tool and die match. YSCM connectors are cULus Listed Wire Connectors per UL 486A/B.

Additionally, they are cULus Listed for Grounding and Bonding per UL 467 and rated for direct burial in Earth and Concrete.

**Notes:**  
 Material: Copper per ASTM B75.  
 Finish: Tin plated. For nickel plating, add suffix "NK" to the Catalog Number.  
 Dimensions in brackets [ ] are in millimeters rounded off to the nearest millimeter, unless otherwise noted, and are for reference only.  
 †Recommended strip length. Strip length dependent on size, no. of wires and insulation thickness.  
 ‡Refer to Circular Mil Table per ASTM B8 for total Class B Circular Mil calculations.  
 \*YSCM231 can also be installed with MY29-3 and retain Listings.

**Add the circular mils of the wires you wish to splice; that sum would be used to determine the correct splice using the Min/Max columns on the table above.**

**The tables to the right are for reference only.**

## TYPES YSV, YRV-L

B-58

### HYREDUCER™

#### Reducer Butt Splice

The HYREDUCER™ is a connector for splicing two different size wires. The larger conductor is inserted first and butts against the center of the connector where the smaller barrel begins. Constructed of pure electrolytic copper tubing for maximum conductivity, tin plated to resist corrosion, the HYREDUCER™ accommodates a wide range of cable sizes. Dimensional information may be found in Table 1. Table 2 is a comprehensive tooling index for these connectors.

TABLE 1

TYPE YHSS

HYDENT™ HEAT SHRINK BUTT SPLICES

For Use On Copper Conductor

Standard crimp terminals leave the wire exposed allowing in moisture or other contaminants which can result in corrosion. Corrosion reduces the amount of current the wire can carry safely. The integrity of the electrical system can be compromised when unsealed electrical connections are utilized. Heat shrink terminals provide a durable seal blocking out contaminants ensuring a better connection.

B-59

Features & Benefits

- Made from pure copper, annealed for maximum strength
- Color-coded, imprinted with wire size
- Serrated barrels offer maximum wire contact and tensile strength
- Electro tin plated for corrosion resistance
- Wire strip length 5/16"

Catalog Number (100/bag)	Catalog No. (20/bag)	Conductor Size	Dimensions	
			B	L
YHSS18	YHSS18RK	22 - 18 AWG	0.25"	1.50"

Recommended Tooling MR22

## TYPE Q-M FINGRIP™

B-60

### NON-INSULATED MALE QUICK DISCONNECTS

Material: Tin-Plated Brass

Non Insulated Quick disconnects allows for quickly connecting or disconnecting a terminal. The front end of the terminal has a female-type receptacle which allows the terminal to slide onto and off of a male blade.

#### Features & Benefits

- Butted seam
- Chamfered barrel opening
  - ◇ Assures quick and easy wire insertion
- Mates with dimpled female socket detent
  - ◇ Ensures firm grip

Material: Tin-Plated Brass

600 Volts Max., 105° C Max.

Vinyl Insulated Quick disconnects allows for quickly connecting or disconnecting a terminal. The front end of the terminal has a female-type receptacle which allows the terminal to slide onto and off of a male blade.

**Features & Benefits**

- Butted seam
- Insulated connectors
  - ◊ Eliminate the need for post installation insulation
- Funnel entry barrel opening
  - ◊ Assures quick and easy wire insertion
- Dimpled female socket detent
  - ◊ Ensures firm grip

### HYDENT™ HEAT SHRINK MALE QUICK DISCONNECTS

For Use on Copper Conductor

Standard crimp terminals leave the wire exposed allowing in moisture or other contaminants which can result in corrosion. Corrosion reduces the amount of current the wire can carry safely. The integrity of the electrical system can be compromised when unsealed electrical connections are utilized. Heat shrink terminals provide a durable seal blocking out contaminants ensuring a better connection.

#### Features & Benefits

- Made from pure copper, annealed for maximum strength
- Color-coded, imprinted with wire size
- Serrated barrels offer maximum wire contact and tensile strength
- Electro tin plated for corrosion resistance

## TYPE YAFW-P

B-78

### HYDENT™

Terminal - Vinyl Insulated,  
Four-Way Ring Tongue

Insulated 4-way terminal is constructed of 4 ring terminals riveted together through the stud holes. Allows multiple wires to be quickly and securely connected.

### Features & Benefits

- Robust design of a standard insulated terminal integrated into one connector
- Standard BURNDY® tooling to install

Catalog Number	Wire Range	Insulation Type	Insulation Color	B	Z	K	Y	Installation Tooling	Wire Strip Length

## TYPE BULM-P

B-80

### Vinyl Insulated Male Bullet-style Connectors

Type BULM-P Male Bullet connectors are vinyl insulated connectors with a flared entry for easier wire insertion. Color-coded barrels for easy wire size identification.

#### Features & Benefits

- Vinyl insulation
- Color-coded barrels
- Flared entry provides easier use

Catalog Number	Wire Range	L	W	B	Tooling	Wire Strip Length
BULM18P	22-18	0.83	0.16	0.21	MRE1022NV Y1022	5/16"
BULM14P	16-14	0.83	0.16	0.21	MRE1022NV Y1022	5/16"
BULM10P	12-10	0.83	0.20	0.21	MRE1022NV Y1022	5/16"

## TYPE BULM-N

### Nylon Insulated Male Bullet-style Connectors

600 Volts Max., 105° C Max.

Type BULM-N Male Bullet connectors are nylon insulated connectors with a flared entry for easier wire insertion. Color-coded barrels for easy wire size identification.

#### Features & Benefits

- Nylon insulation
- Color-coded barrels
- Flared entry provides easier use

Catalog Number	Wire Range	L	B	W	Installation Tooling	Wire Strip Length
BULM18N	22 - 18	0.83	0.21	0.16	MRE1022NV Y10D Y1022	5/16"
BULM14N	16 - 14	0.83	0.21	0.16	MRE1022NV Y10D Y1022	5/16"

### TYPE BULM-NG

#### Nylon Grip Insulated Male Bullet-style Connectors

600 Volts Max., 105° C Max.

Type BULM-NG Male Bullet connectors are nylon grip insulated connectors with a flared entry for easier wire insertion. Color-coded barrels for easy wire size identification.

#### Features & Benefits

- Nylon grip insulation
- Color-coded barrels
- Flared entry provides easier use

Catalog Number	Wire Range	L	B	W	Installation Tooling	Wire Strip Length
BULM18NG	22 - 18	0.83	0.21	0.16	MRE1022NV Y10D Y1022	5/16"
BULM14NG	16 - 14	0.83	0.21	0.16	MRE1022NV Y10D Y1022	5/16"

### TYPE BULM-HS

#### Heat Shrink Insulated Male Bullet-style Connectors

Type BULM-HS Male Bullet connectors are heat shrink insulated connectors with a flared entry for easier wire insertion. Color-coded barrels for easy wire size identification.

#### Features & Benefits

- Heat Shrink insulation
- Color-coded barrels
- Flared entry provides easier use

Catalog Number	Wire Range	L	B	W	Installation Tooling	Wire Strip Length
BULM18HS	22 - 18	1.30	0.21	0.16	MR22 Y10D Y1022	5/16"

## TYPE PTV

B-84

### VINYLUG™

Pin Terminal

Material: Tin-Plated Brass

Insulated Pin Terminals are electrical connectors used to terminate stranded wires, creating a quality, reliable connection by ensuring each wire strand conducts current when properly crimped. This is especially useful when multiple reconnections could be necessary within terminal blocks or other similar devices. No breakage of wire strands when wire is bent, under stress or in a vibration environment.

### Features & Benefits

- Provides an easy and effective way to terminate stranded wire into European/metric-style terminal blocks

Catalog Number	Wire Range	B	C	L	W	Installation Tooling	Wire Strip Length
PTV18	22 - 18 AWG	0.19	0.41	0.80	0.07	MRE1022NV Y1022	5/16"
PTV14	16 - 14 AWG	0.19	0.41	0.80	0.07	MRE1022NV Y1022	5/16"

TYPE YF-UI

BARE FERRULES

For Use On Copper Conductor

B-85

Wire ferrules are also known as cord end terminals or bootlace ferrules. These are electrical connectors used to terminate stranded wires. These terminals are made of electrolytically tin plated copper, uninsulated ferrules are designed to form neat end terminations to multi-strand cables or wires. Smooth funnel entry assists in wire

insertion. Specifically designed to aid in termination of extra flexible fine stranded conductor, provides enhanced flexibility relating to wire termination and management. A positive contact surface helps ensure system integrity.

Features & Benefits

- Made of electrolytic copper, tin plated
- Seamless barrels
- Smooth funnel entry to make wire insertion easier
- RoHS compliant

**TYPE YF-I FERRULES**

**Series D, T & W**

**INSULATED FERRULES**

For Use On Copper Conductor  
Offered in Series D, T & W

B-87

Ferrules are electrical connectors used to terminate stranded wires, creating a quality, reliable connection by ensuring each wire strand conducts current when properly crimped. Especially useful when multiple reconnections could be necessary within terminal blocks or other similar devices. No breakage of wire strands when wire is bent, under stress or in a vibration environment. Twin ferrule designs allow two individual stranded conductors to be connected to the same termination, most beneficial in jumpering or other similar applications. Both styles (single and twin) offer the

same features and benefits. The YF-TOOL series has been designed to crimp both the bare (type YF-U) and insulated (type YF-I) ferrules.

**Features & Benefits**

- Made of electrolytic copper, tin plated
- Smooth funnel entry to make wire insertion easier

- Secure contacting even after multiple reconnections
- Long-term contact resistance
- No fraying of strands
- No breakage of wire strands when wire is bent, under stress or in vibration environment
- RoHS compliant

TYPE YF-TW

INSULATED TWIN FERRULES

For Use on Copper Conductor

Ferrules are electrical connectors used to terminate stranded wires, creating a quality, reliable connection by ensuring each wire strand conducts current when properly crimped. Especially useful when multiple reconnections could be necessary within terminal blocks or other similar devices. No breakage of wire strands when wire is bent, under stress or in a vibration environment. Twin ferrule designs allow two individual stranded conductors to be connected to the same termination, most beneficial in jumpering or other similar applications. Both styles (single and twin) offer the

B-91

same features and benefits. The YF-TOOL series has been designed to crimp both the bare (type YF) and insulated (type YF-I) ferrules.

Features & Benefits

- Made of electrolytic copper, tin plated
- Smooth funnel entry to make wire insertion easier
- Secure contacting even after multiple reconnections
- Long-term contact resistance
- No fraying of strands
- No breakage of wire strands when wire is bent, under stress or in vibration environment
- RoHS compliant

## SMALL TERMINAL KITS

B-92

### PACKAGED KITS OF VARIOUS TYPES OF SMALL TERMINALS

For Use On Copper Conductor

Small Terminal Kits are packaged in reusable plastic cases with secure compartments for each type of connector. Clearly marked on the inside front cover with part numbers and descriptions, the kits contain some of the most common terminals needed on everyday installations.

### Features & Benefits

- Quality terminals of various types packaged together for convenience
- Color-coded barrels
- Reusable, refillable container
- Clearly marked with part numbers and descriptions on inside cover

TYPE HSKIT

HYDENT™ HEAT SHRINK CONNECTORS AND INSTALLATION TOOL

For Use On Copper Conductor

Standard crimp terminals leave the wire exposed allowing in moisture or other contaminants which can result in corrosion. Heat shrink terminals provide a durable seal, blocking out contaminants, ensuring a better connection.

Features & Benefits

- Made from pure copper, annealed for maximum strength
- Color-coded, imprinted with wire size
- Serrated barrels offer maximum wire contact and tensile strength
- Electro tin plated for corrosion resistance
- Wire strip length 5/16"

## COMPRESSION CONNECTORS

C-4

BURNDY® compression connectors are designed for reliable and controllable electrical connections. The complete installation is fully inspectable. They are high conductivity copper and operate cooler than the wire on which they are installed. The connectors withstand a wide range of electrical and environmental conditions, including current surges, temperatures, corrosion and vibrations, for a wide variety of applications. These features mean a consistently high quality connection at a low installed cost.

Copper compression connectors are manufactured from high-conductivity electrolytic copper. The connectors are normally tin-plated, lead-plated, or plated with proprietary BURNDY® brite finish to provide durable long-lasting corrosion resistance. The connector design has been matched to the cable size to provide the necessary physical strength requirements for reliable electrical performance.

Aluminum compression connectors are manufactured from high conductivity, high purity wrought aluminum. They are designed with sufficient mass and are electro-tin plated to minimize corrosion due to galvanic action between dissimilar metals. The connector barrels are pre-filled with PENETROX™, BURNDY oxide inhibiting compound.

PENETROX™ contains homogeneously suspended metallic particles which penetrate the wire's oxides to establish excellent continuity between the individual strands and the connector barrel for a low-resistance connection. PENETROX™ maintains an air-tight connection. Each barrel end is covered with a color-coded plastic dust cap which prevents foreign matter from entering the connector before it is used. The connector design has been engineered to match the cable size to provide the necessary physical strength requirements for reliable electrical performance.

### Connector Ampacity Rating

Per NEC 110.14(C) Provision (2) installed pressure connectors shall be used with conductors at the ampacities not exceeding the ampacity at the listed and identified temperature rating of the connector. Most BURNDY connector temperature ratings in this section, are rated 90°C, therefore the connector is rated to accommodate the ampacity of a conductor operating at or below 90°C.

### SELECTION AND USE

Copper compression connectors are recommended for use on copper conductors. Aluminum compression connectors are recommended for use on aluminum conductors. Dual-rated aluminum compression connectors may be used on both copper and aluminum conductors.

Two basic compression designs are available: Circumferential and indent.

Circumferential compression is solid and symmetrical. No sharp Flash.

Indent Compression. The connector is swaged to the conductor.

After compression, virtually all the air is removed leaving a tight homogeneous mass of connector and conductor.

The circumferential crimp design is recommended for color coded connectors in low and high voltage applications. Die index number embossment provides an easy inspection where required to verify the use of the proper connector/die combination. It is also recommended for insulated connectors and for terminating flexible and welding cables.

The circumferential crimp design dies compress cable strands into polygonal shapes forming intimate contact with each other and the connector barrel. This compression forms a tight homogeneous mass with virtually no air pockets. The circumferential crimp provides an excellent electrical connection with high pull-out values. The circumferential crimp is ideal for high voltage applications leaving the connector barrel symmetrical, which is easier to insulate.

The indent type crimp can be used in virtually any application except polyvinylchloride (PVC) insulated terminals and splices. It is an excellent means of terminating flexible, extra flexible and welding cables. The indenter compresses the cable strands to form intimate contact with each other and the connector barrel. The result is an excellent electrical connection with high pull-out strength. Laboratory work testing curves established the proper depth and shape of indent for each type of connector and wire combination.

### TOOLING

Tooling systems are essential for proper installation of a compression connector. Since connectors and dies are designed as a unit for specific wire sizes, only the recommended tools and dies should be used. Most aluminum and copper HYLUG™ terminals and HYLINK™ splices are marked with a die index number and are color-coded to identify the correct installation die. Dies marked with the matching die index number and color can be used to install the connector.

BURNDY® tooling installs a wide range of connectors, is reliable, cost effective, and precision engineered for durable, long-lasting service and quality connections. The tools include small plier types, full cycle ratchet designs and hydraulically-powered HYPRESS™ heads and new Battery Actuated Tools. Some have permanent die grooves or adjustable dies, while others require a change of die sets or nest die for each connector size. BURNDY recommended tools achieve crimp performance consistent with UL and other industry standards. Since several tools are suitable for most connectors, the most economical and practical tool can be chosen for each application.

### INSTALLATION HARDWARE

See the Hardware Section or Reference Section of the BURNDY Master Catalog for information on Recommended Hardware Materials and Tightening Torque Values.

### INDUSTRY STANDARDS

BURNDY compression terminals, splices, and tap connectors requiring third party testing and approval are listed by Underwriters Laboratories, Inc. (UL), and/or Canadian Standards Association (CSA), and all conform to the applicable sections of the National Electrical Code (NEC).

Per UL486A-486B - Wire Connectors (1.3) standard, this standard is intended for connectors suitable for currents not exceeding the ampacity of insulated conductors rated 75°C or 90°C in accordance with the rating of the connector, if provided.

BURNDY® also offers connectors and splices which meet the (LOCA Seismic and Aging) requirements of IEEE standards 323, 383 and 344 for class 1E critical circuits for use in Nuclear Utility Applications. Certification to 10CFR50 and 10CFR21 available.

Detail catalog listings should be consulted to obtain the appropriate standards for each connector and splice.

**BURNDY®**  
**Telecommunications**  
**Connectors...**

**The industry's first choice in compression connections...**

BURNDY® provides a complete selection of one and two hole compression's terminals, H-taps, C-taps, and other compression connection products specifically engineered to meet the demanding applications of both the Central Office and Wireless communications markets.

All of the BURNDY compression products are designed for reliable and controllable electrical connections. All connectors are made from high conductivity electrolytic copper and operate at cooler temperatures than the conductor on which they are installed. The connectors are normally tin-plated, lead-plated, or plated with a proprietary BURNDY® brite finish to provide the industry standard in long-lasting corrosion resistance.

The complete installation is fully inspectable and UL Listed when installed with BURNDY® dies. Every die in the system is color-coded and provides die index embossment for complete inspectability.

**Wire Definitions**

- Copper Code Stranded Wire, as listed in this section refers to: Class B (Concentric, Compressed, Compact) or Class C, that a particular connector has been UL Listed with
- Copper Flexible Wire, as listed in this section refers to: Listed by Nominal Wire followed by the designated wire classes (G, H, I, K, M, and DLO), that a particular connector has been UL Listed with
- Aluminum Stranded Wire, as listed in this section refers to: Class B (Concentric, Compressed, Compact), that a particular connector has been UL Listed with
- Copper Clad Aluminum (CCA) Stranded Wire, as listed in this section refers to: CCA wire stranded that a particular connector has been UL Listed with

**The Circumferential Crimp...**

Circumferential compression is solid and symmetrical. No sharp flash.

The BURNDY® circumferential crimp provides a solid, homogenous connection, with high pull out values and is rated for high voltage applications, more than sufficient for the 48V DC operating voltage common in the telecom market. In addition the circumferential crimp doesn't require the removal of the copper flash produced by other die systems. This not only saves time in installation but removes a potential safety hazard from the job.

All of the dies in the system are color-coded to match the connectors and feature die index and die number matching to the connector for ease of installation.

**BURNDY® Tooling...  
 the right choice for the job**

BURNDY® tooling installs a wide range of connectors, is reliable, cost effective, and precision engineered for durable, long-lasting service and quality connections. BURNDY compression tooling system ranges from full cycle ratchet hand tools to 12 and 15 ton hydraulically-powered HYPRESS™ heads. Hydraulic tools are available in self-contained, battery powered, and AC service electrically powered pump and remote head designs to meet all possible installation situations.

**NOTE:** Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

Objective	Plating			
	Electro-tin	Hot Tin Dip	Nickel	Silver*
Reduce galvanic corrosion (bimetallic)	X	X	—	—
Resist corrosive elements	X	X	—	—
Increase conductivity/lower contact resistance	—	—	—	X
Provide high, continuous service temperatures (maximum)	—	—	X (650°F/343°C)	X (500°F/260°C)

**\*Note:** Never connect an aluminum surface to a silver plated surface. Aluminum in contact with silver results in a highly corrosive joint, which will further result in a high resistance connection.

**12-TON U DIES\***

**\*\*\*Fits 35, 39, 750 Series, 46 Series (with PUADP-1 Adapter)**

\*\*\*Installation tools may have "Y" or "PAT" prefix depending on type of tool platform; See Tooling Section for more information.

U die case Part# PT29291, holds up to 15 dies

Wire Size	Wire Material

\* These sizes (250 - 500) for Y500CTHS, MD734, and MD734R only.  
 \*\* For 600, 500SJ series and Y500CTHS only.  
 Note: N/A = not applicable  
 Suitable for use on YA, YS, YA-A, YS-A type non-tension connectors.  
 Die Sets sold separately; W Die Kits also available

VT = "V" profile die for reduced handle force when using MD6/MD7 series tools; Twin die (includes both halves)

RT = Round die (circumferential); Twin die (includes both halves)

ONE HOLE HYLUG™  
CODE CONDUCTOR  
STANDARD BARREL

TYPES YA-L, YA-L-TC

UNINSULATED COPPER  
COMPRESSION TERMINAL

UL Listed 90° C, Up to 35 kV ♦

45° and 90° angles available. Please contact  
Customer Service to order : 1-800-346-4175.

C-11

NOTE: Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

Features & Benefits

- Inspection window allows for visual verification that the wire has been fully inserted prior to crimping the lug; not recommended in highly corrosive environments as the wire in the barrel is exposed to corrosive elements installed
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- Short/Standard length barrel is recommended for installations with limited space requirements
- 45° and 90° angular lugs are available; please contact Customer Service
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked with stamping and barrel color coding

**ONE HOLE HYLUG™ CODE  
CONDUCTOR STANDARD  
BARREL NARROW TONGUE**

C-16

**TYPE YA-L-NT UNINSULATED  
COPPER COMPRESSION  
NARROW TONGUE TERMINAL**

UL Listed 90° C, Up to 35 kV ♦

45° and 90° angles available. Please contact  
Customer Service to order: 1-800-346-4175

**NOTE:** Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

**Features & Benefits**

- Inspection window allows for visual verification that the wire has been fully inserted prior to crimping the lug; not recommended in highly corrosive environments as the wire in the barrel is exposed to corrosive elements installed
- Narrow tongue/tang is designed for limited space applications
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- Short/Standard length barrel is recommended for installations with limited space requirements and meet the exact UL testing requirements as long barrel connectors so performance of the connection is not compromised
- 45° and 90° angular lugs are available; please contact Customer Service
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked with stamping and barrel color coding

order: 1-800-346-4175

C-19

**NOTE:** Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

**Features & Benefits**

- No inspection window is ideal for more corrosive environments as the barrel transition is not open
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- Long barrel allows for an increased number of crimps which will increase the mechanical strength of the connection
- 45° and 90° angular lugs are available, please contact Customer Service
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked with stamping and barrel color coding

CODE CONDUCTOR  
LONG BARREL WITH  
INSPECTION WINDOW**

**TYPE YAZ**

**UNINSULATED COPPER  
COMPRESSION TERMINAL**

UL Listed 90° C, Up to 35 kV ♦

45° and 90° angles are available.  
Please contact Customer Service to order:  
1-800-346-4175

C-23

**NOTE:** Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

**Features & Benefits**

- Inspection window allows for visual verification that the wire has been fully inserted prior to crimping the lug
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- Long barrel allows for an increased number of crimps which will increase the mechanical strength of the connection
- 45° and 90° angular lugs are available; please contact Customer Service
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked with stamping and barrel color coding

**TWO HOLE HYLUG™ CODE  
CONDUCTOR STANDARD  
BARREL**

TYPES YAV-2TC, YA-L2L,  
YA-2LN, AND YA-L-2TC

**COPPER COMPRESSION  
TERMINAL**

UL Listed 90° C, Up to 35 kV ♦

45° and 90° angles are available.  
Please contact Customer Service to order.  
1-800-346-4175

**NOTE:** Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

**Features & Benefits**

- Inspection window allows for visual verification that the wire has been fully inserted prior to crimping the lug
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- Short/Standard length barrel is recommended for installations with limited space requirements
- Two hole tongue/tang is recommended when space permits as the 2-hole feature minimizes the terminations from loosening or rotating under vibration, movement, or heat cycling
- 45° and 90° angular lugs are available; please contact Customer Service
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked with stamping and barrel color coding

**TWO HOLE HYLUG™ CODE  
CONDUCTOR STANDARD  
BARREL NARROW TONGUE**

**TYPES YA-L-2NT**

**COPPER COMPRESSION  
TERMINAL**

UL Listed 90° C, Up to 35 kV ♦

45° and 90° angles are available.  
Please contact Customer Service to order:  
1-800-346-4175

C-31

**NOTE:** Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

**Features & Benefits**

- Inspection window allows for visual verification that the wire has been fully inserted prior to crimping the lug
- Narrow tongue/tang is designed for limited space applications
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- Short/Standard length barrel is recommended for installations with limited space requirements
- Two hole tongue/tang is recommended when space permits as the 2-hole feature minimizes the terminations from loosening or rotating under vibration, movement, or heat cycling
- 45° and 90° angular lugs are available; please contact Customer Service
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked with stamping and barrel color coding

C-33

NOTE: Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

**Features & Benefits**

- No inspection window is ideal for more corrosive environments as the barrel transition is not open
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- Long barrel allows for an increased number of crimps which will increase the mechanical strength of the connection
- Two hole tongue/tang is recommended when space permits as the 2-hole feature minimizes the terminations from loosening or rotating under vibration, movement, or heat cycling
- 45° and 90° angular lugs are available, please contact Customer Service
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked with stamping and barrel color coding

C-37

**NOTE:** Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

**Features & Benefits**

- No inspection window is ideal for more corrosive environments as the barrel transition is not open
- Narrow tongue/tang is designed for limited space applications
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- Long barrel allows for an increased number of crimps which will increase the mechanical strength of the connection
- Two hole tongue/tang is recommended when space permits as the 2-hole feature minimizes the terminations from loosening or rotating under vibration, movement, or heat cycling
- 45° and 90° angular lugs are available, please contact Customer Service
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked with stamping and barrel color coding

\* Use PUADP-1 adapter with U dies in Y46 HYPRESS™  
\*\*\* The MM² conductor sizes listed are the recommendations for Class 2 conductor

▲ See tooling section of this catalog for complete tool and die listings. Use ONLY color-coded die recommendations for -FX connectors. For nest/indenter system contact factory.

♦ For applications greater than 2000 Volts consult cable manufacturer for voltage stress relief instructions.  
**Note:** All dimensions shown are for reference only.

**TWO HOLE HYLUG™  
CODE CONDUCTOR LONG  
BARREL WITH INSPECTION  
WINDOW**

TYPES YAZ-2N, YAZ-2TC

**COPPER COMPRESSION  
TERMINAL**

UL Listed 90° C, Up to 35 kV ♦

45° and 90° angles are available. Please contact Customer Service to order:  
1-800-346-4175

C-41

**NOTE:** Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

**Features & Benefits**

- Inspection window allows for visual verification that the wire has been fully inserted prior to crimping the lug
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- Long barrel allows for an increased number of crimps which will increase the mechanical strength of the connection
- Two hole tongue/tang is recommended when space permits as the 2-hole feature minimizes the terminations from loosening or rotating under vibration, movement, or heat cycling
- 45° and 90° angular lugs are available; please contact Customer Service
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked with stamping and barrel color coding

# Compression Connections

**BURNDY®**

Copper Compression — Code — Long Barrel — No Inspection Window

## FOUR HOLE HYLUG™ CODE CONDUCTOR

### TYPE YA

C-46

UL Listed 90° C, Up to 35 kV ♦

45° and 90° angles are available.

Please contact Customer Service to order:

1-800-346-4175

**NOTE:** Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

YA-4N

YAB-4N

Straight

45°

90°

### Features & Benefits

- No inspection window is ideal for more corrosive environments as the barrel transition is not open
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- Long barrel allows for an increased number of crimps which will increase the mechanical strength of the connection
- Four hole tongue/tang is recommended when space permits as the 4-hole feature minimizes the terminations from loosening or rotating under vibration, movement, or heat cycling
- 45° and 90° angular lugs are available, please contact Customer Service
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked with stamping and barrel color coding

45° and 90° angles are available.  
Please contact Customer Service to order:  
1-800-346-4175

**NOTE:** Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

**Features & Benefits**

- Inspection window allows for visual verification that the wire has been fully inserted prior to crimping the lug
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- Short/Standard length barrel is recommended for installations with limited space requirements
- 45° and 90° angular lugs are available; please contact Customer Service
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked with stamping and barrel color coding
- Connectors accommodating wire sizes #10 - 4/0 AWG accommodate both Flex and Code Wire. See Tables on each page for specific details
- Tables in this section identify flex wire as the nominal flex wire size followed by the wire classes and DLO wire size and stranding. For Class Wire Strand counts, see the table at the beginning of this section

## ONE HOLE HYLUG™ FLEX CONDUCTOR STANDARD BARREL NARROW TONGUE

C-52

TYPE YAV-L-NTFX

### COPPER COMPRESSION NARROW TONGUE TERMINAL

UL Listed 90° C, Up to 35 kV ♦

45° and 90° angles are available.

Please contact Customer Service to order:

1-800-346-4175

**NOTE:** Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

### Features & Benefits

- Inspection window allows for visual verification that the wire has been fully inserted prior to crimping the lug
- Narrow tongue/tang is designed to allow for parallel terminations of wire in limited space applications
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- Short/Standard length barrel is recommended for installations with limited space requirements
- 45° and 90° angular lugs are available; please contact Customer Service
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked with stamping and barrel color coding
- Connectors accommodating wire sizes #10 - 4/0 AWG accommodate both Flex and Code Wire. See Tables on each page for specific details
- Tables in this section identify flex wire as the nominal flex wire size followed by the wire classes and DLO wire size and stranding. For Class Wire Strand counts, see the table at the beginning of this section

NOTE: Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

**Features & Benefits**

- No inspection window is ideal for more corrosive environments as the barrel transition is not open
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- Long barrel allows for an increased number of crimps which will increase the mechanical strength of the connection
- 45° and 90° angular lugs are available, please contact Customer Service
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked with stamping and barrel color coding
- Connectors accommodating wire sizes #10 - 4/0 AWG accommodate both Flex and Code Wire. See Tables on each page for specific details
- Tables in this section identify flex wire as the nominal flex wire size followed by the wire classes and DLO wire size and stranding. For Class Wire Strand counts, see the table at the beginning of this section

## ONE HOLE HYLUG™ FLEX CONDUCTOR STANDARD BARREL BELLED END

C-58

TYPE YA-LB

COPPER COMPRESSION  
TERMINAL

UL Listed 90° C, Up to 35 kV ♦

**NOTE:** Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

### Features & Benefits

- Inspection window allows for visual verification that the wire has been fully inserted prior to crimping the lug
- Barrel is designed with a “belled” end opening at the wire entry, to ensure smooth insertion of highly flexible stranded wire, preventing possible damaging of the wire strands during insertion
- Short/Standard length barrel is recommended for installations with limited space requirements
- 45° and 90° angular lugs are available; please contact Customer Service
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked with stamping and barrel color coding
- Connectors accommodating wire sizes #10 - 4/0 AWG accommodate both Flex and Code Wire. See Tables on each page for specific details
- Tables in this section identify flex wire as the nominal flex wire size followed by the wire classes and DLO wire size and stranding. For Class Wire Strand counts, see the table at the beginning of this section

# Compression Connections

BURNDY®

Copper Compression — Flex — Long Barrel — Inspection Window

## ONE HOLE HYLUG™ FLEX CONDUCTOR LONG BARREL WITH INSPECTION WINDOW

C-60

TYPES YAZ, YAZV

### COPPER COMPRESSION TERMINAL

UL Listed 90° C, Up to 35 kV ♦

45° and 90° angles are available.

Please contact Customer Service to order:

1-800-346-4175

**NOTE:** Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

### Features & Benefits

- Inspection window allows for visual verification that the wire has been fully inserted prior to crimping the lug
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- Long barrel allows for an increased number of crimps which will increase the mechanical strength of the connection
- 45° and 90° angular lugs are available; please contact Customer Service
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked with stamping and barrel color coding
- Connectors accommodating wire sizes #10 - 4/0 AWG accommodate both Flex and Code Wire. See Tables on each page for specific details
- Tables in this section identify flex wire as the nominal flex wire size followed by the wire classes and DLO wire size and stranding. For Class Wire Strand counts, see the table at the beginning of this section

C-63

**NOTE:** Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

**Features & Benefits**

- No inspection window is ideal for more corrosive environments as the barrel transition is not open
- Barrel is designed with a “belled” end opening at the wire entry, to ensure smooth insertion of highly flexible stranded wire, preventing possible damaging of the wire strands during insertion
- Long barrel allows for an increased number of crimps which will increase the mechanical strength of the connection
- 45° and 90° angular lugs are available, please contact Customer Service
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked with stamping and barrel color coding
- Connectors accommodating wire sizes #10 - 4/0 AWG accommodate both Flex and Code Wire. See Tables on each page for specific details
- Tables in this section identify flex wire as the nominal flex wire size followed by the wire classes and DLO wire size and stranding. For Class Wire Strand counts, see the table at the beginning of this section

1-800-346-4175

**NOTE:** Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

**Features & Benefits**

- Inspection window allows for visual verification that the wire has been fully inserted prior to crimping the lug
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- Short/Standard length barrel is recommended for installations with limited space requirements
- Two hole tongue/tang is recommended when space permits as the 2-hole feature minimizes the terminations from loosening or rotating under vibration, movement, or heat cycling
- 45° and 90° angular lugs are available; please contact Customer Service
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked with stamping and barrel color coding
- Connectors accommodating wire sizes #10 - 4/0 AWG accommodate both Flex and Code Wire. See Tables on each page for specific details
- Tables in this section identify flex wire as the nominal flex wire size followed by the wire classes and DLO wire size and stranding. For Class Wire Strand counts, see the table at the beginning of this section

# Compression Connections

BURNDY®

Copper Compression — Flex — Standard Barrel — Narrow Tongue

## TWO HOLE HYLUG™ FLEX CONDUCTOR STANDARD BARREL NARROW TONGUE

C-70

TYPE YAV-L-2NTFX

COPPER COMPRESSION  
NARROW TONGUE TERMINAL

UL Listed 90° C, Up to 35 kV ♦

45° and 90° angles are available.

Please contact Customer Service to order:

1-800-346-4175

NOTE: Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

### Features & Benefits

- Inspection window allows for visual verification that the wire has been fully inserted prior to crimping the lug
- Narrow tongue/tang is designed to allow for more parallel terminations of wire in limited space applications
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- Short/Standard length barrel is recommended for installations with limited space requirements
- Two hole tongue/tang is recommended when space permits as the 2-hole feature minimizes the terminations from loosening or rotating under vibration, movement, or heat cycling
- 45° and 90° angular lugs are available; please contact Customer Service
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked with stamping and barrel color coding

Consult cable manufacturers for stress relief instructions

♦ For applications greater than 2000 Volts consult cable manufacturer for voltage stress relief instructions

\* Use PUADP-1 adaptor with U dies in Y46 HYPRESS™

• P-RT dies for Y / PAT46 Tooling only

\*\*\* The MM<sup>2</sup> conductor sizes Listed are the

recommendations for CLASS 5 conductor

▲ See tooling section of this catalog for complete tool and die listings. Use ONLY color-coded die recommendations for -FX connectors

Note: All dimensions shown are for reference only

**TWO HOLE HYLUG™  
FLEX CONDUCTOR  
LONG BARREL WITH  
INSPECTION WINDOW**

**TYPE YAZ-FX**

**COPPER COMPRESSION  
TERMINAL**

UL Listed 90° C, Up to 35 kV ♦

45° and 90° angles are available.  
Please contact Customer Service to order :  
1-800-346-4175

C-73

**NOTE:** Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

**Features & Benefits**

- Inspection window allows for visual verification that the wire has been fully inserted prior to crimping the lug
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- Long barrel allows for an increased number of crimps which will increase the mechanical strength of the connection
- Two hole tongue/tang is recommended when space permits as the 2-hole feature minimizes the terminations from loosening or rotating under vibration, movement, or heat cycling
- 45° and 90° angular lugs are available; please contact Customer Service
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked with stamping and barrel color coding
- Connectors accommodating wire sizes #10 - 4/0 AWG accommodate both Flex and Code Wire. See Tables on each page for specific details
- Tables in this section identify flex wire as the nominal flex wire size followed by the wire classes and DLO wire size and stranding. For Class Wire Strand counts, see the table at the beginning of this section

**NOTE:** Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

**Features & Benefits**

- No inspection window is ideal for more corrosive environments as the barrel transition is not open
- Barrel is designed with a “belled” end opening at the wire entry, to ensure smooth insertion of highly flexible stranded wire, preventing possible damaging of the wire strands during insertion
- Long barrel allows for an increased number of crimps which will increase the mechanical strength of the connection
- Two hole tongue/tang is recommended when space permits as the 2-hole feature minimizes the terminations from loosening or rotating under vibration, movement, or heat cycling
- 45° and 90° angular lugs are available, please contact Customer Service
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked with stamping and barrel color coding
- Connectors accommodating wire sizes #10 - 4/0 AWG accommodate both Flex and Code Wire. See Tables on each page for specific details
- Tables in this section identify flex wire as the nominal flex wire size followed by the wire classes and DLO wire size and stranding. For Class Wire Strand counts, see the table at the beginning of this section

C-81

**NOTE:** Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

**Features & Benefits**

- Inspection window allows for visual verification that the wire has been fully inserted prior to crimping the lug
- Narrow tongue/tang is designed to allow for more parallel terminations of wire in limited space applications
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- Long barrel allows for an increased number of crimps which will increase the mechanical strength of the connection
- Two hole tongue/tang is recommended when space permits as the 2-hole feature minimizes the terminations from loosening or rotating under vibration, movement, or heat cycling
- 45° and 90° angular lugs are available, please contact Customer Service
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked with stamping and barrel color coding
- Connectors accommodating wire sizes #10 - 4/0 AWG accommodate both Flex and Code Wire. See Tables on each page for specific details
- Tables in this section identify flex wire as the nominal flex wire size followed by the wire classes and DLO wire size and stranding. For Class Wire Strand counts, see the table at the beginning of this section

C-83

NOTE: Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

**Features & Benefits**

- No inspection window is ideal for more corrosive environments as the barrel transition is not open
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- Short/Standard length barrel is recommended for installations with limited space requirements
- 45° and 90° angular lugs are available, please contact Customer Service
- Lead plated for battery connectors or other heavy duty equipment, to reduce the corrosion from lead/acid batteries
- Connectors are clearly marked with stamping and the barrel color coding
- Connectors accommodating wire sizes #10 - 4/0 AWG accommodate both Flex and Code Wire. See Tables on each page for specific details

**TWO HOLE HYLUG™ FLEX  
CONDUCTOR STANDARD  
BARREL LEAD PLATED**

TYPE YAG-L-2TC-LD

**COPPER COMPRESSION  
TERMINAL**

UL Listed 90° C, Up to 35 kV ♦

**NOTE:** Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

C-87

**Features & Benefits**

- No inspection window is ideal for more corrosive environments as the barrel transition is not open
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- Short/Standard length barrel is recommended for installations with limited space requirements
- Two hole tongue/tang is recommended when space permits as the 2-hole feature minimizes the terminations from loosening or rotating under vibration, movement, or heat cycling
- 45° and 90° angular lugs are available; please contact Customer Service
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Lead plated for battery connectors or other heavy duty equipment, to reduce the corrosion from lead/acid batteries
- Connectors are clearly marked with stamping and barrel color coding
- Connectors accommodating wire sizes #10 - 4/0 AWG accommodate both Flex and Code Wire. See Tables on each page for specific details

**BREAK-AWAY HYLUG™**

Copper Compression Terminals  
UL Listed 90° C, Up to 35 kV ♦

The Break-Away HYLUG™ line of Copper terminals are designed to provide maximum field flexibility by allowing the installer (using the Break-Away feature) to easily convert two-hole terminals to one-hole terminals to suit the application, while retaining UL Listing and CSA Certification.

The Break-Away HYLUG™ line of terminals encompasses a wide range of features that affords the installer the flexibility in meeting the requirements for challenging projects.

C-91

**Features & Benefits**

- BREAK-AWAY feature allows for field modification of the terminal from a two-hole design to a one-hole design
- Field modification of the terminal does not require specialized tooling or training.
- Slotted second stud provides built in flexibility for the terminal to conform to various bus bar dimensions.
- Narrow tongue design allows for the terminal to fit into tight spaces.
- Accommodates a wide range of conductor combinations (AWG, Compact, DLO, Flex and Metric).
- Terminals are range taking when installed with Y644HSXT or PAT644 tooling platforms.

**NOTE:** Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

TYPE YBA-A

BREAK-AWAY HYLUG™

Aluminum Compression Terminals  
UL Listed 90° C, Up to 35 kV ♦

The Break-Away HYLUG™ line of Aluminum terminals are designed to provide maximum field flexibility by allowing the installer (using the break-away feature) to easily convert a two-hole terminal into a one-hole terminal to suit the application while retaining UL Listing and CSA Certification.

The Break-Away HYLUG™ line of terminals encompasses a wide range of features that offers the installer the flexibility to meet the requirements of challenging projects.

Features & Benefits

- Break-Away feature allows for field modification of the terminal from a two-hole design to a one-hole design
- Field modification of the terminal does not require specialized tooling or training
- Narrow tongue design allows for the terminal to fit into tight spaces
- Accommodates copper and aluminum wire
- Factory prefilled with PENETROX™ oxide inhibiting compound
- Slotted second stud provides built in flexibility for the terminal to conform to various bus bar dimensions.
- Terminals are range taking when installed with Y644 or PAT644XT-18V tooling platforms
- Electro-tin plated provides durable long lasting corrosion resistance
- Internal bevel edge provides easy cable insertion
- Connector clearly marked with wire size, die index, and color code

† Can only be crimped with PAT46 or Y46 platform tools using the P44ART die

‡ UL Listed with DLO Copper Clad Aluminum conductor using Y644 tools ONLY

\* Y46 and PAT46 platforms require PUADP-1 adaptor to use U dies

\*\* OUR840 can use X-style dies only

▲ U die for 900 AL only

**TYPES YBA-KIT,  
YA-KIT, YBAFX-KIT,  
YAFX-KIT**

**Copper and Aluminum  
Turbine Lug Kits**

UL Listed 90° C, Up to 35 kV ♦

Aiding in the staging and flow of material on a project, the BURNDY® Turbine Lug Kits are designed to meet the termination requirements for the standard 1.5 MW wind turbine, improving overall project efficiency. Each lug kit contains UL Listed and CSA Certified copper or aluminum lugs. Kits include the required number of lugs needed to terminate aluminum or copper conductors on the low voltage side of a base transformer or the down tower switchgear. There are four individual kits, two for aluminum, two for copper, they are all custom designed to handle any termination requirements.

**NOTE:** Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

C-95

**Features & Benefits**

- **YA44A3** (1000 kcmil aluminum) HYLUG™, 2-hole, narrow tongue aluminum compression terminal that is dual rated for both copper and aluminum
- **YBA44A** (1000 kcmil, 1000 compact aluminum) Break-Away HYLUG™, 2-hole narrow tongue aluminum compression terminal that is dual rated for both copper and aluminum. The break-away feature allows for field modification of the terminal from a 2-hole to a 1-hole terminal and still retain UL Listing and CSA Certification
- **YAZ442NNTFX** (777.7 Flex, 1925/24 str., 750 kcmil copper) HYLUG™, 2-hole narrow tongue copper compression terminal that accommodates flex and AWG conductor
- **YBA44FX** (777.7 Flex, 1925/24 str. [750 kcmil] nom. copper) Break-Away HYLUG™, 2-hole, narrow tongue copper compression terminal that accepts a wide range of conductor combinations (AWG, compact, DLO, flex, metric). The Break-Away feature allows field modification of the terminal from a 2-hole to 1-hole terminal and still retain UL Listing and CSA Certification
- Both aluminum and copper low voltage turbine lug kits include **YA29-2N** (250 kcmil, copper, 2-hole) lugs for terminating grounding conductor
- Aluminum kits are shipped with squeeze packets of PENETROX™ oxide inhibitor for terminating aluminum conductor

**Copper Kits**

Catalog Number	Includes:
YBAFX15CLKIT	15 pcs YBA44FX (777.7 Flex Cu 2-hole NEMA lug); 3 pcs YA29-2N (250 kcmil Cu 2-hole NEMA lug)
YAFX15CLKIT	15 pcs YAZ442NNTFX (777.7 Flex Cu 2-hole NEMA lug); 3 pcs YA29-2N (250 kcmil Cu 2-hole NEMA lug)

**Aluminum Kits**

Catalog Number	Includes:
YBA15ALKIT	15 pcs YBA44A (1000 Al 2-hole NEMA lug); 3 pcs YA29-2N (250 kcmil Cu 2-hole NEMA lug); 1 squeeze tube (1/2 oz) of PENETROX™ oxide inhibitor
YA15ALKIT	15 pcs YA44A3 (1000 Al 2-hole NEMA lug); 3 pcs YA29-2N (250 kcmil Cu 2-hole NEMA lug); 1 squeeze tube (1/2 oz) of PENETROX™ oxide inhibitor

Heat shrink and mounting hardware sold separately.

## TYPES YA-2NU, YA-4NU

### Blank Tongue HYLUG™

C-96

UL Listed 90° C, Up to 35 kV ♦

The Blank Tongue line of Copper Code HYLUG™ terminals are designed to provide maximum field flexibility. Scored lines prevent the drill from walking when trying to drill in this area. This innovative design allows the installer to customize the tongue drilling to fit their specific application while maintaining UL Listing and CSA Certification.

### Features & Benefits

- Manufactured from seamless high conductivity electrolytic copper tubing with heavy duty wall thickness
- Internally beveled barrel end
- Proper compression systems form a highly efficient electrical connection
- Dimples located at each end of the scored line represent the location of the NEMA standard hole spacing
- Scored line locates the center of the tongue and prevents the drill from walking when trying to drill in this area
- Offered in a wide range of code conductor sizes

TWO HOLE HYLUG™ -  
DOUBLE BARREL

COPPER COMPRESSION  
TERMINAL

C-99

Features & Benefits

- No inspection window is ideal for more corrosive environments as the barrel transition is not open
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- Short/Standard length barrel is recommended for installations with limited space requirements
- Two hole tongue/tang is recommended when space permits as the 2-hole feature minimizes the terminations from loosening or rotating under vibration, movement, or heat cycling
- 45° and 90° angular lugs are available; please contact Customer Service
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked with stamping and barrel color coding

# Compression Connections

Copper Compression — Slotted — Standard Barrel — Code/Flex

**BURNDY®**

## TWO HOLE SLOTTED HYLUG™ STANDARD BARREL

### TYPES YA-L2TC-SL AND YAV-L2TC-FXSL

#### COPPER COMPRESSION TERMINAL

C-100

UL Listed 90° C, Up to 35 kV

Compression Slotted Lugs connect copper or tinned copper conductors to bus bars, CPI Racks, Cabinets or Cable Runway. Slotted and 90° Slotted lugs have one round and one oblong hole to match hole spacing on equipment mounting rails on CPI Racks and Cabinets and on some bus bars.

#### Features & Benefits

- Inspection window allows for visual verification that the wire has been fully inserted prior to crimping the lug
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- Short/Standard length barrel is recommended for installations with limited space requirements
- One hole with slotted 2nd hole tongue/tang offers additional flexibility over a 2-hole tongue/tang as the slot provides the installer with multiple mounting hole alignment options. The 2-hole feature minimizes the terminations from loosening or rotating under vibration, movement or heat cycling
- 45° and 90° angular lugs are available; please contact Customer Service
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked with stamping and barrel color coding

**NOTE:** Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

TWO HOLE SLOTTED HYLUG™ LONG BARREL

TYPE YA-2TC-SL

Copper Compression Terminals

UL Listed 90° C, Up to 35 kV

Compression Slotted Lugs connect copper or tinned copper conductors to bus bars, CPI Racks, Cabinets or Cable Runway. Slotted and 90° Slotted lugs have one round and one oblong hole to match hole spacing on equipment mounting rails on CPI Racks and Cabinets and on some bus bars

C-101

**NOTE:** Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

Features & Benefits

- Inspection window allows for visual verification that the wire has been fully inserted prior to crimping the lug
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- Long barrel allows for an increased number of crimps which will increase the mechanical strength of the connection
- One hole with slotted 2nd hole tongue/tang offers additional flexibility over a 2-hole tongue/tang as the slot provides the installer with multiple mounting hole alignment options. The 2-hole feature minimizes the terminations from loosening or rotating under vibration, movement or heat cycling
- 45° and 90° angular lugs are available; please contact Customer Service
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked with stamping and barrel color coding

## HYLUG™ SPLIT TONGUE STANDARD BARREL TERMINALS

TYPES YA-L-4TC, YAV-L-4TC-FX

UL Listed 90° C, Up to 35 kV ♦

**NOTE:** Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

C-105

### Features & Benefits

- Inspection window allows for visual verification that the wire has been fully inserted prior to crimping the lug
- Split feature in the tongue/tang is used when connecting two separate terminal blocks for the same phase; the slot provides the needed equipment gap while allowing the proper mounting hole alignment
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- Short/Standard length barrel is recommended for installations with limited space requirements
- Two hole tongue/tang is recommended when space permits as the 2-hole feature minimizes the terminations from loosening or rotating under vibration, movement, or heat cycling
- 45° and 90° angular lugs are available; please contact Customer Service
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked with stamping and barrel color coding

# Compression Connections

BURNDY®

Copper and Aluminum Compression — Narrow Tongue — One and Two Hole

## E-LINE HYLUG™ EQUIPMENT LINE

### TYPE YA-E

C-108

### COPPER AND ALUMINUM COMPRESSION TERMINAL

UL Listed 90° C, 600 Volts to 35 kV ♦

YA-E Equipment terminals are designed to provide replacements for original equipment mechanical or other compression terminals. These narrow tongue terminals are specially designed to fit in tight areas. Whether you're upgrading or replacing, YA-E connectors will provide for any of your cable termination needs. When installed with our dieless tool, these terminals can accommodate a range of conductor sizes.

**NOTE:** Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

### Features & Benefits

- No inspection window is ideal for more corrosive environments as the barrel transition is not open
- Narrow tongue/tang is designed to allow for more parallel terminations of wire in limited space applications
- Terminals are available in Copper or Aluminum material
- Aluminum terminals accommodate both copper and aluminum wire
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire strands during insertion
- One or two-hole tongue/tang styles are available; 2-hole tongue/tang is recommended when space permits as the 2-hole feature minimizes the terminations from loosening or rotating under vibration, movement, or heat cycling
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are marked with stamping and most are color-coded also

For Two Crimps

**ONE HOLE HYLUG™  
CODE CONDUCTOR STANDARD BARREL**

**TYPE YAV-M**

Rated for 90° C, Up to 35 kV ♦

Made from electrolytic copper tube and is electro tin plate. Wire range is from 2.5 mm<sup>2</sup> to 630 mm<sup>2</sup> Class 2. Compatible to **IEC61238-1**.

**NOTE:** Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

Electro-Tin Plated

C-111

**Features & Benefits**

- Inspection window allows for visual verification that the wire has been fully inserted prior to crimping the lug
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- Short/Standard length barrel is recommended for installations with limited space requirements
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Compatible Standards: IEC61238-1, UL 486A-486B, CSA-C22.2 No. 65-03
- Connectors are clearly marked with stamping

## ONE HOLE HYLUG™ CODE CONDUCTOR LONG BARREL

### TYPE YALB-M

Rated for 90° C, Up to 35 kV ♦

Made from electrolytic copper tube and is electro tin plate. Wire range is from 10 mm<sup>2</sup> to 630 mm<sup>2</sup> Class 2. Compatible to IEC61238-1.

**NOTE:** Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

### Features & Benefits

- No inspection window is ideal for more corrosive environments as the barrel transition is not open
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- Long barrel allows for an increased number of crimps which will increase the mechanical strength of the connection
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Compatible Standards: IEC61238-1, UL 486A-486B, CSA-C22.2 No. 65-03

### TWO HOLE HYLUG™ CODE CONDUCTOR STANDARD BARREL

C-118

#### TYPE YAV-2M

Rated for 90° C, Up to 35 kV ♦

Made from electrolytic copper tube and is electro tin plate. Wire range is from 2.5 mm<sup>2</sup> to 630 mm<sup>2</sup> Class 2. Compatible to IEC61238-1.

NOTE: Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

Electro-Tin  
Plated

### Features & Benefits

- Inspection window allows for visual verification that the wire has been fully inserted prior to crimping the lug; not recommended in highly corrosive environments as the wire in the barrel is exposed to corrosive elements installed
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- Short/Standard length barrel is recommended for installations with limited space requirements and meet the exact UL testing requirements as long barrel connectors so performance of the connection is not compromised
- Two hole tongue/tang is recommended when space permits as the 2-hole feature minimizes the terminations from loosening or rotating under vibration, movement, or heat cycling
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Compatible Standards: IEC61238-1, UL 486A-486B, CSA-C22.2 No. 65-03
- Connectors are clearly marked with stamping

**TWO HOLE HYLUG™  
CODE CONDUCTOR  
LONG BARREL**

**TYPE YALB-2M**

Rated for 90° C, Up to 35 kV ♦

Made from electrolytic copper tube and is electro tin plate. Wire range is from 10 mm<sup>2</sup> to 630 mm<sup>2</sup> Class 2. Compatible to IEC61238-1.

**NOTE:** Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

**Features & Benefits**

- No inspection window is ideal for more corrosive environments as the barrel transition is not open
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- Long barrel allows for an increased number of crimps which will increase the mechanical strength of the connection
- Two hole tongue/tang is recommended when space permits as the 2-hole feature minimizes the terminations from loosening or rotating under vibration, movement, or heat cycling
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Compatible Standards: IEC61238-1, UL 486A-486B, CSA-C22.2 No. 65-03
- Connectors are clearly marked with stamping

† P-RT Die sets for use in Y46 only, PUADP-1 Adaptor not required

**ONE HOLE HYLUG™  
FLEX CONDUCTOR STANDARD BARREL**

**TYPE YAV-FM**

Rated for 90° C, Up to 35 kV ♦

Made from electrolytic copper tube and is electro tin plate. Wire range is from 50 mm<sup>2</sup> to 630 mm<sup>2</sup> for class 5. Compatible to IEC61238-1.

Electro-Tin  
Plated

C-125

NOTE: Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

**Features & Benefits**

- No inspection window is ideal for more corrosive environments as the barrel transition is not open
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- Short/Standard length barrel is recommended for installations with limited space requirements
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Compatible Standards: IEC61238-1, UL 486A-486B, CSA-C22.2 No. 65-03
- Connectors are clearly marked with stamping

### ONE HOLE HYLUG™ FLEX CONDUCTOR LONG BARREL

#### TYPE YALB-FM

C-128

Rated for 90° C, Up to 35 kV ♦

Made from electrolytic copper tube and is electro tin plate. Wire range is from 50 mm<sup>2</sup> to 630 mm<sup>2</sup> for class 5. Compatible to IEC61238-1.

Electro-Tin  
Plated

**NOTE:** Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

#### Features & Benefits

- No inspection window is ideal for more corrosive environments as the barrel transition is not open
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- Long barrel allows for an increased number of crimps which will increase the mechanical strength of the connection
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Compatible Standards: IEC61238-1, UL 486A-486B, CSA-C22.2 No. 65-03
- Connectors are clearly marked with stamping

**TWO HOLE HYLUG™ FLEX CONDUCTOR  
STANDARD BARREL**

Electro-Tin  
Plated

**TYPE YAV-F2M**

Rated for 90° C, Up to 35 kV ♦

Made from electrolytic copper tube and is electro tin plate. Wire range is from 50 mm<sup>2</sup> to 630 mm<sup>2</sup> for class 5. Compatible to IEC61238-1.

NOTE: Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

C-131

**Features & Benefits**

- Inspection window allows for visual verification that the wire has been fully inserted prior to crimping the lug
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- Short/Standard length barrel is recommended for installations with limited space requirements
- Two hole tongue/tang is recommended when space permits as the 2-hole feature minimizes the terminations from loosening or rotating under vibration, movement, or heat cycling
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Compatible Standards: IEC61238-1, UL 486A-486B, CSA-C22.2 No. 65-03
- Connectors are clearly marked with stamping

## TWO HOLE HYLUG™ FLEX CONDUCTOR LONG BARREL

Electro-Tin  
Plated

### TYPE YALB-F2M

C-134

Rated for 90° C, Up to 35 kV ◆

Made from electrolytic copper tube and is electro tin plate. Wire range is from 50 mm<sup>2</sup> to 630 mm<sup>2</sup> for class 5. Compatible to **IEC61238-1**.

**NOTE:** Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

### Features & Benefits

- No inspection window is ideal for more corrosive environments as the barrel transition is not open
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- Long barrel allows for an increased number of crimps which will increase the mechanical strength of the connection
- Two hole tongue/tang is recommended when space permits as the 2-hole feature minimizes the terminations from loosening or rotating under vibration, movement, or heat cycling
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Compatible Standards: IEC61238-1, UL 486A-486B, CSA-C22.2 No. 65-03
- Connectors are clearly marked with stamping

TYPES YE-P, YE-P-FX

HYPLUG™ FOR COPPER CONDUCTOR

Type YE-P copper compression adaptors are designed for reliable termination of copper conductor when the current capacity of the conductor is downsized, but larger conductor is utilized. Typical applications are for voltage drop protection when oversized conductors are used or flex conductor is used. These adaptors facilitate the termination into existing mechanical set screw connectors for various stranded copper cables.

Wire Connector Adapter  
Up to 35 kV ♦, 90° C

♦ For applications greater than 2000 Volts consult cable manufacturer for voltage stress relief instructions.

Features & Benefits

- Connectors are cULus Listed wire adaptors per UL 486A-486B where symbol shown on the page
- The adaptors are used in voltage drop applications
- Designed with a compression barrel that accommodates the wire and a solid pin that is used to insert and terminate in a mechanical set screw connector
- Solid pin design is rated to carry the equivalent ampacity of the incoming wire being terminated; solid pin design is more effective than stranded conductor as there is no risk of damaging strands during termination in the mechanical set screw connector
- Covers are supplied with connectors
  - EPDM rubber covers are UL Listed/CSA Certified and rated up to 600 Volts and 90°C
  - Santoprene rubber covers are also UL Listed/CSA Certified and rated up to 600 Volts and 90°C
- Connectors are clearly marked

Note: All dimensions shown are for reference only.

**TYPE ASA-U**

**HYSTACK™ TERMINAL STACKING ADAPTOR**

**FOR ALUMINUM AND COPPER TERMINALS**

UL Listed 90° C, Up to 35 kV

The Hystack™ adaptor is specially designed to allow standard terminals to be stacked on two or four hole NEMA transformer or equipment terminal pads. Hystack™ is tin-plated, high-conductivity aluminum to provide optimum corrosion resistance. Only three sizes accommodate terminals from 250 kcmil through 1000 kcmil to help keep costly inventories to a minimum.

C-141

**Features & Benefits**

- For use on terminals made from copper or aluminum material
- Designed specifically for stacking standard terminals; uses include:
  - Place the stacking adapter on the mounting plate and a terminal on top of the stacking adapter and bolt down
  - Placing a stacking adapter on a terminal pad that will be mounted to a bus bar or mounting plate and a terminal on top of the stacking adapter, and bolt down
- May be used with standard NEMA two and four hole terminals; to stack four hole NEMA terminations use two stacking adapters assembled side-by-side
- Only three sizes accommodate terminals from 250 kcmil through 1000 kcmil minimizing inventory requirements
- Stacking adaptors are clearly marked

Accommodates Copper and Aluminum Compression Terminals		Catalog Number	C	H
Conductor Max.	Insulation O.D.			
250 kcmil	0.87	<b>ASA250U</b>	1.00	0.77
800 kcmil	1.37	<b>ASA800U</b>	1.00	1.13
1000 kcmil	1.49	<b>ASA1000U</b>	1.25	1.25

To stack 4 hole NEMA drilled terminals use 2 adaptors assembled side by side. ASA-U stacking adaptors are recommended for use with any BURNDY® UL Listed compression terminal, 2 or 4 hole NEMA pad aluminum and copper lugs, types YA, YA-L, YA-A, and for all 2-hole NEMA spaced lugs in the OVERHEAD and UNDERGROUND catalog sections.

**Note:** All dimensions shown are for reference only.

C-142

### TERMINAL STACKING ADAPTOR

This HYSTACK™ adaptor is specially designed to get terminals to the back end of a bus bar or other areas that require terminals to be elevated off the mounting surface. This HYSTACK™ is made from high conductivity copper and tin-plated to provide optimum corrosion resistance. It will accommodate #10 AWG through 750 kcmil HYLUG™ terminals.

### Features & Benefits

- For use on terminals made from copper or aluminum material
- Designed specifically for stacking standard terminals; uses include:
  - Place the stacking adaptor on the mounting plate and a terminal on top of the stacking adaptor and bolt down
  - Placing a stacking adaptor on a terminal pad that will be mounted to a bus bar or mounting plate and a terminal on top of the stacking adaptor, and bolt down
- May be used with standard NEMA two and four hole terminals; to stack four hole NEMA terminations use two stacking adaptors assembled side-by-side
- Only three sizes accommodate terminals from 250 kcmil through 1000 kcmil minimizing inventory requirements
- Stacking adaptors are clearly marked

Catalog Number	Stud Hole Size	Stud Hole Spacing	Length	Width	Height
CUSA442TC38	3/8"	1"	1.75"	1.12"	1.50"
CUSA442NTC	1/2"	1-3/4"	3.00"	1.12"	1.50"

**Note:** All dimensions shown are for reference only.

**Reference: Catalog Number TMH332.**

This TMH332 Kit has just the right hardware when using the CUSA442TC38 HYSTACK on a 1/4" bus bar with a 4/0 through 750 kcmil HYLUG™.

**COLOR-CODED HYLINK™ UNINSULATED PARALLEL SPLICE**

**TYPE YSCM**

Type YSCM HYLINK™ seamless parallel splice connectors permit stranded wires to be laid parallel inside the connector and spliced together with BURNDY® compression tools. Each YSCM connector accommodates a wide range of conductors and is color-coded to ensure proper tool and die match. YSCM connectors are cULus Listed Wire Connectors per UL 486A/B for Grounding and Bonding, and UL 467 and rated for Direct Burial in Earth and Concrete.

C-143

**Features & Benefits**

- Copper seamless barrel uninsulated parallel splice
- Designed to accommodate a wide range of stranded wires to be laid parallel inside the barrel and spliced together
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Barrel is color coded to ensure proper die and installation tooling is selected
- YSCM Uninsulated Parallel Splices are cULus Listed Wire Connectors per UL 486A-486B per UL 467
- cULus Listed for Grounding and Bonding per UL467 with Direct Burial (DB) rating in Earth or Concrete

**Notes:**

- Material: Copper per ASTM B75.
  - Finish: Tin plated. For nickel plating, add suffix "NK" to the Catalog Number.
- † Recommended strip length. Strip length dependant on size, no. of wires and insulation thickness.
- ‡ Refer to Circular Mil Table per ASTM B8 for total Class B Circular Mil calculations.
- \* YSCM231 can also be installed with MY29-3 and retain Listings.

Add the circular mils of the wires you wish to splice; that sum would be used to determine the correct splice using the Min/Max on the table above.

The table to the right is for reference only.

TYPE YS-L

HYLINK™ SPLICE STANDARD BARREL

COPPER COMPRESSION

UL Listed 90° C, Up to 35 kV ♦

C-145

Features & Benefits

- Copper seamless barrel has center stop indentations used to indicate when wire is fully inserted into each side of the barrel
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Short/Standard length barrel is recommended for installations with limited space requirements
- Connectors clearly marked with color coding

▲ See tooling section of this catalog for complete tool and die listings.

\* Use PUADP-1 adapter with U dies in Y46 HYPRESS™.

\*\* P44RT for use with Y46 HYPRESS™ only. PUADP-1 adaptor not required.

\*\*\* The MM² conductor sizes listed are the recommendations for Class 2 conductor.

■ The maximum size for the Y35 is 400 kcmil insulated code cable.

♦ For applications greater than 2000 Volts consult cable manufacturer for voltage stress relief instructions.

Note: All dimensions shown are for reference only.

# Compression Connections

BURNDY®

Copper Compression — Code — Long Barrel — Splice

## TYPE YS

### HYLINK™ SPLICE - LONG BARREL

C-146

### COPPER COMPRESSION SPLICE

UL Listed 90° C, Up to 35 kV ♦

### Features & Benefits

- Copper seamless barrel has center stop indentations used to indicate when wire is fully inserted into each side of the barrel
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Barrel is color coded to ensure proper die and installation tooling is selected
- Long barrel allows for an increased number of crimps which will increase the mechanical strength of the connection while allowing the connection to operate at a lower temperature rating

▲ See tooling section of this catalog for complete tool and die listings

♦ For applications greater than 2000 Volts consult cable manufacturer for voltage stress relief instructions.  
† Requires Y60BHU HYPRESS™ with L48RT die set.  
Note: All dimensions shown are for reference only.

## REDUCING ADAPTER

### TYPE Y-R

### FOR COPPER

C-148

Up to 35 kV ♦

The Y-R reducing adapter has been designed to allow large size, long barrel, copper long barrel. HYDENT™, HYSPLICE™ and HYTEE™ terminals, splices and T taps to be used on smaller conductor sizes. To use, simply insert the reducer into the barrel, insert the wire into the reducer adapter and crimp the outer barrel using its recommended tooling.

