TO OUR DISTRIBUTOR

**OFFERING YOU
NEW PRODUCTS
FOR 2014-2015**

The Metallics Difference

Here at Metallics, we realize our distributors' needs for competitive products at competitive prices. We also believe that the reason to take on the Metallics line is to maximize profits. We understand that you, the distributor, are in this business to make a profit. Metallics works closely with distributors in order to grow their bottom-line profitability and increase revenues.

Our company constantly employs more efficient and streamlined methods of doing business. These techniques allow us to operate at peak efficiency in order to pass on our savings to you. In fact, our distributors named the Metallics line the highest Gross Margin Rate of Return over all other lines. In addition to a higher profit margin, we offer:

- Manufacturing
- Live Customer Support
- Exclusive "Hardbody" Packaging
- Same Day Shipping
- Highest Fill Rate
- Distributor Price Catalogue on CD
- Highest Ratio of American-made to Foreign-made Product
- Locations in Bristol, Connecticut and Mancos, Colorado

With Metallics, you can be sure that a strong relationship will be built not only with us, but between you and the customers you serve. Our knowledgeable sales and support staff is always available to answer your questions.

We Lead, They Follow

In the highly competitive world of fasteners and related supplies, companies need to differentiate themselves. Metallics is not just a supplier of fasteners and related supplies. We are also one of the few suppliers that design and manufacture fastener components to your specifications. In coordination with our affiliate, Avanti Screw, we are able to design and produce new and innovative fasteners in our Bristol, Connecticut, plant. We are the gold standard in fasteners!

At Metallics, we are always looking toward the future to provide innovative and profitable solutions for our distributors. Since we sell solely to distributors, you can be confident you will not see the products in this catalogue sold at any of America's "Depot-Marts" or sold directly to your contractors. With new products such as Tri-Drive, and QuaDrive Screws, and Hardbody Packaging, you can offer your customers the most unique and profitable products available. This all leads to maximum profitability for you. This new catalogue will reflect many new exciting fasteners available for 2014 and 2015.

YOU DESERVE THE PERSONAL TOUCH

Always speak to live people!

In a world ruled by voice mail, answering machines, emails and computerized operators, it can sometimes be difficult to reach a live representative. When you call Metallics, you can be assured you will always be able to speak to a person, not a machine. And with two locations in Bristol, Connecticut, and Mancos, Colorado, there is always someone available. When time matters, voice mail and answering services will only slow you down. We are proud to have an extremely knowledgeable and readily available team to aid you with answers to your fastener questions. All this because YOU deserve the personal touch.

With this new catalogue, Metallics has made it easier for you to find products. We understand the importance of removing the hassle from catalogue searching; this is the reason for our new user-friendly format. Color-coded reference tabs make it a snap to stay organized and to quickly find the section you need. The time saved searching will mean more efficiency in securing new projects. After all, time is money.

None of our competitors selling to the Distribution trade can claim they manufacture screws. We can and do, right in Bristol, CT.

There is no doubt: We know the American fastener market and are ahead of our competitors. Avanti Screw, Inc., our fastener manufacturing facility in Bristol, CT, guarantees that we are the only American fastener company that makes a portion of its product sold through distribution.

We know the fastener market and have been serving it since 1959. Our Avanti Screw, Inc. manufacturing facilities guarantees that we are different. We are able to fill the need for unique fasteners for today's industry.

Terms

1% 10th net prox., Minimum order \$25.00

Prepaid shipments:

\$650.00 Continental U.S.

\$1,100.00 Alaska and Hawaii

see page 178 for Co-Labeling and Reduced Price on Large Quantity Orders of Anchors.

Remember, Metallics has an east and west warehouse and a manufacturing facility.

Same Day Shipments = 98.3% Fill Rate = 98.1%

We get product to you, easier and faster!

This symbol denotes a product made by a quality American producer. In the case of fasteners, many are produced at Avanti Screw, Inc., a Metallica affiliate.

All salespeople act as if they are selling the same commodity as Metallica. We sell something better: value, service, trust, consistency, and profit building for you and your customer.

We believe Metallica has the largest ratio of American-made to foreign-produced product of any other American fastener company.

It appears that our competitors in the past, and today, have failed to copy our lead in denoting a place of origin in their catalogues. We need to ask, "Why?"

NAED Reference Number: 39720
 Electronic Data Interchange (EDI) at one central location.

TO OUR ELECTRICAL DISTRIBUTORS: WE ASK YOU TO UNDERSTAND OUR POSITION.

Since 1968, Metallics has not included yearly stock balancing of distributor's inventory as part of our catalogue fastener program. We have chosen instead to provide the lowest prices in America, superior packaging, same-day shipment, lower prepaids, best fastener fill rate in America, and logistical support in the way of promotions, advertising and sales representative training. At this time we do not anticipate offering stock balancing.

New Customer Buyout of Competitor Inventory: Over the years, many fastener suppliers have gone in and purchased competitor inventories from the electrical distributor, then replaced that inventory with their own products. Metallics has never had this as a catalogue option, and we do not anticipate such a program.

An Honest Mistake or Customer Cancellation: We do offer to take back any single item resulting from a distributor's order entry error. We will also consider taking back an item cancelled by a customer of our electrical distributors. Call to inquire about our RMA System.

AMERICA'S SOURCE FOR PREMIER AND INNOVATIVE FASTENERS & ANCHORS

ONLY METALLICS!

A Modern Up to Date Roll Threading Machine at our Affiliate, Avanti Screw.

