IT'S JUST A LIGHT SWITCH.
LIKE PARIS IS JUST A CITY.

IT'S TIME FOR A BEAUTIFUL SWITCH

The adorne collection makes life simply beautiful. It starts with stylishly smart switches, dimmers, outlets, and wall plates that merge an awe-inspiring array of styles and finishes with a high tech wow factor that's easy to get used to. You'll soon discover why adorne makes it a delight to hit the lights.

adorne's under-cabinet system seamlessly blends lighting, power, and music into a simple recipe for a state of the art, clutter-free kitchen. See how to keep every modern convenience (like our innovative iPad and iPhone USB chargers) close at hand but ingeniously tucked away. Bluetooth connectivity, hidden power outlets, and a plug and play music system are just a few of the key ingredients for your infinitely flexible kitchen.

Finally, the adorne collection brings Wi-Fi control to music and lighting with its range of home system solutions. It's the kind of innovation that at first seems luxurious, but soon makes you wonder how you ever lived without.

Simply put, the adorne collection brings a new world of convenience — and a stylish finishing touch — to any space.

TURN ON
YOUR
STYLE

The adorne collection offers solutions to match any taste — finishes to fit any personality. Whether you favor the clean lines of modern design, or cozy, cottage-style comfort, or even the classic elegance of a more traditional style, adorne is built to fit.

Take your pick of white or magnesium switches, dimmers, and outlets, and match them with a wide array of wall plate options. You'll find everything from lush natural woods, metals, and leather to a brilliant spectrum of colorful solids. Watch these usually forgotten finishing touches transform your walls from blah to breathtaking, letting the personality of your design shine through.

And how about the kitchen? Striking the right balance between practicality and style is always a challenge—whether traditional, contemporary, cottage, or otherwise. By tucking modular power outlets, lighting options, and music under the cabinets, adorne keeps counters and backsplashes uncluttered and puts the kitchen of your dreams in the most flattering light.

The adorne collection's range of high tech, high style solutions combines accessible, flexible, and smart designs to inspire creativity and enliven your living spaces to a whole new level.

2015 LIGHTING *tomorrow* Award Winner

Tru-Universal - 2015 Lighting for Tomorrow Winner!
Our Tru-Universal technology enables a dimmer to control all load types. Dimmers marked as Tru-Universal, such as the sofTap Dimmer below, automatically adapt to any load or combination of loads attached to them - Incandescent/Halogen, Magnetic Low Voltage, Electronic Low Voltage in Forward or Reverse Phase, CFL/LED bulbs, etc. They eliminate the flickering, early dropout, or "pop-on' deficiencies which can plague other non-adaptive dimmers.

The adorne Tru-Universal dimmer is the ultimate solution to dimming difficult loads. Simply pair it with any fixture and you're done!

SensaSwitch™ + SensaDimmer™

SensaSwitches include passive infrared (PIR) sensor technology, automatically turning lights on or off when you enter or leave a room. The design features an innovative micro-movement that allows you to also manually turn on lights with a soft touch of the finger. SensaSwitches are available in three models:

- Auto-ON/Auto-OFF: Automatically turns lights on when you enter a room and off when you leave. (Occupancy Sensor)
- Manual-ON/Auto-OFF: Allows you to turn lights on when you enter a room and automatically turns them off when you leave. (Vacancy Sensor)
- Manual-ON/Timed-OFF: Allows you to turn lights on when you enter a room and select a time for lights to turn off (options include 10, 20, 30, and 60 minutes). (Timer)

SensaSwitches are perfect for kitchens, bathrooms, garages, and pantries. The SensaDimmer turns lights on when you enter a room and off when you leave, but can be adjusted to become Manual-ON/Auto-OFF if desired. The chart to the right provides an overview of the sensor coverage area.