### Features & Benefits

- Reducing adapters fit inside copper long barrel compression terminals (Type YA-), splices (Type YS-), or tap connectors
- The outside diameter of the reducing adapter is equivalent to the terminal or splice accommodating wire size, and the inside diameter of the reducer adapter is reduced to accommodate a smaller wire size
- Use the same installation tooling and die sets or dieless tool recommended for the compression terminal, splice, or tap connection with the reducing adapter
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damage of the wire strands during insertion
- Electro-tin plated, unless otherwise specified, to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Can be field modified to fit shorter length compression terminals (Type YA-L) and splices (Type YS-L)
- Connectors are clearly marked with stamping

**Example Accommodate a 4/0 AWG wire on one end and a #2 AWG wire on the other:**

1. Use a YS28 (which splices two 4/0 AWG wires on each end)
2. Select a Y282CR reducing adapter (reducing adapter fits the YS28 barrel with a reduced inside diameter that accommodates a #2 AWG wire size)
3. Fully insert the Y282CR reducing adapter into one end of the YS28 splice barrel
4. Insert the #2 AWG wire into the Y282CR reducing adapter that is inside the YS28 splice barrel
5. Crimp the YS28 barrel side with the Y282CR reducing adapter, using the recommended die and tool combination or dieless tool as specified for use on the YS28
6. Insert the 4/0 AWG wire into the other end of the YS28 barrel and crimp that side of the splice using the recommended installation tooling and your splice reducing connection is complete!

UNINSULATED BELLED STANDARD LENGTH COPPER COMPRESSION SPLICE

HYLINK™ TYPE YS-LB

UL Listed 90° C, 600 Volts to 35 kV ♦

HYLINK™ type YS-LB splices are designed for flexible and extra flexible copper conductors used in mining machines, locomotives, welding cables and other flexible cable applications. The seamless, high conductivity copper, electro-tin plated belled barrel provides for easy insertion of flexible stranded conductors and the nest indenter die system provides an excellent electrical and mechanical connection.

Features & Benefits

- Copper seamless barrel is designed with a “belled” end opening at the wire entry to ensure smooth insertion of highly flexible stranded wire, preventing possible damaging of the wire strands during insertion
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Short/Standard length barrel is recommended for installations with limited space requirements
- Barrel has center stop indentations used to indicate when wire is fully inserted into each side of the barrel
- Connectors are clearly marked with color coding to ensure proper die and installation tooling is selected

## TYPES YS-T AND YSP-T

### HIGH-VOLTAGE HYLINK™

C-152

### UNINSULATED HIGH VOLTAGE COPPER COMPRESSION SPLICE

#### STANDARD BARREL - TAPERED ENDS

UL Listed 90° C, Up to 35 kV ♦

Seamless types YS-T and YSP-T high conductivity copper electro-tin plated compression HYLINK™ high-voltage splices with standard barrel and tapered ends are ideally suited for higher voltage applications from 5 kV through 35 kV.

#### Features & Benefits

- Copper seamless barrel is designed with tapered ends per EEI Standard TD160, indicating use on voltages 5kV through 35kV; this aids in preventing corona emission and simplifies taping for lower installation cost
- Barrel also has an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damage of the wire strands during insertion
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Short/Standard length barrel is recommended for installations with limited space requirements
- Type YS-T barrel has center stop indentations used to indicate when wire is fully inserted into each side of the barrel
- Type YSP-T barrel has a center plug permanently brazed in place; this plug prevents oil within oil filled conductor from passing through the splice connector and is also an indication when the wire is fully inserted into each side of the barrel
- Connectors are clearly marked with color coding to ensure proper die and installation tooling is selected

\* Use adapter PUADP-1 with U Dies in Y46 HYPRESS™. Y46 HYPRESS™ uses the same nest indentor and adaptor as the Y35, Y39 and Y750, but with the PUADP-1 adaptors.

\*\* A 0.06 radius at each end is used for sizes 6-27.

■ The maximum size for the Y35 is 400 kcmil.

▲ See tooling section of this catalog for complete tool and die listings.

♦ For applications greater than 2000 Volts consult cable manufacturer for voltage stress relief instructions.

Note: All dimensions shown are for reference only.

# Compression Connections

BURNDY®

Copper Compression — Flex — Splice — Long Barrel — Belled Ends

## TYPE YS-FXB

### HYLINK™ - SPLICE - BELLED LONG BARREL

C-154

UL Listed 90° C, Up to 35 kV ♦

### Features & Benefits

- Copper seamless barrel is designed with a "belled" opening at the wire entry to ensure smooth insertion of highly flexible stranded wire, preventing possible damaging of the wire strands during insertion
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Long barrel allows for an increased number of crimps which will increase the mechanical strength of the connection
- Barrel has center stop indentations used to indicate when wire is fully inserted into each side of the barrel
- Connectors clearly marked with color coding

\* Use PUADP-1 adapter with U dies in Y46 HYPRESS™.  
† P-RT dies sets are for use with Y46 HYPRESS™ only.  
\*\*\* The MM² conductor sizes listed are the recommendations for Class 5 conductor.

† 16 MM² and 120 MM² referenced are for both Class 2 and Class 5  
■ The maximum size for the Y35 is 373.7 kcmil.  
▲ See tooling section of this catalog for complete tool and die listings.

♦ For applications greater than 2000 Volts consult cable manufacturer for voltage stress relief instructions.  
**Note:** All dimensions shown are for reference only. Measurements in brackets [ ] are in metric dimensions.

### TYPE YS-TC

### HYSPLICE™

C-156

### In-line Splice Kits

YS-TC kits are for splicing cables and covering the connection with clear heat shrink. Splices are constructed from seamless, high conductivity electrolytic copper tubing for maximum conductivity and tin-plated to resist corrosion. Each YS-TC splice is provided with inspection holes and cable stops. The YS-TC family also features the BURNDY® color code system.

### Features & Benefits

- Each splice kit includes one YS-TC compression splice connector and heat shrink
- The YS-TC compression splice connector provided in the kit is UL Listed in accordance with UL 486A-486B - Wire Connectors; UL Listed 90°C up to 35kV
- Barrels have 2 inspection windows on each side to allow for visual verification that the wire has been fully inserted prior to crimping the splice
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Short/Standard length barrel is recommended for installations with limited space requirements and meet the exact UL testing requirements as long barrel connectors so performance of the connection is not compromised
- Connectors clearly marked with color coding

\* Clear Heatshrink – UL224 VW1 Listed – passes  
TELCORDIA GR-347-CORE Abrasion and Cut Test.

(Up to 750 kcmil Class B code cable. Contact factory for  
750 flex cable applications.)

Note: All dimensions shown are for reference only.

### TYPE YSR-TC

### HYREDUCER™

C-158

### In-Line Reducer Splice Kits

YSR-TC reducing splice kits provide for splicing two different cable sizes with inspection holes. The larger conductor is inserted first and butts against the center of the connector where the smaller barrel begins. Constructed from seamless, high conductivity electrolytic copper tubing for maximum conductivity and tin plated to resist corrosion. The YSR-TC family also features the BURNDY® color code system.

### Features & Benefits

- Each splice kit includes one YSR-TC compression in-line splice reducer connector and heat shrink
- The YSR-TC in-line compression splice reducer connector provided in the kit is UL Listed in accordance with UL 486A-486B - Wire Connectors; UL Listed 90°C up to 35kV
- Barrels have 2 inspection windows on each side to allow for visual verification that the wire has been fully inserted prior to crimping the splice
- Designed configurations allow for Copper Code-to-Code wire connections, Copper Code-to-Flex wire connections, and Copper Flex-to-Flex wire connections; see table for more complete details
- Barrel is designed with a taper to accommodate a main run wire that is reduced to a smaller tap wire
- Barrel also provided with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Short/Standard length barrel is recommended for installations with limited space requirements
- Connectors are clearly marked with color coding
- Can be used in place of H-taps; the in-line design saves space in cable trays and other similar applications

### Connector with Clear Heat Shrink Kit

Clear heat shrink UL224 VW1 Listed. Passes TELCORDIA GR-347-CORE Abrasion and Cut Test up to 750 kmil Class B code cable; contact factory for 750 flex cable applications.

### TYPE YSR-TC

### HYREDUCER™

C-172

### In-Line Reducer Splice Kits

#### Standard Barrel without Inspection Window

YSR-TC reducing splice kits provide for splicing two different cable sizes with inspection holes. The larger conductor is inserted first and butts against the center of the connector where the smaller barrel begins. Constructed from seamless, high conductivity electrolytic copper tubing for maximum conductivity and tin plated to resist corrosion. The YSR-TC family also features the BURNDY® color code system.

### Features & Benefits

- Each splice kit includes one YSR-TC compression in-line splice reducer connector and heat shrink
- The YSR-TC in-line compression splice reducer connector provided in the kit is UL Listed in accordance with UL 486A-486B - Wire Connectors; UL Listed 90°C up to 35kV
- No inspection window for more corrosive environments as the barrel transition is not open
- Designed configurations allow for Copper Code-to-Code wire connections, Copper Code-to-Flex wire connections, and Copper Flex-to-Flex wire connections; see table for more complete details
- Barrel is designed with a taper to accommodate a main run wire that is reduced to a smaller tap wire
- Barrel also provided with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Short/Standard length barrel is recommended for installations with limited space requirements and meet the exact UL testing requirements as long barrel connectors so performance of the connection is not compromised
- Connectors are clearly marked with color coding
- Can be used in place of H-taps; the in-line design saves space in cable trays and other similar applications

### Connector with Clear Heat Shrink Kit

Clear heat shrink UL224 VW1 Listed. Passes TELCORDIA GR-347-CORE Abrasion and Cut Test up to 750 kcmil Class B code cable; contact factory for 750 flex cable applications.

### TYPE YSR-TC

### HYREDUCER™

C-176

### In-Line Reducer Splice Kits for Telecommunications Applications

#### Long Barrel with Inspection Window

YSR-TC reducing splice kits provide for splicing two different cable sizes with inspection holes. The larger conductor is inserted first and butts against the center of the connector where the smaller barrel begins. Constructed from seamless, high conductivity electrolytic copper tubing for maximum conductivity and tin plated to resist corrosion. The

YSR-TC family also features the BURNDY® color code system.

### Features & Benefits

- Each splice kit includes one YSR-TC compression in-line splice reducer connector and heat shrink
- The YSR-TC in-line compression splice reducer connector provided in the kit is UL Listed in accordance with UL 486A-486B - Wire Connectors; UL Listed 90°C up to 35kV
- Barrels have 2 inspection windows on each side to allow for visual verification that the wire has been fully inserted prior to crimping the splice
- Designed configurations allow for Copper Code-to-Code wire connections, Copper Code-to-Flex wire connections, and Copper Flex-to-Flex wire connections; see table for more complete details
- Barrel is designed with a taper to accommodate a main run wire that is reduced to a smaller tap wire
- Barrel also provided with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Long barrel allows for an increased number of crimps which will increase the mechanical strength of the connection
- Connectors are clearly marked with color coding
- Can be used in place of H-taps; the in-line design saves space in cable trays and other similar applications

### Connector with Clear Heat Shrink Kit

### TYPE YSR-TC

### HYREDUCER™

C-182

### In-Line Reducer Splice Kits

### Long Barrel without Inspection Window

YSR-TC reducing splice kits provide for splicing two different cable sizes with inspection holes. The larger conductor is inserted first and butts against the center of the connector where the smaller barrel begins. Constructed from seamless, high conductivity electrolytic copper tubing for maximum conductivity and tin plated to resist corrosion. The YSR-TC family also features the BURNDY® color code system.

### Features & Benefits

- Each splice kit includes one YSR-TC compression in-line splice reducer connector and heat shrink
- The YSR-TC in-line compression splice reducer connector provided in the kit is UL Listed in accordance with UL 486A-486B - Wire Connectors; UL Listed 90°C up to 35kV
- No inspection window for more corrosive environments as the barrel transition is not open
- Designed configurations allow for Copper Code-to-Code wire connections, Copper Code-to-Flex wire connections, and Copper Flex-to-Flex wire connections; see table for more complete details
- Barrel is designed with a taper to accommodate a main run wire that is reduced to a smaller tap wire
- Barrel also provided with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Long barrel allows for an increased number of crimps which will increase the mechanical strength of the connection
- Connectors are clearly marked with color coding
- Can be used in place of H-taps; the in-line design saves space in cable trays and other similar applications

### Connector with Clear Heat Shrink Kit

Clear heat shrink UL224 VW1 Listed. Passes TELCORDIA GR-347-CORE Abrasion and Cut Test up to 750 kcmil Class B code cable; contact factory for 750 flex cable applications.

TYPE YC-L

THIN-WALL COPPER C-TAP

UL Listed 90° C, Up to 35 kV ♦

Type YC-L is a thin-wall high conductivity copper connector for making copper tap and parallel connections from #14 to 3/0 AWG. UL Listed and CSA Certified Wire Connector per UL 486A-486B. Direct Burial Rating per UL 467 Grounding and Bonding Connector.

C-185

Features & Benefits

- Bare copper range taking C-tap that allows for less inventory as one C-tap can accommodate a multitude of wire combinations
- Reinforced ribs on the outside of the C-tap increases the mechanical holding strength of the connection
- Creates a compact connection that allows for easy taping and insulating
- Connectors include a color dot to ensure proper die and installation tooling is selected
- Manufactured from high conductivity wrought copper provind low resistance for excellent electrical conductivity
- Connectors are clearly marked with stamping and color dot
- UL Listed CSA Certified Wire Connectors per UL 486A-486B
- 4 Sizes are Listed for Grounding and Bonding per UL 467 for Direct Burial in Earth or concrete

## TYPE YC-L

▲ See tooling section of this catalog for complete tool and die listings.

‡ Refer to website for sales drawing with complete listing with solid/stranded copper conductor

\* Use PUADP-1 adapter with U dies in Y46 HYPRESS™  
For Tin plating add TN suffix (example = YC10L12TN)

Note: All dimensions shown are for reference only.

\*\* YC3L12 is NOT UL Listed or CSA Certified for Grounding and Bonding.

TYPE YC-C

COPPER CRIMPIT™

UL Listed 90° C, Up to 35 kV ♦

Type YC-C copper CRIMPIT™ connector is a range-taking C shape compression connector for making tap or parallel copper connections from #12 sol. to 4/0 strand conductor.

C-187

Features & Benefits

- Bare copper standard (tin plated available)
- Range taking C-tap that allows for less inventory as one C-tap can accommodate a multitude of wire combinations
- Creates a compact connection that allows for easy taping and insulating
- Manufactured from high conductivity wrought copper providing low resistance for excellent electrical conductivity
- Connectors are clearly marked with stamping

Copperweld-Copper Conductors

- 8A - Use CRIMPIT™ accommodating 6 str. Copper
- 6A - Use CRIMPIT™ accommodating 4 Str. Copper
- 4A - Use CRIMPIT™ accommodating 2 Str. Copper
- 2A - Use CRIMPIT™ accommodating 1/0 and 2/0 Copper

† Not UL Listed.

▲ See tooling section of this catalog for complete tool and die listings.

§ Not UL Listed or CSA Certified with this conductor size in run.

\* Use PUADP-1 adapter when using U dies in the Y46 HYPRESS™.

\*\* Multiple crimp die set. Makes more than one crimp per tool compression. Figure ( ) indicates number of compressions.

♦ For applications greater than 2000 Volts consult cable manufacturer for voltage stress relief instructions.

Note: All dimensions shown are for reference only.

### TYPE YCHC

#### C-TAP COPPER CRIMPIT™

C-188

UL Listed 90° C, Up to 35 kV ♦

#### Features & Benefits

- Range taking C-Tap that allows for less inventory as one C-tap can accommodate a multitude of wire combinations
- Accommodates a wide range of run/tap combinations
- Manufactured from high conductivity wrought copper providing low resistance for excellent electrical conductivity
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Each connector has a recommended UL Listed / CSA Certified insulating cover available in both black and clear (see table below); clear cover allows for easy inspection of the connection (see separate page for details on Type CCF-FR and CFR-FR Covers)
- Connectors clearly marked with color coding

Note: To properly use tap 2 and/or tap 3 conductors in YCHC connector a conductor from the tap 1 cable range must be included in the tap 1 groove.

‡ To obtain covers made of polyethylene remove suffix-FR (example: CFO). CFO is not flame retardant.

\* Use PUADP-1 adaptor with U dies in Y46.

▲ See tooling section of Master Catalog for complete tool and die listings.

♦ For applications requiring flame retardant cover, use either a CCFBG-FR (Clear) or CFBG-FR (Black) cover and YH2C2C connector by ordering YH8C8CWCC (Clear) or YH8C8CWC (Black).

Note: All dimensions shown are for reference only.

TYPE YH

H-TAP COPPER CRIMPIT™

UL Listed 90° C, Up to 35 kV ♦

C-189

Features & Benefits

- Range taking H-tap that allows for less inventory as one H-tap can accommodate a multitude of wire combinations
- Accommodates a wide range of run / tap combinations
- The tap grooves act independently; the use of one run and one tap wire is required when using this connector for making a connection
- Designs with more than one tap wire groove require installers to utilize only the run and one tap groove; the other tap grooves can be left empty
- The “third hand” is a string provided with the H-tap connector used to wrap the wire while being inserted into the run and tap grooves; this feature constrains the wire while the installer applies the recommended number of crimps
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Each connector has a recommended UL Listed / CSA Certified insulating cover available in both black and clear (see table below); clear cover allows for easy inspection of the connection (see separate page for details on Type CCF-FR and CFR-FR Covers)
- Connectors clearly marked with color coding to ensure proper die and installation tooling is selected

TYPE CF-FR

H-TAP — FLAME RETARDANT COVER

UL Listed 90° C, Up to 600 Volts

C-193

Features & Benefits

- Insulation cover that has a one-piece hinge design so no extra hardware is required
- After an H-tap connection is made, the appropriate CF-FR cover can be used to slip over the connection and latches securely shut
- The use of the insulation cover eliminates the need to tape the connection making this solution a fast and reliable method of insulating
- Flash Barrier; the cover is designed to protect against electrical flashover
- Type CF-FR cover material has a UL94 V-O Flame rating with a minimum 28 oxygen index that indicate self-extinguishing retardant properties
- Covers are clearly marked with lettering

Catalog Number	Max. Conductor Accommodated	Matched H Copper CRIMPIT™	Max. Connector Length	Connector Color Code
CFBG-FR	#8 AWG	YH8C8C	0.65	Green
	#6 AWG	YH6C6C	0.65	Orange
CFO-FR	#2 AWG	YH2C2C	0.80	Brown

	1000 kcmil	YH4434, YH4444	1.10	White

\* Use CFN-FR for single tap installation; use CFR-FR when 2 or more tap conductors are installed.

† Two-piece design packaged together.

Note: All dimensions shown are for reference only.

## TYPE CFA-FR

### H-CRIMPIT™

C-194

## FLAME RETARDANT INSULATING COVERS

### FOR O, D3, N, AND KR DIE SIZE H-TAP COMPRESSION CONNECTORS

UL Listed to 600 Volts

Type CFA-FR flame retardant insulating covers are made of high impact, high density polypropylene with a minimum 28 oxygen index. This cover has the benefit of self-extinguishing flame retardant properties. Material is UL 94V-O rated. Overlapping flash barriers protect both seams against possible electrical flashover. End fingers remain closed or wrap closely around conductors. Multiple latches lock cover closed securely. Type CFA-FR covers are suitable for indoor and outdoor use. Pliable in cool weather application.

### Features & Benefits

- Insulating cover that has a one-piece hinge design so no extra hardware required
- After an H-CRIMPIT™ connection is made the appropriate cover can be used to slip over the connection and latches securely shut
- The use of the insulating cover eliminates the need to tape the connection, making this solution a fast and reliable method of insulating
- The cover is designed to provide a flash barrier and protect against electrical flashover
- UL Listed, CSA Certified insulating cover; 600 volts max, 90°C
- Polypropylene material has a V-O flame rating per UL 94
- Covers are clearly marked with lettering

TYPE CCF-FR

CLEAR H-TAP — FLAME RETARDANT COVER

UL Listed 90° C, Up to 600 Volts

C-195

Features & Benefits

- Insulation cover that has a two-piece design with positive locking latch to ensure correct installation; prevents opening after installation
- After an H-tap connection is made, the appropriate Type CCF-FR cover can be used to slip over the connection and latch securely shut
- Embedded magnifying lens in the cover provides increased visibility of the H-tap die embossment on the connector made by the required installation tooling; this allows for improved visibility during a connection inspection
- Made of polished clear polycarbonate material that provides:
  - High visibility for inspection of installed H-tap connection
  - Built-in channels on the outside of the covers accommodate and hold cable ties, hook and loop ties, or waxed cord security in place after cover installation
  - Patented highly flexible fingers on each covers are designed to contour around the wire
  - Internal pockets designed to accommodate identification tags (4 ID tags included)
  - UL94 V-O Flame rating indicating self-extinguishing retardant properties
- The use of the insulation cover eliminates the need to tape the connection making this solution a fast and reliable method of insulating
- Molded barrier prevents installed H-tap connectors from electrical flashover
- Covers come with two (2) clear cover halves, two (2) cable ties, and four (4) identification tags
- Covers are clearly marked with lettering

Catalog Number	Max. Conductor Accommodated	Matched H Copper CRIMPIT™	Max. Connector Length	Connector Color Code

\* Use CCFN-FR for single tap installation; use CCFR-FR when 2 or more tap conductors are installed. **Note:** All dimensions shown are for reference only.

### TYPES YSH

#### H COPPER CRIMPIT™

#### COPPER SPLIT COMPRESSION WYE TAP CONNECTOR

C-196

The YSH heavy duty connectors are designed for insulated underground wye splices. The split H copper CRIMPIT™ connector is longer than our standard H copper CRIMPIT™ and is suitable for use on high voltage (15kV) power cables with copper conductors. The connectors cannot be used with oil filled or mass impregnated cables since no oil stop is provided. The connector is installed with standard BURNDY® HYPRESS™ tools and is made of tin-plated electrolytic copper.

Color Code Die and Crimp Information

Conductor Range

Electro-Tinplated

#### Features & Benefits

- Range taking H-tap that allows for less inventory as one H-tap can accommodate a multitude of wire combinations
- Accommodates a wide range of run / tap combinations
- The tap grooves act independently; the use of one run and one tap wire is required when using this connector for making a connection
- Manufactured from high conductivity wrought copper providing low resistance for excellent electrical conductivity
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Color coded to ensure proper die and installation tooling is selected
- Insulation is not provided; insulation may be obtained from Raychem (800-272-9243) Type HVSU Splice Kits for 15kV installations; a complete IEEE 404 15kV installation is provided

Fig. 1

① Due to thickness of underground wire insulation the minimum recommended strip length from the connector edge is 1 inch.

\* Use PUADP-1 adaptor with U dies in Y46. The Y46 and P dies result in a smooth crimp surface and is recommended for voltages above 600 V.

▲ See tooling section of this catalog for complete tool and die listings.

† Number of crimps per connector. U dies require double crimps.

Note: All dimensions shown are for reference only.

### TYPE YST

### UNINSULATED T-COUPLER

### COPPER HYTEE™ COUPLER

C-198

UL Listed 90° C, Up to 35 kV ♦

Type YST copper compression tee is designed for connecting a run conductor with a perpendicular tap conductor.

YST connectors are commonly used in junction boxes and manholes to make a radial tap off a main run. They are needed in many industrial, utility generation and commercial applications. The most common cable combinations are listed below. BURNDY® Type Y-R reducers can be used to accommodate most cable combinations.

### Features & Benefits

- Manufactured from high conductivity electrolytic copper tubing with heavy wall thickness, Type YST T-couplers provide low resistance for excellent electrical conductivity
- Featuring long barrel length for all three wire accommodating barrels allows for an increased number of crimps increasing the mechanical strength of the connection while allowing the connection to operate at a lower temperature rating; additionally, the long barrel permits the use of the Type Y-R reducing adapters
- Accommodates a wide range of run / tap combinations
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked

\* Use adapter PUADP-1 with U Dies in Y46 HYPRESS™.  
 ■ The maximum size for the Y35 is 400 kcmil.

● Contact factory for conductor combinations not shown.  
 ▲ See tooling section of this catalog for complete tool and die listings.

♦ For applications greater than 2000 Volts consult cable manufacturer for voltage stress relief instructions.  
 Note: All dimensions shown are for reference only.

TYPES YA-A AND YA-A-TN

HYLUG™

UNINSULATED ALUMINUM COMPRESSION TERMINAL

FOR ALUMINUM AND COPPER CONDUCTORS

1-HOLE DESIGN

UL Listed 90° C, Up to 35 kV ♦

Type YA-A aluminum tin-plated compression HYLUG™ terminals are dual-rated and designed for use on both aluminum and copper conductors from #12 sol. through 2000 kcmil.

They are designed for heavy duty applications to 35kV. YA-A terminals are pre-filled with PENETROX™, and assembled with color-coded end caps. The aluminum HYLUG™ terminals are designed for a permanent trouble-free electrical termination.

Features & Benefits

- Aluminum terminals are dual rated to accommodate both copper and aluminum wire and are indicated with AL-CU on the connector
  - AL9CU indicates the terminal can accommodate aluminum and copper wire and is UL Listed 90°C, up to 35kV
  - AL7CU indicates the terminal can accommodate aluminum and copper wire and is UL Listed 75°C, up to 35kV
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- 45° and 90° angular lugs are available; please contact Customer Service
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked with wire size, die index, color code, and crimp locations bands
- Factory pre-filled with PENETROX™ A13 oxide inhibitor
- Color coded end caps are factory inserted in the barrels to match the die color code; prevent foreign materials from entering the barrel
- Aluminum oxidation is not easily detected but causes resistance in a connection; it is imperative the proper preparation takes place prior to making an aluminum-to-aluminum connection

C-199

**NOTE:** Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

### TYPE YA-A

### HYLUG™

C-202

## UNINSULATED ALUMINUM COMPRESSION TERMINAL FOR ALUMINUM AND COPPER CONDUCTORS

### 2-HOLE AND 4-HOLE DESIGNS

UL Listed 90° C, Up to 35 kV ♦

Type YA-A 2- and 4-hole pads inhibit connector rotation and increase area contact. These aluminum terminals have the same design features and benefits as the 1-hole YA-A with an added stud hole for a more secure termination to various types of equipment pads. They are dual-rated for use on both aluminum and copper conductors.

**NOTE:** Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

### Features & Benefits

- Aluminum terminals are dual rated to accommodate both copper and aluminum wire and are indicated with AL-CU on the connector
  - AL9CU indicates the terminal can accommodate aluminum and copper wire and is UL Listed 90°C, up to 35kV
  - AL7CU indicates the terminal can accommodate aluminum and copper wire and is UL Listed 75°C, up to 35kV
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- 45° and 90° angular lugs are available; please contact Customer Service
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked with wire size, die index, color code, and crimp locations bands
- Factory pre-filled with PENETROX™ A13 oxide inhibitor
- Color coded end caps are factory inserted in the barrels to match the die color code; prevent foreign materials from entering the barrel
- Aluminum oxidation is not easily detected but causes resistance in a connection; it is imperative the proper preparation takes place prior to making an aluminum-to-aluminum connection

### Y644HSXT DIELESS HYPRESS™ RANGE-TAKING CAPABILITIES

The following size HYDENT™ lugs and two way splices, when crimped with the Y / PAT644 DIELESS HYPRESS™ tool, produce the following range taking capabilities:

Aluminum Connectors					
Standard Wire Size	Expanded Wire Range	Standard Wire Size	Expanded Wire Range	Standard Wire Size	Expanded Wire Range
#6 AWG	#6 AWG	1/0 AWG	1/0 - #1 AWG	250 kcmil	250 kcmil - 1/0 AWG
#4 AWG	#4 - #6 AWG	2/0 AWG	2/0 - #1 AWG	300 kcmil	300 kcmil - 2/0 AWG
#2 AWG	#2 - #6 AWG	3/0 AWG	3/0 - #1 AWG	350 kcmil	350 kcmil - 3/0 AWG
#1 AWG	#1 - #2 AWG	4/0 AWG	4/0 - #1 AWG	400 kcmil	400 kcmil - 4/0 AWG
				500 kcmil	500 kcmil - 4/0 AWG
				600 kcmil	600 - 250 kcmil
				750 kcmil	750 - 500 kcmil

**TYPE YA-A-KIT**

**TRANSFORMER LUG KIT**

Each kit contains the UL Listed and CSA Certified AL9CU rated aluminum compression connectors and tongue mounting hardware needed to terminate aluminum or copper cables in “dry type” transformers. The KVA rating gives an approximate cross reference to the appropriate kit.

C-205

**NOTE:** Field bending straight lugs to achieve an angular connection will void UL Listing / CSA Certifications and BURNDY will not be liable for the connection.

**Features & Benefits**

- UL Listed AL9CU dual rated compression terminals and CSA Certified; ensure the transformer feeders and taps are terminated properly
- Plated steel cap screws and hex nuts with captive conical washers or individual belleville washers
- Terminal to bus connections are made using proper hardware resulting in true torque to pressure performance, compensates for dissimilar metal expansion and contraction
- Hardware packed in plastic bag; no lost hardware prior to installation

### TYPE AYP, AYPO

#### HYPLUG™

C-206

#### FOR ALUMINUM AND COPPER CONDUCTOR

UL Listed 90° C, Up to 35 kV ♦

AL9CU

AL9

Types AYP and AYPO aluminum compression adaptors are designed for reliable termination of aluminum and copper conductor in mechanical connectors. Typical applications include mechanical connectors in molded case circuit breakers, panel board equipment and meter sockets.

#### Features & Benefits

- Aluminum pin terminals are dual rated to accommodate both copper and aluminum wire and are indicated with AL-CU on the connector
  - AL9CU indicates the terminal can accommodate aluminum and copper wire and is UL Listed 90°C, up to 35kV
  - AL7CU indicates the terminal can accommodate aluminum and copper wire and is UL Listed 75°C, up to 35kV
- Short pin length design permits easy installation in limited space applications; rated for the full ampacity of the incoming conductor
- Smooth surface on the pin allows for greater contact area and electrical connectivity
- Solid pin design eliminates “how tight is tight” torque requirement problem and eliminates over torquing on stranded pin adaptors that can result in damaged strands for increased resistance
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked with wire size, die index, color code, and crimp locations bands
- Factory pre-filled with PENETROX™ A13 oxide inhibitor
- Color coded end caps are factory inserted in the barrels to match the die color code; prevent foreign materials from entering the barrel

TYPE AYP

TYPE AYPO

- Covers are supplied with connectors
  - EPDM rubber covers are UL Listed/CSA Certified and rated up to 600 Volts and 90°C
  - Santoprene rubber covers are also UL Listed/CSA Certified and rated up to 600 Volts and 90°C
- Aluminum oxidation is not easily detected but causes resistance in a connection; it is imperative the proper preparation takes place prior to making an aluminum-to-aluminum connection
- The connector comes in an in-line pin (Type AYP) and offset pin design (Type AYPO)
- Offset pin design provides added flexibility in limited space as the connectors can be rotated preventing wire interference when installing cable side-by-side to a mechanical connector
- Only 5 dies sets install the complete line of HYPLUG™ adaptors from #6 AWG up to 750 kcmil

#### Y / PAT644 DIELESS HYPRESS™

#### RANGE-TAKING

#### CAPABILITIES

The following HYPLUG™ lugs and two way splices, when crimped with the Y / PAT644 DIELESS HYPRESS™ tool, produce the following range-taking capabilities for Aluminum Conductor only:

♦ For applications greater than 2000 Volts consult cable manufacturer for voltage stress relief instructions.

Aluminum Conductors Only					
Standard Wire Size	Expanded Wire Range	Standard Wire Size	Expanded Wire Range	Standard Wire Size	Expanded Wire Range

Scratch brush aluminum conductor before installation.  
▲ See tooling section of this catalog for complete tool and die listings.  
\*\* For MY29-3 use aluminum index plate at 1/0 setting for sizes #6 through 1/0 or at 4/0 setting for sizes 2/0 through 4/0.  
+ Not UL Listed with these tools.

\* Use PUADP-1 adaptor with U dies in Y46 HYPRESS™.  
■ Also accommodates compressed and compact conductors (except for 700 kcmil in 750 kcmil barrel).  
+ Tested with Y644HSXT and PAT644XT-18V dieless tools only and not UL Listed with any tool on 900 Compact AL.

\*\*\*Does not come with a cover. Not UL Listed.  
♦ For applications greater than 2000 Volts consult cable manufacturer for voltage stress relief instructions.  
Note: All dimensions shown are for reference only.  
▼ For copper equivalent wire size see page O-11 (Aluminum 1350 Cable).  
Note: CSA certified for AL Conductor only.

### TYPE YS-A

HYLINK™

C-208

### UNINSULATED ALUMINUM COMPRESSION SPLICE

UL Listed 90° C, Up to 35 kV ♦

Type YS-A is a high-conductivity aluminum tin-plated compression butt splice for use on all combinations of aluminum to aluminum, aluminum to copper, and copper to copper conductor combinations.

They are designed to accommodate conductors from #12 str. through 1,000 kcmil in standard and heavy duty applications. Prefilled with PENETROX™ oxide inhibiting compounds and assembled with color-coded end caps, the connectors provide a permanent trouble-free electrical splice with flexibility and low installed cost.

#### Features & Benefits

- Aluminum splices are dual rated to accommodate both copper and aluminum wire and are indicated with AL-CU on the connector
  - AL9CU indicates the terminal can accommodate aluminum and copper wire and is UL Listed 90°C, up to 35kV
  - AL7CU indicates the terminal can accommodate aluminum and copper wire and is UL Listed 75°C, up to 35kV
- Barrel is designed with an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked with wire size, die index, color code, and crimp locations bands
- Factory pre-filled with PENETROX™ A13 oxide inhibitor
- Color coded end caps are factory inserted in the barrels to match the die color code; prevent foreign materials from entering the barrel
- Aluminum oxidation is not easily detected but causes resistance in a connection so it is imperative that the proper preparation takes place prior to making an aluminum-to-aluminum connection

### TYPE YS-AT

### HIGH VOLTAGE UNINSULATED ALUMINUM COMPRESSION SPLICE

C-210

Type YS-AT is a high-conductivity aluminum electro-tin plated compression butt splice with tapered ends for high voltage applications up to 35 kV.

The YS-AT provides the same benefits as the YS-A with the addition of tapered ends for easy installation of high voltage insulating kits. Tapered ends aid in preventing corona emission and insulation breakdown. Recommended for high voltage splice applications.

#### Features & Benefits

- Aluminum splices are dual rated to accommodate both copper and aluminum wire and are indicated with AL-CU on the connector
  - AL9CU indicates the terminal can accommodate aluminum and copper wire and is UL Listed 90°C, up to 35kV
  - AL7CU indicates the terminal can accommodate aluminum and copper wire and is UL Listed 75°C, up to 35kV
- Barrel is designed with a taper on both ends for applications through 35kV; permits easy taping and aids in preventing corona emissions and insulation breakdown
- Barrel also features an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked with crimp band locations
- Factory pre-filled with PENETROX™ A13 oxide inhibitor
- End caps are factory inserted in the barrels to match the die color code; prevent foreign materials from entering the barrel
- Aluminum oxidation is not easily detected but causes resistance in a connection so it is imperative that the proper preparation takes place prior to making an aluminum-to-aluminum connection

TYPE YRB

HYREDUCER™

FOR ALUMINUM TO COPPER AND ALUMINUM TO ALUMINUM

UL Listed 90° C, Up to 35 kV ♦

HYREDUCER™ type YRB reducer butt splice is designed to splice two different conductor sizes and is UL Listed for aluminum to copper and aluminum to aluminum applications. The outside diameter is held constant to minimize installation dies and is factory prefilled with PENETROX™.

Features & Benefits

- Aluminum splice reducers are dual rated to accommodate both copper and aluminum wire and are indicated with AL-CU on the connector
  - AL9CU indicates the terminal can accommodate aluminum and copper wire and is UL Listed 90°C, up to 35kV
  - AL7CU indicates the terminal can accommodate aluminum and copper wire and is UL Listed 75°C, up to 35kV
- Barrel features an internal chamfer at the wire entry to ensure smooth insertion of the wire, preventing possible damaging of the wire strands during insertion
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked with crimp band locations
- Factory pre-filled with PENETROX™ A13 oxide inhibitor
- Color-coded end caps are factory inserted in the barrels to match the die color code; prevent foreign materials from entering the barrel

C-211

- The barrels are designed to accommodate larger run conductor and smaller tap conductor so the inside diameters on each end of the barrel are different
- Aluminum oxidation is not easily detected but causes resistance in a connection so it is imperative that the proper preparation takes place prior to making an aluminum-to-aluminum connection

## TYPES YFD, YFN, YFO AND YFR

### H-CRIMPIT™

C-212

## UNINSULATED ALUMINUM COMPRESSION TAP CONNECTOR

### FOR ALUMINUM TO COPPER AND ALUMINUM TO ALUMINUM

UL Listed 90° C, Up to 35 kV ♦

H-CRIMPIT™ compression tap connectors Types YFD, YFN, YFO and YFR are for use with aluminum to aluminum and aluminum to copper connections.

The H-CRIMPIT™ is ideal for making both parallel and tap compression connections in risers and gutters. It should only be installed with hydraulic tools.

### Features & Benefits

- Aluminum splice reducers are dual rated to accommodate both copper and aluminum wire and are indicated with AL-CU on the connector
  - AL9CU indicates the terminal can accommodate aluminum and copper wire and is UL Listed 90°C, up to 35kV
  - AL7CU indicates the terminal can accommodate aluminum and copper wire and is UL Listed 75°C, up to 35kV
- Each connector is factory sealed in polyethylene to ensure connector is delivered free of foreign materials prior to being used
- Post crimp, the connector is easy to tape or to install an insulating CRIMPIT™ cover (see Type CFA-FR) thereby lowering installation cost
- Connectors are clearly marked
- Factory pre-filled with PENETROX™ A13 oxide inhibitor
- Aluminum oxidation is not easily detected but causes resistance in a connection so it is imperative that the proper preparation takes place prior to making an aluminum-to-aluminum connection

▲ See tooling section of this catalog for complete tool and die listings.  
 † Do not use U-YFN die set with P-UADP-1 adaptor in Y46 HYPRESS™. Use P-YFN only.

♦ For applications greater than 2000 Volts consult cable manufacturer for voltage stress relief instructions.  
 \* CSA Listed.  
 Note: All dimensions shown are for reference only.

Notes:  
 1 Material: Aluminum.  
 ② For Conductor combinations of AL to AL or AL to CU.  
 ③ Catalog Number PUADP-1 Adaptor is required to use U type dies in Y46 tools.  
 ④ Other conductors not listed in table can be accommodated as long as the conductor diameter falls within diameter range specified.

T CONNECTOR

TYPE NYT  
CABLE RUN — CABLE TAP

UL Listed 90° C, Up to 35 kV ♦

A T connector designed to provide a clamp type element on the run and a permanent HYPRESS™ connection on the tap. Recommended for use on ring buses or for applications where occasional disconnects from the run conductor are desired without disturbing the tap connection. Tin plated. For proper installation of tap cable, see table below.

C-213

Features & Benefits

- Run and tap connector manufactured with a copper cast mechanical clamp for the run conductor and a brazed copper compression barrel to accommodate the tap conductor
- This type of T-connector is used in applications when the tap connection needs to be disconnected from the run
- Accommodates a wide range of run / tap combinations
- Electro-tin plated unless otherwise specified to reduce galvanic corrosion (bimetallic) and resist corrosive elements
- Connectors are clearly marked

### TYPE YAEBA-S

#### Straight Style Battery Post HYDENT™ Terminals

C-214

#6 - 4/0 AWG Solid and Stranded Copper

BURNDY post terminals are made from pure copper alloy and are tin plated to prevent corrosion. They adhere to SAE, JIS and DIN stud standards. Typical applications are automotive, marine, transportation, petrochemical, and OEM markets.

#### Features & Benefits

##### Barrel

- Color coded for easy identification
- Chamfered end
- Made of copper alloy, tin plated for corrosion resistance and RoHS compliance
- Comes standard with stainless steel hardware installed

##### Post

- Clamp color coded by polarity; red is positive; black is negative
- Not UL Listed but tested and met UL486A-486B pullout requirements

TYPE YAEBA-F

T Style Battery Post HYDENT™ Terminals

#2 - 4/0 AWG Solid and Stranded Copper

BURNDY post terminals are made from pure copper alloy and are tin plated to prevent corrosion. They adhere to SAE, JIS and DIN stud standards. Typical applications are automotive, marine, transportation, petrochemical, and OEM markets.

C-215

Features & Benefits

Barrel

- Color coded for easy identification
- Chamfered end
- Made of copper alloy, tin plated for corrosion resistance and RoHS compliance
- Comes standard with stainless steel hardware installed

Post

- Clamp color coded by polarity; red is positive; black is negative
- Not UL Listed but tested and met UL486A-486B pullout requirements

**TYPE YCP-L**

**Compression Cable Pulling Heads**

Before using this product, it is required to read, understand, and comply with the Safety Operation Maintenance & Installation manual provided with the product.

C-217

**Features & Benefits**

- Range-taking; only 6 compression pulling heads are required to pull #1 AWG through 1000 kcmil wire
- Accommodates:
  - Copper Class B (Concentric, Compressed, Compact) or Class C wire
  - Aluminum Class B (Concentric, Compressed, Compact)
- Easy to install with the 644 Series of dieless installation tools (PAT644 or Y644)
- Parallel installation; each of the 6 compression pulling heads come in 5 unique lanyard lengths for staggering when pulling multiple wire
- Knurl crimp bands clearly indicate the crimp zone locations on the compression pulling head barrels

## HARDWARE DATA

### RECOMMENDED TIGHTENING TORQUE

The hardware used in connectors must be compatible with the connector material, have high mechanical strength and be corrosion resistant and correspond to NEMA recommendations.

Copper alloy connectors have hardware made of DURIMUM™, which is BURNDY's trade name for silicon bronze alloy ASTMB99 type B. This material was first introduced by BURNDY® in 1927 for use in outdoor construction, and today, is the standard throughout the industry.

DURIMUM™ and Steel Hardware		Aluminum Hardware	
Bolt Size	Rec. Torque (Inch Pounds)	Bolt Size	Rec. Torque (Inch Pounds)
1/4 - 20	80	1/2 - 13	300
5/16 - 18	180	5/8 - 11	480
3/8 - 16	240	3/4 - 10	650
1/2 - 13	480		
5/8 - 11	660		
3/4 - 10	1,050		

Aluminum connectors generally have aluminum alloy hardware. The bolts are 2024T4 and anodized to resist corrosion. The nuts are 6061T6, which is resistant to corrosion and does not require anodizing. Both nuts and bolts are lubricated to eliminate galling and to provide consistent

clamping forces.

To reduce or greatly exceed the recommended torque can adversely affect the performance of the connector.

D-2

## DURIMUM™ BOLT

### SILICON BRONZE

BURNDY® introduced silicon-bronze bolts, nuts and other hardware items on outdoor connector applications in 1927. Today the DURIMUM™ trademark is a standard for this use. DURIMUM™ bolts combine high strength with corrosion resistance. Heads have American Standard

dimension and the threads are per American National Coarse Series, Class #2 fit. The silicon

bronze is per ASTM B99.

**STAINLESS STEEL  
HARDWARE**

**BELLEVILLE WASHERS**

Any bolted “pad to flat” electrical connection should include a bolt, two flatwashers, and the nut. In addition, if any of the flat components is aluminum, a properly designed Belleville washer should be interposed between one of the flatwashers and either the bolt head or the nut, with the hollow of the Belleville washer placed against the flat washer. BURNDY® Belleville washers are designed to maintain substantial force when tightened to NEMA-recommended values and finely finished to avoid galling.

TYPE TMH

DURIUM™ SILICON BRONZE HARDWARE KITS

D-8

Type TMH are DURIUM™ silicon bronze hardware kits. The kits can be ordered for specific applications ensuring the proper type and amount of hardware for each installation. Packaged in separate sealed bags, they are convenient to use, eliminating mismatched quantities. DURIUM™ silicon bronze material provides long lasting corrosion resistance Grade 2.

Catalog Number	Size	Each TMH Kit Includes:					Working Range (R)	Installation Torque (In-lbs)
		Bolt		Flat Washer	Split Washer	Hex Nut		
		Length	Qty					
TMH262	1/4-20	0.75	2	4	2	2	0.09 - 0.34	80
TMH263		1.00	2	4	2	2	0.34 - 0.59

TYPE UB

DURIUM™  
SILICON BRONZE U-BOLTS

DURIUM™ U-BOLTS are specifically designed for electrical connections to pipe and rod. The U-BOLTS are threaded on the straight portion of the legs only allowing for more contact surface on the pipe or rod. American National Coarse Threads Class #2 fit. The silicon bronze is per ASTM B99.

E-1

**Lightning Protection Information**

Basic rules for selection are:

1. Must be like material to the conductor.
2. Two bolts to ground rod—minimum, for mechanical.
3. Cable to cable connections can be installed with one bolt, two bolt, or compression means.
4. Cable to steel structure must have 8 in.<sup>2</sup> contact with steel.
5. Heavy duty stacks—mechanical only.
6. On all connectors with heavy duty stack rating, we must offer 1/16" thick lead plating as an option.  
The reason is closest 25 ft. to stack opening must use lead coated product.
7. UL 96 Listing.

**THE HYGROUND® IRREVERSIBLE COMPRESSION SYSTEM**

BURNDY® has developed an irreversible compression ground system which meets the most stringent safety and performance requirements, including those of OSHA and nuclear power plant design. Performance excellence and long life expectancy are the system's basic design guidelines. It is a complete system which consists of connectors for grid cross connections, taps, splices, cable to ground rod, ground plates and terminations.

Our irreversible compression ground connectors employ well-proven design principles and technology that have been in existence for over 60 years.

Connectors are just one component of our Irreversible Compression Ground System. Installation tooling is also an integral part of this system. BURNDY® pioneered the compression connector principle and continues today to be the leader in compression technology. Our tooling package is the most extensive in the industry and affords the user many options.

See Legend on Page E-7

## THE HYGROUND® IRREVERSIBLE COMPRESSION SYSTEM

(Continued)

### Features and Benefits

E-10

- Irreversible compression.
  - ◇ Meets NEC code, section 250.
- Material-pure wrought copper extrusions, rod and seamless tubing—identical material to the conductor.
  - ◇ Completely eliminates the possibility of galvanic corrosion due to dissimilar metals.
- Heavy duty connector design.
  - ◇ All connectors will carry the equivalent or greater current carrying capacity of the conductor while maintaining high mechanical strength and electrical integrity.
- Range taking design—minimum number of connector combinations required to install a conductor range of #6 solid to 500 kcmil plus 1/2", 5/8", 3/4", and 1" ground rods and rebar.
  - ◇ Inventories are kept to a minimum and product selection is simplified.
- System engineered tooling.
  - ◇ Each tooling recommendation has been designed to ensure reliability of the connection.
- Irreversible compression connectors can be installed in all kinds of weather.
  - ◇ Eliminates costly construction delays and enables the installer to better schedule his job.
- May be installed without special training or special tools. Y750 crimps entire range.
  - ◇ Low installed cost.
  - ◇ Simplified installation.

- Each connection can be made in less than 3 minutes.
  - ◇ Low installed cost.
  - ◇ Simplified installation.
- Each connector is clearly marked with catalog number, conductor size and installation die information.
  - ◇ Easy and accurate identification.
- Inspection ports are provided to assure proper insertion of the conductor.
  - ◇ Built-in quality assurance.
- The die index number is embossed on the connector after completion of the crimp.
  - ◇ Facilitates speedy inspection of installed connectors to insure consistently reliable and sound connections.
- Most HYGROUND® irreversible compression elements are prefilled with PENETROX™ and individually sealed.
  - ◇ Ensures that all contact surfaces are in the proper condition for installation.
  - ◇ Ensures the electrical integrity of the finished connection by inhibiting moisture and contaminates from entering the contact area.
- All HYGROUND® irreversible compression connectors are Listed in conformance with Underwriters Laboratories Standard UL467 and conform to applicable sections of the National Electrical Code.
  - ◇ May be used in direct burial or concrete embedded grounding applications.
- All HYGROUND® irreversible connectors (with the exception of type YGA and YGS) have been tested successfully according to requirements of Standard IEEE 837.
  - ◇ Meets tough industry performance requirements.
  - ◇ UPRECRIMP dies give added mechanical strength. UPRECRIMP 34 for 3/4" rod, UPRECRIMP 12 for 1/2" rod, and UPRECRIMP 58 for 5/8" rod (now includes undersized U.S. marketplace rods).
- Allows connection to most sizes of structural steel with no drilling, tapping, or welding.
  - ◇ Safely installed at low cost. Hot work permits are not required to install in hazardous areas

Please contact Customer Service for applications requiring IEEE-837 2014.

TYPE YGL-C

HYGRID™ CROSS CONNECTOR

An irreversible compression ground grid cross connector which allows adjustment of the compression elements prior to installation. Only six connectors and four dies are required to install all combinations from #6 solid through 500 kcmil. UL467 Listed. Acceptable for direct burial in earth and concrete. Prefilled with PENETROX™ compound and strip sealed.

For increased rotational resistance on ground rods, pre-crimp ground rod with U2CABT, UPRECRIMP dies may be used for even greater rotation and vibration resistance on ground rods.

## TYPE YGHP-C

### HYTAP™ CONNECTOR

High Strength Copper Irreversible  
Compression Ground Rod Tap  
Connector

### Features & Benefits

- Tap (A) accepts a continuous run on tap conductor. Tap (B) accepts a tap conductor only
  - ◊ One connector style can be used for many applications, reducing number of connectors in inventory
- Material is high conductivity wrought copper extrusion, identical material to the conductor
  - ◊ High-conductivity copper minimizes resistance and voltage drop. Eliminates the possibility of corrosion due to dissimilar metals
- System engineered tooling
  - ◊ The tooling recommendation has been designed to ensure a reliable, dependable connection every time
- The die index number is embossed on conductor after completion of crimp
  - ◊ Facilitates speedy inspection of installed connectors to insure consistently reliable and dependable connections

- Prefilled with PENETROX™ E and individually sealed in clear polyethylene sheet
  - ◊ Ensures the electrical integrity of the finished connection by inhibiting moisture and contaminants from entering the contact area. Maintains long-term high-conductivity
- UL467 Listed
  - ◊ May be used in direct burial or concrete embedded grounding applications. Provides quality assurance to recognized industry NEC standards from an independent party
- "Third Hand" constrains conductors while installer completes crimp, included with each connector
  - ◊ Simplifies installation, reducing installed cost

E-14

Type YGHP-C irreversible compression ground tap figure 6 can be used as a ground rod tap connector for both continuous run and tapping applications. An open groove allows ground rod to be connected to a continuous run or tap. The second groove is for a tap only. Prefilled with PENETROX™ E and strip sealed. UL467 Listed for direct burial in earth or concrete. \*For applications requiring IEEE-837 2014, please contact Customer Service.

① Dimensions in brackets { } represent lightning protection conductors

② For ground rod to wire applications, ground rod must be precrimped; see table for appropriate precrimp dies

③ Where a "U" or "PU" die is recommended with the Y45 HYPRESS™, a PT6515 adapter must be used

④ Where a "U" or "PU" die is recommended with the Y46 HYPRESS™, a PUADP-1 adapter must be used

⑤ Ground rod to copper cable is UL467 Listed for direct burial in earth and concrete

⑥ These connectors cannot be installed with the Y35 or Y39 HYPRESS™

NOTES:

Listed under UL486A for copper wire connectors

For connectors without PENETROX™ oxide inhibitor, add suffix "NP" to the end of the catalog number (example: YGHC2C2-NP)

\*Please contact Customer Service for applications requiring IEEE-837 2014.

## TYPE YGHHC-C

### HYTAP™ CONNECTOR

Irreversible compression ground tap figure “C” connectors. Accommodates all cable combinations from #6 solid through 500 kcmil. “C”- shaped opening permits placing two continuous parallel cables into conductor groove. The YGHHC-C series is qualified to IEEE-837 2014. Prefilled with PENETROX™ compound and strip sealed.

## TYPE YSHG

### High Strength Irreversible Compression Double H-Tap Connector

Type YSHG Double H-Tap grounding series is comprised of five connectors designed to accommodate wire range sizes #14 through 500 kcmil, including ground rod sizes: 3/4", 1", and rebar sizes: #6, #7, #8 and #9. Prefilled with PENETROX™ E2 and strip sealed.

E-18

### Features & Benefits

- UL467 Listed
  - ◇ Suitable for direct burial in earth or concrete.
- Material is high conductivity copper extrusion
  - ◇ Minimizes resistance, eliminates corrosion due to dissimilar metals.
- Grooves are prefilled with PENETROX™ E2 oxide inhibitor and individually sealed
  - ◇ Inhibits moisture and contaminants ensuring electrical integrity.

- ① Ground rod must be pre-crimped with die U2CABT (index 348) when the PU998 dies are used in the Y750, PAT750, Y35, Y39, Y45, Y46 and PAT46 tools; pre-crimping is not required when the P1011, S1011, S1012 or U1011 dies are used; UPRECRIMP dies may be used for additional mechanical resistance on ground rods.
- ② Where a PU998 die is recommended with the Y45 HYPRESS™, a PT6515 adapter must be used.
- ③ Where a PU998 die is recommended with the Y46 HYPRESS™, a PUADP-1 adapter must be used.
- ④ These connectors cannot be installed with the Y35 or Y39 HYPRESS™.

**NOTES:**  
The catalog numbers shown are for unplated copper connectors for use on copper clad or stainless steel ground rod. To order electro-tin plated connectors for use on galvanized steel ground rod add suffix "-TN" to the catalog number. The ground rod hole diameter is larger for galvanized steel ground rod in the tin plated connector.

Complete die catalog numbers do not always appear on the connector, sometimes it is the die index.

\*Please contact Customer Service for applications requiring IEEE-837 2014.

## TYPE YGHR-C

### HYTAIL™

### High Strength Irreversible Compression Ground Rod Tap Connectors

### Features & Benefits

Type YGHR-C irreversible compression grounding connector is engineered specifically for the Telecommunications Industry for (1, 2 or 3) #2 solid, tinned or bare conductor taps. UL467 Listed. Acceptable for direct burial in earth or concrete. BURNDY® has designed this connector to meet the stringent requirements of OSHA, the National Electric Code (NEC), UL, and the Telecommunications Industry. Performance and long life are this connector's basic design guidelines.

- Tap side 1, 2 or 3 conductors
  - ◇ One connector style can be used for many applications.
- Material is high conductivity wrought copper extrusion, identical material to the conductor
  - ◇ High-conductivity copper minimizes resistance and voltage drop. Eliminates the possibility of corrosion due to dissimilar metals.
- System engineered tooling
  - ◇ Each tooling recommendation has been designed to provide a reliable, dependable connection.
- The die index number is embossed on connector after completion of crimp

- ◇ Facilitates speedy inspection of installed connectors to ensure consistently reliable and dependable connections.
- Prefilled with PENETROX™ and individually sealed in clear polyethylene sheet
  - ◇ Ensures the electrical integrity of the finished connection by inhibiting moisture and contaminants from entering the contact area. Maintains long-term high-conductivity.
- UL 467 Listed. Acceptable for direct burial
  - ◇ May be used in direct burial or concrete embedded grounding applications. Provides quality assurance to recognized industry NEC standards from an independent party.

E-20

Catalog Number ⑤	Ground Rod Diameter ①	Tap Conductor ⑦	Installation Tools, Die Set Catalog Number (# of Crimps)		Die Index
			PAT750/Y750 ③ Y35 ④/Y39	Y46 ②	
YGHR58C2W-3	5/8"	#2 Sol Copper 1, 2, or 3 may be connected	PU998 (1) ⑥ U1011 (2)	PU998 (1) ⑥ U1011 (2) P998 (1) P1011 (2)	998/1011

① Contact BURNDY® for other ground rod diameters  
 ② PU998 and U1011 die sets require PUADP-1 adapter for use in the Y46 HYPRESS™  
 ③ The PAT750 and Y750 utilize PU dies and the U1011 die  
 ④ The Y35 only uses PU998 die  
 ⑤ To order electro-tin plated connector for use on galvanized steel ground rod add suffix "-TN" to the catalog number; The ground rod hole diameter is larger for galvanized steel ground rod in the tin plated connector

⑥ Ground rod must be precrimped with die U2CABT (Index 348) when PU998 die set is used in the Y35, Y750 or Y46 HYPRESS™ tools; for even greater mechanical resistance use UPRECRIMP58 dies

⑦ Tap positions may be left void when fewer than (3) conductors are used

TYPE YGHA

HYLUG™

Heavy Duty Irreversible Compression  
Terminals

Heavy duty HYLUG™ irreversible compression terminals designed not only to carry short circuit load, but to also withstand high mechanical stress. Each conductor element has an inspection probe hole to ensure proper cable insertion. UL467 Listed. Acceptable for direct burial in earth or concrete. UL486A Listed. Prefilled with PENETROX™ compound and strip sealed.

**TYPE GROUND TAB**

For any metal structure requiring grounding

The BURNDY® GROUND TAB offers a convenient attachment point for terminations of ground wires to steel structures or steel supports. The tabs are easily welded to steel, with two mounting pattern options available. The tabs are made of steel, 1/4" thick, and can be used to attach 1-hole or 2-hole terminals. Compression terminals, mechanical terminals, or SERVIT® Posts can be used to attach ground wires to steel tabs. All connection options and necessary hardware are sold separately. Often used when traditional connection methods are not practical, or when temporary grounds are required. Common applications include large generators, mobile construction site modules, housing structures built in permafrost areas, and in any metal structure requiring a permanent or temporary ground option.

**Features & Benefits**

- Convenient
- Can be used to attach 1-hole or 2-hole terminals
- 1/4" thick steel
- Easily welds to steel
- Many connection options
- Used when traditional options are not practical

# Grounding HYGROUND® Compression

BURNDY®

## TYPE YGHS

### HYLINK™

#### Heavy Duty Irreversible Compression Splices

Heavy duty HYLINK™ ground splice designed not only to carry short circuit load, but to also withstand high mechanical stress. Each conductor element has an inspection probe hole and a center stop to ensure proper cable insertion. UL467 Listed. Acceptable for direct burial in earth or concrete. UL486A Listed. Prefilled with PENETROX™ compound and strip sealed.

## TYPE YGF

### GROUNDING PLATE

The irreversible compression ground plate is designed to withstand the rigors of concrete construction. The ground plates are made of high strength, high-conductivity cast copper alloy body with a pure wrought copper compression element. In addition to the tapped NEMA size holes and spacing on the face, the plate comes with a tapped hole on the underside for ease of positioning prior to pouring the concrete. UL467 Listed. Acceptable for direct burial in earth or concrete. Prefilled with PENETROX™ compound and strip sealed.

E-26

IEEE-837\*

Fig. 1

Fig. 2

**NOTES:**

- ① This tapped hole may be used to position the grounding plate on a threaded rod prior to placement of the concrete. 3/8-16 thread with 1.00 EFF. Thread is standard. If other thread is required, add appropriate suffix code to catalog number. -50 (1/2-13, .94 EFF. Thread), -62 (5/8-11, .94 EFF. Thread) and -75 (3/4-10, .81 EFF. Thread) Example: YGF34-4N-50 is YGF34-4N with 1/2-13 Thread
- ② Plastic plugs are provided to keep dirt out of the threaded holes until the attachment of grounding terminals

① Where a "U" or "PU" die is recommended with the Y45 HYPRESS™, a PT6515 adapter must be used  
 ② Where a "U" or "PU" die is recommended with the Y46 HYPRESS™, a PUADP-1 adapter must be used  
 ③ These connectors can only be installed using the Y750, Y45 or Y46 HYPRESS™ with recommended dies, they cannot be installed with the Y35 or Y39 HYPRESS™

\*Please contact Customer Service for applications requiring IEEE-837 2014.

**TYPE YGIB**

**GROUNDLINK™**

An irreversible compression ground connection which allows attachment to a structural steel standard (angled) or wide flange (parallel) beam. Installed with a required 5-piece die set, Catalog PIPEAMKIT or UIBEAMKIT. Die index 1105. GROUNDLINK™ connectors are made of high-conductivity wrought copper and come pre-filled with PENETROX™ E compound and strip sealed. Order terminal mounting hardware separately.

**IEEE-837\***

Connector shipped with thread protection studs only. Order TMHG kits separately.

E-27

**NOTES:**

Terminal connector to be ordered separately. When I-beam connector is used with type YGHA terminal, the connection meets IEEE 837. YGA-2N, YA-2N and other BURNDY® 2-hole NEMA copper terminals are suitable.

Order TMHG Terminal Mounting Hardware Kit separately. Kit consists of 2 studs, 2 flat washers, 2 lockwashers and 2 hex nuts.

Using the 1/4 hex key wrench, screw the stud into the connector until stud bottoms out in connector. Install a YGHA terminal, flat washer, lockwasher and hex nut onto stud. Tighten and torque to 480 pound-inches.

Dimensions shown in i-Beam Flange Thickness column reflect the minimum dimensions required on a beam to properly install the i-Beam connector.

To correctly determine the appropriate YGIB connector to use based on flange thickness, order either YGIBGAUGE1 or YGIBKIT1 (KIT1 contains wiremike).

**TYPE GSTUD-HY**

**VERSITAIL™**

Structural Steel Grounding Connector

**INSTALLATION**

1. Weld the VERSITAIL™ to the steel member.
2. Select the proper connector for your specific application.

**FOR COMPRESSION CONNECTORS**

Select the proper BURNDY® “YGHP,” connector. Clean the conductor, join the VERSITAIL™ and the grounding conductor together with the recommended tool and die set, then crimp the connector over the knurled area of the VERSITAIL™.

**FOR MECHANICAL CONNECTORS**

Select the properly sized BURNDY® connector. Clean the conductor, then apply PENETROX™ E oxide inhibiting compound on the contact area for increased effectiveness and service life. Put the connector over the knurled area of the VERSITAIL™ and apply the recommended torque value for correct installation.

**Features & Benefits**

- The VERSITAIL™ may be welded to steel surfaces quickly and easily with normal construction equipment.
- The VERSITAIL™ eliminates costly disk grinding and the need to expose virgin metal, the welding process burns through the oxidation and “scale” to establish excellent electrical grounding continuity.
- The VERSITAIL™ may be installed by the welder in the field or at the steel fabricator based on customer preference.
- The VERSITAIL™ pure copper coating over low carbon, hot rolled steel is compatible with standard welding processes, no toxic gasses are generated.
- The VERSITAIL™ knurled surface is copper plated and specifically designed to ensure excellent mechanical gripping and electrical integrity for BURNDY® compression and mechanical connectors in all grounding applications.
- The VERSITAIL™ may be installed during adverse weather conditions thus eliminating costly construction delays.
- Low installation cost.
- No drilling
- No cleaning
- No special preparation
- Low Carbon, hot rolled steel

E-29

\* This is the equivalent rating for continuous service. Large conductors may be connected using both compression and bolted connectors in potential ground fault applications.

## TYPES YGT & YTTAG

### Static Grounding Receptacle

Type YGT static grounding receptacles are designed for static grounding of equipment. The receptacle is connected to the ground grid with HYGROUND® compression connectors and finished flush with surface to provide a permanent corrosion proof grounding point.

E-30

**NOTES:**

Install YGHR, YGHP or YGLR on Hub Y. Hub Z is inserted into 1/2" rigid conduit. The conduit is driven into the earth to provide support and provide correct level of receptacle prior to cement pour.

**TYPE YG-B**

Connector for Structural Steel  
or Bus Bar

The BURNDY® YG-B series of compression connectors are ideally suited for bus bar, cell tower structures, structural steel, and steel infrastructure such as equipment supports, steel railings and ladders.

These high conductivity copper connectors allow attachment of a ground conductor to structural steel, rail or bus bar, with just one crimp using a BURNDY® 750-style HYPRESS™ head. The exclusive design allows the user to attach tap conductor(s) to 1/8" to 9/16" thick rail, bus bar, or flat steel.

Most connectors are suitable for 1 or 2 conductors for power or grounding and bonding applications. Prefilled with PENETROX™ compound with the addition of a grit material and strip sealed.

For Tin Plating add the -TP suffix.

- ① UL Listed, CSA Certified, Rated for Direct Burial; can accept 1 or 2 conductors
- ② U-shaped tap groove can only be used with #2 Solid wire; can accept 1 or 2 conductors; suitable for continuous uncut conductor applications
- ③ cULus listed, Rated for Direct Burial; can accept only 1 conductor
- ④ cULus listed, Rated for Direct Burial; can accept only 1 conductor; PAT750K style tool only may be used for installation

## MECHANICAL GROUNDING CONNECTORS

More than 60 years of technological innovation has made BURNDY® mechanical grounding connectors one of the most widely used, highly respected lines in the industry. There is virtually no grounding application problem that this diversified line cannot help solve.