Metallics and Avanti Screw, Inc., prime American manufacturers of fastener products, have always worked to present the latest in fastener technology to our distributors and their contractors/users.

Hex Washer Head fasteners have historically only offered three drives-the hex, phillips and the slot. In 1999, we introduced "The QuaDrive" square, hex, slotted and phillips, in fourteen of the most popular sizes of sheet metal screws.

CONSTRUCTION FASTENERS

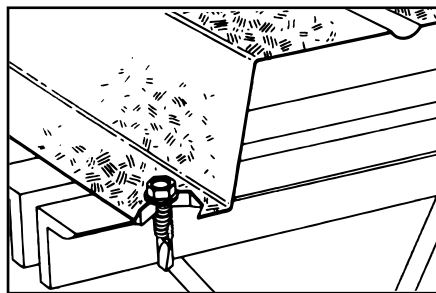

HEAVY DUTY DRILL SCREWS

HEAVY DUTY STEEL-TO-STEEL APPLICATION

Self-drilling fasteners for structural steel or bar joists up to 1/2" thick

Milled drill point • Excellent Corrosion Resistant Finish

- Unique double fluted point dramatically improves drilling performance over conventional Drill screws.
- Attaches items directly to structural steel or bar joist.
- Excellent corrosion resistant finish.
- Engineered for faster drilling with less effort.
- The only fastener recommended for hanging jack chain without pre-drilling.
- We recommend using JW113 Fender Washer 1/4 x 1 with heavy duty drill screw to ensure proper grip on jack chain.

CONSTRUCTION FASTENERS

WOOD TO METAL DRILL SCREWS

FAST, EFFICIENT ATTACHMENT OF WOOD TO STEEL FRAMING WITH NO PRE-DRILLING.
MUST BE USED IN 16 GAUGE STEEL OR GREATER FOR ENGAGEMENT.

- Drill point has precise cutting edges to improve drill performance with less effort.
- Special winged fasteners ream a hole in wood preventing thread engagement during drilling.
- Wafer head design has a large bearing surface ideal for plywood.
- Flat head design countersinks and seats flush in wood.
- Excellent corrosion resistant finish.

AMERICA'S SOURCE FOR PREMIER AND INNOVATIVE FASTENERS & ANCHORS

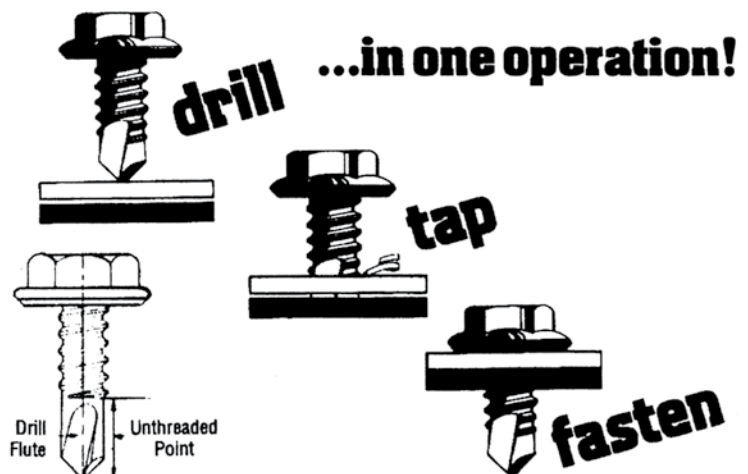

HELPFUL HINTS FROM METALLICS

Selecting the proper fastener for each application is important in obtaining maximum performance.

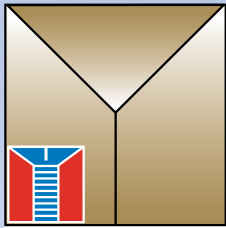

Point Length — Length of the unthreaded point — must be greater than total thickness of material to be drilled. In jobs involving more than total thickness of material, calculation of total thickness must also include any spaces between thicknesses.

Driving Technique — Keep the driving tool perpendicular to working surface.

Drivers — Fasteners should be installed with 2500 RPM high-torque drivers equipped with a positive clutch. For wood to steel applications, drivers operating at 1700-2000 RPM should be used.

Our persistence and determination to ship the same day and maintain the highest fill rate in America among fastener suppliers to the distributor market is not by accident. In all our management offices, this quotation is displayed:

*Nothing in the world can take the place of persistence.
Talent will not; nothing is more common than unsuccessful men with talent.
Genius will not; unrewarded genius is almost a proverb.
Education will not; the world is full of educated derelicts.
Persistence and determination alone are omnipotent.*

- Calvin Coolidge

The secret is out: "Our motivation starts at the top."

MANUFACTURING CAPABILITIES

Diameter range #2 thru 5/16" / 1.5mm thru 8mm • Length range 1/8" thru 3" / 3.5mm thru 75mm
Materials: Steel, Brass, Stainless, Aluminum, Bronze.

NEED SCREWS...
Let Us Make Them For You!

A METALLICS AFFILIATE

P.O. Box 1600 • 231 Cross Street
Bristol, CT 06011-1600
Tel: 800-984-8945 • Fax: 800-984-8946

CAPABILITIES LIST

PLANT SIZE: 100,000 SQUARE FEET
LOCATION: Bristol, Connecticut
EQUIPMENT: 27 Hi-Speed Cold Headers
8 Burr-Free Screw Slotters
3 Shank Slotters
2 Pointers
14 High Speed Thread Rollers

ADDITIONAL PLANT INFO: Modern shipping facility utilizing digital scale counting machines. In-house packaging facilities - boxing, sorting, baggings. All material boxed, palletized & labeled with your needs in mind for domestic or export shipping.