Minor Motion 20' (6 m)
7.5' (2.2 m)

SensaSwitch™ + SensaDimmer™ Coverage Area

The Occupancy Sensor, Vacancy Sensor, and SensaDimmer each have a maximum coverage range of 180 degrees and a coverage area of 600 sq. ft. The sensor must have a clear and unobstructed view of the coverage area. Objects blocking the sensor's lens may prevent detection thereby causing the light to turn off even though someone is in the area. Windows, glass doors, and other transparent barriers will obstruct the sensor's view and prevent detection.

Wave™

The Wave switch features innovative technology combined with sleek, contemporary design. Simply wave your hand in front of the switch to turn lights on and off.

With its touch-free motion, the Wave is ideal for countertop areas in kitchens and bathrooms. It has a preset sensor distance of approximately 4". However, this can be easily adjusted to sense movement from 1" to 6" in front of switch.

Illumination Accessories

You've never seen a nightlight that hides itself so cleverly, yet responds so elegantly to a simple touch. Or one that can be lifted from its home on your wall to double as a carry-around flashlight. When it comes to brilliant solutions, adorne really shines.

All nightlights include ambient light level sensors. Each features a range of settings, including: Always Off, Low, Medium, and High. If set to Low, Medium, or High, the nightlight's LED will only be visible when the ambient room is dark. To change the selected setting, simply push on the square in the upper right-hand corner of the nightlight.

Accent Nightlight

The Accent Nightlight is a stunning addition to any adorne product and is compatible with any* 1- through 4-Gang wall plate. The device is invisible once installed, but can be activated by placing a finger under the wall plate. This will cause the light to cycle through several light level options, as depicted in the chart below.

Wall Plates

Available in six gang sizes, adorne wall plates provide the perfect complement to adorne switches, dimmers, outlets, and accessories. The collection includes a variety of finishes, from cast metals like Satin Nickel and Oil-Rubbed Bronze to real materials such as Leather and Wood. In addition, the collection includes a full offering of plastic plates in contemporary and classic colors, as well as three innovative Soft Touch finishes.

Each wall plate is packaged with a mounting frame to enable easy installation when paired with a device. All plates are screwless and simply snap onto the included metal frame. See page 64 for more information on the adorne frame system.

All adorne wall plates are UL and ETL-approved. 5- and 6-Gang wall plates are not available in all colors.

A FRESH IDEA FOR COOKING LIGHT

UNDER-CABINET LIGHTING & POWER SYSTEM

A RECIPE FOR KITCHEN MAGIC.

The adorne Under-Cabinet Lighting System brings an array of modular components that swap out so easily, you'll want to reconfigure whenever the mood strikes. From speakers and smart phone docks to lighting and outlets, there's a world of possibilities to choose from with these high-tech, highly convenient building blocks.

UNDER CABINET LIGHTING

USB Module:
A handy outlet to power today's devices.

Tamper-Resistant Outlet Module:
Convenient power snaps in where you need it.

Linear Lights: For a consistent, continuous light.

Tablet Cradle:
Puts apps and the internet where you need them.

Mobile Cradle:
Because recharging doesn't have to look sloppy.

Music System:
Plug and play your favorites—wirelessly.

Modular Tracks: The nerve center that tucks away out of sight. Available in four sizes and two colors.

LOOKING UP A view from below reveals how the adorne collection tucks neatly away, offering tons of convenience while hiding underneath your cabinets.

How to Specify the System

The adorne Under-Cabinet Lighting System is a fully customizable and modular solution for eliminating kitchen clutter. It is compatible with any kitchen layout, such as a galley, L-shaped, or U-shaped, as well as with any home wiring. In order to ensure you have specified the correct products for your system, we recommend you follow the steps outlined below.

1. Planning Your System Layout

First, determine where you want to install the system. Then measure your cabinets to determine the length of Modular Track required:

- Measure each cabinet length at back of cabinet.
- For installations with a corner, allow 3" on each side for Corner Connector.
- When totaling up the length of required Modular Track, be sure to include the length of the desired Control Box or Direct Wire Connector. For a 1-gang box, allow 5". For a 2-gang box, allow 5.25". For Direct Wire Connector, allow 6". For more detail on Control Box options, see page 53.
- If your selection of Modular Tracks does not match the exact length of your cabinets, you can use a Modular Track Extender to complete the track. This piece can be cut down to 6". Standard 12", 18", and 27" Modular Tracks cannot be shortened.