All BURNDY mechanical grounding connectors have been designed for easy installation and for outstanding durability. Only the finest high copper alloys are used in their manufacture, ensuring top performance under the most extreme environmental conditions.

UL467 Listed for direct burial applications in earth or concrete.

Add \*-NSP\* suffix to catalog numbers to have connector supplied with split lockwasher and nut.

TYPE SB

HandyBug™ Connector

Tap, Splice or Terminate

The HandyBug™ connector is an “all-in-one” electrical connector that can be used for dozens of different power or grounding connection applications. This new connector is the “survival tool” of electrical connections and can be used as a splice, tap, terminal, wire to pipe, wire to busbar, and many other options. The HandyBug™ incorporates the features and benefits of dozens of different products. Available in two sizes, these connectors accommodate from #8 AWG Solid to 1/0 AWG Stranded.

Ideal for emergency repairs, maintenance crews and technicians, and an essential part of every electrician’s basic supplies. cULus Listed. Acceptable for direct burial in earth and concrete.

Features & Benefits

- Power or Grounding and Bonding Applications
- Can be used to terminate wires to bus bars or steel
- Can be used for splicing and tap connections
- No special tooling required
- UL Listed for the US and Canadian markets (cULus: UL467 & UL486A/B)
- Rated for Direct Burial
- Tin plated
- Industry standard mounting hole configurations

## TYPE KCKF

### Bulkhead Ground Connector

The "Bulkhead" connector is designed to allow a ground wire to be connected from the inside of a box or enclosure to the outside of a box or enclosure.

This new connector is supplied in kit form with a male SERVIT POST™, female SERVIT®, (2) stainless steel washers, split lock washer and sealing washer.

E-34

The available "Application Guideline" document helps describe the application with visuals and installation examples.

### Features & Benefits

- Provides an easy way to connect ground wires "through" an enclosure wall
- Includes Male SERVIT POST™, Female SERVIT®, (2) Stainless Steel Washers, Split Lock Washer, Sealing Washer
- Split Lock Washer allows adjustment of conductor orientation
- Made of Silicon Bronze material (connectors) and Stainless Steel Hardware, Sealing Washer
- Meets NEMA 4X requirements when installed correctly
- Application Guideline document available
- Industry proven split bolt/SERVIT POST™ technology

	Qty	Description
	1	Male Servit Post
	1	Stainless Steel Split Lock Washer*
	2	Stainless Steel Flat Washer*
	1	Sealing Washer*
	1	Female SERVIT®

\*One flat washer and sealing washer to be installed on outside of box or, where applicable, to side of wall exposed to atmospheric or contaminated conditions. Remaining hardware to be mounted to opposite side of the wall as shown.

## TYPE FFG

### Fence Fabric Ground Clamps

Fence grounding systems are designed to provide protection against dangerous “touch” potentials. The Fence Fabric Ground Clamp is an integral component of this personnel safety system.

With its unique design the clamp can form a connection at virtually any angle. Specific uses include connection to both fence fabric and barbed wire. The conductor maintains a path to ground while connected to an object that is parallel, perpendicular or any degree in between.

Tin plated copper clamp includes stainless steel hardware and allows for use on most metallic surfaces including galvanized steel. Other sizes available; please contact factory for information.

Listed to UL 467

### Features & Benefits

- Clamp can form connections at virtually any angle
- Tin plated copper clamp includes stainless steel hardware
- For use with most metallic surfaces including galvanized steel
- Conductor maintains path to ground while connected to object that is parallel, perpendicular or any degree in between

\* GKA8C, GKA4C are cULus Listed.

**TYPE KPB**

For Copper

UL467 Listed for direct burial in earth or concrete. UL486 listed. This exclusive BURNDY® design accommodates #10 - #4 copper where continuous conductor runs are preferable.

Catalog Number	Copper Cable Range	Stud Hole
KPB4CG1①	10 AWG-4 AWG	#10

①Can be assembled with optional TMH322SS stainless steel hardware kit, ordered separately.

## TYPES CL50-1 & CL50-1TN

### COPPER LAY-IN QIKLUG™

For Copper

The Lay-In QIKLUG™ is manufactured from high strength pure electrolytic copper to ensure maximum strength and conductivity. UL467 Listed for direct burial in earth or concrete. The open-faced design allows for fast lay-in of the conductor without the need for cutting or breaking. Stainless steel screws used for excellent corrosion resistance.

E-38

Catalog Number	Conductor Range	Stud Hole	Recommended Torque by Wire Size

\* CL501-TN & CL50-1TNBULK Listed to both UL2703 for Solar Applications and UL467 for direct burial.

Photo above shows a typical solar panel installation using CL50-1TN connectors.

## TYPE CL

### COPPER LAY-IN QIKLUG™

FOR COPPER

Manufactured for maximum strength and conductivity, these lay-in lugs allow for continuous runs of conductor and are well suited as terminations as well. Tin-plated, set screw style connectors, three sizes cover a range from #14 AWG to 250 kcmil.

CL3/0-516TN and CL250-516TN are UL 486A-B Wire Connectors and CSA Certified. CL1/0-14TN UL Listed for grounding and CSA Certified. 90° C rated. Suitable for copper conductors only.

**TYPE BGBS**

Aluminum Lay-in lug for solar and other grounding applications

The new aluminum lay-in lugs BGBS series are suitable for solar panel and other grounding applications. The connectors are used with frames or solar panels, with a maximum thickness of 1/4 inch. They are also suitable for cable to bus or cable to steel connections, where the lay-in feature is necessary.

BGBS (BURNDY Grounding and Bonding lugs for Solar and other applications) Lay-in lugs are Listed for grounding and bonding per UL467 and CSA C22.2 No. 41; also for use with Photovoltaic Modules per UL2703 . They can be used with copper and aluminum cables. The connectors are also available in bulk.

**Features & Benefits**

- Made of high strength aluminum alloy
- Electro-Tin plated
- Stainless Steel hardware
- Lay-in feature
- Conductor size Copper:
  - 14 AWG - 6 AWG STR./SOL.
- Conductor size Aluminum:
  - 12 AWG - 6 AWG STR./SOL.
- Cup point screw that penetrates the anodization on rails
- Serrations in conductor wire way cuts through oxidation
- Suitable for applications up to 1/4 inch thick solar panels
- Listed for Grounding and Bonding per UL467 and CSA C22.2 No. 41
- Listed for use with Photovoltaic Modules & Panels per UL2703

## TYPE GAR

For Parallel or 90° Copper Cable Connection to Rod or Pipe with the Same Connector

High copper alloy ground connector for joining a range of cable, parallel or at right angles to rod or tube. Especially good for fence posts. High copper alloy cast body with DURIMUM™ U-bolts, nuts and lockwashers, permit entire connection to be buried in ground or concrete without danger of corrosion.

E-40

### Features & Benefits

- Wire to Rebar
- Fence Post Grounding Connector
- Wire to Pipe
- One-wrench installation
- UL467 Listed
- Acceptable for direct burial

## TYPES GAR-BU AND GAR3902 SERIES

### Ground Connectors

Type GAR-BU is a high-conductivity copper ground connector for connecting a small to medium range copper ground conductor to water pipe as well as structural and reinforcing rod shapes. Universal acceptance of several sizes of cylindrical shapes makes this suitable for industrial construction and maintenance work as well as cathodic protection. Cable clamp swivels to permit parallel grounding of one pipe or 90° degree cable run for grounding several parallel pipes. Single wrench installation. UL467 Listed and CSA Certified.

### Features & Benefits

- Cable clamp swivels at 90°
  - ◊ Permits parallel grounding of one pipe or a 90° cable run for grounding several parallel pipes.
- One-wrench installation
  - ◊ Simplified installation.

- DURIMUM™ silicon bronze hardware (-BU Series)\*
  - ◊ Long lasting corrosion resistance and acceptable for direct burial in earth or concrete.
- UL467 Listed
  - ◊ Provides quality assurance to recognized industry NEC standards from an independent party.

TYPE GAR-TC

Water Pipe  
Ground Connector

Type GAR-TC is a high-conductivity copper ground connector that features a pre-drilled pad, allowing a 2-hole compression terminal to be directly connected to water pipe as well as structural and reinforcing rod shapes. Universal acceptance of several sizes of cylindrical shapes makes this suitable for industrial construction and maintenance work as well as telecommunications grounding. Terminal may be mounted parallel, 45° or 90° degrees to the pipe. Acceptable for direct burial.

PATENTED

Features & Benefits

- Large, smooth connector contact area between pipe and ground clamp
  - ◇ Provides large surface contact area to maximize contact area between connector and pipe.
- The GAR-TC mounting pad permits parallel, 45° or 90° angle connections to the pipe
  - ◇ Provides maximum flexibility for field installation.
- Pre-drilled pad for (2) 3/8" bolts on 1" centers

- ◇ Allows direct mounting of (2) hole compression terminals up to 750 kcmil to pipe.
- DURIMUM™ silicon bronze hardware
  - ◇ Provide long lasting corrosion resistance acceptable for direct burial in earth or concrete.
- One-wrench installation
  - ◇ Simplified installation.
- UL467 Listed
  - ◇ Provides quality assurance to recognized industry NEC standards from an independent party. Type GAR-TC is acceptable for direct burial.

NOTES:

\*\* Refer to Section O for tube dimensions.

① Add suffix "-TNET" for electro-tin plated connector and electro-tin plated

DURIMUM™ silicon bronze hardware. Tin plated catalog number includes mounting hardware for second bolt hole.

② OPTIONAL MOUNTING HARDWARE

TMH-289 includes (1) 38X125HEB bolt, (1) 38CHEN nut, (1) 38SW split washer and (2) 38FW flat washers, ordered separately.

Clean pipe surface beneath saddle until virgin metal is exposed, install GAR-TC ground connector and for maximum conductivity, apply PENETROX™ E oxide inhibiting compound around perimeter of saddle.

E-43

## TYPE GD

Cable to Rod/Tube Ground Connector  
For Two Copper Cables to Rod or  
Tube

High copper alloy ground connector for joining a range of two parallel cables to rod or pipe. Especially good for grounding fence posts. High copper alloy cast body with DURIMUM™ U-bolts, nuts, and lockwashers make the GD suitable for burial in ground or concrete. One-wrench installation. UL467 Listed.

Acceptable for direct burial in earth or concrete.

**NOTE:**

\*\* Refer to Section O for tube dimensions.  
Complies with NFPA 78-86 HEAVY DUTY stacks; use suffix "-LD"  
for lead plating for HEAVY DUTY stack applications

**TYPE GP**

Ground Connector  
For Two Copper Cables to Rod or  
Pipe

High copper alloy ground connector for joining a range of parallel cables perpendicular to rod, pipe or column. Also used with one groove for run, the other for tap to equipment. High copper alloy cast body and DURIMUM™ U-bolts, nuts, and lockwashers make the GP suitable for direct burial in the ground or concrete. One-wrench installation. UL467 Listed. Acceptable for direct burial in earth or concrete.

## TYPE BDT

### BONDIT® INTERSYSTEM BONDING CONNECTOR

House Mounted or  
Meter Socket Mounted

### Features & Benefits

- Made in the USA!
- Meets Intersystem Bonding Requirements; NEC 250.94
- One connector does it all
- House mount or meter socket mount
- Incorporates proven BURNDY® SERVIT POST™ design
- Stainless steel set screws
- Accepts main ground wire (#2-#8), up to 4 intersystem wires (#6-#14)

- Easily mounts to meter box during new installation or can be wall mounted
- Easy to follow instructions included
- Does not damage meter socket; no worries about damaging the paint or voiding warranties
- Easily installed with a wrench and screwdriver
- Open design prevents buildup of hornets, bees, spiders

Designed to meet the requirements of NEC Article 250.94 "Bonding for Other Systems". Corrosion-resistant stainless steel set screws. Accepts main ground wire (#2-#8) and up to 4 intersystem wires (#6-#14). Same design can be mounted directly to the meter socket or mounted to the house. Innovative design does not damage meter socket and will not void warranty.

Catalog Number: **BDT1**

E-48

**CONFIGURATION 1 - MOUNTED TO ENCLOSURE**

1. Punch out a 1/2" or 3/4" knock out on the electrical enclosure.
2. Begin assembly by installing the ground electrode conductor in the SERVIT POST™ inside the electrical enclosure. Torque on SERVIT® NUT: 275 in-lb max.
3. Install the rest of the connector shown below, it is not necessary for the bus bar to be aligned parallel with the enclosure. (Note: the split washer is not used in this configuration.)
4. Tighten the intersystem ground wires with set screws in the bus bar to a maximum torque of 35 in-lb.
5. Adhere the BONDIT® location sticker to the front of the electrical enclosure.

**CONFIGURATION 2 - MOUNTED TO EXTERIOR WALL**

1. Begin by assembling the connector as shown in figure below. Be sure SERVIT POST™ is as tight as it can be while its groove is aligned with the ground electrode conductor. (Note: the flat washer is not used in this configuration.)
2. Use two mounting screws (not included) to secure the connector to the exterior wall so that the set screws in the bus bar face downward.
3. Install the ground electrode conductor into the SERVIT POST™ while turning the nut/pressure bar assembly to a maximum torque of 275 in-lb (use 2 wrenches if necessary).
4. Tighten the intersystem ground wires with the set screws in the bus bar to a maximum torque of 35 in-lb.
5. If hidden from view, use the BONDIT® location sticker to indicate the location.

**BONDIT® - Wall Mounted**

**Intersystem Bonding Connector**

NEC 250.94 refers to a requirement in the 2008 National Electrical Code. In the past, ground wires from telephone systems or cable systems were allowed to be grounded separately from the GEC (Ground Electrode Conductor from the main electrical service). With the new code, all ground wires from separate systems such as telephone systems, CATV and radio systems must be tied together at one location to the GEC. Hence, the term intersystem refers to tying all of the "system" grounds together in one location. The BONDIT®-Wall Mount is a great solution when the GEC is exposed (not in conduit).

With the new BONDIT® - Wall Mount connector BURNDY provides an economical solution that meets the needs of NEC 250.94.

Catalog Number: **BDTIBB**

**Features & Benefits**

- Meets the Intersystem Bonding requirements of NEC2008 250.94
- Provides an easy to access grounding point for utilities such as telecom and cable
- Easy to install
- UL Listed and CSA Certified
- Tin-plated connector body provides long-lasting corrosion resistance
- Stainless steel set screws
- Accepts main ground wire (#2 to #6), up to (4) intersystem wires (#4 to #14)

- Supplied with durable cover, easily secured over connector body
- Approved for use with solid or stranded conductors

**TYPE GC-A**

Dual Rated Ground Clamp  
For Copper and Aluminum Cable

GC-A ground clamps are UL Listed for use with either copper or aluminum conductors to copper water pipe, galvanized pipe or steel conduit. All clamps are constructed from tin plated high-strength extruded aluminum alloy. PENETROX™ oxide inhibiting joint compounds are recommended for all aluminum applications.

**Features & Benefits**

- Clamps are dual rated for both copper and aluminum conductors
  - ◊ Maximum flexibility of application
- All connectors are tin plated
  - ◊ Provide low contact resistance and prevents galvanic corrosion
- All clamps are range taking
  - ◊ Only 3 catalog numbers covers complete range of applications from 1/2 - 4 inches

## TYPE GCRT1/0 GROUND CONNECTORS

### Ground Clamp Range Taking, up to 1/0

The GCRT1/0 is a range taking ground rod clamp offering another choice from the BURNDY® family of connectors. The GCRT1/0 works on 1/2", 5/8" and 3/4" ground rods with a wire range of #8 through 1/0! The clamp is UL467 Listed for direct burial in earth and concrete. Catalog number GCRT1/0.

### Features & Benefits

- Range taking design helps reduce inventory
- UL Listed and CSA Certified
- UL467 Listed for direct burial in earth and concrete

## TYPE GRL

### Light Duty Economical Ground Rod Clamp

UL 467 Listed. Acceptable for direct burial in earth and concrete.

Catalog Number	Rod Size	Conductor Range

## TYPE GG

Ground Connector  
For Copper Bar, Strap, Braid or Cable  
to Rod or Tube

High copper alloy ground connector for joining bar, strap, braid or cable to rod or tube. High copper alloy cast body, DURIMUM™ U-bolts, nuts and lockwashers make the GG particularly effective for use with braid for ground rods, switch handles, fence posts and gates. One-wrench installation.

NOTE:

\*\* Refer to Section O for tube dimensions.

**FLEXIBLE COPPER BRAID  
JUMPER**

Copper braid is made of tinned, pure copper wire woven and flattened into a rectangular shape for greater flexibility. Seamless, pure copper ferrules are formed and assembled on each end to provide appropriate contact surfaces.

Braid is used extensively to compensate for expansion and contraction of moving parts and for thermal movement of rigid devices; to prevent breakage of insulators or bushings or equipment because of misalignment during settling of substation foundations; to absorb shock and vibration of operating equipment; and to provide flexible current carrying leads between moving parts of heavy machinery or equipment.

**BULK BRAID**

Bulk braid can be ordered with a minimum order quantity of 10 feet. Specify feet in number of inches.

Example: 10 feet of 190 ampere braid is Catalog No. BB077L120.

Fig. 1  
Conventional current have maximum cooling effect with Braid in vertical position.

Fig. 2  
Ventilation less efficient with Braid in horizontal position

**CURRENT CARRYING  
CAPACITY**

Flexible copper braid has generally better heat dissipation properties than flat bar, cable or other conductors, and therefore can be expected to have a greater current carrying capacity for given cross-sectional area. This is due to its greater surface area resulting from the woven construction of fine strands. However, ventilation, due to the vertical convection current of air, is appreciably better when the long axis of the braid is vertical rather than horizontal, so that the long sides of the braid, rather than the edges, are exposed to the moving air. This is particularly true when spaced braids are used in multiple as can be seen by comparing Figure 1 and 2.

INDOOR RATING AMPS	EQUIV CIRCULAR AREA	CAT NO.	APPROX WEIGHT PER FT
75	24,000	BB024L	0.06
95	48,000	BB048L	0.16
110	67,000	BB067L	0.22
190	77,184	BB077L	0.24
340	153,700	BB154L	0.49
360	231,552	BB226L	0.76
415	300,000	BB300L	1.06

OPEN ARRANGEMENT  
Cooling due to convection current much more effective with spaced Braid

Fig. 3

To take full advantage of ventilation, the cooling convection current of air should be permitted to flow freely between the braids. Therefore, if possible, the braids should be spaced apart, rather than bunched together, as illustrated in Figure 3. The effectiveness of spacing is, of course, greater when the braids are in a vertical position.

## FLEXIBLE COPPER BRAID

### CUSTOM DESIGNS

Flexible copper braid offers an economical and efficient means of protecting electrical equipment from the potentially harmful effects of shock and vibration, terminal expansion, movement of components and misalignment that may occur during the service life of the equipment.

E-60

Many varieties of braid are required to meet those needs which we can build to your specifications.

We also offer engineering assistance in the selection of the most appropriate standard or custom braid configuration for your application.

### CUSTOM VARIATIONS

#### Drilling

- \* Undrilled
- \* Elongated (slotted) holes
- \* Special hole patterns and location
- \* Metric
- \* NEMA

#### Plating

- \* Tin
- \* Silver
- \* Nickel
- \* Unplated

#### Length

- \* Jumper (overall)
- \* Ferrule(s) contact

#### Insulated (covered)

- \* Tubular
- \* Heat shrink

#### Split Braid Assemblies

- \* Stacked
- \* Side-by-side

#### Multiple Ferrules

#### Preformed Configurations

- \* Offset contact surfaces
- \* Angular (e.g. 90°, 180°) bends
- \* Ferrule contact surfaces rotated 90° on braid axis

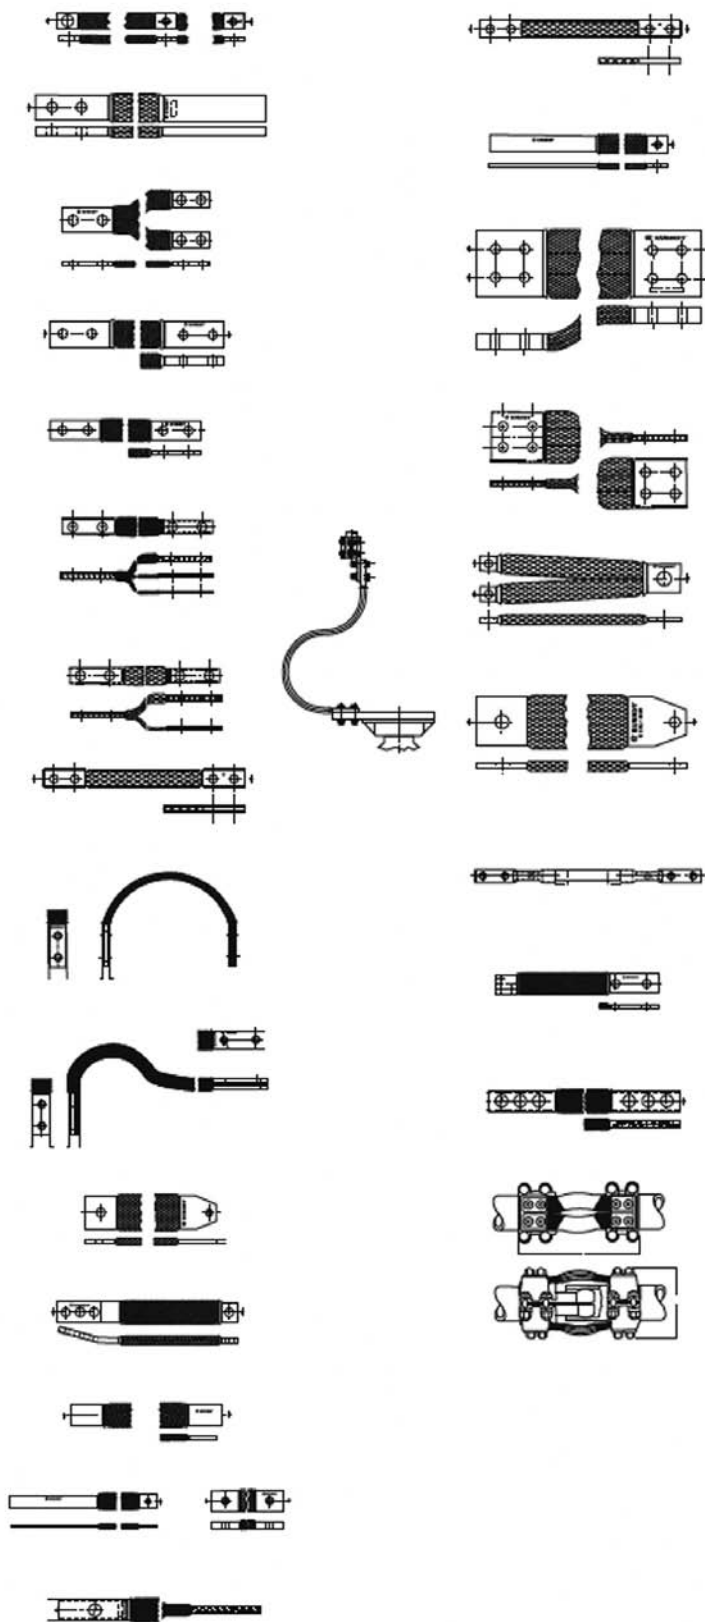

#### Combined Braid Assemblies

#### Combined connector - Braid Assemblies

#### Ferrule Variations

- \* Belled/unbelled
- \* Width/thickness
- \* Contact length
- \* Special shaping
- \* Bent at angle°

#### High Ampacity Requirements

**TYPE B**

**1-Hole Ferrule End Flexible Copper  
Braid, Bonding Jumpers,  
Bonding Straps**

Flexible copper braid jumpers designed to take up linear expansion and contraction, compensate for misalignment and absorb vibratory movement of electrical equipment and devices. Made of flat extra flexible tinned pure copper braid with high quality BURNDY ferrules on each end. Other lengths, plating and connector sizes are available; contact BURNDY for more information.

## TYPE B

### Flexible Copper Braid

Flexible copper braid jumpers designed to take up linear expansion and contraction, compensate for misalignment and absorb vibratory movement of electrical equipment and devices.

Made of flat extra flexible, tinned, pure copper braid, with unplated, seamless, pure copper ferrules formed into a rectangular shape on each end.

Catalog # Prefix	Equiv. AWG Size
BD	#1
BE	3/0
BF	4/0
BG	300 kcmil

Last two numbers in catalog number indicate total length of braid in inches (e.g., BD12N or BD12 is 12" long braid jumper).

Other lengths, plating and drilling are available. Contact the factory.

## TYPE BB-LT

### 1-Hole Connector End Flexible Copper Braid, Bonding Jumpers, Bonding Straps

Flexible copper braid jumpers designed to take up linear expansion and contraction, compensate for misalignment and absorb vibratory movement of electrical equipment and devices. Made of flat extra flexible tinned pure copper braid with high quality BURNDY tin plated connectors on each end. Other lengths, plating and connector sizes are available; contact BURNDY for more information.

\* The GB, GBM, GC, GCM, GL and GZ are all used for joining a range of cable to bar. The catalog numbers in each table accommodate the indicated cable range and up to 1/4" thick bar. Optional bolt lengths are available to accommodate up to 1" thick bar. For bar thicknesses from 1/4" to 1/2", add the suffix "T4" to the catalog number in the table. For bar thicknesses from 1/2" to 1", add the suffix "T8" to the catalog number in the table.

**TYPE GC-CT**

**Cabletray Ground Clamp**

This unique connector incorporates features which are unmatched. Made of tin-plated cast copper alloy, it accommodates either one or two conductors, copper or aluminum cable. In addition to a low profile head with a deep Phillips recess, the galvanized steel bolt has a ribbed neck which prevents rotation during installation when installed in a 0.44 diameter hole. When used on aluminum conductor, the cable must be scratch brushed and PENETROX™ A joint compound must be used on cable and connector. UL467 Listed for copper conductor only. Suitable for direct burial in concrete or earth.

E-69

Catalog Number	Accommodates Copper or Aluminum Conductor in either groove	B	CF	H	J	W
GC2525CT	#6 Sol. (0.16 Dia.) - 1/0 Str. (0.37 Dia.)	1.12	0.56	1.95	3/8	1.45

GC2929CT	2/0 Str. (0.41 Dia.) - 250 kcmil (0.58 Dia.)	1.12	0.56	2.20	3/8	1.98

**NOTE:**

The bolt head is mounted on the inside wall of cabletray to avoid damage to the cable insulation. May be used with aluminum or galvanized steel cabletray.

## TYPE GIE-G

Ground Connector  
For Vehicle Grounding Heavy Duty  
Construction

High-strength copper alloy ground clamps for grounding gasoline trucks, tank cars, aircraft and other vehicles where danger of explosion due to static electricity exists. Corrosion resistant and supplied with nonsparking, adjustable, replaceable contact grip screws. Automatic safety release disconnects should a vehicle unexpectedly move from the grounded area. Accommodates 4 Str. flexible copper cable.

## TYPE GIE-G

Ground Connector  
For Vehicle Grounding, Heavy Duty  
Construction

Accommodates flexible rubber sheath cable ranging from #6 to #2 conductor.

Catalog Number: GIE2CG3

TYPE GCB63T13G1

STUDBUG™ for Static Grounding  
Applications

GCB63T13G1 is a temporary grounding stud for use on rail cars, chemical trucks, hazardous waste tankers or a petroleum vehicle to allow for static grounding protection, while in operation. It provides a contact point, allowing the rail car, truck or tanker to be grounded to an equipotential grid or ground rod, by using static reel or a ground cable.

E-71

Features & Benefits

- Made of bronze, and supplied with silicon bronze hardware
- Secured by 1/2" hexagonal nut and split lock washer
- Can be used with universal clamps and ball stud clamps
- Can be used at various angles to reach inaccessible areas
- Add suffix "SS" for grounding stud with stainless steel hardware

Note:  
① Can be used with plate, bus bar or structural steel up to 1/4" thick.

## BURNDY® STATIC DISCHARGE REELS

Static Discharge Reels are an excellent addition to the BURNDY® static discharge line of products. These reels are often used to dissipate static charge buildup developed while filling or dispensing fuel or other combustible liquids from fuel trucks or rail cars. Often used in the petroleum industry but applicable in any area where static discharge creates potential hazard.

E-72

These reels are heavy duty, of rugged construction and are supplied with a 100 amp universal jaw-type grounding clamp. The reels are available with 100 ft and 50 ft lengths. All reels come with spring rewind and centrifugal brake. The tension can be adjusted on these reels and installation instructions are included to ensure the most efficient mounting method.

Every reel is Proudly Made in the USA and meets the stringent quality expectations of the BURNDY® portfolio of grounding products.

**BSD2050**

**BSD2050N**

### Features & Benefits

- 100 ft and 50 ft cable lengths
- Automatic E-Z PULL™ Rewinding
- Rugged Steel Construction
- Compact Enclosed Design (excluding BSD20100)
- Positive Ratchet Lock with Ratchet On/Off Switch (excluding BSD20100)
- Permanent Ratchet Lock (BSD20100 only)
- Steel Cable Installed
- 100 Amp Universal Jaw-Type Grounding Clamp
- Red Baked-on Finish
- Made in the USA

**TYPE GXP1828RF**

**SUPER-CLAMP™**

**Raised Floor / Rebar  
Ground Connector**

Raised Floor Pedestal Ground Connector. The GXP1828RF is a versatile, easy to install, range taking ground connector. This grounding clamp accepts a wide range of pedestals and conductors. Accepted pedestal range is 3/4" through 2" (7/8 - 2" round; 3/4" - 1-1/2" square). The wire range is #6 solid to 4/0 stranded. The wires can be arranged in a parallel or cross grid configuration - accepts 1 or 2 wires.

UL Listed for the US and Canadian markets (cULus). The high copper alloy body ensures excellent conductivity and the hardware is made of stainless steel. The connector is also rated for Direct Burial. The versatility of the connector makes it an excellent choice for applications requiring multiple conductor sizes and/or configurations.

**Features & Benefits**

- Fits a wide range of raised floor pedestals, from 3/4" to 2" (7/8 - 2" round; 3/4" - 1-1/2" square)
- Accepts a wide range of wire sizes, from #6 solid to 4/0 stranded
- Can be used for rebar sizes ranging from #7 - #12 size (7/8" - 1-1/2" Dia.)
- Accommodates parallel wires or cross grid arrangements; wires can be installed in cross grid configuration
- Accepts one or two wires in any configuration
- Easy to install - open design eliminates need to disassemble before installing
- One socket size fits all hardware! (1/2" socket size)
- Made of high copper alloy
- Stainless steel hardware
- UL Listed for the US and Canadian markets (cULus)
- Rated for Direct Burial

## TYPE GRF

### UNIGROUND™

#### UNIGROUND™ Raised Floor Grounding Connector

The BURNDY® UNIGROUND™ is a universal grounding clamp, specifically designed for all raised flooring systems. It can be installed on round or square pedestals and can accommodate one or two grounding wires to make an efficient grid. The underfloor signal reference grid provides the low impedance ground path that attenuates high frequency static and 60 Hz transient noise for cleaner data output. UL467 Listed.

E-76

#### Features & Benefits

- One connector fits all applications
- Ease of specification and installation
- Single bolt design
  - Ease of installation:
    - No need to disassemble
    - Single wrench installation
- Accepts 1 or 2 ground conductors
- Requires less connectors to install signal reference grid
- Tin plated cast bronze construction
- Resists corrosion and provides extended life ground connection
- Grounds all pedestals (round or square). Will handle up to 7/8" square and 1" round
- Ease of installation. One connector does it all
- Serves 3 needs:
  1. Signal Reference Grid
  2. Static Ground
  3. Fault Current Ground
- UNIGROUND™ solves all possible grounding problems found in computer applications today

Catalog Number	Number of Conductors	Conductor Size Sol. & Str.	Pedestal Type		B	H	J	W
			Round	Square				
GRF4C-3	1 or 2	#8 - #2	Up to 1"	Up to 7/8"	1.96	3.14	3/8	1.76
GRF4C-4	1 or 2	#8 - #2	Up to 3/4"	Up to 5/8"	1.79	3.13	3/8	1.40

**TYPES GP-G1, GP-RT**

**Raised Floor Grounding  
Clamps**

High copper alloy ground connector for raised floor computer grounding applications. These connectors can be installed on round and square pedestal applications and will accommodate one or two grounding wires to make an efficient grid. The underfloor signal reference grid provides the low impedance ground path that attenuates high frequency static and 60 Hz transient noise for cleaner data output. UL467 Listed.

In addition we offer the GP1726RT, which is specifically designed for penetrating epoxy paint on pedestals. This patented connector offers a low impedance, time saving connection between conductors and the pedestal.

**Features & Benefits**

- Accepts 1 or 2 Ground Conductors
- Requires less connectors to install signal reference grid
- Made of copper alloy
- DURIMUM™ U-Bolts, nuts and lockwashers
- Provides a low impedance ground path for maximum performance
- Grounds all pedestals (round or square)
- Will handle from 3/4" to 1" round or square
- Ease of installation.
- Serves 3 needs :
  1. Signal Reference Grid
  2. Static Ground
  3. Fault Current Ground
- Connectors solve all possible grounding problems found in computer applications today

## TYPE BBB

### BURNDY® Bus Bar

#### Copper Bus Bar

Bare copper BusBar, UL Listed for grounding. Available in many sizes and hole patterns. Brackets and insulators included with most styles. Also available in undrilled, horizontal and vertical versions. BusBar is used in a variety of applications. Can be used as a common ground point and "power" applications as well.

E-78

## BWB680 Series

### BURNDY® Pool Water Bonding Kit

NEC 680.26(C) states: "An intentional bond of minimum conductive surface area of 9" shall be installed in contact with the pool water. This bond shall be permitted to consist of parts that are required to be bonded in 680.26(B)".

E-80

In order to comply with this requirement BURNDY is offering the BWB680 Series. Made of non-corrosive stainless steel, the BURNDY water bonding kit maintains constant contact with pool water to ensure that the pool is effectively bonded at all times.

BURNDY BWB680 Series is one of the few and the most user friendly, products on the market that complies with this code. Other products are placed in the plumbing, which is not always in contact with the water and therefore does not meet the code. Since the BWB680 Series is placed in the skimmer, it is always in contact with the water.

Included in the BURNDY BWB680 Series Bonding Kit: One (1) bonding plate; one (1) rubber sealing washer; two (2) flat washers; two (2) lock washers; two (2) nuts; and one (1) BURNDY CL501-TN

### Features & Benefits

- Easy installation
- Mounting hardware included
- UL Listed
- Placed out of the way on the side wall of the skimmer below the basket

Catalog Number	Pool Type

BWB680IG	In-Ground

Bonding wire goes here

**BURNDYWeld®**

The BURNDYWeld® connection process is a simple, efficient method of welding copper to copper or copper to steel. One advantage is that NO outside power is required when using the BURNDYWeld® exothermic process. The BURNDYWeld® process uses high temperature reaction of powdered copper oxide and aluminum. The reaction takes place in a semi-permanent graphite mold. These molds will last for fifty or more welds if proper care is given. The reaction takes place very rapidly, therefore the total amount of heat applied to the conductors or surfaces is considerably less than that of brazing or soldering. It is important to remember this when welding to insulated cable or thin wall pipe.

This system is very field friendly, since it is light and portable and requires no outside power source. It requires very little time or skill to obtain an efficient, maintenance free connection when using the BURNDYWeld® process.

For more information, visit our website at: [www.burndy.com](http://www.burndy.com).

The BURNDYWeld® process has been used to weld materials other than copper for electrical purposes. Materials welded include:

- Stainless Steel
- Copperweld®
- Nichrome V
- Galvanized Steel
- Silicon Bronze
- Copper Clad Steel
- Columbium
- Plain Steel
- Everdur®
- Kama
- Stell Rail
- Cor-Ten®
- Brass
- Bronze
- Niobium
- Chromax
- Cast Iron
- Monel

When welding to galvanized steel it is recommended to resurface exposed bare steel.

E-81

The BURNDYWeld® connection is a molecular weld. The weld metal has the same melting point as copper. These factors along with the increased cross section of the connection, BURNDYWeld® connections:

1. Will not be affected by a high current surge. Tests have shown that the electrical conductor will melt before the BURNDYWeld® connection when subjected to high short circuit current. Consult IEEE Standard 837-1989.
2. Will not loosen or corrode at the point of weld. There are no contact surfaces or mechanical pressures involved. A BURNDYWeld® connection becomes an integral part of the conductor.
3. Have a current-carrying capacity equal to or greater than that of the conductors.

## Making a BURNDYWeld® Connection

E-82

### Step 1

Position cleaned conductors in mold after make sure mold is dry, by pre-heating or making a test joint.

### Step 2

Place metal disc in bottom of mold crucible.

### Step 3

Dump powder into crucible, being careful not to loosen all the starting powder.

### Step 4

Close lid and place a small amount of starting powder in the ignition pocket.

### Step 5

Ignite the starting powder with the Flint Ignitor.

### Step 6

Wait 15 seconds, then remove weld and clean mold before making next connection.

**BURNDYWeld®  
QIKLITE®**

**BURNDYWeld® Weld Metal**

**Battery Ignition System**

The self-contained unit offers a built-in battery life indicator, 6' ignitor cord and separate buttons for power and ignition. Also, no starting powder is used with this system so emissions are greatly reduced. QIKLITE® works with "off-the-shelf" molds and weld metal, so contractors and installers can continue to use the same quality BURNDYWeld® products.

Since the unit operates with standard weld metal and molds, installers also have the option of using a traditional flint ignitor or the new QIKLITE® system. Another feature is the speed of ignition, with virtually no delay between depressing the "push to operate" button and ignition of the weld metal. This instant ignition feature offers quick reassurance to the installer, without the delay.

E-83

**Features & Benefits**

- The QIKLITE® system allows installers to make exothermic connections remotely
- Uses standard exothermic molds and weld metal
- Use the new BURNDYWeld® QIKLITE® system or use a flint ignitor, this versatility makes this system better than anything available in the industry
- Installers have virtually 100% confidence that the connection can be completed with no wasted material or weld metal shots
- No starting material required - which greatly reduces the amount of emissions generated
- Power is supplied by 4 standard "D" Size batteries
- Built-in battery life indicator
- There's virtually no delay in ignition after depressing the "push to operate" button
- Separate ON/OFF and Operate buttons
- Comes complete with durable 6' heat resistant cord
- Durable, long-lasting design
- QIKSTIK ignitor sticks are conveniently packaged and available separately or available packaged complete with standard weld metal

## BURNDYWeld® WELD METAL

BURNDYWeld® Weld Metal is packed in moisture-resistant plastic cartridges that have tight fitting caps. These cartridges, along with the necessary steel discs, are then packed in boxes that are hermetically sealed. This ensures the powder arriving in good condition, always dry and ready for fast positive ignition. BURNDYWeld® Weld Metal comes in several types; one for welding copper to copper, copper to steel, copper to cast iron and one for welding copper to steel for cathodic protection. The size and weight (in grams) of the cartridge are marked on each individual cartridge.

Weld metal and steel discs are sold only in standard box quantities.

E-84

### Features & Benefits

- Packed in moisture-resistant plastic cartridges that have tight fitting caps. These cartridges, along with the necessary steel discs, are then packed in boxes that are hermetically sealed. This ensures the powder arriving in good condition, always dry and ready for fast positive ignition.

## TYPE BCC-11 MOLDS

### Horizontal to Horizontal Cable Cross

Type BCC-11 Molds are used to join uncut horizontal cables at right angles to each other. Size range is #6 through 500 kcmil solid or concentric stranded copper conductors. Contact BURNDY® for information on molds for conductors not listed below.

#### NOTES:

- For sizes not listed, contact BURNDY®
- Molds listed are for concentric stranded cable; add suffix "-S" to mold number for solid conductors
- For heavy duty molds, molds with wear plates or molds for Copperweld® cable, contact BURNDY®
- For expedited service, contact BURNDY®

#### Required Tools:

Handle Clamps - see chart for correct handle catalog number

#### Recommended Accessories:

**B38-0309-00** Flint Ignitor; **B38-3922-00** Mold Cleaning Brush; **B38-0135-00** Cable Cleaning Brush; **B38-0330-00** Cable Clamp

TYPE BCC-6 MOLDS

Horizontal Parallel Tap

BCC-6 Type Molds are used to join horizontal parallel tap to run connections. The tap cable is over the run cable. Size range is #6 through 4/0 solid or concentric stranded copper conductors. Contact BURNDY® for information on molds for conductors not listed below.

NOTES:

- For sizes not listed, contact BURNDY®
- Molds listed are for concentric stranded cable; add suffix "-S" to mold number for solid conductors
- For heavy duty molds, molds with wear plates or molds for Copperweld® cable, contact BURNDY®
- For expedited service, contact BURNDY®

Required Tools:

Handle Clamps - see chart for correct handle catalog number

TYPE BCC-14 MOLDS

Horizontal Parallel through Cables

BCC-14 Type Molds are used to join horizontal parallel through run cables. Cables run side by side in the mold. Size range is #8 through #6 solid or concentric stranded copper conductors. Contact BURNDY® for information on molds for conductors not listed.

Cable		Mold Number	Price Key	Weld Metal
Run	Tap			
#8	#8	B-5709	18	15
#6	#6	B-5618	18	25

NOTES:

- For sizes not listed, contact BURNDY®
- Molds listed are for concentric stranded cable; add suffix "-S" to mold number for solid conductors
- For heavy duty molds, molds with wear plates or molds for Copperweld® cable, contact BURNDY®
- For expedited service, contact BURNDY®
- Sold complete with handles

## TYPE BCC-7 MOLDS

### Horizontal Parallel through Cables

BCC-7 Type Molds are used to join horizontal parallel through run cables. One cable runs above the other cable in the mold. Size range is #6 through 4/0 solid or concentric stranded copper conductors. Contact BURNDY® for information on molds for conductors not listed below

#### NOTES:

- For sizes not listed, contact BURNDY®
- Molds listed are for concentric stranded cable; add suffix "-S" to mold number for solid conductors
- For heavy duty molds, molds with wear plates or molds for Copperweld® cable, contact BURNDY®
- For expedited service, contact BURNDY®

TYPE BCR-3 MOLDS

Horizontal Through Cable to Ground Rod

Type BCR-3 Molds are used to join horizontal through run cable to the side of a vertical ground rod. Size range is #6 through 1000 kcmil solid or concentric stranded copper conductors; 1/2" through 1" for the ground rod. Contact BURNDY® for information on molds for conductors not listed below.

NOTES:

- For sizes not listed, contact BURNDY®
- Molds listed are for concentric stranded cable; add suffix "-S" to mold number for solid conductors
- For heavy duty molds, molds with wear plates or molds for Copperweld® cable, contact BURNDY®
- For expedited service, contact BURNDY®

Required Tools:

Handle Clamps - see chart for correct handle catalog number

Recommended Accessories:

B38-0309-00 Flint Ignitor; B38-3922-00 Mold Cleaning Brush; B38-0135-00 Cable Cleaning Brush; B38-0330-00 Cable Clamp

## SINGLE SHOT MOLDS

RUS Accepted

BURNDYWeld® Single Shot Molds are an economical way to make cable connections onto the top of a ground rod. The Single Shot is a disposable single use ceramic mold that comes complete with everything required except the Flint Ignitor.

**TYPE BCS-3 MOLDS**

**Angular Cable Drop to Vertical  
Steel Surface**

Type BCS-3 Molds are used to join the end of a copper cable at a 45° angle to a vertical steel surface. Size range is #6 through 1000 kcmil solid or concentric stranded copper conductors. Contact BURNDY® for information on molds for conductors not listed below.

① Flat Surface Mold; These items can be used to Flat Steel or to Pipe

**NOTES:**

- For sizes not listed, contact BURNDY®
- Molds listed are for concentric stranded cable; add suffix "-S" to mold number for solid conductors
- For heavy duty molds, molds with wear plates or molds for Copperweld® cable, contact BURNDY®
- For expedited service, contact BURNDY®

**Required Tools:**

Handle Clamps - see chart for correct handle catalog number

**Recommended Accessories:**

- B38-0309-00 Flint Ignitor
- B38-3922-00 Mold Cleaning Brush
- B38-0135-00 Cable Cleaning Brush
- B38-0330-00 Cable Clamp

Cable to Flat Steel

Cable to Pipe

## TYPE BCS-23 MOLDS

### Vertical Cable Drop to Vertical Steel Surface

Type BCS-23 Molds are used to join vertical cable down to a vertical steel surface. Note that the cable is OFF the surface. Size range is #6 through 500 kcmil solid or concentric stranded copper conductors. Contact BURNDY® for information on molds for conductors not listed below.

#### NOTES:

- For sizes not listed, contact BURNDY®
- Molds listed are for concentric stranded cable; add suffix "-S" to mold number for solid conductors
- For heavy duty molds, molds with wear plates or molds for Copperweld® cable, contact BURNDY®
- For expedited service, contact BURNDY®

#### Required Tools:

Handle Clamps - see chart for correct handle catalog number

#### Recommended Accessories:

**B38-0309-00** Flint Ignitor; **B38-3922-00** Mold Cleaning Brush; **B38-0135-00** Cable Cleaning Brush; **B38-0330-00** Cable Clamp

## TYPE BCS-5 MOLDS

### Horizontal Cable Tap to Horizontal Cast Iron Surface

Type BCS-5 Molds are used to join horizontal cable taps to horizontal cast iron surfaces. Note that the cable is ON the surface. Size range is #6 through #1 solid or concentric stranded copper conductors. Contact BURNDY® for information on molds for conductors not listed below.

**DO NOT use Type BCS-5 molds on Soil Pipe (ASTM A74-82). A test weld should be made on a section of pipe being used to determine the possibility of detrimental metallurgical effects.**

#### NOTES:

- For sizes not listed, contact BURNDY®
- Molds listed are for concentric stranded cable; add suffix "-S" to mold number for solid conductors
- For heavy duty molds, molds with wear plates or molds for Copperweld® cable, contact BURNDY®
- For expedited service, contact BURNDY®

**TYPE BCRE-1 MOLDS**

**Horizontal Parallel Tap to Rebar**

Type BCRE-1 Molds are recommended for parallel, horizontal connections for solid or concentric stranded conductors #6 through 4/0 joined to reinforcing bars #3 through #6 and larger. The high copper content joint has a higher current carrying capacity than the conductors being joined and is impervious to vibration and moisture. Contact BURNDY® for information on molds for conductors not listed below.

**PACKING MATERIAL NOTE**

A packing pad is necessary when making BURNDYWeld® connections to rebar. Packing material B38032900 is copper shim stock. Packing material numbers B38406100, B38406200 and B38406300 are a ceramic fiber material and can be used for one connection only. Be sure to specify packing material catalog number when ordering mold and weld metal.

- B38-0135-00** Cable Cleaning Brush
- B38-0330-00** Cable Clamp

## TYPE BCRE-2 MOLDS

### Horizontal Cable Tap to Horizontal Rebar Run

Type BCRE-2 Molds are recommended for right angle, horizontal connections for solid or concentric stranded conductors #6 through 4/0 joined to reinforcing bars #3 through #6. The high copper content joint has a higher current carrying capacity than the conductors being joined and is impervious to vibration and moisture.

### PACKING MATERIAL NOTE

A packing pad is necessary when making BURNDYWeld® connections to rebar. Packing material B38032900 is copper shim stock. Packing material numbers B38406100, B38406200 and B38406300 are a ceramic fiber material and can be used for one connection only. Be sure to specify packing material catalog number when ordering mold and weld metal.

#### NOTES:

- For sizes not listed, contact BURNDY®
- Molds listed are for concentric stranded cable; add suffix "-S" to mold number for solid conductors
- For heavy duty molds, molds with wear plates or molds for Copperweld® cable, contact BURNDY®
- For expedited service, contact BURNDY®

#### Required Tools:

Handle Clamps - see chart for correct handle catalog number

#### Recommended Accessories:

**B38-0309-00** Flint Ignitor  
**B38-3922-00** Mold Cleaning Brush  
**B38-0135-00** Cable Cleaning Brush  
**B38-0330-00** Cable Clamp

**TYPE BCRE-3 MOLDS**

**Horizontal through Cable to  
Vertical Rebar**

Type BCRE-3 Molds are recommended for horizontal conductors to vertical rebar connections for solid or concentric stranded conductors #6 through 4/0 joined to reinforcing bars #3 through #7 & larger. The high copper content joint has a higher current carrying capacity than the conductors being joined and is impervious to vibration and moisture. Contact BURNDY® for information on molds for conductors not listed below.

**PACKING MATERIAL NOTE**

A packing pad is necessary when making BURNDYWeld® connections to rebar. Packing material B38032900 is copper shim stock. Packing material numbers B38406100, B38406200 and B38406300 are a ceramic fiber material and can be used for one connection only. Be sure to specify packing material catalog number when ordering mold and weld metal.

① The **B106-32** comes complete with a **B-106** handle clamp and **B40-0106-76** vertical chain clamp. Although good for use on all sizes of rebar, vertical chain clamps are strongly recommended on large size rebar as they hold the mold to the rebar securely. If you already have a B-106 handle clamp, you can purchase the vertical chain clamps separately.

**NOTES:**

- For sizes not listed, contact BURNDY®
- Molds listed are for concentric stranded cable; add suffix "-S" to mold number for solid conductors
- For heavy duty molds, molds with wear plates or molds for Copperweld® cable, contact BURNDY®
- For expedited service, contact BURNDY®

**Required Tools:**

Handle Clamps - see chart for correct handle catalog number

**Recommended Accessories:**

- B38-0309-00** Flint Ignitor
- B38-3922-00** Mold Cleaning Brush
- B38-0135-00** Cable Cleaning Brush
- B38-0330-00** Cable Clamp

## BURNDY® GROUNDMAX™

## BURNDY® GROUNDMAX™

BURNDY® GROUNDMAX™ is an economical solution for areas with very difficult grounding issues. BURNDY® GROUNDMAX™ is highly conductive in a wet or dry application and does not require moisture to lower the resistance of your grounding system. BURNDY® GROUNDMAX™ contains a corrosion inhibitor which forms a film on copper, creating a barrier against corrosion. BURNDY® GROUNDMAX™ can be poured in dry or pumped in slurry form. No tamping required. It is very contractor friendly. No special tools required.

### Advantages:

- Easy to install
- Electrically conductive
- Environmentally friendly
- Will not leach into the ground
- Positive low resistance, electrical connection to earth
- Does not contain any hazardous chemicals
- Compatible with all copper grounding systems
- Contains a corrosion inhibitor to protect copper
- Will not expand or shrink
- Not affected by freezing
- Excellent shelf life
- Typical resistivity <10 Ohm-cm

### To calculate the pounds of material required to fill a trench:

- Determine desired thickness
- Move to the right on the chart above until you are under the known width of the trench - this number will be the weight of the material in lbs/linear ft
- Take this number and multiply by the length of the trench in feet; your answer will be the amount of BURNDY® GROUNDMAX™ material required to fill the trench to the desired level in pounds

#### Example:

Thickness = 6 inches  
 Width of trench = 18 inches  
 54.6 lbs per linear ft (see table above)  
 Answer = 54.6 lbs per linear ft x 25 ft trench = 1,365 lbs of BURNDY® GROUNDMAX™  
 = Quantity of 28 50-lb bags of BURNDY® GROUNDMAX™

**BURNDY® GROUNDMAX™**

**Application Information**

**Vertical Installation**

Drill or bore a hole the desired diameter and depth. Suspend ground electrode in center of hole to be filled. Pour BURNDY® GROUNDMAX™ until desired level is obtained. No tamping is required.

Dry Volume of BURNDY® GROUNDMAX™ vs. Hole Size		Ground Resistance Comparison of Bare Rod vs.	
Hole Size	Lbs. of BURNDY® GROUNDMAX™ Per Ft.	Hole Size with 5/8" x 10' Rod in Center of 15' Hole	Percent Resistance Compared to Rod Only (100%)
4"	6.5	4"	52%
6"	14.5	6"	47%
8"	25.8	8"	44%
10"	40.4	10"	42%
12"	58.1	12"	40%

**Horizontal or Grid Construction ①**

Pour into horizontal trench until level of ground wire is reached. Place ground wire. Pour additional BURNDY® GROUNDMAX™ until wire is covered to desired height. Cover with fill. No tamping required.

For grid construction, pour BURNDY® GROUNDMAX™ and spread over ground grid until desired thickness is achieved. Cover with fill.

Steady State Leakage Resistance ② Using 4/0 Copper Wire vs. BURNDY® GROUNDMAX™					
Length	0.457" Diameter Wire Only	Percentage of Resistance with 0.457" Wire Plus BURNDY® GROUNDMAX™ in Various Diameters Compared to Wire Only (100%)			
		2"	3"	4"	6"
25'	100%	83%	78%	74%	69%
50'	100%	85%	81%	77%	73%
75'	100%	86%	82%	79%	75%
100'	100%	87%	83%	80%	77%

250'	100%	89%	85%	83%	80%
300'	100%	89%	86%	84%	80%

① Entire grounding system should be surrounded by BURNDY® GROUNDMAX™. Conductors should be insulated as they exit BURNDY® GROUNDMAX™ column.

② The use of BURNDY® GROUNDMAX™ around the grounding system will also reduce surge impedance by increasing the effective contact area of the electrode to soil.

**Horizontal Construction**

**Grid Construction**

## BURNDY® GRIDMAX®

Grounding, Personnel Safety Mats,  
Equipotential Bonding, Pool and Spa  
Grounding

### Features & Benefits

E-110

- Manufactured from bare solid copper
- Spaced on 4", 6" or 12" centers
- Copper to copper weld with 15% silver
- Furnished in sections with lengths from 4' to 100'
- Easily and economically installed using BURNDYWeld®, HYGROUND® or our Mechanical connectors
- Sizes made specifically for the Pool and Spa market 3' x 100' and 3' x 50'. But can be used where any large area grounds are required

**B-106 & B-107  
HANDLE CLAMPS**

BURNDYWeld® Handle Clamps make possible the use of many different sizes and types of molds with only two different clamps. The two handle clamps are catalog numbers **B-106** & **B-107**. These will fit 95% of all standard BURNDYWeld® molds.

1. Use B-106 clamps for all molds having a price key 4, 7, 17, 22 or 24. These molds are a nominal 3 1/8" x 3 1/8" square.
2. Use B-107 clamps for all molds having a price key 5, 6, 8 or 23. These molds are a nominal 4" x 4" square.
3. All molds having a price key 2, 3, 9, 10, 11, 12, 14, 15 or 16 have an attached frame; separate handles are not required.

E-111

**B40-0106-75 HANDLE  
ATTACHMENT**

This Handle Attachment is used to hold Price Key 14 molds in position. It easily attaches to the B-106 Handle Clamp. This Handle Attachment can be used with weld types BCRE-1 and BCRE-4.

Catalog Number: **B40-0106-75**

**MOLD SUPPORT CLAMP**

The Mold Support Clamp is used to hold a mold in position on a vertical steel column or angle. It is easily attached to the Handle Clamps. The Mold Support Clamp can be used with weld types BCS-3, BCS-18, BCS-23 and BCS-27.

Catalog Number: **B40-3657-00**

## VERTICAL MAGNETIC CLAMPS

Magnetic Clamps are used to hold a mold in position on a vertical steel surface. The magnetic clamp can be purchased complete with B-106 Handle Clamps or if you already have a set of handle clamps, you can order just the magnetic mounting assembly. The mounting assembly can easily be mounted on the prongs of your existing B-106 handle clamps. A minimum of 10" is required.

E-112

B40-4431-00	B-106 & B-107	BCS-3, 4, 7 & 23

## HORIZONTAL & VERTICAL CHAIN CLAMPS

### BURNDYWeld®

Chain Clamps are used to hold a mold in position on horizontal or vertical pipe up to 4" in diameter. For larger pipe a 20" chain extension is available to allow the chain clamps to be used on pipe up to 10" in diameter. The chain clamp can be purchased complete with B-106 or B-107 Handle Clamps or if you already have a set of handle clamps, you can order just the chain clamp and mounting assembly. The mounting assembly can easily be attached to your existing handle clamps. 20" Chain Extension catalog number: B40-0106-27.

Chain Clamps

**BURNDYWeld®  
ACCESSORIES**

**B38-0330-00 CABLE CLAMP**

The BURNDYWeld® Cable Clamp is recommended for holding a wide range of cables properly in place in molds when welding cables that are under tension. This prevents the cables from pulling out of the mold when the weld is made.

**CABLE CLEANING & CARD  
CLOTH BRUSH**

The Cable Cleaning Brush is recommended for cleaning heavily oxidized cables. The V-shape brushes permit their use over a wide range of cable sizes. Brush assembly consists of a handle with two stiff wire bristle brushes that are rotatable, for longer life and are replaceable.

The Card Cloth Brush is used for cleaning large conductors and bus bar. It has short stiff bristles. These brushes are for cleaning cable only, not molds.

The Mold Cleaning Brush **B38-3922-00** is used to clean the graphite mold without scratching the mold.

Description	Catalog Number
Cable Cleaning Brush	<b>B38-0315-00</b>
Replacement Brush	<b>B38-0135-01</b>
Card Cloth Brush	<b>B38-0306-00</b>
Mold Cleaning Brush	<b>B38-3922-00</b>

**MOLD CLEANERS**

Mold Cleaners are used to clean the slag from molds that are not split through the crucible.

**B40-0319-01** for cartridge sizes #15 through #65

**B40-0319-03** for cartridge sizes #90 through #500

**PACKING MATERIAL**

Packing material is used to prevent the molten weld metal from leaking out of the mold. When the cable opening becomes worn from heavy use, the packing material may be used to prolong mold use. It is also used around 7 strand cable to prevent leaking. Packing material comes in a 1 lb. or 5 lb. package.

Description	Catalog Number
1 lb. package	<b>B38412900</b>
5 lb. package	<b>B38412905</b>

E-113

**BURNDYWeld®  
 ACCESSORIES**

E-114

**BURNDYWeld® TOOL KIT**

- B38-0302-00** Tool Kit with Tools Shown except Rasp
- B38-0302-02** Tool Kit with Tools Shown and Rasp
- B38-0303-00** Tool Box only

**BURNDYWeld® TOOLS**

The **B38-0309-00** Flint Ignitor is used to ignite the starting powder. Each mold that is sold with a frame has a Flint Ignitor included. For added safety a Flint Ignitor extension is available, catalog number **B38-0904-00**, that attaches to the **B38-0309-00** Flint Ignitor. This allows installers to stay approximately 36" away from the mold. To order replacement flints, specify part number **B38-0309-01**.

- B38-0309-00** Flint Ignitor
- B38-0304-00** 8" File
- B38-0307-00** Crimping Tool
- B38-3922-00** Mold Cleaning Brush
- B38-0308-00** 6" Screwdriver
- B38-0305-00** Wire Brush
- B38-0101-00** Rasp
- B38-0306-00** Card Cloth Brush

**B38-0101-00 RASP**

This tempered steel, curved rasp is recommended for removing rust and mill scale from steel and cast iron surfaces. The blade is replaceable. To order replacement rasp blade, specify catalog number **B38-0101-01**.

Not recommended for use on galvanized surfaces.

**B38-0309-00 FLINT IGNITOR**

The **B38-0309-00** Flint Ignitor is used to ignite the starting powder. Each mold that is sold with a frame has a Flint Ignitor included. For added safety a Flint Ignitor extension is available, catalog number **B38-0904-00**, that attaches to the **B38-0309-00** Flint Ignitor. This allows installers to stay approximately 36" away from the mold.

To order replacement flints, specify part number **B38-0309-01**.

**GROUND ROD DRIVING SLEEVES**

Ground Rod Driving Sleeves are placed over the top of a ground rod while driving it into the ground. This prevents the top from mushrooming or flaring out. Ground rod driving sleeves are available in sizes to fit all standard unthreaded ground rods.

Catalog Number	For Use On
<b>B38-3662-01</b>	1/2" Copper Clad or Steel Ground Rod
<b>B38-3662-02</b>	5/8" Copper Clad Ground Rod
<b>B38-3662-05</b>	5/8" Steel Ground Rod
<b>B38-3662-03</b>	3/4" Copper Clad Ground Rod
<b>B38-3662-06</b>	3/4" Steel Ground Rod
<b>B38-3662-04</b>	1" Copper Clad Ground Rod

E-115

**SHIM STOCK AND ADAPTER SLEEVES**

BURNDYWeld® molds designed for larger cable sizes can be used on smaller diameter cables if copper adapter sleeves or shim stock are utilized. The copper shim stock, .0108" x 1-1/2" x 3", is normally wrapped around cable until the diameter is about equal to the cable opening. A tight fit is not necessary as the shim stock will unwrap slightly and prevent leakage of weld metal. To order shim stock use part number **B38-0329-00**. Shim stock comes 100 pieces per box.

## Wiley Solutions

Whether installing miles of wire or acres of solar modules, the components no bigger than a few inches that can give the project long-term success and peace of mind. As PV technology has evolved, BURNDY continues to provide solutions to the most challenging applications requirements.

The Wiley product offering encompasses varied products offering to suit the application at hand.

**ACE Conduit Entry Boxes** offer side and bottom conduit drill-out for easy conduit routing and a choice of pass-through or combiner box with bracket.

**Bonding Jumpers** of corrosion resistant, tin-plated copper are available with or without the Wiley WEEB® washer; UL 467 and UL 2703 Listed.

E-116

**Clamping Solutions** offer reliability for use throughout the lifetime of the PV system. Mid-Clamp and End-Clamp designs for all types of solar module bonding.

**Grounding Lugs** available with or without the WEEB® washer and requires no surface preparation of the rail or module.

**WEEB® Washer (Washer Electrical Equipment Bond)** eliminate the need for older, more expensive grounding methods. Corrosion-resistant 304 stainless steel construction available in a myriad of styles all providing excellent conductivity without oxidation risk to bond the PV module frame with the metal racking structure.

**Wiley Cable Clips** simplify wire management and provide a cleaner aesthetic to solar PV arrays. UL 1565 Listed and for use with a broad range of cable combinations and sizes. No tools required for installation and compatible on modules with a flange thickness range of 1.3 to 2.5mm and a variety of rails.

**Wiley Bundle Straps** UL62275 Listed with vinyl jacket designed to help protect cable insulation from damage and lasts the lifetime of the PV system.

**Insulated Bundle Straps and Insulated P-Clips** are also available made of vinyl coated steel protecting cables from vibration and insulation damage.

## ACE CONDUIT ENTRY BOX

The ACE Conduit Entry Box makes quick and simple transitions from USE-2 or PV array wire to conduit protected THWN-2 wire.

The box features a compact two-piece UV resistant, NEMA 3R rated enclosure that allows ample wiring space and is compatible with any conduit type.

### Features & Benefits

- UL 1741 Listed
- Rated for 1000V
- Convenient side and bottom conduit drill-out for easy conduit routing
- Choice of pass-through or combiner box with bracket
- Compatible with any conduit type
- Preassembled for quick and easy installation
- Custom configurations available upon request

## BONDING JUMPER

Constructed of corrosion resistant, tin-plated, braided copper, the Wiley line of bonding jumpers are high quality solutions for your solar PV system.

The WEEB® Bonding Jumper is used to create an electrical connection between two pieces of anodized aluminum or any electrically conductive material. This maintains electrical continuity over long spans or air gaps between metal structures.

The Wiley Bonding Jumper is used to create an electrical connection between two pieces of galvanized steel. Compatible with 1/4" hardware, the Wiley Bonding Jumpers come in custom lengths upon request.

### Features & Benefits

- UL 467 Listed
- UL 2703 Listed
- Corrosion resistant
- Equivalent to 6AWG copper wire
- Available:
  - With or without WEEB® washer technology
  - Assembled and unassembled
  - With or without installation hardware
- In-stock standard lengths from 6" to 36" (custom lengths available upon request)
- Reliability for use throughout the lifetime of the PV system

## CLAMPING SOLUTIONS

Our universal mid-clamp and adjustable end clamp designs accommodate various module thicknesses. Plus the Wiley Mid-Clamp uses proven WEEB® technology for integrated bonding as well as a quick and easy installation.

### Features & Benefits

- UL 467 Listed
- UL 2703 Recognized
- Low profile design
- Increased inspectability
- Available in mill finish
- Custom designs and finishes available upon request
- Reliability for use throughout the lifetime of the PV system

## GROUNDING LUG

Constructed of corrosion resistant, tin-plated copper, the Wiley line of grounding lugs are high quality solutions for your solar PV system. The tin-plated lug assures minimum contact resistance and protection against corrosion. The low profile of the grounding lug allows it to be installed in a variety of positions with one solid or stranded copper wire (14 AWG to 6 AWG), or two copper wires (12 AWG to 10 AWG). Copper wire is secured by a 1/4-28 stainless steel screw, which is horizontal to the tang. This allows for easy access when mounted under a PV module. The result is a continuous ground on all solar applications.

The WEEB® Grounding Lug is installed using stainless steel mounting hardware. When the hardware is tightened, the WEEB® washer's specialized teeth embed into anodized aluminum or any electrically conductive metal to establish a gas tight electrical connection.