SECONDARY WORK: All plating & heat treating is done on the outside and certified for your guarantee.

INFORMATION SYSTEMS: Our facility has new and upgraded Technology to meet your customers specific requirements.

MADE IN USA

SELF-PIERCING DRYWALL WAFER HEAD SCREWS FINE THREAD

PHILLIPS WAFER HEAD/ZINC FINISH
FOR USE IN UP TO "20 GAUGE" STEEL STUD

Ideal for light-duty steel and aluminum, metal-to-metal application. Large diameter head provides greater holding surface.

MASTER PLUG® SYSTEM

THREADED INSERT-FASTENING, SEALING, CUSHIONING SYSTEM

MADE IN USA

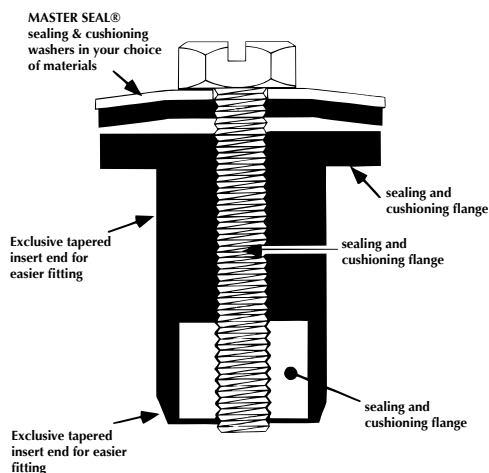

ADAPTABILITY

- Fastens blind holes and closed-end holes
- Cushions and seals similar and non-similar materials
- Absorbs vibration and seals both sides
- Tapered design enhances fastening installation
- Won't crack with ozone and ultraviolet exposure

VERSATILITY

- Removable and re-insertable
- Installs with conventional tools
- Works as a system with MASTER SEAL® washers
- Flange thickness always in proportion to size
- Grip range covers all dimensions

MASTER PLUG® IS A REGISTERED TRADEMARK
MASTER SEAL® IS A REGISTERED TRADEMARK

MANUFACTURING CAPABILITIES

Diameter range #2 thru 5/16" / 1.5mm thru 8mm • Length range 1/8" thru 3" / 3.5mm thru 75mm
Materials: Steel, Brass, Stainless, Aluminum, Bronze.

NEED SCREWS...
Let Us Make Them For You!

A METALLICS AFFILIATE

P.O. Box 1600 • 231 Cross Street
Bristol, CT 06011-1600
Tel: 800-984-8945 • Fax: 800-984-8946

CAPABILITIES LIST

- PLANT SIZE:** 100,000 SQUARE FEET
- LOCATION:** Bristol, Connecticut
- EQUIPMENT:** 27 Hi-Speed Cold Headers
8 Burr-Free Screw Slotters
3 Shank Slotters
2 Pointers
14 High Speed Thread Rollers

ADDITIONAL PLANT INFO: Modern shipping facility utilizing digital scale counting machines. In-house packaging facilities - boxing, sorting, baggings. All material boxed, palletized & labeled with your needs in mind for domestic or export shipping.

SECONDARY WORK: All plating & heat treating is done on the outside and certified for your guarantee.

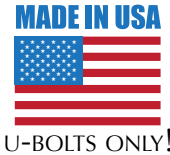

INFORMATION SYSTEMS: Our facility has new and upgraded Technology to meet your customers specific requirements.

Manufactured by Avanti Screw, Inc., A Metallics Affiliate

The QuaDrive

+

+

+

=

Square Drive Hex Slotted Phillips QuaDrive

America's Newest Drive - Designed, Developed and Manufactured by Metallics/Avanti Screw

CraftCoat® 1000 coating is applied after heat-treating to provide anti-corrosion protection. CraftCoat® 1000 coating is a Rohs compliant mechanical zinc coating that offers 1000 hours to 15% red rust corrosion in salt spray testing performed to ASTM B117 specifications.

Metallics offers our Distributor/Contractor users an alternative to the blue color of standard concrete screws. Silver color is cosmetically appealing when used with zinc plated or stainless steel brackets, electrical fixtures or conduit.

CraftCoat® is a registered trademark of Donham Craft Inc.

THE METALLICS QUADRIVE CONCRETE SCREW IT'S A RE-DESIGNED TAPPING SCREW AND ANCHORING SYSTEM WITH A CRAFTCOAT® 1000 COATING

- ← Large fillet under head to fit $3/16$ and $1/4$ " holes provides greater driving strength
- ← Fluted, interrupted threads aid tapping into masonry products
- ← Twin lead threads for faster application
- ← Silver color to match conduit, strap and concrete

We will be glad to send a sample bag of 10 pieces to our Distributors for their customer trials. Please specify size

MADE IN USA

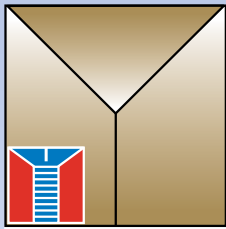

ONLY METALLICS

THE FIRST IN THE WORLD

QUADRIVE HEAD can be driven or extracted with hex, slotted, Phillips or square recess drivers.

Metallics

MASTER Anchor™

The World's Strongest Fastener™

[CONTRACTOR APPROVED]

MASTER Anchor™:

- **NEVER Loosens!**
- Installs in ALL Hollow Walls - in just minutes!
- **Rated up to 300 lbs. in drywall.**
- Handles vector forces 360°.
- Objects can be easily removed or replaced.

