Why Edwards?

140 Years New

2012 marked an important milestone that very few other companies will ever have the privilege to celebrate. At Edwards, we have been dedicated to saving lives and protecting people and property since 1872. Proud? You bet we are. While many other companies have long since come and gone, Edwards continues to thrive and grow.

Brand you can trust

Whenever there is a need to alert, warn, communicate or protect, today, just as throughout our long history, customers continue to rely upon Edwards. Whether that need is to dependably ring in and ring out each trading day at the NYSE… or to protect landmarks around the world ranging from the priceless antiquities housed at the Bibliotheca Alexandrina Museum in Egypt to the modern-day sphinx at the Luxor Hotel in Las Vegas… or to help keep our troops out of harm's way, Edwards has been there. Reliable. Dependable. Durable. Since 1872, Edwards has earned customers' trust, one order at a time.

Innovative technology

Among Robert Edwards' first customers was a New York City church where sextons previously had climbed a 100-foot ladder to light gas fixtures located high above the pews. From our very beginnings, Edwards has been at the forefront of developing innovative technologies to help customers tackle their most challenging applications. It is built into the very DNA of our company. Today, this culture of invention continues and is embodied in the impressive array of technological innovations that differentiate Edwards' latest generation of signaling products:

- ClearView™ StackLights that are easier to see in bright ambient environments
- XTRA-SAFE™ technology that provides a redundant layer of protection in order to help keep machine operators with color vision deficiency safer
- Exclusive Hidden-in-Plain-Sight™ flash-pattern selection-switch technology that makes our Beacons more versatile, simpler and less costly to install
- Polaris™ and XBR™ XTRA-BRIGHT™ LED Light-Engine technology designed to lead the way for years to come. ***With Edwards Signaling, the future is bright.***

Local availability

Innovative technology and manufacturing expertise mean very little if you do not have the product when you need it most. Local availability should never be a concern with Edwards Signaling's extensive network of Distributor locations.

Genuine people who genuinely care

When it comes down to it, despite all illusions to the contrary, business is not really transacted between "companies". At the end of the day, it is we, the people who make up our companies, who choose who we do business with (and similarly, who we do not). Despite all the computers, spreadsheets, charts, graphs, emails and tweets that seem to occupy an ever greater portion of our time and attention these days, most of us still make these decisions based upon core values like integrity, fairness, trust, dependable quality and a proven track record. The single most important reason why Edwards has continued to thrive for 140 years, where others may have fared less well, is *our people.* At Edwards, every one of our people, from the shipping room floor to the boardroom care about our products and you, the people who we are proud to count as our customers. Throughout all of our company's many locations, just as it is at our Pittsfield, Maine manufacturing plant– our word remains our bond– today and tomorrow, just as it has been for 140 years. And that my friend, makes ALL the difference.

New Products

825 Night Star™ Solar LED Beacon

Page 1-4

- Dusk-to-Dawn operation
- Intuitive on-board user interface
- Flash or steady-on LED output
- Replaceable and recyclable battery pack

200 Class Stacklights™

Page 1-8

- Quick and simple assembly - NO tools required
- Available in 18, 25, 36, 48 and 70MM
- LED, Xenon or Incandescent options
- ClearView™ technology available
- Robust environmental ratings: NEMA 4X and IP66

Polaris™ Class LED Beacon 94 Series Housing

Page 1-71

- State-of-the-art Polaris light engine inside 94 Series housing
- Hidden in Plain Sight (HIPS) switch - allows user to quickly cycle through flash modes without removing power or opening the dome and exposing wires
- Seven flash patterns (includes steady-on)
- Robust environmental ratings: NEMA 4X and IP66

Polaris™ Class LED Beacon 57 Series Housing

Page 1-73

- State-of-the-art Polaris light engine inside 57 Series housing
- Hidden in Plain Sight (HIPS) switch - allows user to quickly cycle through flash modes without removing power or opening the dome and exposing wires
- Seven flash patterns (includes steady-on)
- Robust environmental ratings: NEMA 4X and IP66

116 Class Explosionproof and Hazardous Location LED Beacon

Page 1-85

- *NEW* super bright LED engine inside reduces maintenance and/or replacement requirements by up to 90% when compared to a xenon strobe tube
- 14 user selectable flash patterns (including steady-on)
- UL and cUL listed for use in Class 1, Div 1 and Div 2 explosionproof and hazardous location applications
- NEMA 3R, NEMA 4X and Marine rated
- Four mounting options: ceiling, wall, pendant or stanchion

116 Class Genesis Mass Notification Strobe

Page 1-154

- Ideal for applications where electrical supervison is required
- Can be synchronized when connected to a compatible Edwards control panel, booster power supply or synchronization module
- Negligible in-rush current
- UL and cUL listed for use in Class 1, Div 1 and Div 2 explosionproof and hazardous location applications (non-fire alarm)
- NEMA 3R and 4X rated
- Three mounting options: ceiling, wall, or pendant

New Products

NEW

125XBRi XTRA-BRITE™ Multi-Status Indicator

Page 1-43

- Multi-status indicator
- Three different color XTRA-BRITE™ XBR LEDs inside
- XTRA-SAFE™ technology for color deficient
- Clear lens offers high visibility in high ambient light conditions

105XBRi XTRA-BRITE™ Multi-Status Indicator

Page 1-45

- Multi-status indicator
- Three different color XTRA-BRITE™ XBR LEDs inside
- XTRA-SAFE™ technology for color deficient
- Clear lens offers high visibility in high ambient light conditions

125XBR XTRA-BRITE™ LED Multi-Mode Beacon

Page 1-75

- XBR XTRA-BRITE™ LED engine inside
- Multi-mode beacon provides added solutions for specific applications (steady-on/65 FPM flash or steady-on/lightburst)
- Available with black or gray base
- Option for panel or conduit mounting
- NEMA 4X rated

105XBR XTRA-BRITE™ LED Multi-Mode Beacon for Hazardous Locations

Page 1-77

- XBR XTRA-BRITE™ LED engine inside
- Steady-on or flashing controlled via internal dipswitch
- Three mounting configurations available
- Class 1, Div 2, NEMA 4X and Marine rated

48XBR XTRA-BRITE™ LED Multi-Mode Beacon

Page 1-79

- XBR XTRA-BRITE™ LED engine inside
- Steady on or flashing controlled via internal dipswitch
- Three mounting configurations available
- NEMA 4X rated

51XBR XTRA-BRITE™ LED Beacon with Horn

Page 3-4

- XBR XTRA-BRITE™ LED engine inside
- Combination audible and visual signal providing two levels of sensory notification
- Indoor or outdoor applicatons
- High level of vibration resistance

New Products

NEW

107XBR XTRA-BRITE™ LED Multi-Mode Beacon

Page 1-88

- XBR XTRA-BRITE™ LED engine inside
- Field configurable for steady-on or flashing (65 FPM)
- UL listed for Class 1, Div 2, Groups A,B,C,D; Class II, Div 1, Groups E,F,G; Class II, Div 2, Groups F &G; Class III, Div 1 locations
- NEMA Type 3R and Type 4 rated
- UL listed for Marine environments (120V AC only)
- Three mounting configurations available: pendant, ceiling or bracket

101XBR XTRA-BRITE™ LED StackLights

Page 1-41

- XBR XTRA-BRITE™ LED technology
- Vibration resistant heavy duty industrial design
- Module change requires no wiring
- Base unit comes with 85dB horn

117 Class LED Beacon Coming Soon

Page 1-81

- *NEW* super bright LED engine inside reduces maintenance and/or replacement requirements by up to 90% when compared to a xenon strobe tube
- Multi-mode provides added solutions for specific applications
- Seven flash patterns (includes steady-on)
- NEMA 4X rated

155 Class LED Sounder Beacon Coming Soon

Page 3-15

- Super bright LED visual signal with built-in 32 tone audible sounder
- LED flash pattern and audible tone are both field programmable
- Available in 12/24V AC/DC
- UL listed, NEMA Type 3R and IP65 rated

120 Class Economical Beacons Coming Soon

Page 1-57

- Multiple light source options - LED (bulb or board mounted) or Incandescent bulb
- Available in flashing, steady-on or multi-mode (LED only)
- Multiple mounting options available
- UL listed, NEMA Type 4X and IP65 rated

650I Industrial Bells Coming Soon

Page 4-8

- Heavy duty vibrating bells
- Designed for industrial and commercial applications
- Range from 98dB to 100dB
- Available in red or gray
- UL 464 listed, cULus listed, NEMA Type 3R and IP66 rated

New Products

NEW

850I Stainless Steel Industrial Bells Coming Soon

Page 4-9

- Heavy duty stainless steel vibrating bells
- Designed for industrial and commercial applications
- Range from 98dB to 100dB
- UL 464 listed, cULus listed, NEMA Type 3R and IP66 rated

E-FSA Fire Panel

Page 12-41

- Available in 2 sizes: E-FSA64, 64 points; E-FSA250, up to 254 points
- Distributed intelligence in the detectors and modules
- Ground fault detection by module
- Simple rotary dial device addressing
- Fully field programmable via panel's keypad or separate laptop
- No need for twisted or shielded addressable loop wire

125 Class Beacons

Page 1-51

- Replaces 103, 104, 109, and 114 Series beacons
- Multiple light source options: LED, Incandescent, Halogen, Xenon
- Option for panel or conduit mounting
- Flashing, steady-on or multi-mode (XBR models)
- Available with black or gray base

805 Mini Night Star™ Solar LED Beacon Coming Soon

Page 1-7

- Solar LED beacon
- Economical and portable
- Comes with auto/off switch
- Powered by Ni-MH battery (up to 60 hours on a full charge)

870EX2 Series Vibrating Horns Coming Soon

Page 4-64

- Indoor or outdoor
- Hazardous locations – Class I, Div 2
- Low current drain
- NEMA 4X and IP66 rated
- Diode polarized versions available

ReadySET Series Smoke Detectors

Page 12-21

- Simple installation, no special tools or PC required
- Environmental compensation greatly reduces nuisance alarms
- Easy maintenance
- Simple diagnostics

Beacons
Steady-On LED
125 Class

NEW

Edwards 125 Class standard steady-on LED beacons are NEMA 4X signaling devices, designed for indoor or outdoor applications where a continuous (steady-on) light source is required. Base material is gray or black, manufactured from a 33% glass filled nylon, providing a high resistance to heat and chemicals. The lens is made of shatter-resistant polycarbonate.

Features and Specifications

- LED light source
- Shatter-resistant polycarbonate lens
- Gray or black glass filled nylon base
- Suitable for use in indoor or outdoor applications
- NEMA Type 4X enclosure
- Option for panel or conduit mounting
- Operating temperature range: -31°F to 150°F (-35°C to 66°C)

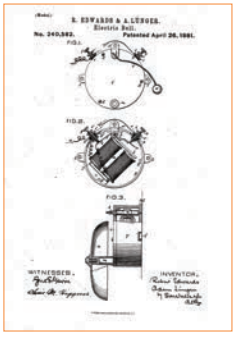
140 Years New

1872 Edwards & Company founded by Robert Edwards & David Rousseau to explore the new phenomenon of "electricity" and to manufacture, sell and install battery-operated gas-fixture igniters.

1881 Robert Edwards obtains first patent for an electric bell. Other patents follow quickly: drop-type annunciator (1882); electric gas burner lighter for push-button operation (1883); electric door opener (1884).



1903 The New York Stock Exchange bell officially rings for the first time at the April 22nd grand opening celebration at the new Wall Street location.

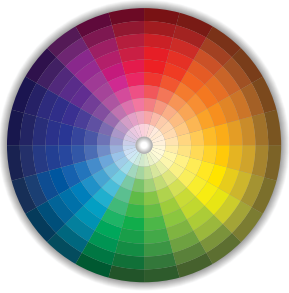
1915 Bronze Medal awarded to Edwards at Panama-Pacific Exposition, San Francisco, CA.

1962 Edwards becomes part of General Signal Corporation.

1982 Edwards begins ten year, multi-million dollar expansion of audible, visual and hazard-ous location signaling product lines that results in the most up-to-date and complete line in the industry.

1993 Edwards acquires FAST. "EST" premier fire alarm system brand is born.

1996 Edwards acquires Dukane Communications



2001 Edwards acquired by SFX Corporation.

2005 Edwards acquired by General Electric. Combined with GE Interlogix to form GE Security.

2010 GE Security acquired by Unitied Technologies Corp., becomes part of global $8.5B UTC Fire & Security Business.

2011 UTC combines Fire & Security and Carrier businesses to form $19.2B UTC Climate Controls and Security business.

2012 Edwards celebrates 140 year anniversary.

From our very beginnings, Edwards has been dedicated to advancing technology in order to deliver industry leading solutions to our customers. Today, we continue in this tradition as is evidenced by the large number of exciting "New Products" featured in the previous pages.

NEW Wherever you see the "NEW" icon displayed throughout the catalog: New high-visibility Polaris™ and XBR™ LED light engines… New Solar powered Beacons… Unique new product innovations like our Hidden-in-Plain-Site™ flash-rate selection switch specifically designed to reduce installation time and effort… Robust and easier to see ClearView™ Stacklights… New XTRA-SAFE™ Multi-Status Indication technology providing an added layer of protection for those with color vision deficiency… And this is just the beginning...

The future is bright...
Smarter Signaling™ from Edwards

United Technologies

Climate | Controls | Security

We make the world a better place to live.

Edwards is proud to be a part of UTC Climate, Controls and Security, a leading, $17 billion provider of heating, ventilation, air conditioning, fire and security systems, building automation and controls.

Our 60,000 employees around the world are dedicated to relentlessly improving the quality of our products and services.

CCS conducts business in three major categories:

- Non-residential efficiency, safety and security
- Home comfort, safety and security
- Food safety

NEMA Enclosure Ratings

NEMA Definitions

A brief description of the more common types of enclosures used by the electrical industry relating to their environmental capabilities follows. Please refer to the appropriate sections of the latest revision of NEMA Standards Publication No. 250 for complete information regarding applications, features and design tests.

Definitions Pertaining to Non-hazardous Locations

Type 1 Enclosures
Intended for use primarily to provide a degree of protection against limited amounts of falling dirt.

Type 3 Enclosures
Intended for outdoor use primarily to provide a degree of protection against rain, sleet, windblown dust, and damage from external ice formation.

Type 3R Enclosures
Intended for outdoor use primarily to provide a degree of protection against rain, sleet, and damage from external ice formation.

Type 3S Enclosures
Intended for outdoor use primarily to provide a degree of protection against rain, sleet, windblown dust, and to provide for operation of external mechanisms when ice laden.

Type 4 Enclosures
Intended for indoor or outdoor use primarily to provide a degree of protection against windblown dust and rain, splashing water, hose-directed water, and damage from external ice formation.

Type 4X Enclosures
Intended for indoor or outdoor use primarily to provide a degree of protection against corrosion, windblown dust and rain, splashing water, hose-directed water, and damage from ice formation.

Type 6 Enclosures
Intended for indoor or outdoor use primarily to provide a degree of protection against hose-directed water, the entry of water during occasional temporary submersion at a limited depth, and damage from external ice formation.

Type 6P Enclosures
Intended for indoor or outdoor use primarily to provide a degree of protection against hose-directed water, the entry of water during prolonged submersion at a limited depth, and damage from external ice formation.

Type 12 Enclosures
Intended for indoor use primarily to provide a degree of protection against circulating dust, falling dirt, and dripping non-corrosive liquids.

Type 12K Enclosures
Type 12 with knockouts.

Definitions Pertaining to Hazardous (Classified) Locations

Type 7 Enclosures
Intended for indoor use in locations classified as Class I, Groups A, B, C, or D, as defined in the National Electrical Code.

Type 8 Enclosures
Intended for indoor or outdoor use in locations classified as Class I, Groups A, B, C, or D, as defined in the National Electrical Code.

Type 9 Enclosures
Intended for indoor use in locations classified as Class II, Groups E, F, or G, as defined in the National Electrical Code.

Type 10 Enclosures
Constructed to meet the applicable requirements of the Mine Safety and Health Administration.

IEC Enclosure Ratings

Ingress Protection (IP), as stated by I.E.C. Standard 529, describes the degree of protection an enclosure provides. The first digit of the IP designation describes the degree of protection against access to hazardous parts and ingress of solid objects; the second digit designates the Ingress Protection against water. Please refer to the appropriate sections of IEC 529 for complete information regarding applications, features, and design tests.

NEMA No. 250 Appendix A: NEMA To IEC Enclosure Designations

The following information is provided by NEMA Standard No. 250 Appendix A as a guide to comparing NEMA enclosure types to IEC designations.

IEC Publication 529 *Classification of Degrees of Protection Provided by Enclosures* provides a system for specifying the enclosures of electrical equipment on the basis of the degree of protection provided by the enclosure. IEC 529 does not specify degrees of protection against mechanical damage of equipment, risk of explosions, or conditions such as moisture (produced for example by condensation), corrosive vapors, fungus, or vermin. NEMA Standards Publication 250 does test for environmental conditions such as corrosion, rust, icing, oil, and coolants. For this reason, and because the tests and evaluations for other characteristics are not identical, the IEC Enclosure Classification Designations cannot be exactly equated with NEMA Enclosure Type Numbers.

Table A-1 provides a guide for converting from NEMA Enclosure Type Numbers to IEC Enclosure Classification Designations. The NEMA Types meet or exceed the test requirements for the associated IEC Classifications; for this reason Table A-1 cannot be used to convert from IEC Classifications to NEMA Types and the NEMA to IEC conversion should be verified by test.

IP Ratings

Protection Against Access to Hazardous Parts (First Digit)

No.	Description
0	Non-protected
1	Protected against access with back of hand (50 mm)
2	Protected against access with jointed finger (12 mm x 80 mm)
3	Protected against access with a tool (2.5 mm)
4,5&6	Protected against access with a wire (1.0 mm)

Protection Against Ingress of Solid Foreign Objects (First Digit)

No.	Description
0	Non-protected
1	Objects equal or greater than 50mm
2	Objects equal or greater than 12.5mm
3	Objects equal or greater than 2.5mm
4	Objects equal or greater than 1mm
5	Dust protected
6	Dust tight

Protection Against Ingress of Liquids (Second Digit)

No.	Description
0	Non-protected
1	Water dripping vertically
2	Water dripping, enclosure tilted up to 15°
3	Spraying water, up to 60° angle from vertical
4	Splashing water, any direction
5	Jetting water, any direction
6	Powerful jetting water, any direction
7	Temporary immersion in water
8	Continuous immersion in water

Table A-1

Conversion of NEMA Type Numbers to IEC Classification Designations
(Cannot be used to convert IEC Classification Designations to NEMA Type Numbers)

NEMA Enclosure Type Number	IEC Enclosure Classification Designation
1	IP10
2	IP11
3	IP54
3R	IP14
3S	IP54
4 and 4X	IP56
5	IP52
6 and 6P	IP67
12 and 12K	IP52
13	IP54

NOTE: Approximate equivalents based on tests specified in IEC Publication 529

Hazardous Location and Explosionproof Classifications

Hazardous Location Definitions

The principles of sound and light apply to hazardous location signals as they do regular audible and visual signals (see pages 20-31). An added factor must be taken into Consideration - the hazardous environment where the signal will be used. NOTE: Information in this section is provided to assist in signal selection only. Classification of areas in which equipment is to be located is the responsibility of the authority having jurisdiction.