The Wiley Grounding Lug is available unassembled, without installation hardware, and with standard hold sizes of 1/4" and 5/16" (M8). Perfect for galvanized steel applications or anywhere a WEEB® washer is not required.

### Features & Benefits

- UL 467 Listed
- UL 2703 Listed Made of corrosion-resistant, tin-plated copper
- Design ensures a quick and easy installation
- Available:
  - With or without WEEB® washer technology
  - Assembled and unassembled
  - With or without installation hardware
- No surface preparation required on the rail or module
- Custom designs available upon request
- Reliability for use throughout the lifetime of the PV system

## WEEB® WASHER (Washer Electrical Equipment Bond)

A revolution in the solar industry, WEEB® washers eliminate the need for older, more expensive grounding methods while also significantly reducing the amount of labor and materials used in installations.

Here's how it works: When the WEEB® is inserted between the module frame and mounting structure, the teeth of the WEEB® pierce the anodized coating. The result is excellent conductivity without oxidation — bonding the PV module frame with the metal racking structure. Essentially, the module and rail become one singular piece of metal, creating an electrical path to ground.

E-125

### Features & Benefits

- UL 467 Listed
- UL 2703 Recognized; UL 2703 Listed with certain systems
- Corrosion-resistant 304 stainless steel construction
- Reliability for use throughout the lifetime of the PV system
- Rated for outdoor use
- Multiuse
- Custom designs available upon request

## WILEY CABLE CLIPS

Engineered for high-quality wire management solutions, Wiley Cable Clips simplify wire management and create a cleaner aesthetic to solar PV arrays. The clips are made of corrosion resistant stainless steel, which makes for a durable, long lasting and reliable solution in all environments and are designed with coined edges to prevent damage to cable insulation. The designs are easy to install and remove with a flat head screwdriver and can be reused. The clips can be used in a wide variety of mounting configurations (including 90 degree) for module and rail applications. Custom designs are available upon request.

E-132

### Features & Benefits

- UL 1565 Listed
- Accommodates a broad range of cable combinations and sizes (e.g., USE-2, PV, AC module and micro inverter cables)
- Compatible on modules with a flange thickness range of 1.3 to 3mm
- No tools required for installation
- Multiuse capabilities
- Coined edges to prevent damage to cable insulation
- Reliability for use throughout the lifetime of the PV system

## WILEY BUNDLE STRAP

The Wiley Bundle Strap is made of corrosion resistant 304 stainless steel, which makes for a durable, long lasting and reliable solution for all environments. The vinyl jacket covering the 304 stainless steel wire is designed to protect cable insulation from damage. The Wiley Bundle Strap is easy to install and can be crimped in the field with electrician linesman pliers or standard wire cutters. The crimp sleeve's retention feature allows for a quick, effortless, secure installation. Custom lengths available upon request.

E-134

### Features & Benefits

- UL 62275 Listed
- High quality, long-lasting, labor saving, wire management solution
- UV guarded vinyl jacketed 304 stainless steel wire with 304 stainless steel crimp
- Vinyl jacket designed to protect cable insulation from damage
- 304 stainless steel crimp sleeve allows for quick and easy installation
- Can be crimped in the field with electrician linesman pliers or standard wire cutters
- Retention feature allows for a quick, effortless, secure installation
- Lasts for the lifetime of the PV system
- RoHS compliant
- Custom lengths available upon request

### Installing the ACC-FBC with WBS or UNIRAP™ cable tie

The ACC-FBC mounting base slides onto the module flange

Route a WBS or UNIRAP™ through the ACC-FBC mounting base

Secure desired cables by tightening the WBS or UNIRAP™

## INTRODUCTION

BURNDY wiring accessories have been designed to supplement and enhance BURNDY connector selection and use. All have been designed and engineered for easy installation

and long life, reflecting over 85 years of experience and resulting contributions to all aspects of the electrical industry.

## PENETROX™

### HOW TO INSTALL CONNECTORS:

#### 1. Select the right connector.

F-2

Always use an aluminum connector for aluminum or copper conductor. Choose a connector that's marked for the wire size you're using. Never use a copper connector on aluminum conductor.

#### 2. Strip carefully.

Remove the insulation without nicking the wire.

#### 3. Brush thoroughly.

Always wire-brush the stripped portion of the wire. An unplated terminal pad, and the surface to which the terminal will be attached should also be wire-brushed.

#### 4. Apply PENETROX™

For mechanical connectors, apply PENETROX™ joint compound liberally to the conductor to prevent the formation of surface oxides once the connection is made. Also apply PENETROX™ to any terminal pad.

#### 5. Tighten completely.

For mechanical connectors, use wrench or screwdriver to securely tighten the aluminum connectors, as recommended by BURNDY.

#### 6. Crimp.

For compression connectors, choose the right die and the right tool. Insert the wire completely and make the recommended number of crimps.

**TYPES PENETROX™  
A, A-13, E AND HT**

**OXIDE-INHIBITING  
JOINT COMPOUNDS**

PENETROX™ oxide-inhibiting compounds produce low initial contact resistance, seal out air and moisture, prevent oxidation or corrosion, exhibit superior weathering characteristics, are usable over wide temperature ranges, and provide a high conductivity “gas-tight” joint. All PENETROX™ compounds contain homogeneously suspended metal particles. The suspended metal particles assist in penetrating thin oxide films, act as electrical “bridges” between conductor strands, aid in gripping the conductor, improve electrical conductivity and enhance the integrity of the connection.

The specially formulated PENETROX™ compounds are for use with compression and bolted connectors providing an improved service life for both copper and aluminum connections. Additionally, the nontoxic compounds are an excellent lubricant for threaded applications reducing galling and seizing.

**PENETROX™ with brush lid**

All types of PENETROX™ are available in an 8 oz. bottle with a brush lid for ease of application.

**PENACARTRIDGE**

PENACARTRIDGE is a 1 lb. cartridge filled with PENETROX-A. It's designed to fit standard caulking guns for easy insertion into transmission and distribution connectors. Additionally, this packaging design provides a convenient method for applying PENETROX™ to many different applications.

**PENETROX™ A-13**

PENETROX™ A-13 is a synthetic base compound with evenly suspended zinc particles. It is recommended for aluminum to aluminum, aluminum to copper connections plus aluminum conduit threads. It is compatible with rubber, polyethylene and other insulating materials. UL Listed for all voltages.

F-3

**PENETROX™ A**

PENETROX A is a natural (petroleum) base compound with evenly suspended zinc particles. It is recommended for aluminum to aluminum, aluminum to copper connections and aluminum conduit threads. It is not recommended for use with rubber or polyethylene insulated conductors. UL listed to 600V.

**PENETROX™ E**

PENETROX™ E is a synthetic base compound with evenly suspended copper particles. It is recommended for copper to copper, copper threads and all grounding applications. UL Listed.

**PENETROX™ HT**

PENETROX™ HT is a synthetic silicone based compound with evenly suspended zinc particles and nickel-aluminum alloy particles. It is recommended for aluminum to aluminum connections. It is compatible with rubber. Designed for use with High Temperature ACSS and ACCC connectors. Not UL Listed.

**PENETROX™ A, A-13, E AND HT**

**TECHNICAL INFORMATION**

**PENETROX A**

PENETROX A consists of a natural (petroleum) base vehicle in which zinc particles are suspended. For aluminum to aluminum, aluminum to copper applications and aluminum conduit threads. It is not recommended for use with rubber and polyethylene insulated conductors. UL Listed to 600 volts.

**PENETROX A-13**

PENETROX A-13 consists of a non-petroleum base vehicle in which zinc particles are suspended. Recommended for aluminum to aluminum, aluminum to copper applications and aluminum conduit threads. Compatible with insulating materials such as rubber, or polyethylene. UL Listed and recommended for all voltages.

**PENETROX E**

PENETROX E consists of a non-petroleum base vehicle in which copper granules are suspended. Recommended for copper to copper applications, grounding and for use on copper conduit threads. UL Listed to 600 volts.

**PENETROX HT**

PENETROX HT consists of a non-petroleum base vehicle in which zinc and nickel-aluminum particles are suspended. Recommended for use with aluminum to aluminum High Temperature rated ACSS and ACCC conductors. Not UL Listed.

**Easy to apply:**

1. Scratch brush the conductor surfaces until bright and clean.
2. Immediately apply PENETROX™ to the conductive surfaces.
3. For EHV applications, remove all excess PENETROX™ after installation is complete.

**SHELF LIFE**

When stored in its original container in cool (under 100°F) dry environment, PENETROX™ oxide inhibiting compound will remain workable and functional for 5 years from the Date of Manufacture (MO) marked on the container.

**PROPERTIES OF PENETROX™**

Property	Value PENETROX™ Definition	PENETROX™ HT	PENETROX™ E & A13	PENETROX™ A
Penetration (Unworked)	The value in accordance to ASTM D217 indicates the consistency of a grease. The higher the number, the softer the grease.	240	250	230
Dropping Point (Minimum)	The temperature at which the grease passes from the semi-solid to a liquid state under test conditions.	>580° F	350° F	230° F
Pour Point (Maximum)	The lowest temperature at which the compound will flow. Pour point is the lubricant's ability to perform in cold conditions.	-58° F	-40° F	-15° F

\*MSDS sheets available through customer service.

## TYPE BDSC

### Duct Sealing Compound

BURNDY Duct Sealing Compound is permanently pliable and is a non-cracking material which can be painted when necessary for a more aesthetic appearance. A gray, non-toxic, non-corrosive, and non-irritating compound, our duct seal will adhere to most clean, dry surfaces with no adverse effects on plastic or metal materials. There is no reaction when used with bare hands.

Supplied in a convenient block shape overwrapped with release paper, and then bagged into a clear PVC bag (which can be reused and resealed) along with application data. Duct sealing compound is used primarily in the building trades to seal around junction boxes, flashing, and service mast entries.

### Features & Benefits:

- Dough-like material easily shapes to suit any application
- Unlimited shelf life, won't dry out or crack over time; permanent pliable, non-cracking
- May be painted immediately after application for a more aesthetic appearance
- Dielectric strength approximately 100V/mil. using ASTM D149-64
- Non-toxic and non-irritating
- 100% non-volatile solids with non-drying, synthetic polymers with inert mineral fibers
- Tolerance range is 40° F to 194° F; will not sag at 280° F for brief time periods
- Recommended working range during application is 20° F
- Perfect for sealing conduit openings, gaps, and holes against drafts, dust, moisture and noise
- Commonly used in electrical trade to seal around junction boxes, flashing, and service mast entrances

<b>BDSC5</b>	5 lbs.	10 5-lb blocks

TYPES CSB & CSJ

Cold Seal Splice Kits

These cold applied splice sealing products are made of specially formulated silicone rubber and offer excellent insulation and moisture proof sealing for in-line cable connector systems or elbow to cable jacket applications. The rubber sleeves are factory expanded and held over a removable, plastic rip core housing. Installs quickly and easily. Type CSJ also includes a mastic seal. Operating temperature range: -40°C to 105°C. Meets ANSI C119.1-1986.

F-6

Features & Benefits

- Easy, safe installation
- Suitable for a wide range of cable sizes
- UV resistance, thermal stability
- No special tools or training required
- Forms a moisture proof seal
- Superior, time-saving insulation technology
- Indoor and outdoor applications

In-Line Splice Sealing Kits Type CSB - Low Voltage conductor only

TYPE HS-T-PF

THIN WALL HEAT SHRINK TUBING

Cross-Linked Polyolefin

6 Inch Lengths

Type HS-T-PF is a flexible thin wall, flame retardant heat shrink tubing made of cross-linked polyolefin. The 2:1 shrink ratio allows for faster shrink recovery, covering wire sizes: #18 AWG to 300 kcmil. Operating temperatures from -55° C to 135° C with a shrink temperature of 120° C.

Meets SAE-AMS-DTL-23053/5  
600 V

**TYPE HSC-FR**

**VISI-SHRINK™**

Fire Retardant Clear Heat Shrink Tubing

UL Recognized to 600V

Type HSC-FR is a flexible polyvinyl chloride clear heat-shrink tubing. Excellent flame retardant properties and a 2:1 shrink ratio, the VISI-SHRINK tubing enables inspectors to read die index embossments on installed connectors easily. UL Recognized, 105° C, 600V, the operating temperature from -20° C to 105° C with a shrink temperature of 135° C.

**Features & Benefits**

- UL 224, VW-1 Rated
  - ◇ Self-extinguishing flame retardant properties.
- Clear Tubing
  - ◇ Allows inspection of die index embossment and shiner after installation is complete. Should any corrosion occur it will be visible during inspection.
- Low Shrink Temperature
  - ◇ Only requires common hot air guns to apply.
- Meets MIL-M-23053/Z-206C

**NOTES:**

1. Shrink temperature is 135° C (275° F).
2. For best results move heat gun along the length of heat shrink to avoid concentrations.
3. To extend useful life, store material below 70°F.
4. For additional Heat Shrinkable Tubing see "URD" section Type RYAC and RK169-2, RK170-2 in this section.

**TYPE HS-FR**

**THIN WALL HEAT SHRINK**

Fire Retardant  
Heat Shrink Tubing

UL Recognized to 600V

Type HS-FR is a flexible polyvinyl chloride thin wall heat shrink. Offering insulating, color identification and strain relieving properties for terminations and splices. The 2:1 shrink ratio allows for faster shrink recovery, covering wire sizes: #16 AWG to 1000 kcmil. UL Recognized, 105° C, 600V, operating temperatures from -20° C to 105° C with a shrink temperature of 135°.

**Features & Benefits**

- UL 224, VW-1 Rated
  - ◊ Self-extinguishing flame retardant properties.
- Multi-use Tubing
  - ◊ Insulate, strain relief.
- Easy Identification
  - ◊ Available in wide range of colors.
- Low Shrink Temperature
  - ◊ Only requires common hot air guns to apply.
- Meets MIL-M-23053/Z-206C

**How to Order:**

Example: **HSB18FR**

- B** - Black
- BLU** - Blue
- G** - Green
- R** - Red
- W** - White
- Y** - Yellow

**TYPE HSIC - FR**

**HEAVY WALL HEAT SHRINKABLE END CAP**

UL LISTED TO 600V

Type HSIC-FR, Heat Shrink Insulating End Cap Fire Retardant is a heavy wall, fire retardant end cap made of cross-linked thermally stabilized black polyolefin. Used to insulate exposed conductors in energized applications. The 3:1 shrink ratio offers greater range, accommodating copper wire sizes, #8 AWG thru 2500+ kcmil. Performs effectively over lead, aluminum, steel, polyethylene, EPR, and PVC jacketed materials. Blue thermal chromatic lines disappear indicating correct installation temperature and provide inspectability. I.D. adhesive provides superior moisture and weather resistant characteristics.

**Features & Benefits**

- Minimum 28 Oxygen index, UL94-VO rated.
  - ◊ Self-extinguishing flame retardant properties.
- 3:1 shrink ratio
  - ◊ Minimum inventory required.
- Thermal chromatic lines
  - ◊ Indicate proper installation.
- Low shrink temperature, 150°C
  - ◊ Only requires common hot air gun to apply.
- Meets sealing requirements: ANSI-C119.1, UL486D
  - ◊ Weather and moisture resistant.

1. Slide the HSIC-FR end cap onto the cable and hold in place using forefinger or thumb.

2. Beginning at closed end apply heat, blue thermochromatic lines will begin to disappear at 150° C. Gradually, move heat source to open end and around cap. Once lines are no longer visible and adhesive flows out of open end, discontinue heating.

3. HSIC-FR end cap installed on cable.

**TYPE BSC**

**Push-On Cable End Cap  
Containing “Super-Seal”  
Waterproofing Mastic**

Waterproofing seals work instantly and stay in place with tape. The maximum conductors shown in the table are based upon caps that have been stretched when making the installations. The same items can be effectively installed on small conductors since the mastic has adhesive qualities when pressed by firmly pushing the caps against the conductor ends.

**Features & Benefits**

- Effective method for sealing conductor ends and conduit pipe
- Flexible, easy to apply - No tools required
- Waterproof seals work instantly and stay in place without tape
- Super-Seal is non-hardening with no adverse effect on cable insulation
- Easy removal, reusable
- Different colors for each conductor range accommodated
- Material: PVC Rated to 600 Volts
- Packaged in clear bags labeled with size and application data

Close-up of Super-Seal Waterproofing Mastic

F-14

Bagged in clear polyethylene with an information tag. Shelf service life is indefinite since Super-Seal is non-hardening. Super-Seal has no adverse effect on cable insulation.

Additional intermediate sizes and larger sizes through 4.88" O.D. can also be supplied on special orders to specific color codes. Contact factory for information.

**Push On Cable End Caps with Super-Seal**

Catalog Number	O.D. Accommodated (inches)	Color	Length (inches)	Thickness of Super-Seal in cap (inches)
BSC687	0.69 - 0.75	Red	1.50	0.38

BSC250025	2.50 - 2.66	Black	2.50	0.62

**TYPE BPC**

**Force Fit Cable Caps**

BPC caps are sized to provide force fits on the listed diameters of conductors. Caps are color coded as indicated and are packaged in clear polyethylene bags which show size and application data. Caps conform to the conductor shape and will remain in place without using tape. A moisture seal cannot always be assured using this method however. All caps are 1.5" tall.

Additional intermediate sizes and larger sizes through 4.88" O.D. can also be supplied on special orders to specific color codes. Contact factory for information.

**Features & Benefits**

- Simple, fast installation with no tools required
- Accepts wide range of diameters (0.32"-3.6")
- Tight fitting
- Packaged in clear bags labeled with size and application data
- Different colors for each conductor range accommodated
- Material: PVC Rated to 600 Volts

WIREMIKE™

Stainless Steel Wire Micrometer

- Strong, durable, high quality
- Allow for use as both caliper and ruler
- Most formats measures I.D. and O.D. of tubing, thin-wall and rigid conduit including IPS, ACSR, stranded and solid commercial cables

WIREMIKE

F-16

Catalog # WIREMIKE, WIREMIKED and RK1942 are for use on:

ACSR

#6 to 336.4 (26/7) Stranded

Stranded AWG

#18 to 2000 kcmil

Solid

#20 to 4/0 AWG

IPS Tubing (Cu/Al) and Rigid Conduit:

1/4" to 2-1/2"

Tubing Sizes:

3-1/8" inside maximum; 2-15/16" outside maximum

Thin-wall Conduit:

3/8" to 2-1/2"

Variations:

- WIREMIKE** Stainless Steel with inch/fraction markings
- WIREMIKECI** Stainless Steel, no ruler capabilities but may be used for reference on specific completed crimps (see more detail below on WIREMIKECI)
- WIREMIKED** Stainless Steel, decimal markings in place of fraction markings, same capabilities as catalog # WIREMIKE™
- RK1942** Convenience packaging of WIREMIKE (with inch markings) in packaging suitable for hanging on a rack; sold in multiples of 10 only

Catalog # WIREMIKECI is for use on:

Compression Connectors and Splices (including Compression Grounding)

- #18 to 2500 kcmil Copper Class B
- #10 to 4/0 Solid Aluminum / Copper
- #18 to 3500 kcmil Concentric Aluminum
- #8 to 1100 kcmil Compact Aluminum
- #14 to 1111 kcmil Copper DLO

Also used for reference only\* for inspection of completed crimp when using Butting Copper or Aluminum Dies with the 750, 46, 35, or 39 series of tools.

- Copper Dies U8CRT to U44XRT
- Aluminum Dies U8CABT to U39ART-2

Close up for the Die Inspection Section (Used for Reference Only\*) Catalog # WIREMIKECI only

\*WIREMIKECI tool is to provide measurements for reference only, not to confirm the suitability of connection. Customer is responsible to independently verify suitability of connection.

## MISCELLANEOUS ACCESSORIES

### TYPE BHSG1100

### HEAT GUN

250° - 1100° F (121° - 650° C)

Multi-purpose, low cost heat gun has an electronic variable thermal control dial. BHSG1100 meets the requirements of UL. It has a temperature range of 250° - 1100° F (121° - 650° C). 2 speed motor. Built-in safety stand heat guard included. Professional heat gun and accessories are recommended for all of your BURNDY heat shrink applications.

### Available Materials

#### Nylon 6/6 — General Purpose

General purpose nylon 6/6 features light weight, high strength and a wide temperature range. It is halogen free so it does not release dangerous gases, such as chlorine, bromine, fluorine and iodine when burned. Nylon 6/6 is hygroscopic, and therefore, absorbs or releases moisture depending on its environment. Thus, the moisture level of the material will affect tensile strength, stiffness and elongation of the product.

#### Nylon 6/6 — Heat Stabilized

With similar properties and benefits as nylon 6/6, products manufactured with heat stabilized nylon 6/6 material have a chemical stabilizer added for higher continuous temperature applications.

#### Nylon 6/6 — UV Stabilized

Chemical inhibitors are used to give nylon 6/6 material added properties to fight against premature aging of products due to the effects of ultraviolet rays.

#### Nylon 6/6 — UV Stabilized (2% Carbon for Military Specification)

The physical properties of this material include carbon, which acts as a UV stabilizer, prolonging the life of the product under ultraviolet conditions. It also allows cable ties to meet the particular military specification for cable ties.

#### Nylon 6/6 — V0 Flame Retardant

This material meets UL 94V-0 flammability requirements. Flame retardant additives generally reduce tensile strength when compared to general-purpose nylon 6/6, but this resin has been formulated to minimize such effects.

#### Nylon 6/6 — High Impact

Impact modifiers are added to increase flexibility. High impact nylon 6/6 has stable tensile strength due to its reduced influence from moisture. It is excellent for high vibration applications, as within the aircraft and automobile industries and performs better than nylon 6/6 against ultraviolet rays. Good for outdoor use.

#### Polypropylene

Polypropylene is used in environments where chemical effects on nylon are a concern. It is not affected by inorganic acids (hydrochloric), polyhydric alcohols (ethyleneglycol), neutral salts (sodium chloride) and basic salts (sodium bicarbonate). Polypropylene also resists a number of other chemicals with good results, although it has lower tensile strength than nylon 6/6 (about half). Polypropylene has good UV resistance.

#### Nylon 12 — UV Stabilized

Nylon 12 is resistant to chemicals and salts. Ideal for solar applications. Weather resistant grade, produced by the addition of stabilizers to the nylon resin.

#### Stainless Steel

Stainless Steel is used where corrosion, vibration, weathering, and temperature extremes are a concern. May be used for virtually any indoor, outdoor, or underground application. Available in both 304 and 316 Stainless Steel. Also available partially or fully coated with polyester.

\* Elevated temperatures, over time, will affect materials' properties such as tensile strength, stiffness, elongation and appearance.

BURNDY® recommends the evaluation of cable ties in the actual application to determine the suitability of the tie for that application.

UNIRAP™

NYLON CABLE TIES

UNIRAP™ cable ties are fabricated of one piece Nylon with no metal parts. The straps are tough, resilient, lightweight and abrasion resistant. They offer high tensile strength and are chemically resistant to solvents, alkalies, oils, grease and diluted acids. Self-locking, they secure without twisting or leaving sharp projections.

Compact heads and pre-bent tips facilitate cable bundling in a minimum of time and space. UNIRAP™ cable ties are designed for both field and production line use and may be installed easily by hand.

BURNDY® cable ties consist of three components: strap, head, and tail. These components are specifically designed to function together to make BURNDY® UNIRAP™ cable ties superior in quality and performance. Shelf life of 5 years, when stored in original packaging.

Component

Precision Engineering

Enhanced Performance

1. Includes load bearing **serrations**.
2. Features **flats** between the serrations.
3. Features the **double outer rail system**.

1. Serrations provide complete adjustability within the fastening range.
2. Flats reduce stress concentrations and help make the tie stronger.
3. Smooth rails promote low drag, as well as minimize chafing.

4. The **pawl** is integrally formed with the head.
5. The **pawl** is stepped in order to wedge against the serrations in the strap to form the lock.
6. The **shoulders**, or the sides of the head, guide the strap and prevent it from disengaging from the pawl during loaded conditions.
7. The **back** supports the strap during the wedging of the lock formation.

4. The locking unit will not disengage. It also promotes low insertion with high pull out force for very easy installation.
5. The tie's ultimate strength achieves optimum levels.
6. Promotes cable tie strength, endurance and longevity.
7. Ensure optimum locking capability.

8. Features a **bent tip**.
9. Includes a **ribbed grip**.

8. Easy pick-up for installers, which leads to fast assembly.
9. Allows for easy, no-slip grip.

## Nylon 6/6 Standard Cable Ties

### UNIRAP™ Standard Cable Ties

#### Type CT

General purpose nylon 6/6 features light weight, high strength and a wide temperature range. It is halogen free so it does not release dangerous gases, such as chlorine, bromine, fluorine, or iodine when burned. Nylon 6/6 is hydroscopic, and therefore absorbs or releases moisture depending on its environment. Thus, the moisture level of the material will affect tensile strength, stiffness, and elongation of the product.

**UNIRAP™ Heat Stabilized Cable Ties**

Type CTHS

With similar properties and benefits as nylon 6/6, products manufactured with heat stabilized nylon 6/6 material have a chemical stabilizer added for higher continuous temperature applications. Range up to 225° F.

- Good fatigue resistance
- Resistant to chemicals
- Higher temperature range
- Meets the requirements of UL94V-2 flammability rating

## Nylon 6/6 Type CTB Cable Tie Mounting Bases

### UNIRAP™

#### Type CTB STANDARD CABLE TIE MOUNTING BASES

BURNDY® offers a wide variety of mounting bases suited for many applications. Mounting bases are used in conjunction with cable ties to stabilize and secure wire bundles, both indoors and outdoors. Mounting bases can be secured to a surface using rubber based adhesive, acrylic adhesive, or also can be screw mounted.

The Rubber Adhesive has an operating temperature range from 14°F/-10°C to 140°F/60°C; Acrylic Adhesive has a temperature range of 14°F/-10°C to 176°F/80°C. When using the screw mounting option ONLY (not using any adhesive to secure the base) the product has a temperature range of -40°F/-40°C to 185°F/85°C.

These mounting bases are available to accommodate CT18 through CT50 series cable ties. Insertion of ties can be made from all sides. Each mount may be secured with screws, adhesive backing, or both, for ease of application and stability. For applications where higher temperatures, certain chemicals, or UV radiation are a concern and an adhesive is the preferred method for securing, the acrylic adhesive mounting bases are recommended.

UNIRAP™ Cable Hangers

Type CH

Cable hangers provide a contact area range of 1/2" to 3/8" in width. All contact edges have a full radius for product protection, and sizes are clearly marked on each clamp.

Cable hangers are injection molded. Available in white and black nylon 6/6.

G-15

## Nylon 6/6 Type CT-SSB Stainless Steel Barb Cable Ties

### UNIRAP™ Stainless Steel Barb Cable Ties

#### TYPE CT-SSB

The Stainless Steel Barb cable ties (Type CT-SSB) are nylon 6/6 with self-locking stainless steel barbs featuring an oval low-profile head. There are no sharp edges helping prevent damaged cables. CT-SSB ties have a curved tip for faster initial threading to help speed installation and a no slip tail for easy grip during tensioning. CT-SSB ties are currently available in Natural and UV Black. These cable ties are cULus Listed for Wiring Positioning devices.

Type 21

G-16

#### Features & Benefits

- Nylon 6/6 Standard
- Self-locking stainless steel barb
- Available in UV Black and Natural
- Maximum strength and adjustability for versatility
- Chemically resistant to solvents, oils, grease, and diluted acids
- Rounded edges and bent tail for easy installation
- Safe for air handling spaces
- Plenum rated

## Nylon 6/6 Type CT-UG Cable Ties

### UNIRAP™ Cable Ties

#### TYPE CT-UG

General purpose nylon 6/6 features light weight, high strength and a wide temperature range. It is halogen free so it does not release dangerous gases, such as chlorine, bromine, fluorine or iodine when burned. Nylon 6/6 is hygroscopic, and therefore, absorbs or releases moisture depending on its environment. Thus, the moisture level of the material will affect tensile strength, stiffness and elongation of the product.

#### Features & Benefits

- Nylon 6/6 Standard
- Available in UV Black and Natural
- One piece injection molded
- Maximum strength and adjustability for versatility
- Chemically resistant to solvents, oils, grease, and diluted acids
- Rounded edges and bent tip for easy installation
- Self-Locking

## Nylon 6/6 Type CT-MH-UG Mounting Hole Cable Ties

### UNIRAP™ Cable Ties

#### TYPE CT-MH-UG

The CT-MH-UG Cable Ties use the same material and have the same benefits of our CT-UG Cable Ties with the addition of a mounting hole. General purpose nylon 6/6 features light weight, high strength and a wide temperature range. It is halogen free so it does not release dangerous gases, such as chlorine, bromine, fluorine or iodine when burned. Nylon 6/6 is hydroscopic, and therefore, absorbs or releases moisture depending on its environment. Thus, the moisture level of the material will affect tensile strength, stiffness and elongation of the product.

#### Features & Benefits

- Nylon 6/6 Standard
- Available in UV Black and Natural
- One piece injection molded
- Maximum strength and adjustability for versatility
- Chemically resistant to solvents, oils, grease, and diluted acids
- Rounded edges and bent tip for easy installation
- Self-Locking

**VELCRO® Hook and Loop Straps**

**TYPE TFV-B**

Reusable and flexible, hook and loop straps are a unique self-gripping fastening system. These ties are specifically used on fiberoptic applications.

The TFV-V2 flame retardant straps are UL Listed Wire Positioning Devices (ZODZ), UL94-V2 rated for use in air handling spaces in accordance with the NEC Section 300-22(c) and (d). Perfect for plenum areas.

25 straps are conveniently packaged in each polybag.

## Grade 304 Stainless Steel Uncoated Type CTSS Cable Ties

### UNIRAP™ Grade 304 Stainless Steel Uncoated

#### Type CTSS

BURNDY® 304 Stainless Steel ties are designed to secure hoses, cables, poles, pipes, and more when harsh environmental conditions may adversely affect the bundling application.

Used where corrosion, vibration, weathering, radiation, and temperature extremes are a concern. BURNDY® Stainless Steel ties can be used in virtually any indoor, outdoor, and underground application.

These Stainless Steel ties are made from Grade 304 Stainless Steel. Designed with a low profile clamping bearing head with fully adjustable strap accommodating many bundle diameters.

#### Features & Benefits

- Meet the requirements of ABS
- 304 Grade Stainless Steel
- Suitable for general purpose applications
- Smooth, rounded edges help ensure safe, efficient handling
- Available in a variety of lengths and widths
- Self-locking steel ball design speeds installation and locks into place at any length
- Provides a strong durable method of cable bundling
- Flame retardant and non-toxic for applications where safety from fire is critical

**UNIRAP™ Grade 304 Stainless Steel Partially Coated**

**TYPE CTSS-PC**

BURNDY® Stainless Steel Partially Coated cable ties (Type CTSS-PC) are designed with a steel ball self-locking mechanism. There are no sharp edges which prevents damaged cables. These ties have smooth, rounded edges and polyester coating which add to the safety of the installer. High tensile strength along with the shield of the polyester coating offer a reliable and lasting bundling solution. CTSS-PC ties are currently available in black. BURNDY® Stainless Steel Partially Coated Cable Ties can be used in any indoor, outdoor, or underground application.

**Features & Benefits**

- Meet the requirements of ABS
- 304 Grade Stainless Steel
- Available in Black only
- Suitable for general purpose applications
- Smooth, rounded edges along with the polyester coating add to the safety of the installer
- Self-locking steel ball design speeds installation and locks into place at any length
- Provides a strong, durable method of cable bundling
- Available in a wide range of lengths and widths
- Halogen free low smoke polyester coating

## Grade 304 Stainless Steel Fully Coated Type CTSS-FC Cable Ties

### UNIRAP™ Grade 304 Stainless Steel Fully Coated

#### Type CTSS-FC

The Stainless Steel Fully Coated cable ties (Type CTSS-FC) are designed with a steel ball type locking mechanism. There are no sharp edges which prevents damaged cables. These ties have smooth, rounded edges and polyester coating which add to the safety of the installer. High tensile strength along with the shield of the polyester coating offers a reliable and lasting bundling solution. Type CTSS-FC ties are currently available only in black. BURNDY® stainless steel fully coated cable ties can be used in any indoor, outdoor, or underground application.

#### Features & Benefits

- Meet the requirements of ABS
- 304 Grade Stainless Steel
- Available in Black only
- Suitable for general purpose applications
- Smooth, rounded edges along with the polyester coating add to the safety of the installer
- Self-locking steel ball design speeds installation and locks into place at any length
- Provides a strong, durable method of cable bundling
- Available in a wide range of lengths and widths
- Halogen free low smoke polyester coating

**UNIRAP™ Grade 316 Stainless Steel Uncoated**

**TYPE CTSS**

BURNDY® Stainless Steel ties (Type CTSS) are designed to secure hoses, cables, poles, pipes, and more when harsh environmental conditions may adversely affect the bundling application. Used where corrosion, vibration, weathering, radiation, and temperature extremes are a concern, BURNDY® Stainless Steel ties can be used in virtually any indoor, outdoor, and underground application.

BURNDY® Stainless Steel ties are made from Grade 316 Stainless Steel. This tie is designed with a low profile clamping bearing head with fully adjustable strap accommodating many bundle diameters.

**Features & Benefits**

- Meet the requirements of ABS
- 316 Grade Stainless Steel
- Suitable for rigorous corrosive conditions
- Smooth, rounded edges help ensure safe efficient handling
- Available in a wide range of lengths and widths
- Self-locking steel ball design speeds installation and locks into place at any length
- Provides a strong, durable method of cable bundling
- Flame retardant and non-toxic for applications where safety from fire is critical

## Grade 316 Stainless Steel Partially Coated Type CTSS-PC Cable Ties

### UNIRAP™ Grade 316 Stainless Steel Partially Coated

#### Type CTSS-PC

The Stainless Steel Partially Coated cable ties (Type CTSS-PC) are designed with a steel ball type locking mechanism. There are no sharp edges which prevents damaged cables. These ties have smooth, rounded edges and polyester coating which add to the safety of the installer. High tensile strength along with the shield of the polyester coating offers a reliable and lasting bundling solution. Type CTSS-PC ties are currently available only in black. BURNDY® stainless steel partially coated cable ties can be used in any indoor, outdoor, or underground applicaiton.

#### Features & Benefits

- Meet the requirements of ABS
- 316 Grade Stainless Steel
- Available in Black only
- Suitable for rigorous corrosive conditions
- Smooth, rounded edges along with the polyester coating add to the safety of the installer
- Self-locking steel ball design speeds installation and locks into place at any length
- Provides a strong, durable method of cable bundling
- Available in a wide range of lengths and widths
- Halogen free low smoke polyester coating

## WILEY Bundle Strap - Wire Management Bundle Strap

### WILEY Bundle Strap Wire Management Bundle Strap Solutions

The WILEY Bundle Strap is made of corrosion resistant 304 stainless steel, which makes for a durable, long lasting and reliable solution in all environments. The vinyl jacket covering the 304 stainless steel wire is designed to help protect cable insulation from damage. The WILEY Bundle Strap is easy to install and can be crimped in the field with electrician linesman pliers or standard wire cutters. The crimp includes a retention feature that allows for a quick, effortless, and secure installation. Custom designs available upon request.

#### Features & Benefits

- High quality, long-lasting, labor savings, wire management solution
- UV guarded vinyl jacketed 304 stainless steel wire with 304 stainless steel crimp
- Vinyl jacket designed to help protect cable insulation from damage
- 304 stainless steel crimp sleeve allows for quick and easy installation
- Can be crimped in the field with electrician linesman pliers or standard wire cutters
- Retention feature allows for a quick, effortless, secure installation
- Lasts the lifetime of the PV system
- RoHS compliant
- Custom Solutions available upon request

**Cable Tie Tools**

Types MK, CTT, and CTTSS

Ergonomics and the prevention of repetitive motion injuries, coupled with the need to continually improve assembly efficiencies and procedures, are a major concern with most cable tie users. BURNDY® cable tie tools effectively address both issues. BURNDY® has world class cable tie tools to complement its line of quality cable ties. These tools are truly state-of-the-art both in design and performance.

BURNDY® tools make it easier for operators to install cable ties, while maintaining correct tension and flush cut-off. Worker safety is further enhanced as the tools can eliminate the sharp edges of a cut-off cable tie.

**MECHANICAL (BOLTED) TAP CONNECTORS**

The BURNDY line of mechanical tap connectors is the most complete, dependable and economical available. These mechanical connectors consist of service, parallel, and midspan types.

Generally the alloys and hardware used depend on whether the connector is for a strain or current carrying application, and is made of aluminum or copper. Particular alloys and hardware are selected for strength, conductivity, durability, ductility and resistance to corrosion.

In a copper connector, high strength alloys are used in mechanical clamping components and high conductivity alloy in current carrying elements.

Aluminum clamp type connectors are made of alloy 356, which is impervious to stress corrosion. In its heat-treated state, it has high strength and

is used for both current carrying and clamping elements.

Hardware is high strength and corrosion-resistant. In copper connectors, DURIMUM™, a silicon bronze alloy, is used. Anodized aluminum alloy 2024-T4 bolts and 6061-T6 nuts are used in aluminum connectors. They provide the best combination of strength, resistance to galling and corrosion, and their thermal coefficient of expansion is most suitable for aluminum. To insure dependable connections, bolts should be tightened to the recommended torque values shown in the specific product table or in the table below.

These mechanical tap connectors are mainly used in overhead distribution systems to provide primary service taps and/or secondary service drop connections to the end users.

A few of the key features and benefits of these connectors are:

**Features and Benefits**

- High strength alloys
  - ◇ Provides efficient and reliable performance
- Range taking
  - ◇ Accommodates a large range of conductors in either groove reducing inventory to a minimum
- Matched groove designs
  - ◇ Ensures maximum contact with conductors accommodated
- Hex bolts, nuts and washers
  - ◇ Provides high contact pressure and rapid assembly

H-3

### TYPES KS & KS-3

#### SERVIT®

**ACCOMMODATES:** COPPER,  
COPPERWELD

**MATERIAL:** COPPER

Compact, high strength, high copper alloy SERVIT® split-bolt has free-running threads and easy to grip wrench flats. Highly resistant to season cracking and corrosion, the SERVIT® provides maximum pressure and assures a secure connection on all combinations of run and tap conductors. Type KS-3 accommodates 3 maximum size conductors.

H-4

▲ Listed torque values are for maximum conductor combinations accommodated. Consult UL486 Tables 7-4, 7-5, 7-6 for smaller conductor combinations.

See note page A-2

\* Not UL Listed or CSA Certified.

† In addition to UL Listed for wire connectors and CSA Certified, these items are also UL rated for direct burial.

To ensure proper tightening torque use BURNDY® BTW Torque Wrenches.

**TYPE SC**

**SERVIT® COVER**

**HUG-A-BUG**

Used indoors or outdoors this compact, one-piece plastic SERVIT® cover, saves time and material, eliminates costly taping of split-bolts. Positive latch snaps easily and quickly over connector, ideal for tight quarters. Self positioning plastic fingers wrap around wires fully insulating joint. UL Listed for 600 volt indoor application. Three covers accommodate a range of 6 SERVIT® sizes through 2/0 Str.

Catalog Number	Conductor Range				*For Use with	For Use with

\* UL Listing of Type SC Cover applies to use on BURNDY® SERVIT® Type KS and to equivalent split-bolt connectors indicated strip length is maintained,

maximum indicated conductor sizes are not exceeded, and connector is properly located within recess provided for it.

**TYPE KSU**

**UNIVERSAL SERVIT®**

**ACCOMMODATES:** COPPER, COPPERWELD, AAC, ACSR, AAAC AND STEEL

**MATERIAL:** COPPER (TIN PLATED)

Tin-plated, high strength copper alloy SERVIT® with spacer. Spacer separates dissimilar conductors and provides long contact length that prevents high pressure point contacts between run and tap conductors. Use of PENETROX™

joint compound recommended with Aluminum and ACSR to limit oxide growth and increase life of connection. To ensure proper tightening torque use BURNDY® BTW Torque Wrenches.

## TYPE KVS

### OKLIP™

**ACCOMMODATES:**  
COPPER, COPPERWELD

**MATERIAL:** COPPER

Compact, two-piece, high strength; high copper alloy BURNDY OKLIP™ recommended for heavy duty connections. Neoprene rings hold bolts in place during installation. Installed with ordinary wrench.

H-6

Catalog Number	Conductor					Recommended Tightening Torque (in-lb)	Wrench Size (Cross flats)

## TYPE KVSW

### OKLIP™

**ACCOMMODATES:** COPPER,  
COPPERWELD

**MATERIAL:** COPPER

Similar to OKLIP™ Type KVS except for high copper alloy spacer that separates run and tap conductor. Provides high contact pressure, confines conductor strands, and assures vibration proof connection. Longer peened bolt, permits swivel action for easier installation.

Catalog Number	Conductor		Wrench Size (Cross Flats)	Torque in - lb
	Run	Tap		
KVSW26	2 Str. - 2/0 Str.	6 Sol. - 2/0 Str.	1/2	180
KVSW28	1/0 Str. - 4/0 Str.	6 Sol. - 4/0 Str.	9/16	250

To ensure proper tightening torque use BURNDY® BTW Torque Wrenches.

**TYPE KVSU**

**UNIVERSAL OKLIP™**

**ACCOMMODATES:** COPPER,  
COPPERWELD, AAC†, ACSR†, AAAC

**MATERIAL:** TIN PLATED COPPER

Compact, high strength, tin-plated copper alloy two-piece connector with spacer and tin-plated silicon bronze DURIMUM™ hardware. Recommended for heavy duty connections. Spacer separates dissimilar conductors and provides long contact length. Neoprene ring prevents loss of shorter bolt during installation. Longer peened bolt permits swivel action for easier installation.

Use of PENETROX™ joint compound recommended with aluminum and ACSR.

To ensure proper tightening torque use BURNDY® BTW Torque Wrenches.

## TYPE KVS-A

### OKLIP™

**ACCOMMODATES:** COPPER, COPPERWELD, AAC†, ACSR†, AAAC

**MATERIAL:** ALUMINUM

Three-piece, high-conductivity, non-copper bearing aluminum alloy connector with thick spacer and aluminum hardware. Hardware in KVS26A and KVS28A is stainless steel. Recommended for heavy duty dissimilar metal applications. Spacer separates conductors and provides long contact length. Belted entrances prevent chafing and permit easier assembly of conductors. Longer, peened bolt, permits swivel action for

easier installation. Neoprene ring prevents loss of shorter bolt. PENETROX™ joint compound recommended with aluminum and ACSR.

**TYPE VG**

**WISEIT™ Connectors**

**ACCOMMODATES:** COPPER

**MATERIAL:** COPPER

Copper VISEIT™ connectors are easy to install and will not swivel. The interlocking will not rotate out of the body. Supplied with hex head bolts, VG1 has a slotted hex bolt.

**Features & Benefits**

- Single tool installation
  - ◇ Keeps other hand free to contain conductors.
- Compact profile after installation
  - ◇ Facilitates laping and alignment with conductors.
- Accomodates a wide range of conductors
  - ◇ Minimizes number of connectors required.
- Side installation of conductors
  - ◇ Eliminates having to seperate pieces during installation.
- Copper alloy body design
  - ◇ Provides combination of strength and corrosion resistance

H-9

Catalog Number	Conductor Range ①		A	B	C	Bolt Head (Hex.)	Recommended Torque (In-Lb)
	Max. 2 Conductor	Min. 2 Conductor					
VG1 ②	6 Sol.	10 Sol.	0.94"	0.63"	0.75"	3/8" (Slotted)	110 lbs/in

† Accommodates compact and compressed conductors within diameter range. To ensure proper tightening torque use BURNDY® BTW Torque Wrenches. Torque values are for max. conductor sizes.

H-10

### TYPE UC-K

#### UNIVERSAL PARALLEL GROOVE CLAMP

##### ACCOMMODATES: COPPER,

COPPERWELD, AAC, ACSR, AAAC  
AND STEEL

##### MATERIAL: COPPER (TIN PLATED)

Interlocking finger design accommodates large range of conductor sizes. Tin-plated, cast of high copper alloy and clamped with silicon bronze DURIUM™ bolt, PENETROX™ joint compound recommended with ACSR. Applications include grounding for the Cable TV industry.

**TYPE CP-A**

**PARALLEL GROOVE CLAMP**

**ACCOMMODATES:**

COPPER, COPPERWELD,  
AAC†, ACSR, AAAC AND STEEL

**MATERIAL:** ALUMINUM (cast),  
Aluminum Hardware

Type CP-A is recommended for tap or parallel connections. High strength, high conductivity aluminum body and hardware provide corrosion resistant assembly. Long contact surface insures excellent contact and full conductivity. PENETROX™ joint compound recommended for all combinations.

## TYPE VP

### PARALLEL GROOVE CLAMP

ACCOMMODATES: COPPER

MATERIAL: COPPER

Multiple V-bolt connector especially suited for flexible or extra flexible conductors. Made of high strength, high conductivity copper. Clamping elements accommodate a range of conductor sizes in either groove. V-bolts provide high pressure and

compress the conductor over long contact area. Also recommended for jumper connections.

Catalog Number	Groove A	Groove B	Dimensions			Wrench Size (Cross flats)	Torque in - lb

H-12

## TYPE UW-R

### CLIPIT™

### DEAD END CLAMP

ACCOMMODATES:  
AAC†, ACSR†, AND AAAC

MATERIAL: ALUMINUM (Cast)

High strength aluminum casting with galvanized steel U-bolt, extra long aluminum spacer, and caps that confine strands. Holding strength of installations using two CLIPIT™ deadends

exceeds rated breaking strength of conductor. Use of PENETROX™ joint compound is recommended.  
**RUS Accepted**

## TYPE QPX

### VERSITAP™

**ACCOMMODATES:**  
COPPER, COPPERWELD

**MATERIAL:** COPPER

The VERSITAP™ Type QPX is recommended for Tee, Cross, Parallel, Butt and Tap connections. Range-taking, only 10 connectors required to accommodate conductor sizes from #6 Str. to 1000 kcmil. Edges are rounded for easy taping. Made of high strength, high-conductivity copper alloy and silicon bronze DURIMUM™ hardware.

## TYPES UCG-R & UCG-RS

### TAPIT™ PARALLEL CLAMP

**ACCOMMODATES:** COPPER, AAC†, ACSR†, AAAC

**MATERIAL:** ALUMINUM

**RUS Accepted**

Multiple purpose parallel groove clamp made of high strength, high conductivity, non-copper bearing aluminum alloy. Properly proportioned to minimize stress corrosion and deterioration by galvanic action.

Interlocking fingers on connector body halves prevent mismatching. Square shank, hex head, round collar, high strength galvanized steel bolt allows one or two-wrench installation.

Also supplied pre-filled with PENETROX™ joint compound and Stripsealed to limit oxide growth and to increase the life of the connection.

Catalog Number		Groove A		Groove B		Dimensions				Wrench Size	Torque In-lb
With Stripseal	Without Stripseal	Copper & Aluminum†	ACSR†, 6201, & 5005	Copper & Aluminum†	ACSR†, 6201, & 5005	L	H	J	W

\* Maximum recommended combinations: 1/0 Aluminum or ACSR Run - #2 Str. Copper Tap; 1/0 Copper Run - 1/0 Aluminum or ACSR Tap.  
† Accommodates compact and compressed conductors within diameter range.

\*\* Supplied with galvanized steel, square shank bolt.  
Not recommended for copper to copper applications. Use a copper connector to increase connection life.

For proper installations use BURNDY® BTW Torque Wrenches.

H-16

## TYPES UC-R & UC-RS

### TAPIT™ PARALLEL CLAMP

**ACCOMMODATES:** COPPER, AAC†, ACSR†, AAAC

**MATERIAL:** ALUMINUM

**RUS Accepted**

High strength, high conductivity, non-copper bearing aluminum alloy, properly proportioned to minimize stress corrosion and deterioration by galvanic action.

Keying tabs on connector body halves prevent mismatching. Square shank, high strength galvanized steel bolt allows one wrench installation.

Also supplied pre-filled with PENETROX™ joint compound and Stripsealed.

Catalog Number		Groove A		Groove B		Dimensions				Wrench	Torque

\* Maximum recommended combinations: 4/0 Aluminum or ACSR Run - #2 Str. Copper Tap.  
† Accommodates compact and compressed conductors within diameter range.

Not recommended for copper to copper applications. Use a copper connector to increase connection life.

For proper installations use BURNDY® BTW Torque Wrenches.

**TYPE UCT  
FASTAP™ with  
Lineman Assist™**

**ACCOMMODATES:** AAC, AAAC,  
ACSR, ACAR, Messenger Guy and  
Copper Conductors

**MATERIAL:** Aluminum  
Galvanized steel hardware

The BURNDY FASTAP™ with Lineman Assist™ utilizes a spring system that acts as a third hand to assist in installation. This system helps secure the tap conductor while installing on Primary, Secondary, and service applications. Duck bill handle simplifies installation by providing a handle to easily hold the connector while wearing dielectric gloves. Conductor side entry facilitates installation and helps keep inhibitor in the connector. Strip sealed and prefilled with PENETROX™ joint compound to limit oxide growth and increase the life of the connection.

**FASTAP™ COVER**

For Selected UCT and UCG Tap Connectors

High density Polyethylene cover accommodates all FASTAP™ connectors and select UCG connectors. One piece design. Simply slip over the connection and snap shut. Supplied in black.

**UCTCOVER** for use with all styles of:

- UCT26
- UCT32
- UCT26RS
- UCT32RS
- UCG32RS
- UCG26RS

### TYPE LSC

### CATCHER

**ACCOMMODATES:**  
AAC AND ACSR PRIMARY  
COVERED CONDUCTOR  
(TREE WIRE)

**MATERIAL:** ALUMINUM (cast)

Cast aluminum lightning shield clamp with a galvanized steel eye bolt for use on covered aluminum and ACSR primary overhead distribution conductors ("Tree Wire").

They are designed to protect the "Tree Wire" from burn-down causing service interruption during high lightning activity. For further application details contact the factory.

Conductor groove is pre-filled with PENETROX™ A13, which is compatible with cable insulation and individually bagged.

- ① Approx. assembly length over eyebolt with cable clamped. Also approx. eyebolt position when shipped.
- ② Assembly can be installed using a shotgun hotstick as shown. Assembly instructions are supplied with each connector.

## COMPRESSION TAP CONNECTORS

The BURNDY line of compression connectors are wide range-taking; accommodate copper, aluminum and ACSR; are easy to install; and are dependable and economical. They are designed to be installed with BURNDY® “matche” hand, hydraulic, and power-driven hydraulic tooling. The connector line consists of C-shaped, Figure 3, Figure 6-shaped, and HYCRIMP™ tap connectors, disconnectable T-taps, terminals and stirrups.

The copper CRIMPIT™ is a range-taking, reversible, C-shaped compression tap connector for combinations of copper conductors. Twelve connectors take tap combinations from #10 AWG through 4/0, and all sizes are installed with dies that also install aluminum connectors. Sizes accommodating conductors up to #2 may be installed with the MD6 and OUR840 family of tools. All sizes may be installed with the Y35 or Y750 family of tools. They make “hot” installation easy by permitting the lineman to grip the CRIMPIT™ in the compression tool and then place it on the line. The tap is then inserted and the CRIMPIT™ is compressed. Massive C-shape forces tap and line conductors together to form dependable, low-cost, low-resistance connections.

The CABLELOK™ CRIMPIT™ is a range-taking universal and reversible, Figure 3-shaped aluminum compression tap connector with an adjustable spacer which separate the conductors. It accommodates combinations of copper, aluminum, and ACSR conductors from #6 up to 4/0, and is installed with the common O and D3 dies. The broad range capacity of each CABLELOK™ CRIMPIT 2 reduces the number of connectors required and simplifies connector selection.

The spacer holds the run or tap in place permitting the lineman either to approach the line with the connector held in the tool and with the tap in the connector, or to assemble the connector and tap on the line and then bring up the tool to crimp.

Each CABLELOK™ CRIMPIT™ is pre-filled with PENETROX™ joint compound and individually bagged. These packages are clearly marked with the entire conductor range of the connector as well as pertinent tooling information. The open side of the CABLELOK™ CRIMPIT™ makes “hot” installations easy by allowing the connector to be carried to the energized line in the crimping tool (MD6, Y35, or Y750 families hot-line types).

The Figure 6-shaped aluminum compression tap connector is one of the widest range-taking compression tap connectors available. It accommodates copper, aluminum, or ACSR conductors in very broad ranges. Only four connectors are required to accommodate a range from #6 to 600 kcmil. This broad range is made possible by the long ram stroke of the Y35 and Y750 family of tools.

HYCRIMP™ compression tap connectors accommodate ACSR, stranded copper or aluminum, solid copper or aluminum, and compact conductors. Seventeen sizes are available to accommodate all conductors from #6 solid to 954 kcmil compact. All HYCRIMP™ connectors can be installed with industry standard O, D, N and R dies. Each connector is factory-filled with BURNDY® PENETROX™ joint compound, and individually boxed for ease of handling, identification, and installation.

The BURNDY® line of disconnectable T-taps and jumper loop slices offer an economical approach to sectionalizing or isolating equipment on energized lines. They combine the best features of compression and mechanical connectors. The pads can be easily assembled or separated from each other with hot-line tools.

The STIRRUP™ combines a compression C-shaped Figure 6-shaped or H-shaped element for the run conductor, and a factory installed bail which accommodates a hot-line clamp. The line element can be gripped in the tool and carried to the line and then crimped.

**Note:** Aluminum bodied compression tap connectors are not recommended for making copper to copper connections. Two connectors are recommended when feeding a line in both directions.

H-27

### 3 Simple Selection Steps for BURNDY® HYCRIMP™ and LOKTAP™ Compression Tap Connectors:

1. Follow down from the smaller wire.
2. Go across from the larger wire.
3. Intersection of the two shows the proper connector.

**Example:**

#2 ACSR to #1/0 Stranded would fall in Zone 2; Catalog Number: YHO150 (HYCRIMP™) or YHO2 (LOKTAP™)

**NOTE:**

The PATMD68LI (Lithium-Ion battery), PATMD6814V (Nickel-Metal Hydride battery) or the MD6-8 hand-operated tool all feature permanent "O" and "D3" die grooves to crimp all connectors on this page!

H-28

**TYPES YHO & YHD**

**HYCRIMP™**

**Accommodates:** Aluminum (STR, Compressed, Compact) Copper, ACSR, AACR and Steel

**Material:** Aluminum

Wide range, universal and reversible figure H shaped aluminum connector. Conductors are separated by the shape of the connector. Bendable

**RUS Accepted**

tabs secure both run and tap conductors freeing the lineman's hands to work with the installation tool. Massive aluminum design minimizes corrosion due to galvanic corrosion. Prefilled with

PENETROX™ joint compound and strip sealed to limit oxid growth and increase the life of the connection. Individually packaged and conductor ranges and tooling clearly printed on connector and package.

\* HYCRIMP™ connectors can be installed with competitive R dies.

\*\* Die Index S-T and S-Z may also be used on sizes 700 - 900 only. S-KR required for 950 and S-Z.

For faster installations use BURNDY® PATRIOT® family of battery tools. Not recommended for copper to copper applications. Use a copper connector to increase connection life.

LOKTAP™

LOKTAP™ compression connectors are high quality, range-taking devices which accommodate combinations of aluminum to copper, and aluminum to aluminum conductors. BURNDY seven connector program accommodates a conductor range from #6 Sol. to 4/0 ACSR. In addition, LOKTAP™ products feature a “C” groove on both sides of the connector for use in street lighting applications from #14 Sol. to #10

Sol. LOKTAP™ connectors are designed to be installed with BURNDY mechanical or hydraulic tools and matching O and D3 die set.

① See page H-27 for Seven Connector Selector Chart.  
 ② PERMANENT DIES IN TOOL INSTALL ALL SIZES.  
 ③ “C” grooves accommodate #10 Sol. - #14 Sol. range, .116”-.064”. No “C” grooves on Cat. #YHO125. When utilizing “C” groove(s) apply PENETROX™ A13 prior to wire installation. If utilizing two (2) “C” groove taps, installation to be made with HYDRAULIC TOOL ONLY. All four (4) grooves CANNOT be utilized if using a hand tool. When hand tool is used, only one (1) “C” groove can be used; connector MUST be positioned as shown in drawing.

## Compression Tap (Disconnectable)

**BURNDY®**

### TYPE YTA-R-2N

#### DISCONNECTABLE T-TAP (WITH PAD)

**ACCOMMODATES:** COPPER, AAC  
(STR, COMPRESSED, COMPACT),  
ACSR AND AAAC

Fig. 1

Fig. 2

#### MATERIAL: ALUMINUM

Aluminum primary T-tap connector with slotted tap pad designed for easy disconnecting of tap conductor. Tap pad accommodates compression terminals Types YKA-R-2N and YKA-A-2N, and has positioning socket for proper alignment. On sizes larger than 336.4 ACSR, the YTA-R-2N run element has two piece interlocking key with lifting eye that simplifies hotline installations. Catalog number does not include mating terminal.

### TYPE YCB-R

### STIRRUP™ HOT-LINE CLAMP ADAPTERS

**ACCOMMODATES:**  
AAC (STR, COMPRESSED,  
COMPACT), ACSR AND AAAC

**MATERIAL:** ALUMINIUM,  
TIN PLATED COPPER BAIL

Permanent compression hot-line clamp adapter with aluminum run and copper bail. Accommodates any standard copper hotline clamp on bail elements. Permits hot-line tapping without arcing or chafing damage to aluminum conductor. Installed with standard tools and dies. Prefilled with PENETROX™ joint compound and stripsealed to limit oxide growth and to increase the life of the connection.

TYPE YE-LH

HYSEALPLUG™

ACCOMMODATES: COPPER

MATERIAL: COPPER

TENSION RATING:  
ANSI C119.4 CLASS 3  
(NON TENSION)

Oil and water-tight terminal with shrouded, tin-plated, copper barrel and brazed plug. Recommended for terminating insulated copper conductor at cutout, transformer and arrestor; or for joining insulated copper riser to overhead conductor. Shroud prevents seepage of water or moisture into conductor strands and minimizes taping. To obtain a tight fit on some insulations in the shroud it may be necessary to either "pencil" the insulation down, or build it up with tape.

TYPES YE-R, YE-W

HYPLUG™

ACCOMMODATES: AAC (STR, COMPRESSED), ACSR AND AAAC

MATERIAL: ALUMINUM

TENSION RATING:  
ANSI C119.4 CLASS 3  
(NON TENSION)

In 1989 BURNDY® began shipping an improved pin type connector. A proprietary coating system was developed through intense research efforts which vastly prolongs the life of this type of connection. To help identify the new product, a hex shaped crimp is now used on the pin interface crimp and overhead color coded end caps are utilized.

Aluminum HYPLUG™ with tin-plated copper plug for terminating aluminum or ACSR cable at cut-out, transformer and arrestor. Plug may be bent to desired angle for easier insertion. Three die sets accommodate 4 Str.-500 kcmil. Terminals are pre-filled with PENETROX™ A-13 joint compound and sealed with color coded end caps.

## COMPRESSION SPLICES

The BURNDY line of service, full-tension, and jumper sleeves provide a dependable, economical, and easy-to-install method of splicing overhead transmission and distribution lines.

A major part of the Total BURNDY® Compression Program, they are available for copper, aluminum, ACSR, COPPERWELD, ALUMOWELD, Steel, 6201, 5005, ACSR/AW, AWA, and compressed forms for aluminum and ACSR. Each is clearly marked with the installation Die Index number and knurls are provided which show the installer the correct number of crimps and the spacing required. Connections made with BURNDY® INSULINK™ and HYSPLICE™ sleeves have a lower resistance than an equal length of conductor.

HYSPLICE™ sleeves are tapered or chamfered at the ends; externally to provide gradual reduction of pressure on the conductor, and internally to facilitate conductor insertion.

### Service Sleeve Design

Service entrance connectors are available insulated (INSULINK™) or uninsulated (LINKIT™). Both are installed with the one-hand OH25 and OUR840 HYTOOL™ or the MD6 HYTOOL™. The INSULINK™ features polyethylene caps which seal out dirt and moisture, and grip the cable insulation leaving both hands free for crimping. The aluminum insert is anchored to the nylon jacket so that it will not move when crimped, ensuring that the insert is always under the die. The jacket is color coded for easy identification of conductor size.

The aluminum LINKIT™ minimizes the effects of galvanic corrosion. It is designed for easy location of crimps, and is color coded.

The service HYSPLICE™ connectors are partial-tension sleeves for splicing the neutral conductor of triplex service. They are installed with MD6, OUR840 and the OH25 HYTOOL™ on aluminum and ACSR conductors from #6 to 1/0.

### Copper HYSPLICE™ Sleeve Design

Full-tension holding strength and high conductivity of BURNDY® copper HYSPLICE™ sleeves are accomplished through the combined action of correct contact length, proper number of circular crimps of precisely controlled depth that perform a current carrying and keying function between the conductor and the sleeve.

### Aluminum HYSPLICE™ Sleeve Design

HYSPLICE™ sleeves for aluminum conductor not only satisfy the basic tension requirements, but also deal with the problems of “cold flow” of aluminum and the oxide film which forms on the strands. “Cold flow” is compensated for by carefully coordinating the design of the sleeve and its associated installation die. To offset the effects of the non-conductive oxide film present on the surfaces of aluminum cable, BURNDY® HYSPLICE™ sleeves are pre-filled with PENETROX™ joint compound and capped or stripsealed. A solid center barrier forces the PENETROX™ around the cable strands during insertion.

### ACSR HYSPLICE™ Sleeve Design

#### Two-Piece, Full-tension HYSPLICE™

Two-piece, full-tension HYSPLICE™ for ACSR consists of an inner steel sleeve for joining the steel core, and an outer aluminum sleeve for connecting the aluminum strands. To install the two-piece HYSPLICE™, the cable is cut, the aluminum sleeve slid onto the cable, aluminum strands cut back and the steel sleeve installed. The aluminum sleeve is then centered over the steel sleeve, PENETROX™ joint compound injected (PENETROX™ is brushed on cable prior to centering aluminum sleeve on smaller sizes), and the sleeve is crimped.

### Single-sleeve, Full-tension UNISPLICE™

The UNISPLICE™ is as easy to install as aluminum full-tension sleeves. The single, heavy walled aluminum sleeve is filled with a special inhibiting compound containing grit particles which key the steel strand in place. The UNISPLICE™ eliminates cutting back of aluminum strands, the need for a separate steel sleeve, and careful position of the aluminum outer sleeve before crimping.

Since the standard pull-out tests are inadequate for evaluating UNISPLICE™ performance, BURNDY® has developed the sustained-tension test that subjects a connector-conductor assembly to a 168 hour sustained load equal to 90% of the conductor strength. This test simulates a service life of 30-40 years at 60% of the conductor strength.

### Jumper Sleeves

Since the holding strength required for jumper sleeves is less than that required for full-tension sleeves, the jumper HYSPLICE™ sleeve is shorter. Aluminum, ACSR, sleeves are pre-filled with PENETROX™ joint compound and installed with the same tools and dies as the full-tension sleeves.

# Overhead Distribution

## Compression Splices - Service Entrance

**BURNDY®**

### TYPE ES

#### INSULINK™

**ACCOMMODATES:**  
AAC (STR, COMPRESSED, COMPACT\*\*), COPPER, ACSR, AND AAAC

RUS Accepted

**MATERIAL: ALUMINIUM**  
(INSULATED)

Pre-insulated service entrance compression connector installed with OH25, OUR840 and MD6 HYTOOL™ as well as Y35 and Y750 HYPRESS™ tools. Polyethylene caps prevent dirt from accumulating in barrel, grip cable for easy two-hand installation, and seal out moisture. Aluminum

connector is anchored to jacket, assuring the connector is under the die when crimping. Nylon jacket insulates connector electrically and protects against water and weather. Superior color coding. Pre-filled with PENETROX™ joint compound and stripsealed to limit oxidation and to increase the life of the connection. Do not use insulated sealed

connectors on bare conductors. Refer to LINKIT™ type connectors.

- Not for use on bare conductors.
- ▲ Accommodates 1/0 stranded aluminum and copper, concentric, compressed and compact conductors.
- \*\* Accommodates compact conductors where stated in the table.
- \* For faster installations use BURNDY® PATRIOT® family of battery tools.

## Compression Splices - Service Entrance

**BURNDY®**

### TYPE YSD

#### .840 LINKIT™

**ACCOMMODATES:**  
AAC (STR, COMPRESSED,  
COMPACT\*\*), COPPER, ACSR,  
AND AAAC

RUS Accepted

**MATERIAL:** ALUMINUM  
(UNINSULATED)

Aluminum compression sleeve with solid center barrier. Designed for commercial and heavy residential services. Installed with standard tooling. Pre-filled with PENETROX™ joint compound, capped and stripsealed to limit oxidation and to increase the life of the connection.