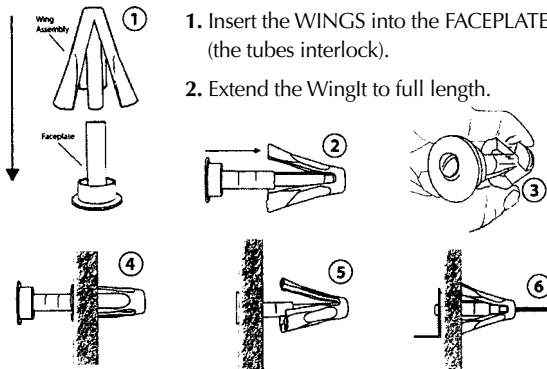

3/4" Carbide Tipped Apache 200™ Drill Bit:

- Industrial Carbide Rated at 200 Holes in Ceramic Wall Tile.
- Designed for Ceramic, Marble and Plaster.
- **Guaranteed to NEVER Walk.**
- Fits standard and cordless drills.

Install Instructions:

Surface Preparation - Determine where to install - Drill 3/4" hole using the APACHE200. The standard MASTER Anchor is used in wall substrates up to 1.3" thick.

DRILL IT. INSTALL IT. MOUNT IT.

Fire Retardant, Structural Plastic & S/S Construction

3. Compress and insert the WINGS into the holes.
4. WINGS should be FLUSH with the wall surface.
5. Pop WingIt through the hole by pushing on the Faceplate.
6. Using the enclosed 3.5" Stainless Steel Screw, attach the object to the WingIt.

NOTE: For individual mounting points where the object will be subject to considerable torque (rotational forces) - use at least TWO MASTER Anchors.

NOTE: Strength and stability are greatly affected by projection off the wall surface.

WingIts are designed to be used in vertical walls only - **DO NOT USE IN CEILINGS!**

LCS LARGE DIAMETER CONCRETE SCREW ANCHOR Self-Threading Anchor

City of Los Angeles #RR25741 #RR25560 (CMU)
Florida FL11506.7
Factory Mutual 3017082

High strength screw anchor for concrete and masonry. Designed for optimum performance in both cracked concrete and uncracked concrete under both static and seismic load conditions.

Fast Installation

- Just drill with standard ANSI bit to proper depth
- Installs with 50% less torque

Finished hex washer head

- Length identification on head
- Serrated washer

Close edge/spacing distance

Less spacing and edge distance required.

Saves Time

Installs in less than half the time of wedge or adhesive anchors.

Another NEW exciting solution from Metallics! Tired of searching for the right large diameter anchor... Here it is!

TIE WIRE ACOUSTICAL TOGGLE BOLTS

Includes: (1) Tie Wire 1/4-20 toggle bolt
 (1) 1/4-20 nut
 (1) 1/4 washer
 (1) 1/4 toggle wing

Tie wire acoustical toggle bolts are primarily for overhead applications. The winged end is inserted through the drywall, ceiling tile, etc., and expands behind that medium while the 1/4" x 1-1/4" fender washer and hex nut act to secure the anchor on the exterior of the hole.

Cobra TripleGrip™ Multi-Purpose Anchor

**[CONTRACTOR
APPROVED]**

Requires: Drill and #2 Phillips

- Two claws hold the anchor stationary while inserting the screw.
- Two powerful locking wings deploy as you screw, for strength and unparallel vibration resistance.
- The tip of the core expands for additional holding power.
- Works in 3/8", 1/2" and 5/8" Drywall; Brick; Concrete and Plaster.

Toggler Snapskru® Kit & Bulk

**[CONTRACTOR
APPROVED]**

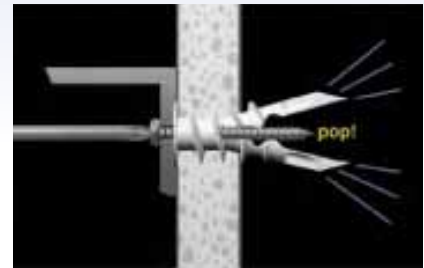

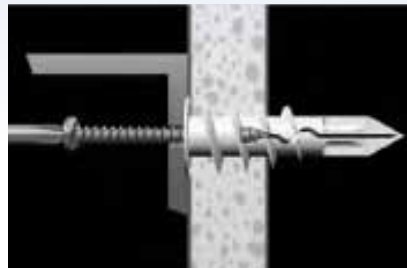

Self-Drilling Drywall Anchors

Another **NEW** exciting solution from Metallics! Tired of searching for the right Anchor? **Here it is!** Toggler Snapskru®...

The Strongest, easiest-to-use self-drilling drywall anchor—

INSTALLATION INSTRUCTIONS: Tools Needed

Screw gun with #2 Phillips bit (or #2 Phillips screwdriver, or electric drill with clutch mechanism & #2 bit)

Press tip of Snapskru anchor into drywall using #2 Phillips screwdriver or screw gun. Drive anchor clockwise into drywall until anchor stops flush with the outer wall surface. *TIP: To keep anchor in precise position during installation (critical for aligning several anchors), push tip of screwdriver into drywall to mark insertion point.*

Screw for *MINI* anchor:
#6 through #8 (#6 preferred).
[3.5-4.5mm, 3.5mm preferred]

Screw for *REGULAR* anchor:
#6 through #10 (#8 preferred).
[3.5-4.5mm, 4mm preferred]

Tighten screw flush with item.