THE ENVIRONMENT

Hazardous Location Environments are those indoor or outdoor areas where a potential explosion and/or fire may exist due to the presence of flammable gases, liquids or vapors (Class I), combustible dusts Class II), or ignitable fibers or flyings (Class III). Whatever the reason for the hazardous location to exist it is essential that every precaution be used to prevent ignition of these hazardous atmospheres.

ELECTRICITY - A SOURCE OF IGNITION

An explosion in a hazardous location atmosphere may result from a simple burst of ignition energy from common electrical devices. The routine usage of circuit breakers, motor starters, contactors, switches, plugs and receptacles releases energy in the form of arcs and sparks as their contacts close and open. The source of an ignition could come from the break-down in an electrical system or a power surge. Sparks, arcs and heat could come from loose wire connections in a splice box, or the failure of insulation from aging or breaking. Static electricity is also a potential source of ignition.

TEMPERATURES

Excessive equipment temperatures can cause a fire or explosion if the ignition temperature of the hazardous substance of concern is reached. Accumulations of dust, fibers or flyings can cause further increases in equipment temperatures. Ignition temperatures do not correlate with properties that define Class and Group classifications.

HAZARDOUS LOCATION CLASSIFICATIONS

The following classification definitions are an interpretive summary based on the 2011 edition of the National Electrical Code and NFPA 70E. Refer to the latest editions of NFPA 497M, NFPA 70E and the UL Hazardous Location Equipment Directory for current and more detailed information.

Classes

The National Electrical Code has created three classes of hazardous locations:

Class I - Hazardous Gases

Class I locations are areas in which flammable gases or vapors are or may be present in the air in quantities sufficient to produce explosive or ignitable mixtures.

Class II - Hazardous Dusts

Class II locations represent areas that are hazardous due to the presence of combustible dust.

Class III - Hazardous Fibers

Class III locations have easily ignitable fibers or flyings present, but not likely to be suspended in air in quantities sufficient to produce ignitable mixtures in the atmosphere.

Divisions

The Location Classes are broken down by the NFPA into Divisions I and 2, defining different levels of risk. In general, the risk of there being a hazardous presence of flammable/combustible/ignitable materials is higher for Division 1 than for Division 2. The specifics differ between the three classes (I, II and III), **Equipment suitable for Division 1 is also suitable for Division 2 locations.**

Groups

Class I and II locations are divided by the NFPA into Group designations identifying specific gases, vapors and dusts by characteristic similarities that relate to specific equipment construction requirements.

Class III locations are not divided into separate group designations.

Class I Groups

Group A - Atmospheres containing acetylene
Group B - Atmospheres containing hydrogen, fuel and combustible process gases containing more than 30 percent hydrogen by volume, or gases or vapors of equivalent hazard such as butadiene, ethylene oxide, propylene oxide, and acrolein.
Group C - Atmospheres such as ethyl ether, ethylene, or other gases or vapors of equivalent hazard.
Group D - Atmospheres containing acetone, ammonia, benzene, butane, cyclopropane, ethanol, gasoline, hexane, methanol, methane, natural gas, naphtha (petroleum), propane. or gases or vapors of equivalent hazard.

Signaling Devices for Class I Locations

Edwards signaling devices for Class I, Division I hazardous locations are housed in enclosures that, for the marked group under normal atmospheric conditions and non-extreme ambients (-25ºC to 40ºC per UL), are built strong enough to contain an explosion, if a hazardous vapor of the marked group enters into the enclosure and ignites, and is construct-ed with joints between parts designed to inhibit the resultant flame from propagating out of the enclosure.

The external surface temperature has been evaluated by UL as not exceeding, unless otherwise indicated, 100ºC in a 40ºC ambient with proper electrical connections and circuit protection.

Class	Group	Approved for Atmospheres containing:	Division 1	Division 2
I	A	Acetylene		B-KM-8130, 5553, 5540M(V/P), 5570M, 58 Series, 94DV2, 94DDV2, 96DV2, 105 Series, 105XBR, 105XBRi, 107DV2 Series, 107DDV2 Series, 107XBR, 116 Series
I	B	Atmospheres containing Hydrogen, fuel and combustible process gases containing more than 30 percent Hydrogen by volume, or gases or vapors of equivalent hazard such as Butadiene, Ethylene Oxide, Propylene Oxide and Acrolein.	332EX, 333EX, 340EX, 435EX, 439DEX 878EX, 878DEX, 879EX, 879DEX, 5522M(D), 5523M(D), 5533M(D), 5545M	B-KM-8130, 5530M, 5531M, 5532M, 5533(M), 5540M(V/P), 5545M, 5553, 5570M, 58 Series, 94DV2, 94DDV2, 96DV2, 105 Series, 105XBR, 105XBRi, 107XBR, 107DV2 Series, 107DDV2 Series, 116 Series
I	C	Atmospheres containing Acetaldehyde, Allyl Alcohol, Butyraldehyde, Carbon Monoxide, Crotonaldehyde, Diethylamine, Diethyl Ether, Dioxane, Epichlorohydrin, Ethylene, Ethylenimine, Ethyl Ether, Ethyl Mercaptan, Hydrogen Cyanide, Hydrogen Sulfide, Methyl Ether, Methyl Formal, Methylacetylene, Morpholine, Nitropropane, Propyl Ether, Tetrohydrofuran, Triethylamine, Unsymmetrical Dimethyl Hydrazine or other gases and vapors of equivalent hazard.	332EX, 333EX, 340EX, 435EX, 439DEX, B-KM-8140, B-8141, 878EX, 878DEX, 879EX, 879DEX, B-KM-8130, 5522M(D), 5523M(D), 5533M(D) 5545M,116 Series	5531M, 5532M, 5533M(D), 5540M(V/P), 5545M, 5553, 5570M, 58 Series, 94DV2, 94DDV2, 96DV2, 105 Series,105XBR, 107XBR, 107DV2 Series, 107DDV2 Series, 116 Series
I	D	Acetic Acid, Acetone, Acrylonitrile, Ammonia, Benzene, Butane, Butanol, Butyl Acetate, Cyclopropane, Di-Isobutylene, Ethane, Ethanol, Ethylamine, Ethylenediamine, Ethylene Dichloride, Ethyl Acetate, Ethyl Acrylate, Ethyl Alcohol, Gasoline, Heptane, Hexane, Isobutyl Acetate, Isobutyl Alcohol, Isoprene, Isopropyl Ether, Mesityl Oxide, Methane, Methanol, Methyl Alcohol, Methyl Ethyl Ketone, Methyl Isobutyl Ketone, Methyl Propanol, Naphtha (Petroleum), Octane, Pentane, Pentanol, Propane, Propanol, Propylene, Styrene, Toluene, Vinyl Acetate, Vinyl Chloride, Xylene or other gases and vapors of equivalent hazard.	332EX, 333EX, 340EX, 435EX, 439DEX, B-KM-8140, B-8141, 878EX, 878DEX, 879EX, 879DEX, B-KM-8130, 5522M(D), 5523M(D), 5533M(D), 5545M,116 Series	5530M, 5531M, 5532M, 5533M(D), 5540M(V/P), 5545M, 5553, 5570M, 58 Series, 94DV2, 94DDV2, 96DV2, 105 Series, 105XBR, 105XBRi, 107DV2 Series, 107DDV2 Series, 107XBR, 116 Series
II	E	Atmospheres containing combustible metal dusts, including aluminum, magnesium, and their commercial alloys, or other combustible dusts whose particle size, abrasiveness, and conductivity present similar hazards in the use of electrical equipment.	332EX, 333EX, 340EX, 435EX, 439DEX, B-KM-8140, B-8141, 878EX, 878DEX, 879EX, 879DEX, B-KM-8130, 5522M(D), 5523M(D),116 Series	107DV2 Series, 107DDV2 Series, 107XBR
II	F	Coal, carbon black, charcoal and coke dusts. Atmospheres, containing combustible carbonaceous dusts that have more than 8 percent total entrapped volatiles or that have been sensitized by other materials so that they present an explosion hazard.	332EX, 333EX, 340EX, 435EX, 439DEX, B-KM-8140, B-8141, 878EX, 878DEX, 879EX, 879DEX, B-KM-8130, 5522M(D), 5523M(D), 116 Series	5530M, 5531M, 5532M, 5540M(V/P), 5553, 58 Series, 94DV2, 94DDV2, 96DV2, 105 Series, 105XBR, 105XBRi, 107DV2 Series, 107DDV2 Series, 107XBR, 116 Series
II	G	Atmospheres containing combustible dusts not included in Group E or F, including flour, grain, wood, plastic and chemicals.	332EX, 333EX, 340EX, 435EX, 439DEX, B-KM-8140, B-8141, 878EX, 878DEX, 879EX, 879DEX, B-KM-8130, 5522M(D), 5523M(D), 116 Series	5530M, 5531M, 5532M, 5540M(V/P), 5553, 58 Series, 5894DV2, 94DDV2, 96DV2, 105 Series, 105XBR, 105XBRi, 107DV2 Series, 107DDV2 Series, 107XBR, 116 Series
III		Atmospheres containing Ignitable Fibers or Flyings. These may include Textile mills, Cotton gins, Cotton seed milling plants, Flax plants and Carpet manufacturers.	332EX, 333EX, 340EX, 435EX, 439DEX, 878EX, 878DEX, 879EX, 879DEX, 5522M(D), 5523M(D), 5553, 116 Series	5530M, 5531M, 5532M, 5536M(H/V), 5540M(V/P), 5553, 58 Series, 94DV2, 94DDV2, 96DV2, 105 Series, 105XBR, 105XBRi, 107DV2 Series, 107DDV2 Series, 107XBR, 116 Series

Note: Any signal approved for Division 1 may be used in Division 2 locations of the same group.

The ATEX directive consists of two EU directives that describe what equipment and work environment is allowable in an environment with an explosive atmosphere. ATEX derives its name from the French title of the 94/9/EC directive: Appareils destinés à être utilisés en **AT**mosphères **Ex**plosives.

As of July 2003, organizations in the EU must follow the directives to protect employees from explosion risk in areas with an explosive atmosphere.

There are two ATEX directives, one for the manufacturer and one for the user of the equipment:

- **ATEX 95** equipment directive 94/9/EC, Equipment and protective systems intended for use in potentially explosive atmospheres;
- **ATEX 137** workplace directive 99/92/EC, Minimum requirements for improving the safety and health protection of workers potentially at risk from explosive atmospheres.

European Zones		Definitions	North American Classification	ATEX Categories	Typical Zone Suitability
Gas	0	A place in which an explosive atmosphere is continuously present	Class I, Division 1	1G	Equipment suitable for Zone 0
Dust	20		Class II, Division 1	1D	Equipment suitable for Zone 20
Gas	1	A place in which an explosive atmosphere is likely to occur in normal operation occasionally	Class I, Division 1	2G	Equipment suitable for Zone 1
Dust	21		Class II, Division 1	2D	Equipment suitable for Zone 21
Gas	2	A place in which an explosive atmosphere is not likely to occur in normal operation but if it does, only occurs for short periods	Class I, Division 2	3G	Equipment suitable for Zone 2
Dust	22		Class II, Division 2	3D	Equipment suitable for Zone 22

Gas Groups (plus dusts and fibers)

There are two main gas groups,
Group I– Mining only and
Group II– Surface Industries

These categories are used in European and I.E.C. groupings.

Group I is concerned only with underground mining where methane and coal dust are present.

Group II gases occurring in surface industries, are sub-grouped according to their volatility. This enables electrical equipment to be designed to less onerous tolerances if it is to be used with the least volatile gases.

Typical gas/material	European/I.E.C. Gas Group	North American Gas Group
Methane	I	–
Acetylene	IIC	A
Hydrogen	IIC	B
Ethylene	IIB	C
Propane	IIA	D
Metal dust	–	E
Coal dust	–	G
Grain dust	–	G

Temperature

Hot surfaces can ignite explosive atmospheres. To guard against this, all electrical equipment intended for use in a potentially explosive atmosphere is classified according to the maximum surface temperature it will reach in service. This temperature is normally based on a surrounding ambient temperature of 40C° (102°F). This temperature can then be compared to the ignition temperature of the gas(es) which may come into contact with the equipment and a judgement reached as to the suitability of the equipment to be used in that area.

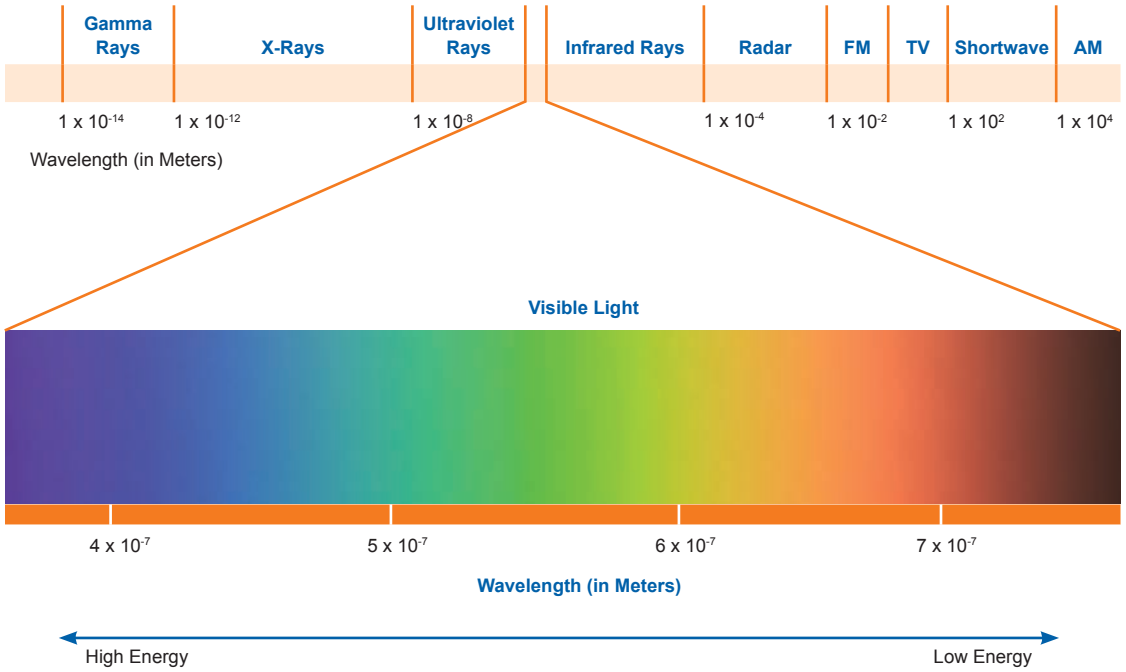
Temperature Classification		
European/I.E.C.	North American	Maximum Surface Temperature
T1	T1	450° C
T2	T2	300° C
	T2A	280° C
	T2B	260° C
	T2C	230° C
	T2D	215° C
T3	T3	200° C
	T3A	180° C
	T3B	165° C
	T3C	160° C
T4	T4	135° C
	T4A	120° C
T5	T5	100° C
T6	T6	85° C

Types of Electrical Equipment Suitable for use in Potentially Explosive Atmospheres

Different techniques are used to prevent electrical equipment from igniting explosive atmospheres. There are restrictions on where these different types of equipment can be used as follows:	European Area of use Designation Standard	IEC Area of use Designation Standard	NEC Area of use Designation Standard
Flameproof Enclosure– An enclosure used to house electrical equipment, which when subjected to an internal explosion will not ignite a surrounding explosive atmosphere.	Zones 1 & 2 EExd EN60079-1	Zones 1 & 2 Exd IEC60079-1	Class I, Divisions 1 & 2 – UL1203
Intrinsic Safety– A technique whereby electrical energy is limited such that any sparks or heat generated by electrical equipment is sufficiently low as to not ignite an explosive atmosphere.	Zones 0, 1 & 2 EExi EN50020	Zones 1 & 2 Exi IEC60079-11	Class I, Divisions 1 & 2 – UL913
Increased Safety– This equipment is so designed as to eliminate sparks and hot surfaces capable of igniting an explosive atmosphere.	Zones 1 & 2 EExe EN60079-7	Zones 1 & 2 Exi IEC60079-7	– – –
Purged and Pressurized– Electrical equipment is housed in an enclosure which is initially purged to remove any explosive mixture, then pressurised to prevent ingress of the surrounding atmosphere prior to energization.	Zones 1 & 2 EExp EN50016	Zones 1 & 2 Exp IEC60079-2	Class I, Divisions 1 & 2 – NFPA496
Encapsulation– A method of exclusion of the explosive atmosphere by fully encapsulating the electrical components in an approved material.	Zones 1 & 2 EExm EN60079-18	Zones 1 & 2 Exm IEC60079-18	– – –
Oil Immersion– The electrical components are immersed in oil, thus excluding the explosive atmosphere from any sparks or hot surfaces.	Zones 1 & 2 EExo EN50015	Zones 1 & 2 Exo IEC60079-6	Class I Division 2 – UL698
Powder Filling– Equipment is surrounded with a fine powder, such as quartz, which does not allow the surrounding atmosphere to come into contact with any sparks or hot surfaces.	Zones 1 & 2 EExq EN50017	Zones 1 & 2 Exq IEC60079-5	– – –
Non-sparking– Sparking contacts are sealed against ingress of the surrounding atmosphere, hot surfaces are eliminated.	Zone 2 EExn EN60079-15	Zone 2 Exn IEC60079-15	– – –

Science of Light

Physical Principles of Light



The electromagnetic spectrum covers an extremely broad range, from radio waves with wavelengths of a meter or more, down to x-rays with wavelengths of less than a billionth of a meter. Optical radiation (visible light) is only a small portion of this spectrum positioned between radio waves and x-rays.

That portion of the spectrum that the eye can see is rather small, covering approximately 360 to 830 nm. The colors we perceive depend on wavelength, while the amount of light energy detected by the eye at a particular wavelength determines the perceived intensity of that color. In quantifying that energy, we use what is called “radiant flux”, a measure in watts, of the energy per second (or power) radiated from a source. Radiated optical energy (light) can be measured and correlated with human vision.

Photometric versus radiometric measurement

Photometry is the science of the measurement of light in terms of its perceived brightness to the human eye. The eye’s response to light depends on physical, physiological and psychological factors and varies from person to person, making it difficult to define the average observer. In 1924, the Commission Internationale de l’Eclairage (CIE), or International Commission on Illumination, conducted a series of experiments to quantify the human eye’s response to visible light. The result: a specified spectral luminous efficiency function V (λ) to characterize the daylight vision of the average human observer. This is now commonly known as the photopic function. Because the response changes at low light levels, the CIE also defined a scotopic function V’(λ) to characterize the response of the dark-adapted eye. As such, it takes into account the eye's sensitivity to varying degrees of light and focuses primarily on the visible light spectrum.