\* Multiple crimp die set, makes more than one crimp per tool compression. Figure indicates number of compressions.

\*\* Accommodates compact conductors where stated in the table.

\*\*\* For faster installations use BURNDY® PATRIOT® family of battery tools.

**TYPES YCU-R & YOU-R**

**ACCOMMODATES:** ACSR (STR, COMPRESSED, COMPACT)

**MATERIAL:** ALUMINUM

For restoring conductivity to damaged conductors. Made of cast aluminum. Sizes up thru 266.8 are U-shaped. For 300 and larger, sleeves are

two-piece interlocking elements. Use same die as equivalent full-tension sleeve. Use of PENETROX™ joint compound required.

## Compression Splices - Two Sleeve Full Tension

**BURNDY®**

**TYPES YDS-R SET,  
YDS-RP1 (Aluminum Sleeve)  
YDS-RP2 (Steel Sleeve)**

**HYSPLICE™**

**ACCOMMODATES:** ACSR (STR,  
COMPRESSED AND COMPACT)

**RUS Accepted**

**MATERIAL:**  
ALUMINUM (OUTER SLEEVE),  
STEEL (INNER SLEEVE)

Two-piece, full tension HYSPLICE™, consists of aluminum outer sleeve and steel inner sleeve. Tapered outer sleeve provides gradual transition of stress. Filler holes provided for PENETROX™ joint compound. Sizes 1/0 and larger supplied with plugs for filler hole. Installed with standard HYSPLICE™ tools and dies (thru 556 with Y35 or Y750 HYPRESS™). Aluminum and steel sleeves can be ordered separately or in sets.

**TENSION RATING:**  
ANSI C119.4 CLASS 1  
(FULL TENSION)

\* Multiple crimp die set; makes more than one crimp per tool compression.  
Figure indicates number of compressions.  
† U Die with adapter PT-6515.  
‡ U Die with adapter PUADP-1.  
For faster installations use BURNDY® PATRIOT® family of battery tools.

**TYPE YDSR-RL  
UNISPLICE™  
Replacement Splice**

**UNISPLICE™**

**ACCOMMODATES:** AAC (STR, COMPACT), ACSR, and AAAC

**MATERIAL:** ALUMINUM

**TENSION RATING:**  
ANSI C119.4 CLASS 1A  
(FULL TENSION)

Single sleeve aluminum UNISPLICE™ is designed to facilitate the permanent replacement of existing

line splices, including the automatic type. Utilizing all the benefits of the standard UNISPLICE™, the extra long Replacement UNISPLICE™ fills the gap of a cutout splice and eliminates the need to find like conductor. It also reduces installation time of the current standard methods by half, reducing the total number of splices from two to one. All splices are pre-filled with PENETROX™ joint compound, stripsealed and capped to limit oxide growth and to increase the life of the connection.

- ① U Die with adapter PT-6515.
  - ② U Die with adapter PUADP-1.
  - \* Multiple crimp die set; makes more than one crimp per tool compression. Figure indicates number of compressions.
  - \*\* MD6 NON-BOW Dies produce straight sleeves without rotating tool.
  - † Overlap Crimps
- For faster installations use BURNDY® PATRIOT® family of battery tools.

## Compression Reducer - Single Sleeve Full Tension

**BURNDY®**

### TYPE YDR-R

#### UNISPLICE™ REDUCER

**ACCOMMODATES:** AAC (STR, COMPRESSED), ACSR AND AAAC

**MATERIAL:** ALUMINUM

**TENSION RATING:**  
ANSI C119.4 CLASS 1  
(FULL TENSION)

RUS Accepted

Single-sleeve aluminum UNISPLICE™ reducer is designed to splice ACSR as simply as all aluminum. Pre-filled with PENETROX™ joint compound, stripsealed and capped to limit oxide growth and to increase the life of the connection. Eliminates strand stripping, installing separate

steel sleeve and filling with joint compound. Electrical and mechanical performance equal to two-piece sleeves.

### DEADEND FITTINGS AND ACCESSORIES

The deadend method selected for any particular application will depend upon the nature of the application, the size of the conductor, holding strength required, and preference for mechanical or compression devices.

Secondaries are commonly deadended by bending wire around a spool insulator and snubbing with the same connectors used for the secondary to service drop connection. On copper conductor, connectors such as Ubolt Clip BC, SERVIT™ KS, OKLIP™ KVS or CRIMPIT™ YC-C are recommended. These connectors provide high holding strength without damaging

conductor strands. On aluminum wires, CLIPIT™ UW-R, mechanical connector is recommended.

The same methods can also be used on primaries. However, the straight line clamp Type CUW-A-E is more popular for this application. They are easier to install on either hot or de-energized lines. They are particularly well suited to hot-line maintenance, and allow easy re-sagging of conductors.

Straight line types are also popular for deadending strain buses. These are normally large, hard to handle conductors that do not lend themselves to snub or "quadrant" types. Types DUW or CUW-E

are recommended for copper conductor and DUW-A and DUW-AE for aluminum and ACSR. The pulling eye on the DUW-A-E is in line with the cable to make installation easier.

H-70

### TYPE UP-R

#### HEAVY DUTY PARALLEL CLAMP

#### ACCOMMODATES:

AAC (STR, COMPRESSED, COMPACT†), ACSR†, AAAC AND COPPER

#### MATERIAL: ALUMINUM

Heavy duty aluminum connector for feeder, subtransmission and primary distribution. Massive design and large spacer give maximum protection against galvanic action and overload conditions. Spacing of U-bolts, tapered bell mouths and modified V groove minimize cold flow, eliminate cable damage, and produce wiping action on conductors. Spacer taps confine cable strands to

prevent splaying. Captured, heat treated aluminum alloy U-bolts. PENETROX™ joint compound recommended for all combinations.

RUS Accepted

**COMPRESSION  
TERMINALS &  
ACCESSORIES**

Compression terminals are used to make convenient and reliable connections to switch pads, transformers, and other electrical equipment. They accommodate either copper, aluminum, ACSR, ACAR, Alumoweld, or steel conductor and come with one, two or four hole NEMA drilled pads to match the equipment drilling. Standard copper and aluminum terminals are also listed in the compression section C.

For faster installations use BURNDY® PATRIOT® family of battery tools.

**TYPE YAK-A-2G**

**STACKING HYLUG™**

**ACCOMMODATES:**  
AAC (STR, COMPRESSED)

**MATERIAL:** ALUMINUM

Cast aluminum HYLUG™ with a special tongue configuration for stacking of conductors on two and four hole NEMA transformer or equipment terminal pads. Up to eight conductors may be stacked on one four hole NEMA pad. HYLUG™ is prefilled with PENETROX™ joint compound, stripsealed and capped to limit oxide growth and to increase the life of the connection.

## TYPES YCAK-A & YRA

### ALUMINUM HYLUG™

**ACCOMMODATES:** AAC (STR, COMPRESSED), ACSR AND COPPER

**MATERIAL:** ALUMINUM

Aluminum HYLUG™ for joining aluminum and copper cable to transformer and equipment pads. HYLUG™ is pre-filled with PENETROX™ joint compound, stripsealed and capped to limit oxide growth and to increase the life of the connection. Installed with standard tooling, five die sets install fourteen terminal sizes.

**TYPE YTW-R-REK,  
YTW-R, YTW-RE,  
YNA-R-H**

**Single Pad Full Tension  
Deadend for ACSR Conductor**

Full tension compression deadend for ACSR transmission lines up to and including 230 kV. Standard 15° NEMA tap pad provides either 0° or 30° tap when YNA-R15 terminal is used.

4-hole pad supplied on 556.5 kcmil and above.

2-hole pad supplied on less than 556.5 kcmil.

**Complete Assembly:** Includes Aluminum body, Steel eye, 15 degree terminal and aluminum hardware.  
For stainless steel hardware add SS to end of catalog number for complete assembly (example: YTW32R34REKSS) or to terminal (YNA32R15HSS) if ordered separately.

For assembly without terminal and hardware add NT to end of complete assembly catalog number (example: YTW32R34REKNT).  
Two hole NEMA pads standard on conductors up to 556.5 kcmil; Four hole NEMA pads on larger conductor sizes.

\* Overlap crimps.  
‡ Wide dies may be used on aluminum only (no steel), add suffix "W" to part number (example: L725W).

# Transmission ACSR Deadends

**BURNDY®**

## TYPES YTW-RD-REK, YTW-RD, YTW-RE, YNA-R-H

### Double Pad Full Tension Deadend for ACSR Conductor

Full tension compression deadend for ACSR transmission lines up to and including 230 kV. Standard 15° NEMA tap pad provides either 0° or 30° tap when YNA-R15 terminal is used.

4-hole pad supplied on 556.5 kcmil and above.

2-hole pad supplied on less than 556.5 kcmil.

# Transmission ACSR Deadends-EHV

**BURNDY®**

## TYPES YTW-RDT-REK, YTW-RDT, YTW-RE, YNA-RT-H EHV

### Double Pad, EHV Full Tension Deadend for ACSR

Full tension compression deadend for ACSR transmission lines at 345 kV and over. Standard 15° NEMA tap pad provides either 0° or 30° tap when YNA-R15 terminal is used.

4-hole pad supplied on 556.5 kcmil and above.

2-hole pad supplied on less than 556.5 kcmil.

**Complete Assembly:** Includes Aluminum body, Steel eye, 15 degree terminal and aluminum hardware. For stainless steel hardware add SS to end of catalog number for complete assembly (example: YTW32R34REKSS) or to terminal (YNA32R15HSS) if ordered separately.

For assembly without terminal and hardware add NT to end of complete assembly catalog number (example: YTW32R34REKNT). Two hole NEMA pads standard on conductors up to 556.5 kcmil; Four hole NEMA pads on larger conductor sizes.

\* Overlap crimps.

‡ Wide dies may be used on aluminum only (no steel), add suffix "W" to part number (example: L725W).

TYPE YTS-R-RS

Full Tension Splice Kit  
for ACSR Conductor

Full tension, two-piece, compression splice for ACSR transmission lines up to and including 230 kV. Outer aluminum sleeve has filler hole and plug for PENETROX™ joint compound. Kit includes the outer aluminum and inner steel sleeve.

† Two hole NEMA pads standard on conductors up to 556.5 kcmil; Four hole NEMA pads on larger conductor sizes.

To specify hardware for bolting to corresponding Deadends add the suffix H to the catalog number (example: YNA52RH).

\* Overlap crimps.  
‡ Wide dies may be used on aluminum only (no steel), add suffix "W" to part number (example: L725W).

## TYPES YNA-RT15, YNA-RT EHV

### Compression Terminal for ACSR Conductor

Compression terminal for ACSR transmission lines at 345 kV and over. Two hole NEMA tongue supplied through 636 kcmil and four hole on larger sizes. Includes PENETROX™ joint compound in barrel and oxide retardant on pad.

\* For EHV applications, add suffix "T" to catalog number (example: YNT49R49RT).

\*\* Overlap crimps.

‡ Wide dies may be used on aluminum only, add suffix "W" to part number (example: L725W).

# Transmission

## ACSR T-Tap with Pad

**BURNDY®**

### TYPE YNTA-R

#### T-Tap with Pad for ACSR Conductor

Two piece compression T-Tap to a NEMA pad for ACSR transmission lines. Up to and including 230 kV.

\* For EHV applications, add suffix "T" to catalog number (example: YNTA49RT)

Kiwi	2167	72	7	YNTA59R	23.21	3.59	6.25	0.69	L735

Two hole NEMA pads standard for conductors up to 556.5 kcmil; Four hole NEMA pads on larger conductor sizes.

For EVH applications, add suffix "T" to catalog number (example: YNTA49RT).

For EHV applications (2) two tap pad shielding caps (catalog number STS43A4N) should be ordered.

\* Overlap crimps.

‡ Wide dies may be used on aluminum only, add suffix "W" to part number (example: L725W).

**TYPE YNU-R**

**Repair Sleeve  
for ACSR Conductor**

For HV and EHV applications. Two-piece repair sleeve for temporary restoration of conductivity to damaged ACSR transmission lines. Use of PENETROX™ joint compound required.

# Transmission ACSS Deadends

**BURNDY®**

## TYPES YTW-R-REKHT, YTW-RHT, YTW-REHT, BYNA-R-HHT

### Single Pad Full Tension Deadend for ACSS Conductor

Full tension compression deadend for 250° C rated ACSS transmission lines up to and including 230 kV. Standard 15° NEMA tap pad provides either 0° or 30° tap when BYNA-R15 terminal is used.

I-16

**Complete Assembly:** Includes Aluminum body, Steel eye, 15 degree terminal and aluminum hardware. For stainless steel hardware add SS to end of catalog number for complete assembly (example: YTW32R34REKHTSS) or to terminal (BYNA32R15HTSSHHTSS) if ordered separately.

For assembly without terminal and hardware add NT to end of complete assembly catalog number (example: YTW32R34REKHTNT).  
† BYNA terminals must be crimped from cable end moving toward pad end.

\* Overlap crimps.  
‡ Wide dies may be used on aluminum only (no steel), add suffix "W" to part number (example: L725W).

**Complete Assembly:** Includes Aluminum body, Steel eye, 15 degree terminal and aluminum hardware. For stainless steel hardware add SS to end of catalog number for complete assembly (example: YTW32R34REKHTSS) or to terminal (BYNA32R15HTSSHHTSS) if ordered separately.

For assembly without terminal and hardware add NT to end of complete assembly catalog number (example: YTW32R34REKHTNT). † BYNA terminals must be crimped from cable end moving toward pad end.

\* Overlap crimps. ‡ Wide dies may be used on aluminum only (no steel), add suffix "W" to part number (example: L725W).

# Transmission ACSS Deadends-EHV

**BURNDY®**

## TYPES YTW-RT-REKHT, YTW-RTHT, YTW-REHT, BYNA-RT-HHT EHV

### Single Pad, EHV Full Tension Deadend for ACSS Conductor

Full tension compression deadend for 250° C rated ACSS transmission lines at 345 kV and over. Standard 15° NEMA tap pad provides either 0° or 30° tap when BYNA-RT15 terminal is used.

I-18

**Complete Assembly:** Includes Aluminum body, Steel eye, 15 degree terminal and aluminum hardware. For stainless steel hardware add SS to end of catalog number for complete assembly (example: YTW32R34REKHTSS) or to terminal (BYNA32R15HTSS) if ordered separately.

For assembly without terminal and hardware add NT to end of complete assembly catalog number (example: YTW32R34REKHTNT).  
† BYNA terminals must be crimped from cable end moving toward pad end.

\* Overlap crimps.  
‡ Wide dies may be used on aluminum only (no steel), add suffix "W" to part number (example: L725W).

## TYPE YTS-R-RSHT

### Full Tension Splice Kit for ACSS Conductor

Full tension, two-piece, compression splice for 250° C ACSS transmission lines up to and including 230 kV. Outer aluminum sleeve has filler hole and plug for PENETROX™ joint compound. Kit includes the outer aluminum and inner steel sleeve.

\* Overlap crimps.

‡ Wide dies may be used on aluminum only (no steel), add suffix "W" to part number (example: L725W).

For EHV applications add "T" to the catalog number (example: YNT49R49RTHT).

TYPE YNTA-RHT

T-Tap with Pad  
for ACSS Conductor

Two piece compression T-Tap to a NEMA pad for ACSS transmission lines. Up to and including 230 kV.

\* For EHV applications, add "T" to catalog number (example: YNTA49RHT); should be used with (2) two tap pad shielding caps, catalog series STS-A-NCG

TYPES YTW-A-AEK,  
YTW-A, YTW-AE,  
YNA-RH

Single Pad Full Tension Deadend  
for Stranded Aluminum Cable

Full tension compression deadend for SAC transmission lines. One design for applications up to and including 230 kV. Two hole NEMA tap pad supplied through 636 kcmil. Larger sizes have 4 hole NEMA pad. Standard 15° tap pad when used with YNA-R15H terminal provides either 0° or 30° tap. Aluminum body is pre-filled with PENETROX™ joint compound and capped.

TYPES YNA-R15  
& YNA-R

Compression Terminal for ACAR  
and Stranded Aluminum Cable

Compression terminal ACAR and Stranded Aluminum Cable. Two hole NEMA tongue supplied through 650 kcmil Aluminum. For transmission line up to and including 230 kV supplied on tongue through 650 kcmil aluminum. Four hole NEMA supplied on larger sizes. When used with YTW Deadends the 15° angle tongue provides either a 0° or 30° tap. Uses same dies as equivalent full-tension sleeve or deadend. Barrel pre-filled with PENETROX™ joint compound and capped. Pad coated with oxide-retardant.

**Full Tension Deadend Kit**

**Compression Deadend for  
ACCC® Conductor**

Full tension Deadends for ACCC® transmission lines up to and including 230 kV. Standard 15° NEMA tap pad provides either 0° or 30° tap when BYNA-RT15HACCC terminal is used.

## IMPLO®

**Connections for all common conductor types including high temperature applications**

IMPLO® connectors consist of a small, engineered energy charge that is pre-wrapped around a specially designed metallic sleeve. When installed, the charge creates a high compressive force, creating a permanent, high-quality connection that cannot be matched for field installations.

IMPLO® connectors produce a smoother, stronger and more electrically efficient connector than any other means. In addition to better connections, there is no smaller investment in transmission projects that can yield higher returns to project time, environmental impact, and full inspectability than IMPLO technology. Transmission projects that specify IMPLO result in higher reliability, longer service life, lower power loss, and on-time line energizing.

Installation productivity can be greatly increased over traditional methods as there is no hydraulic equipment involved, eliminating tooling down-time, lengthy preparation and compression times, and individually compressing one connector in succession. IMPLO technology makes a superior connection, and is faster and easier to install, yielding significant savings in construction time and cost.

Multiple IMPLO connectors can be installed simultaneously. This aspect is particularly useful in the deadending to structures and the splicing of multi-bundle phase conductors. The IMPLO process changes the job-site work flow and greatly improves overall productivity. Estimates place time savings on stringing operations as high as 60% when using IMPLO technology versus traditional compression processes. Faster time to completion of stringing operations helps overcome weather delays, equipment problems, man-power shortages, ROW contention and other factors that can delay project completion.

IMPLO splice connectors are designed to pull through stringing blocks without damaging the conductor or splice degradation. When following the IMPLO Stringing Charts, the splice connectors can be installed at the tensioner and safely pulled into final position. This allows the splices to be installed at pre-disturbed areas, and eliminates the creation and restoration of access roads to final splice locations. The elimination of these additional access roads (or expensive aerial work) saves project time, cost, and environmental damage.

The ability to install splices at ground level also allows for inspection prior to stringing. Unlike other technologies, IMPLO connections are fully inspectable. BURNDY can provide a detailed quality inspection process for your specific project needs, upon request, allowing all connections to be fully inspected to measurable criteria. A complete, documented inspection program eliminates the need for costly and time consuming field X-rays.

IMPLO technology offers many installation benefits to line construction. There is no heavy, awkward tooling, hydraulic fluids, and supplementary power supplies needed to be on the job site. The connectors can be installed in any terrain and most weather conditions typical to project locations. Installation can be done at ground level, at cross-arm level, or even aerially via helicopter work. IMPLO connectors are ideal for live-line situations, reducing time and equipment hazards while in proximity to energized conductors.

The IMPLO connection itself creates a virtually void-free connection, eliminating the need for oxide inhibitors. The smooth exterior surface created in the process requires no sanding or filing to operate corona-free. And, due to the rapid 360-degree compressive force during installation, there is no chance for sleeves to bow (“banana”) during installation. A straight connection, every time.

The compressive force generated during installation is all radial, and inwards. Therefore, sleeves do not elongate and conductor is not extruded. This process captures all of the conductor’s material within the final connection, eliminating bird-caging of conductor strands at the mouth of the connection. This allows IMPLO connections to be utilized in close proximity to one another and to other line hardware.

IMPLO has more than 40 years of proven application around the world. BURNDY has experienced and dedicated field resources to provide training, project coordination, and support in meeting necessary regulations when working with IMPLO technology. Our logistics team is knowledgeable of the needs of the transmission market, and will ensure your project needs are met. BURNDY also has the technical resources dedicated to the advancement of IMPLO technology, the support of industry standards, and the testing for industry standard qualification.

IMPLO connections can accommodate a wide range of conductor sizes and types, including: ACSR, ACSS, ACSS/TW, ASC, ASC/TW, AAC, AAAC, Aluminum Clad, and steel static wire. Various configurations, tap pads, and eyebolt versions are available. IMPLO Repair connections used for line maintenance can save considerable time and effort, and are available upon request. Non-standard configurations are possible, subject to design requirements and availability.

**IMPLO® Applications**

- Deadending, splicing, and terminating high voltage transmission lines
- Working on or in close proximity to live lines
- New construction
- Maintenance of existing lines
- Substations
- Reconductoring/upgrading existing lines
- Joining steel static wire and guy wire

## IMPLO®

### Connection Type Descriptions

#### Full Tension Joint (FTJ) Splice

The IMPLO FTJ/splice consists of an aluminum alloy sleeve with an energy wrap preassembled. The FTJ is designed to be installed at the tensioner and pulled through stringing blocks. IMPLO Stringing Charts for each conductor show the relationship between the pulling tension, weight span and the allowable line angle through which the joints may be pulled. This makes splicing an integral part of the overall pulling operation and greatly simplifies the stringing operation. Repair splices for removal and replacement of pre-existing, failing splices while maintaining line sag, are available upon request.

#### Deadends\*

IMPLO deadends consist of an aluminum alloy sleeve with an energy wrap preassembled. Eyebolts are provided in round or oval-eye configurations, specified at time of order. The eyebolt freely rotates 360 degrees prior to installation, allowing for precise matching to line hardware. A single 15 degree, NEMA four-hole pad is standard. Other pad options are available upon request. Repair deadends for removal of pre-existing, failing deadends while maintaining line sag, are available upon request.

I-54

#### Jumper Terminal\*\*

Jumper Terminals consist of an aluminum sleeve with an energy wrap preassembled, and a 15 degree, four-hole NEMA pad at one end. Jumper terminals may be installed at 0 or 30 degree take-off angles when matched to the deadend with a 15 degree NEMA pad.

#### Repair Sleeve

Repair Sleeves consist of two aluminum alloy half sleeves that slide together. An energy wrap is provided on a flexible sheet that is wrapped around the repair sleeve to install. Repair sleeves are used to repair minor damage to the outer strands of a conductor, such as caused by spacer wear, line impacts, or construction mishaps.

#### T-Tap

T-Taps consist of two half sleeves that slide together. One of the half sleeves is provided with a NEMA four-hole pad for making a line tap. Two energy wraps on flexible sheets are provided to make the final installation.

IMPLO® Tool Kit

Catalog Number IMPLOTOOLKIT

No.	Product	Description
1	Rechargeable Electric Air Horn	The world's most advanced portable signaling device for industrial and commercial safety. The Air Horn comes with a rechargeable 14 volt lithium-ion battery (1b), as well as an Inverter (1c) which allows for flexibility in charging the battery in remote areas, by relying on the power supply of a vehicle.
1a	Electric Air Horn Battery	
1b	Battery Charger for Air Horn	
1c	Inverter	
2	Shock Tube Initiator	Through use of a plasma arc tip, the Initiator provides reliable initiation of standard commercial and Mil-Spec shock tubes for 10,000 shots. Comes with a spare standard 9-Volt Alkaline Battery (2a) & shock tube splices and caps (2b)
2a	Shock Tube Initiator Battery	
2b	Shock Tube Splices & Caps	
3	Shock Tube Cutter	Durable lightweight plastic body is spring loaded for easy operation and utilizes a replaceable blade stainless steel blade to cut shock tube.
4	Shock Tube Spool Handle	Works on 1lb. or 5lb. reels, and has multiple holes to adjust to each size wire spool.
5	Wood Rule	6' x 5/8" Rule, two-sided in inches and 1/16ths
6	Marker	Black Sharpie Marker
7	2 x Tape	Black Electrical Tape

**TERMINAL PAD CAP  
(Two Piece)**

**STS-A-N**

Bolted type

Application: Pad shielding

**EHV RATED : SELF-SHIELDING  
UP TO 550 kV**

Material: Cast 356 Aluminum Alloy  
Hardware: 1/4"-20 x 3-3/4" LG  
Stainless Steel Hex Hd. Bolt  
and Split Lockwasher

① Catalog Number	E	F	H	L	W	Maximum Shielded Area
STS33A-4N	1.75 [44]	1.75 [44]	1.25 [32]	3.48 [88]	3.62 [92]	3 X 3 [76] X [76]
STS43A-4N	1.75 [44]	1.75 [44]	1.31 [33]	3.36 [85]	4.50 [114]	4.00 X 3.12 [102 X 79]
STS44A-4N ②	1.75 [44]	1.75 [44]	1.25 [32]	4.50 [114]	4.62 [117]	4 X 4 [102 X 102]

① Catalog number includes one pad cap, one adapter plate, and stainless steel adaptor hardware.

② Used with YNA451R-T and YNA451R-T15 through YNA594R-T and YNA594R-T15 compression terminals.

I-62

**TERMINAL PAD CAP  
(One Piece)**

**STS-A-NCG**

Bolted type

Application: Pad shielding

**EHV RATED : SELF-SHIELDING  
UP TO 550 kV**

Material: Cast 356 Aluminum Alloy

Catalog Number	E	F	H	L	W	Maximum Shielded Area
STS44A-4NCG2	1.75 [44]	1.75 [44]	1.25 [32]	4.50 [114]	4.50 [114]	4 x 4
STS46A6NCG1	1.75 [44]	1.75 [44]	1.25 [32]	4.50 [114]	6.50 [165]	6 x 4

NOTES:

1. Dimensions in brackets [ ] are in millimeters.

2. Catalog number is for one shielding cap only. If more than one is required, specify total quantity.

**BOLTED BUNDLED  
CABLE SPACER**

- S2GBP-A (Spacer)
- S2GBPA-A (Terminal Tap)
- SH2GBP-A (Bus Support)

Bolted type

Application: Cable to Cable spacer  
(Two Cables), Cable  
spacer with four hole  
pad, and Cable spacer  
to insulator.

**EHV RATED: SELF-SHIELDING  
UP TO 550 kV**

Material: Cast 356 Aluminum Alloy  
Hardware: Aluminum Alloy

## TYPE S-D-R

### Spacer Damper

Since the 1960's BURNDY Spacer Dampers have been used on bundled conductor transmission lines around the world. Over 850,000 units have been installed on over 40,000 phase miles of conductor. Projects have included 2, 3, 4 and 6 bundle arrangements at voltage levels from 230 kV to 800 kV AC and up to +/-600 kV DC.

BURNDY motion control products are engineered per customer requirements and industry standards. Our engineering team has the experience and technology to provide the proper motion control answers to your bundled conductor transmission line projects.

Our history of design, testing and field installation experience enables us to provide Spacer Damper products along with placement recommendations for optimum performance.

I-68

In most cases Spacer Dampers are custom designed for the specific transmission line requirements. Contact the factory for more information.

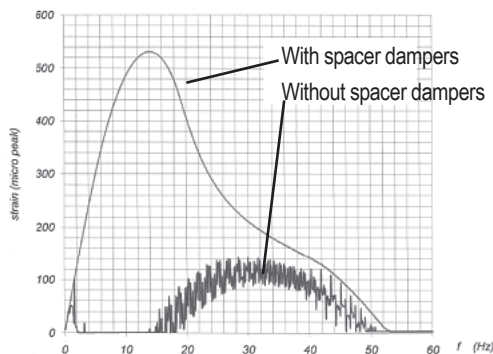

For installation points per span contact factory.

Conductor placement installation points are calculated with the recently developed proprietary BURNDY software.

**TYPE S2GBP-ASG**

**Rigid Spacers**

Since the 1960s, BURNDY has been providing motion control products for transmission lines. This rigid spacer line addresses the needs for many new transmission lines being designed with twin bundle conductor per phase. BURNDY rigid spacers are engineered to perform to customer and industry standards and carry with them the design, testing and field installation experience to provide the right solution for each transmission lines. **Placement recommendations are provided for optimum performance on each project.**

**Industry Specifications:**

IEC 61854:1998

**Performance Requirements:**

**Corrosion Protection:** Breakaway Bolt - Black Anodized Aluminum  
**Clamp Slip:** Longitudinal = 200 lbs.  
 Torsional = 10 lb-ft

**Breakaway Bolt:** 10% above installation torque without damage  
**Fault Current:** Up to 30kA

**Simulated Short Circuit:** Compression = 2400 lbs  
 Tensile = 1200 lbs.

**Fatigue:** Longitudinal = 1 million cycles  
**Voltage Rating:** 345 kV

**Temperature Rating:** High Temperature (HT) Silicone rated to 250°C max  
 Standard EPDM rated to 125°C;  
 150°C (2 hours emergency)

**Application Specifications:**

**Installation Torque:** 752 lb-in ± 10%  
**Clamp:** Breakaway secondary bolt head  
**Clamp Frame:** Aluminum Alloy  
**Shearhead Bolt:** Aluminum Alloy  
**Placement:** Provided based on customer's span information

**Packaging:**

**Typical Example:** 10 spacers per wood box (25"x11.5"x11")  
 Each spacer packed in plastic bag  
 (Actual packaging would be based on customers specifications for project worksite.)

**Product Description:**

**Bundle Size:** 2 Conductors  
**Spacing:** 18" center to center  
**Weight:** 6 lbs.

**BURNDY WEJTAP™**

**CONNECTION SYSTEM**

BURNDY®, a leading manufacturer of quality electrical connectors for over 70 years, introduces the WEJTAP™ SYSTEM, a system that adds further dimension to the existing BURNDY® group of proven, reliable connection systems.

**WEJTAP™ COMPONENTS** are designed to provide a reliable system connection. The system consists of WEJTAP™ connectors, installation tools (including a variety of hotline and lineman accessories) and a unique power-booster.

**WEJTAP™ CONNECTORS** use an aluminum alloy wedge that is power-driven between the run and the tap cables locking them into a “C” shaped tempered aluminum alloy spring-body. The spring-body maintains consistent pressure throughout the life of the connection to ensure reliability during severe electrical and climatic conditions. The wedge’s wiping action combined with factory installed PENTX 1530 provides superior contact integrity. The wedge is automatically locked onto the spring-body by a skiving action produced by a lance at the forward end of the WEJTAP™ installation tool.

The **WEJTAP™ TOOL** is a one-piece assembly that consists of a head and power unit. Two color-coded interchangeable heads accept all WEJTAP™ connectors and STIRRUP™. The design of the tool recognizes the need for simplicity and speed of operation as well as outstanding safety features such as automatic gas release vented away from the operator, fast simple breech loading and fast advance when engaging the connector assembly. No loose parts to drop or misplace and a booster ejection system that provides further safety to the operator. Fewer simplified hotline devices and handy lineman accessories complete an outstanding tool package.

The **WEJTAP™ POWER-BOOSTER** Patented is a self-contained device that provides the force necessary to drive the wedge into direct contact with the conductors. The booster is activated only when properly positioned in the tool assembly. A power cell in the booster is recessed to guard against premature discharge. The tool/booster system is designed to activate and deactivate the booster automatically should the operator decide to remove the tool from a connector prior to completing the installation. The deactivated booster may be safely removed from the tool.

J-3

**Features and Benefits**

- Large conductor chamfer on ends of wedge
  - ◊ Instant hand or visual identification of large run grooves. Ensures correct wedge orientation.
- Color-coded WEJTAP™ connector and booster packaged together
  - ◊ Easy selection by installer.
- Factory coated grooves with PENTX 1530
  - ◊ Maintains low contact resistance, assists in protection against climatic conditions and is compatible with common insulations.
- One-piece tool
  - ◊ No project delays due to dropped or lost parts.
- Fewer and improved hotstick accessories
  - ◊ Simplifies hotline installation and saves time.
- Contained booster ejection system
  - ◊ Safe for operator guards against the booster being ejected in direction of the installer.

- Automatic gas release vented away from operator
  - ◊ Eliminates manual gas venting and improves safety.
- Simplified loading
  - ◊ Speeds installation — no threads — just depress safety bar, twist and pull open — load — push and twist to close prior to applying connector.
- Acme-type threads
  - ◊ Provides smooth, fast engagement of tool and connector — saves installer's time.

### WEJTAP™ AND TEST DATA

WEJTAP™ connectors have been subjected to extensive tests simulating the most severe service and weather conditions. In addition, the WEJTAP™ system meets or exceeds the industry standards of ANSI C119.4 Class 3, NEMA CC3 1973 Class AA, 500 Heat Cycles.

As with all BURNDY® connectors, the WEJTAP™ has been designed to operate cooler than the attached conductors. The WEJTAP™ connectors have also been subjected to the ASTM B117-73 Salt Spray Test. The results are shown to the right.

**ANSI C119.4 - 1986 Heat Cycle Test**  
Average Temperature Rise vs. Current Cycles

Detailed test report packages are available upon request.

**ASTM Salt Spray Test**  
Average % Relative Resistance vs. Hours of Salt Spray Exposure

### WEJTAP™

C-member bodies are color-coded and the wedges are marked with nominal conductor run and tap ranges. WEJTAP™ connector packages are labeled with a variety of common conductors with their nominal ranges.

J-4

- WEJTAP™ connector wedges are marked with nominal ACSR, Aluminum and Copper concentric standard conductors.
- Red WEJTAP™ connector range  
Run 8-1/0 Tap 8-2
- Blue WEJTAP™ connector range  
Run 2-300 Tap 6-300
- Yellow WEJTAP™ connector range  
Run 266.8-1590 Tap 6-1590

All WEJTAP™ wedges contain a clearly defined chamfer on the large end of the run conductor groove to identify the "large run" groove. Installers will appreciate the convenience of visual or hand identification for correct wedge positioning.

WEJTAP™ wedges are driven between the run and tap conductors and activate the spring characteristics of the "C" shaped body. This action maintains contact pressure even when the connection is subjected to severe climatic and electrical conditions.

The BURNDY® WEJTAP™ System has a wide variety of connectors available for many different conductor ranges.

Color coded boosters and connectors ensure proper matching during installation.

The BURNDY® Power Booster is designed and engineered for the highest reliability and safety. Proven rimfire design means misfires are almost nonexistent. Close manufacturing component tolerances provide maximum resistance to moisture or submersion.

**ORDERING INFORMATION**

■ Power boosters may be ordered separately in boxes of 25.

- Red boosters    **Cat. # WPBRN Box 25**
- Blue boosters    **Cat. # WPBBN Box 25**
- Yellow boosters    **Cat. # WPBYN Box 25**

Select appropriate connector; match with equal number of color coded boosters (see below).

WPB—Red, Blue, Yellow Boosters

For information about conductors which are not listed, and for further ordering information, please contact BURNDY® at 1-800-346-4175.

J-5

**WEJTAP™ COVER**

WEJTAP™ Covers are installed on WEJTAP™ connectors to prevent them from coming in contact with other taps or exposed ground points. The covers are rugged snap-on devices available in four sizes to cover all connector sizes.

Cover Catalog Number	WEJTAP™ Size	Nominal Conductor Range Run	Nominal Conductor Range Tap	Cover Color

**WEJTAP™  
COPPER WEJTAP™**

**CONNECTION SYSTEM**

The BURNDY® Copper WEJTAP™ powder actuated copper connectors are designed for overhead copper to copper tap applications.

**Features include:**

- Newly expanded range taking capabilities
- New larger size connector for #6 - #2 applications
- Uses standard BURNDY® WEJTAP™ tooling without the need for installation platforms
- Meets latest ANSI C119.4 (2011) including optional fault current test annex
- Prefilled with PENETROX™ E to improve the performance over the life of the connection

**WEJTAP™  
INSTALLATION  
TOOLS**

**Type WTB**

The WEJTAP™ patented tool body is a one-piece assembly basic drive mechanism used to install WEJTAP™ and STIRRUP™ connectors ranging from #8 AWG through 1590 kcmil ACSR.

**Type WTHRB1S**

WEJTAP™ tool head operating platform for small and medium range (red/blue coded) connectors.

**Type WTHY1S**

WEJTAP™ tool head operating platform for medium and large range (yellow coded) connectors.

**WEJTAP™  
INSTALLATION TOOL  
ACCESSORIES**

J-12

**Type WTOCBR**

WEJTAP™ removal clip for red type II and medium (blue coded) tap connectors used with type WTHRB tool head.

**Type WTOCY**

WEJTAP™ removal clip for large (yellow coded) tap connectors used with type WTHY tool head.

**Type WTCK**

WEJTAP™ tool cleaning/maintenance kit for use with type WTB tool body.

**Type WTBASY1**

WEJTAP™ ram replacement assembly.

**WEJTAP™**  
**POWERLUG™**

WEJTAP™ POWERLUG™ terminals are made of cast aluminum alloy for termination of ACSR and Aluminum conductors.

WCB 11 PB	Three - #4 stranded Diameter = 0.232	One - 1/0 stranded Diameter = 0.368

\* Electrically, the three smaller conductors are the likely taps, however, during installation, they are located in the larger run groove due to their larger aggregate sum.

**WEJTAP™ HOTSTICK  
 ACCESSORIES**

**Type WHSCWH**

WEJTAP™ hotstick connector clamp used to hold the tap connector spring-body and wedge for installation on energized lines with the shotgun hotstick.

**Type WSHWHADP**

WEJTAP™ hotstick angle wedge holder adapter attaches wedge clamp to universal hotstick for hotline installation.

**Type WSHWB**

WEJTAP™ hotstick wirebrush attaches to the universal hotstick for cleaning the contact surface of the line conductor.

J-14

**Type WHSPBC**

WEJTAP™ hotstick dual cable clamp used to hold run and tap conductors in position during hotline installation. Universal for all applications from #8-1272 ACSR.

**Type WCHAWAS**

WEJTAP™ hotstick angle wedge holder adapter attaches wedge clamp to universal hotstick for hotline installation with shotgun stick.

**Type WSHGB**

WEJTAP™ hotstick breech drive. Geared shotgun hotstick adapter easily latches to the breech end of WEJTAP™ installation tool without disassembly for use on energized lines.

**Type WHSSADP**

WEJTAP™ hotstick spring loaded 90 degree adapter, used to attach tool to universal hot-stick for hotline installations.

**Type WHSTA**

WEJTAP™ hotstick tool (actuator) hammer attaches to the universal hotstick for striking the tool actuator button to complete the installation.

**Type WHHWB**

WEJTAP™ hand-held wire brush for cleaning surface contact areas on non-energized conductors.

**WEJTAP™ KIT  
ORDERING  
INSTRUCTIONS**

**Type WTCC  
(Carrying Case Only)**

WEJTAP™ plastic carrying case. Designed for rugged use in all weather conditions. It accommodates WEJTAP™ installation tool, removal clips, and cleaning kit.

**Type WABAG**

WEJTAP™ accessories bag is designed for use in carrying installation tool(s), removal clips, and cleaning kit. Hotstick accessories may be accommodated as well. Holders for power boosters are conveniently located on the outside of the bag.

### WEJTAP™ In-Line Disconnect

The BURNDY® In-Line Disconnect utilizes proven WEJTAP™ Technology in combination with industry standard components to provide reliable performance of switch applications.

- Utilizes WEJTAP™ connectors for securing the switch to the distribution line in tension applications.
- Utilizes industry recognized and proven GST&D Products, LTD. blade components along with dual Advance Rubber Products, Inc., Insulators attached to a BURNDY® designed yoke plate assembly.
- WEJTAP™ In-Line Disconnect designed for use in gloving and hot stick applications in conjunction with an industry standard load break tool.
- Dual insulators minimize the switch movement during opening and closing of the blade.
- Installation steps are minimized. The switch can be snapped directly on the line and secured with our conductor pivot retainer, designed into the switch frame.
- WEJTAP™ tooling is used to secure the "C Member" to the built-in wedge feature of the frame. Providing reliable mechanical and electrical performance.
- The blade is positioned on the switch to simplify cutting the conductor during installation.
- In-Line Disconnect is removable and reusable.
- Other conductor sizes available. Please contact factory.

**WADM Bolted Wedge  
In-Line Disconnect Switch**

Combining with the best features of the WEJTAP™ In-Line Disconnect Switch, the WADM Bolted Wedge enhances the range taking capabilities with an innovative hybrid bolted connector while maintaining the time saving features.

1. Bolted hybrid connector combines bolted technology with wedge features to make a reliable connection while taking the guess work of knowing when “tight is tight”.
2. Spring loaded pivot retainer snaps onto the conductor freeing the hands of the installer to quickly and safely complete the installation.
3. Dual insulators minimize the switch rotation during opening and closing, especially in mid-span applications.
4. The switch can be easily removed and reused (reconditioning required).

## UNDERGROUND SYSTEM CONNECTION AND PROTECTION

Nowhere in the distribution of electrical power are the problems of connecting conductors and equipment against the effects of fault currents as complex as in underground systems. For more than 85 years, BURNDY® engineers have worked closely with utilities to develop devices for connecting and protecting conductors and associated equipment in underground systems. These devices, with their inherent dependability and economy, have contributed to the rapid growth of underground systems throughout the country. To assist utility personnel in more effectively selecting and applying these devices, the engineering talent and experience of BURNDY have been pooled to prepare this technical section, and the catalog information that follows.

These devices are designed for use in both radial and network type underground systems. Radial systems (Fig. 1) distribute power economically except in high load density areas where a high degree of service reliability is required.

Network systems (Fig. 2) have become standard for AC power distribution where load density is high and service continuity must be assured under nearly all conditions. The improved equipment and methods which are described in this catalog have been designed to meet these secondary network system requirements and to reduce the cost of installation and maintenance.

### Early Problems in Underground Connections

Despite the many advantages of underground distribution, a major problem was that of making connections in congested manholes or junction boxes. The necessary procedure - soldering conductors, taping joints, and wiping lead covered cable - was so complex, that it demanded considerable skill and was time consuming and costly. This involved procedure had to be repeated each time a service was added to a main. When completed, the multiple-branch joints were excessively bulky and their electrical and mechanical performance suffered from the shortcomings of soldered connections.

The installation of underground distribution made greater strides as those early connection methods gave way to specialized products and techniques developed by BURNDY at the request of, and in close collaboration with, engineers of leading utilities. These specialized connectors were easier and more economical to install, more compact, and more dependable electrically and mechanically.

For installation in conjunction with these connectors, BURNDY also developed products to protect the secondary system from the effects of fault currents. The continuing improvement of these products based on field experience and laboratory research, is contributing to even greater dependability and economy in underground distribution.

### Design Objectives in Connectors for Underground

While each of the principal types of equipment described in the following pages has been designed to meet particular service requirements, all have several basic objectives in common:

**Reliability:** To minimize outages and their serious consequences in the high load density areas serviced by underground systems.

**Ease of Installation:** Compact for easy installation in the confined space of a manhole and transformer vaults. Mechanical connections that eliminate difficult solder joints.

**Economy:** By reducing the time and skill required for installation of a dependable, insulated compact connection.

**Versatility:** For permitting easier changes, expansion, and additional services with a minimum of system shutdown.

Figure 1: Radial Secondary Distribution System

Figure 2: Typical Secondary network Equipped with Limiters

K-3

## TYPES OF BURNDY® UNDERGROUND CONNECTORS & ACCESSORIES

### The MOLE™ and HYCRAB™

The most popular of the engineered connectors developed specifically for underground manholes and transformer vaults are the MOLE™ and HYCRAB™ that provide for multiple connections at a single junction point of main, feeder, and service cables. Pre-insulated to eliminate extensive taping, these connectors are essentially bus bars with several cable outlets: mechanical installation of the MOLE™, and compression installation in the HYCRAB™.

### Limiters and Fuses

To prevent "roasting" of cable insulation, resulting from fault current, BURNDY has developed cable limiters that are inserted in each secondary cable at all junction points. Network protector fuses have been designed to back up the protector breaker in the event of a malfunction during a transformer or primary cable fault. By coordinating the time current characteristics of the fuse with those of the cable limiters, the possibility of limiter blowing on primary faults is eliminated, which in turn reduces the fault finding task. Also, limiter, fuse, and cable insulation characteristics must be carefully coordinated to assure isolating a fault on the secondary before it can cause extensive damage or interrupt service in other sections of the secondary system.

### High Capacity Limiter 200,000 Amperes at 600 Volts

The BURNDY® High Capacity Limiter is designed to economically protect electrical distribution systems from the destructive effect of high energy faults. The increasing number of 600 volt secondary network installations for industrial and commercial applications demand a cable limiter that can safely interrupt 200,000 amperes (symmetrical available) and one that will also completely coordinate with the higher voltage network protector fuses.

Available fault currents as high as 200,000 amperes rms at 600 volts across the fusible elements have been interrupted during tests on the

BURNDY® High Capacity Limiter. The power factor during these tests was less than 15%, thereby imposing the most difficult clearing conditions. No external disturbance is experienced upon clearing fault currents from the "float" value to 200,000 amperes. The quartz filler absorbs the intense energy generated by interrupting the fault current. The quartz fuses into tubular fulgurites, with a high dielectric strength, and forms an insulating barrier between the melted link sections. This action prevents restrike of the internal arc. The rugged glass melamine housing provides a vessel that completely contains the developed energy.

This carefully developed time-current characteristics and rigid manufacturing tolerances assure proper coordination with the network protector fuses and the insulation damage characteristics of 4/0, 250, 350, 500, and 750 kcmil cable.

The High Capacity Limiter is available in four variations to accommodate a variety of installation practices. The Type HYS has cable sockets at both ends, which allow for indenting to the cable ends with a hydraulic BURNDY® HYPRESS™. The HYAO type has an offset lug on one end which permits back-to-back mounting on bus bar.

For those installations where the BURNDY® MOLE™ product is used for manhole junctions or transformer vault buses, the Type HYM permits a replaceable connection of the limiter directly to the MOLE outlet at one end and a compression cable connection at the other.

Modern electrical distribution systems require low

cost protection to safeguard costly equipment and quickly isolate faults, so that the undamaged portions of the system may function normally. BURNDY® High Capacity Limiters assure positive, economical protection when installed in properly designed systems.

### Compression Connectors

BURNDY® HYDENT™ compression type connectors, and installation tools, have been designed for splicing and terminating copper as well as aluminum underground cables, in both primary and secondary circuits. BURNDY tools and dies are custom designed to produce sound electrical, and mechanical joints on BURNDY connectors. The use of the BURNDY® Engineered System with matched tools, connectors and dies, assures optimum results.

### Residential Underground

The trend toward improvement in neighborhood appearances, and the elimination of storm outages, tree trimming, etc. has created the need for residential underground distribution. To meet these needs, BURNDY offers: Mechanical type pre-insulated multi-conductor terminal connectors for submersible transformer locations; and compact multiconductor connectors for above ground transformer and enclosures. For service taps, BURNDY offers: Pre-insulated multi-conductor compression and mechanical connectors; and a range taking compression connector for below grade service. Power pedestals for direct burial, above ground application, and conduit systems are offered. Residential Underground Fuse Block assembly with replaceable fuse for each service cable is also available.

## MULTIPLE OUTLET CONNECTORS

K-5

### Connectors for Aluminum

For systems where aluminum is used, connectors especially designed for aluminum conductors are available in bolted and compression types: HYCRAB™, HYPLUG™, HYREDUCER™, and HYSOCKET. Aluminum conductors can be connected to standard MOLE™ connectors by using HYPLUG™ adapters.

### Multiple Outlet Connectors

The increasing use in modern electrical distribution systems of junction points where several relatively large cables must be connected, has brought about the development of BURNDY® MOLE™ line equipment to speed up and simplify the making of such connections. The modern tendency toward network systems not only in underground utility practice but also in industrial wiring, has greatly increased the number of multi-connection joints.

The BURNDY® MOLE™ and HYCRAB™ connectors are insulated bus bars with multiple connector outlets for service cables, secondary mains or equipment leads. In the MOLE™, clamping action secures conductors to the connector; in the HYCRAB™, connections are made by indenting with a compression tool. Both

lines of insulated connectors offer the following basic advantages:

1. **Ease of Economy and Installations:** The ease and reduction of time required to make and insulate dependable multi-connections greatly reduces the cost of installation. The compact design makes maximum use of space and provides for simplified racking.
2. **Versatility for System Modification:** The MOLE™ and HYCRAB™ are designed to accommodate the secondary main and service cables, and permit easy modification or later additions. The numerous available connector configurations permit a wide variety of arrangements of cables and equipment connections. The 600 volt rating of the MOLE™ and HYCRAB™ insulation provides for efficient operation at all standard utilization voltages.
3. **Efficient, Dependable Performance:** The MOLE™ and HYCRAB™ connectors assure permanent, high conductivity connections, good moisture seal, and insulation that resists the severest condition encountered in underground installations.

### MOLE™ and HYCRAB™ Insulation

The location in vaults and manholes often exposes these connectors to immersion in water, chemical, and other contaminants, as well as to heat from overload or fault currents. The MOLE™ and HYCRAB™ insulations provide electrical, mechanical, and thermal properties essential to assure the service continuity of underground distribution systems.

Recognizing the importance of proper connection insulation, BURNDY established performance specifications exceeding those of 600 volt cable insulation.

## MULTIPLE OUTLET CONNECTORS (Continued)

### The MOLE™ and MOLE™ Accessories

The BURNDY® MOLE™ is a multi-cable connectors that consists of a pre-insulated copper bus bar with threaded outlets that permit a minimum of two cables to be connected by means of a socket, nut, and cone assembly (Illustration A). The clamping action of the socket, nut, and cone assembly on the cable develops high contact pressures that maintain joint conductivities greater than 100% of the continuous conductor.

The MOLE™ design affords exceptional versatility in four ways:

1. MOLE™ outlets can be plugged-off until needed for the addition of cables.
2. Installed cables can be easily removed.
3. Cable sizes can be increased by changing the socket, nut, and cone assembly.
4. The number of outlets may be increased by joining MOLE™ connectors with a MOLE™ coupler.

### Insulation

The copper bus bar insert is encased in a molded insulating jacket that eliminates crotch taping. The thickness of the jacket prevents any possibility of the insert weight to cause the insulation at the supports to flow away at the high temperatures of fault conditions.

### Ratings

MOLE™ connectors are rated at 1500, 2000, 2500, and 3000 amperes, based on the maximum current the insert cross-section can carry. Each outlet can carry the full rated current of the cable connected to it.

To avoid exceeding the insert rating, the cables should be arranged in such a manner that most current flows directly across the insert. (See Illustration B.)

### Installation

Cables are connected to the MOLE™ by means of a socket, nut and compression cone assembly. The socket is threaded into the MOLE™ insert. The stripped cable end is inserted into nut and compression cone, and then into the socket where it is securely clamped by tightening the nut. The joint is then sealed watertight in one of three ways:

- Taping;
- MOLE™ Outlet Insulating Sleeves, sealed with a minimum of taping;
- NOTAPE™ MOLE™ Sleeve, sealed to the cable and MOLE™ insulation by two non-corrosive hose clamps.

Tests under flooding and other adverse conditions demonstrate that such joints are impervious to water.

### Accessories

A socket, cone and nut assembly is screwed into each MOLE™ outlet to which a cable is to be connected. The socket has a tapered recess into which the clamping nut forces the cable into the compression cone. The cone is slotted to controlled widths and depths for maximum flexibility, and its inside surface is serrated for low contact resistance and high pullout strength.

Plug seal MOLE™ outlets not in use. The MOLE™ is delivered with one-fourth of its outlets sealed with plugs. Additional plugs may be ordered.

MOLE™ couplers facilitate system expansion by joining additional MOLE™ connectors to those already installed. Couplers are easily installed in end or side outlets of the MOLE™, and make connections that are effective both electrically and mechanically.

## HOW TO ORDER YOUR BURNDY® MOLE™

This MOLE™ connector section is arranged so that all the information necessary for ordering standard MOLE™ connections is contained on a single page.

BURNDY® Underground Products  
for Network and Residential Distribution

**MOLE™ TYPE ZM**

1500 AMPERES

**MOLE™ DIMENSIONS**

Cable Range	No. of Outlets	Catalog Number	Length (inches)	Weight (lbs.)
A	1	ZM1-15	7.12	1.1
B	2	ZM2-15	11.12	1.6
C	3	ZM3-15	15.12	2.1
A	4	ZM4-15	19.12	2.6
B	5	ZM5-15	23.12	3.1
C	6	ZM6-15	27.12	3.6
A	7	ZM7-15	31.12	4.1
B	8	ZM8-15	35.12	4.6
C	9	ZM9-15	39.12	5.1
A	10	ZM10-15	43.12	5.6
B	11	ZM11-15	47.12	6.1
C	12	ZM12-15	51.12	6.6
A	13	ZM13-15	55.12	7.1
B	14	ZM14-15	59.12	7.6
C	15	ZM15-15	63.12	8.1
A	16	ZM16-15	67.12	8.6

**Cable Outlet Ranges:**

- Symbol "A" = #6 Str. - 600 kcmil; 5/8"
- Symbol "B" = #2 Str. - 1000 kcmil; 7/8"
- Symbol "C" = 500 - 1500 kcmil; 1-1/8"

**Cable Outlet Arrangement:**

Depending on ampere group, outlets may be all "A" or "B" cable size, or may be combinations of sizes; Outlet #1, "A": all other outlets "B", etc. (See suffix list below.)

**Number of Outlets per MOLE™:**

From 2 to 16 outlets depending on MOLE™ type (any number can be supplied).

**Catalog Numbers, Dimensions, and Weights.**

**MOLE™ CONNECTORS ARE ORDERED BY THE FOLLOWING PROCEDURE:**

- Determine amperage that meets requirements and located it in the MOLE™ ampere page listings.
- Choose MOLE™ configuration desired by Type (ZM, ZME, ZMT, etc.) within ampere group.
- Decide of the number of outlets that meets your requirements.
- Decide on the cable ranges required for each outlet.
- Select cable outlet arrangement for MOLE™ listing: outlet #1, "A": all other "B", etc.

**EXAMPLE:**

Installation load capacity: 2000 amperes  
Configuration: outlets on two sides and one end  
Cable ranges: end outlet to accommodate a 1000 kcmil cable; other outlets: two 700 kcmil, two 600 kcmil and two 500 kcmil cables

**PROCEDURE:**

- Locate 2000 through 2500 ampere MOLE™ groups
- MOLE™ Type ZMT has outlets on two sides and one end
- Cable outlet symbol "B" = #2 Str. - 1000 kcmil. MOLE™ outlet arrangement: Outlet #1 = "B", all other outlets = "B".
- Catalog Number ZMT7-25B is the correct number. See other pages for socket and nut assembly, compression cones and insulating sleeves.

**Suffix List:**

- A3: Outlet #1 = B; all others = A
- A4: Outlet #1 and X = B; all others = A
- A7: Outlet #1 and X = C; all others = A
- A9: Outlet #1 = C; all others = A
- B12: Outlet #1 = A; all others = B
- B72: Outlet #1 and X = C; all others = B
- B92: Outlet #1 = C; all others = B

MOLE™ Connector listings are arranged by:

**Amperes:** 1500; 2000-2500; 3000

**MOLE™ Type:** ZM, ZMT, ZME, etc. within each ampere grouping

**MOLE™ TYPE ZM**

**1500 AMPERES**

**MOLE™ Type ZM** — A compact pre-insulated junction for secondary network cables, with multiple outlets for each cable clamping elements.

**Outlet Plugs** — MOLE™ outlet plugs that facilitate sealing outlets not being used are available, Types Z-P and K-P, sold separately.

**Insulating Sleeves** — Taping operations for watertight joints are greatly simplified by the use of BURNDY® NOTAPE™ Sleeves Type CM or MOLE™ Insulating Sleeves Type Z-C, sold separately.

**Clamping Elements** — Outlet Symbols A or B, refer to socket and nut Type Z-NR, and cone Type Z cable clamping elements accommodated. These must be ordered separately.

**OUTLET RANGE: “A” 6 Str. - 600 kcmil**

Catalog Number	Cable Outlet Arrangement	No. of Outlets	Length Inches L	Approx. Ship Wt. Lbs.
ZM4-15	All Outlets A	4	7-1/8	2.60
ZM6-15		6	10-1/8	4.40
ZM8-15		8	13-1/8	6.20
ZM10-15		10	16-1/8	7.80

For outlet combinations not listed call customer service.

K-9

## MOLE™ TYPE ZMT

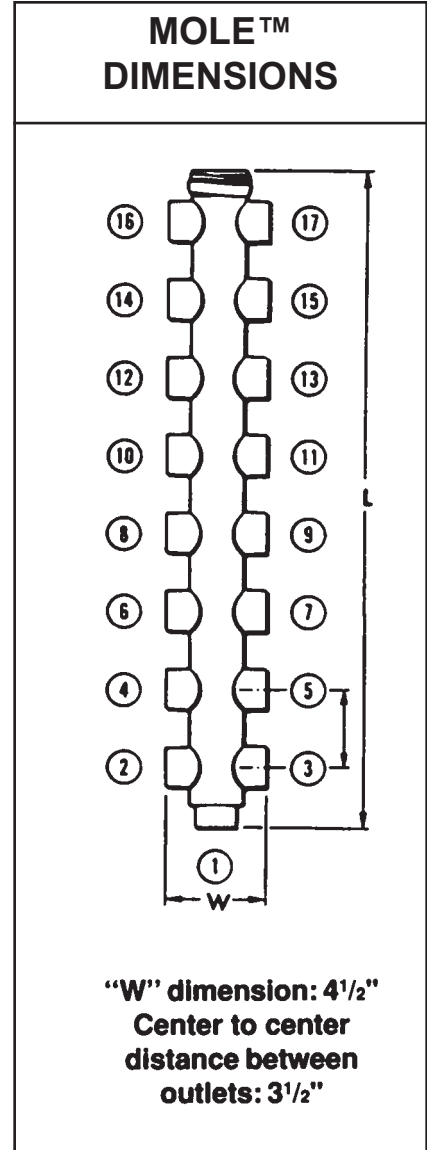

### 1500 AMPERES

**MOLE™ Type ZMT**— A compact pre-insulated junction for secondary network cables, with multiple outlets for cable clamping elements. Future expansion is provided for by an end outlet which can be joined to an additional MOLE™ by Type ZMS couplers.

**Outlet Plugs** — Mole outlet plugs that facilitate sealing outlets not being used are available separately, Types Z-P and K-P.

**Insulating Sleeves** — Taping operations for watertight joints are greatly simplified by the use of BURNDY® NOTAPE™ Sleeves Type CM or MOLE™ Insulating Sleeves Type Z-C are available separately.

**Clamping Elements** — Outlet Symbols A or B, refer to socket and nut Type Z-NR, and cone Type Z cable clamping elements accommodated. These must be ordered separately.

## MOLE™ TYPE ZML

### 1500 AMPERES

**MOLE™ Type ZML** — A compact pre-insulated junction for secondary network cables, with multiple outlets for cable clamping elements. Future expansion is provided for by an end outlet which can be joined to an additional MOLE™ by Type ZMS coupler.

**Outlet Plugs** — MOLE™ outlet plugs that facilitate sealing outlets not being used are available separately, Types Z-P and K-P.

**Insulating Sleeves** — Taping operations for watertight joints are greatly simplified by the use of BURNDY® NOTAPE™ Sleeves Type CM or MOLE™ Insulating Sleeves Type Z-C.

**Clamping Elements** — Outlet Symbols A or B, refer to socket and nut Type Z-NR, and cone Type Z cable clamping elements accommodated. These must be ordered separately.

**MOLE™ TYPE ZMX**

**1500 AMPERES**

**MOLE™ Type ZMX** — A compact pre-insulated junction for secondary network cables, with multiple outlets for cable clamping elements. Future expansion is provided for by an end outlet which can be joined to an additional MOLE™ by Type ZMS coupler.

**Outlet Plugs** — MOLE™ outlet plugs that facilitate sealing outlets not being used are available, Types Z-P and K-P, ordered separately.

**Insulating Sleeves** — Taping operations for watertight joints are greatly simplified by the use of BURNDY® NOTAPE™ Sleeves Type CM or MOLE™ Insulating Sleeves Type Z-C available separately.

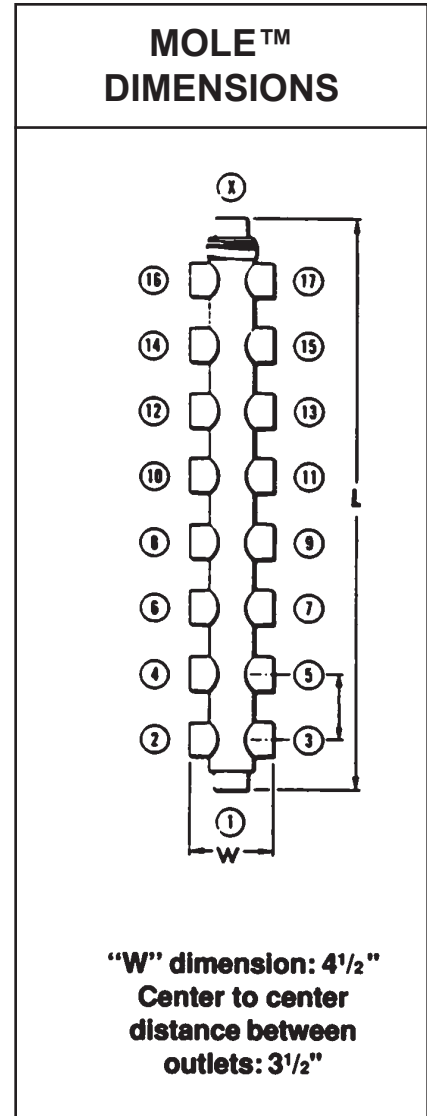

**Clamping Elements** — Outlet Symbols A or B, refer to socket and nut Type Z-NR, and cone Type Z cable clamping elements accommodated. These must be ordered separately.

**OUTLET RANGE:** “A” 6 Str. - 600 kcmil  
 “B” 2 Str. - 1000 kcmil

**MOLE™ TYPE ZME**

**3000 AMPERES**

**MOLE™ Type ZME** — A compact pre-insulated junction for secondary network cables, with multiple outlets for cable clamping elements.

**Outlet Plugs** — Mole outlet plugs that facilitate sealing outlets not being used are available separately, Types Z-P and K-P.

**Insulating Sleeves** — Taping operations for watertight joints are greatly simplified by the use of BURNDY® NOTAPE™ Sleeves Type CM or MOLE™ Insulating Sleeves Type Z-C, sold separately.

**Clamping Elements** — Outlet Symbols A or B, refer to socket and nut Type Z-NR, and cone Type Z cable clamping elements accommodated. These must be ordered separately.

**OUTLET RANGE:** “A” 6 Str. - 600 kcmil  
“B” 2 Str. - 1000 kcmil

**TYPE ZMLDN**

**MOLE™ STUD CONNECTOR**

For Connecting Copper Cables to Network Protector

To terminate one or more cables at the studs of distribution transformers, network protectors or other apparatus. The body, except for the stud clamping element is completely insulated. A separate clamping cap over the stud is provided that permits easy removal of the MOLE™ Stud Connector. This permits work to be done on the Network Protector without unduly disturbing the cables.

**Outlet Plugs** — MOLE™ outlet plugs that facilitate sealing outlets not being used are available separately, Types Z-P and K-P.

**Insulating Sleeves** — Taping operations for watertight joints are greatly simplified by the use of BURNDY® NOTAPE™ Sleeves Type CM or MOLE™ Insulating Sleeves Type Z-C, ordered separately.

**Clamping Elements** — Outlet Symbols A or B, refer to socket and nut Type Z-NR, and cone Type Z cable clamping elements accommodated. These must be ordered separately.

**TYPE ZMS**

**MOLE™ COUPLER**

For Connecting MOLE™

A compact, easy-to-tape MOLE™ Coupler for joining multiple MOLE end-to-end. Allows for expansion of underground systems by joining more MOLE to existing MOLE™ installations. Easily assembled to the end outlets of MOLE™ Types ZMT, ZMX, ZML, and ZMK. Can also be used in side outlets for other types of MOLE™

arrangements. The MOLE™ Coupler has a lock-nut feature which permits pre-positioning of the added MOLE™, and facilitates training of new cables. Makes an effective electrical and mechanical connection.

- OUTLET RANGE:**
- “A” (5/8”) 6 Str. - 600 kcmil
  - “B” (7/8”) 2 Str. - 1000 kcmil
  - “C” (1-1/8”) 500 - 1500 kcmil

**TYPE CM**

**NOTAPE™ MOLE™ SLEEVE**

The BURNDY® NOTAPE™ MOLE™ Sleeve effectively eliminates the necessity of taping from the MOLE™ outlet to the insulation of the incoming cable. The sleeve fits snugly over the MOLE™ outlet and is held securely in place by a non-corrosive clamp. Bushings inside the sleeve are supplied to fit closely over the insulation of the cable. The other end of the assembly is clamped to the cable insulation. For rubber insulated cable two clamps are supplied.

For oil filled cables a third clamp is provided to effect an oil-tight joint.