The screw pops open the anchor, looking it on the wall and holding the gypsum board in compression. This reinforces the wall, increasing its holding power significantly.

Screw Length = Thickness of item being installed plus 1-1/4".

Metallics

Toggler Alligator[®] Solid Wall Anchor Kit

**[CONTRACTOR
APPROVED]**

- Alligator[®] solid-wall anchors can be used in most any material, including: Concrete, Wood, Plaster, Aerated Concrete, Block, Masonry, Stone, Flakeboard, Cinder Block, Ceramic Tile, Stucco, and Drywall.
- Alligator[®] solid-wall anchors are designed to support heavy loads. (Even under vibration!)

The Alligator anchor is the only anchor that extrudes the entire length of the screw. The screw extrudes and compresses all the plastic into the wall of the hole under tremendous pressure. The plastic molds and conforms exactly to the surface of the hole (including all the hole's imperfections). All forces supported by the screw are transmitted around the anchor to the wall of the hole. This provides greater holding power by distributing the force over the maximum area possible.

AMERICA'S SOURCE FOR PREMIER AND INNOVATIVE FASTENERS & ANCHORS

A Modern Up to Date
Roll Threading Machine
at our Affiliate,
Avanti Screw.

Metallics and Avanti Screw, Inc., prime American manufacturers of fastener products, have always worked to present the latest in fastener technology to our distributors and their contractors/users.

Hex Washer Head fasteners have historically only offered three drives- the hex, phillips and the slot. In 1999, we introduced "The QuaDrive" square, hex, slotted and phillips, in fourteen of the most popular sizes of sheet metal screws.

DOUBLE EXPANSION ANCHOR

ZINC CHROMATE

The Double Expansion Anchor is manufactured of rustproof zinc alloy and is used with machine screws or machine bolts. These Anchors work well in soft masonry, as it sets, the two opposing wedges pull towards each other, expanding the full length of the anchor body.

Sleeve Anchors hold more because:

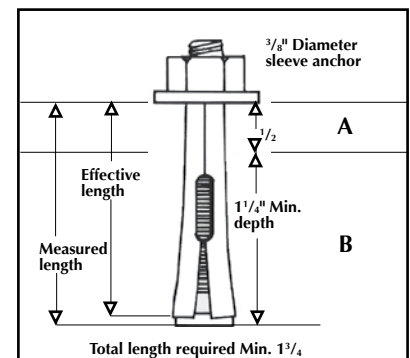

Sleeve anchors do not depend on bottom of hole to expand the anchor

Sleeve anchors work under a true expansion principle, whereby the tightening of the nut forces the expansion of an outer sleeve over a tapered portion of the bolt. The sleeve also becomes a factor in a shear load application providing increased strength in addition to the anchor's bolt.

SELECTING THE PROPER LENGTH SLEEVE ANCHOR

The selection of the proper length of sleeve anchor depends upon the thickness of the material to be fastened and the minimum depth of anchor required in masonry for maximum holding power. Add the thickness of the material (A) and the recommended depth for the anchor

(B) to determine the correct length of anchor to be used. (B) to determine the correct length of anchor to be used.

ANCHORING DEVICES

(STUD ANCHOR)

WEDGE ANCHORS

STEEL ZINC CHROMATE AND STAINLESS STEEL

A powerful product when strength is needed, eliminates drilling oversized holes; exact hole depth not required. This spring stainless steel band, when locked, acts like a fish hook that digs into concrete. Then 3 to 4 turns of the nut expands the wedge.

HAMMER DRIVE WEDGE ANCHOR

ZINC AND STAINLESS STEEL
A superior alternative
to traditional wedge anchors

- Installs six times faster than an ordinary wedge-type anchor.
- Easily installs through pre-drilled holes in plates and footings – no need for templates.
- No special tools required.
- Tensions during setting process.
- Deforms the concrete to set, eliminating creep and loss of pre-load.
- Faster, easier and more consistent installation.

INSTALLATION:

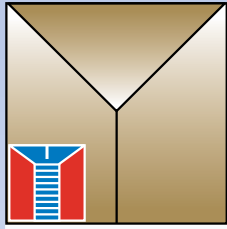

1. Drill hole.
2. Preset nut and washer for desired embedment.
3. Hammer center pin until it is aligned with top of the bolt.
4. Anchor is set.

Safety glasses should be worn for any driving applications. See our line of Safety Glasses, pages 301, 302 and 303

Metallics STRONG-BOLT™ Wedge Anchors

Carbon Steel Wedge Anchors for Cracked and Uncracked Concrete

NEW!

Tested to Meet 2006 IBC

INSTALLATION STEPS

1. Drill hole with carbide tipped masonry drill in base material the same size as the nominal diameter of the anchor.
2. Drill hole to proper embedment depth and blow clean.
3. Assemble anchor with nut and washer flush with top of anchor.
4. Place the anchor in fixture and drive into the hole until washer and nut are tight against fixture.
5. Tighten to the required installation torque.

DO NOT USE AN IMPACT WRENCH TO SET OR TIGHTEN.

Features:

- Tri-Segmented clip is able to adjust independently increasing follow-up expansion should the hole increase in size as a result of a crack.
- 316 stainless clip with superior corrosion resistance.
- Head is stamped with Simpson Strong-Tie® "±" sign and size ID.
- Carbon-steel zinc plated stud with 316 stainless-steel clip.