2. Selecting the Control Box and Power Options

Next, select the type of lighting and power connection you'd like to include. For a simple install, the Plug-In Control Box provides the easiest solution. For a hardwired installation, there are five options to choose from which enable expanded lighting control options such as dimming:

- Control Box with Paddle Dimmer
- Control Box with Paddle Dimmer and GFCI protection
- Control Box, 1-Gang (No Devices)
- Control Box, 2-Gang (No Devices)
- Direct Wire Connector

For hardwired installations, there must be three separate circuits from the electrical panel:
- Receptacle Circuit: 20 Amps; GFCI-protected; Use #12 wire
- Lighting Circuit: 15 Amps; Use #12 or #14 wire
- Accessory Circuit: 15 Amps; Use #12 or #14 wire

Compatible with all adorne 2-module devices. The CFL/LED Paddle Dimmer (ADPD453LM2) is recommended for use with the adorne system.

3. Selecting the LED Lights

The adorne Under-Cabinet Lighting System is only compatible with adorne LED lights. Recommended placement for lights is every 18" along Modular Track.

You can select any combination of Linear lights to complete your system. In addition, if you are mounting a light under the cabinet and wish to move it further to the front of the counter, you can use the LED Light Extender. This enables you to increase the length of any light from the Modular Track from a standard 11" to up to 22". This is especially useful in corner installations.

4. Choosing Accessories to Complete the System

The final step is to select the accessories to perfectly complement your system. adorne offers a range of options, including USB charging ports, mobile and tablet cradles, and a Digital Music Kit. Each of these accessories provides flexibility in that it can be added or removed at any time – simply swap it with an existing outlet or blank module to increase your system capabilities.

Modular Tracks

The adorne system is a flexible and modular solution designed to eliminate kitchen clutter. Fully customizable, you can select from several types of modules and modify your system in minutes. Simply pop out an existing module and replace it with a new module at any time.

The Modular Tracks listed below simply plug together to create a full system custom-designed for any kitchen. They form the base of the system, housing all of the wiring that connects the modules.

Each system must include a Control Box or Direct Wire Connector that is hardwired to existing wiring or plugged into an outlet on the backsplash.

NAME	COMPLIANCE	SPECIFICATIONS	PART NUMBER
12" Modular Track	cETLus LISTED TR	Includes one Tamper-Resistant Outlet Module and one Blank Module. Can support up to two LED lights. Provides 120V power via 15A outlet modules and 20A pass-through. Module openings are 6" on-center.	APMT12TM2 APMT12W2
18" Modular Track	cETLus LISTED TR	Includes one Tamper-Resistant Outlet Module and one Blank Module. Can support up to two LED lights. Provides 120V power via 15A outlet modules and 20A pass-through. Module openings are 9" on-center.	APMT18TM4 APMT18W4
27" Modular Track	cETLus LISTED TR	Includes two Tamper-Resistant Outlet Modules and one Blank Module. Can support up to three LED lights. Provides 120V power via 15A outlet modules and 20A pass-through. Module openings are 9" on-center.	APMT27TM2 APMT27W2
18" Modular Track Extender	cETLus LISTED	Enables a perfect fit for any kitchen. Simply cut to length (minimum of 6") and attach to end of Modular Track. Does not include any module openings.	APME18TM2 APME18W2
Modular Track Corner Connector	cETLus LISTED	Use with installations that include a right-angle corner to connect two Modular Tracks. Allow 3" on each side for installations with Corner Connectors.	APCCTM4 APDWCW1
Short Modular Track	cETLus LISTED TR	Includes one Tamper-Resistant Outlet Module. Intended for use on short cabinet sections. 10" in length but can be cut to 8". Enables direct wire connection to wiring behind the wall. Cannot be combined with any other track section.	APST9TM1 APST9W1

Control Boxes

Every Under-Cabinet Lighting System must include one of the below Control Boxes or Direct Wire Connector. These boxes connect to existing in-wall wiring or plug into an outlet on the backsplash to provide system power.