- OUTLET RANGE:** “A” 6 Str. - 600 kcmil

† Diameter over rubber insulation or lead sheath to be specified by customer.  
 ‡ Diameter over lead sheath to be specified by customer.

Bushings must be ordered separately. They are not supplied with the sleeve. The bushing inside diameter is sized in 64ths.

K-35

## TYPE Z-C

### MOLE™ OUTLET INSULATING SLEEVE

An effective aid in insulating MOLE™ outlets to produce a secure watertight joint with a minimum of taping. Fits over the MOLE™ outlet and over the maximum outer diameter of insulated cable. The difference between the I.D. of the standard sleeve and the O.D. of the cable insulation is taken up by wrapping the cable with several turns of rubber tape. The only external taping required to effectively seal the joint is the small area at each end of the sleeve.

\* Build up insulation of MOLE™ Joint with rubber tape to equal inner diameter of Insulating Sleeve, for insulating sleeve with inner diameter other than standard call customer service.

## HYCRAB™ CONNECTORS

One of the most economical devices for connecting several cables to a common junction point is the HYCRAB™, which is essentially a bus bar with a number of compression-type connector outlets, pre-insulated to eliminate taping. Like the MOLE™, the HYCRAB™ fits into a limited space, is simple to rack, and facilitates adding future cables.

### Insert and Insulation

Having an insert similar to that of the MOLE™, the HYCRAB™, has connector outlets of the BURNDY® HYDENT™ compression type. These tubular elements are inserted into the cable by BURNDY® HYPRESS™ installation tools and dies, designed to compress connector and cable together with indents of controlled depth. HYDENT™ compression connections are made quickly and easily, have relative conductivities

of 100% or higher, are electrically stable, and mechanically secure.

The HYCRAB™ is insulated by a jacket of molded rubber to resist prolonged exposure to oil or other contaminants.

### Installation

Insulation fingers are rolled back to expose the tubular outlets, sufficiently spaced to allow for the convenient operation of BURNDY® HYPRESS™ compression tools. Cable ends are inserted into the outlets. Each is crimped with one or two indents, and the fingers are rolled forward again to cover the outlets. Installation is completed by taping the short space between the tip of the finger and cable insulation.

### Variations and Accessories

Uninsulated HYCRAB™ connectors for joining bare neutral cables are available in the same range of sizes and number of outlets as the insulated HYCRAB™. By using reducing adapters, the HYCRAB™ can accommodate service wires as small as #6, in addition to the 4/0 or 500 kcmil cable sizes for which these connectors are ordinarily used.

## TYPE YM

### INSULATED HYCRAB™

A compact insulated crab joint for connecting underground cables at junction points. Two outlets, one on either side of the HYCRAB™ body are ready for immediate use. All other outlets are sealed with vulcanized rubber plugs which are easily removed when future installations are made. This unit eliminates bulky, difficult crotch taping. By using Reducing Adapters, Type Y-R the HYCRAB™ can be installed on cable sizes from #6 to 500 kcmil (e.g., use Y3428R to install 4/0 into YM4-34).

## TYPE YNM

### HYCRAB™

#### For Joining Bare Neutral Cables

A compact uninsulated multiple connector for joining bare neutral underground cables. For insulated crab joints, see HYCRAB™, Type YM. Reducing adapters, Type Y-R, permit the HYCRAB products listed below to take a full range of cable sizes from #6 to 500 kcmil. For proper installation, see table below.

\* Bare HYCRAB™ can be furnished to accommodate both 4/0 and 500 kcmil cables.

## NETWORK PROTECTION

The primary purpose of network protection is the controlled interruption of fault currents before damage occurs to cable insulations and associated equipment, and the elimination of unnecessary service interruptions. The limiter and fuses for network protection are closely associated with the connectors and are equally vital to the safe, continuous operation of an underground system.

BURNDY has developed protective devices that have played a major role in reducing underground system outages and the subsequent expenses incurred in the loss of service and replacement of damaged cables. A basic objective has been the design of limiter-connector combinations that, in addition to protecting against the effects of fault currents, economize on both space and installation costs.

Limiters are designed to protect underground secondary cable from damage by fault currents of two principal kinds: high energy arcing faults and sustained faults. The arcing fault, usually of shorter duration and lesser intensity, is more common. While this type of fault may sputter briefly and then clear, some may be sustained long enough to "roast" the insulation.

A sustained fault occurs when two conductors come solidly into contact and permit the flow of heavy short-circuit currents. Without suitable protection, these fault currents are heavy enough to damage cable insulation and often produce combustible fumes accompanied by fire and explosion.

Installed at each end of cable sections, limiters have time-current characteristics designed to avoid unnecessary outages. Network protector fuses, installed in the network protector on the load side of the breaker, provide back-up protection against failure of a network protector to open on a primary fault. Coordinated characteristics of limiters and fuses provide for fault currents to be interrupted before they can cause damage, but only under predetermined time-current conditions, and only in those parts of the system where interruption is necessary.

### Limiters

Engineered to interrupt the circuit before cables carrying a fault current are usually damaged, limiters act to confine damage to the section of cable where the fault occurred. The limiters are designed to prevent unnecessary clearing and will

"hang on" during:

1. Faults with wold clear without damaging cable insulation
2. Overloads from motor starting, load transfer because of primary fault, or temporary overload during fault conditions
3. Overloads from loss of secondary conductors caused by clearing of other limiters
4. Reverse current flow through the network protector on primary faults
5. Faults on other secondary cables

For proper protection BURNDY® limiters are designed with time-current characteristics approximating the insulation damage curve of the cable with which they will be used. Figure 4 shows time-current characteristic curves for a range of standard (250 volt) limiters, superimposed on insulation damage curves for several cable sizes. Although the limiter curve crosses the insulation damage curves, in practice the limiters will blow before the insulation can deteriorate. The insulation damage characteristics represent three phases equally loaded in a duct. Since low-current faults seldom affect more than one phase at a time, the rate of heat generated in the conduit is much less than for a balanced 3-phase fault, and the time to reach the damage point is appreciably longer. Practical experience confirms that limiters provide protection during low-current, as well as high-current faults.

### Construction

The limiter is essentially a compression-type electrical connector with its center section accurately formed to provide a fusible element. This fusible element is enclosed in a molded ceramic shell and the assembly encased in an insulated sleeve.

Interrupting capacities are as follows:

**Standard Limiters:** 30,000 amps at 250V

**Replaceable-Link Limiters:** 20,000 amps at 250V

The protection probably lies in the fact that the fault impedance reduces the actual fault current to a value considerably less than calculated.

### Replaceable-Link Limiters

Replaceable-link limiters, which provide faster time-current characteristics (Figure 5), are used in smaller networks, on the fringes of larger networks, at points where radial feeders leave a network, and for fusing service cables. As its name implies, this limiter is also distinctive in that its fusible link is replaceable.

Figure 4: Current - Amperes Standard 250 Volt Limiters

Figure 5: Current in Amperes Replaceable-link Limiters

## NETWORK PROTECTION (Continued)

Figure 7: Amperes in Thosands

Figure 8: Current in Amperes

K-40

### Limiter Variations

The Limiter Lug provides a fusible connection between a cable and a flat surfaced terminal of a transformer or other apparatus. The Limiter Tap incorporates a Limiter Lug assembly, modified to terminate cable to a ring bus. This straight Limiter is made for installation in a single conductor cable. The Molimiter is a Limiter designed so that one end is crimped onto a cable and the other fits the clamping element of a MOLE™ outlet. The Limiter HYCRAB™ connector is essentially a HYCRAB™ with a fusible section in each of its outlets.

### Network Protector Fuses

Type Y and Z Network Protector Fuses provide back-up protection in case the protector breaker fails to operate during a primary fault. The fuse time-current curves (Figure 7), are similar to those of the limiter, thus permitting correct fuse-limiter coordination for complete network protection.

### Design and Construction

The fusible element for a Type Y or Type Z Fuse is a tin-plated copper bar with reduced section, encased in an arc-resistant molded ceramic enclosure. One-piece construction eliminates possibility of joint failure and assures maximum reliability.

### Limiter-Fuse Coordination

To isolate a fault before it can cause extensive damage, and without interrupting service in other sections of the network, limiters and fuses must clear at the proper time and in proper sequence, depending on the fault's location in the primary or secondary system. When a primary fault occurs, the fuse should clear before any limiters blow. For a secondary fault, limiters should clear the fault before the network protector fuse opens. Failure of limiters and network protector fuses to function in proper sequence could cause cascading of other Fuses, or clearing of secondary faults by Fuses rather than limiters. Premature blowing of Limiters not in the faulted section could cause unnecessary service interruption in sections remote from the fault.

To assure the coordinated functioning of fuses and limiters throughout a system, proper rating must be selected. The four-step "Coordination Study" (Figure 8) used in a 4-parallel cable feed system from the protector to the first secondary junction is a typical example of how to select proper ratings.

1. Plot the damage characteristic curve of the cable insulation in the system. Curves for Class L620 (260° C or 500° F), appear in Figure 5.

2. Plot the time-current characteristic curve of the same limiter in Parallel secondary mains, assuming it carries 40% of total backfeed current. Allowing for the possibility of unequal current distribution of secondary mains, the "40% Cable Limiter Curve" provides a conservative basis for selection of network protector fuses.
3. Select a fuse with its time-current characteristics (Figure 7) lying between the limiter curves plotted in steps 2 and 3.

This procedure avoids the selection of fuses so light that they might overheat the network protector or clear unnecessarily, possibly cascading other fuses in the network; or so heavy that transformer secondaries might be damaged or limiters blow before the fuse. Proper limiter-fuse coordination, facilitated by the use of fuses and limiters that are precisely matched, assures effective protection without unnecessary interruption.

**TYPES YFS-CR AND YFS-CP**

**LIMITER ASSEMBLY**

With Ceramic Shell and Rubber Sleeve for Insulated Cables

The Limiter combines the functions of fuse and connector. The fusible element which is an integral part of the connector will clear faults that are great enough to cause damage to the cable insulation. However it will not clear on minor overloads of short duration. Fusing characteristics of the limiter are shown in technical section. For HYPRESS™ installation, see table below.

For conductor sizes not listed call customer service. To specify a fast acting limiter in any configuration insert an "F" before the conductor number (e.g., YFSF34CR specifies a 1/2 thick limiter section).

## TYPE YFS-CPL

### LONG LIMITER ASSEMBLY

With Ceramic Shell and Rubber Sleeve for Paper-Lead Cables

The Long Limiter performs the same functions as the Limiter shown, Types YFS-CR and YFS-CP. It differs in that it has extra long cable sockets which are preferred by some for use on paper insulated cable. The end seams are sealed to make the sockets oil tight. Fusing characteristics of the Limiter are shown in technical section. For proper HYPRESS™ installation, see table below.

For conductor sizes not listed call customer service. To specify a fast acting limiter in any configuration insert an "F" before the conductor number (e.g., YFSF34CR specifies a 1/2 thick limiter section).

## TYPE YFA-CPL

### LONG LIMITER LUG ASSEMBLY

With Ceramic Shell  
and Rubber Sleeve —  
for Paper-Lead Cables

A Limiter Lug similar to Type YFA-CR or YFACP. In this case, however, we supply an extra long cable socket which is sometimes preferred for use on paper insulated cable. The end seams are sealed to make sockets oil tight. Fusing characteristics of the Limiter Lugs are shown in the technical section. For proper HYPRESS™ installation, see table below.

For conductor sizes not listed call customer service.

- ① Y35P3 Indentor Adaptor required for Y34PR Indentor
- ② Catalog number PUADP1 Adaptor is required to use "U" type dies in the Y46 series tools

TYPES YFAR, YFAP

LIMITER LUG

For Use with Limiter Lug Assembly

The Limiter Lug incorporates an accurately determined fusible section as an integral part with its terminal end. The fusible section is so selected that it will prevent the cable from roasting or damage from a short circuit, although it will not clear on minor overloads of short duration not harmful to cable insulation. For proper HYPRESS™ installation, see table below.

For conductor sizes not listed call customer service.

## TYPE YFAP-L

### LONG LIMITER LUG

For Use with Limiter Lug Assembly

Similar to Limiter Lug Types YFAR and YFAP, except that this type provides a long oil tight cable socket, preferred by some users of paper-insulated cables. Fusing characteristics shown in technical section. For HYPRESS™ installation, see table below.

For conductor sizes not listed call customer service.

MOLIMITER™ ASSEMBLY

With Ceramic Shell and Rubber Sleeve for Insulated Cables

The MOLIMITER™ is used for fusing underground cables at junction points. The unit is designed for use with the BURNDY® MOLE™ and provides Limiter protection for cables, which terminate at the MOLE™. The cable end is installed in the MOLIMITER™ cable socket (see Installation Information in table below) and then the MOLE™ end is installed in the MOLE™ outlet Socket and Nut assembly. Any MOLIMITER which has burned clear may be quickly replaced. For time current characteristics see the technical section.

For conductor sizes not listed call customer service.

## TYPE YFM-CPL

### LONG MOLIMITER™ ASSEMBLY

With Ceramic Shell and Rubber Sleeve for Paper-Lead Cables

The Long MOLIMITER™ differs from the standard MOLIMITER™ only in its extra long cable socket. This socket, with the end seam sealed oil tight, is preferred by some for use on paper insulated cables. Time-current characteristics are shown in the technical section. For proper HYPRESS™ installation, see table below.

- For conductor sizes not listed call customer service.

MOLIMITER™

For Use with Long MOLIMITER™ Assembly

The MOLIMITER™ combines an accurately determined fusible section with both a MOLE™ Socket end and a cable socket. Designed to clear on overloads that would injure the cable insulation, the MOLIMITER™ may be easily and quickly replaced. For time current characteristics of MOLIMITER see the technical section. For proper HYPRESS™ installation, see table below.

For conductor sizes not listed call customer service.

## TYPE YFMP-L

### LONG MOLIMITER™ ASSEMBLY

For Use with Long MOLIMITER™ Assembly

Similar to Type YFMR and YFMP except for a long oil tight cable socket preferred by some users of paper-insulated cable. Fusing characteristics shown in the technical sections. For proper HYPRESS™ installation, see table below

For conductor sizes not listed call customer service. To specify a fast acting limiter in any configuration insert an "F" before the conductor number (e.g., YFSF34CR specifies a 1/2 thick limiter section).

- ① Y35P3 Indentor Adaptor required for Y34PR Indentor
- ② Catalog number PUADP1 Adaptor is required to use "U" type dies in the Y46 series tools
- ③ Catalog number PT6515 Adaptor is required to use "U" type dies in the Y45 series tools

**NOTE:** To specify a fast acting limiter in any configuration insert an "F" before the conductor number e.g. YFSF34CR specifies a 1/2 thick limiter section.

**TYPE VYFT**

**LIMITER TAP ASSEMBLY**

For Insulated Cables

The Limiter Tap is suitable for making Limiter connections to a cable ring bus in a manhole or transformer vault. It can be installed on oilimpregnated, paper insulated, or rubber insulated cable. Fusing characteristics of the Limiter are the same as Type YFA shown in the technical section. The rubber sleeve and insulating hood reduce taping to a minimum. Catalog Numbers shown include hoods. If no hood is required, eliminate one "C" from the Catalog Number. Replaceable Link Limiter Taps can be ordered. For proper HYPRESS™ installation, see table below. Paper-Lead Cables If a long cable socket is preferred for use on paper insulated cable add

"L" to the catalog number (e.g., VYFT3428CCP becomes VYFT3428CCPL).

To specify a fast acting limiter in any configuration insert an "F" before the conductor number (e.g., YFSF34CR specifies a 1/2 thick limiter section).

**TYPE NYFT**

**LIMITER TEE TAP**

For Rubber or Paper Insulated Cables

The NYFT Limiter is similar to Type VYFT except the run conductor is clamped with a four bolt cap and the Limiter Tap is removable by means of a socket and nut assembly. The Limiter current characteristics are the same as Type YFA shown in the technical section.

## TYPE LYS

### REPLACEABLE LINK LIMITER

With Ceramic Shell and Rubber Sleeve for Insulated Cables

The Replaceable Link Limiter incorporates the functions of both fuse and coupler. For use with rubber and paper-insulated cable, it is designed to facilitate rapid and inexpensive replacement of Limiter Links upon clearing. It also permits, if desired, the use of a Link rated for a lower ampere capacity than supplied with our standard Limiter. For proper HYPRESS™ installation, see table below.

K-54

Catalog Number	Cable Size	** (Max. Cable Dia. Over Insul. Inches) A	Number of Indents in Cable Socket	* Link Supplied		Installation Information

\* Fuse link supplied is selected on the basis of a minimum blowing current of approximately twice the NEC rubber insulated cable rating. Refer to Time Current curves shown and specify if another size is desired.

\*\* The standard end bushing supplied is for maximum cable insulation diameters as shown. Compact cable will require a bushing with a smaller inside diameter to accommodate the smaller insulation diameter of the cable. If other than standard bushing is required, contact customer service.

To specify a fast acting limiter in any configuration insert a "F" before the conductor number (e.g., YFSF34CR specifies a 1/2 thick limiter section).

**TYPE LYM**

**REPLACEABLE LINK  
MOLIMITER™**

With Ceramic Shell and Rubber Sleeve for Insulated Cables

The Replaceable Link MOLIMITER™ is used to fuse underground cables at junction points with the BURNDY® MOLE. The "Replaceable Link" feature permits the selection of one of several links. In addition, the replacement of links that have burned clear is both rapid and inexpensive. For use with both rubber and paper insulated cables. The MOLE™ end of the MOLIMITER™ is installed in the MOLE™ Socket and Nut Assembly, while the cable socket end is HYPRESS™ installed, see table below for proper installation.

K-55

## TYPE LF

### LIMITER LINK

For Use with All Replaceable Limiters

Made of pure copper, the Limiter Link is controlled dimensionally to close tolerances to maintain accurate fusing characteristics. Refer to Time-Current Characteristic curve shown below and specify rating desired. The Limiter Link is supplied enclosed in a shell with heatproof chamber to confine and break the arc created by fusing.

*Catalog Number	Ampere Capacity	App. Ship Wt. in Lbs.

LF2038	300A	0.11
LF2065	400A	0.12
LF2108	500A	0.15

\* For use with LYS and LYM.

K-56

**Current in Amperes**  
**Time-Current Fusing Characteristics of Type LF Limiter Links**

The nominal current ratings of these Limiter Links are approximately one-half the minimum currents required to clear the fuses. The general slope and shape of the curves are similar to those of the time-current curves of the Limiters. The Type LF Limiter Links are made of pure copper with dimensions carefully controlled in order to maintain accurate fusing characteristics.

**TYPE LYBASEH**

**LIMITER BASE**

For Use with all Replaceable Limiters

A heat resisting, high impact, molded phenolic base for mounting HYDENT™ Cable lugs or MOLIMITER™-lugs. The bases are supplied with bolts fitted in place with retaining rings, enabling the lugs to be easily assembled to BURNDY® Replaceable Limiter Links. They may be purchased separately for use with all Replaceable Limiters.

Catalog Number	For Use with	App. Ship Wt. in Lbs.
LYBASEH	LYM	0.32
	LYS	

**TYPE LYS34P2**

**LIMITER SLEEVE**

For Use With Replaceable Limiters

A molded sleeve for insulating the Replaceable Limiter and MOLIMITER™ assemblies. Similar to other component parts, the insulating sleeves may be purchased separately. These sleeves are used in conjunction with the LYS-P6 bushings.

K-57

Catalog Number	For Use with	App. Ship Wt. in Lbs.

## TYPE LYS-P5

### HYLUG™

For Use with Replaceable Limiters

Fabricated of high copper alloy, this terminal has a sealed cable socket for use with paper insulated, oil-impregnated cables as well as rubber-insulated cables. Tin plated to retard corrosion and prevent discoloration. The HYLUG™ is for use with LYS and LYM.

K-58

K-59

TYPES Y, Z

NETWORK PROTECTOR FUSES AND CERAMIC ENCLOSURES

Type Z Network Protector Fuses are designed to coordinate with the fusible sections of the Limiters as well as the Protector characteristic itself. A Ceramic enclosure is designed especially to form an arcing chamber for these fuses. The ZH50C Enclosure is designed with high temperature glass observation windows to allow for easy viewing of the fusing element. The hole spacings in the tongues of these fuses are such that they will fit standard Network Protectors. See Time Current characteristic curve below. The Fuse element and the housing must be purchased separately.

## HIGH CAPACITY LIMITER - 200,000 AMPERES AT 600 VOLTS

The BURNDY® High Capacity Limiter is designed to economically protect electrical distribution systems from the destructive effect of high energy faults. The increasing number of 600 volt secondary network installations for industrial and commercial applications demand a cable limiter that can safely interrupt 200,000 amperes (symmetrical available) and one that will also completely coordinate with the higher voltage network protector fuses.

Available fault currents as high as 200,000 amperes rms at 600 volts across the fusible elements have been interrupted during tests on the BURNDY® High Capacity Limiter. The power factor during these tests was less than 15%, thereby imposing the most difficult clearing conditions. No external disturbance is experienced upon clearing fault currents from the "float" value to 200,000 amperes. The quartz tiller absorbs the intense energy generated by interrupting the fault current. The quartz fuses into tubular fulgurites, with a high dielectric strength, and forms an insulating barrier between the melted link sections. This action prevents restrike of the internal arc. The rugged aluminum housing and cast epoxy end seals provide a vessel that completely contains the developed energy.

The carefully developed time-current characteristics and rigid manufacturing tolerances assure proper coordination with the network protector fuses and the insulation damage characteristics of 4/0, 250, 350, 500 kcmil and 750 cable.

The High Capacity Limiter is available in four variations to accommodate a variety of installation practices. The Type HYS cable sockets at both ends, which allow for indenting to the cable ends with a hydraulic BURNDY® HYPRESS™. The HYA has an off-set lug on one end which permits back-to-back mounting on bus bar. They HYA also allows cable to installation with no off-set.

For those installations where BURNDY® MOLE™ connections are used for manhole junctions or transformer vault buses, the Type HYM permits a replaceable connection of the limiter director to the MOLE™ outlet at one end and a compression cable connection at the other.

Modern electrical distribution systems require low cost protection to safeguard costly equipment and quickly isolate faults, so that the undamaged portions of the system may function normally. BURNDY® High Capacity Limiters assure positive, economical protection when installed in properly designed systems.

**NOTE:** Today's fault currents are growing. If you need higher fault current ratings, please contact the factory.

Notes:

1. For insulated version add suffix "-C" to Catalog Number (example: HYMS34C).  
 2. High Capacity Limiter. 200kA interrupting capacity at 600V AC.

3. Cable end utilize dies with Y35, Y39, Y46, Y45, Y750 tools (750 kcmil size units cannot be installed with the Y35 HYPRESS™).

④ For fast operating limiter use "F"; for slow or standard operating limiter use "S" before conductor number (example: HYMF34 or HYMS34) see Time-Current Characteristics.

5. For other conductor sizes, contact the factory.

## PRODUCTS FOR UNDERGROUND RESIDENTIAL DISTRIBUTION SYSTEMS

For over 85 years, BURNDY has pioneered and produced economical, dependable connectors and protective devices for urban underground distribution systems. This extensive experience has been applied to the development of equipment for low cost underground distribution systems for light commercial and residential areas.

Increasing interest by home buyers and developers has created a need for URD components comparable in cost with those used in overhead systems.

Using connectors designed for other purposes, early URD installations were relatively expensive. Recognizing the need to reduce installation costs, BURNDY developed a line of connectors specifically for URD.

These products are shown in this section. They are the result of a continuing search for new materials and more efficient production methods to bring down cost to meet the requirements of low cost underground construction.

### TYPE RDMD-28G

#### URD STUD MOLE™

The RDMD-28G Stud MOLE™ is a sub-mersible junction designed to accommodate a range of copper and aluminum conductors. The Stud MOLE™ is designed for use on transformers where a dead front secondary is required. It is insulated with molded EPT rubber. Mates with a 5/8"-11 copper stud. A jam nut is supplied with the MOLE™ to secure and lock it to the stud. It is available with either four or six outlets. All outlets

except one have factory installed removable sealing caps. Tap kits are ordered separately. REA listed.

Also available without insulation and sealing caps.

Catalog Number	Number of Outlets	Insulated
RDMD4-28G3	4	Yes

K-64

### TYPE RDMD-2858D

#### STUD MOLE™

The RDMD-2858D Stud MOLE™ is identical to the insulated RDMD-28G except an adapter is supplied, allowing MOLE™ to be removed from transformer stud without disconnecting the individual services.

Catalog Number	Number of Outlets	Insulated
RDMD4-2858D	4	Yes

### TYPE RDMD-28CR

#### RUBBER INSULATING BOOT

The EPDM rubber force fit boot is designed to provide a completely dead-front and moisture tight installation when used with either the Type RDMD-28G3 or Type RDMD-2858D Stud MOLE™. Bushing end will seal any diameter from 0.875 to 1.125 inch.

Catalog Number : RDMD-28CR

**TYPE RDM-28**

**URD MOLE™**

For Aluminum or Copper

Type RDM-28 MOLE™ is an economical, insulated, submersible service junction suitable for direct burial or for use in enclosures. Disconnectable joints allow additions of new services without disturbing previous installations. Taping is eliminated, heat-shrink or force-fit rubber

sleeves insulate each joint. Rubber is used to insulate the MOLE™ body. Removable sealing covers are supplied on all outlets but two. REA listed Tap Kits, including HYLUG™, hardware and sleeve are ordered separately.

Catalog Number	Number of Outlets
RDM4-28	4
RDM6-28	6
RDM8-28	8

**TYPE RDM-28T**

**URD MOLE™**

For Aluminum and Copper

The RDM-28T MOLE™ is available with five or seven outlets. The single hole outlets are the same size as the RDM-28 series and accommodate the same RYA-UC or RYA-UCR tap kits. The larger two-hole outlet accommodates the 500 or 350 kcmil copper cable secondary supplied with many subsurface transformers. These cables are extended to a junction point where secondary mains or services are connected. Tin-plated copper RYA-C-2 tap kits are used to join the 500 or 350 kcmil copper secondaries to the RDM-28T MOLE™.

Catalog Number	Number of Outlets	
	12 Sol. - 350	350 - 500
RDM5-28T	4	1

Catalog Number		Copper Conductor	Die Index	Tools, Die Set, Catalog No. & (No. of Crimps)
Heat Shrink	Force Fit			Y35* Series Y750, 739
RYA31C-2	RYA31CR-2	350	20	U34RT (4)
RYA34C-2	RYA34CR-2	500		

\*Y35 U Dies with adapter PT6515 can also be used in Y45 series HYPRESS™. Same number of crimps as Y35.

**K-65**

**TYPES RA6UC-SL, RA6UCR-SL**

**URD STREET LIGHTING TAP KIT**

FOR ALUMINUM OR COPPER

URD tap kit for making street lighting taps from URD MOLE™ types RDM-28 and RDM-28T. Each kit accommodates 6 str. - 12 sol. Kits include connector, mounting hardware and insulating sleeve.

Catalog Number		Conductor
Heat Shrink	Force Fit	
RA6UC-SL	RA6UCR-SL	6 Str. - 12 Sol.

## TYPES RYA-UC, RYA-AC

### MOLE™ TAP KITS

For Aluminum or Copper with Type RDM-28 URD MOLE™

The kit consists of Universal HYLUG™, mounting hardware and heat-shrink sleeve. The HYLUG™ is pre-filled with PENETROX™ joint compound and sealed. Installed with common installation tools, three die sets install a range of 4 str.- 350 kcmil. The heatshrink sleeve is lined with a mastic material, providing a positive seal. Installed with standard propane torch, or 500°F electric heat gun. Acetylene heat is too intense and is not recommended.

TYPES RYA-UC, RYA-AC

TYPES RYA-UCR, RYA-ACR

## TYPES RYA-UCR, RYA-ACR

The kit consists of Universal HYLUG™, mounting hardware and pre-lubricated forcefit rubber sleeve. The HYLUG™ is pre-filled with PENETROX™ joint compound and sealed. Installed with common installation tools, three die sets install a range of 4 str.- 350 MCM. The rubber sleeve has internal sealing rings that provide a positive moisture seal by exerting circumferential force on cable and MOLE™ insulation. Pre-lubricating sleeve makes installation easier. REA listed. No trimming required.

\* Overlap Crimps.

\*\* Do not use EEI Die, (11A) to install 4/0 Sol. EC-O.

**NOTE:** Standard mounting hardware is 3/8" button head socket cap screw with captive conical washer. For HEX HEAD bolt with captive conical washer add "HEX" suffix.

**NOTE:** Example: RYA4UCR-HEX. For HEX HEAD bolt and captive flat washer add suffix "HEX1". For HEX HEAD bolt and non-captive flat washer add suffix "HEX2". For HEX HEAD bolt and non-captive conical washer add suffix "HEX3". For Stainless Steel HEX HEAD bolt add "HEX355" suffix.

**TYPE BSSBC**

**RUBBER INSULATED  
SECONDARY CONNECTORS**

For Aluminum and Copper  
Conductors

Rubber Insulated and dual rated for aluminum and copper conductors.

**Features and Benefits**

- Meets the performance requirements of ANSI C119.1, ANSI C119.4 and Western Underground Committee Guide 2.5
- Fully tested to ANSI C119.4 for Class 'A' connectors
- Includes oxide inhibitor
- Supplied with aluminum set screws
- Fabricated from 6061-T6 aluminum alloy for conductivity and strength
- Each unit is individually wrapped and labeled for ease of identification and cleanliness

## TYPE YRB-U

### HYREDUCER™ SPLICE

For Aluminum to Aluminum and Aluminum to Copper

Type YRB-U splice is designed for use within underground systems. Aluminum splices are tin-plated and recommended for use on Aluminum-to-Aluminum and Aluminum-to-Copper cables. All

splices have solid center stop for use with oil filled and non-oil filled cables. The Outside Diameter is held constant to minimize installation dies and

connectors are prefilled with PENETROX™. Rated up to 35 kV.

**TYPE YRB-T**

**HYREDUCER™ SPLICE**

For Copper to Copper

Type YRB-T splice is designed for use within underground systems. Copper splices are tapered and recommended for use on copper-to-copper cables.

All splices have solid center stops for use with oil filled and non-oil filled cables.

The Outside Diameter is held constant to minimize installation dies. Rated up to 35 kV

## TYPES BSSI, BTWTC

### SUBMERSIBLE SPLICE COVERS

Soft Rubber Covers for Insulating

### Features and Benefits

- 600 Volt compression splice connections including those subject to water submersion: Suitable for direct burial. Ends have stepped sealing surfaces to accommodate a wide variety of conductor sizes
- Maintains watertight integrity and full insulating value in all direct buried, underground networks, residential and overhead service joints
- Taping is eliminated and splice preparation is significantly reduced
- Meets the performance requirements of ANSI C119.1, ANSI C119.4 and Western Underground Committee Guide 2.5

**NOTE:** Covers are supplied without connectors.

K-74

**TYPE K-P-C**

**URD**

**URD Service Tap for  
Copper Conductors**

These compact, wide-range-taking, multiple outlet connectors are made of high conductivity copper alloy. Spherical point Allen set screws provide even clamping forces on conductors up to 4/0 Str. Each connector is supplied with an insulating cover. The mechanical clamping elements allow individual cables to be disconnected without disturbing adjacent connections.

Catalog Number			Conductor	Number of Outlets	A	B	C
Complete Assembly	Connector Only	Cover Only					
K6P28C	K6P28	K-PC28	6 Str - 4/0 Str.	6	5-1/8	2-3/4	1-5/8

**COMPRESSION SERVICE  
TAPS AND TRANSFORMER  
TERMINALS**

Where compression-type service taps are required, the wide-range-taking, figure "6" shaped, tap connectors are recommended. They can be gripped in a HYPRESS™ and slipped over the secondary main for easy installation. For above-grade installation, commercially available insulating tubes are often used to cover a series of these taps on each main cable stub. Separation of run and tap cables simplifies taping.

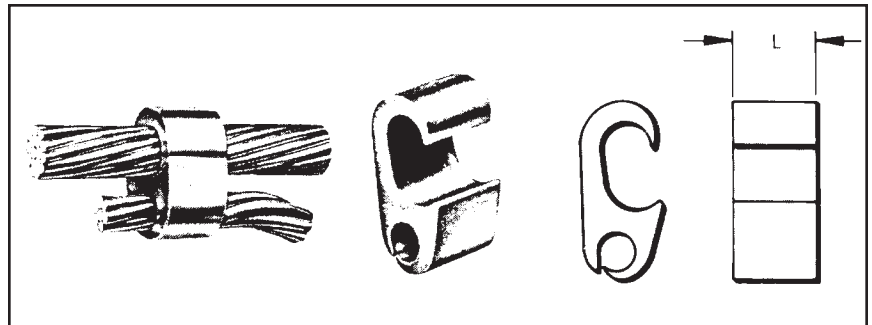

K-75

**TYPE YPC-C**

**TIN-PLATED  
COPPER CRIMPIT™**

**For Copper Conductors**

Made of tin-plated pure copper this connector is recommended for copper service taps in above-grade enclosures or for direct burial. The streamlined design facilitates taping. The plating eliminates reaction with insulators.

Catalog Number	Conductor		L	Die Index	Installation Tooling	
	Run	Tap			Y35, Y750, Y46* HYPRESS™	
					Die Cat. No.	(No. of Crimps)
YPC29C26	2/0 Str.-250	4 Str.-2/0 Str.	1.00	D3	U-D3	(1)

\* Y46 requires PUADP-1 adapter to use U-dies.

## TYPES K6B AND K33B

### URD TRANSFORMER TERMINALS

#### For Copper Conductors

These terminals are companion connectors of the various types and possess the same advantages of wide conductor range and compactness. These features simplify cable terminations in the secondary compartments of pad-mounted transformers. The design also permits individual cables to be disconnected without disturbing adjacent joints.

Made of a high conductivity copper alloy, these compact range-taking connectors provide for connecting up to six copper cables at the transformer terminals. The outlets are equipped with spherical point, tinplated brass socket set-screws to provide even clamping forces on the conductors throughout the cable range.

Where cable sizes exceed 4/0 Str., a pressure bar is added to assure optimum performance.

K33B34-4N	Six Outlets: 4/0 Str. - 500	3	4-Hole

K-76

**TYPE F-A**

**URD FUSED TRANSFORMER TERMINALS**

These Transformer Tap assemblies bolt directly to the secondary terminal pad. They provide for up to eight cables to be fused directly at the secondary terminals. This may be all service taps or combinations of secondary mains and service taps.

Catalog Number	Number of Fuses	L Inches
F22A28	4	6-1/2

Type LF Limiter and HYLUG™ (copper or aluminum). Compression terminals must be ordered separately.

**TYPE K6A34U**

**TRANSFORMER TERMINALS**

For Aluminum and Copper Conductors

Made of aluminum alloy, the massive design minimizes conductor corrosion due to galvanic action. Each outlet is pre-filled with PENETROX™ joint compound and sealed. Plated aluminum socket head pressure screws and aluminum pressure bars prevent conductor damage. Six hole pad allows for adjustable positioning on four hole NEMA spades.

Catalog Number	Conductor	Number of Outlets
K6A34U-6N	Two Outlets 2 Str.-500 Four Outlets 6 Str.-4/0 Str.	6

K-77

**TYPE K-P-UC**

**UNIVERSAL URD SERVICE TAP**

For Aluminum or Copper

Made of aluminum alloy, the massive design minimizes conductor corrosion due to galvanic action. Each outlet is pre-filled with PENETROX™ joint compound and sealed. Plated aluminum socket head pressure screws and aluminum pressure bars prevent conductor damage. Each connector is supplied with an insulating cover.

Catalog Number			Conductor	Number of Outlets	A	B	C

## TYPES BPD & BPD2

### POWER DISTRIBUTION BLOCKS

Dual rated ground pedestal lugs. Rated for 600 volt. Constructed from high strength aluminum alloy 6061-T6. Connectors are all plated to provide low contact resistance.

Plastisol covers dielectric strength rating of 120 volts per mil. Nominal thickness is 156 mils. Covers purchased separately.

**COPPER  
SUBSTATION  
CONNECTORS**

**INTRODUCTION**

BURNDY® electrical connectors are designed to be installed with a minimum of effort, to run cooler than the conductors being joined and to provide optimum performance under all operating conditions.

To achieve this type of performance, extensive research and development time is spent by BURNDY® engineers and scientists to improve manufacturing techniques, materials and designs. As these improvements become available, they are incorporated into both existing and new product lines. This continuous program of product innovation and improvement insures that, as new and more critical applications evolve, high quality connectors from BURNDY® will be available to meet the need.

N-Line connectors are two-piece copper alloy castings assembled with DURIMUM™ (silicon bronze) hex bolts, nuts and washers. They are available for connecting tube or cable.

The Variline incorporates a modified V-bolt as the clamping element for heavy-duty applications. This line is particularly suited for use with flexible and extra flexible cables.

Flat pad connectors used to join cable or tubing terminals to equipment studs.

A variety of bus supports are also available for tube or cable. Some can be adjusted for either a rigid or slide-fit by rotating the clamping cap 180°.

Expansion connectors are used to absorb the stress imposed on the bus by settling ground, thermal expansion and shocks, as in circuit breaker operations. The flexible elements are flat-tinned, copper braid, with sufficient cross sectional area to carry the rated current of the conductors being joined.

L-3

## TYPE NAS

### BOLTED TERMINALS

#### For Use On Cable To Pad

High copper alloy reversible cap terminal for joining a wide range of cable to pads. Tongue is side formed to provide adequate clearance and terminal is designed for one-wrench installation.

Material: Copper Alloy  
Hardware: DURIMUM™ Silicon Bronze

#### Notes :

- Plated versions: add the required suffix to the catalog number. -TN for regular tin plating.
- Please contact factory for other sizes, combinations and availability.
- See NAH family for heavy duty versions.

## TYPE NAH

### BOLTED TERMINALS

#### For Use On Cable To Pad

High copper alloy terminal for joining a wide range of cable to equipment pads. Tongue is side formed to provide adequate clearance and terminal is designed for one-wrench installation.

Material: Copper Alloy  
Hardware: DURIMUM™ Silicon Bronze

**Notes :**

- Plated versions: add the required suffix to the catalog number. -TN for regular tin plating.
- Please contact factory for other sizes, combinations and availability

## TYPE VA

### VARILUG™

#### For Use On Copper Cable

High copper alloy terminal for joining a wide range of cable to equipment pads or bar. Particularly suitable for use on extra flexible cable. One-wrench installation. Type VVA, twin elements secure joint against vibration and flexing. Particularly recommended for use on extra flexible cables. One-wrench installation.

Material: Bronze Alloy  
Hardware: DURIMUM™ Silicon Bronze

#### Notes :

- Plated versions: add the required suffix to the catalog number. -TN for regular tin plating.
- Please contact factory for other sizes, combinations and availability
- Choose type VVA with twin elements for additional joint strength against vibration and flexing. Particularly recommended for use on flexible cables.

## TYPE XA

### BOLTED EXPANSION TERMINALS

#### For Copper Tube to Flat

High copper alloy expansion terminal for tube to flat. Provides for longitudinal movement of tubing. Extra flexible braid carries full load of joint. One-wrench installation.

Material: Copper Alloy  
Hardware: DURIMUM™ Silicon Bronze

**Notes :**

- Plated versions: add the required suffix to the catalog number. -TN for regular tin plating.
- Please contact factory for other sizes, combinations and availability.
- Installation instructions available upon request.

**TYPE NT**

**T-CONNECTORS**

**For Use On Tube To Tube T  
(6 BOLTS)**

High copper alloy T-Connector for tubing run and tap. Slots between bolts provide independent high-pressure areas of contact. One-wrench installation.

Material: Copper Alloy  
Hardware: DURIMUM™ Silicon Bronze

**Notes :**

- Plated versions: add the required suffix to the catalog number. -TN for regular tin plating.
- Items with -HC suffix have hex head bolts; items without the suffix can be either hex head or oval shank head. Both head styles are one wrench installation and offer the same clamping force and functionalities.
- Please contact factory for other sizes, combinations and availability.
- One-wrench installation.

# Substation Copper Bolted T-Connector | 230kV

BURNDY®

## TYPE VT

### T-CONNECTORS

#### For Use On Copper Cable to Cable

High copper alloy T-connector for cable run, cable tap. V-bolt clamping elements accommodate large range of cable and are particularly suited for extra flexible cable. One-wrench installation.

Material: Copper Alloy

Hardware: DURIMUM™ Silicon Bronze

#### Notes :

- Plated versions: add the required suffix to the catalog number. -TN for regular tin plating.
- Please contact factory for other sizes, combinations and availability.
- One-wrench installation.

L-14

**TYPE NS**

**COUPLERS**

**For Use On Straight Tube To Tube**

High copper alloy coupler for joining equal sizes of tube end to end. Slots between bolts provide independent high pressure areas of contact. One-wrench installation.

Material: Copper Alloy  
Hardware: DURIMUM™ Silicon Bronze

**Notes :**

- Plated versions: add the required suffix to the catalog number. -TN for regular tin plating.
- W for extra thick tin plating (including hardware).
- Items with -HC suffix have hex head bolts; items without the suffix can be either hex head or oval shank head. Both head styles are one wrench installation and offer the same clamping force and functionalities.
- Please contact factory for sizes, combinations and availability.

# Substation Copper Bolted Stud Connector | 230kV

BURNDY®

## TYPE FD

### STUD CONNECTORS

#### For Stud to Flat Bar

High copper alloy stud connector allows bolting cable and tubing terminals to equipment studs. Hex head captured bolts provide one-wrench installation. One pad contact surface is on centerline of stud. Pad is finished on both sides. All pads are four hole NEMA drilled.

Material: Copper Alloy  
Hardware: DURIMUM™ Silicon Bronze

#### Notes :

- Plated versions: add the required suffix to the catalog number. -TN for regular tin plating
- Pad is finished on both sides
- Amperage rating given is for indoor conditions
- Please contact factory for other sizes, combinations and availability
- One-wrench installation

## TYPE E-C-G

L-22

### TAP ADAPTERS

**For Use On Copper Cable**

Multi-tap, range-taking cast copper alloy connector designed to take 2, 3 or 4 conductors from a single secondary transformer outlet.

Material: Copper Alloy

**Notes :**

- Plated versions: add the required suffix to the catalog number. -TN for regular tin plating
- Please contact factory for other sizes, combinations and availability

Catalog Number	Number of Conductors	Conductor Size	A Dia.	H	J	L	W
E2C34G1	2	1/0 -500 kcmil	0.78	3.88	1/2	6.25	3.50
E3C34G1	3						5.25
E4C34G1	4						6.88

**TYPE HFBW**

**BAR CLAMPS**

**For Use On Copper Bar**

The clamp assembly eliminates the need for drilling the flat bar and may be used in either indoor and outdoor applications. The open web design provides a uniform clamping pressure while minimizing the weight of the connector.

Material: Copper Alloy

**Notes :**

- Please contact factory for other sizes, combinations and availability.

Catalog Number	A	AA	J Dia.	L	W
HFB44G30W	4.00	4.00	1/2	5.75	5.75

## TYPE HFB-P1

### BAR CLAMP ASSEMBLY COMPONENTS

#### For Use On Copper Bar

To build your own high strength clamp assembly for multiple flat bar using type HFB-P1 bar clamps and clamping hardware, the following tables have been provided. The clamp assembly eliminates the need for drilling the flat bar and may be used in either indoor and outdoor applications. Hardware not included.

Material: Copper Alloy

**Notes :**

- Please contact factory for other sizes, combinations and availability

## TYPE HFB-N

### BAR CLAMP TAP PAD ADAPTERS

L-24

#### For Use On Copper Bar

High conductivity copper, tap pad adapter provides a NEMA drilled contact pad when assembled to the HFB-P1 clamps. Tap connections can be made from copper bus bar(s) without drilling, by bolting standard mechanical or compression terminal pads directly to the pre-drilled tap pad adapter.

Material: Copper

**Notes :**

- Please contact factory for other sizes, combinations and availability

**TYPE NNT**

**T-CONNECTOR**

**For Aluminum and Copper  
Tube to Tube**

Aluminum alloy T-Connector for tubing run and tap. Properly proportioned to permit use on copper-aluminum conductor combinations. Captured hex head bolts permit one-wrench installation. PENETROX™ joint compound recommended on contact surfaces.

Material: Aluminum Alloy  
Hardware: Aluminum Hardware

**Notes :**

- PENETROX™ A joint compound is recommended on contact surfaces
- Please contact factory for other sizes, combinations and availability
- One-wrench installation.

**TYPE XA-A**

**EXPANSION TERMINAL**

**For Use On Expansion Tube To Flat**

Aluminum alloy expansion connector for joining tube to copper or aluminum bar or equipment pads. Flexible aluminum straps allow for longitudinal or lateral movement and carries full current load of the joint. PENETROX™ joint compound recommended on contact surfaces. Pad contact surface is on centerline of conductor.

Material: Aluminum Alloy  
Hardware: Aluminum Hardware

**Notes :**

- PENETROX™ A joint compound is recommended on contact surfaces
- One side of pad finished on centerline of tubing. For finished pads on both sides add suffix "-Q" to catalog number.

L-31

## TYPE UHG

### BUS SUPPORT

For Use On Fixed Or Rigid Pipe To  
Base

Aluminum alloy bus support for mounting tube on post or pedestal insulators. Properly proportioned to minimize conductor corrosion due to galvanic action. Caps are reversible for FIX or RIGID fit. One-wrench installation. Supplied with hardware for mounting to cap of insulator.

Material: Aluminum Alloy  
Hardware: Aluminum Hardware

#### Notes :

- PENETROX™ A joint compound is recommended on contact surfaces.
- Specify base mounting hardware, if required, by adding suffix -B to catalog number.
- For static clips add "-CH" to Catalog Number.

**TYPE WAS-A**

**WELDMENT TERMINAL  
CONNECTOR**

**For Use On Tube To Pad**

Aluminum alloy weld type terminal for joining aluminum tube to copper or aluminum pads. Drilling in pad conforms to NEMA standards. PENETROX™ joint compound recommended on pad contact surfaces.

Material: Aluminum Alloy

**Notes :**

- Welding to be done by customer
- Before welding scratch brush connector and conductor contact surface dry, then apply an oxide inhibitor.
- Tongue finished on one side only. For tongue finished on both sides, add suffix “-Q” to catalog number.

## INTRODUCTION

Connectors for use in EHV Substations must meet essentially the same electrical and mechanical requirements as those for other power connectors. However, operations at extra high voltages imposes an important additional requirement. They must not produce corona discharges that interfere with radio reception and cause energy loss.

Corona forms when the voltage gradient at the surface of a conducting material exceeds a critical value and ionizes the surrounding air. For conductors, the four basic factors that determine surface voltage gradient are distance from ground, conductor diameter, phase spacing and voltage.

In A.C. circuits, there are two basic kinds of corona. Negative corona forms during the negative half cycle, and positive corona during the positive half cycle. Negative corona generally appears as a glow on conventional conductors at about 20 kV rms/cm. Its amplitude is relatively low and cause no significant radio interference. Positive corona appears as a plume at above 30 kV rms/cm. Its amplitude is about 50 times higher than that for negative corona and is the major cause of radio interference.

BURNDY® EHV connectors are designed so that under fair weather operation conditions the voltage gradient at the connector surface will be at a level that will not cause corona and the resultant radio interference. (RIV)

## BURNDY® DESIGN CRITERIA

### Cable Connectors

For reasons of economy, EHV systems using stranded conductor are generally designed to operate at voltage gradients close to the negative corona onset level. It is essential, therefore, that connectors provide corona-free performance superior to that of the cable. So our design criterion calls for the voltage which corona extinguishes from the connector to be higher than the voltage at which it extinguishes from the cable. This criterion is met by eliminating all projections and by providing smooth contours on all surfaces. On compression elements, the ends are especially critical. Carefully designed tapers are provided to keep the voltage gradient at a level lower than that on the conductor. Of course,

it is still necessary during installation to smooth crimped elements.

On accessories, like spacers for bundled lines, the critical areas are those at the edges of the bundle. The bundle itself generally shields those parts that fall within it. Many projections that would cause corona on a single conductor line are quiet when they fall within the shielding influence of a bundle. However, those parts that fall at the edges are carefully finished at the factory to insure corona-free operation.

### Tubular Bus Connectors

Station designers choose tubular bus sizes on the basis of mechanical rather than electrical requirements. For instance, stations that only need 4" IPS to meet electrical and corona requirements often have 6" IPS as main buses. The resultant voltage gradient on these buses is very low, perhaps only 10 kV rms/cm, well below the corona onset level.

It is impractical therefore, to require that connectors operate quieter than the bus regardless of the voltage. Under some circumstances, it might be impossible to meet such criteria. In most cases, it would be prohibitively expensive to do so.

Of course, theoretically optimum connectors could be designed for each application, based on the design voltage gradient for individual stations. However, in most cases even differences as great as that between 345 and 500 kV don't have a meaningful impact on connector costs. So, from a practical point of view, it is feasible to design most connectors for 500 kV operation. This makes it more convenient for the station designers to select and order connectors.

Bus connectors are designed to provide corona-free performance under conditions of actual operation. This is done by calculating the voltage gradient on the surface of the bus at 500 kV, using the phase spacing and ground distance typical for this voltage. Connectors are then designed to operate corona free when the voltage gradient on the bus is 10% above this value.

The exceptions to this rule are the flexible expansion connectors. Those designed for 345 kV are self-shielding. Those for 500 kV have

separate shielding rings. Experimental work on self-shielding 500 kV expansion connectors indicates that the margin of safety is too small to justify recommending them for this voltage.

### Controlling Corona

Since corona is caused when the voltage gradient at the surface of a conducting material reaches a level that causes the surrounding air to break down, then obviously, the way to prevent corona is to keep the gradient below this critical level.

From this point of view the connector designer, this can be accomplished in three ways:

1. By providing generous radii on all outside surfaces to keep the voltage stresses to a minimum.
2. By providing shielding rings.
3. By placing the connector within the shielding influences of some part of the bus structure.

Since it is impossible for the connector designer to know the exact configuration of every bus system where the connectors might be used, the third approach is not practical. So, for the purposes of developing a standard line, we concentrate on the first two.

Whenever possible, connectors are designed to be self-shielding. This approach leads to less costly and less obtrusive designs. Only in the case of complicated connector configurations do BURNDY® EHV designs use corona rings. Examples of such applications are disconnectable equipment taps, expansion couplers and equipment terminals which often have configurations that preclude the use of self-shielding designs.

NOMOGRAM FOR DETERMINING THE EQUIVALENT

HEIGHT (he) OF A THREE PHASE LINE

M-5

Nomogram for determining the equivalent height of a single conductor line having the same average voltage of gradient as the CENTER conductor of a horizontally spaced three phase

line, with the same line to ground voltage and the same conductor size. All dimensions measured in the same units.

The use of the laboratory is based on the fact that it is the surface voltage gradient that causes corona. Although most systems consist of 3 phase conductors and a ground plane, it is a rather simple matter to duplicate in the laboratory the conductor surface voltage gradient as it exists on any of these phase conductors with a single conductor and a ground plane.

The formulas and nomograms give this three phase to single phase equivalency. Because this conversion is possible, all EHV testing is done single phase; and there is no necessity for 3 phase testing with its high cost in terms of equipment and space.

Since voltage gradient is the significant factor, the single phase test does not have to be done at the full voltage of an operation system. By setting up

the test closer to the ground plane, the operation voltage gradient can be obtained with a lower test voltage. There is a limit, however, below which the height cannot be lowered lest corona onset and flashover occur simultaneously. Generally, the minimum test height should be about 10 times the diameter of the test conductor.

## GRADIENT CALIBRATOR

Normally the conductor surface voltage gradient at the extinction of corona in the laboratory is calculated using the accompanying equations. However, for test setups involving unusual conductor configurations, the conductor gradient cannot be readily calculated. In these cases, a gradient calibrator may be used. This is a small sphere mounted on the conductor. It has

previously been calibrated for each conductor size to establish the surface voltage gradient that starts positive corona on the sphere. With it tests can be duplicated in any number of laboratories. The applied voltages and ground distances could all be different. But the voltage gradient on the surface of the conductor when the corona occurs on the sphere will always be the same. The calibrator provides a convenient bench mark for measuring the corona performance of connectors.

In use, the sphere is mounted on the conductor in a connector test setup. The voltage is raised until there is a corona on the sphere. We already know from previous calibration what the voltage gradient on the surface of the conductor is at this point.

The sphere is removed and the voltage raised until there is a corona on the conductor. Since the voltage gradient increases directly with increases in applied voltage, the gradient on the conductor at this point can be readily calculated.

It is important to note that the significant parameter is the voltage gradient on the surface of the conductor. It is not necessary to know the gradient on the connector. The conductor gradient

in any given substation is controlled by its design parameters and may be calculated using the following formulae and nomograms. Once the gradient is known, it is unnecessary to have any other information to design connectors. As long as connectors are corona-free at a conductor voltage gradient higher than that planned for the conductor, the connector will be corona-free under fair weather operating conditions.

There may be on occasion be unusual situations where choice of *conductor*, station geometry or clearance problems cause the need for connectors of special design. Where this is the case, BURNDY is prepared to design corona-free devices to operation under such conditions.

### Formula for Determining the Voltage Gradient Notations Used

**h** = line to ground distance (cm)  
**r** = radius of the individual conductor (cm)  
**s** = conductor spacing in the bundle (cm)  
**d** - phase to phase spacing of the line (cm)  
**V** = line to ground voltage (kV)  
**E<sub>a</sub>** = average gradient at the surface of the conductor (kV/cm)

**E<sub>m</sub>** = maximum gradient on the surface of a single conductor  
**h<sub>e</sub>** = equivalent single phase line to ground distance (cm)  
**r<sub>e</sub>** = equivalent single conductor radius (cm) of bundled conductors  
**n** = number of conductors in the bundle

$$E_a = \frac{V}{r \cdot 1n \cdot \frac{2h}{r}} \qquad E_m = \frac{h}{h - r} E_a$$

The maximum gradient (E<sub>m</sub>) occurs on the side facing the ground plane.

The center conductor has a gradient about 5% higher than the outside conductors. The gradient on the center phase may be calculated using the formula for the single conductor.

Single phase system and substituting (h<sub>e</sub>) from the following formula or attached nomograms for the height about the ground (h). For the center phase:

$$E_a = \frac{V}{r \cdot 1n \cdot \frac{2h}{r}} \qquad h_e = \frac{hd}{\sqrt{(4h^2 + d^2)}}$$

It should be noted that h<sub>e</sub> is somewhat smaller than  $\frac{d}{2}$

$$E_a = \frac{V}{n \cdot r \cdot 1n \cdot \frac{2h}{r_e}} \qquad \text{in which } r_e = r \left( \frac{s}{r} \right)^{\frac{n-1}{n}}$$

The value of “*ℓ*” is unity for 1-, 2-, and 3- conductor bundles and 1.12 for 4- conductor bundles.

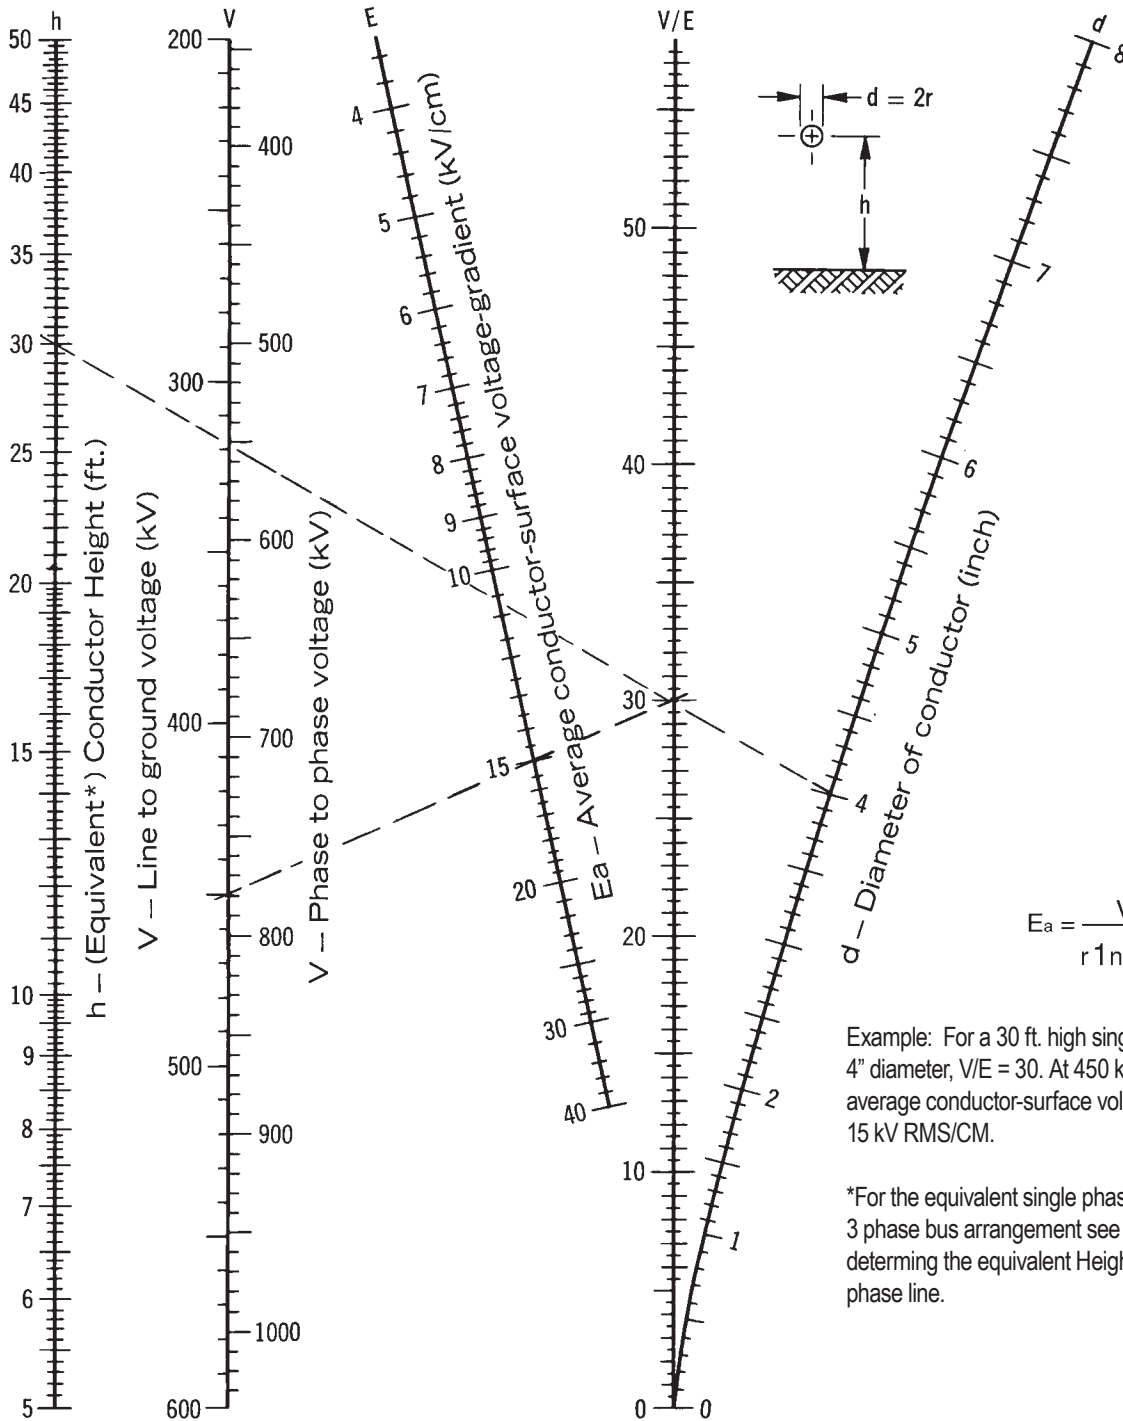

#### Bundled Conductor - Three Phase

This case may be reduced to the single bundled conductor case by replacing h with h<sub>e</sub> in the equation. The definition of h<sub>e</sub> is identical to that given for the single conductor — three phase situation.

**NOMOGRAM FOR FINDING THE AVERAGE CONDUCTOR-SURFACE VOLTAGE-GRADIENT FROM LINE DIMENSIONS AND VOLTAGE**

M-8

## RADIO INTERFERENCE VOLTAGE

There is serious question as to whether measurement of RIV on connectors makes a meaningful contribution to quieter station operation.

Under test conditions, there is generally no significant indication on the radio noise meter until the onset of visible positive corona. At this point, the RIV reading goes into the hundreds of thousands of microvolts. The effect of this phenomenon is to provide a visibly discernable point at which RIV will be excessive. It eliminates the necessity to make, record and plot RIV measurements. Where there is no corona, there is no RIV. So our test criterion calling for no visible corona insures that there will be no radio interference generated by the connector under operating conditions.

## EFFECT OF CONDUCTOR SIZE ON TESTING

Conductor diameter has a significant effect on potential corona problems. The larger the diameter, the lower the surface voltage gradient for a given test voltage. This means that smaller conductors produce corona at lower voltages than larger ones.

Many connector designs have the same basic configuration for various conductor sizes. The only difference being the size of the attaching elements. This is particularly true for many of the welded type connectors. Where this is the case, it is often sufficient to test the connector only on the smallest conductor, since it yields the lowest corona extinction voltage. When there is any doubt, each size is tested.

## CONTAMINATION

Much work has been done to establish the relationship between the corona onset voltage for

contaminated as compared to clean hardware. Experiments in the BURNDY laboratory indicate that this value can be reduced to half of the voltage for clean hardware. However, the relationship varies with the kind of contamination, atmospheric condition and type of connector.

There have been a number of attempts to produce artificial contamination and atmospheres in laboratories. However, there is as yet no clearly established relationship between the corona performance of hardware contaminated in the laboratory. Until such a relationship is established, the only testing that provides comparable data is on clean hardware under fair weather conditions.

## CONCLUSION

For more than 85 years, BURNDY has been designing connectors for the industry's most critical applications. Connectors for EHV are an outgrowth of this tradition. Whether your need is for catalog items or special designs, you can count on electrical, mechanical and corona-free performance, commensurate with the application.

**NOTES:**

1. Dimensions in brackets [ ] are in millimeters.
2. Conductor smaller than 3 inch bus size not recommended for 550 kV.

3. DOES NOT INCLUDE SHIELDING CAPS. For EHV applications, shielding caps are required. Order separately (Type STS) or ADD SUFFIX "STS" to Catalog Number (example: SWAB22A44NSTS), includes two shielding caps.

4. Pad surface finished on both sides of tongue.
5. For six hole NEMA pad contact factory.

### **IMPORTANT NOTES:**

Unless noted, product is **not recommended for use on energized lines.**

#### **Notes for battery operated crimpers and cutters:**

It is recommended that battery be removed when changing jaws, changing dies or storing tool in case.

Select battery operated tools are available in alternate versions :

- Lithium-Ion; 3.0Ah, 5.0Ah
  - AC
  - DC
  - LCB (Less Charger, Batteries)
  - LCCB (Less Case, Charger, Batteries)
  
- Nickel Metal Hydride
  - AC
  - DC
  - 250 Volt

Contact Customer Service for further information.

**EP (Enhanced Power) PATRIOT® tools** operate on an 18V lithium-ion battery and are designed to accept an expanded range of Makita batteries, from larger capacity 5.0Ah to smaller 2.0Ah capacity, providing the user more choices and flexibility.

**PLEASE NOTE:** Prior models, tools **WITHOUT** the **EP Enhanced Power** label, will only accept Makita 18V 3.0Ah batteries. Do not force a 5.0Ah (or other size) battery into the tool. **Damage caused by doing so will void the warranty.**

# Introduction

## Installation Tools

The BURNDY® Engineered System features the most complete line of installation tools in the electrical industry. Available in various styles: battery actuated, mechanical, full cycle ratchet, self contained hydraulic, remote controlled hydraulic, along with power actuated pumps, hoses and accessories. BURNDY has the options to suit your needs. BURNDY tools are designed to integrate with the complete line of BURNDY connectors. Whether you're a small contractor working with #22 wire or a large utility working with 2500 kcmil conductor, there is a BURNDY tool available to do the job.

The benefits of the BURNDY® Engineered System are many, however, probably the most significant benefit is reliability. There is nothing more important to the electrical industry today than reliability. It represents the one area that leads to economical installations that will endure for the life of the installation.

## Tool Center

An important element of the BURNDY® Engineered System is the BURNDY Tool Center, located at 150 Burndy Road, Littleton, NH 03561 (800-426-8720 or 603-621-4499). This center provides advice and information on the operation, maintenance and repair of BURNDY tools. The repair center is staffed with specialized technicians who provide the best possible service for all BURNDY tools, pumps and accessories.

BURNDY designed and produced the first self contained hydraulic compression electrical connector installation tool in 1934. In our continuing efforts to provide the highest quality and highest value connection systems, we offer the current BURNDY tool policy.