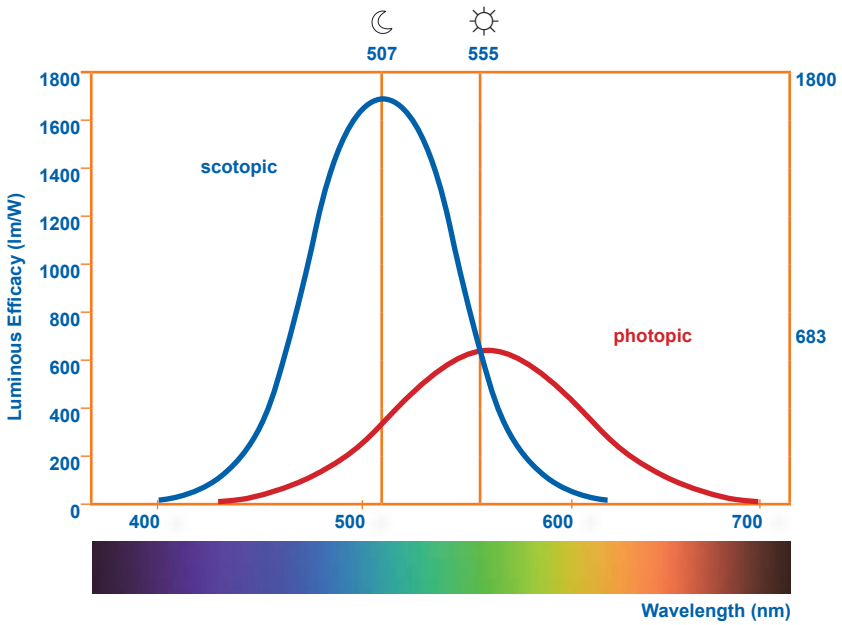


Figure 1: The response of two types of vision can be described by photopic (red) and scotopic (blue) Luminous Efficacy curves.

Photometry is distinct from radiometry, which is the science of measurement of radiant energy (including light) in terms of absolute power. There are two parallel systems of measurement known as photometric and radiometric quantities. Every quantity in one system has an analogous quantity in the other system. In photometric quantities every wavelength is weighted according to how sensitive the human eye is to it, while radiometric quantities use unweighted absolute power.

Photometric and Radiometric Units

Radiometric Term	Unit	Photometric Term	SI Unit	English Unit
Radiant flux	Watt	Luminous flux	Lumen	Lumen
Radiant intensity	Watt/steradian	Luminous intensity	Candela	Candela
Radiance	Watt/steradian/m^2	Lumiance	cd/m^2	Footlambert
Irradiance	$Watt/m^2$	Illuminance	Lux	Footcandle

Luminous flux

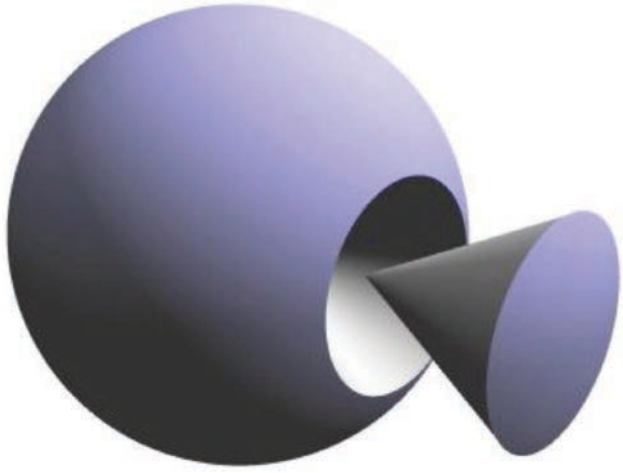

Figure 2. The steradian is the solid angle at the center of a sphere that subtends a surface area of r^2.

The fundamental quantity used in photometry is luminous flux, which is the visible light energy per second radiated by a source or amount of photometric energy traveling through space in a given time interval. The lumen is the unit of luminous flux, and 1 W of radiant flux at the peak photopic wavelength of 555 nm is equivalent to a luminous flux of 683 lumens. If the radiant flux (power) of a polychromatic light source at every wavelength of the visible spectrum from the blue to the red end is known, the luminous flux can be calculated by mathematically integrating the power values with the CIE-defined photopic value for each wavelength.

For historical reasons, the candela – the unit of luminous intensity – takes precedence over the lumen. The candela originally was derived from the light emitted by a candle; its current definition is the luminous intensity, in a given direction, of a source that emits monochromatic radiation of frequency 540×10^{12} Hz and that has a radiant intensity in that direction of 1/683 W per steradian (540×10^{12} Hz is equivalent to 555 nm). The lumen is the luminous flux, emitted per unit solid angle from a point source whose luminous intensity is one candela. The unit of solid angle is the steradian (Figure 2), and because the surface area subtended by a steradian is r^2, a sphere with a surface area of $4\pi r$ must have 4π steradians. Therefore, the total luminous flux emitted from a one-candela point source is 4π lumens.

Typically, manufacturers measure the total lumen output by placing a photometer at the exit port of an integrating sphere. The light source is placed inside the integrating sphere – a highly reflective sphere with a white, spectrally nonselective coating. These devices also are used to measure directional sources such as laser beams and light-emitting diodes (LEDs).

Luminous intensity

Luminous intensity, or candlepower, is the luminous flux per unit solid angle emitted by a uniform point source of light. This is the quantity used to measure the output of point (small) sources such as an LED. The unit of luminous intensity is the candela, and it is given in lumens per steradian.

It is important to note that in many practical applications, point sources are directional and do not radiate uniformly. Therefore, candlepower is measured in a specific direction over a small collection angle along the axis of radiation. LED receptors, which use the technique to measure LEDs in millicandelas, consist of tubes with baffles that have a specific collections geometry (2° to 15° are common). The CIE has recommended in CIE 127 that LEDs be measured using 2° and 6.5° geometry, and that these two readings are averaged to yield "Averaged LED Intensity." A typical LED receptor is a tube in which one end is attached to the light measuring device and the other end receives the LED. The collection geometry is defined by a field stop in the tube. The receptor is then calibrated using a source of known luminous intensity.

Flashing lights are also commonly used in many signaling applications. The visibility or conspicuity of flashing lights varies depending on the duration and waveform of flashes for the same physical energy and spectrum of the flashes. To take into account such visual effects, the term, effective intensity, is used to specify the intensity of flashing lights for signaling applications. Effective intensity is defined as the luminous intensity (cd) of a steady light source that would have the same luminous range (or visual range) as the flashing lights in question.

An additional source of potential confusion regarding intensity measurements involves the difference between Mean Spherical Candela and Beam Candela, both of which use the candela unit (lumens per steradian). Mean spherical measurements are made in an integrating sphere, and represent the total output in lumens divided by $4\pi sr$ in a sphere. Thus, a one candela isotropic lamp produces one lumen per steradian. Beam candela, on the other hand, samples a very narrow angle and is only representative of the lumens per steradian at

Courtesy of Steven Engineering, Inc - (800) 258-9200 - sales@steveneng.com - www.stevenengineering.com

the peak intensity of the beam. This measurement is important in the world of signaling devices where beam intensity is an important application factor.

Suppose that two LED's each emit 0.1 lm total in a narrow beam: One has a 10° solid angle and the other a 5° angle. The 10° LED has an intensity of 4.2 cd, and the 5° LED an intensity of 16.7 cd. They both output the same total amount of light, however - 0.1 lm. A flashlight with a million candela beam may be very bright, but only within its extremely narrowly focused beam.

Illuminance

Illuminance is the total amount of visible light illuminating, (or incident upon), a point on a surface from all directions above the surface. Illuminance is equivalent to irradiance weighted with the response curve of the human eye. Standard unit for illuminance is Lux (lx), or lumens per square meter (lm/m^2). A surface will receive one Luxx of illuminance from a point light source that emits one candela of luminous intensity in its direction from a distance of 1 m. When using the non-standard US units, this translates into one footcandle received from a one candela source one foot away.

Illuminance is measured whenever the light level of a particular surface has to be specified. For example, these measurements are required to characterize the light falling on a projector screen or to design light fixtures in a building.

Two laws of physics that affect illuminance measurements are the inverse square law and the cosine law. The inverse square law states that the intensity per unit area of a surface varies inversely with the square of the distance between the light source and the detector. Therefore, if illuminance is measured at a particular distance from a source, it is possible to calculate the illuminance at other distances.

The cosine law states that the illumination of a surface decreases as a function of the cosine of the incident angle of illumination. This happens because, as the angle of illumination is moved away from the perpendicular to the surface, the area of illumination increases and the flux density per area decreases. Shining a flashlight on a piece of paper at different angles will clearly illustrate this. Illuminance meters use a cosine diffuser that lights and weighs each ambient source's flux density by the cosine of the angle at which it illuminates the surface, therefore providing cosine corrected results.

Luminance

Luminance, the most commonly measured photometric quantity, is required whenever it is necessary to know the apparent brightness of an object or source. Luminance is the luminous flux emitted from a source per unit solid angle per unit area in a given direction and is, therefore, the luminous intensity per unit area. Luminance measurements are constant, regardless of the distance between the source and the detector because, as the intensity measured by a detector decreases with distance, the area of the measuring field increases proportionately.

Usually, a luminance meter has a lens to restrict the field of view of the detector. The human eye is the best-known example of a luminance meter. The unit of luminance is the candela per square meter (cd/m^2) in metric units or the footlambert (fl) in English units. The conversion factor is 1 cd/m^2 = 0.2919 fl. A perfectly diffuse source has what is known as a "lambertian" surface and reflects light in all directions following the cosine law.

Because of the ways in which light propagates through three-dimensional space– spreading out, becoming concentrated, reflecting off shiny or matte surfaces– and because light consists of many different wavelengths, the number of fundamentally different kinds of light measurement is large, and so are the units that represent them.

For example, offices are typically "brightly" illuminated by an array of many recessed fluorescent lights for a combined high luminous flux. A laser pointer has very low luminous flux (it could not illuminate a room) but is blindingly bright in one direction (high luminous intensity in that direction).

Science of Light

Photometers

Photometric measurements are made with instruments called photometers. The devices function by collecting light through some kind of input optics, passing it through a spectral modifying filter and then measuring the light with a photosensitive detector. The filter is carefully trimmed to modify the detector response so that it matches the CIE photopic (or scotopic) function. The detector converts the incoming light energy into an electrical signal, which is then amplified and displayed. Because the filter/detector combination approximates the eye response, the measured electrical signal is a true measure of the light as perceived by a human observer.

Note that traditional photometers, because of their inability to simulate the response of the human eye at the ends of the visible spectrum generate significantly flawed data when testing red, blue, and some styles of white LEDs.

Spectroradiometers

Spectroradiometers are another class of instruments that can be used to perform photometric measurements. A spectroradiometer measures the radiant flux of light at different wavelengths and then mathematically multiplies these spectral values with the CIE-defined photopic values at those wavelengths. By summing these multiplications at small wavelength intervals throughout the visible spectrum, a spectroradiometer accurately calculates photometric quantities. A good spectroradiometer can offer high accuracy for measuring any kind of light source, as there are no filters causing spectral mismatches. These instruments do not require special calibration factors for measuring narrowband LEDs, high-intensity discharge lamps, CRT phosphors, laser projectors, etc.

Perceptual Phenomena

1. Broca-Sulzer Effect
A brief, relatively bright flash of light (optimal flash duration of 0.05 to 0.1 s) is subjectively perceived to be brighter than a longer flash of greater luminance intensity.

2. Brücke-Bartley Effect
Below the critical flicker frequency (i.e., the frequency where a flashing light appears constant), the apparent brightness of a flashing light will gradually increase as the frequency is reduced and reach a point (approximately 8 to 10 Hz) where it appears brighter than an uninterrupted light source of equal luminance.

3. Bloch's Law
For sufficiently short stimulus durations, detection threshold decreases inversely with the duration of the stimulus. (Under about 100 milliseconds stimulus duration it is possible to exchange the amount of light for the duration and maintain a constant effect.)

4. Blondel Rey
The product of flash intensity times its duration is equal to the asymptotic threshold value times the sum of the duration plus a "visual response time constant".

Proper Selection of Visual Signaling Devices

General

Selecting the "best " visual signaling device for any particular application can be a daunting challenge for many users. However, the reason behind this complexity is really quite simple: There is much more to consider than the signaling device itself. Choosing properly begins with understanding the reality that we are dealing with a complex system involving not just the signaling device itself, but light and the way our eyes "see" it as well as the way our brains process and perceive it.

When comparing two different warning lights, the first question typically asked is which one is "brighter"? This can be a complicated question when one is comparing very different light sources such as rotating incandescent lights, xenon strobes and variable flash rate LEDs of different colors.

Let's briefly discuss three different commonly specified "intensity" ratings:

Peak Candela or Peak Candlepower

Peak Candela can be defined as the maximum light intensity generated by a flashing light during its light pulse. It indicates NOTHING ABOUT HOW BRIGHT THE LIGHT APPEARS TO THE HUMAN EYE. Peak candela alone cannot be used to directly compare two warning lights. In addition there is no set multiplication factor for converting peak candela, a unit of luminous intensity, to either candela seconds or effective candela, both units of luminous energy. Edwards discourages the use of peak candela ratings when comparing warning lights.

Candela Seconds or Candlepower Seconds

This quantity is the actual light energy contained in a pulse of light. Candela seconds is used by the Society of Automotive Engineers SAE) and the California Highway Patrol to specify the minimum requirements for light output from a flashing light because flash energy has been shown to be a relatively accurate and fair way of comparing radically different types of lights such as incandescent rotators and xenon strobe lights. Candela seconds is merely a relative measure of how bright a flash of light will appear to a human eye. A light with a higher candela second rating will appear brighter than a light with a lower candela second rating even if the lower rated light has a much higher peak candela rating.

Effective Candela or Effective Candlepower

Effective Candela is based on candela seconds and attempts to equate the brightness of a flashing light source to the brightness of a steady burning source. If a flashing light has a candela effective rating of 100 then it will be visible at the same distance as a 100 candela steady burning source. The National Bureau of Standards, the FAA, and the Illuminating Engineering Society use effective candela in specifying intensities of flashing light source because this rating is the most meaningful when it becomes necessary to predict the visible range of flashing warning lights versus steady burning light sources.

Please note that the actual perceived light output of a visual signal depends on a number of interdependent factors which can vary the light output by a factor of 10 or more for a given amount of energy per flash.

Some of these factors are:

- Viewing Distance
- Viewing Angle
- Flash Rate
- Pulse Width or Duration
- Ambient Light Conditions
- Chromaticity or Color Saturation
- Lens or LED Light Source Color
- Lens Optics
- Physical shape of Light Source and positioning relative to Lens (optical coupling)
- Light Source Efficiency
- Voltage Variation

Linear Perspective

When selecting a visual signal it is also important to keep in mind that as objects are viewed from a greater distance, they appear smaller because their visual angle decreases. The visual angle of an object is the angle subtended at the eye by a triangle with the object at its base. The greater the distance of the object from the eye, the greater the height of this triangle, and the less the visual angle. This follows simply from Euclidean geometry.

You already know this from everyday life: buildings look smaller as they are further away. So do people. If you know approximately how big something is (its physical size) - for example, a person of average height is usually around 5 or 6 feet tall) and you observe that person to be a certain apparent size, you are able to automatically estimate roughly how far away they are.

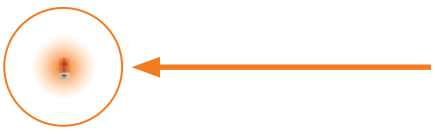
The relationship between distance and apparent height of objects is an inverse-linear function:

$$h = \frac{a}{d}$$

where **h** is the apparent height,
d is the distance of the object, and
a is the actual size of the object.

For example: A 94PLEDMR120A Polaris Beacon has an "Actual Size" of 7.75" high.

One does not have to actually do the math to realize that regardless of how bright this beacon actually is, at a great distance away (1000'), to the viewer, it would appear a small point of light.



Science of Sound

Physical Principles of Sound

The sources of sound are many and nearly infinitely varied. Sound can be described in terms of pitch– from the low rumble of distant thunder to the high-pitched buzzing of a mosquito– and loudness. However, it is important to understand that these are subjective qualities that depend in part on the hearer's sense of hearing. Objective, measurable qualities of sound include frequency and intensity, which are related to pitch and loudness. These terms, as well as others used in discussing sound, are best understood through an examination of the physical principles of sound.

To understand the basics of sound, it is important to first understand some basic related scientific principles.

At its most fundamental level, sound is the mechanical disturbance of a medium, either gas, liquid or solid. All sounds are created by causing a medium to vibrate, be it a bell, horn, siren, whistle or the wings of a cicada. Sound is propagated through mediums by causing adjacent particles to vibrate in a similar fashion– a bell vibrates at a given frequency and thereby displaces adjacent air molecules. This process continues, and eventually air particles in our ears bump into tiny hairs in our inner ear; these hairs send electrical impulses to our brain, which tells us that we are hearing a particular tone.

Put more simply, sound can be described as the transmission of pressure, from an initial source to a listener through the air (or other medium).

The most popular analogy to sound wave propagation is the example of a pebble that is dropped into a pond. The pebble, on its initial collision with the water's surface, produces ripples originating from the "point source" of the rock's entry, spreading in all directions. Due to the mass of the water molecules, energy is expended in making the water ripple. So as the ripples travel further and further away from the rock's point of entry, the ripples lose intensity. Sound behaves in the same manner. As sound travels, it loses energy, sounding "softer". A law known as the inverse-square law dictates the amount of energy lost per unit distance— in a free-field, doubling the distance quarters the sound energy, given a point-source.

Speed of sound in various mediums

Medium	Speed in feet per second	Speed in meters per second
Air at 59°F (15°C)	1,116	340
Aluminum	16,000	5,000
Brick	11,980	3,650
Distilled water at 77°F (25°C)	4,908	1,496
Glass	14,900	4,540
Seawater at 77°F (25°C)	5,023	1,531
Steel	17,100	5,200
Wood (maple)	13,480	4,110

The rate at which variations in air pressure occur is referred to as frequency and is expressed in cycles per second (cps) or Hertz (Hz). The human ear is typically capable of hearing sounds produced in the 20 to 20,000 Hertz range.

The range of sound pressure to which the ear will respond is extremely wide (on the order of several million to one). Because of this, a linear scale to compare different sound pressures becomes as impractical as the use of a yardstick to measure miles. A logarithmic scale, is a far more suitable scale for this type of measurement. Therefore, the decibel, which is a logarithmic unit, is used to measure sound pressure levels. A very important concept to note when using decibels, is that for each additional 3 dBs, the sound pressure doubles! (e.g. a signaling device rated 83 dB at 10 ft. is TWICE as powerful as one rated at 80 dB at 10 ft.).

Loudness is determined by the magnitude of these variations. Greater variations in pressure produce louder sounds. The louder the sound, the more our ear drum moves. The volume (or magnitude) of any particular sound is referred to as its "sound pressure." Under normal atmospheric conditions, the maximum sound pressure level attainable is 194 dB. Sound pressure levels in excess of 120 dB may be painful. Above 150 dB they can result in ear damage. A distance must generally be specified along with the dB rating to fully describe a sound. The sound pressure level changes 6 dB for each halving or doubling of distance. For a change in distance of ten times, the sound pressure level changes 20 dB.