Control Boxes include system end caps, ensuring a clean finish on the left and right edges of the installed system.

Hardwired installations require three circuits from the electrical panel.

Lighting

adorne Linear LED Lights are designed for use with the adorne system only.
They can be paired with the adorne CFL/LED Paddle Dimmer (ADPD453L) to enable dimming.
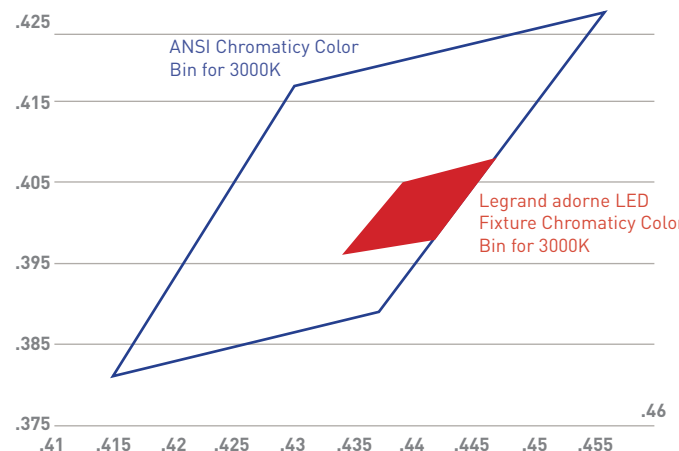

Lights easily plug into a connection port on any system module. Optimal positioning is one light for every 18" of Modular Track. Lights can be added or removed as needed.

The adorne system is optimized to provide a premium under-cabinet lighting solution by utilizing the latest innovations in lighting research and LED technologies.

System specifications:

- OSRAM OSLON® Color Champ LED
- Nominal 3000K Correlated Color Temperature (CCT) warm light output
- Color Rendering Index (CRI) of 95
- Excellent range of color differentiation and rendering of the important red color (think red meat and apples) and skin tones
- A bright lumen light output (Puck = 240 lumens/Linear = 280 lumens) provides optimized lighting for the under-cabinet environment
- Efficient driver design integrated in each fixture results in:
  - Reliable and smooth dimming
  - ENERGY STAR certification
  - Rated for 40,000 hours of high performance
- LED quality control uses a "fine bin system" based on a three-step MacAdams ellipse to ensure color consistency

Chromaticity chart:
- .425, .415, .405, .395, .385, .375
- .41, .415, .42, .425, .43, .435, .44, .445, .45, .455, .46
- ANSI Chromaticity Color Bin for 3000K
- Legrand adorne LED Fixture Chromaticity Color Bin for 3000K

adorne individual LEDs are specifically selected to ensure fixture output CCT uniformity within a range of less than 100. This tight manufacturing assurance process ensures that variations inherent in the LED chip manufacturing process do not compromise reliable light quality.

Digital Music Kit

The Digital Music Kit adds high performance sound to your adorne Under-Cabinet Lighting System. It includes two speakers and a detachable dock for smart phones or MP3 players. Simply fit the main speaker into one module opening and then place the second speaker in any other module location. Speakers can be easily removed and relocated at any time by simply pushing on the sides of the modules and popping them out of the track.

The system features BLUETOOTH® wireless technology to enable streaming of music from your devices. It also includes a 3.5mm cable to manually connect devices.

The adorne Frame System

The frame is the foundation upon which the adorne modular system is built. It is manufactured with high-strength galvanized metal and includes a ground wire.

Frames include plastic spacers. The spacers remain in place for devices with 2-Module backbodies. They must be removed for devices with 3-Module backbodies, such as dimmers and GFCI outlets.

The frame completes the enclosure, providing a safe installation during the construction phase and allowing the wall plate to be installed at the end of the project.

Each frame includes a leaded ground that supports the full adorne system. Most switches, outlets, and wall plates (including cast metals) are automatically grounded to the frame, saving time and ensuring a safe and reliable ground path.