## Limited Warranty

The majority of BURNDY tools are warranted to be free of defects in materials and workmanship for a period of five (5) years from the date of shipment. See specific tool page for length of warranty. If inspection by a certified technician

shows the trouble is caused by defective workmanship or material, BURNDY will repair or (at our option) replace the tool.

### This Warranty does not apply where:

- Repairs or alterations have been made or attempted by others
- Repairs are required because of normal wear and tear
- The tool has been abused, misused or improperly maintained
- The use of any non-BURNDY product has resulted in damage to the tool

## Repair Policy

All non-warranty repaired tools are completely reconditioned and receive a limited 1-year warranty. Non-warranty repair returns tools to like-new condition at a maximum cost of 40% of a new tool. A nominal service charge of \$5 is applied to all repairs to cover shop supplies, oil disposal and other miscellaneous services not covered as part of the standard repair.

If the decision is made not to repair, a handling charge of \$25.00 will be applied plus return freight costs.

## Return Procedure

All tools sent to the BURNDY Tool Center (1-800-426-8720) or an authorized repair center must be accompanied by a purchase order with detailed bill to and ship to address authorizing repair. Requests for repair charges before work is done must be stated on the purchase order. All tools sent to the BURNDY Tool Center or an authorized repair center as a warranty claim must be accompanied by a proof of purchase such as a BURNDY invoice or invoice from any BURNDY distributor.

All tools must be shipped at the owner's expense, prepaid. BURNDY pays for the return freight, same surface freight as received. Airfreight returns will be returned same way collect for non-warranty repair and prepaid for warranty repairs.

This warranty and repair policy supercedes all previous policies and is in effect as of January 1, 2005.

# PAT46LWS

## 15-Ton, Light Weight C-Head Hydraulic Self-Contained, 18V Lithium-Ion

- 2" jaw opening
- Used with P dies; U dies with PUADP1 adapter (sold separately)
- Light weight, scoop style C-head with 355° head rotation
- Overmolded, ergonomic handle
- Improved ergonomic balance
- Includes 2 batteries, charger, and polymer carrying case
- **EP Enhanced Power** labeled tools accept 2.0, 3.0, 4.0, and 5.0Ah Makita batteries

### For Use On:

#### Copper - #8 AWG Str. - 1500 kcmil

Code Cable, Navy Cable, Flexible, Extra Flexible  
1/2" - 1" Ground Rods

#### Terminals, grounding:

to 500 kcmil; YGA, YGHA, YGF

#### Terminals, uninsulated:

#8 - 1500 kcmil; YA, YA-2N, YA-L, YA-LB, YA-TC,  
YA-2LN, YAB-4N, YAV-L, YAV-RS, YA-TC-FX

#### Terminals, insulated:

#8 - 2/0; YAEV-L, YAEV-H, YAEV-RS, YAEV-RH

#### Splices:

#8 - 1500 kcmil; YS, YS-T, YS-L, YS-LB, YST,  
YSP-T, YGS, YGHS

#### Taps:

#14 - 1000 kcmil; YH, YCHC  
to 4/0 AWG; YC-C

#### Taps, grounding:

to 500 kcmil; YGHC-C, YGHP-C, YGHR-C

#### Aluminum - #8 AWG - 1250 kcmil

Code Cables

#### Terminals: YA-A, AYP, AYPO

#### Splices: YS-A, YS-AT, YRB

#### Taps: YFD, YFN, YFO, YFR

**PAT46LW**

**15-Ton, Light Weight Latch Head**  
Hydraulic Self-Contained, 18V Lithium-Ion

- 2" jaw opening
- Used with P dies; U dies with PUADP1 adapter (sold separately)
- Light weight, Latch-head
- 355° head rotation
- Ergonomically balanced
- Includes 2 batteries, charger, and polymer carrying case
- **EP Enhanced Power** labeled tools accept 2.0, 3.0, 4.0, and 5.0Ah Makita batteries

**For Use On:**

**Copper - #8 AWG Str. - 1500 kcmil**

Code Cable, Navy Cable, Flexible, Extra Flexible  
1/2" - 1" Ground Rods

**Terminals, grounding:**

to 500 kcmil; YGA, YGHA, YGF

**Terminals, uninsulated:**

#8 - 1500 kcmil; YA, YA-2N, YA-L, YA-LB, YA-TC,  
YA-2LN, YAB-4N, YAV-L, YAV-RS, YA-TC-FX

**Terminals, insulated:**

#8 - 2/0; YAEV-L, YAEV-H, YAEV-RS, YAEV-RH

**Splices:**

#8 - 1500 kcmil; YS, YS-T, YS-L, YS-LB, YST,  
YSP-T, YGS, YGHS

**Taps:**

#14 - 1000 kcmil; YH, YCHC  
to 4/0 AWG; YC-C

**Taps, grounding:**

to 500 kcmil; YGHC-C, YGHP-C, YGHR-C

**Aluminum - #8 AWG - 1250 kcmil**

Code Cables

**Terminals:** YA-A, AYP, AYPO

**Splices:** YS-A, YS-AT, YRB

**Taps:** YFD, YFN, YFO, YFR

**ACSR** - see Overhead Transmission & Distribution  
Sections H & I of the current BURNDY® Master  
Catalog

**Specifications:**

<b>Output Force:</b>	15 Tons
<b>Tool Weight:</b>	16.8 lbs
<b>Size:</b>	18.75" x 13.75" x 3.75"
<b>Die Style:</b>	P and U style (with PUADP1)
<b>Jaw Opening:</b>	2.00"
<b>Operating Voltage:</b>	18 V-DC Lithium-Ion
<b>Recharge Time:</b>	30 minutes (3.0Ah) 45 minutes (5.0Ah)
<b>Warranty:</b>	5 year limited warranty Lifetime warranty on INFINITY DRIVE® 2 year on batteries and charger

**Accessories:**

**PAT750**

**PATRIOT® 12-Ton, C-Head**  
 Hydraulic Self-Contained, 18V Lithium-Ion

- 1.65" jaw opening
- Used with U dies
- C-head with 355° head rotation
- Bearing/alignment guide for HYGROUND® as well as other asymmetrical connectors
- Includes 2 batteries, charger, and polymer carrying case
- **EP Enhanced Power** labeled tools accept 2.0, 3.0, 4.0, and 5.0Ah Makita batteries

**For Use On:**

**Tension Sleeves**

Copper	#8 sol. - 500 kcmil
Aluminum	#8 sol. - 587.2 kcmil
ACSR	#4 - 556.5 kcmil

**Taps**

Copper	#14 sol. - 500 kcmil
Aluminum	#8 - 500 kcmil

**Aerial Cable**

Copper	#6 - 500 kcmil
--------	----------------

**Terminals & Splices**

Copper	#8 - 750 kcmil
Aluminum	#8 - 750 kcmil
ACSR	#4 - 556 kcmil

**HYGROUND® (Compression Grounding)**

Copper	#8 - 500 kcmil
Ground Rods	1/2" - 1" diameter

*Wide U-dies (sold separately) can be used with long barrel terminals and splices saving time and labor!*

**Specifications:**

<b>Output Force:</b>	12 Tons
<b>Tool Weight:</b>	15.7 lbs
<b>Size:</b>	15.75" x 13.50" x 3.50"
<b>Die Style:</b>	U style
<b>Jaw Opening:</b>	1.65"
<b>Operating Voltage:</b>	18 V-DC Lithium-Ion

# PAT600

## PATRIOT® 6-Ton, Latch Head Hydraulic Self-Contained, 18V Lithium-Ion

- Permanent functional D3 groove (no die needed)
- Uses W, X, W-VT style dies
- 180° head rotation
- Enhanced clearance for tap connections
- Includes 2 batteries, charger, and polymer carrying case
- **EP Enhanced Power** labeled tools accept 2.0, 3.0, 4.0, and 5.0Ah Makita batteries

### For Use On:

Copper #8 -600 kcmil

**Terminals:** YA, YA-L

**Splices:** YS-L, YS, YS-T, Y-R

Copper Flex #8 - 350 kcmil Flex

**Terminals:** YA-FX, YAV, YA-L-FX

**Splices:** YS, YSV-FXB

Aluminum #8 - 350 kcmil

**Terminals:** YA-A, YA-A-TN

**Splices:** YS-A

### Variations: (additional variations may be available)

Catalog Number:	Description:
PAT600LI	with 3.0Ah Li-Ion batteries
PAT600L5	with 5.0Ah Li-Ion batteries

### Specifications:

<b>Output Force:</b>	6 Tons
<b>Tool Weight:</b>	10.1 lbs
<b>Size:</b>	14.50" x 13.75" x 3.50"
<b>Die Style:</b>	W, V, W-VT style dies
<b>Operating Voltage:</b>	18 V-DC Lithium-Ion
<b>Recharge Time:</b>	30 minutes (3.0Ah) 45 minutes (5.0Ah)
<b>Warranty:</b>	5 year limited warranty Lifetime warranty on INFINITY DRIVE® 3 year on batteries and charger

### Accessories:

WDIETREE:	W die holder

**PAT500SJ6**

**PATRIOT® 6-Ton, Scissor Action**  
Hydraulic Self-Contained, 18V Lithium-Ion

- Interchangeable scissor action crimping and cutting jaws
- 180° head rotation
- Uses W and X style dies
- Ergonomically balanced tool design
- Includes 2 batteries, charger, and polymer carrying case
- **EP Enhanced Power** labeled tools accept 2.0, 3.0, 4.0, and 5.0Ah Makita batteries

**For Use On:**

Copper, Aluminum, ACSR, Steel, Copperweld, Alumoweld, 6201, 5005, Compressed, and Compact Conductors

**Taps:**

Copper: #10 sol. to 2/0 str.  
Aluminum & ACSR: #14 sol. to 4/0 ACSR

**Stirrups:**

#6 to 4/0 ACSR

**Overhead Full Tension Deadends, Full Tension Splices and Terminals:**

#10 str. to 4/0 ACSR

**Installs Splices, Taps or Terminations:**

#8 to 500 kcmil Copper Stranded (YA, YA-L, YS, YS-L)  
#8 to 350 kcmil Copper Flex  
#8 to 350 kcmil Aluminum (YA-A, YS-A)

**Variations:** (additional variations may be available)

Catalog Number:	Description:
PAT500SJ6LI	BG and D3 grooves (3.0Ah)
PAT500SJ68LI	O and D3 grooves (3.0Ah)
PAT500SJ66LI	D3 groove only (snub-nose) (3.0Ah)
PAT500SJ6L5	BG and D3 grooves (5.0Ah)
PAT500SJ68L5	O and D3 grooves (5.0Ah)
PAT500SJ66L5	D3 groove only (snub-nose) (5.0Ah)

**Kits:**

Catalog Number:	Description:
PAT500SJ6LICUTKIT1	Kit includes crimp head with BG & D3 grooves, cutter jaw, 120V charger and 2 batteries (3.0Ah)
PAT500SJ68LICUTKIT1	Kit includes crimp head with O & D3 grooves, cutter jaw, 120V charger and 2 batteries (3.0Ah)

**Specifications:**

<b>Output Force:</b>	6 Tons
<b>Tool Weight:</b>	11.5 lbs
<b>Size:</b>	17.00" X 14.25" X 3.00"
<b>Die Style:</b>	W and X (with crimping jaws)

<b>Recharge Time:</b>	30 minutes (3.0Ah) 45 minutes (5.0Ah)
<b>Warranty:</b>	5 year limited warranty Lifetime warranty on INFINITY DRIVE® 3 year on batteries and charger

**Accessories:**

Catalog Number:	Description:
BAT18VLI:	3.0Ah Li-Ion battery
BAT18V5AHLI:	5.0Ah Li-Ion battery
PATCHGRLLI:	120V-AC Charger
PATCHGRLLDC:	12/24V-DC Charger
PATMD6JC:	Jaw covers for PATMD6 and PATMD68 versions
PATMD66JC:	Jaw covers for PATMD66 snub-nose versions
PT10074020:	Wrist strap
W28K:	Cutter Dies (cuts 4-4/0 Cu, Al, ACSR)
WDIETREE:	W-die holder for 6 die sets

**Interchangeable Jaw Assemblies:**

Catalog Number:	Description:
PATJAWSMD6	BG and D3 grooves
PATJAWSMD68	O and D3 grooves
PATJAWSMD66	D3 groove only (snub-nose)
PATJAWSCUT	Cutter jaw set

See Important Notes on Page N-6.

## PATMD6

### 6-Ton, IN-LINE®, Scissor Action Hydraulic Self-Contained, 18V Lithium-Ion

- Interchangeable scissor action crimping and cutting jaws
- 350° head rotation
- Uses W and X style dies
- Ergonomically balanced tool design with trigger lock
- Includes 2 batteries, charger, and soft carrying case

#### For Use On:

Copper, Aluminum, ACSR, Steel, Copperweld, Alumoweld, 6201, 5005, Compressed, and Compact Conductors

#### Taps:

Copper: #10 sol. to 2/0 str.

Aluminum & ACSR: #14 sol. to 4/0 ACSR

#### Stirrups:

#6 to 4/0 ACSR

#### Overhead Full Tension Deadends, Full Tension Splices and Terminals:

#10 str. to 4/0 ACSR

#### Installs Splices, Taps or Terminations:

#8 to 500 kcmil Copper Stranded (YA, YA-L, YS, YS-L)

#8 to 350 kcmil Copper Flex

#8 to 350 kcmil Aluminum (YA-A, YS-A)

#### Variations: (additional variations may be available)

##### Catalog Number: Description:

PATMD6LI: BG and D3 grooves (3.0Ah)

PATMD68LI: O and D3 grooves (3.0Ah)

PATMD66LI: D3 groove only (snub-nose) (3.0Ah)

PATMD6KLI: KEARNEY™ groove (snub-nose) (3.0Ah)  
[Accepts KEARNEY™ dies; BURNDY W and  
X dies with KWADP adapter, sold separately]

Crimp/Cut Kits are also available supplied with both  
crimping and cutting jaws

#### Specifications:

Output Force:	6 Tons
Tool Weight:	7.8 lbs
Size:	21.00" x 5.50" x 3.75"
Die Style:	W and X (with crimping jaws)
Operating Voltage:	18 V-DC Lithium-Ion
Recharge Time:	30 minutes (3.0Ah)
Warranty:	5 year limited warranty Lifetime warranty on INFINITY DRIVE® 3 year on batteries and charger

#### Accessories:

Catalog Number:	Description:
BAT18VLI:	3.0Ah Li-Ion battery
PATCHGRLI:	120V-AC Charger
PATCHGRLIDC:	12/24V-DC Charger
PATMD6JC:	Jaw covers for PATMD6 and PATMD68 versions
PATMD66JC:	Jaw covers for PATMD66 snub-nose versions
PATMD6KJC:	Jaw covers for PATMD6K snub-nose versions
W28K:	Cutter Dies (cuts 4-4/0 Cu, Al, ACSR)
WDIETREE:	W-die holder for 6 die sets
TOOLBAGMDLI:	Tool bag (included with tool)
PT10074020:	Wrist strap

#### Interchangeable Jaw Assemblies:

Catalog Number:	Description:
PATJAWSMD6	BG and D3 grooves
PATJAWSMD68	O and D3 grooves
PATJAWSMD66	D3 groove only (snub-nose)
PATJAWSMD6K	KEARNEY™ groove (snub-nose)
PATJAWSCUT	Cutter jaw set

See Important Notes on Page N-6.

**PATMD6LIWCJ**

**6-Ton, IN-LINE®, Crimp/Cut Kit**  
Hydraulic Self-Contained, 18V Lithium-Ion

- Interchangeable scissor action crimping and cutting jaws included
- 350° head rotation; trigger lock
- Actuated blade guide (with cutting jaws)
- Kit includes tool, crimping jaw, cutting jaw, 2 batteries, charger, and soft carrying case

**For Use On:**

**Crimping:**

Copper, Aluminum, ACSR, Steel, Copperweld, Alumoweld, 6201, 5005, Compressed, and Compact Conductors

**Taps:**

Copper: #10 sol. to 2/0 str.

# Y644MBH

## 11-Ton, Dieless Remote Head Remote Operated Hydraulic Tool

- Dieless System
- Latch head design
- Range taking capabilities
- Infinitely rotatable head

### For Use On:

Copper #6 - 1000 kcmil

#### Terminals:

YA-L, YA-2-LN, YA, YA-2N, YA-L-2TC, YAB-4N,  
YA-L-TC, YA-2L, YA-4N

#### Splices:

YS-L, YS, YS-T

Aluminum #6 str. - 1000 kcmil

#### Terminals:

YA-A, YA-A-TN

#### Splices:

YS-A

#### HYPLUG™:

AYP, AYPO

*See Expanded Range details in Reference Section*

### Variations:

Catalog Number: Description:

Y644MBH Standard Dieless Remote Latch Head

### Specifications:

Output Force:	11 Tons
Tool Weight:	9.5 lbs
Size:	12.00" x 4.00" x 3.12"
Die Style:	Dieless
Operating Pressure:	10,000 PSI
Warranty:	5 year limited warranty

### Accessories:

Catalog Number:	Description:
PT20719001	Steel Carry Case (included with tool)

**Plier Hand Tools**

**Y10D for Nylon & Bare**

Hand-held plier tool for #22 - #10 AWG

- One tool for both nylon insulated and bare connectors
- Precision machined wire cutter for aluminum and copper
- Heavy duty forged steel, rust resistant finish

**Y1022 for Nylon, Vinyl & Bare**

Hand-held plier tool for #22 - #10 AWG

- One step stripping #22 - #10 AWG
- Cuts common size mild steel, non-ferrous screws
- Crimps full range of Nylon, Vinyl and Bare terminals and splices

**For Use On:**

**Y10D:**

**#22 - #10 AWG Nylon Insulated Terminals**

Types: TN, TN-F, YAE-N, YAE-N-F, YAE-Z, YAEV, YAES, YAES-E

**#22 - #10 AWG Nylon Insulated Splices**

Types: SN, YSE-HN\*, SNM, YSES, YSE-H\*

**#22 - #10 AWG Bare Uninsulated Terminals**

Types: T, YAD, T-F, YAD-F, YAV, YAV-T-F, YAV-H\*, YAV-H-F\*, YAV-Z

**#22 - #10 AWG Bare Uninsulated Splices**

Types: YSV, YSV-H\*

**Y1022 all of above and also:**

**#22 - #10 AWG Vinyl Insulated Terminals**

Types: TP, BA, TP-F, BA-EF, TP-Z, BA-EZ

**#22 - #10 AWG Vinyl Insulated Splices**

Types: SP, BS

\*Conductor crimp only

## Dieless, Front Load, for Ferrules

Full cycle ratchet tool for insulated/bare ferrules

- Front load crimping position
- Dieless crimping without multiple grooves
- Full cycle ratchet mechanism
- Ratchet release lever

### For Use On:

Catalog Number: YF2210FL

#22 - #10 AWG Insulated and Uninsulated (Bare) Ferrules

Types: YF, YF-UI Wire End Ferrules

### Specifications:

Size:	7.75" x 2.38 x 1.00"
Die Style:	Dieless
Weight:	.8 lbs
Output Force:	1,600 lbs
Warranty:	5 year limited warranty

Crimp Profile

Close up of YF2210FL front load ratchet tool

# YFTOOL Series

## Ratchet Tools for Ferrules

Tools covering from #32 AWG to 250 kcmil

- Release mechanism
- Low handle force
- Ergonomic handle design
- Trapezoidal crimp profile unless noted
- For use on insulated or uninsulated ferrules

### For Use On:

#32 - #6 AWG Insulated and Uninsulated (Bare) Ferrules  
Tool: **YF3206TOOL** (Square crimp profile)

#26 - #10 AWG Insulated and Uninsulated (Bare) Ferrules  
Tool: **YF2610TOOL**

Tool: **YF0801TOOL**

#4 - #1 AWG Insulated and Uninsulated (Bare) Ferrules  
Tool: **YF0401TOOL**

#1/0 - #3/0 kcmil Insulated and Uninsulated (Bare) Ferrules  
Tool: **YF1/03/0TOOL**

#4/0 - #250 kcmil Insulated and Uninsulated (Bare) Ferrules  
Tool: **YF4/0250TOOL**

### Specifications:

<b>Length:</b>	Varies
<b>Weight:</b>	Varies from 1.02 to 1.80 lbs
<b>Warranty:</b>	2 year limited warranty

# Y8MRB1

## Full Cycle Ratchet Tool

Hand-held ratchet tool for #22 - 8 AWG

- Light weight
- Each indenter has unique identifying marks for inspectability
- Fully enclosed, protected ratchet mechanism does not allow the handles to be opened until full ratchet cycle is completed
- Inspection gauges (sold separately) available to check each groove

### For Use On:

Catalog Number: Y8MRB1

#### #22 - 8 AWG Uninsulated (Bare) Terminals:

Types: T, YAD, T-F, YAD-F, YAV, YAV-L, YAV-T-F, YAV-Z

#### #22 - 8 AWG Uninsulated (Bare) Splices:

Types: YSV, YSV-L

### Specifications:

Weight:	1.2 lbs
Size:	10.56" x 3.50" x 1.12"
Die Style:	Permanent Dies
Warranty:	5 year limited warranty

### Accessories:

Catalog Number:	Description:
PG3951	Inspection gauge for #18 groove
PG3961	Inspection gauge for #14 groove
PG3971	Inspection gauge for #10 groove
PG3981	Inspection gauge for #8 groove

# MR8 Series

## Fully Protected Ratchet Mechanism

Full cycle ratchet tools for critical applications

- Fully enclosed, protected ratchet mechanism does not allow the handles to be opened until full ratchet cycle is completed
- Designed for critical applications such as nuclear-class 1E terminations, heavy duty industrial, aircraft
- Lightweight aluminum
- Easy groove identification with color-coded dies

### For Use On:

<b>Die Style:</b>	Permanent Dies
<b>Warranty:</b>	5 year limited warranty

# Y10MRSA1

## Ergonomic Full Cycle Ratchet

Hand-held tool using J-dies for #22 - #10 AWG

- Compact, narrow nose with scissor action
- Uses J-style die inserts (sold separately)
- High-strength steel frame, rubber covered comfort handles
- Ergonomic design requires less handle force

### Catalog Number Y10MRSA1 For Use On:

with J1022NC1 die (sold separately):  
#22 - #10 AWG Nylon Insulated Terminals/Splices  
Types: YAE, YAE-N, YAE-N-F, YAE-Z

with J1022NC2 die (sold separately):  
#22 - #10 AWG Nylon Insulated Terminals/Splices  
Types: YAEV, YAEV-L, YAEV-H, YAEV-RH, YAEV-RS

with J1022NC3 die (sold separately):  
#22 - #10 AWG Nylon Insulated Terminals/Splices  
Types: TN, YAES, TN-F, YAES-F, SN, YSE-HN

with J1022NC4 die (sold separately):  
#22 - #10 AWG Vinyl Insulated Terminals/Splices  
Types: TP, BA, TP-F, BA-EF, TP-Z, BA-EZ, TP-LF, BA-EL, SP, BS

with J1022NC5 die (sold separately):  
#22 - #10 AWG Uninsulated (Bare) Terminals/Splices\*  
Types: T, YAD, T-F, YAD-F, YAV, YAV-L, YAV-H, YAV-R, YAV-RS, YAV-T-F, YAV-H-F, YAV-Z, YSV, YSV-H, YSV-L

# M8ND

## Full Cycle Ratchet

Hand-held tools for #26 - #8 AWG Terminals/Splices

- Ratchet mechanism does not allow handles to open until full cycle is complete
- Fully protected ratchet mechanism
- Uses standard BURNDY N style dies (sold separately)
- Easy groove identification with color coded dies

### Catalog Number M8ND For Use On:

#### #26 - #8 AWG Terminals/Splices

**Terminal Types:** YAD, BA-E, YAD-F, BA-EF, YAE, BA-ES, YAE-F, BA-EZ, YAE-Z, BA-EL, YAES, YAEV-H, YAEV-L, YAV, YAV-F, YAV-H, YAV-H-F

**Splice Types:** YSV, YSM, YSV-H, YRV-L

*M8ND shown with N8CT die set installed. (Dies sold separately.)*

Specifications:	
Weight:	1.8 lbs
Size:	10.88" x 2.00" x .88"
Die Style:	N style
Cycles:	10,000
Warranty:	5 year limited warranty

## MRC840 Series

### Mechanical Rotating Crimp Tool

For #8 - 4/0 AWG Uninsulated (Bare) Terminals/  
Splices

- Heat treated steel jaws
- Spring loaded mechanism locks die wheel into position
- Multiple crimp selection with rotatable die wheels
- Die index embossment for inspectability

#### For Use On:

**Catalog Number: MRC840**

**#8 - #4/0 AWG Copper Terminals/Splices**

Types: YA, YA-L, YS, YS-L

**Catalog Number: MRC840AL**

**#8 - #4/0 AWG Aluminum Terminals/Splices**

Types: YA-A, YS-A

#### Specifications:

<b>Size:</b>	26.00" x 8.00" x 1.50"
<b>Weight:</b>	8.3 lbs
<b>Die Style:</b>	Rotating Die Wheel
<b>Warranty:</b>	5 year limited warranty

**MY28/MY29 Series**

**Dieless Mechanical Compression Tools**

#8 Str. - 250 kcmil Copper; #8 Str. - 4/0 Str. Aluminum

- Easy to adjust nest die with knurled steel knob and machine threads
- Rugged tool design with heavy duty forged steel with reinforced back and handles
- Bench mount adapter (sold separately) available

**For Use On:**

**Catalog Numbers: MY293, MY293C (covered handles), MY293CF (fully covered)**

#8 Str. - 250 kcmil Copper commercial (code) cable  
30 Navy - 250 Navy Copper Navy cable  
#8 Str. - 4/0 Str. Aluminum commercial (code) cable  
Types (Copper): YA, YA-L, YS-L  
Types (Aluminum): YA-A, YS-A

**Catalog Numbers: MY2911, MY2911C (covered handles), MY29UNIVERSALKIT (MY2911 tool with select connectors)**

#8 Str. - 250 kcmil Copper commercial (code) cable  
30 Navy - 250 Navy Copper Navy cable  
#8 Str. - 4/0 Str. Flexible copper mine machine cable  
Types (Copper): YA, YA-L, YS, YAV-FX, YS-L, YAV-L, YSV-L

**Catalog Number: MY28**

#8 Str. - 4/0 Str. Copper aircraft cable  
Types (Copper): YAV-L, YSV-L

**Catalog Number: MY284**

#8 Str. - 4/0 Str. Aluminum aircraft cable  
Types (Aluminum): YAV-A-L, YSV-A-L, YAV-A-R

**Catalog Number: MY286**

#8 Str. - 2/0 Str. Copper aircraft cable (flexible)  
Types (Copper): Nylon Insulated: YAE-L, YAEV-RS, YAEV-H, YAEV-RH

**Specifications:**

<b>Weight:</b>	8.0 lbs
<b>Size:</b>	22.65" x 4.88" x 1.12"
<b>Die Style:</b>	Dieless
<b>Cycles:</b>	10,000
<b>Warranty:</b>	5 year limited warranty

**Accessories:**

Catalog Number:	Description:
<b>BMVBCHMT:</b>	Bench Mount Adapter

## OH25

### Dieless Full Cycle Ratchet

Installs Service Entrance Splice Connectors #10 - 1/0

- Ratchet mechanism does not allow handles to open until full cycle is complete
- Easy, one-hand operation incrementally closes jaws with each handle stroke
- Spring-loaded comfort grip handles
- Forged steel jaws and stainless steel indenter

#### Catalog Number OH25 For Use On:

##### Conductor Range: #10 - 1/0

5/8" Service Entrance Sleeves:

INSULINK™ Type ES (insulated) #10 - 1/0 Str.

LINKIT™ Type YSU (bare) #8 - 1/0 Str.

5/8" Neutral Tension Sleeves HYSPLICE™

Types: YS-S, YCS-R, YDS-AT (#4 - 1/0)

AYP Type HYPLUG™ #6 - 1/0 Str.

#### Specifications:

<b>Handle Force:</b>	50 lbs max.
<b>Force Developed:</b>	6,000 lbs max.
<b>Size:</b>	12.25" x 3.75" x 1.50"
<b>Weight:</b>	2 lbs. 11 oz.
<b>Die Style:</b>	Dieless
<b>Warranty:</b>	5 year limited warranty

#### Accessories:

Catalog Number:	Description:
PT4583:	Leather Holster
PT8504:	Go/No-Go Gauge; used to check crimp dimensions

N-54

**PT4583** Leather Holster  
(sold separately; shown with  
OH25 tool)

**OUR840**

**840 POPPER™ HYTOOL™**  
Overhead/Underground Applications; Full Cycle Ratchet

- Allows proper crimping of sleeves/terminations in underground applications
- Uses X dies for reduced handle force and W dies for fewer number of crimps
- UL Listed connections when used with BURNDY Listed connectors and color-coded X dies

**Catalog Number OUR840 For Use On:**

See charts for details

**Selected Applications**

**Copper conductors #8 AWG - 250 kcmil**

**Aluminum conductors #8 AWG to 4/0 AWG**

**Specifications:**

**Handle Force:** 8 lbs max.  
**Force Developed:** 8,000 lbs max.  
**Die Style:** W and X style dies  
**Size:** 13.00" x 3.75" x 1.50"  
**Weight:** 2 lbs. 14 oz.  
**Warranty:** 5 year limited warranty

**Accessories:**

**Catalog Number: Description:**  
**XOH25:** Nest/Indenter die set for OUR840  
**W28K:** Cutter die for #4 - 4/0 ACSR, Copper, Aluminum  
**PT4583:** Leather Holster made from top grain cowhide saddle leather with large grommet  
**OUR840WC:** Metal carrying case with die tray - holds OUR840 tool and up to eleven (11) X dies (sold separately)

# MD6 Series

## Hand-Operated HYTOOL™

Installs full range of connectors #14 - 4/0

- Uses BURNDY® W dies
- Spring loaded positive lock die retainer buttons
- Multiple variations available

### For Use On:

Copper, Aluminum, ACSR, Steel, Copperweld, Alumoweld, 6201, 5005, Compressed, and Compact Conductors

### Taps:

Copper: #10 sol. to 2/0 str.

Aluminum & ACSR: #14 sol. to 4/0 ACSR

### Stirrups:

#6 to 4/0 ACSR

### Overhead Full Tension Deadends, Full Tension Splices and Terminals:

#10 str. to 4/0 ACSR

### Installs Splices, Taps or Terminations:

#8 to 500 kcmil Copper Stranded (YA, YA-L, YS, YS-L)

#8 to 350 kcmil Copper Flex

#8 to 350 kcmil Aluminum (YA-A, YS-A)

### Variations:

Catalog Number:	Description:
MD6	Permanent BG (5/8) and D3 grooves; with WO die (sold separately) can install the CABLELOK CRIMPIT™ and HYCRIMP™ tap connectors
MD68	Permanent O and D3 grooves; with WBG die (sold separately) can install the CABLELOK CRIMPIT™ and HYCRIMP™ tap connectors
MD66	Snub-nose, permanent D3 groove only
MD637	Permanent 161, 162, 163, 171 dies in jaw (J, M & P, T & X)
MD638	Permanent K, BG, C dies in jaw
MD6K	Snub-nose, accepts KEARNEY™ type O dies; using KWADP adapter (sold separately) will accept BURNDY W and X dies

**Hotstick Tools Available - Contact Customer Service**

### Specifications:

<b>Crimp Force:</b>	4.5 Tons
<b>Life Cycle:</b>	Tested over 90,000 cycles with no adjustments or part replacement
<b>Length:</b>	25.50" x 4.50" x 2.00"
<b>Weight:</b>	6.0 lbs
<b>Die Style:</b>	W and X styles
<b>Warranty:</b>	5 year limited warranty

### Variations (continued):

<b>Catalog Number:</b> MD64	<b>Description:</b> Permanent BG (5/8) and D3 grooves; straight fiberglass handles 24" long; fiberglass rated 100kV per foot for 5 min.
<b>MD614</b>	Permanent BG (5/8) and D3 grooves; straight fiberglass handles 19" long with grips; fiberglass rated 100kV per foot for 5 min.
<b>MD612</b>	Permanent O and D3 grooves; straight fiberglass handles 24" long; fiberglass rated 100kV per foot for 5 min.

### Accessories:

<b>Catalog Number:</b> WBG:	<b>Description:</b> Common die set for MD68, MD612
<b>WO:</b>	Common die set for MD6, MD64, MD614
<b>KWADP:</b>	Adapter to use BURNDY W and X dies with MD6K variation
<b>WDIETREE:</b>	W die holder for 6 die sets

**MD7 Series**

**Hand-Operated HYTOOL™**  
Installs full range of connectors #14 - 4/0

- Accepts W and X Dies
- Ergonomic, one-piece composite polymer handles
- Nickel plated jaws and jaw links

**For Use On:**

Copper, Aluminum, ACSR, Steel, Copperweld, Alumoweld, 6201, 5005, Compressed, and Compact Conductors

**Taps:**

Copper: #10 sol. to 2/0 str.  
Aluminum & ACSR: #14 sol. to 4/0 ACSR

**Stirrups:**

#6 to 4/0 ACSR

**Overhead Full Tension Deadends, Full Tension Splices and Terminals:**

#10 str. to 4/0 ACSR

**Installs Splices, Taps or Terminations:**

#8 to 500 kcmil Copper Stranded (YA, YA-L, YS, YS-L)  
#8 to 350 kcmil Copper Flex  
#8 to 350 kcmil Aluminum (YA-A, YS-A)

**Variations:**

Catalog Number:	Description:
MD7	Permanent BG (5/8) and D3 grooves; with WO die (sold separately) can install the CABLELOK CRIMPIT™ and HYCRIMP™ tap connectors
MD78	Permanent O and D3 grooves; with WBG die (sold separately) can install the CABLELOK CRIMPIT™ and HYCRIMP™ tap connectors
MD76	Snub-nose, permanent D3 groove only

**Specifications:**

<b>Output Force:</b>	4.5 Tons
<b>Size:</b>	25.00" x 4.50" x 2.00"
<b>Weight:</b>	7.0 lbs.
<b>Die Style:</b>	W and X styles
<b>Life Cycle:</b>	Tested over 90,000 cycles with no adjustments or part replacement
<b>Warranty:</b>	5 year limited warranty

**Accessories:**

Catalog Number:	Description:
WBG:	Common die set for MD78
WO:	Common die set for MD7, MD76
WDIETREE:	W die holder for 6 die sets

# MD734R

## Hand-Operated POSI-PRESS™

Hand-operated full cycle ratchet tool

- Full stroke ratchet mechanism
- Ergonomical one-piece composite polymer handles
- Allows use of complete W-VT, W-RT and X-RT line of BURNDY dies with die embossment

### For Use On:

#### Copper Lugs/Splices #8 - 500 kcmil:

Types: YA, YA-L, YA-L-TC, YA-L-NT, YS-L, YS, YST, YA-TC

#### Copper Lugs/Splices #8 - 350 kcmil Flex

Types: YAV-L-TC-FX, YA-LB, YA-TC-FXB, YSV-L, YAV-L-NT-FX, YAV-L-FX, YAV-FXB

#### Copper Battery Lugs #8 - 350 kcmil Flex

Type: YAG-TC-LD

#### Thin Wall C-Taps #12 - 3/0 AWG

Type: YC-L

### Variations:

Catalog Number:	Description:
MD734R	POSI-PRESS™ Full Cycle Ratchet Tool
MD734RC	MD734R tool with EPDM rubber covering
MD734RKIT1	MD734R tool, metal carrying case and all dies for #8 - 500 kcmil copper HYDENT™ and C-Taps for #12 - 3/0 AWG
MD734	Supplied <u>without</u> the ratchet mechanism
MD734KIT1	MD734 tool (no ratchet mechanism), metal carrying case and all dies for #8 - 500 kcmil copper HYDENT™ and C-Taps for #12 - 3/0 AWG

### Specifications:

Crimp Force:	4.5 Tons
Length:	26.00" x 4.50" x 2.00"
Width:	8.00" at handles; 4.50" at jaws
Die Style:	W-VT, W-RT, and X-RT Styles
Handle Material:	Reinforced composite polymer
Warranty:	5 year limited warranty

### Accessories:

Catalog Number:	Description:
PT49521:	Metal carry case (sold separately)
PT4925:	Canvas bag (sold separately)
WDIETREE:	W die holder for 6 sets of dies (sold separately)

# Y46OEM12T

**12 Ton Remote Operated HYPRESS™**  
Designed for Specific OEM Applications; Bench Mount

- Head mounted at 45° angle
- U dies for copper and aluminum
- Forged steel tool, precision machined components
- Coupler at 90° angle

**For Use On:**

**Copper Terminals (Bare) #6 - 750 kcmil Code/Navy:**  
Types: YA, YA-2N, YA-L, YA-LB, YA-TC, YA-2LN, YAB-4N, YAV-L, YAV-RS, YA-TC-FX

**Copper Terminals (Insulated) #8 - 2/0 Flex/Extra Flex**  
Types: YAEV-L, YAEV-H, YAEV-RS, YAEV-RH

**Aluminum Terminals #6 - 750 kcmil Code**  
Types: YA-A, AYP, AYPO

**Specifications:**

Operating Pressure:	8,800 PSI
Force Developed:	12 Tons
Weight:	34.5 lbs
Size:	14.00" x 12.25" x 10.00"
Die Style:	U Dies (with PUADP-1 adapter, included)
Warranty:	2 year limited warranty

**Variations:**

Catalog Number:	Description:
Y46OEM12T	Y46OEM12T tool only
Y46OEM12TKIT	Kit complete with Y46OEM12T tool, Y8AC9 pump, and PT2990010 hose
Y46OEM12TKITFC	Kit complete with Y46OEM12TKIT (see above) and YACFC foot switch
Y46OEM12TKIT1	Kit complete with Y46OEM12TKIT (see above), Y46OEMGUARD, Y46OEMLOCATOR, and 12TONP1
Y46OEM12TKIT1FC	Kit complete with Y46OEM12TKIT1 (see above) and YACFC foot switch

**Accessories:**

Catalog Number:	Description:
Y8AC9:	5/8 HP Electric Hydraulic Pump 8,800 PSI
PT2990010:	10 foot long hydraulic hose
YACFC:	Foot switch for Y8AC9 pump
Y46OEMGUARD:	Clear safety shield
Y46OEMLOCATOR:	Adjustable connector locator
12TONP1:	Factory installed stroke limiter
UDIEKITCU:	U die kit complete with 15 U die sets for crimping #6 AWG - 750 kcmil copper, provided in one metal storage case
UDIEKITAL:	U die kit complete with 15 U die sets for crimping #6 AWG - 750 kcmil aluminum, provided in one metal storage case

# Y46OEM11T

## 11 Ton Remote Operated HYPRESS™ Designed for OEM Applications, Bench Mounted

- Same crimp profile as 644 Series tools with dedicated P644 die set permanently affixed
- “1 Crimp” technology for most long and standard length barrel terminals
- Expanded range taking capacity

### For Use On:

**Copper Terminals #6 - 750 kcmil Code/Navy (Terminals):**  
Types: YA-L, YA-2LN, YA, YA-2N, YA-L-2TC,  
YAB-4N, YA-L-TC, YA-2L, YA-4N

**Copper Terminals #6 - 500 kcmil Code/Navy (Splices):**  
Types: YS-L, YS-T, YS

**Aluminum #6 - 500 kcmil**  
Terminal Types: YA-A, YA-A-TN  
HYPLUG™ Types: AYP, AYPO

**Aluminum #6 - 350 kcmil**  
Splice Type: YS-A

### Variations:

Catalog Number:	Description:
Y46OEM11T	Tool only
Y46OEM11TKIT	Kit complete with Y46OEM11T tool, Y7AC9 electric pump (7,300 PSI), and PT2990010 10' hydraulic hose

### NOTE:

Not to be used with 10,000 PSI operating pressure.  
Ensure ONLY 7,300 PSI is used for this 11-Ton output force tool.

### Specifications:

Operating Pressure:	7,300 PSI
Force Developed:	11 Tons
Weight:	34.5 lbs
Size:	14.00" x 12.25" x 10.00"
Die Style:	P644 die permanently affixed
Warranty:	2 year limited warranty

### Accessories:

Catalog Number:	Description:
Y7AC9:	7,300 PSI Electric Hydraulic Pump
PT2990010:	10 foot long hydraulic hose
Y46OEMGUARD:	Clear safety shield
Y46OEMLOCATOR:	Adjustable connector locator

# OEM840NCP

## OEM Pneumatic Press

Installs #8 - 4/0 AWG

- Customizable clear safety guard for left, right, or front feed cable entry
- Guarded foot switch
- Adjustable connector locator
- Cycle counter
- Accommodates UM, U and W dies
- Testing for UL Listing performed up to:
  - U dies: UL Listed to 1/0 AWG (YA-L), #2 AWG (YAV-L)
  - W dies: UL Listed to 3/0 AWG (YA-L), 1/0 AWG (YAV-L)

### Variations:

**Catalog Number:** OEM840NCP  
**Description:** OEM Pneumatic Press

### Accessories:

**Catalog Number:** PT50024685  
**Description:** U / UM Die Holder Assembly

**Catalog Number:** PT50024683  
**Description:** W Die Holder Assembly

**Catalog Number:** PT50024605  
**Description:** Front Safety Guard

### Specifications:

**Weight:** 60.0 lbs  
**Size:** 22.75" x 12.38" x 10.25"  
 (18.56" L with air gauge)  
**Die Style:** UM, U, W Styles  
**Crimp Speed:** 3 seconds (approximately)  
**Life Cycles:** 2.5 M cycles (min)  
**Air Pressure:** 90-100 PSI  
**Connector Port:** 3/8" NPT female thread  
**Warranty:** 2 year limited warranty

Nylon, Vinyl and Bare Terminals/Splices

#### Nylon:

YAE, YAE-N, YAE-N-F, YAE-Z, YAEV, YAEV-L, YAEV-H, YAEV-RH, YAEV-RS, TN\*, YAES\*, TN-F\*, YAES-F\*, SN, YSE-HN

#### Vinyl:

TP, BA, TP-F, BA-EF, TP-Z, BA-EZ, TP-LF, BA-EL, SP, BS

#### Bare:

T, YAD, T-F, YAD-F, YAV, YAV-L, YAV-H, YAV-R, YAV-RS, YAV-T-F, YAV-H-F, YAV-Z, YSV, YSV-H, YSV-L, YA, YAV, YS, YSV

\*Excludes TN and YAES terminals with #12 AWG wire

### Pneumatic crimp tool Catalog Number

#### Y6NCP1 includes:

- Y6NCP1 Tool
- Tool Case
- 1/8" NPT air hose
- Crimp head for J-Dies

### Variations:

<b>Catalog Number:</b>	<b>Description:</b>
Y6NCP1SD	Pneumatic OEM Tool using SD-dies (industry standard profile); See separate cut sheet for more information

### Specifications:

<b>Tool Weight:</b>	4.4 lbs
<b>Length x Dia.:</b>	12.88" x 2.63" x 2.63"
<b>Die Style:</b>	J style
<b>Air Pressure:</b>	90-110 PSI
<b>Crimp Motion:</b>	Scissor Action
<b>Pull Out Force:</b>	Exceeds Mil Spec/SAE*
<b>Warranty:</b>	1 year limited warranty

### Accessories:

<b>Catalog Number:</b>	<b>Description:</b>
Y6NCP1FTSW:	Foot Switch
Y6NCP1BMNT:	Bench Mount Unit
J6NCP1CH:	Replacement J-die crimp head (included)
J1022NC1:	Die set for YAE, YAE-N, YAE-N-F, YAE-Z
J1022NC2:	Die set for YAEV, YAEV-L, YAEV-H, YAEV-RH, YAEV-RS
J1022NC3:	Die set for TN, YAES, TN-F, YAES-F, SN, YSE-HN
J1022NC4:	Die set for TP, BA, TP-F, BA-EF, TP-Z, BA-EZ, TP-LF, BA-EL, SP, BS
J1022NC5:	Die set for T, YAD, T-F, YAD-F, YAV, YAV-L, YAV-H, YAV-R, YAV-RS, YAV-T-F, YAV-H-F, YAV-Z, YSV, YSV-H, YSV-L
J8CNC:	Die set used with Y2CNC (sold separately) for #8 size YA, YAV, YS, YSV
J6CNC:	Die set used with Y2CNC (sold separately) for #6 size YA, YAV, YS, YSV
J4CNC:	Die set used with Y2CNC (sold separately) for #4 size YA, YAV, YS, YSV
Y2CNC:	Used with J8CNC, J6CNC, and J4CNC (sold separately)

**Y6NCP1SD**

**Pneumatic OEM Crimp Tool**  
For Loose Piece Terminals/Splices

- UL Listed connections used with BURNDY® UL Listed connectors
- 360° rotating head
- Reliable crimp performance
- Tested to 300,000 crimps without a failure
- Pull Out Force exceeds UL 486A/B
- Industry standard die envelope; identical to MRE1022B and MRE1022NV hand tools crimp profiles

**For Use On:**

**Copper - #22 - #10 AWG**

Nylon, Vinyl and Bare Terminals/Splices

**Nylon:**

YAE, YAE-N, YAE-N-F, YAE-Z, YAEV, YAEV-L, YAEV-H, YAEV-RH, YAEV-RS, TN, YAES, TN-F, YAES-F, SN, YSE-HN

**Vinyl:**

TP, BA, TP-F, BA-EF, TP-Z, BA-EZ, TP-LF, BA-EL, SP, BS

**Bare:**

T, YAD, T-F, YAD-F, YAV-, YAV-L, YAV-H, YAV-R, YAV-RS, YAV-T-F, YAV-H-F, YAV-Z, YSV, YSV-H, YSV-L

**Pneumatic crimp tool Catalog Number Y6NCP1SD includes:**

- Tool Case
- 1/8" NPT air hose
- Crimp head for SD-Dies
- Nylon/Vinyl SD Die Set
- Bare SD Die Set
- Terminal Locator Plate

**Variations:**

<b>Catalog Number:</b>	<b>Description:</b>
Y6NCP1	Pneumatic OEM Tool using J-dies (sold separately) See separate cut sheet for more information

**Specifications:**

<b>Tool Weight:</b>	4.4 lbs
<b>Length x Dia.:</b>	12.88" x 2.63" 2.63"
<b>Die Style:</b>	SD Industry-Standard Die Envelope
<b>Air Pressure:</b>	90-110 PSI
<b>Crimp Motion:</b>	Scissor Action
<b>Pull Out Force:</b>	Exceeds UL 486A/B
<b>Warranty:</b>	1 year limited warranty

**Accessories:**

<b>Y6NCP1FTSW:</b>	Foot Switch
<b>Y6NCP1BMNT:</b>	Bench Mount Unit
<b>SD10NCP1CH:</b>	Replacement SD-die crimp head (included)
<b>BECNVSD:</b>	Replacement Nylon/Vinyl SD-die set (included)
<b>BECBSD:</b>	Replacement Bare SD-die set (included)
<b>SD10NCP1LP1:</b>	Replacement Locator Plate (included)

*Spring-loaded Terminal Locator*

**Y6NCP1BMNT**  
*(tool not included sold separately)*

# 12-Ton U Dies\*

**For Y35, Y39, Y750, PAT750 Series  
PAT46 Series (with PUADP1 Adapter)**

\* Non-tension U-type 12 ton dies for YA, YS, YA-A, YS-A style connectors

\*\* Wide dies are intended for use on long barrel terminals and splices (YA/YS) only.

*U28RT Die Set*

Die Sets sold separately; U Die Kits also available; see following page

# U Die Kits

**For Y35, Y39, Y750, PAT750 Series  
PAT46 Series (with PUADP1 Adapter)**

**UDIEKITCU** and **UDIEKITAL** include 15 sets of “U” dies and die case. These stainless steel color coded dies are for crimping YA, YS, YA-A, and YS-A types of connectors, ranging from #6 AWG through 750 kcmil.

**UDIEKITCUW** includes 9 sets of wide stainless steel color coded dies for crimping long barrel YA and YS types of connectors up to 4/0 AWG. The wide dies require only one crimp compared to 2 for the standard width dies.

Note: N/A = not applicable

# UM-Style Dies

**For Y35, Y39, Y750, PAT750 Series,  
Y46 and PAT46 Series (with PUADP1 Adapter),  
OEM840NCP (up to 4/0 size)**

UM-style Nest and Indenter dies are specifically designed to work with the YAD lugs. The distinctive “M” crimping profile design straddles the brazed seam of the YAD-M and YAV-L series lugs to provide a consistent, long term, reliable connection. Accepts copper cable sizes from 8 AWG to 600 kcmil for DLO/ Flex cable.

CNC machined from stainless steel, these dies are compatible with all BURNDY® tooling that accepts a “U” die envelope.

Sold individually or in a kit (**UMDIEKIT**) which has select dies/indenters covering #8 to 4/0 AWG in a metal die case.

PATCHGRLLI:	120V-AC Charger
PATCHGRLLDC:	12/24V-DC Charger
WDIETREE:	W-die holder for 6 die sets

**Interchangeable Jaw Assemblies (no tool or pole):**

Catalog Number:	Description:
PATJAWSCUT	Cutting jaws
PATJAWSMD6	BG and D3 grooves
PATJAWSMD68	O and D3 grooves
PATJAWSMD66	D3 groove only (snub-nose)

See Important Notes on Page N-6.

N-82

**BCC1000CUAL**

**Sealed Nickel Cadmium Cutter**

Cuts up to 750 kcmil hard drawn copper;  
1000 kcmil soft drawn copper; 2" O.D. aluminum

- Hook head design
- Three-way switch
- Hardened steel blades
- Withstands rugged use, resists oil and solvents
- Includes 1 battery, 1 charger, and case

**Catalog Number BCC1000CUAL For Use On:**

**Hard Drawn Copper:**  
750 kcmil

**Soft Drawn Copper:**  
1000 kcmil

**Aluminum:**  
up to 2" O.D

**Do Not Cut Steel or ACSR**

**Specifications:**

<b>Tool Weight:</b>	6.0 lbs
<b>Size:</b>	14.50" x 4.50" x 4.00"
<b>Operating Voltage:</b>	12 V-DC Nickel Cadmium
<b>Recharge Time:</b>	1 hour (fast) to 16 hours (standard)
<b>Warranty:</b>	90 day limited warranty (excluding blades)

**Accessories:**

<b>Catalog Number:</b>	<b>Description:</b>
<b>BCCBAT12V:</b>	Sealed nickel cadmium battery
<b>BCCCHGR:</b>	120 V-AC Charger
<b>BCCCASE:</b>	Replacement Case for BCC1000CUAL tool
<b>RP50RP03:</b>	Replaceable Moving Blade
<b>RP50RP02:</b>	Replaceable Fixed Blade

# YCUT129ACSR

## Latch Head Style

Hydraulic Hand Operated Cutter

- Rapid advance pump
- Handle trigger drain
- Interference free closure on mid-span cuts
- 180° head rotation

### Catalog Number YCUT129ACSR For Use On:

Copper/Aluminum Cable: up to 1.29"

ACSR: up to 1113 kcmil

Ground Rod: up to 5/8"

Rebar: up to 1/2"

Soft Steel Bolts: up to 5/8"

Standard Guy: up to 1/2"

EHS Guy Strand: up to 3/8"

### Specifications:

Output Force:	7 Tons
Weight:	11.4 lbs
Size:	22.50" x 6.63" x 2.50"
Warranty:	5 year limited warranty (excluding blades)

### Accessories:

Catalog Number:	Description:
PT10024162:	Carrying Case (included with tool)
PT10037388:	Moving Blade
PT10037384:	Fixed Blade

PT10024162 Hard Polymer Case for YCUT129ACSR

**RHCC4CUAL**

**Scissor Action Cutter**  
Cuts up to 4.00" Copper / Aluminum Cable

- Specialized scissor head design for interference free closure for mid-span cuts
- High strength hardened steel cutting blades
- 360° swivel hose fitting
- Stainless Steel lifting assist eyebolt
- Light weight ergonomic design

**Catalog Number RHCC4CUAL For Use On:**

**Copper/Aluminum Cable:** up to 4.00"

**Specifications:**

<b>Operating Pressure:</b>	10,000 PSI
<b>Weight:</b>	19.9 lbs
<b>Size:</b>	21.29" x 9.13" x 5.15"
<b>Warranty:</b>	5 year limited warranty (excluding blades)

*BAGCNVS5X9X24 Canvas Bag available separately (included with tool)*

**Accessories:**

<b>Catalog Number:</b>	<b>Description:</b>
<b>BAGCNVS5X9X24:</b>	Canvas Bag (included with tool)
<b>RHCC4CUALBLD:</b>	Cutting Blade (one blade; 2 required)
<b>RHCC4CUALGDEBLD:</b>	Blade Guide

Pump Accessories  
for other necessary equipment.**

# RHCC2156ACSR

## Latch Head, Remote Operated Cutter Cuts up to 2156 kcmil ACSR

- 180° head rotation
- Durable hardened, precision steel blades
- Specialized latch head for mid-span cuts
- Durable canvas carrying bag stores tool and accessories

### Catalog Number RHCC2156ACSR For Use On:

Copper/Aluminum Cable: up to 2"

ACSR: up to 2156 kcmil

Ground Rod: up to 3/4"

Rebar: up to 5/8"

Soft Steel Bolts: up to 3/4"

Standard Guy: up to 9/16"

EHS Guy Strand: up to 9/16"

### Variations:

Catalog Number:	Description:
RHCC2156ACSR	Standard RHCC2156ACSR remote cutter
RHCC2156ACSRF	RHCC2156ACSR tool with female coupler

*PT10054094 Canvas Bag available separately  
(included with tool)*

### Specifications:

Operating Pressure:	10,000 PSI
Weight:	10 lbs
Size:	13.17" x 4.13" x 2.69"
Warranty:	5 year limited warranty (excluding blades)

### Accessories:

Catalog Number:	Description:
PT10054094:	Canvas Bag (included with tool)
CUT200BLMVBL:	Replacement Moving Blade
CUT200BLSTA:	Replacement Fixed (Stationary) Blade

*See Hydraulic Pumps and Hydraulic Hoses;  
Pump Accessories  
for other necessary equipment.*

**RHCC129ACSR**

**Latch Head, Remote Operated Cutter**  
Cuts up to 1.29" Copper / Aluminum Cable

- Interference free closure for mid-span cuts
- Precision cutting blades for clean cuts
- High strength steel cylinder
- Light weight, ergonomic design
- Durable canvas carrying bag stores tool and accessories

**Catalog Number RHCC129ACSR For Use On:**

- Copper/Aluminum Cable:** up to 1.29"
- ACSR:** up to 1113 kcmil

Pump Accessories  
for other necessary equipment.**

# MCC Series

## Manual Cable Cutters

MCC600 cuts to 600 kcmil Cu/Al;  
MCC1000 cuts to 1000 kcmil Cu/Al

- Rugged, high quality steel cutting blades
- Fiberglass handles with soft grips
- Excellent cutting edge performance
- Minimum of cable distortion

### For Use On:

**Copper/Aluminum Cable:** up to 600 kcmil (MCC600)  
up to 1000 kcmil (MCC1000)

### Variations:

<b>Catalog Number:</b> MCC600	<b>Description:</b> 3.5 lbs; 21" overall length; cuts copper and aluminum cable to 600 kcmil; max. insulation diameter 1.31"
<b>MCC1000</b>	9.0 lbs; 32" overall length; cuts copper and aluminum cable to 1000 kcmil; max. insulation diameter 1.90"

### Specifications (MCC600):

<b>Weight:</b>	3.5 lbs
<b>Size:</b>	21.00 x 5.00" x 2.00"
<b>Max. Insulation Dia.:</b>	1.31"
<b>Warranty:</b>	1 year limited warranty (excluding blades)

### Accessories:

<b>Catalog Number:</b>	<b>Description:</b>
<b>MCC600BLADESET:</b>	Replacement blades for MCC600
<b>MCC1000BLADESET:</b>	Replacement blades for MCC1000

## RCC - Cu/Al

### RCC-Series Ratchet Cutters for Cu/Al

Three variations covering a range of Cu/Al

- Rugged, high quality steel cutting blades
- Excellent cutting edge performance
- Minimum of cable distortion

#### For Use On:

**RCC600E:** Copper & Aluminum 600 kcmil

**RCC750HD:** Copper & Aluminum 750 kcmil

**RCC1000:** Copper & Aluminum 1000 kcmil

#### Variations:

**Catalog Number:** **Description:**  
**RCC600E** 10.5" overall length; cuts copper and aluminum cable to 600 kcmil; max. insulation diameter 1.05"; 1.3 lbs

**RCC750HD** 10.5" overall length; cuts copper and aluminum cable to 750 kcmil; max. insulation diameter 1.62"; 2.4 lbs

**RCC1000** 20" overall length; cuts copper and aluminum cable to 1000 kcmil; max. insulation diameter 2.38"; 5.0 lbs

#### Specifications (RCC600E):

<b>Weight:</b>	1.3 lbs
<b>Length:</b>	10.50" x 4.25" x 1.75"
<b>Max. Insulation Dia.:</b>	1.05"
<b>Warranty:</b>	1 year limited warranty (excluding blades)

#### Accessories:

<b>Catalog Number:</b>	<b>Description:</b>
<b>RPC701302:</b>	Fixed Replacement Blade for RCC1000
<b>RPC701402:</b>	Moveable Replacement Blade for RCC1000

**RCC - Cu/Al, ACSR**

**RCC-Series Cutters for Cu/Al, ACSR**

Three variations covering a range of Cu/Al , ACSR

- Quick release, bi-directional ratchet mechanism
- Rapid blade advance
- Easy cutting with minimal cable distortion

**For Use On:**

**RCC954ACSR1K:** Copper 1000 kcmil;  
Aluminum 1000 kcmil;  
ACSR 954 kcmil

**RCC556:** Copper 500 kcmil;  
Aluminum 500 kcmil;  
ACSR 556 kcmil

**RCC336:** Copper 350 kcmil;  
Aluminum 500 kcmil;  
ACSR 336 kcmil

**Variations:**

**Catalog Number:** **Description:**  
**RCC954ACSR1K** 22.75" overall length; 1.38" max. insulation diameter; 6.5 lbs

**RCC556** 20" overall length; 1.25" max. insulation diameter; 4.5 lbs

**RCC336** 10.5" overall length; .74" max. insulation diameter; 1.2 lbs

**Specifications (RCC954ACSR1K):**

<b>Weight:</b>	6.5 lbs
<b>Size:</b>	22.75" x 7.00" x 1.88"
<b>Max. Insulation Dia.:</b>	1.38"
<b>Warranty:</b>	1 year limited warranty (excluding blades)

**Accessories:**

<b>Catalog Number:</b>	<b>Description:</b>
<b>RPC705501:</b>	Fixed Replacement Blade for RCC556
<b>RPC705601:</b>	Moveable Replacement Blade for RCC556
<b>RPC902101:</b>	Fixed Replacement Blade for RCC336
<b>RPC902201:</b>	Moveable Replacement Blade for RCC336

**RWRC Series**

**Ratchet Wire Rope Cutters**  
 Cuts Mild and Stainless Steel

- Hardened steel blades
- Rapid blade advance
- Reduced handle force compared to scissor or compound action designs

**For Use On:**

**RWRC916:** Mild Steel: 9/16" diameter  
 Stainless Steel: 1/2" diameter

**RWRC516:** Mild Steel: 5/16" diameter  
 Stainless Steel: 1/4" diameter

**Variations:**

**Catalog Number:** **Description:**  
**RWRC916** 20" overall length; 9/16" diameter Mild Steel; 1/2" diameter Stainless Steel; 4.4 lbs

**RWRC516** 10" overall length; 5/16" diameter Mild Steel; 1/4" diameter Stainless Steel; 1.2 lbs

**Specifications (RWRC916):**

**Weight:** 4.4 lbs  
**Size:** 20.00" x 9.00" x 2.00"  
**Mild Steel Dia.:** 9/16"  
**Stainless Steel Dia.:** 1/2"  
**Warranty:** 2 year limited warranty (excluding blades)

**1/4" Dia. Wire Rope**

**Y10AC9**

**Electric Hydraulic Pump; 10,000 PSI**  
Light weight, space saving design

- Easy to carry and transport
- Factory set relief valve
- 100,000+ life cycles
- Sealed electric pendant switch with 10-foot cord

**For Use With:**

**Y10AC9:** 10,000 PSI electric pump  
**Used with:** Y34BH, Y35BH, Y35BH4, Y39BH, Y45, Y46, Y46C, Y750BHXT, Y750CBHXT, Y644MBH, Y4PC834MBH, Y81KFTMBH, Y60BHU, Y60LW, RHCC Series Cutters

**Variations:**

<b>Catalog Number:</b>	<b>Description:</b>
Y10AC9	Electric hydraulic pump
Y10AC9OEM	Electric hydraulic pump with foot switch; pump features "Jog & Hold"

**Specifications:**

<b>Weight:</b>	28.0 lbs (including oil)
<b>Motor:</b>	115V-AC 50/60 Hz 5/8 HP, 10,000 RPM
<b>Height:</b>	14.38"
<b>Base:</b>	18.00" x 8.75" x 6.50"
<b>Max. Current Draw:</b>	11 amp
<b>Reservoir Volume:</b>	1.61 quarts
<b>Warranty:</b>	5 year limited warranty

*Examples of some of the remote crimping and cutting heads for use with Y10AC9 pump*

**Accessories:**

<b>Catalog Number:</b>	<b>Description:</b>
YACCASE:	Steel carrying case with handle and locking latch
YACFC:	Foot control switch

*See Hydraulic Hoses; Pump Accessories for Hose options*

**Y60LW**

**RHCC129ACSR**

**Y4PC834MBH**

**RHCC10ACSR**

**EPP10**

**Electric Hydraulic Pump; 10,000 PSI**

Also available in 6,000 PSI

- Lightweight, small size
- 100,000+ life cycles
- Durable remote pendant switch

**Variations / For Use With:**

**Catalog Number EPP10:** 10,000 PSI electric pump  
**Used with:** Y34BH, Y35BH, Y35BH4, Y750BHXT, Y750CBHXT, Y39BH, Y45, Y46C, Y46, Y60BHU, Y60LW, Y644MBH, Y4PC834MBH, Y81KFTMBH, RHCC Series Cutters

**Catalog Number EPP6:** 6,000 PSI electric pump  
**Used with:** Y29BH, Y35L

*Examples of some of the remote crimping and cutting heads for use with EPP10 pump*

**Specifications:**

<b>Motor:</b>	115V-AC/60 Hz 1/2 HP @ 3450 RPM
<b>Max. Current Draw:</b>	12.5 amperes
<b>Weight:</b>	30.0 lbs
<b>Base:</b>	18.00" x 8.00" x 6.00"
<b>Height:</b>	16.00"
<b>Reservoir Volume:</b>	2 quarts
<b>Warranty:</b>	5 year limited warranty

**Accessories:**

Catalog Number:	Description:
EPPCASE1:	Steel carrying case with handle, locking latch
PT9711:	Pendant switch

*See Hydraulic Hoses; Pump Accessories for Hose options*

**EP10**

**Electric Hydraulic Pump; 10,000 PSI**

Also available in 6,000 PSI

- Dual voltage / hertz
- Oil level window
- 8 quart reservoir

**Variations / For Use With:**

**Catalog Number: Description:**

**EP10:** 10,000 PSI electric pump; 1/2 HP 115/230 V-AC; 60 cycle

**Used with:** Y34BH, Y35BH, Y35BH4, Y750BHXT, Y750CBHXT, Y39BH, Y45, Y46C, Y46, Y60BHU, Y60LW, Y644MBH, Y4PC834MBH, Y81KFTMBH, RHCC Series Cutters

**EP101HP:** 10,000 PSI electric pump; 1 HP 115/230 V-AC; 60 cycle

**Used with:** Y34BH, Y35BH, Y35BH4, Y750BHXT, Y750CBHXT, Y39BH, Y45, Y46C, Y46, Y60BHU, Y60LW, Y644MBH, Y4PC834MBH, Y81KFTMBH, RHCC Series Cutters

**EP101HP2:** 10,000 PSI electric pump; 1/2 HP 220/230 V-AC; 50/60 cycle

**Used with:** Y34BH, Y35BH, Y35BH4, Y750BHXT, Y750CBHXT, Y39BH, Y45, Y46C, Y46, Y60BHU, Y60LW, Y644MBH, Y4PC834MBH, Y81KFTMBH, RHCC Series Cutters

**EP102:** 10,000 PSI electric pump; 1/2 HP 220/230 V-AC; 50/60 cycle

**Used with:** Y34BH, Y35BH, Y35BH-4, Y750BHXT, Y750CBHXT, Y39BH, Y45, Y46C, Y46, Y60BHU, Y60LW, Y644MBH, Y4PC834MBH, Y81KFTMBH, RHCC Series Cutters

**EP6:** 6,000 PSI electric pump

**Used with:** Y35L, Y29BH

**Specifications:**

<b>Motor:</b>	1/2 HP 115/230V-AC, 60 Cycle; 1/2 HP @ 3450 RPM
<b>Max. Current Draw:</b>	10 amperes
<b>Reservoir Volume:</b>	8 quarts max; 2 quarts min.
<b>Height:</b>	17.50"
<b>Base:</b>	11.75" x 18.50"
<b>Dry Weight:</b>	68.0 lbs (86.0 lbs with max. fluid)
<b>Warranty:</b>	5 year limited warranty

**Accessories:**

*See Hydraulic Hoses; Pump Accessories for Hose options*

# EPAC10

## Electric Hydraulic Pump; 10,000 PSI

Also available in 6,000 PSI

- Roll cage
- 3 position switch and control box
- Full automatic or manual "Jog and Hold" cycles
- Windows allow easy inspection of proper oil level

### Variations / For Use With:

**Catalog Number:** Description:  
**EPAC10:** 10,000 PSI electric pump  
**Used with:** Y34BH, Y35BH, Y35BH4, Y39BH, Y45, Y46, Y46C, Y750BHXT, Y750CBHXT, Y644MBH, Y4PC834MBH, Y81KFTMBH, Y60BHU, Y60LW, RHCC Series Cutters

**EPAC6:** 6,000 PSI electric pump  
**Used with:** Y29BH, Y35L

### Specifications:

**Motor:** 1/2 HP 115/230V-AC, 60 Cycle; 1/2 HP @ 3450 RPM  
**Max. Current Draw:** 10 amperes  
**Reservoir Volume:** 8 quarts max; 2 quarts min.  
**Height:** 17.50"  
**Base:** 11.75" x 18.50"  
**Dry Weight:** 68.0 lbs (82.0 lbs with max. fluid)  
**Warranty:** 5 year limited warranty

*Examples of some of the remote crimping and cutting heads for use with EPAC10 pump*

### Accessories:

*See Hydraulic Hoses; Pump Accessories for Hose options*

Y60LW

Y81KFTMBH

RHCC129ACSR

**HP10 and FP10**

**Manual Hydraulic Pump; 10,000 PSI**  
Also available in 6,000 PSI

- Solid base with broad leg stabilizers
- Quick disconnect hydraulic fitting
- Built in handle for easy transport
- Factory set pressure release valve with audible click
- Quality, heavy duty foot pad with diamond plate steel (FP10)

**Variations / For Use With:**

<b>Catalog Number:</b>	<b>Description:</b>
<b>HP10:</b>	10,000 PSI hand pump
<b>Used with:</b>	Y34BH, Y35BH, Y35BH4, Y750BHXT, Y750CBHXT, Y39BH, Y45, Y46C, Y46, Y644MBH, Y4PC834MBH, Y81KFTMBH, RHCC Series Cutters
<b>HP6:</b>	6,000 PSI hand pump
<b>Used with:</b>	Y29BH, Y35L
<b>FP10:</b>	10,000 PSI foot pump
<b>Used with:</b>	Y34BH, Y35BH, Y35BH4, Y750BHXT, Y750CBHXT, Y39BH, Y45, Y46C, Y46, Y644MBH, Y4PC834MBH, Y81KFTMBH, RHCC Series Cutters
<b>FP6:</b>	6,000 PSI foot pump
<b>Used with:</b>	Y29BH, Y35L

*HP10 Hand Pump*

**Specifications:**

<b>Weight:</b>	18.0 lbs
<b>Size:</b>	24.75" x 6.75" x 3.00"
<b>Height (open):</b>	20.00"
<b>Reservoir Volume:</b>	1-1/8 quarts
<b>Warranty:</b>	5 year limited warranty

**Accessories:**

<b>Catalog Number:</b>	<b>Description:</b>
<b>BP10PADKIT:</b>	Extended leg pad stabilizers (includes hardware)

***See Hydraulic Hoses; Pump Accessories for Hose options***

# GP10

## Gas Driven Hydraulic Pump; 10,000 PSI Heavy Duty 4 Horse Power gasoline engine

- Sturdy steel roll cage design
- Manual control valve
- Fast hose assembly; quick disconnect hydraulic coupler
- Large 8 quart reservoir

### For Use With:

#### Catalog Number GP10:

10,000 PSI; 4 HP engine, 4 cycle

**Used with:** Y34BH, Y35BH, Y35BH4, Y750BHXT, Y750CBHXT, Y39BH, Y45, Y46C, Y46, Y60BHU, Y60BHUD, Y60LW, Y644MBH, Y4PC834MBH, Y81KFTMBH, RHCC Series Cutters

### Specifications:

<b>Engine:</b>	4 H.P.; 4 Cycle
<b>Weight:</b>	77.8 lbs (overall dry weight)
<b>Size:</b>	21.00" x 22.25" x 16.00"
<b>Reservoir Volume:</b>	8 quarts
<b>Warranty:</b>	5 year limited warranty

*Examples of some of the remote crimping and cutting heads for use with GP10 pump*

### Accessories:

*See Hydraulic Hoses; Pump Accessories for Hose options*

**Y750BHXT**

**Y644MBH**

# Hydraulic Hoses

## 10,000 PSI Non Conductive Hoses

- 3 lengths available in 2 diameters
- Orange
- Stackable couplers (male/female)

### Variations:

Catalog Number:	Description:
PT2990010	10' length; 3/16" diameter
PT2990015	15' length; 3/16" diameter
PT2990025	25' length; 3/16" diameter
PT2990110	10' length; 1/4" diameter
PT2990115	15' length; 1/4" diameter
PT2990125	25' length; 1/4" diameter

### Notes:

For proper care and maintenance of hydraulic hoses, consult the **Hydraulic Hose Care Manual; Form #7828**.