Here are some common sound levels to give you a framework for understanding the different sound levels:

Source in dB	Activity
170-180 dB	stun grenades (hearing tissue death occurs)
140-150 dB	firearms, jet engine, rock concert
120-130 dB	jackhammers, heavy construction tools, loud car stereo
100-110 dB	motorcycles, chainsaws, loud nightclub
90 dB	a hair dryer
85 dB	city traffic
80 dB	alarm clock
60 dB	normal conversation
50 dB	moderate rainfall, the average ambient sound level in one's home.
30-40 dB	a quiet room or library, a whisper, the bedroom while sleeping.

Science of Sound

Direction of Sound

How do we know the direction of an approaching train or warning alarm? To do so, we must examine some characteristics of the human hearing system. “Binaural localization”, or the ability of using our two ears to determine from where a sound source appears, uses three cues:

- **Interaural intensity differences -** middle and high-frequency sounds originating from a human subject's left side will reach the left ear at a higher intensity (volume) level than the right ear, causing a difference in intensities at each ear. The head baffles most of the direct sound energy from reaching the right ear, so that predominantly reflected sounds arrive at the right ear. Because the reflected sound has traveled farther and has lost energy in its journey from source to reflector to ear, the intensity of that sound as perceived by the right ear is reduced, and the brain tells us that the sound arrived from the left side.
- **Interaural arrive-time differences -** while interaural intensity differences are one clue in determining a sound's point-source for mid- to high-frequency sounds, low frequencies, with their large wavelengths, are not as easily discriminated using interaural intensity differences. At lower frequencies, instead, the ear uses time delay-- the short but significant delay between the left and right ears-- to calculate which sound arrived first.
- **Pinnae of the ears -** while interaural intensity and arrive-time differences gives us lateral cues, telling us left-to-right information. The pinnae, however, use the shape of the ears and the strange bumps and ridges to reflect the sound into the ear. These ridges introduce slight time-delays between the direct sound and the reflected sound. The time delay itself is a function of the angle of incidence-- at what angle the sound bounced off the pinnae.

AUDIBLE SIGNALING

Audible Signals designed specifically to alert, warn, communicate and protect provide a universally understood language that transcends national borders. Audible signaling devices typically work by presenting loud, distinctive tones, sequences of tones or specific voice messages that immediately attract our attention and focus our thinking. Optimally, audible signal sound output (in dB) will be greater than 75 dBs and at least 15dBs above ambient noise levels in the surrounding area.

How effective an audible signal is dependent on a variety of interdependent factors;

- Sound Output Level (in dB)
- Frequency (in Hz)
- Distance from the signaling device
- Ambient Noise Level
- Environmental Influences (i.e. wind speed and direction, humidity level, precipitation, etc.)

TYPICAL DB LEVELS WHEN SELECTING AUDIBLE SIGNALS

In specifying a signaling device, all of the above characteristics should be considered along with as many factors concerning the application as can be gathered. Selecting the proper device for each signaling application need not be difficult if the following points are observed.

1. **Signal Function.** Basically, the types of functions to which signals can be applied are:
   - General alarm or emergency
   - Start and dismissal
   - Paging or coding
   - Localized danger
   - Indication

   The first step in selecting a signal is to carefully define this function. Is the signal to be a warning, a call, or an instruction? Will it be used to protect life or property? How much time will be available to take action? Obviously, the more critical the application, the more startling the signal generated should be. A horn is generally the most startling signal. Its rasping tone commands immediate attention. A single stroke bell can be used for paging applications where danger is not at hand. A small buzzer may serve to notify a machine operator that a particular operation is completed. Audible signals with pulse and alternating tones are generally more effective than those with a linear tone.
2. **Uniform Sound Distribution:** Better signal distribution can usually be achieved by carefully positioning a number of smaller signals throughout a given area than by centrally locating a single large unit.

3. **Ambient Sound Conditions:** The frequency of the signaling device selected should be as different from the background noise as possible. The signal should override this noise by a minimum of six decibels. Usually, the noisier the area, the louder the signal required and the greater the number of signaling devices required. Over the years, horns and bells have been the most popular signals because their varied tones can be heard over most ambient conditions. See the table on page 27 for typical dB levels associated with various activities.

4. **Size of Area to be Covered:** The larger the area, the louder the signal required or the greater the number of units required. As a rule of thumb, sound output drops by approximately 6 decibels each time the distance between the sound source and the human ear is doubled. For example:

Source in dB	Feet from Source
116 dB	10
110 dB	20
104 dB	40
98 dB	80
92 dB	160

If a signal is rated at 116 dB at 10 feet, then a signal twice as loud would be rated at 122 dB at 10 feet. In an application where the ambient noise level was 92 dB, the signaling device in the above example would adequately cover a distance of approximately 80 feet. Better coverage is frequently obtained by the use of several signals of lower dB rating than by using one very loud signal, (providing the signals can be positioned to advantage).

5. **Mounting Considerations:** The surface that the signal is mounted to can markedly affect the signal's performance. A horn, for example, should be rigidly mounted to a sturdy surface so that all of its energy is directed into the sound output and not absorbed by the wall. A buzzer, however, can sound much louder if mounted on a resonant surface because it will act as a "sound board" for the buzzer.

Science of Sound

The Nomograph pictured below can be used to calculate dB over distance.

Clear Choice

"The machines my company builds are recognized around the world as the very best.

So the signaling devices we place on those machines MUST reflect that same level of quality.

That's why we switched to 200 Class Clearview™ StackLights from Edwards.

You can actually feel the superior quality of these StackLights. Guess you can say they're a 'clear winner'."

Product Index

With 140 years of invention and the latest LED technology, Edwards offers the most versatile beacon solutions anywhere, with a dazzling convergence of form and function. Whether it's engineering quality, easy installation, low maintenance or high visual output, with Edwards' Visual Signals, you'll always see the difference.

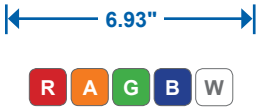
Multi-Mode LED
825 Class

NEW



R A G B W

The 825 Class Night Star Solar LED beacon is a self-contained, high-performance, low-maintenance and easy-to-install solar-powered light source suitable for a number of applications including obstruction lighting, industrial environments, wayfinding lighting and many others. All of the components are incorporated within a compact, stand-alone unit. The 825 also features a replaceable and recyclable battery pack that extends the service life beyond five years. The base and lens are made from a UV resistant, polycarbonate/polysilixane co-polymer with double O-ring sealing and a waterproof vent. The unit is available in blue, red, amber, green and white.

The 825 Class Night Star Solar LED beacon is the first solar product to incorporate intelligent deployment location settings that allow the 825 to be tuned to its location, protecting it against improper configuration. A microprocessor Energy Management System (EMS) monitors and adapts the brightness to environmental conditions for consistent operation and long life under the toughest conditions. These units are designed to operate from dusk to dawn and re-charge during daylight hours.

Easy configuration and programming options include an on-board user interface and Device Manager software through USB connection. The 825 is also available in a version that features an optional external on/off switch.

Features and Specifications

- Multi-mode (flashing or steady-on)
- LED light source
- Dusk-to-dawn operation
- Over 250 flash patterns
- Intuitive on-board user interface
- Replaceable and recyclable battery pack
- Intelligent deployment location settings to protect against improper configuration
- Optional external on/off switch
- IP68 rated
- Enclosure Class 6P
- Operating temperature range: -45ºF to 124ºF (-43ºC to 51ºC)

Solar Beacons
Flashing LED
805 Class

NEW

Coming Soon

The 805 Class Solar LED Beacon is a self contained, economic and portable solar-powered LED light source. The 805 Class is powered by a nickel metal hydride (Ni-MH) battery, which allows the unit to operate up to 60 hours on a full charge. A full charge time is eight hours on a brightly lit sunny day. It comes with three super-bright LEDs that have a life expectancy of up to 70,000 hours. Each unit features an auto/off switch that allows the user to turn off the unit when not in use. When the switch is in the auto position, the unit will automatically turn on at dusk and off at dawn to preserve battery life. The lens and housing are constructed of a UV resistant polycarbonate.

Each unit comes with a mount that can be used for either surface or wall mounting. If used without the mounting base, the unit can be mounted on top of a typical traffic cone or any other similar type object.

Applications include obstruction marking, barricade marking, temporary construction zone marking or anywhere where electricity is not readily or easily available.

Features and Specifications

- LED light source
- Solar powered
- Auto/Off switch
- Flashing LED
- Flash rate 60 fpm (+/- 20)
- Ni-MH battery
- UV resistant polycarbonate lens and housing
- IP65 rated
- Operating temperature range: -4ºF to 140ºF (-20ºC to 60ºC)

StackLight™
200 Class
70mm Clearview™

NEW

The Edwards 200 Class 70mm ClearView™ LED StackLight is a versatile multi-mode signaling device that may contain up to five light modules, or four light modules with one sounder module in a single, integrated stack. The sounder module has been designed so that it is always in the top position.

The lens modules are clear, and are available with red, amber, blue, green and white LEDs. Options for steady-on or multi-mode are available. The lenses are made from a self-extinguishing polycarbonate material and are scratch and impact resistant.

Features and Specifications

- Steady-on or multi-mode (flashing or steady-on)
- LED light source
- Clear lens
- Interlocking system for quick assembly
- Available in gray or black
- Two optional NEMA Type 3R, IP54 rated sounders available:
  - Piezoelectric: 6 selectable tones
  - Magnetodynamic: 32 selectable tones
- Threaded footing must be ordered separately (not included with 270BC*)
- Additional mounting options available
- NEMA Type 4X rated
- IP66 rated base and light modules
- Operating temperature range: -22°F to 140°F (-30°C to 60°C)

StackLight™
200 Class
70mm

NEW

Edwards 200 Class 70mm StackLight is a versatile signaling device that may contain up to five light modules, or four light modules with one sounder module in a single, integrated stack. The sounder module has been designed so that it is always in the top position.

The lens modules are available with LED, Incandescent or Xenon Strobe light sources. Options for steady-on, flashing or multi-mode are available. The lenses are made from a self-extinguishing polycarbonate material and are scratch and impact resistant.

Features and Specifications

- LED, Incandescent and Xenon Strobe light source
- Steady-on, flashing or multi-mode (flashing or steady-on)
- Interlocking system for quick assembly
- Available in gray or black
- Two optional NEMA Type 3R, IP54 rated sounders available:
  - Piezoelectric: 6 user selectable tones
  - Magnetodynamic: 32 user selectable tones
- Threaded footing must be ordered separately (not included with 270BC*)
- Additional mounting options available
- NEMA Type 4X rated
- IP66 rated base and light modules
- Operating temperature range: -22F° to 140°F (-30°C to 60°C)

2.95" R A Y G B W

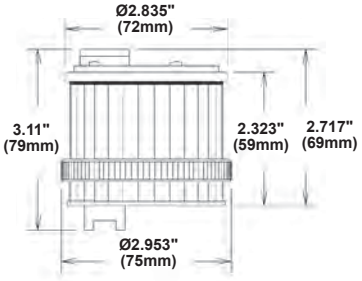
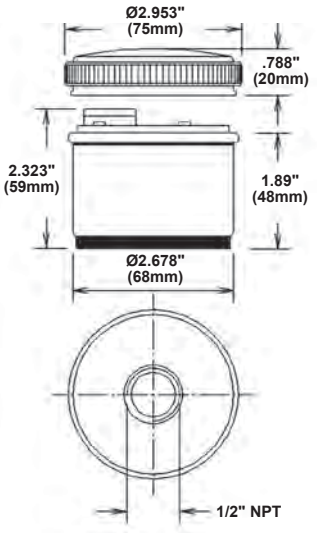
Light Module



Base and Cover



StackLight™
200 Class
48mm

NEW

Edwards 200 Class 48mm StackLight is a versatile signaling device that may contain up to five light modules, or four light modules with one sounder module in a single, integrated stack. The sounder module has been designed so that it is always in the top position.

The lens modules are available with LED light sources as a multi-mode device. The lenses are made from a self-extinguishing polycarbonate material and are scratch and impact resistant.

Features and Specifications

- Multi-mode (flashing or steady-on)
- LED light source
- dB rating: 77dB @ 1 meter/67dB @ 10ft.
- Interlocking system for quick assembly
- Available in gray or black
- Additional mounting options available
- One optional NEMA Type 3R, IP54 rated sounder available:
  - Magnetodynamic: one single tone
- NEMA Type 4X rated
- IP66 rated base and light modules
- Operating temperature range: -22F° to 122°F (-30°C to 50°C)

StackLight™
200 Class
36mm

NEW

Edwards 200 Class 36mm StackLight is a versatile signaling device that may contain up to six light modules, or five light modules with one sounder module in a single, integrated stack. The sounder module has been designed so that it is always in the top position.

The lens modules are available as steady-on, LED light sources. The lenses are made from a self-extinguishing polycarbonate material and are scratch and impact resistant.

Features and Specifications

- LED light source
- Steady-on
- dB rating: 72dB @ 1 meter/62dB @ 10ft.
- Interlocking system for quick assembly
- Available in gray or black
- One optional IP54 rated sounder available:
  - Piezoelectric: one single tone
- Additional mounting options available
- NEMA Type 3R rated
- IP65 rated base and light modules
- Operating temperature range: -22F° to 122°F (-30°C to 50°C)

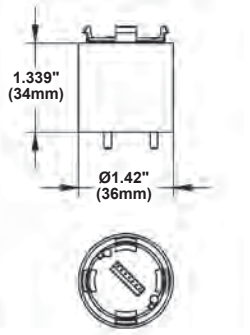
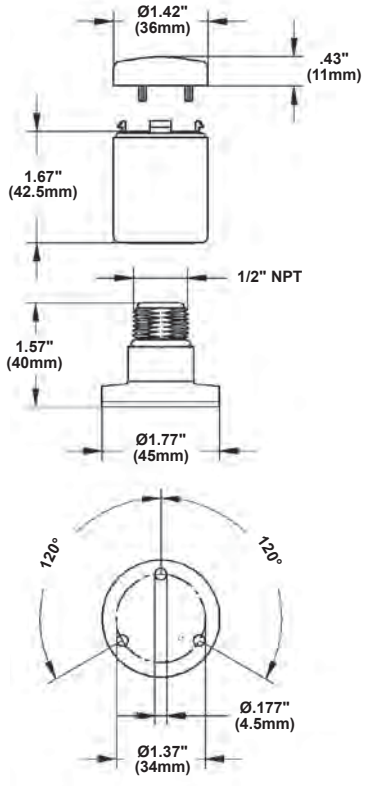
LED Module



Base and Cover



StackLight™
102 Series

Edwards 102 Series StackLight is a unique audible-visual signaling device that may contain up to five light modules and a pulsating horn in a single, integrated stack. Two optional sounder modules are also available. The Triliptical diffusion optic lens allows viewing from close up while still projecting the light through use of a built-in projection ring.

The lens modules are available with LED, Incandescent, Halogen or Strobe light sources. Options for steady-on or flashing are available. The 102 Series offers a shorter base for panel or conduit mounting as well as a taller base, designed for use with a sounder module.

Features and Specifications

- LED, Incandescent, Halogen and Strobe light source
- Steady-on or flashing
- Six lens colors available
- Two optional IP54 sounders available:
  - Single tone module
  - Multi-tone module, eight available tones
- Sounder modules provide 89dB @ 1 meter/ 79dB @ 10ft.
- Base and light modules are IP65 rated
- Suitable for indoor and outdoor applications
- Option for panel or conduit mounting
- NEMA Type 3R and 4X enclosure
- Optional mounting not included

Technical Information

How to order Triliptical StackLight

To build a StackLight, one base unit and the required number of lens modules and light sources need to be ordered. For example, to build a 120V AC, two high, steady incandescent StackLight on a direct mount base, order (one) 102DMBS-N5, (two) 102LM (in required colors), and (two) 102LS-SIN-N5.

Base Unit

102 + — —

Cat. No.	Options	Voltage
102	TBS = Use with optional tone module. Wiring terminals, 3/4" (19mm) conduit mount*	G1 = 24V DC N5 = 120V AC
	DMBS = Mini base for direct panel mount*	
	PMBS = Mini base for 3/4" (19mm) conduit mount*	

*Cap included

Tone Module

102 + — —

Cat. No.	Options	Voltage
102	SIGST = Optional Single-Tone Module	G1 = 24V DC N5 = 120V AC
	SIGMT = Optional Multi-Tone Module	

Lens Modules

102 + LM —

Cat. No.	Options	Lens Color
102	LM = Lens module	A = Amber B = Blue C = Clear G = Green R = Red Y = Yellow

Light Sources

102 + LS — —

Cat. No.	Light	Type	Color (LED Only)	Voltage
102	LS = Light Source	SINH = Steady-On halogen	A = Amber B = Blue G = Green R = Red W = White	G1 = 24V DC N5 = 120V AC
		FINH = Flashing halogen		
		SIN = Steady-On standard incandescent		
		FIN = Flashing standard incandescent		
		ST = Strobe		
		SLED = Steady-On LED		
		FLED = Flashing LED		

StackLight™
101 Series

Edwards 101 Series StackLight is a versatile signaling device that may contain up to five light modules and a pulsating horn in a single, integrated stack. The 85dB pulsating horn can be operated as a sixth independent signal or in conjunction with any one of the five light modules available.

The lens modules are available with LED, Incandescent or Strobe light sources. Options for steady-on, flashing or multi-mode are available. Ideal for heavy-duty use in locations where visibility over longer distances is required.

Features and Specifications

- LED, Incandescent, Halogen and Strobe light source
- Steady-on, flashing or multi-mode (flashing or steady-on)
- Base unit includes a pulsating horn, 95dB at 1 meter/85dB at 10 feet
- Option for panel or conduit mounting
- Can be mounted for use in indoor or outdoor applications (lens facing up for outdoor use).
- Designed for 4" octagonal box mounting

125XBRi Class

NEW

Edwards 125XBRi Series XTRA-BRITE™ LED multi-status indicator is a UL and cUL listed, multi-color visual signaling device. It features a corrosion resistant NEMA Type 4X enclosure and can be panel or conduit mounted. The base is manufactured from a 33% glass filled nylon, providing high resistance to heat and high chemical resistivity. The lens is made of shatter resistant polycarbonate.

Features and Specifications

- LED light source
- High-impact polycarbonate lens
- Gray or black glass filled nylon base
- XTRA-SAFE™ Technology[1] enables status indication for those who are color blind
- Dip switch settings for use with or without external control
- Flash rates
  - – Red 240 fpm
  - – Amber 120 fpm
  - – Green/Blue 65 fpm
- NEMA Type 4X enclosure
- Suitable for indoor and outdoor applications
- Option for panel or conduit mounting
- Operating temperature range: -31F° to 150°F (-35°C to 66°C)

105XBRi Series

NEW

Edwards 105XBRi Series XTRA-BRITE™ LED multi-status indicator is a UL and cUL listed, multicolor visual signaling device. It features a corrosion resistant NEMA Type 4X enclosure, listed for Marine use, and can be wall, surface or pipe mounted. The base is manufactured from from glass-reinforced thermoplastic polyester resin, providing high resistance to heat and high chemical resistivity. The double Fresnel lens is made of shatter resistant polycarbonate.