Codes:

ICC-ES ESR-1771; City of L.A. RR25705; Florida FL 11506.6

Test Criteria:

Strong-Bolt™ Wedge anchor has been tested in accordance with ICC-ES's *Acceptance Criteria for Mechanical Anchors in Concrete Elements (AC193) and ACI 355.2 for the following in cracked and uncracked concrete:*

- Static tension and shear loading in cracked and uncracked concrete
- Seismic and wind loading in cracked and uncracked concrete
- Performance in cracked concrete
- Performance in lightweight concrete over metal deck

TOGGLER HOLLOW WALL ANCHORS

All Toggler hollow-wall anchors install in a small 5/16" (8mm) diameter hole. With reasonable care you can even use your screwdriver to make the hole in drywall.

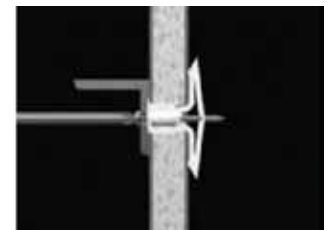

Drywall 5/16" (8mm) hole. Fold anchor in middle.

Insert anchor in hole and tap flush with wall.

Insert key to pop anchor open behind hollow wall (not necessary for thick or solid walls). Do not force or hammer key.

Place item over anchor and tighten until screw is flush with fixture. Then, stop.

Metallics Avanti Screw Manufacturing Facility in Bristol, CT

None of our competitors selling to the Electrical, Plumbing and HVAC Distribution trade can claim they manufacture screws.

There is no doubt: We know the American fastener market and are ahead of our competitors. Our Avanti Screw, Inc., fastener manufacturing facility in Bristol, CT, provides you an American fastener company who makes a portion of its product, sold through electrical, plumbing and HVAC distributors.

Metallics

Rapid-Set[®] Tools

The fastest, easiest and most reliable way to install machine screw lead (caulk-in) anchors

[CONTRACTOR APPROVED]

- For machine screw lead (caulk-in) anchor sizes 1/4" and 3/8".
- Designed for use with power tools.
- Automatically sets anchor just below the surface.
- Maximizes expansion of bottom portion of lead sleeve.

Made in USA

***Note:** Rapid-Set Tools draw the anchor's internal insert up into the anchor's outer sleeve; this installation process eliminates the need to maintain a back bearing surface (required by hammer setting tools).

PART #	UPC #	DESCRIPTION	QTY / PKG	SUG. TRADE LIST / PKG

AMERICA'S SOURCE FOR PREMIER AND INNOVATIVE FASTENERS & ANCHORS

A Modern Up to Date Roll Threading Machine at our Affiliate, Avanti Screw.

MADE IN USA

Metallics and Avanti Screw, Inc., prime American manufacturers of fastener products, have always worked to present the latest in fastener technology to our distributors and their contractors/users.

Hex Washer Head fasteners have historically only offered three drives-the hex, phillips and the slot. In 1999, we introduced "The QuaDrive" square, hex, slotted and phillips, in fourteen of the most popular sizes of screws.

The QuaDrive

Square Drive + Hex + Slotted + Phillips = QuaDrive

America's Newest Drive - Designed, Developed and Manufactured by Metallics/Avanti Screw

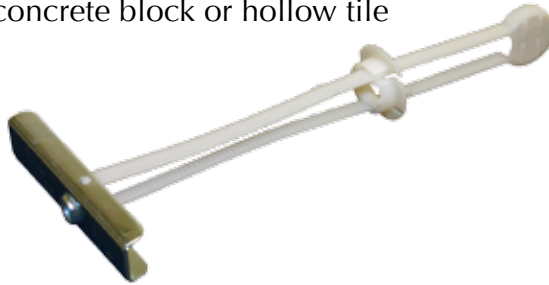

These screws are being manufactured to fill the need of the growing demand in the North American markets.

ANCHORING DEVICES

STRAP-TOGGLE ANCHOR

FOR HEAVY-DUTY APPLICATION
Designed for use in plaster, wallboard,
concrete block or hollow tile

PACKAGED
IN POLY
BAG

1 Drill appropriate sized hole. Hold metal channel flat alongside plastic straps and slide channel through hole.

2 Pull on ring so metal channel rests flush behind wall, as you slide plastic cap along straps with other hand, until flange of cap is flush with wall.

3 Place thumb between plastic straps. Push to side, snapping off straps flush with wall.

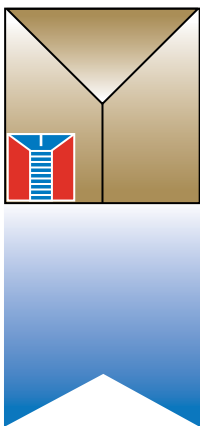

4 Insert bolt through item to be attached and tighten until flush with fixture. Minimum clearance behind wall is 17/8".

Metallics SilverHawk™ Top Beam Clamp

Check up to five results to perform an action.

**[CONTRACTOR
APPROVED]**

Made in USA

SilverHawk Top Beam Clamps are our strongest, lightweight top beam clamps. Made from cold rolled steel with a zinc plated finish, they are rust and corrosion resistant. These super strong SilverHawk clamps exceed UL and FM testing requirements. Zinc finish aesthetically works with plated rods and plated swivel ring hangers.

Tested by industry professionals, SilverHawk installation is quick and easy. Their unique counter balance design makes it easy to “spin” them onto threaded rods so installation goes faster. The open back shape provides visual verification during installation.

- Supports 3/8" rod – metric also available by request.
- 90° angle fits I-beam or T-bar up to 3/4" thick.
- Extruded tap holes meet FM Approvals requirements.
- Accommodates retaining strap usage.
- Competitively priced domestic par.