1/4" diameter (available for 10,000 PSI only) hose provides a higher flow rate for faster ram movement.

## 6,000 PSI Non Conductive Hoses

- 3 lengths available
- Orange
- Stackable couplers (male/female)

### Variations:

Catalog Number:	Description:
PT2990210	10' length; 3/16" diameter
PT2990215	15' length; 3/16" diameter
PT2990225	25' length; 3/16" diameter

## Hydraulic Hoses

### 10,000 PSI Conductive Hose

- Stackable couplers (male/female)
- Steel braided with steel spring reinforced ends
- Black

#### Variations:

**Catalog Number:** PT91  
**Description:** 8' length; steel braided with steel spring reinforced ends; stackable couplers (male/female); Black. No electrical rating.  
**DO NOT USE ON ENERGIZED CONDUCTOR**

#### Notes:

For proper care and maintenance of hydraulic hoses, consult the **Hydraulic Hose Care Manual; Form #7828**.

### 8,800 PSI Conductive Hose

- Stackable couplers (male/female)
- Steel braided with steel spring reinforced ends
- Black

#### Variations:

**Catalog Number:** PT76  
**Description:** 8' length; steel braided with steel spring reinforced ends; stackable couplers (male/female); Black. No electrical rating.  
**DO NOT USE ON ENERGIZED CONDUCTOR**

# Accessories

## PT290741 Insulated Hose Carrying Bag

- Designed for protection and cleanliness for non conductive hoses; maximum carrying capacity of 10 lbs.
- Accommodates 100 feet of non-conductive hose coiled to 17-1/2" OD and 3-3/4" wide

## ALFLUID™ Hydraulic Fluid for Pumps

- ALFLUIDQT is quart size; ALFLUIDGAL is gallon size
- All weather hydraulic fluid for BURNDY® pumps types HP hand pump, FP foot pump, GP gasoline pump, and EPP electric pump

## PT93 (Male) and PT94 (Female)

- Replacement couplers for 10,000 PSI operating pressure (sold separately)

## PT11018 In-Line Pressure Gauge for 10,000 PSI Hydraulic Pumps

- Pressure gauge for 10,000 PSI operating hydraulic pumps

## PT29091 (Male) and PT292141 (Female)

- Replacement couplers for 6,000 PSI operating pressure (sold separately)

## MD6/MD7 Related

### MD6CP1 Protective Jaw Covers

- Laminated vinyl jaw covers, supplied as set
- Compact, snap in place easily
- Fits all styles except Snub-Nose variations

### PT4925 Canvas Bag

- Sturdy canvas bag for MD6/MD7 tool variations with or without covers in place
- Holds up to 9 die sets (sold separately)

### PT6744 Jaw Cover (Snub-Nose)

- Semi-rigid Neoprene non-conductive material
- Fits all MD66 Snub-nose variations

### PT49521 Steel Carrying Case

- Provides storage for the following: MD6, MD66, MD68, MD614, MD637, MD638, MD7, and MD76 with or without covers (sold separately)
- Holds up to 18 die sets (sold separately)

### PT49311 Die Button Repair Kit

- Replacement die button kit for MD6/MD7 tool variations

### PT6733 Hotstick Tool Carrying Bag

- Heavy-duty, adjustable canvas bag
- Accommodates 48", 60" and 72" variations of the MD6 and Y35 Hotstick tools

**Accessories**

**PT6545 Die Case for S or P Style Die Sets**

- Metal carrying case
- Accommodates 8 S or P Style Die Sets typically used with the Y45 and Y46 series of tools

**PT29291 Carry Case for U Dies**

- Steel case design for storage and protection of U dies
- Accommodates 15 die sets (standard or wide width U dies)
- Case is 9-1/2" x 6" x 1-1/2"
- Die sets sold separately

**HYFLUID™ Hydraulic Fluid for HYPRESS™ Hand Tools**

- HYFLUIDQT - quart size; HYFLUIDGAL - gallon size
- Hydraulic fluid for HYPRESS™ hand tools types Y35, Y352, Y39, Y750HSXT, and Y750CHSXT

**Y35/Y39REPKITA Seal Repair Kit**

- Seal repair kit for Y35 or Y39 tools

**Steel Carrying Cases for Y35 & Y352**

- PT2972 - steel carrying case for Y35 tool
- PT29360 - steel carrying case for Y352 tool

PT294021

**Adjustable Head Grip for Hot Stick PT294021 for Y35 and Y750 remote tools PT10128 for Y46**

- Adjustable head grip for joining HYPRESS™ heads to universal hot sticks

# FORCEGAUGE1215

## Force Test Gauge for 12 & 15 ton tools

Use with PAT46\*, PAT750, Y750 and Y35

- Custom U die blanks with detent
- Accommodates 12 ton or 15 ton tools
- Comes with custom polymer-based carry case to protect blanks and gauge

\* PUADP1 adaptor required with PAT46 tool

*FORCEGAUGE1215 with die blanks (included)*

*FORCEGAUGE1215 in case  
(all items included)*

### Gauge Specifications:

**Weight:** 2.7 lbs (4.5 lbs for entire kit)  
**Size:** 8.30" x 4.30" x 1.50"  
**Warranty:** 1 year limited warranty

## PT292792 Force Test Gauge for Y39

- For Y39 HYPRESS™ tools
- Not recommended for remote powered heads
- Easy to read dial; includes operating and maintenance manual and test dies

### Gauge Specifications:

**Weight:** 2.7 lbs  
**Size:** 9.25" x 3.88" x 2.00"  
**Warranty:** 1 year limited warranty

**WIREMIKE™**

**Stainless Steel Wire Micrometer**

Available in a variety of formats

- Strong, durable, high quality
- Most formats:
  - Allows for use as both caliper and ruler
  - Measures I.D. and O.D. of tubing
  - Measures thin-wall and rigid conduit including IPS
  - Measures ACSR, stranded and solid commercial cables

**Catalog # WIREMIKE, WIREMIKED and RK1942 are for use on:**

**ACSR**

#6 to 336.4 (26/7) Stranded

**Stranded AWG**

#18 to 2000 kcmil

**Solid**

#20 to 4/0 AWG

**IPS Tubing (Cu/Al) and Rigid Conduit:**

1/4" to 2-1/2"

**Tubing Sizes:**

3-1/8" inside maximum; 2-15/16" outside maximum

**Thin-wall Conduit:**

3/8" to 2-1/2"

**Catalog # WIREMIKECI is for use on:**

**Compression Connectors and Splices (including Compression Grounding)**

- #18 to 2500 kcmil Copper Class B
- #10 to 4/0 Solid Aluminum / Copper
- #18 to 3500 kcmil Concentric Aluminum
- #8 to 1100 kcmil Compact Aluminum
- #14 to 1111 kcmil Copper DLO

**Also used for reference only\* for inspection of completed crimp when using Butting Copper or Aluminum Dies with the 750, 46, 35, or 39 series of tools.**

- Copper Dies U8CRT to U44XRT
- Aluminum Dies U8CABT to U39ART-2

**WIREMIKE**

**Variations:**

Catalog Number:	Description:
<b>WIREMIKE</b>	Stainless Steel, inch/fraction markings
<b>WIREMIKECI</b>	Stainless Steel, no ruler capabilities but may be used for reference on specific completed crimps (see more detail to left for WIREMIKECI)
<b>WIREMIKED</b>	Stainless Steel, decimal markings in place of fraction markings, same capabilities as catalog # WIREMIKE™
<b>RK1942</b>	Convenience packaging of WIREMIKE™ (with inch markings) in packaging suitable for hanging on a rack; sold in multiples of 10 only

*Close up for the Die Inspection Section (Used for Reference Only\*) Catalog # WIREMIKECI only*

\*WIREMIKECI tool is to provide measurements for reference only, not to confirm the suitability of connection. Customer is responsible to independently verify suitability of connection.

## BTW Series

### Micro-Adjustable Professional Grade Hand-operated “Click-Type” Torque Wrenches

- Ratcheting, calibrated, dual direction
- Positive lock with spring-loaded pull-down lock ring
- Individually serialized with matching certificate of calibration traceable to N.I.S.T.
- ASME B107.14M-1994 and ISO 6789

#### For Use On:

**Any mechanical connection with torque values within range of specific torque wrench. Including, but not limited to:**

Types: SERVIT®, OKLIP™, VERSITAP™, SCRULUG™, Lay-In QIKLUG™, VARITAP™, VARILUG™, KA-U Universal Terminals, UNITAP™, POLYTAP™, BARTAP™, Type BIPC, Terminal Blocks, U-BLOK™, SPEC-BLOK™, VERSIPOLE™

#### Variations:

Catalog Number:	Description:
BTW30150	Torque range 30 - 150 in-lbs; 10.25" long; 3/8" drive
BTW150750	Torque range 150 - 750 in-lbs; 16.00" long; 3/8" drive
BTW1575F12	Torque range 15 - 75 ft-lbs; 16.00" long; 1/2" drive

#### Specifications:

<b>Accuracy:</b>	±4% clockwise; ±6% counter clockwise of indicated value clockwise, from 20% to 100% of full scale
<b>Applicable Standards:</b>	ASME B107.14M-1994; ISO 6789
<b>Calibration:</b>	Traceable to N.I.S.T.
<b>Warranty:</b>	1 year limited warranty

**WEJTAP™ Tooling**

**WTB**

- WEJTAP™ patented tool body
- One piece assembly
- Installs WEJTAP™ and STIRRUP™ connectors #8 AWG - 1590 kcmil ACSR with applicable tool head

**WTHY1S**

- WEJTAP™ tool head
- Installs medium and large (yellow coded) connectors

**WTHRBY1S**

- WEJTAP™ tool head
- Installs small and medium (red/blue coded) connectors

**Accessories**

**WTBASY**

- WEJTAP™ ram replacement assembly

**WEJTAP™ Boosters**

- The WEJTAP™ System requires use of boosters for installation of connectors (red, blue, and yellow boosters match connectors)
- Boosters are available packaged with connectors and also sold separately

Red: WPBRNBOX25  
Blue: WPBBNBOX25

Yellow: WPBYNBOX25

**WTOCBR and WTOCY**

- WEJTAP™ removal clip for red/blue connectors (WTOCBR) with WTHRBY1S tool head
- WEJTAP™ removal clip for yellow connectors (WTOCY) with WTHY1S tool head

**WTCK**

- WEJTAP™ tool cleaning/maintenance kit for use with type WTB tool body
- Comes in clear carrying bag

# Accys & Kits

**WHHWB**

- Hand-held wire brush for cleaning surface contact areas on non-energized conductors

**WTCC**

- Plastic carrying case only; designed for rugged use in all weather conditions
- Accommodates WEJTAP™ installation tool, removal clips, and cleaning kit (sold separately)

**WABAG**

- Durable bag designed to carry installation tool(s), removal clips, cleaning kit, and hotstick accessories; Holders for power boosters located on outside of bag (all sold separately)

\*Note: Non-hotstick power units do not contain features allowing activation with hotsticks; they are not upgradeable.

**Hotstick Accys**

**WHSCWH**

- Hotstick connector clamp holds tap connector and wedge for installation on energized lines with shotgun hotstick

**WHSADP**

- Hotstick angle wedge holder adapter attaches wedge clamp to universal hotstick for hotline installation

**WHSWB**

- Hotstick wirebrush attaches to universal hotstick for cleaning the contact surface of the line conductor

**WHSTA**

- Hotstick tool (actuator) hammer attaches to universal hotstick for striking the actuator button to complete installation

**WHSPBC**

- Hotstick dual cable clamp to hold run and tap conductors in place during installation; for all applications #8-1272 ACSR

**WCHAWAS**

- Hotstick angle wedge holder adapter attaches wedge clamp to universal hotstick for installation using shotgun stick

**WHSGB**

- Hotstick breech drive; geared shotgun hotstick adapter latches to breech end of tool without disassembly for use on energized lines

**WHSSADP**

- Hotstick spring loaded 90 degree adapter; used to attach tool to universal hotstick for hotline installations

# Auger Bits

## DOMINATOR Auger Bits

- Single Flute
- Hardened Steel Tip
- Aggressive lead screw
- Cuts hardest of woods with very fast drilling
- Self-feeding
- 100+ Holes

HIW716MAG Hydraulic  
Impact Wrench

HIW716ENF Hydraulic  
Impact Wrench

N-110

**HIW716ENF**

**ENFORCER® Hydraulic Impact Wrench**  
Variable Torque; 7/16" Quick Chuck

- Industry exclusive torque selector allows switching between 200 and 515 ft-lb torque settings
- Dual spool selector for Open and Closed systems
- Cartridge style valves for greater accuracy
- Internal safety relief valve

**Variations:**

<b>Catalog Number:</b>	<b>Description:</b>
HIW716ENFKIT1	Wrench, eyelet
HIW716ENFKIT2	Wrench, eyelet, flat face couplers
HIW716ENFKIT3	Wrench, flat face couplers
HIW716ENFTG	Wrench, trigger guard

# HIW716MAG

## MAG Series, Hydraulic Impact Wrench Machined Aluminum, Gerotor Design

- Aircraft grade extruded aluminum body, forged handle
- CNC machined parts
- Frictionless gerotor motor
- Cartridge style valve
- 7/16" Tri-ball quick change chuck
- Dual spool selector for Open & Closed systems
- "Glove-sized" wide grip activation trigger
- Inlet/Outlet SAE 6 adapters
- Reverse flow and hook-up protection
- Injection molded thermally insulated textured comfort grips
- Forward/Reverse selector

### Variations:

Catalog Number:	Description:
HIW716MAGKIT1	Wrench, flat face couplers
HIW716MAGKIT2	Wrench, swivels, 8' NCR hose, flat face couplers
HIW716MAGKIT3	Wrench, swivels, 10' NCR hose, flat face couplers
HIW716MAGKIT4	Wrench, flat face couplers, trigger guard
HIW716MAGKIT5	Wrench, flat face couplers, trigger guard, handle

### Specifications:

Chuck Type:	7/16" Tri-ball quick chuck
Opt. Pressure:	1,000 - 2,000 PSI
Flow Range:	4 - 12 GPM
Opt. Flow Range:	4 - 8 GPM
Weight:	7.6 lbs
Torque:	550 ft-lbs
Size:	9.62" x 9.00" x 3.62"
Warranty:	5 year limited warranty

### Accessories:

<b>Catalog Number:</b>	
<b>LPHTADPMM71612</b>	7/16" quick chuck to 1/2" square drive adapter
<b>LPHTADPMMOP66 (2 required)</b>	SAE #6 to 3/8" NPT male-to-male adaptor

for additional options**

## HBR Series

### Hydraulic Breakers

Light/Medium Duty (HBR40)

Medium/Heavy Duty (HBR66)

- Control trigger built into handle
- Provided with 18" braided whip hoses (couplers ordered separately)
- Standard tool attachment mechanism allows use of all standard tool bits

#### Variations:

**Catalog Number:** HBR40  
**Description:** Light to Medium Duty Hydraulic Breaker  
Performance: 45-55 lb class breakers;  
Weight: 40 - 48 lbs.; Length: 25";  
Tool Steel Capacity: 1" x 4-1/4"

**HBR66** Medium to Heavy Duty Hydraulic Breaker  
Performance: 60 - 80 lb class breakers;  
Weight: 50 - 67 lbs.; Length: 27" to 35";  
Tool Steel Capacity: 1-1/4" x 6"

*HBR40 Light and Medium Duty Hydraulic Breaker*

*HBR66 Medium and Heavy Duty Hydraulic Breaker*

#### Specifications:

<b>Flow:</b>	4 - 7 GPM (15 - 27 LPM)
<b>Optimum Flow:</b>	4 GPM (15 LPM)
<b>Pressure:</b>	1200 - 2000 PSI (85 - 140 BAR)
<b>Max. Back Pressure:</b>	150 PSI (11 BAR)
<b>Whip Hoses:</b>	18" with 3/8" NPT fittings
<b>Warranty:</b>	5 year limited warranty

#### Accessories:

*See Low Pressure Hydraulic Accessories for options*

# Submersible Pumps

**Fully Submersible,  
1,000-2,000 PSI Pumps**  
Provided with whip hoses

- Self-lubricating design
- Totally submersible
- Can run dry without damage
- Open/Closed Center operation

**Variations:**

Catalog Number: Description:

**HTP3**            3" Submersible pump; 7-10 GPM flow;  
40 lbs.; Pump capacity: 500 GPM (1900  
LPM); Gear Motor; 3" Male Cam-lock;  
40' maximum lift; 1/2" x 14 (#8) NPT (F)

**HP2HV**            Submersible pump adaptable to 2" or 2-1/2"  
discharge; 4-9 GPM flow; 13 lbs.; Pump  
capacity: 340 GPM; Gerotor Motor

**HTP3**

**Accessories:**

**Catalog Number:**            **Description:**  
**HOSE325:**                    25 ft. long hose (for HTP3)  
**HOSE350:**                    50 ft. long hose (for HTP3)

**HP2CAMLOCKHOSESET:**    Hose Set Kit (for HP2HV)  
**HOSE2:**                        25 ft. long hose (for HP2HV)

*See Low Pressure Hydraulic Accessories  
for additional options*

**HP2HV**

**HPT-R1 Series**

**Low Pressure Hydraulic Pole Tampers**

Available with or without On/Off Valve

- Patented valving prevents impacting of ram within tamper
- Stroke amplitude of 1-5/8"
- Stroke frequency of 1375 blows/min
- Interchangeable heavy duty tamper shoes (sold separately)

**Variations:**

<b>Catalog Number:</b>	<b>Description:</b>
HPT60R1	60" length; 29 lbs; with On/Off valve
HPT72R1	72" length; 30 lbs; with On/Off valve
HPT84R1	84" length; 32 lbs; with On/Off valve
HPT96R1	96" length; 34 lbs; with On/Off valve
HPT59R1	59" length; 26 lbs; without On/Off valve
HPT71R1	71" length; 28 lbs; without On/Off valve
HPT83R1	83" length; 31 lbs; without On/Off valve

*Hydraulic Tamper with On/Off Valve*

*Hydraulic Tamper without On/Off Valve*

**TSKD**  
*Kidney Tamper Shoe*

**TSSQ**  
*Square Tamper Shoe*

**Specifications:**

<b>Flow:</b>	4-10 GPM (15-38 LPM)
<b>Pressure:</b>	1000-2000 PSI (70-140 BAR)
<b>Max. Back Pressure:</b>	250 PSI (17 BAR)
<b>Operation:</b>	Open/Closed Center
<b>Stroke Amplitude:</b>	1-5/8"
<b>Stroke Frequency:</b>	1375 per minute
<b>Tool Ports:</b>	#6 SAE O-Ring (F)
<b>Warranty:</b>	5 year limited warranty

**Accessories:**

<b>Catalog Number:</b>	<b>Description:</b>
TSKD:	Kidney shoe; 3" x 8" (7.6 cm x 20.3 cm)
TSSQ:	Square shoe; 8" x 8" (20.3 cm x 20.3 cm)
LPWHPKITD:	Whip Hose Kit

**See Low Pressure Hydraulic Accessories for additional options**

# HHS Series

## Hydraulic Hand Chain Saws Low Pressure Hydraulic Chain Saws

- Gerotor-type motor has lifetime warranty
- .325" pitch anti-kickback chain
- Dual action spool switches from open to closed center operation easily

### Variations:

**HHSO/CB13**  
*Low Pressure Hydraulic Hand Chain Saw*

Catalog Number:	Description:
HHSO/CB13	13" cutting capacity; 15-1/2" bar length; 7.5 lbs; 24" overall length
HHSO/CB16	16" cutting capacity; 18-1/2" bar length; 8.0 lbs; 27" overall length
HHSO/CB20	20" cutting capacity; 22-1/2" bar length; 8.5 lbs; 30" overall length

### Specifications:

<b>Flow:</b>	5-8 GPM (19-30 LPM)
<b>Pressure:</b>	1000-2000 PSI (70-140 BAR)
<b>Max. Back Pressure:</b>	250 PSI (17 BAR)
<b>Operation:</b>	Open/Closed Center
<b>Motor:</b>	Gerotor (lifetime warranty)
<b>Chain:</b>	.325" pitch anti-kickback
<b>Tool Ports:</b>	#6 SAE O-Ring (F)
<b>Warranty:</b>	5 year limited warranty

### Accessories:

*See Low Pressure Hydraulic Accessories for options*

## HPS-LW Series

### Hydraulic Pole Saws

Light weight, low pressure hydraulic

- CNC machined Aircraft grade solid Aluminum body and handle
- Branch hook
- Cartridge style valve
- External bar oiler
- 2-stage safety trigger, anti-kickback chain and anti-slip grip
- Fiberglass tube tested at final assembly with AB Chance Hot Stick Tester Model CC403-3178 to the value specified as per OSHA 1910.269

#### Variations:

Catalog Number:	Description:
HPS1371LW	71" overall length; 1.312" pole diameter; 13" cutting capacity; 8.0 lbs
HPS1383LW	83" overall length; 1.312" pole diameter; 13" cutting capacity; 8.2 lbs

#### Specifications:

Flow:	4-8 GPM (16-30 LPM)
Pressure:	1000-2000 PSI (70-140 BAR)
Max. Back Pressure:	250 PSI (17 BAR)
Operation:	Open/Closed Center
Motor:	Gear
Chain:	.325" pitch anti-kickback
Tool Ports:	#6 SAE O-Ring
Warranty:	5 year limited warranty

#### Accessories:

*See Low Pressure Hydraulic Accessories  
for additional options*

# HPP Series

## Hydraulic Power Pack, Low Pressure

Available for single or dual circuit

- Integral oil cooling system
- Fully shrouded fan and changeable oil filter
- Manual choke with adjustable throttle mechanism

### Variations:

**Catalog Number: Description:**

**HPP18** Output/Flow 1 @ 2000 PSI @ 1-10 GPM (138 Bar @ 0-38 LPM); 18 HP @ 3500 RPM; Variable GPM output valve

**HPP182** Output/Flow 2 @ 2000 PSI @ 5 GPM or 1 @ 2000 PSI @ 10 GPM; can simultaneously operate two (2) 5 GPM tools OR 1 (1) tool at 10 GPM; 18 HP @ 3500 RPM

**HPP5** Output/Flow 1 @ 1450 PSI; L: 20" x H: 18" x W: 17" 5.5 HP engine with recoil start; Dry Weight: 83 lbs; Fuel Tank Capacity: 1 gallon; Hydraulic Oil Capacity: 1.25 gallons

### Specifications (HPP18 Series):

<b>Dry Weight:</b>	233 lbs (105.6 kg)
<b>Size:</b>	35.00" x 32.00" x 29.00"
<b>Motor:</b>	18 HP @ 3500 RPM
<b>Warranty:</b>	5 year limited warranty

### Accessories:

*See Low Pressure Hydraulic Accessories for options*

**LPHT Accessories**

Catalog Number	Description
LPHT3CHISEL11418	3" Chisel, 1-1/4", hex, 18" long
LPHTASPHALTCUT118	Asphalt cutter, 1-1/8" hex
LPHTCLAYSPADE118	Clay spade, 1-1/8" hex
LPHTGRDVR11458	Ground rod driver, 1-1/4" hex, 5/8" rod
LPHTMOILPT118	Moil point, 1" hex, 18" long
LPHTNARCHISEL11814	Narrow chisel, 1-1/8" hex, 14" long
LPHTADPMM71612	7/16" Quick chuck adaptor x 1/2" square
HIW71612TGKIT	Trigger guard for HIW716
LPHTADPMMOP66	ADP Male/Male SAE #6, 3/8 NPT (2 required per tool)
<b>LPHT HOSES Red or Orange</b>	
LPHTHOSNCR666610	Hose; Insulated, 10 foot; 3/8 NPT, 3/8 NPT
LPHTHOSNCR66668	Hose; Insulated, 8 foot; 3/8 NPT, 3/8 NPT
LPHTHOSNCR6668OP	Hose; Insulated, 8 foot, SAE #6, 3/8 NPT
LPHTHOSNCR666610OP	Hose; Insulated, 10 foot, SAE #6, 3/8 NPT
<b>COUPLERS</b>	
LPHTDRIPBODY66	Dripless body; 3/8 body, 3/8 NPT
LPHTDRIPBODY88	Dripless body; 1/2 body, 1/2 NPT
LPHTDRIPNOSE66	Dripless nose; 3/8 nose, 3/8 NPT
LPHTDRIPNOSE88	Dripless nose; 1/2 nose, 1/2 NPT
LPC38S	3/8, 3/8 NPT Flush face coupler set (body & nose)
LPC12S	3/8, 1/2 NPT Flush face coupler set (body & nose)
LPHTHTMADUSTCAPF	HTMA dust cap body
LPHTHTMADUSTCAPM	HTMA dust cap nose
<b>SOCKETS</b>	
LPHTSOC121	Socket - 1/2" drive x 1"
LPHTSOC121116	Socket - 1/2" drive x 11/16"
LPHTSOC12112	Socket - 1/2" drive x 1-1/2"
LPHTSOC12114	Socket - 1/2" drive x 1-1/4"
LPHTSOC12118	Socket - 1/2" drive x 1-1/8"
LPHTSOC1212	Socket - 1/2" drive x 1/2"
LPHTSOC121316	Socket - 1/2" drive x 13/16"
LPHTSOC12138	Socket - 1/2" drive x 1-3/8"
LPHTSOC121716	Socket - 1/2" drive x 1-1/16"
LPHTSOC1234	Socket - 1/2" drive x 3/4"
LPHTSOC1258	Socket - 1/2" drive x 5/8"
LPHTSOC1278	Socket - 1/2" drive x 7/8"
LPHTSOC12916	Socket - 1/2" drive x 9/16"
HIW12SOCSET	Socket set - 1/2" drive DP IMP 6 Point

**NOTE:**

*Only the most common accessories and sizes are shown. BURNDY has over 200 accessory items for your Low Pressure Hydraulic needs; if you don't see what you are looking for call us at Customer Service: 1-800-346-4175.*

*Auger Bits are featured on the Auger Bit pages earlier in the catalog.*

## Introduction - Basic Electrical Connection Principles:

### Basic Factors:

The basic factors which influence the design and performance of pressure wire connections are as follows:

1. Creep
2. Surface Oxide
3. Corrosion

A fourth factor, known as thermal effects, is also a consideration, but due to the technical nature and length of this topic, it will not be discussed in this publication.

At the outset it should be pointed out that these factors give rise to much more difficult problems in connections involving aluminum conductors than those encountered in copper to copper connections.

### Creep (Cold Flow)

Creep is the cold flow of the metal under pressure and it continues until the pressure reduces to a value at which any further creep is negligible. Creep properties depend on the particular metal or alloy and on its hardness; alloys having less creep than pure metals, and harder metals have less creep than soft metals. In a typical connection, the conductors are generally of pure metal and often of soft temper and therefore, subject to considerable creep. In addition, the condition is further exaggerated when aluminum is the conductor as compared to copper, since its creep rate is many times that of copper.

**Effect of Creep:** Figure 2 shows typical curves of total contact resistance plotted against total contact force. Curve A shows how the contact resistance continually decreases with increasing contact force. When the full contact force  $F_1$  is reached, the contact resistance reaches the low value of  $R_1$ . In general, the full tightening force on a connector greatly exceeds the maximum force for which there is no appreciable creep. Therefore, the force will gradually settle down to a value after which there will be no further significant creep. Fortunately, however, the resistance does not climb back up along curve A, the tightening curve, but instead it follows a new curve B, the relaxing curve, along which the resistance changes very little until the force relaxes to a value such as  $F_2$ .

Figure 2

Admittedly, the point of “no appreciable creep” is difficult to define. For pure metals, especially in the soft state, there is always some creep, even at very low pressures at room temperature. However, we do know that the pressure required to produce the same creep rate is several times greater for copper than for aluminum. Thus, to permit the same contact force  $F_2$  for aluminum and copper, the contact area  $A$  required for aluminum can be expected to be considerably greater than that required for copper. This explains why the contact areas for connectors for aluminum must be considerably greater than for copper and why many light duty connectors for copper are entirely inadequate for aluminum, even when specially plated and when recommended compounds are used on the contact surfaces.

**Relaxation:** Relaxation of pressure due to creep, or for any other reason, would be a much more difficult factor in a pressure connection were it not for the relationship of contact pressure to contact resistance on the relaxation curve as shown in Figure 2. It is frequently observed that some time after the bolts of a clamp type connector are tightened, the bolt tensions are relaxed appreciably. The question arises as to whether it is necessary to retighten the bolts to the original torque value. In a properly designed connector, retightening is unnecessary since the contact resistance should increase very little due to the relaxation of pressure, as shown by the relaxation curve of Figure 2.

This fact is largely responsible for the successful operation of a compression connector. The application of the compression tool applies very high pressure, establishing very low contact resistance. The removal of the compression tool releases a very large proportion of this pressure, and creep further relaxes this pressure. Fortunately, the contact resistance increases very little due to this pressure relaxation.

**Contact Force:** The previous analysis shows that the total contact force largely determines the contact resistance. Thus, to achieve the desired low value of contact resistance, the proper size and number of bolts in a clamp type connector must be supplied, and the compression tool must apply the proper force to a compression connector. In addition, the connector must be designed with sufficient structural strength, contact area, and resilience, to assure that the contact force cannot relax beyond the point where contact resistance begins to rise appreciably, as shown in Figure 2.

### Surface Oxide

The contact of pure metallic surfaces cannot be assured in practical connections. Surface contamination must be expected, especially surface oxidation. These surface films are insulators as far as contact resistance is concerned, and they must be broken to achieve metal to metal contact to make an adequate electrical connection. The difficulty of breaking the film depends on the nature of the film, its thickness, and the metal on which it is formed.

Copper oxide is generally broken down by reasonably low values of contact pressure. Unless the copper is badly oxidized, good contact can be obtained with very little or no cleaning.

Silver oxide is even more easily broken down by the contact pressure; and since silver oxide forms less readily at elevated temperatures, silver contact surfaces are preferred over copper when used for high temperatures. For this reason, it is considered good practice to silver plate copper contact surfaces that must operate at temperatures over 200° C.

On the other hand, aluminum oxide is a hard, tenacious, high resistance film that forms very rapidly on the surface of aluminum exposed to air. In fact, it is the toughness of this film that gives aluminum its good corrosion resistance. The oxide film that forms after more than a few hours is too thick and tough to permit a low resistance contact without cleaning. The aluminum oxide film is transparent so that even the bright and clean appearance of an aluminum connector is no assurance that the low contact resistance can be attained without cleaning.

In addition to the necessity for cleaning the oxide from aluminum, the surface should be covered with a good connector compound to prevent the oxide from reforming. Common practice is to clean the surface with a wire brush or emery cloth. The compound should be applied immediately after cleaning, or the compound should be put on first and the surface scraped through the compound. Present practice is to scratch brush dry and to apply the compound immediately thereafter. This allows a more thorough job of cleaning the conductor.

**Contact Compounds:** Petrolatum or No-Oxid are good contact surface compounds for aluminum, but BURNDY® PENETROX™ A, a petroleum type compound containing zinc dust, has the additional advantage of assisting in the

## Introduction - Basic Electrical Connection Principles: (continued)

breaking down of the contact resistance. How this is accomplished is not certain, but it appears that the zinc particles of PENETROX™ A probably act as current bridges in the breaks in the oxide film. For more complete information about the PENETROX™ line of compounds, refer to the Accessories section of this catalog.

**Interstrand Resistance:** The high contact resistance due to the oxide on the strands of an aluminum cable may be responsible for a poor distribution of current among the strands on the cable. Thus, the outer strands may carry much more than their share of the current and overheating of the cable may result. Tests have shown that even on new cable this effect of interstrand resistance can be considerable unless a good contact compound is used. The clamping action tends to break down the oxide and force the compound between the strands. This is particularly true of compression connectors due to the very high unit pressures developed.

The most effective way to break down interstrand resistance of aluminum cable is to use compression connectors filled with a compound having zinc particles. Then, when the end of the cable is inserted in the connector, the compound is forced between the strands where it very effectively breaks down the interstrand resistance upon application of the compressive force.

**Plating Aluminum:** Plating the contact surfaces of aluminum connectors will prevent the formation of aluminum oxide. Electro-tin, cadmium and zinc platings have been used for this purpose. However, the use of a plated aluminum conductor, does not make it less necessary to scratch brush the aluminum conductor, nor does it reduce the need for a good contact compound. Additional problems are introduced due to the plating on aluminum which render it of very doubtful value over the proper use of base aluminum. This will be more fully discussed later.

### Corrosion

The electrical conductivity and mechanical strength of an electrical connection must remain stable under the deteriorating influences of the environment. This deterioration is corrosion. It is the electrolytic action of moisture and other elements of the atmosphere in conjunction with the metals of the connection. If the conductors and connectors are of copper or a corrosion resistant copper alloy, corrosion is usually a minor factor. However, it is a very vital factor if aluminum is involved.

If moisture can be kept away from the connection, corrosion will not be a factor. The electrical connection of a high voltage splice on insulated cable is generally free from corrosion since the taping may be used to avoid corrosion on bare cable, provided it excludes moisture. It is difficult to get a good tape seal to the conductor itself, especially on stranded cable. If moisture does penetrate the taping, it will not dry out as readily as if the joint were untaped. Various plastic materials are available today for covering low voltage connections or for bare conductor connections on high voltage. Unless such coverings are completely moisture-proof, it is better to rely on installation with a good contact compound, using a connector designed to resist corrosion.

**Galvanic Action:** Whenever dissimilar metals are in the presence of an electrolyte, a difference in electric potential is developed. One metal becomes the cathode and receives a positive charge. The other becomes the anode and receives a negative charge. When these metals are in contact, an electrical current will flow, as in the case of any short-circuited electric cell. This electrolytic action causes an attack of the anodic metal, leaving the cathodic metal unharmed. The extent of the attack is proportional to the strength of the electrolytic current, which in turn is proportional to the electric potential difference developed.

The magnitude of the potential difference generated between two dissimilar metals can be seen by the position of these metals in the electrolytic series. Figure 3 is such a series. When two metals are in contact in an electrolyte, the one higher up in this series is the anode, the corroded metal, while the one lower is the cathode, the protected metal. The further apart the metals are in this series, the greater the electrolytic potential difference, and the greater the attack to the anodic metal.

Note that copper and aluminum are quite far apart in the series, copper being cathodic and aluminum anodic. Hence, when aluminum and copper are in contact in an electrolyte, the aluminum can be expected to be severely attacked.

**Crevice Corrosion:** Electrolytic attack can also occur between like metals due to a phenomenon known as oxygen concentration cell or crevice corrosion. Since oxygen is necessary for corrosive action, a variation in the concentration of

oxygen where a metal is exposed to an electrolyte will generate a difference of potential, and cause a corrosive attack in the oxygen starved area. Thus, since an electrolyte in a deep crevice is freely exposed to the air at the outside, the concentration of oxygen will be greatest at the mouth of the crevice. Then corrosion can be expected to occur in the crevice remote from the surface. Crevice corrosion can be prevented if the crevice is filled with a compound to exclude moisture. Thus, within the contact groove of an aluminum connector containing an aluminum conductor, there will be numerous crevices in which corrosion will take place unless a good connector compound is applied during installation. Copper, being a more noble metal, appears to be much less subject to crevice corrosion.

**Corrosion Testing:** The effectiveness of an electrical connection to resist corrosion can be tested in the laboratory under conditions designed to greatly accelerate the natural corrosive conditions of actual service. The most widely accepted means is the standard salt spray chamber. In this chamber the specimens are placed in a salt fog made by atomizing a 20% salt solution at 100° F.

BURNDY, as well as other manufacturers and utility companies, have done a great deal of testing and a considerable area of agreement has been reached. There are, however, minor differences in recommended practices. The problem is concerned with aluminum and aluminum to copper connections since the effect of corrosion on copper to copper connections is far less serious. Let us study the recommended practices.

**Aluminum to Aluminum Connections:** For joining aluminum to aluminum conductors, there is little disagreement that an aluminum bodied connector is the proper choice, since this obviously eliminates the galvanic corrosion of dissimilar metals. However, even in this case, care must be taken to prevent crevice corrosion and to select an alloy of aluminum for the connector body that is free from cracking due to stress corrosion.

**Aluminum to Copper Connections:** Similarly, for joining aluminum to copper conductors, an aluminum bodied connector is the best choice since it prevents galvanic corrosion of the aluminum conductor, the most vulnerable element to attack in the connection. Realizing this, BURNDY initiated a research program aimed at finding the best way to make an aluminum

Figure 3

connector suitable for joining aluminum to copper conductors.

This led to the evolution of the “Massive Anode Principle” of connector design for joining conductors of dissimilar metal. On the basis of this principle, properly designed, all-aluminum connectors became available for universal use in joining aluminum to aluminum or aluminum to copper conductors.

**Massive Anode Principle:** By making the aluminum connector massive in comparison to the copper conductor, when the copper conductor emerges from the connector, the electrolytic current density over the exposed face of the aluminum connector is greatly reduced. This is schematically represented in Figure 4. Since the rate of corrosion is directly related to the current density on the surface of the anodic material, the relatively large face of the aluminum connector will suffer only minor attack.

Figure 4

In addition, because the aluminum connector body is massive in the region where the corrosion occurs, the small loss of metal caused by corrosion is insignificant, even after long periods of service. Furthermore, the connector design should be such that clamping bolts, and areas of high stress which provide structural strength, are not in the regions subject to galvanic attack.

The effectiveness of this theory has been amply demonstrated in salt spray corrosion tests in which the connectors were subject to 1,000 hours in the salt spray fog with only minor corrosive pitting adjacent to the copper conductor, as seen in Figure 5. In addition, the aluminum conductor was completely protected, and the joint resistance remained virtually unchanged. The test involved a wide variety of sizes and types of connectors showing the effectiveness for small service connectors as well as large power connectors. Figure 6 shows a large all aluminum clamp type T connector installed on 3-1/2” diameter copper run and 750 kcmil aluminum tap. The figure shows this connector which was opened up after 1,400 hours of the salt spray test. Note that the contact surfaces are bright and clean and the only

evidence is minor pitting along the faces adjacent to the copper.

\*It should be emphasized that a good compound should be used on the contact surfaces whether aluminum or copper is used in an aluminum connector.

**Position of Conductor:** A properly designed aluminum connector for joining aluminum to copper must provide adequate separation between the conductors to prevent electrolytic attack on the aluminum conductor. Even then, it is good practice to install the aluminum conductor above the copper conductor if possible. This will prevent pitting of the aluminum conductor due to copper salts being washed over the aluminum.

**Plated Aluminum Connectors:** Plating has been used as a means to make an aluminum connector suitable for copper conductor. Such platings as copper, zinc, tin and cadmium have been used. The plating of aluminum is much more critical than plating a more noble metal such as copper. In addition, a preplate, usually of copper or brass, must be applied, thus introducing numerous metals and further possibilities for galvanic corrosion.

To be effective in reducing galvanic corrosion between the copper conductor and the aluminum connector, the plated metal must be closer in the Electrolytic Series to copper than is aluminum. It must therefore, be cathodic to aluminum. Since porosity and minor scratches are always present, galvanic action can be expected in the presence of moisture, resulting in attack of the aluminum under the plating. Corrosion tests reveal attack in the form of a mottled appearance and flaking of the plating.

In addition, the presence of plated metal can cause galvanic attack of the aluminum conductor, thus reducing the protection offered to this conductor in an aluminum connector.

**Cleaning and the Use of Compound:** It should be emphasized that when aluminum connectors or conductors are involved, proper cleaning of the aluminum and the use of a good connector compound, such as BURNDY PENETROX™ A, are essential for trouble-free service. BURNDY, as well as other manufacturers, provide the contact grooves with a coating to make it unnecessary to clean the connectors, but in all cases the aluminum conductor should be

**Introduction - Basic Electrical Connection Principles: (continued)**

cleaned by means such as scratch brushing, and immediately coated with the connector compound.

To simplify the application of the compound, and to assure its use, almost all BURNDY aluminum connectors, except the large clamp type substation connectors, are supplied factory filled with PENETROX™ compound. For the tubular compression connectors, the tubular barrels are sufficiently filled with PENETROX™ and capped. For other types, the contact grooves are filled with PENETROX™ and enclosed in plastic packaging in a process called 'stripsealing'.

**Clamp vs. Compression:** In general, a compression connection can be expected to be more corrosion resistant than a clamp connection. The high pressures applied to a compression connector more effectively seal the contact against the penetration of moisture. The tubular sleeve of a compression connector has no side openings such as exist in clamp connectors between the clamping members. On the other hand, the clamp connector can be made more corrosion resistant if the conductor grooves conform more closely with the conductor contour. Thus a clamp connector made to accommodate a wide range of conductor sizes cannot be expected to be as corrosion resistant as one designed for one specific conductor size. Nevertheless, the differences in effectiveness of various designs can be minimized if a good contact compound is used.

**HARDWARE DATA**

**Recommended Tightening Torque**

The hardware used in connectors must be compatible with the connector material, have high mechanical strength and be corrosion resistant.

Copper alloy connectors have hardware made of DURIMUM™, which is the BURNDY trade name for silicon bronze alloy ASTM B99. This material was first introduced by BURNDY in 1927 for use in outdoor construction and today is the standard throughout the industry.

Aluminum connectors generally have aluminum alloy hardware. The bolts are 2024T4 and anodized to resist corrosion. The nuts are 6061T6, which is resistant to corrosion and does not require anodizing. Bolts are lubricated to eliminate galling and to provide consistent clamping forces.

The size material for clamping hardware are selected to provide the required force when tightened to the recommended torque. To reduce or greatly exceed the recommended torque can adversely affect the performance of the connector.

Steel Hardware

**HARDWARE DATA (continued)**

**Recommended Clamping on Bolted Connectors:**

When installing a bolted connector, an appropriate sequence needs to be followed.

**INSTALLATION INSTRUCTIONS:**

1. Nuts need to be tightened up to 30% of expected torque.
2. A check needs to be done to ensure the clamping elements are even.

**Even clamping elements**

3. Tightening has to follow a sequence (1-6) as shown below. As a general rule, the torque has to be applied to the nut. For ease of installation most connectors are designed for one wrench installation. A torque wrench is recommended when tightening the nut to ensure the proper torque is applied.

BURNDY offers three sizes of professional grade torque wrenches, catalog number **BTW30150** to be used on connectors requiring 30-150 in-lbs., the **BTW150750**, designed for 150-750 in-lbs., and the **BTW1575F12**, designed for 15 - 75 ft-lbs. These micro-adjustable "click-type" torque wrenches feature an easy-to-read scale that can be easily matched to the recommended torque of each of our mechanical connector products. Calibration traceable to N.I.S.T.

† For compact-stranded constructions, the number of wires may be reduced as follows:

19-Wire Constructions - 18 Wires Minimum

37-Wire Constructions - 35 Wires Minimum

61-Wire Constructions - 58 Wires Minimum

91-Wire Constructions - 87 Wires Minimum

127-Wire Constructions - 122 Wires Minimum

† The designation "inch" is the approximate diameter in proper fraction of an inch.  
 ‡ The designation AWG is a combination of the number of wires each of the American Wire Gauge size indicated by "No."  
 \* Diameter of circumscribing.  
 \*\* Breaking loads of 7-wire and 19-wire conductors are taken as 90% of the sum of the breaking loads of individual wires; breaking load of 3-wire conductors is taken as 95% of the sum of the breaking loads of the individual wires.

PRESENT INSTALLATION TOOL INDEX

This chart provides a cross-reference between die index numbers marked on BURNDY® COMPRESSION CONNECTORS and the CORRESPONDING DIE SETS used with the various BURNDY® INSTALLATION TOOLS. This is the only way to have a complete connections with the BURNDY® ENGINEERED SYSTEM.

A die index number has been assigned to each required groove configuration. A prefix letter is used to indicate the specific installation tool for which the die has been designed, as shown.

① Cat. No. Y35P3 Adaptor is required to use "Y34PR" type indentors with "U" type nest dies in Y35 and Y750 series.  
 ② Cat. No. PT6515 Adaptor is required to use "U" type dies in Y45 series.

③ Cat. No. PUADP-1 Adaptor is required to use "U" type dies in Y46 series.  
 ④ The MD6-6R2 ratchet tool is required on these sizes. The standard MD6 or MD6R ratchet tools will not work.

⑤ Also pneumatic version Y29NC.

① Cat. No. Y35P3 Adaptor is required to use "Y34PR" type indentors with "U" type nest dies in Y35 and Y750 series.  
 ② Cat. No. PT6515 Adaptor is required to use "U" type dies in Y45 series.

③ Cat. No. PUADP-1 Adaptor is required to use "U" type dies in Y46 series.  
 ④ The MD6-6R2 ratchet tool is required on these sizes. The standard MD6 or MD6R ratchet tools will not work.

⑤ Also pneumatic version Y29NC.

① Cat. No. Y35P3 Adaptor is required to use "Y34PR" type indentors with "U" type nest dies in Y35 and Y750 series.  
 ② Cat. No. PT6515 Adaptor is required to use "U" type dies in Y45 series.

③ Cat. No. PUADP-1 Adaptor is required to use "U" type dies in Y46 series.  
 ④ The MD6-6R2 ratchet tool is required on these sizes. The standard MD6 or MD6R ratchet tools will not work.

## TERMS AND CONDITIONS

1. **Applicability.** Burndy, LLC ("Seller") hereby offers for sale to the buyer named on the face hereof ("Buyer") the products listed on the face hereof (the "Products") on the express condition that Buyer agrees to accept and be bound by the terms and conditions set forth herein. Any provisions contained in any document issued by Buyer are expressly rejected and if these terms and conditions differ from the terms of Buyer's offer, this document shall be construed as a counter offer and shall not be effective as an acceptance of Buyer's document. Buyer's receipt of Products provided hereunder will constitute Buyer's acceptance of these terms and conditions. This is the complete and exclusive statement of the contract between Seller and Buyer with respect to Buyer's purchase of the Products. No waiver, consent, modification, amendment or change of the terms contained herein shall be binding unless in writing and signed by Seller and Buyer. Seller's failure to object to terms contained in any subsequent communication from Buyer will not be a waiver or modification of the terms set forth herein. All orders are subject to acceptance in writing by an authorized representative of Seller.
2. **Prices.** Prices in written quotations issued by Seller are valid for thirty (30) days. All other prices are subject to change at any time, unless otherwise expressly agreed by Seller. Any prices shown in published literature are maintained as a general source of information and are not quotations or offers to sell. Seller reserves the right to make corrections due to typographical, clerical or engineering errors or due to incomplete or inaccurate information from Buyer. Prices for accepted orders may change due to customer order, quantity, material or engineering changes.
3. **Taxes.** Prices do not include any state, local, use or excise taxes, duties or other charges now or hereafter imposed for which Seller may be liable as a result of the sale, use or delivery of the Products ("Taxes"). In the absence of proper evidence of exemption supplied by Buyer to Seller, Buyer will be responsible for any and all such Taxes.
4. **Minimum Order Quantity.** Orders are subject to standard package sizes.
5. **Payment Terms.** Subject to credit approval, unless otherwise specified on the quotation or invoice, payment terms shall be Net 30 days from the date of invoice. All payment shall be in US dollars. If Buyer fails to pay any amounts when due, Buyer agrees to pay Seller interest thereon at a periodic rate of the greater of the maximum percentage allowed by law or 1% per month. Buyer will also be responsible for all costs and expenses, including attorneys' fees incurred by Seller in collecting any overdue amounts or otherwise enforcing Seller's rights hereunder.
6. **Shipping and Delivery.** Estimated delivery dates are provided in the quotation or acknowledgment, and shall not represent a fixed or guaranteed ship date. Unless otherwise agreed to by Seller, Seller reserves the right to ship at its convenience and/or ship and invoice for partial orders. All deliveries are FCA Seller's location (INCOTERMS 2010); freight may be pre-paid and added to invoice. Seller may stop delivery of Products in transit and/or withhold shipments in whole or in part if Buyer fails to make any payment to Seller when due or otherwise fails to perform under these terms. In the event of a delay due to any cause beyond Seller's reasonable control, Seller reserves the right to terminate the order or to reschedule the shipment within a reasonable period of time, and Seller shall not be responsible for any damages resulting from delay. If delivery is delayed due to any cause within Buyer's control, Seller may place the Products in storage at Buyer's risk and expense and for Buyer's account.
7. **Title and Risk of Loss.** Title and risk of loss to the Products shall pass to Buyer upon delivery by Seller to the carrier.
8. **Cancellations. Returns.** Orders may not be cancelled or modified once accepted by Seller unless agreed upon in writing by Seller. Any cancellation or return of Products shall be subject to Seller's return policies, and may be subject to Seller's cancellation or restocking fee. Seller's restocking policy is available upon request. Non-stock or special order items are non-cancellable and non-returnable. No returns shall be permitted without a Return Material Authorization (RMA).
9. **Packaging. Allocation.** All Products are packaged in accordance with Seller's standard packaging, unless otherwise agreed upon by the parties. Additional or modified packaging requirements may result in an increase in price. In the event of inability for any reason to supply the total demand for the materials or Products specified, Seller may allocate its available supply among any or all purchasers, at its discretion and without liability for failure of performance that may result therefrom.
10. **Tooling.** Any tooling required for an initial order will be billed to Buyer. Any Non-Recurring Engineering (NRE) charges invoiced by Seller shall not be deemed to grant any right, title or interest in any tools, dies, jigs, fixtures and items of like nature, or in any design, engineering, trade secret, patent or other proprietary rights embodied in the tooling, upon Buyer's payment of such charges and such items shall at all times be, and remain, the property of Seller.
11. **Warranty.**
  - 11.1 Seller warrants that the Products will perform substantially in accordance with Seller's published specifications (or other applicable specifications as agreed upon in writing by Seller) and will be free from defects in material and workmanship, when subject to normal, proper and intended usage by properly trained personnel, for the following warranty period, which shall begin on the date of shipment by Seller (the "Warranty Period"): (a) Tools: The Warranty Period shall be as specified in the product literature or, if no period is so specified, five (5) years; (b) UL listed Products: the Warranty Period shall be two (2) years; (c) for all other products, the Warranty Period shall be 30 days. (d) For UL Certified Compression Connection (the "Connection"), provided that the Connection is made using (i) a recommended and properly calibrated tool, (ii) a recommended and properly calibrated die set, and (iii) a compression connector manufactured by Seller and specified in the UL listing for such connection, and Buyer otherwise complies with the requirements set forth in the applicable UL listing, Seller warrants that the Connection will conform with the UL listing for a period of 5 years from the date the Connection is made, provided such Connection is made within one year of the purchase of the connector used in the Connection.
  - 11.2 **Remedies.** During the Warranty Period, Seller agrees to repair or replace Products in order to ensure that the Products perform in accordance with the applicable specifications provided that Buyer shall (a) promptly notify Seller in writing upon the discovery of any defect, which notice shall include the product model and serial number (if applicable) and details of the warranty claim; and (b) after Seller's review, Seller will provide Buyer with a RMA. Buyer may return the defective Products to Seller with all costs prepaid by Buyer. In case of a defect in the Connection during the Warranty Period, Seller shall replace the connector used to make such connection. All replaced parts shall become the property of Seller. Shipment to Buyer of repaired or replacement Products shall be made in accordance with the Delivery provisions herein. Any consumables, including but not limited to, bulbs and batteries, are excluded from warranty. Seller will have no obligation to make repairs, replacements or corrections which are defective as a result of: (i) **normal wear and tear**, (ii) **Buyer's misuse, fault or negligence**, (iii) **use of the Products in a manner for which they were not designed**, or (iv) **improper storage, maintenance, installation and handling of the Products, and in the case of the Connection, Buyer's failure to use Seller's Tool, connector and die set Products, as specified in 11.1 (d) above, and in accordance with the requirements of the UL listing for such Connection.** If Seller determines that Products for which Buyer has requested warranty services are not covered by the warranty hereunder, Buyer shall pay or reimburse Seller for all costs of investigating and responding to such request at Seller's then prevailing time and materials rates. If Seller provides repair services or replacement parts that are not covered by this warranty, Buyer shall pay Seller therefor at Seller's then prevailing time and materials rates. THE OBLIGATIONS CREATED BY THIS WARRANTY TO REPAIR OR REPLACE A DEFECTIVE PRODUCT SHALL BE THE SOLE REMEDY OF BUYER IN THE EVENT OF A DEFECTIVE PRODUCT OR SERVICE. EXCEPT AS EXPRESSLY PROVIDED HEREIN, SELLER DISCLAIMS ALL OTHER WARRANTIES, WHETHER EXPRESS OR IMPLIED, ORAL OR WRITTEN, WITH RESPECT TO THE PRODUCTS, INCLUDING WITHOUT LIMITATION ALL IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE. In no event will Seller's aggregate liability under warranty exceed the price paid by Buyer for the defective Product. Products supplied by Seller that are obtained by Seller from a third party supplier are not warranted by Seller. At its discretion and to the extent Seller is permitted, Seller agrees to assign to Buyer any warranty rights in such Product that Seller may have from the third party supplier. The Warranty Period for replacement Products shall be the remainder of the original Warranty Period.

## TERMS AND CONDITIONS (Continued)

**12. Intellectual Property.** Seller's specifications and design of the Products and any developments, improvements and intellectual property created under this order, whether made solely by a party or jointly by Buyer and Seller ("Intellectual Property") shall be owned by Seller. Buyer is not granted any interest, right or license with respect to any such intellectual property, except to the extent required to use the Products for the purpose for which it is specifically provided to Buyer in accordance with these terms and conditions.

**13. Software.** With respect to any software incorporated in or forming a part of the Products hereunder ("Software"), Seller and Buyer intend and agree that such Software is being licensed and not sold. Notwithstanding anything to the contrary contained herein, Seller or its licensor, as the case may be, retains all rights and interest in Software. Seller hereby grants to Buyer a royalty-free, non-exclusive, nontransferable license, without power to sublicense, to use Software provided hereunder solely in connection with the Products and to use the related documentation solely for Buyer's own internal business purposes. This license will terminate when Buyer's lawful possession of the Products ceases, unless earlier terminated as provided herein. Buyer agrees to not sell, transfer, license, loan or otherwise make available in any form to Software to any third party. Buyer may not disassemble, decompile or reverse engineer, copy, modify, enhance or otherwise change or supplement the Software without Seller's prior written consent. Seller may terminate this license if Buyer fails to comply with any term or condition herein.

**14. Indemnity. By Seller.** Seller agrees to indemnify, defend and save Buyer from and against any and all damages, liabilities, actions, causes of action, suits, claims, demands, losses, costs and expenses (including without limitation reasonable attorney's fees) ("Claims") for (i) personal injury or death or damage to real property to the extent caused by the negligence or willful misconduct of Seller, its employees, agents or representatives in connection with the performance of services at Buyer's premises and (ii) claims that a Product infringes any valid United States patent, copyright or trade secret. Notwithstanding the foregoing, Seller shall have no liability the extent any such Claims are caused by either (i) the negligence or willful misconduct of Buyer or third party, (ii) use of a Product in combination with equipment or software not supplied by Seller where the Product would not itself be infringing, (iv) Seller's compliance with Buyer's designs, specifications or instructions, (v) use of the Product in an application or environment for which it was not designed or (vi) service, installation or modification of any Product except by Seller. Buyer shall provide Seller prompt written notice of any Claims and Seller shall have the right to assume exclusive control of the defense of such claim or, at the option of the Seller, to settle the same. Buyer agrees to cooperate reasonably with Seller in connection with the performance by Seller of its obligations in this Section. Notwithstanding the above, Seller's infringement related indemnification obligations shall be extinguished and relieved if Seller, at its discretion and at its own expense (a) procures for Buyer the right, at no additional expense to Buyer, to continue using the Product; (b) replaces or modifies the Product so that it becomes non-infringing, provided the modification or replacement does not adversely affect the specifications of the Product or (c) if neither of the preceding is reasonably practicable, refund the purchase price for the Product. THE FOREGOING INDEMNIFICATION PROVISION STATES SELLER'S ENTIRE LIABILITY TO BUYER FOR THE CLAIMS DESCRIBED HEREIN. **By Buyer.** Buyer shall indemnify, defend and hold harmless Seller from and against any and all Claims to the extent arising from or in connection with (i) the negligence or willful misconduct of Buyer; (ii) use of a Product in combination with equipment or software not supplied by Seller where the Product itself would not be infringing; (iii) Seller's compliance with designs, specifications or instructions supplied to Seller by Buyer; (iv) use of a Product in an application or environment for which it was not designed; or (v) modifications of a Product by anyone other than Seller.

**15. Limitation of Liability.** Notwithstanding anything to the contrary contained herein, Seller's aggregate liability for any claim of any kind shall not exceed the price paid by Buyer for the products giving rise to such claim. IN NO EVENT SHALL SELLER BE LIABLE FOR SPECIAL, INCIDENTAL, LIQUIDATED, OR CONSEQUENTIAL DAMAGES HOWSOEVER ARISING OUT OF SELLER'S PERFORMANCE (OR NON-PERFORMANCE) OF THE CONTRACT AND NOTWITHSTANDING WHETHER BUYER MAY HAVE BEEN ADVISED OR IS ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

**16. Compliance with Laws. Export Laws.** Seller agrees to observe and comply with all applicable federal, state and local laws, rules, regulations, including but not limited to all applicable laws, regulations, laws, treaties, and agreements relating to the export, re-export, and import of any Product or part of Product. Buyer shall not, without first obtaining any required license to do so from the appropriate U.S. government agency; (i) export or re-export any Product or part of a Product, or (ii) export, re-export, distribute or supply any Product or part of a Product to any restricted or embargoed country or to a person or entity whose privilege to participate in exports has been denied or restricted by the U.S. government. At Seller's request, Buyer will provide information on the end user and end use of any Product or part thereof exported or to be exported by Buyer. Buyer shall cooperate fully with Seller in any audit or inspection related to applicable export or import control laws or regulations, and shall indemnify and hold Seller harmless from, or in connection with, any violation of this section by Buyer or its employees, consultants, or agents.

**17. Miscellaneous.** (a) Any legal claim shall be controlled under the laws of the state of the Seller's primary place of business. Seller and Buyer agree to accept and be bound by the exclusive jurisdiction of the federal and state courts thereof. The application to this Agreement of the U.N. Convention on Contracts for the International Sale of Goods is hereby expressly excluded. (b) In the event that any one or more provisions contained in these terms shall be held by a court of competent jurisdiction to be invalid, illegal or unenforceable in any respect, the validity, legality and enforceability of the remaining provisions contained herein shall remain in full force and effect. (c) Seller's failure to enforce or waiver of a breach of any provision contained herein shall not constitute a waiver of any other breach or of such provision. (d) Any notice or communication required or permitted hereunder shall be in writing and shall be deemed received when personally delivered or three (3) business days after being sent by certified mail, postage prepaid, to a party at the address specified herein or at such other address as either party may from time to time designate to the other. (e) Buyer may not assign or delegate any rights or obligations without Seller's prior written consent. (f) Seller reserves the right to place a Lien and notifications of liens should Seller not be paid for equipment provided hereunder. (g) Buyer agrees that all pricing, discounts, data, design and technical information, operations/maintenance manuals, testing procedures, drawings, schematics and any other information regarding the Products or Seller's processes provided by Seller to Buyer are the confidential and proprietary information of Seller. Buyer agrees to (a) keep such information confidential and not disclose such information to any third party; and (b) use such information solely for Buyer's internal purposes and in connection with the Products supplied hereunder. Nothing herein shall restrict the use of information available to the general public.