Features and Specifications

- LED light source
- Screw on, high-impact polycarbonate lens
- Gray Rynite® (PET) base
- XTRA-SAFE™ Technology[1] enables status indication for those who are color blind
- Dip switch settings for use with or without external control
- Flash rates
  - – Red 240 fpm
  - – Amber 120 fpm
  - – Green/Blue 65 fpm
- NEMA Type 4X enclosure
- Class I, Div. 2, Groups A, B, C and D; Class II, Div 2, Groups F and G; Class III
- Suitable for indoor and outdoor applications
- Option for wall, surface or pipe mounting
- Optional mounting not included
- Operating temperature range: -31F° to 150°F (-35°C to 66°C)

Multi-Status LED
108 Series

Edwards 108I Series Chameleon™ LED multi-status indicator is a UL listed and IP65 rated multicolor device designed to function as either a steady-on or flashing visual signal. The 108I Series contains three different colored LED signals in one housing, with the option to add an additional lens module and light source – Strobe, Halogen, Incandescent or LED – for a fourth signal. It can be panel or conduit mounted.

The 108I Series features an optional multi-tone base module with eight available tones that can be operated as an additional signal or used in conjunction with any of the visual signals.

Features and Specifications

- 3 LED visual signals in one compact housing
- Option to add an additional module for a fourth light using one of the 102LM lens modules and the 102LS light sources
- 89dB @ 1m/79dB @ 10ft.
- Option to add multi-tone base module
- Option for panel or conduit mounting
- Suitable for indoor and outdoor applications
- NEMA Type 3R and Type 4X
- IP65 rated

Beacons
Steady-On LED
125 Class

NEW

Edwards 125 Class standard steady-on LED beacons are NEMA Type 4X signaling devices, designed for indoor or outdoor applications where a continuous (steady-on) light source is required. Base material is gray or black, manufactured from a 33% glass filled nylon, providing a high resistance to heat and chemicals. The lens is made of shatter-resistant polycarbonate.

Features and Specifications

- LED light source
- Shatter-resistant polycarbonate lens
- Gray or black glass filled nylon base
- Suitable for use in indoor or outdoor applications
- NEMA Type 4X enclosure
- Option for panel or conduit mounting
- Operating temperature range: -31°F to 150°F (-35°C to 66°C)

Beacons
Steady-On LED or Incandescent
120 Class

NEW
Coming Soon

The 120 Class multi-light source beacons are steady-on and require either an LED bulb or 5W incandescent bulb (sold separately).

The lenses are made from a self-extinguishing polycarbonate material, and are offered in amber, blue, green, red and clear.

The 120 Class are UL listed and carry a NEMA Type 4X and IP65 environmental rating.

Features and Specifications

- LED or Incandescent light source
- Five lens colors
- NEMA Type 4X and IP65 rated enclosure
- Multiple mounting options
- Operating temperature range: -22ºF to 122ºF (-30ºC to 50ºC)

Beacons
Steady-On Halogen
105 Series

Edwards 105 Series steady-on Halogen beacons are NEMA Type 4X signaling devices, suitable for indoor or outdoor applications where a continuous (steady-on) light source is required. Base material is gray, manufactured from glass-reinforced thermoplastic polyester resin and features brass hardware. The double fresnel lens is made of shatter-resistant polycarbonate.

Features and Specifications

- Halogen light source
- Shatter-resistant double fresnel polycarbonate lens
- Gray Rynite® (PET) base with brass hardware
- Suitable for use in indoor, outdoor and marine applications
- NEMA Type 4X and Marine rated
- Option for panel, conduit or wall mounting
- Class 1, Div 2, Groups A, B, C and D; Class II, Div 2, Groups F and G; Class III

Beacons
Steady-On Halogen or Incandescent
48 Series

Edwards Signaling 48 Series mid-sized, Halogen and Incandescent steady-on beacons are economical, NEMA Type 4X rated devices suitable for indoor or outdoor applications where a continuous (steady-on) light source is required. Base material is gray ABS. Unique snap-on, high-impact polycarbonate double fresnel lens is optically engineered to maximize light distribution and viewing distance.

Features and Specifications

- Halogen or Incandescent light source
- Quick snap-on, high-impact polycarbonate lens
- Gray ABS base
- Suitable for use in indoor and outdoor applications
- NEMA Type 4X enclosure
- Option for panel or conduit mounting
- Operating temperature range: -31°F to 150°F (-35°C to 66°C)

Beacons
Steady-On Halogen
50 Series

Edwards 50SIN Series steady-on Halogen beacons are signaling devices, designed for indoor or outdoor applications where a continuous (steady-on) light source is required. The base is cast aluminum and can function as a junction box. The double fresnel lens is made of shatter-resistant polycarbonate and optically engineered to maximize light distribution and viewing distance.

Features and Specifications

- Halogen light source
- Shatter-resistant double fresnel polycarbonate lens
- Cast aluminum base can function as a junction box
- Suitable for use in indoor and outdoor applications
- Designed for 4" octagonal box
- Option for panel or conduit mounting
- Operating temperature range: -31°F to 150°F (-35°C to 66°C)

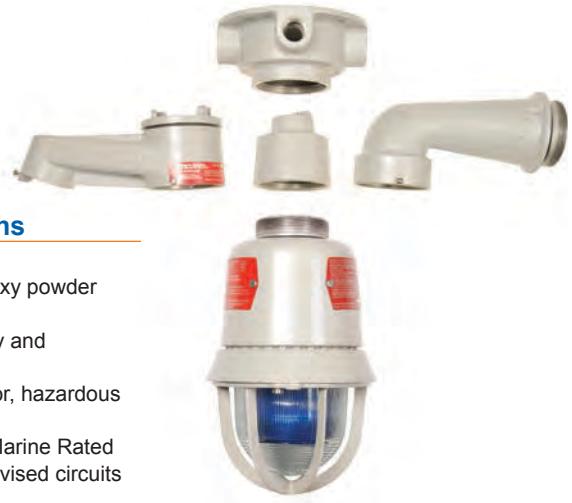
Beacons: Explosionproof
Steady-On Halogen
116 Series



Edwards 116 Series steady-on beacons are explosionproof signaling devices, suitable for hazardous indoor or outdoor applications. The housing is cast aluminum with a corrosion-resistant epoxy powder coat, and includes a dome guard. The fluted, high-impact glass dome provides even light distribution.

Features and Specifications

- Halogen light source
- Cast aluminum housing with epoxy powder coat and dome guard
- Quick connect for easy assembly and installation
- Suitable for use in indoor, outdoor, hazardous and marine applications
- NEMA Type 3R and Type 4X – Marine Rated
- Diode polarized for use on supervised circuits
- Cast aluminum housing
- Pendant, ceiling, bracket or stanchion mounting options (ordered separately)
- Explosionproof: Class I, Div 2, Groups A and B; Class I, Div 1 and 2, Groups C and D; Class II and III, Div 1, Groups E, F and G; Class II and III, Div 2, Group G

NOTE: Mounting options not included (ordered separately)

Beacons: Explosionproof
Steady-On Halogen
116 Series

Edwards 116 Series steady-on beacons are explosionproof signaling devices, suitable for hazardous indoor or outdoor applications. The housing is cast aluminum with a corrosion-resistant epoxy powder coat, and includes a dome guard. The fluted, high-impact glass dome provides even light distribution.

Features and Specifications

- Halogen light source
- Cast aluminum housing with epoxy powder coat and dome guard
- Quick connect for easy assembly and installation
- Suitable for use in indoor, outdoor, hazardous and marine applications
- NEMA Type 3R and Type 4X – Marine Rated
- Cast aluminum housing
- Pendant, ceiling, bracket or stanchion mounting options (ordered separately)
- Explosionproof: Class I, Div 2, Groups A and B; Class I, Div 1 and 2, Groups C and D; Class II and III, Div 1, Groups E, F and G; Class II and III, Div 2, Group G

R A M G B C

NOTE: Mounting options not included (ordered separately)

Beacons
Steady-On LED
Klaxon Flashguard Series

Flashguard Steady-on LED beacons are visual indicators suitable for use in indoor and outdoor applications.

All Flashguard beacons are fitted with a diffuser for greater visibility and spread of light.

They include a terminal block and a 27mm deep base supplied with a seal and grommet.

An upgrade kit (with cable connector) is available to upgrade the product from IP65 rating to IP67.

Features and Specifications

- LED light source
- Compact, ultra modern sleek appearance
- IP65 rated; IP67 rated (with upgrade kit)
- White, high quality polycarbonate housing
- Suitable for use in indoor and outdoor applications
- Vandal-resistant safety locking mechanism
- Operating temperature range: -4°F to 158°F (-20°C to +70°C)

Beacons
Multi-Mode LED
Polaris Class - 94 Series

NEW

Edwards Polaris™ Class 94 Series LED beacons are NEMA Type 4X and IP66 rated visual signals suitable for use in indoor and outdoor applications. The units are field configurable with up to seven flashing patterns, including steady-on, utilizing a “Hidden In Plain Sight” (HIPS) switch.

The inner, double fresnel lens is made of a high grade polycarbonate and is designed to magnify the ultra-bright LED’s inside. A clear, outer, impact-resistant polycarbonate dome offers additional protection against accidental impacts with machinery or falling objects. It also acts as a protective and simple to clean “dust and residue” cover.

The 94 Series beacons are designed to be mounted on 3/4 inch NPT conduit (indoor or outdoor). For outdoor installation and to maintain the NEMA and IP ratings, the beacon must be mounted with the dome facing directly up. When installing the beacon indoors in dry environments, it can be mounted in any position. The 94 Series housing has a cast base that can function as a junction box.

The Polaris Class is designed for any industrial or commercial applications that require the longevity of an LED and the brightness of a xenon strobe. These units are very effective in high noise areas where ear protection is worn or audible signals may not be heard.

Features and Specifications

- Multi-mode LED (steady-on plus seven flash patterns)
- LED light source
- Six lens colors
- 3/4" (19mm) NPT threaded conduit
- Hidden in Plain Sight (HIPS) switch
- High level of immunity to shock and vibration
- Black or gray base option
- Cast base can function as junction box
- NEMA Type 4X and IP66 rated
- Operating temperature range: -31ºF to 150.8ºF (-35ºC to 66ºC)

Beacons
Multi-Mode LED
125XBR Class

NEW

Edwards 125XBR Class XTRA-BRITE™ LED beacons are multi-mode signaling devices, available in two versions, steady-on/flashing (125XBRM) and steady-on/lightburst (125XBRZ). Both versions feature a corrosion resistant NEMA Type 4X enclosure and can be panel or conduit mounted. The base is manufactured from a 33% glass filled nylon, providing high resistance to heat and high chemical resistivity. The lens is made of shatter resistant polycarbonate.

Features and Specifications

- Multi-mode LED
  125XBRM – steady-on/flashing (65 fpm)
  125XBRZ – steady-on/lightburst (420 fpm)
- LED light source
- Gray or black glass filled nylon base
- Protective wire guard available
- Option for panel or conduit mounting
- NEMA Type 4X enclosure
- Operating temperature range: -31°F to 150°F (-35°C to 66°C)

Multi-Mode LED
105XBR Series

NEW

3.75"

R A G B W

Edwards 105XBR Series XTRA-BRITE™ LED beacons are heavy-duty, multi-mode signaling devices, available in steady-on with the built-in option of switching to flashing mode via dipswitch. These signals are designed for use in industrial applications or applications where a NEMA Type 4X enclosure is required. The base is manufactured from glass-reinforced thermoplastic polyester resin and the double fresnel lens is made of shatter resistant polycarbonate. The unit can be panel, conduit or wall mounted.

Features and Specifications

- Multi-mode (flashing or steady-on)
- LED light source
- Flash rate 65 fpm
- Gray Rynite® (PET) base
- Option for panel, conduit or wall mounting
- NEMA Type 4X enclosure
- UL Listed for Marine applications
- Class I, Div 2, Groups A, B, C and D; Class II, Div 2, Groups F and G; Class III
- Operating temperature range: -31F° to 150°F (-35°C to 66°C)

Multi-Mode LED
48XBR Series

NEW

Edwards 48XBR Series XTRA-BRITE™ LED beacons are multi-mode signaling devices, available in steady-on with the built-in option of switching to flashing mode via dipswitch. These signals are suitable for use in indoor and outdoor applications or applications where a NEMA Type 4X enclosure is required. The base is manufactured from a polycarbonate/ABS blend, and the lens is made of shatter resistant polycarbonate. The unit can be panel or conduit mounted.

Features and Specifications

- Multi-mode (flashing or steady-on)
- LED light source
- Flash rate 65 fpm
- Available in gray
- Suitable for use in indoor and outdoor applications
- Option for panel or conduit mounting
- NEMA Type 4X enclosure
- Operating temperature range: -31°F to 150°F (-35°C to 66°C)

Beacons
Multi-Mode LED
117 Class

NEW
Coming Soon

Edwards 117 Class LED beacons are UL and cUL listed multi-mode visual signals designed for indoor and outdoor applications. They carry NEMA Type 4X and IP66 environmental ratings when surface mounted with the supplied gasket. The units are available in 120VAC or 12-48VDC and are field configurable with six flash patterns (plus steady-on) utilizing an internal board mounted push button on the DC models and an internal pattern select jumper on the AC models.

The high grade polycarbonate lens is shatter resistant and quickly threads on the base making it quick and simple to access the interior of the light to change the flash pattern as required. The base is manufactured from a 33% glass filled nylon, providing high resistance to heat and high chemical resistivity.

The 117 class LED beacon is designed for industrial and commercial applications that require the longevity of an LED combined with the brightness of a xenon strobe. These high quality units are very effective in high noise areas where ear protection is worn or audible signals may not be heard.

Features and Specifications

- Multi-mode LED (steady-on plus seven flash patterns)
- LED light source
- Suitable for use in indoor and outdoor applications
- Five lens colors
- Surface or conduit mounting
- 3/4" (19mm) NPT threaded conduit
- NEMA Type 4X and IP66 (when surface mounted with supplied gasket)

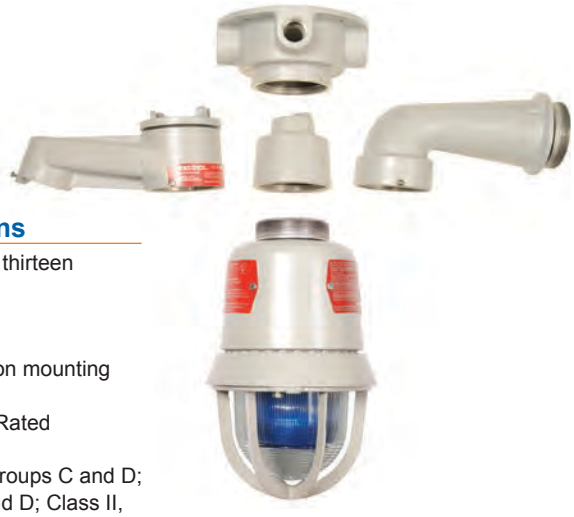
Beacons: Explosionproof
Multi-Mode LED
116 Series

NEW



The 116 Series LED Beacon is suitable for use in explosionproof and hazardous location applications such as oil platforms, refineries, granaries and chemical plants. UL and cUL listed for use in Class 1, Division 1 and 2 applications, this beacon is designed for areas requiring high visibility and notification as well as low maintenance. The long life LEDs reduce maintenance requirements by up to 90% when compared to a Xenon strobe tube. The LED light emits a 360-degree beam of light with 13 user selectable flash patterns in addition to a steady-on mode.

These beacons are UL and cUL listed for outdoor use as NEMA Type 3R, 4X, and Marine Rated enclosures. Mounting options are available (ordered separately) for ceiling, wall, pendant and stanchion mounts. The unit is supplied with a guard installed over the clear dome for additional protection against impact.

Features and Specifications

- Multi-mode LED (steady-on plus thirteen flash patterns)
- LED light source
- Five lens colors
- Ceiling, pendant, wall or stanchion mounting options (ordered separately)
- NEMA Type 3R, 4X and Marine Rated enclosures
- Explosionproof: Class I, Div 1, Groups C and D; Class I, Div 2, Groups A, B, C and D; Class II, Div 1 and 2, Groups E, F and G;Class III, Div 1 and 2

NOTE: Mounting options not included (ordered separately)

107XBR Series

NEW

The 107XBR hazardous location XTRA-BRITE™ LED visual signals are NEMA Type 3R and Type 4 heavy-duty visual signals suitable for use in indoor or outdoor applications. The units are available in 24V DC or 120V AC and are field configurable for steady-on or flashing (65 fpm). The inner, double fresnel lens is made of a high grade polycarbonate and is designed to magnify the super-bright LEDs inside. A clear, outer, impact-resistant glass globe also covers the lens and an optional dome guard fits over the glass dome to protect it against accidental impacts with machinery or falling objects.

The 107XBR has three different mounting configurations including the pendant mount, bracket mount and ceiling mount and can be mounted on 3/4" NPT threaded conduit.

Features and Specifications

- Multi-mode (flashing or steady-on)
- LED XTRA-BRITE™ light source
- Flash rate 65 fpm
- Five lens colors
- 3/4" NPT threaded conduit
- High level of immunity to shock and vibration
- Three mounting options: pendant, bracket or ceiling
- UL Listed for Class I, Div 2, Groups A, B, C, D; Class II, Div 1, Groups E, F, G; Class II, Div 2, Groups F and G; Class III, Div 1

Beacons
Flashing LED
125 Class

NEW

Edwards 125 Class standard flashing LED beacons are NEMA Type 4X signaling devices, suitable for use in indoor or outdoor applications where an intermittent (flashing) light source is required. Base material is gray or black, manufactured from a 33% glass filled nylon, providing a high resistance to heat and chemicals. The lens is made of shatter-resistant polycarbonate.

Features and Specifications

- LED light source
- Flash rate 65 fpm
- Shatter-resistant polycarbonate lens
- Gray or black glass filled nylon base
- Option for panel or conduit mounting
- Suitable for indoor or outdoor applications
- For outdoor use, lens should face up
- NEMA Type 4X enclosure
- Operating temperature range: -31°F to 150°F (-35°C to 66°C)

Beacons
Flashing LED or Incandescent
120 Class

NEW
Coming Soon

The 120 Class multi-light source beacons are flashing and require either an LED bulb or 5W incandescent bulb (sold separately).

The lenses are made from a self-extinguishing polycarbonate material, and are offered in amber, blue, green, red and clear.

The 120 Class are UL listed and carry a NEMA Type 4X and IP65 environmental rating.

Features and Specifications

- LED or Incandescent light source (not included)
- AC or DC models
- Five lens colors
- NEMA Type 4X and IP65 rated enclosure
- Multiple mounting options
- Operating temperature range: -22ºF to 122ºF (-30ºC to 50ºC)

Beacons
Flashing Halogen
105 Series

Edwards 105 Series flashing Halogen beacons are NEMA Type 4X signaling devices, suitable for use in indoor or outdoor applications where an intermittent (flashing) light source is required. Base material is gray, manufactured from glass-reinforced thermoplastic polyester resin and features brass hardware. The double fresnel lens is made of shatter-resistant polycarbonate.