RIZE Kwik-Loc™ System

NEW!
2014-2015

[CONTRACTOR APPROVED]

A fast and easy way to hang signs, florescent fixtures, speakers, busbars, cable trays, and piping just to name a few.

No Tools Needed and KWIK-LOCS™ are reusable!

Kwik-Locs™

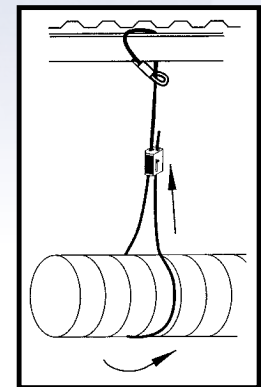

Kwik-Loc™ with 3/32" cable will safely suspend 150 lbs. vertical.

NOTE: Suspension at angles does reduce safe working load.

WEIGHT CHART

Size	Vertical	15°	30°	45°	60°
3/32 in.	150 lbs.	144 lbs.	129 lbs.	105 lbs.	75 lbs.

RIZE Kwik-Loc™ System can be purchased in kits or individually

AMERICA'S SOURCE FOR PREMIER AND INNOVATIVE FASTENERS & ANCHORS

A Modern Up to Date Roll Threading Machine at our Affiliate, Avanti Screw.

Metallics and Avanti Screw, Inc., prime American manufacturers of fastener products, have always worked to present the latest in fastener technology to our distributors and their contractors/users.

Hex Washer Head fasteners have historically only offered three drives—the hex, phillips and the slot. In 1999, we introduced "The QuaDrive" square, hex, slotted and Phillips, in fourteen of the most popular sizes of sheet metal screws.

The QuaDrive

□ + ⬡ + / + + =

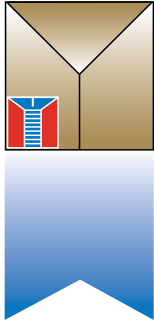

Square Drive Hex Slotted Phillips QuaDrive

America's Newest Drive - Designed, Developed and Manufactured by Metallics/Avanti Screw

These sheet metal screws are being manufactured to fill the need of the growing demand in the North American markets.

Please note: We recommend driving these sheet metal screws with a hex driving tool. The slotted, Phillips, hex and square drives make it convenient for disassembly.

SPECIAL PURPOSE ELECTRICAL FASTENERS

TAMPER-RESIST SPANNER OVAL HEAD SWITCH PLATE SCREW

STAINLESS STEEL

Only authorized persons would normally have a spanner driver to extract this screw

A special wall plate screw for use in public areas like restrooms where water, mist and vapors are present that could corrode ordinary steel screws. Vandalism is discouraged due to the unique nature of the Spanner Driver.*

RECEPTACLE AND WIRING DEVICES SCREW

TRUSS HEAD COMBO (PHILLIPS/SLOTTED)

STEEL MACHINE SCREW - **HARDENED TYPE F ZINC PLATED**

For our product offering we have chosen to give an added benefit (not offered by our competition) by supplying a Type F thread-forming feature. We offer this because electricians in the field often use a screw that will thread a hole in plastic boxes or need it to clean out plaster.

AMERICA'S SOURCE FOR PREMIER AND INNOVATIVE FASTENERS & ANCHORS

A Modern Up to Date Roll Threading Machine at our Affiliate, Avanti Screw.

Metallics and Avanti Screw, Inc., prime American manufacturers of fastener products, have always worked to present the latest in fastener technology to our distributors and their contractors/users.

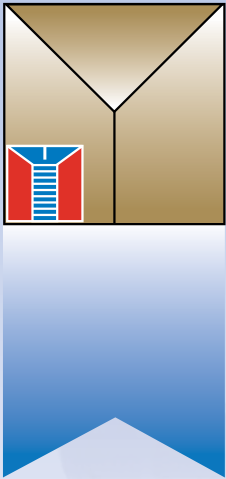

Hex Washer Head fasteners have historically only offered three drives—the hex, phillips and the slot. In 1999, we introduced "The QuaDrive" square, hex, slotted and phillips, in fourteen of the most popular sizes of sheet metal screws.

The QuaDrive

Square Drive + Hex + Slotted + Phillips = QuaDrive

America's Newest Drive - Designed, Developed and Manufactured by Metallics/Avanti Screw

These sheet metal screws are being manufactured to fill the need of the growing demand in the North American markets.

LAGMASTER™ *plus*

Patent Pending

Plug Into...
The electrician's only
multipurpose tool
for hanging...

- + WIRE
- + THREADED ROD
- + SMOOTH ROD
- + JACK CHAIN
- + SCREWS

...with
interchangeable
heads!

LAGMASTER PLUS™

The Lagmaster Plus™ is the electrician's pole tool. The unique plug-in heads make it the most efficient tool of it's kind. It increases safety by keeping your men on the floor. Use it to install ceiling wire, jack chain, threaded rod, smooth rod and overhead screw installation. Power the pole with any 3/8" or 1/2" battery operated or corded drill.

One pole...many applications!

Choose from two (2) different adjustable length models.

- MLMTA Triple 4' (18' ceilings)
- MLMT6 Triple 6' (24' ceilings)

Hang it up. (wire plug)

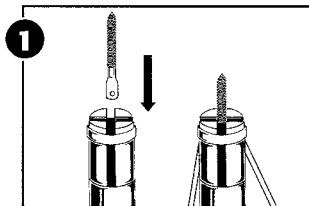

Lagmaster Plus™ wire plug hangs 12 or 9 guage wire. No need for ladders, scaffolding or scissor lifts.

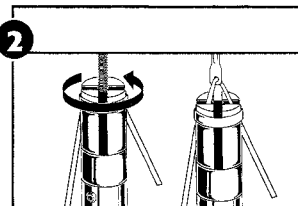

Pre-wrapped wire on eye lags require a special plug (pre-wrapped plug).

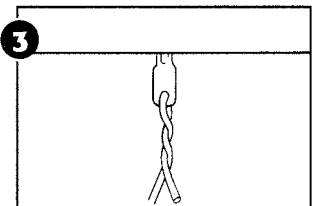

Hang Wire. Move ring into the up position with set screw

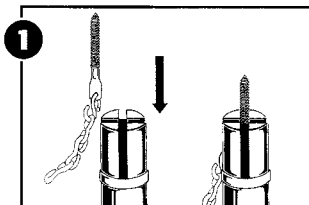

1 Insert the eye lag screw into secured wire plug. Insert the wire through the hole and bend the tails down.

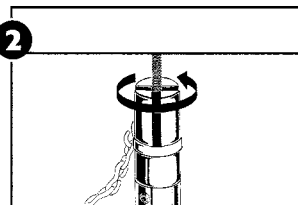

2 Adjust the pole to length and rotate the screw until it is seated. Pull down on the pole so that the wire is caught on the ring.

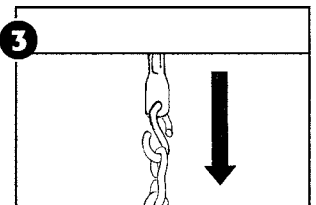

3 Rotate the pole again to twist the wire. Pull the wire through the plug to complete the installation.

1 Secure a #1 1/2 "S" hook to an acoustical eye lag and to the proper size chain for your job. Insert it into the Lagmaster Plus™.

2 Secure the chain in the magazine so it does not whip when rotating the pole. Now rotate the eye lag screw until it is seated.

3 Lower the Lagmaster Plus™.

LAGMASTER PLUS™

DRIVE IT HOME. (socket plugs)

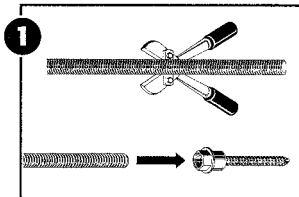

Install pre-cut threaded rod from the floor! Works with 3/8" or 1/4" threaded rod up to 10' long. Gets into tight spaces, vaulted ceilings, above stairwells or through ceiling grid easily.

Lagmaster Plus™ open-end socket plug-in heads work with Sammy Super Screws® and HangerMate® screws. Special twist out feature prevents over torquing and stripout even when installing from the floor.

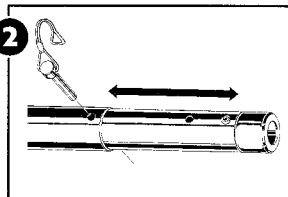

Consult the screw manufacturer's literature for load specs and approvals on the screws.

The Lagmaster Plus™ base is the socket for Hanger-Mate® 3/8" rod screws. The 3/8" socket plug-in works with HangerMate® 1/4" rod screws. The 5/8" socket plug-in works with Sammy Super Screws®.

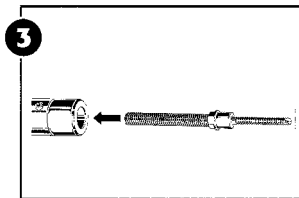

Hang Threaded Rod:

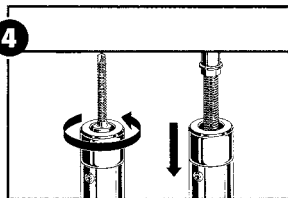

1 Cut threaded rod length and assemble to appropriate fastener.

2 Adjust pole tool to length plug in the proper Lagmaster Plus™ head.

3 Load rod into Lagmaster pole tool. (The Lagmaster adjusting pin has to be 1/8" below the base or the pin may interfere with the rod.)

4 Install screw at proper site and pull down to remove the rod from the pole tool. The rod is now ready to receive hanger bracket.

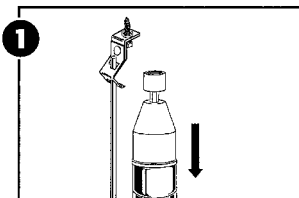

(Patent # 5,154,104)

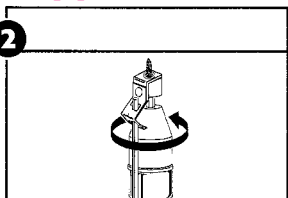

Turn your pole tool into a very long screwdriver. This Lagmaster Plus™ plug works with any 1/4" hex driver.

Install smooth rod with a Minerallac™ or Caddy™ spring clip assembly and screw. The Flash fastener is shown here.

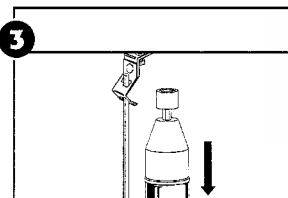

Overhead Screw Applications: (1/4" hex plug)

1 Plug in the Lagmaster Plus™ 1/4" hex head and insert the proper 1/4" driver. Adjust the Lagmaster pole tool to length.

2 Push the smooth rod between the pole and the wire bale on the Lagmaster adjusting pin to keep the rod from whipping while turning in the screw for safety.

3 Turn in the screw cautiously being careful not to over torque or strip the screw. Remove the tool.

LAGMASTER PLUS™

One pole...many applications!