Features and Specifications

- Halogen light source
- Flash rate 65 fpm
- Shatter-resistant double fresnel polycarbonate lens
- Gray Rynite® (PET) base with brass hardware
- Suitable for indoor, outdoor and marine applications
- For outdoor use, lens should face up
- NEMA Type 4X enclosure
- Class I, Div 2, Groups A, B, C and D; Class II, Div 2, Groups F and G; Class III
- Option for panel or conduit mounting

Beacons
Flashing Halogen or Incandescent
48 Series

4.28"

R A M G B C

Edwards Signaling 48 Series mid-sized, Halogen and Incandescent flashing beacons are economical, NEMA Type 4X rated devices suitable for use in indoor or outdoor applications where a flashing light source is required. Base material is gray ABS. Unique snap-on, high-impact polycarbonate double fresnel lens is optically engineered to maximize light distribution and viewing distance.

Features and Specifications

- Halogen or Incandescent light source
- Flash rate 65 fpm
- Quick snap-on, high-impact polycarbonate lens
- Gray ABS base
- Suitable for use in indoor and outdoor applications
- For outdoor use, lens should face up
- Option for panel or conduit mounting
- NEMA Type 4X enclosure
- Operating temperature range: -31°F to 150°F (-35°C to 66°C)

Beacons
Flashing Halogen
49 Series

Edwards 49 Series flashing Halogen beacons are signaling devices, suitable for use in indoor or outdoor applications where an intermittent (flashing) light source is required. They feature a protective polycarbonate dome and a cast metal base that can be used as a junction box. The double fresnel lens is made of shatter-resistant polycarbonate.

Features and Specifications

- Halogen light source
- Flash rate 65 fpm
- Shatter-resistant double fresnel polycarbonate lens
- Protective polycarbonate dome
- Cast metal base
- Suitable for use in indoor and outdoor applications
- For outdoor use, lens should face up
- 1/2" NPT conduit or surface mounting
- Designed for 4" octagonal box mounting
- Option for panel, conduit or wall mounting
- Operating temperature range: -31°F to 150°F (-35°C to 66°C)

Beacons
Flashing LED
Klaxon Syrex Series

The Syrex IS beacon is an intrinsically safe visual beacon suitable for use in hazardous area applications.

With a low current consumption, the Syrex IS beacon is ideal for both warning and process control applications.

The Syrex IS beacon must be used with a galvanic isolator specified by the system certificates.

Features and Specifications

- LED light source
- Rated for Category 1
- ATEX approved
- Ⓔx II 1G EEx ia IIC T4
- ABS flame retardant UL94V0 and 5VA housing
- IP65 rated
- Flash rate 2 Hz or 1 Hz (double flash)
- Operating temperature range: -40ºF to 140ºF (-40ºC to 60ºC)

Beacons
Flashing LED
Klaxon Sonos Series

R A

The Sonos Series LED beacon features connections made to the base during the initial wiring phase which results in faster and more reliable installation. The beacon head 'twists and clicks' into the base on commissioning, avoiding the wiring and connection problems associated with traditional alarm devices.

Deep base units have an IP65 rating and are suitable for use in indoor and outdoor applications. The Sonos Beacon utilizes a full faced, translucent case which provides a large lens area and a greater spread of light.

Sonos Beacon units have a deep or shallow red color base as standard and are available with a red or amber lens.

Features and Specifications

- LED light source
- High efficiency LED beacon consumes less than 5mA
- IP65 rated (deep base); IP21 rated (shallow base)
- Flame resistant polycarbonate construction
- Operating temperature range: -13°F to 158°F (-25°C to 70°C)

Beacons
Flashing LED
Klaxon Flashguard Series

Flashguard Flashing LED beacons are visual indicators suitable for use in indoor and outdoor applications.

All Flashguard beacons are fitted with a diffuser for greater visibility and spread of light.

They include a terminal block and a 27mm deep base supplied with a seal and grommet.

An upgrade kit (with cable connector) is available to upgrade the product from IP65 rating to IP67.

Features and Specifications

- LED light source
- Compact, ultra modern sleek appearance
- IP65 rated; IP67 rated (with upgrade kit)
- White, high quality polycarbonate housing
- Suitable for use in indoor and outdoor applications
- Vandal-resistant safety locking mechanism
- Operating temperature range: -4°F to 158°F (-20°C to +70°C)

Beacons
Flashing Xenon
Klaxon Sonos Series

Sonos Series Xenon beacon is a general purpose, high output Xenon beacon designed for industrial applications.

Sonos Xenon beacons are rated to IP65 and are suitable for use in indoor and outdoor applications.

The Sonos Xenon beacon features a full faced, translucent case giving a much larger lens area. This results in a greater light spread for more effective warning.

Features and Specifications

- Xenon strobe light source
- Flame retardant polycarbonate construction
- Red base
- IP65 rated
- Single/double flash (DC version)
- Operating temperature range: -13ºF to 131ºF (-25ºC to 55ºC)

Beacons
Flashing Xenon
Klaxon Flashguard Series

Flashguard Xenon beacons are visual indicators suitable for use in indoor and outdoor applications.

All Flashguard beacons are fitted with a diffuser for greater visibility and spread of light. Two styles are available, Standard and Low Profile.

Standard: includes a terminal block and a 27mm deep base supplied with a seal and grommet.

Low Profile: comes complete with a screw and nylon wing nut and is supplied with mounting gasket and 40cm of cable.

An upgrade kit (with cable connector) is available to upgrade the standard beacon from IP65 rating to IP67.

Features and Specifications

- Xenon light source
- Flash rate 60 fpm
- Compact, ultra modern sleek appearance
- White, high quality polycarbonate housing
- Suitable for use in indoor and outdoor applications
- 12V and 24V DC options in one user-selectable unit
- Vandal-resistant safety locking mechanism
- IP65 (Standard); IP67 (Low Profile)
- Operating temperature range: -4°F to 104°F (-20°C to 40°C)

Beacons
Flashing Xenon
Klaxon Syrex Series

The Exd Beacon is a powerful Xenon beacon suitable for use in hazardous area applications. Certified to II 2G Exd IIC T6, it is suitable for use in Zone 1 and Zone 2 areas. With a choice of two lens colors (red and amber), IP67 ingress protection and rugged design, it is suitable for use in indoor and outdoor applications.

The unit is fitted with two 20mm cable entries and has terminals that accept 4mm² cable for ease of installation. Dual In/Out terminals are also available on request.

Features and Specifications

- Xenon light source
- Marine Grade LM6 aluminum construction
- Lens guard included with beacon
- IP67 rated
- Rated for Category 2 use (formerly Zone 1 & 2)
- ATEX / IECEx Approved
- Ⓔx II 2G Exd IIC T6
- Operating temperature range: -58°F to 104°F (-50°C to 40°C)

Beacons
Flashing Xenon
89 Series

Edwards 89 Series Xenon strobe beacons are bright, up to 150 candela, low current visual signals suitable for indoor use only. Two mounting options are available; 89STR for flush mounting and the 89SMSTR for surface mounting on the supplied single gang surface box. The housing is made of gray, engineered thermoplastic. Ideal for use where a distinctive visual signal is required for timing, scheduling, paging, process control, general alarm and warning applications.

Features and Specifications

- Xenon strobe light source
- Flash rate 60 fpm
- Low current draw
- Screw terminals for easy wiring
- Suitable for indoor applications only
- 85% relative humidity at 86°F (30°C)
- Operating temperature range: 32°F to 120°F (0°C to 49°C)

Beacons
Flashing Xenon
125 Class

NEW

Edwards 125 Class Xenon strobe beacons are UL and cUL listed signaling devices, available in two versions, normal light output and high light output. Both versions feature a corrosion resistant NEMA Type 3R and 4X enclosure and be panel or conduit mounted. Base material is gray or black, manufactured from a 33% glass filled nylon, providing a high resistance to heat and chemicals. The lens is made of shatter-resistant polycarbonate.

Features and Specifications

- Xenon strobe light source
- Flash rate 65 fpm
- Shatter-resistant polycarbonate lens
- Gray or black glass filled nylon base
- Available in normal or high light output
- Suitable for indoor and outdoor applications
- For outdoor use, lens should face up
- Option for panel or conduit mounting
- NEMA Type 4X enclosure
- Operating temperature range: -31°F to 150°F (-35°C to 66°C)

Beacons
Flashing Xenon
117 Class

The Edwards 117 Class Strobes provide a bright visual indication by utilizing a linear strobe tube inside a shatter resistant polycarbonate fresnel lens. They feature a NEMA Type 4X enclosure, and are suitable for use in indoor and outdoor applications where reliable and distinctive visual indication is required. When mounted outdoors the unit should be mounted with the lens facing up.

Designed for industrial, commercial, and institutional applications, the low profile 117 Class is suitable for industrial wash down applications as well as for use on tow motors and other vehicles. Edwards' strobe lights are particularly effective in high noise areas where ear protection must be worn and audible signals may not be heard or understood.

Features and Specifications

- Xenon strobe light source
- Flash rate 65 fpm
- Five lens colors
- Replacement lens not available
- Black Impact Resistant Polycarbonate ABS blend base
- Surface mounting
- Replaceable linear strobe tube powered at 1.75 joules
- NEMA Type 4X enclosure

105 Series

Edwards 105 Series Xenon strobe beacons are heavy-duty visual signals suitable for use in indoor and outdoor applications where a corrosion resistant NEMA Type 4X enclosure is required. Base material is gray, manufactured from glass-reinforced thermoplastic polyester resin and features brass hardware. The double fresnel lens is made of shatter-resistant polycarbonate.

The 105DHISTC-FJ high intensity strobe is designed for use in compatible fire alarm system and other applications requiring electrical supervision of signaling circuit field wiring.

Features and Specifications

- Xenon strobe light source
- Flash rate 65 fpm
- Shatter-resistant double fresnel polycarbonate lens
- Gray Rynite® (PET) base with brass hardware
- Suitable for indoor, outdoor and marine applications
- For outdoor use, lens should face up
- Option for panel, conduit or wall mounting
- NEMA Type 4X enclosure
- Class I, Div 2, Groups A, B, C and D; Class II, Div 2, Groups F and G; Class III

Flashing Xenon
96 and 98 Series

Edwards 96B and 98B Series Xenon strobe beacons are light duty visual signals suitable for use in industrial, commercial and institutional applications where short term intermittent visual signaling is required. Both series feature a corrosion resistant NEMA Type 4X enclosure and can be panel or conduit mounted. Optically designed fresnel lenses improve viewer perception for indoor and outdoor applications.

The 96B and 98B Series are often used where a smaller output is desired or where multiple, smaller strobes are required. Trigger and timing circuits are included as integral parts of the power supply. Replacement costs are reduced, as it is necessary to replace only the strobe tube.

Features and Specifications

- Xenon strobe light source
- Flash rate 65 fpm
- Snap-on high impact plastic base
- Optically designed fresnel lenses
- Resistant to shock and vibration
- Suitable for indoor and outdoor applications
- For outdoor use, lens should face up
- NEMA Type 4X enclosure
- Option for panel or conduit mounting
- Operating temperature range: -31°F to 150°F (-35°C to 66°C)

Beacons
Flashing Xenon
96 Series

Edwards 96DV2 Series Xenon strobe beacons are light duty visual signals suitable for use in industrial, commercial and institutional applications where short term intermittent visual signaling is required. Optically designed fresnel lenses improve viewer perception for indoor, outdoor and wet locations requiring Division 2 and NEMA Type 4X specifications.

The 96DV2 Series can be panel or conduit mounted. Trigger and timing circuits are included as integral parts of the power supply. Replacement costs are reduced, as it is necessary to replace only the strobe tube.

Features and Specifications

- Xenon strobe light source
- Flash rate 65 fpm
- Optically designed fresnel lenses
- Resistant to shock and vibration
- Suitable for indoor and outdoor applications
- For outdoor use, lens should face up
- NEMA Type 4X enclosure
- Class I, Div 2, Groups A, B, C and D; Class II, Div 2, Groups F and G; Class III
- Option for panel or conduit mounting
- Operating temperature range: -31°F to 150°F (-35°C to 66°C)

Beacons
Flashing Xenon
92 Series

Edwards 92 Series Xenon strobe beacons are light duty visual signals suitable for use in industrial, commercial and institutional applications where short term intermittent visual signaling is required. They feature brilliant light output and a cast base that can be utilized as a junction box. Optically designed fresnel lenses improve viewer perception for indoor and outdoor applications. Trigger and timing circuits are included as integral parts of the power supply. Replacement costs are reduced, as it is necessary to replace only the strobe tube.

The 92PLC Series strobe is electrically isolated from leakage current to prevent false flashes. This series offers single and double flash models.

Features and Specifications

- Xenon strobe light source
- Flash rate 65 fpm
- Cast base can function as a junction box
- Optically designed fresnel lenses
- Suitable for indoor and outdoor applications
- For outdoor use, lens should face up
- Option for panel, conduit or box mounting
- Designed for 4" octagonal box mounting
- Operating temperature range: -31°F to 150°F (-35°C to 66°C)

Beacons
Flashing Xenon
57EDF Series

Edwards 57EDF Series Xenon strobe beacons are heavy-duty, double flash visual signals suitable for use in general signaling applications. The shatter resistant polycarbonate lens has been designed with a reflective double optics system that creates a unique rectangular column of light. This enhances light output by increasing the lens fill rate while minimizing the intense light burst normally characteristic of high intensity strobes.

The new 57EDF Series is NEMA Type 4X rated for indoor and outdoor applications and can be conduit mounted only. The unit features a corrosion resistant, heat flowed epoxy finish base.

Features and Specifications

- Xenon strobe light source
- Shatter resistant polycarbonate lens
- Suitable for indoor and outdoor applications
- For outdoor use, lens should face up
- 3/4" conduit mount
- NEMA Type 4X enclosure
- Operating temperature range: -31°F to 150°F (-35°C to 66°C)

Beacons
Flashing Xenon
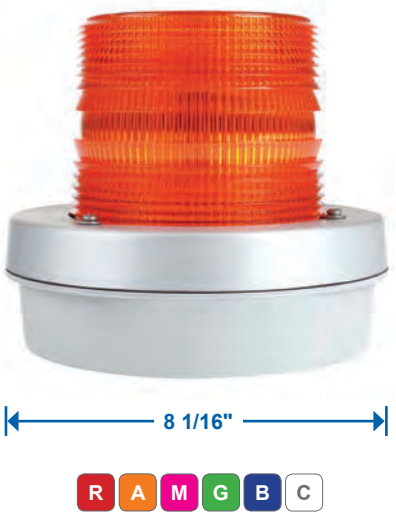
93 and 97 Series



Edwards 93 and 97 Series Xenon strobe beacons are heavy-duty visual signals suitable for use where more frequent and longer lasting signaling cycles may be required. Optically designed fresnel lenses improve viewer perception for indoor and outdoor applications. The base is cast and can be utilized as a junction box.

The 93DF and 97DF Series offers a double flash model that doubles the apparent strobe on-time (50 double flashes per minute). Trigger and timing circuits are included as integral parts of the power supply. Replacement costs are reduced, as it is necessary to replace only the strobe tube.

Features and Specifications

- Xenon strobe light source
- Cast base can function as a junction box
- Optically designed fresnel lenses
- Single and double flash models
- Suitable for indoor and outdoor applications
- For outdoor use, lens should face up
- 93 Series - 3/4" conduit mount
- 97 Series - panel or 3/4" conduit mounting
- Operating temperature range: -31°F to 150°F (-35°C to 66°C)

Beacons
Flashing Xenon
94 Series

Edwards 94 Series Xenon strobe beacons are heavy-duty visual signals suitable for use where more frequent and longer lasting signaling cycles may be required. Optically designed fresnel lenses improve viewer perception for indoor and outdoor applications. The base is cast metal and can be utilized as a junction box.

The 94DF Series offers a double flash model that doubles the apparent strobe on-time (50 double flashes per minute). Trigger and timing circuits are included as integral parts of the power supply. Replacement costs are reduced, as it is necessary to replace only the strobe tube.

The 94DV2 Series Division 2 Xenon strobe beacons are high profile visual signals suitable for outdoor and wet locations requiring a UL Listed, NEMA Type 4X enclosure. The 94DDV2 Series is Diode Polarized for use in electrically supervised circuits. Both versions can be conduit mounted.

Features and Specifications

- Xenon strobe light source
- Cast base can function as a junction box
- Optically designed fresnel lenses
- Suitable for indoor and outdoor applications
- For outdoor use, lens should face up
- Conduit mounting
- NEMA Type 4X enclosure
- Class I, Div 2, Groups A, B, C and D; Class II, Div 2, Groups F and G; Class III, **(94DV2 and 94DDV2)**

Beacons
Flashing Xenon
107 Series

Edwards 107DDV2 and 107DV2 Series Xenon strobe beacons are signaling devices designed for installation in Division 2 environments requiring a NEMA Type 3R or 4X installation. Rigid specifications and state-of-the-art technology provide for high visual output and low maintenance.

The 107DDV2 Series is Diode Polarized for use in electrically supervised circuits. Both versions can be bracket, ceiling or pendant mounted.

Features and Specifications

- Xenon strobe light source
- Flash rate 65 fpm
- High impact glass dome
- Dome Guard (Optional)
- NEMA Type 3R and 4X enclosure
- Suitable for indoor, outdoor and marine applications
- Option for bracket, ceiling or pendant mount
- Class I, Div 2, Groups A, B, C and D; Class II, Div 1, Groups E, F and G; Class II, Div 2, Groups F and G; Class III

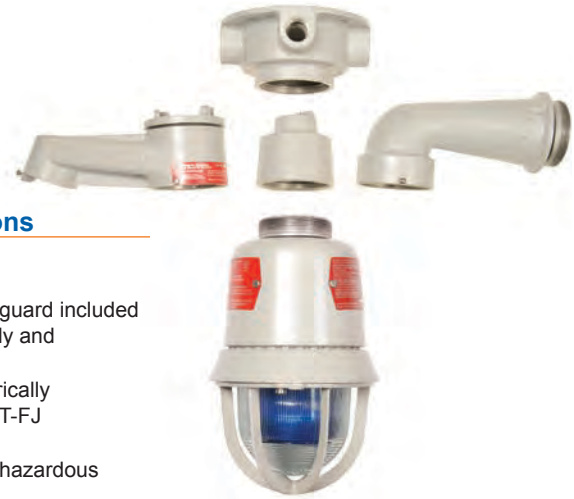
Beacons: Explosionproof
Flashing Xenon
116 Series



Edwards 116DEXMST-FJ and 116EXMST Series Xenon strobe beacons are explosionproof, signaling devices suitable for use in hazardous indoor or outdoor applications requiring NEMA Type 3R or 4X installations. The housing is cast aluminum with a corrosion resistance epoxy powder coat, and includes a dome guard. The fluted, high-impact glass dome provides even light distribution.

The 116DEXMST-FJ Series is Diode Polarized for use in electrically supervised circuits. Both versions can be bracket, ceiling, pendant or stanchion mounted.

Features and Specifications

- Xenon strobe light source
- Flash rate 65 fpm
- High impact glass dome, dome guard included
- Quick connect for easy assembly and installation
- Diode Polarized for use in electrically supervised circuits (116DEXMST-FJ Series only)
- Suitable for indoor and outdoor hazardous applications
- Bracket, ceiling, pendant or stanchion mounting options (ordered separately)
- NEMA Type 3R and 4X enclosure
- Explosionproof: Class I, Div 2, Groups A and B, Class I, Div 1 and 2, Groups C and D; Class II and III, Div 1, Groups E, F and G; Class II and III, Div 2, Groups F and G

NOTE: Mounting options not included (ordered separately)

Edwards 116DEXSTC-FJ Series Xenon strobe beacons are explosionproof, signaling devices suitable for use in hazardous indoor or outdoor applications requiring NEMA Type 3R or 4X installations. The housing is cast aluminum with a corrosion resistance epoxy powder coat, and includes a dome guard. The fluted, high-impact glass dome provides even light distribution.

The 116DEXSTC-FJ Series is Diode Polarized for use in electrically supervised circuits, such as fire alarm systems. The strobe, when wall, ceiling or pendant mounted, is UL 1971 listed (ADA) for indoor visual signaling applications for the hearing impaired in non-sleeping areas. The unit can be stanchion mounted as well (non-fire alarm use).

Features and Specifications

- Xenon strobe light source
- Flash rate 65 fpm
- High impact glass dome, dome guard included
- Quick connect for easy assembly and installation
- Diode Polarized for use in electrically supervised circuits

116 Series

NEW

Edwards 116 Series Genesis fire alarm strobe is designed for use in Class 1, Division 1 and 2 explosionproof and hazardous location applications where electrical supervision is required. The diode-polarized strobe is intended for indoor use in UL 1971 listed compatible fire alarm systems and is ADA compliant for the hearing impaired.

116 Series Genesis strobe provides 125 cd ceiling and 60 cd wall light output. With the guard installed, the strobe flashes with an output of 86 cd ceiling and 51 cd wall.

These units are UL 1638 and cUL listed for outdoor use as a NEMA Type 3R and 4X enclosure; and Canada (cUL) to Canadian standard ULC-S526-07 suitable for indoor or outdoor applications.

The strobes are designed to flash at the same rate (synchronize) when used with a compatible sychronization source, such as the EG1M-RM synchronization module, E-FSC and E-FSA fire panels, and EBPS series booster supplies.

Features and Specifications

- Xenon light source
- Flash rate 60 fpm
- Clear globe with dome guard
- Three mounting options: wall, ceiling, or pendant (ordered separately)
- Negligible in-rush current
- Approved for fire alarm applications
- NEMA Type 3R and 4X enclosures
- Can be synchronized when connected to a compatible Edwards control panel, booster power supply or synchronization module
- UL 1638, UL 1971 and cUL Listed
- Explosionproof: Class I, Div. 2, Groups A and B; Class I, Div. 1 and 2, Groups C and D; Class II, Div. 1, Groups E, F, G and Class III; Class II, Div. 2, Groups F, G and Class III.

NEW

Edwards 116 Series mass notification strobes are designed for use in Class 1, Division 1 and 2 explosionproof and hazardous location (non fire alarm) applications where electrical supervision is required. The units feature two lenses, an outer clear globe, and an inner colored lens available in amber, red, green, blue or magenta.

This diode-polarized unit is UL 1638 and cUL listed for outdoor use as a NEMA Type 3R and 4X enclosure.The strobe has been evaluated to UL 1971 polar plot requirements with on axis light output values.

The 116 Series features an enhanced synchronization circuit to comply with the latest requirements of UL 1971, signaling devices for the hearing impaired, and the Canadian standard CAN/ULC S526. Synchronized operation requires a separately installed synchronization control module, compatible Edwards control panel or booster power supply. See table on the following page for a list of compatible synchronization modules.

Mounting options are available (ordered separately) for wall, ceiling and pendant mounts. The unit is supplied with a guard installed over the clear outer globe for additional protection against impact.

Features and Specifications

- Xenon light source
- Clear globe with dome guard
- Five lens colors
- Flash rate 65 fpm
- Three mounting options: wall, ceiling, or pendant (ordered separately)
- Negligible in-rush current
- Can be synchronized when connected to a compatible Edwards control panel, booster power supply or synchronization module
- NEMA Type 3R and 4X enclosures
- Explosionproof: Class I, Div 1, Groups C and D; Class I, Div 2, Groups A and B; Class I, Div 1 and 2, Groups C and D; Class II and III, Div 1, Groups E, F and G; Class II and III, Div 2, Groups F and G.

Beacons
Flashing Xenon
3000 Series

The 3000 Series beacons are surface, flange mounted strobes designed for industrial applications and for applications where warning on a moving vehicle, such as a fork lift or tow motor is required.

The unit draws low current for a 12-48 V DC unit. The twist on-off lens makes for easy strobe tube and/or lens replacement. The 3000 Series beacons also feature a fully gasketed lens.

Features and Specifications

- Xenon light source
- 1.5 Joule Strobe
- 80 Nominal Single Flashes per minute (fpm)
- Flange mount
- 18" wire leads
- Low current draw
- 150,000 peak candela

Beacons
Rotating Halogen or Incandescent
52, 53 and 53D Series

Edwards 52, 53 and 53D Series rotating beacons are visual signals suitable for use in indoor or outdoor applications to provide maximum brilliance and long-term durability with minimum maintenance. The polycarbonate dome allows for easy cleaning.

The 52, 53 and 53D Series are ideal for use in high ambient noise applications, including security systems and factory/distribution facilities. The 53D Series is Diode Polarized for use in electrically supervised circuits.

Features and Specifications

- Halogen or Incandescent light source
- Light intensifying reflector
- Bayonet lamp socket for easy replacement
- Cast base can function as a junction box
- 1/2" NPT conduit or surface mounting
- For indoor applications, beacon may be mounted with lens pointing upward or downward
- For outdoor applications, lens should face up
- 52 Series must be conduit mounted for outdoor applications
- 53D is only suitable for indoor applications
- Designed for 4" octagonal box mounting
- Operating temperature range: -31°F to 150°F (-35°C to 66°C)

Beacons
Rotating Halogen
58 Series

Edwards 58 Series rotating beacons are heavy-duty visual signals suitable for use in hazardous indoor and outdoor applications where a corrosion resistant NEMA Type 4X enclosure is required. Features a bayonet base and a polycarbonate dome allows for easy cleaning. Ideal for use in high ambient noise applications where audible or visual signals are difficult to distinguish.

Features and Specifications

- Halogen light source
- Motor driven reflector
- Bayonet base lamp socket
- 3/4" NPT conduit or surface mounting
- Suitable for indoor or outdoor hazardous applications (with conduit mounting)
- For outdoor use, lens should face up
- NEMA Type 4X enclosure
- Class I, Div 2, Groups A, B, C and D; Class II, Div 2, Groups F and G; Class III, Div 1
- Operating temperature range: -31°F to 150°F (-35°C to 66°C)

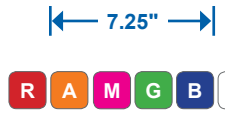
Beacons: Explosionproof
Rotating Halogen
116 Series

Edwards 116EXMRIN Series rotating beacons are explosionproof, signaling devices suitable for use in hazardous indoor or outdoor applications. The housing is cast aluminum with a corrosion resistance epoxy powder coat, and includes a dome guard. The fluted, high-impact glass dome provides even light distribution. The unit can be bracket, ceiling, pendant or stanchion mounted.

Features and Specifications

- Halogen light source
- High impact glass dome, dome guard included
- Quick connect for easy assembly and installation
- Suitable for indoor or outdoor hazardous applications
- 75 rotations per minute
- Bracket, ceiling, pendant or stanchion mounting options (ordered separately)
- NEMA Type 3R and 4X enclosure
- Marine rated
- Explosionproof: Class I, Div 2, Groups A and B; Class I, Div 1 and 2, Groups C and D; Class II and III, Div 1, Groups E, F and G; Class II and III, Div 2, Group G



NOTE: Mounting options not included (ordered separately)

Magnetic Personality

"My job is to make sure everything in our facility operates safely and reliably.

For more than 20 years Sentrol Industrial Magnetic Switches have been a key part of that equation. The way I see it, there is just no substitute for a proven track record.

For applications ranging from machine safety interlocking to positioning, we choose Sentrol from Edwards."

Magnetic Switches and Contacts

Machine Safeguarding and Position Sensing

Whether it's a new machine design or a retrofit to increase operator safety on an existing machine, GuardSwitches™ provide the best fit for your application.

All GuardSwitches™ are non-contact, magnetic devices consisting of a switch and a magnet actuator. They are extremely tolerant of misalignment and the build-up of dirt, grease and other contaminants.

The typical air gap between actuator and switch is 0.5" to 1.0". This allows easy installation and a margin for the usual "settling out" shift that occurs in machine guard doors and gates.

GuardSwitches™ actuate through wood, aluminum, stainless steel or any other nonferrous material. This allows the interlock switches to be concealed in the machine for added protection against tampering. In addition, all switching elements are hermetically sealed, so they can be installed in dirty or corrosive environments.

The 300-BT Series non-contact GuardSwitches™ offer superior defeat resistance, ease of installation and are fail-safe when used with our INT Safety Monitor Relays. Edwards position sensors have earned their reputation for quality. They are built for durability and dependability. Most are conservatively rated at 100,000 cycles under full load and 10,000,000 cycles under dry circuit. Every reed connection is hand soldered and the reeds in all modes are environmentally sealed.

A Tradition of Excellence

Our reputation for durability and dependability is based on meticulous manufacturing standards and stringent testing procedures. Our worldclass manufacturing has earned ISO 9001 certification for quality. Our manufacturing standards and attention to detail virtually eliminate out-of-box failures.

Edwards Signaling non-contact interlock switches are developed and manufactured by the market leader for industrial applications. We produce a full line of interlock and position sensors providing solutions for your machine guarding and sensing needs.

See our Industrial Contacts Catalog for all contact devices offered by Edwards.

EDWARDS

Smarter Signaling

"Some signaling applications require both audible *and* visual functionality combined in one stand-alone device. This redundant approach provides an extra layer of protection for our *employees while saving time and money on installation costs.*

It's the smart choice for our business."

Product Index

Seen and heard. With new advanced XBR LED technology, Edwards offers signaling with exceptional brilliance and an integrated audible component that demands attention. Ideal for any industrial or commercial application, Edwards' dual signaling devices produce an unmistakable audible and visual warning.

Flashing LED
51XBR Series

NEW

Edwards 51XBR Series XTRA-BRITE™ LED beacons are combination visual and audible signaling devices, designed for indoor or outdoor applications. The integrated horn is synchronized with the flashing LED. The unit features a cast metal base that can be used as a junction box. The double fresnel lens is made of shatter-resistant polycarbonate, and is designed to magnify the superbright LED.

Features and Specifications

- LED light source with integrated horn
- Flash rate 65fpm
- Shatter-resistant double fresnel polycarbonate lens
- Immune to shock and vibration
- Cast metal base
- Suitable for indoor and outdoor applications
- Horn is 95dB at 1 meter/85dB at 10ft.
- Option for panel, conduit or wall mounting
- Operating temperature range: -31ºF to 150ºF (-35ºC to 66ºC)

Beacons with Horn
Flashing Xenon
95 Series

Edwards 95 Series xenon strobe beacons with integrated horns are combination visual and audible signaling devices, suitable for use in indoor or outdoor applications. The base is cast and can function as a junction box. The double fresnel lens is made of shatter-resistant polycarbonate and optically engineered to maximize light distribution and viewing distance. Trigger and timing circuits are included as integral parts of the power supply. Replacement costs are reduced, as it is necessary to replace only the strobe tube.

Features and Specifications

- Strobe light source with integrated horn
- Flash rate 65 fpm
- Shatter-resistant double fresnel polycarbonate lens
- High resistance to shock and vibration
- Cast base can function as a junction box
- Suitable for use in indoor and outdoor applications
- For outdoor applications, must be mounted on conduit with lens facing up.
- Horn is 95dB at 1 meter/85dB at 10ft.
- Option for panel, conduit or wall mounting
- Operating temperature range: -31ºF to 150ºF (-35ºC to 66ºC)

Multi-Status LED
108 Series

Edwards 108 Series Chameleon™ LED multi-status indicator is a UL listed and IP65 rated multicolor device designed to function as either a steady-on or flashing visual signal. The 108 Series contains three different colored LED signals in one housing, with the option to add an additional lens module and light source – Strobe, Halogen, Incandescent or LED – for a fourth signal. It features a corrosion resistant Type 3R or 4X enclosure, and can be panel or conduit mounted.

The 108 Series features a multi-tone base module with eight available tones that can be operated as an additional signal or used in conjunction with any of the visual signals.

Features and Specifications

- 3 LED visual signals in one compact housing
- Option to add an additional module for a fourth light using one of the 102LM lens modules and the 102LS light sources
- 89dB at 1m / 79dB at 10ft
- Option to add multi-tone base module
- Suitable for indoor and outdoor applications
- NEMA Type 3R and Type 4X, IP65 rated Option for panel or conduit mounting

Beacons with Sounder
Multi-Mode LED
155 Class

NEW
Coming Soon

The 155 Class LED sounder is a combination audible and visual signal providing two levels of sensory notification. It features a steady or flashing LED light and a 32-tone audible signal that is divided into two channels. Both features are field programmable. The volume and progression of the sound is programmed by the use of trimmers located under the removable lens. The lenses are made from a self-extinguishing polycarbonate material, and are offered in amber, blue, green, red, yellow and clear. It is housed in an IP65 rated Type 3R enclosure.

Features and Specifications

- Multi-Mode (flashing or steady-on)
- LED light source
- 32 audible tones
- Field programmable
- Flash rate 110 fpm (+/-10)
- NEMA Type 3R enclosure
- IP65 rated
- Operating temperature range: -22ºF to 122ºF (-30ºC to 50ºC)

Horn/Strobe
Electronic
860 Series

Edwards 860 Series xenon strobe beacons with horns are bright, low current, high decibel, combination signals designed for use where a distinctive visual or audible signal is required. The housing is made of gray, engineered thermo-plastic. The strobe and horn can be operated independently.

The 867STR (indoor) and 868STR (outdoor) Series can be surface mounted on the supplied surface box. The 869STR and 869DSTR Series beacons can be flush mounted. They are designed to mount in a standard 4" (102mm) square electrical box with extension ring (total min. depth of 3" (76mm) not supplied.)

The 869DSTR Series is Diode Polarized for use in electrically supervised circuits.

Features and Specifications

- Xenon strobe light source with horn
- Flash rate 60 fpm
- 100dB at 1 meter/90dB at 10ft. (measured in anechoic chamber)
- Low current draw
- Terminals for easy wiring
- Gray, engineered thermoplastic housing
- Diode Polarized for use in electrically supervised circuits (869DSTR)
- Versions suitable for indoor and outdoor applications
- Operating indoor temperature range: 85% relative humidity at 86°F (30°C), 32°F to 120°F (0 to 49°C) variable ambient temperature.
- Operating outdoor temperature range: 95% relative humidity at 86°F (30°C), -31°F to 150°F (-35°C to 66°C) variable ambient temperature.

Klaxon Sounder Beacons
Electronic Tone
Sonos Series

R A

A general purpose electronic sounder for fire, security and industrial applications; the Sonos sounder beacon is certified to EN54.

The sounder head 'twists and clicks' into the base on commissioning, avoiding the wiring and connection problems associated with traditional sounders. With a choice of 32 tones including all the major international standards, the Sonos sounder beacon has universal acceptance.

Features and Specifications

- Low current LED beacon
- Flame retardent polycarbonate construction
- Choice of lens colors
- 32 tones
- Sounder and beacon can be controlled separately
- Tone and volume can be preset or adjusted off-base - 20dB
- Separate connections for sounder and beacon
- EN54-3 Type A (shallow base) and EN54-3 Type B (deep base) compliance
- IP65 (deep base); IP21 (shallow base)
- Operating temperature range: -8ºF to 158ºF (-25ºC to 70ºC)

Klaxon Sounder Beacons
Electronic Tone
Syrex Series

The Syrex IS sounder/beacon is an intrinsically safe alarm which provides an audible and visual warning signal in hazardous area applications.

With three alarm stages and a low current consumption, the Syrex IS sounder/beacon is ideal for both fire and process control applications.

The Syrex IS sounder/beacon must be used with a galvanic isolator specified by the system certificates.

Features and Specifications

- LED light source
- Choice of 49 tones
- Choice of lens colors
- Flash rate 2Hz or 1Hz (double flash)
- Auto synchronized sound output
- ABS flame retardant UL94V0 and 5VA housing
- Volume control
- IP65 rated
- Rated for Category 1
- Ⓔx II 1G EEx ia IIC T4

Klaxon Sounder Beacons
Electronic Tone
Nexus Series

The Nexus 120 is a very high output sounder beacon designed for industrial applications.

Nexus 120 sounders are IP66 rated, making them suitable for outdoor applications.

Features and Specifications

- 5J Xenon beacon
- Three alarm stages
- Quarter turn fasteners for ease of installation
- 120dB at 1 meter/110dB at 10ft.
- Volume control for greater flexibility - 20dB
- 64 tones
- Separate connections for sounder and beacon
- IP66 rated
- Operating temperature range: -13ºF to 151ºF (-25ºC to 55ºC)

Built to Last

"You know that old saying, 'Things are just not made the way they used to be'?

While that may be true for some companies, Edwards still builds solid, beefy products that perform where others might not.

Like Edwards' Titan™ Class explosionproof remote speaker/amps – they're tough, durable and smart.

And I'm not someone who would settle for anything less."

Product Index

From the crisp sound of a vibrating bell in the classroom, to the high decibel tone of the explosionproof horn in a hazardous location, Edwards' audible signals produce sounds designed to alert, warn, communicate and protect. Edwards' horns, bells, buzzers and sirens are the smart choice for safety and communication.

Bells
Vibrating
340 and 435 Series

Edwards 340 Series and 435 Series are vibrating bells that produce a long, continuous ringing sound. The striker continues to strike the gong in rapid-fire as long as current is applied. Specified for timing, scheduling, paging and general alarm applications.

Features and Specifications

- 4", 6" and 10" gong sizes in AC versions
- 4", 6", 8" and 10" gong sizes in DC versions
- Completely assembled with all hardware supplied
- Die cast housing
- Corrosion resistant heat flowed epoxy finish
- Mounts directly on surface or electrical box
- Optional flush mount grille and wall box available separately
- Full cast grids available for 4" bells
- Self-compensating solenoid plunger
- FM approved (AC Bells only)

Bells
Vibrating
650 Class

NEW
Coming Soon

The 650 Class Vibrating Bells are 6.57" (167mm) and designed for use in heavy duty industrial applications as well as many commercial applications. Available in 24V AC, 24V DC and 120V AC, the 650 Class bells provide audible tones that range from 98dB to 100dB at 1 meter. The bells are available in red or gray and carry NEMA 3R and IP66 ratings.

Features and Specifications

- 24V AC, 120V AC and 24V DC
- Available in red or gray
- Up to 100dB @ 1m (90dB @ 10ft.)
- Operating temperature range: -22ºF to 122ºF (-30ºC to 50ºC)
- IP66 and NEMA Type 3R rated

Bells
Vibrating
156G Series

Edwards 156G Series bells are self-contained underdome monitor bells. These grounded, vibrating bells are insulated, and have a concealed plunger. They are also suitable for AC powered security systems.

Features and Specifications

- 3", 4" and 6" gong sizes
- Corrosion resistant gray finish
- Supplied with gasket for outdoor applications
- Low current draw permits long wire runs
- Mounts on 3 3/4" (95mm) bolt circle

Bells
Vibrating
55 Series

Edwards 55 Series single magnet vibrating bells feature an exposed striker with an enclosed grounded terminal and case. They are ideal for light duty installations in factory and office environments and OEM applications. They are also suitable for AC powered security systems with a battery standby.

Features and Specifications

- Gray finish
- Low current drain permits long wire runs
- 4" and 6" gong sizes

Bells
Vibrating
740 and 744

Edwards 740 and 744 bells with an exposed gong are non-adjustable, and are suitable for use in residential, commercial and OEM applications. They may be operated off of a 591 or 592 transformer or DC power. They are also suitable for AC powered security systems with a battery standby.

Features and Specifications

- Exposed gong
- Attractive snap-on covers
- Corrosion resistant chrome finish
- Enclosed binding posts

Bells
Vibrating
438 and 439 Series

Edwards 438 and 439 Series fire alarm bells are diode polarized, vibrating bells for use with fire alarm equipment. They operate in conjunction with an installed fire alarm panel and detection devices. The steel alloy gongs are epoxy powder finished and produce a loud, resonant tone required in fire alarm systems.

Features and Specifications

- 6", 8" and 10" gong sizes
- Heavy duty die cast housing
- Steel alloy gong with epoxy powder coating
- Back box available for use in outdoor applications
- Under dome mechanism
- Available in red or gray
- Lead length: 10" (25mm)

Bells
Vibrating
340EX and 435EX Series

Edwards 340EX and 435EX hazardous location bells are vibrating bells that produce a long, continuous ringing sound. The striker continues to strike the gong in rapid-fire as long as current is applied. They feature an explosionproof, NEMA Type 4 housing.

Features and Specifications

- 6", 8" and 10" gong sizes
- Completely assembled
- Corrosion resistant finish
- Mounts directly on any solid surface
- Low power draw for efficient operation over long runs
- Suitable for use in outdoor applications
- Adjustment free self-compensating solenoid plunger
- UL listed for Class I, Divisions 1 and 2, Groups B, C and D; Class II, Divisions 1 and 2, Groups E, F and G; Class III
- NEMA Type 4 enclosure

Bells
Vibrating
439DEX Series

Edwards 439DEX Series hazardous location fire alarm bells are DC vibrating bells that produce a long, continuous ringing sound. The striker continues to strike the gong in rapid-fire as long as current is applied. Diode polarized models are available for use in electrically supervised circuits.

Features and Specifications

- 6", 8" and 10" gong sizes
- Completely assembled
- Corrosion resistant gray epoxy finish
- Suitable for use in indoor applications
- Mounts directly on any solid surface
- Low power draw for efficient operation over long runs
- Adjustment free self-compensating solenoid plunger
- Wire leads and sealing fitting for connection to 3/4" conduit
- UL listed for Class I, Divisions 1 and 2, Groups B, C and D; Class II, Divisions 1 and 2, Groups E, F and G; Class III

Klaxon Bells
Vibrating
Syrex Series

The Klaxon Bell is designed for use in Zone 1 and 2 areas and is suitable for outdoor applications. The Syrex Series Bells are IP66 rated and certified to ATEX II 2G Exd e IIC T6.

With a sound output of up to 105dB, it provides a clear signal which stands out against background noise.

The housing is manufactured from glass fiber reinforced polyester with stainless steel fittings. In addition, all DC versions are equipped with a non-wearing electronic contact breaker.

Features and Specifications

- Clear audible signal designed to penetrate background noise
- Glass fiber reinforced polyester construction with stainless steel fittings
- IP66 rated
- Rated for Category 2 use (formerly Zone 1 & 2)
- ATEX approved
- II 2G Exd e IIC T6
- Operating temperature range: -4°F to 104°F (-20°C to 40°C)

Bells
Single Stroke
330 Series

Edwards 330 Series single stroke bells produce a clearly defined note for timing, scheduling, paging and general event notification. Coded, ntermittent current may be used to cause the striker to gong, pause and strike again for any specified period of time.

Features and Specifications

- Single stroke or coded intermittent stroke
- Completely assembled, all hardware supplied
- Mounts directly on surface or electrical box
- Self-compensating solenoid plunger
- Available with 4", 6" or 10" gongs
- Suitable for use in indoor applications
- Die cast housing with corrosion resistant heat flowed epoxy finish
- FM Approved **(AC bells only)**

NOTE: Mounts directly on surface or fits any single-gang box, 3 1/4" (83mm), 3 1/2" (89mm), or 4" (102mm) octagon box, or any plaster cover with mounting holes on 2 3/4" (70mm) centers. 6" and 10" bells also mount on 4" (102mm) square boxes.

Bells
Single Stroke
432 Series

Edwards 432 Series compact single-stroke brass bell produces a crisp clean single tone. It is suitable for use in commercial and OEM applications.

Features and Specifications

- 2 1/2" solid brass shell
- Economical
- Lower current draw permits long wire runs
- Single stroke

Bells
Single Stroke
330EX Series

Edwards 330EX Series single stroke bells produce a clearly defined note for timing, scheduling, paging and general alarm applications. Coded, intermittent current may be used to cause the striker to gong, pause and strike again for any specified period of time. Designed for use in hazardous locations, they have a NEMA Type 4 housing.

Features and Specifications

- Single stroke or coded intermittent stroke
- Completely assembled
- Sealing fitting for 3/4" (19mm) conduit and wire leads for power connections
- Mounts directly on surface
- Self-compensating solenoid plunger
- Low power drain for efficient operation over long wire runs
- Available with 6" or 10" gongs
- Corrosion resistant heat flowed epoxy finish
- Suitable for use in outdoor applications
- NEMA Type 4 housing
- UL Listed for Class I, Divisions 1 and 2, Groups B, C & D; Class II, Divisions 1 and 2, Groups E, F & G; and Class III

Buzzers
Vibrating
B93 Series

Edwards B93 Series Mineguard™ buzzers are MSHA certified heavy duty buzzers suitable for use on mining equipment. Sound is produced by the hammer action of a vibrating armature against the cast aluminum cover. The one piece cast aluminum cover provides an explosionproof seal. For power connections, the units feature an installed power cord and conduit hose constructed of flame retardant neoprene.

Features and Specifications

- Heavy duty cast aluminum housing and cover
- Corrosion resistant heat flowed powder epoxy finish
- Vibrating armature
- Mounting lugs provided for wall mounting
- MSHA certified No. X/P-3116-1
- Conforms with MSHA 30 CFR, Part 18 for methane and air mixtures
- 33" installed power cord and flame retardant neoprene conduit hose

Buzzers
Klaxon
Syrex Series

The Klaxon Buzzer is an explosion proof buzzer designed for use in hazardous areas where a distinctive signal is required. Certified to ATEX II 2G Exd e IIC T6, it is suitable for use in Zone 1 and Zone 2 areas.

Producing a tone with low frequency, it cuts through background noise more effectively than many other devices of a similar output.

Mounted in a rugged reinforced polyester case and rated to IP66, it is suitable for use in outdoor applications.

Features and Specifications

- Heavy duty buzzer
- Rugged construction
- Glass Fiber reinforced polyester construction
- IP66 rated case
- Rated for Category 2 use (formerly Zone 1 & 2)
- ATEX approved
- Ex II 2G Exd e IIC T6
- Operating temperature range: -4ºF to 104ºF (-20ºC to 40ºC)

Chimes
Single Stroke
338 and 339 Series

The Edwards 338 and 339 are surface mount AC or DC single stroke chimes which can be pulsed up to 10 pulses/second. The chimes are high quality units with underdome construction intended for heavy-duty commercial and industrial use. The chimes require no lubrication, and come complete with a mounting plate.

Features and Specifications

- No exposed terminals
- Tamper-proof cover screw
- Plastic tipped stainless steel striker
- Satin aluminum finish

Back-up Alarms
Auto Adjust and Single Tone
8001 Series

The 8001 Series heavy duty backup alarms feature a compact size, rugged housing and high decibel output.

They are designed for use in indoor and outdoor applications in a variety of vehicles and heavy equipment.

Features and Specifications

- Solid state, epoxy-sealed electronics
- Conforms to SAE J994 sound level Type C requirements

8001-EG

- Auto adjusts out volume to 10dB above ambient to compensate for background noise
- Die-Cast Construction suitable for outdoor applications

Electronic Sounders
Audio or Audible/Visual
E Series

Lumatone signals are designed to demand attention in quiet and moderate noise areas. The signal's output can be varied by controlling the applied voltage. The signal's low power consumption makes them suitable for battery operated equipment and allows them to be turned on and off by integrated circuits, SCRs and transistors.

Features and Specifications

- Low cost and size
- Solid state, long life
- High impact polystyrene case
- Pulsating audio or audio/visual models available
- Terminal connections
- Operating temperature range: 32°F to 131°F (0°C to 55°C)
- Frequency: 2.8 kHz

Klaxon Sounders
Electronic
Syrex Series

The Syrex IS Sounder is an intrinsically safe alarm sounder which provides an audible warning signal in hazardous area applications.

With three alarm stages and a low current consumption, the Syrex IS Sounder is ideal for both fire and process control applications.

The Syrex IS sounder must be used with a galvanic isolator specified by the system certificates.

Features and Specifications

- Choice of 49 tones
- Auto synchronized sound output
- ABS flame retardant UL94V0 and 5VA housing
- IP65 rated housing
- Volume control
- Operating temperature range: -40ºF to 140ºF (-40ºC to 60ºC)
- Ⓔx II 1G EEx ia IIC T4
- ATEX Zones 0, 1, 2

Klaxon Sounders
Electronic
Syrex Series

The EXD-3 is an electronic sounder designed for potentially explosive atmospheres and harsh environmental conditions. Certified to II 2G EExd IIC T4, it is suitable for use in Zone 1 and 2 areas.

With an ingress protection rating of IP67 and a choice of tones including those covering PFEER/ UKOOA requirements, it is suitable for use in almost any application. The EXD-3 gives the user a choice of the 1st stage alarm tone with stages 2 and 3 fixed at manufacture.

The unit features two 20mm cable entries and has terminals that accept 4mm² cable for ease of installation.

Features and Specifications

- Choice of 32 tones
- Suitable for outdoor applications
- Volume control
- Marine grade LM6 aluminium construction
- Operating temperature range: -58ºF to 131ºF (-50ºC to 55ºC)
- IP67 rated
- ATEX / IECEx Approved
- Rated for Category 2 use (formerly Zone 1 & 2)
- EXII 2G Exd IIC T4

Klaxon Sounders
Electronic
Sonos Series

Sonos Series are general purpose electronic sounders. They feature the TimeSaver base where connections are made to the base during the initial wiring phase, for faster and more reliable installation. The sounder head 'twists and clicks' into the base on commissioning, avoiding the wiring and connection problems associated with traditional sounders.

Deep base units have an IP65 rating and are suitable for both indoor and outdoor applications.

Sonos Sounder units are available in either red or white and with a choice of deep or shallow TimeSaver bases.

Features and Specifications

- 2 alarm stages
- 32 tones
- Tone and volume can be preset or adjusted off-base
- Synchronised alarm tones
- Volume control - Typical 8dB Combined
- Polycarbonate construction
- IP65 (deep base) and IP21 (shallow base) housing
- EN54-3 Type A (shallow base) and EN54-3 Type B (deep base) compliance
- Operating temperature range: -8ºF to 158ºF (-25ºC to 70ºC)

Klaxon Sounders
Electronic
Nexus Series

Nexus voice sounders combine normal sounder signals with a clear, synchronized voice message to help reduce confusion and distress during an active alarm.

Standard units are available with up to 7 pre-programmed messages. Alternative messages can be selected from an extensive message library covering almost any conceivable application. Customized messages are also available on request.

All Nexus voice sounders have a USB port that allows special messages in WAV format to be downloaded onto the sounder from any PC, providing users with the flexibility of adding/removing messages in-field.

Features and Specifications

- Choice of up to 7 messages via three volt free contacts
- Extensive message library or bespoke messages available
- Download messages in-field via built in USB port
- Max 116dB tone @ 1m (106dB @ 10ft.) and 90dB @ 1m (80dB @ 10ft.) message outputs
- Automatic synchronization
- IP66 rated for outdoor environments
- Volume control - 20dB
- Operating temperature range: -13ºF to 158ºF (-25ºC to 70ºC)

Horns
Vibrating
870 Series

The 870 Series vibrating horns are low-current, high decibel, for heavy-duty use and are UL listed to NEMA 4X, NEMA 12 and NEMA 12K enclosure requirements. The die-cast box is suitable for outdoor use and has a durable, corrosion-resistant, electrostatic heat flowed
powder epoxy gray finish. They may be used for indoor and outdoor applications.

Horn mounts on 3/4" NPT conduit or to any flat surface. Knockouts are located on the bottom and rear of the unit.

Features

- Convenient plug-in assembly
- Corrosion resistant finish
- Volume adjustable
- Completely assembled
- NEMA 4X, NEMA 12 and NEMA 12K rated enclosure
- Operating range: -20% to +10% of nominal volt

876 AC

- Adjustable output: 88 to 113dB @ 1m (78 to 103dB @ 10ft.)

877 DC

- Adjustable output: 88 to 111dB @ 1m (78 to 101dB @ 10ft.)

Horns
Vibrating
870 Series

The 870 Series flush mount vibrating horns are low-current, high decibel for heavy-duty indoor use. Designed for wall or panel installation and projects less than 1" (25mm) from the mounting surface. A trim plate is included and a back box is required.

Features and Specifications

- Corrosion resistant finish
- Volume adjustable
- Completely assembled
- Heavy duty die-cast housing
- Operating voltage range: -20% to +10% of nominal voltage

870 AC

- Adjustable output: 88 to 113dB @ 1m (78 to 103dB @ 10ft.)

871 DC

- Adjustable output: 88 to 101dB @ 1m (78 to 91dB @ 10ft.)

Horns
Vibrating
870 Series

The 870 Series panel mount vibrating horns are low current, high decibel for heavy-duty use. They come complete with gasket and are UL listed to NEMA 4X, NEMA 12 and NEMA 12K enclosure requirements.

Designed for semi-flush panel mounting, using supplied mounting template, or installation on a 4" square box. For NEMA 4X installation, mount to a NEMA 4X enclosure using the supplied gasket.

Features and Specifications

- Corrosion resistant finish
- Volume adjustable
- Completely assembled
- Heavy duty die-cast housing
- NEMA Type 4X, NEMA Type 12 and Type 12K Rated
- Operating range: -20% to +10% of nominal voltage

870P AC

- Adjustable output: 88 to 113dB @ 1m (78 to 103dB @ 10ft.)

871P DC

- Adjustable output: 88 to 101dB @ 1m (78 to 91dB @ 10ft.)

Horns
Vibrating
870 Series

The 870 Series projector vibrating horns are low-current, high decibel single and double horns for heavy-duty, indoor use. The single projector is designed to channel sound in one direction without decibel loss. The double projectors are designed for bi-directional signaling without decibel loss. Supplied complete with mounting plate for easy installation.

Features and Specifications

- Corrosion resistant finish
- Volume adjustable
- Completely assembled
- Heavy duty die-cast housing
- Operating range: -20% to +10% of nominal voltage

872 AC and 872DPO AC

Horns
Vibrating
870EX Series

The 870EX Series vibrating horns are heavy-duty, explosion-proof, high decibel horns designed for use in hazardous locations.

Diode polarized versions are also available. They are intended for use in hazardous locations requiring electrical supervision of signaling circuit field wiring. May also be used for unsupervised signaling applications.

Two mounting brackets are provided on either side of the unit for wall mounting. The housing is tapped on one side for 3/4" conduit to allow for field wiring installation.

Features and Specifications

- Corrosion resistant heat flowed epoxy finish
- Low current drain
- Operating voltage range -20% to +10% of nominal voltage
- Power connection wires embedded in sealing compound
- Not recommended for temperatures below 25°F (-3.9°C)
- Diode Polarized versions
- NEMA Type 4X rated
- UL listed for Class I, Div. 1 and 2, Groups B, C and D; Class II, Div. 1 and 2, Groups E, F and G; and Class III locations

Horns
Vibrating
870EX Series

The Edwards 870EX Series are diode polarized, heavy-duty, high decibel, vibrating horns. They are intended for use in hazardous locations requiring electrical supervision of signaling circuit field wiring, including fire alarm systems. May also be used for unsupervised signaling applications.

Two mounting brackets are provided on either side of the unit for wall mounting.

Features and Specifications

- Diode polarized
- Red corrosion resistant heat flowed epoxy finish
- Low current drain
- Operating voltage range -20% to +10% of nominal voltage
- Not recommended for temperatures below 25°F (-3.9°C)
- Power connection wires embedded in sealing compound
- UL listed for Class 1, Div. 1 and 2, Groups B, C and D; Class II, Div. 1 and 2, Groups E, F and G; Class III locations

Horns
Vibrating
870EX2 Series

NEW
Coming Soon

The 870EX2 Series are heavy-duty, high decibel, Class 1, Div. 2 vibrating horns designed for use in indoor or outdoor hazardous locations.

Diode polarized versions are also available. They are intended for use in hazardous locations requiring electrical supervision of signaling circuit field wiring. May also be used for unsupervised signaling applications.

Two mounting brackets are provided on either side of the unit for wall mounting. The housing is tapped on one side for 3/4" conduit to allow for field wiring installation.

Features and Specifications

- Corrosion resistant heat flowed epoxy finish
- Suitable for use in indoor or outdoor hazardous locations
- 100-107dB @ 1m (90-97dB @ 10ft.)
- Low current drain
- Operating voltage range -20% to +10% of nominal voltage
- Power connection wires embedded in sealing compound
- Diode Polarized versions
- NEMA Type 4X rated **(878DDIV2, 879DDIV2, 878DIV2, 879DIV2)**
- UL listed for Class I, Div. 2, Groups B, C and D; Class II, Groups F and G; and Class III locations
- Operating temperature range: 25ºF to 104ºF (-4ºC to 40ºC)

Horns
Vibrating
118 and 123A Series

118 Series DC and 123A Series AC Midi Vibrating Horns are designed primarily for security systems and for signaling devices on an OEM basis. Supplied with mounting bracket and simply attaches to mounting surface using #8-32 screw.

Features and Specifications

- Low power drain
- Compact size
- Shock resistant
- Easy surface mount installation
- Operating temperature range: -40°F to 180°F (-40°C to 82°C)

Horns
Projector/Double Projector
B93 Class

The B93 Class are designed for use where a loud and distinctive signal is needed. The sound mechanism of the signal starts and stops instantly with current impulse. The projector is connected to the heavy duty die cast aluminum housing by a cast aluminum, threaded ring.

Two mounting lugs are provided on either side of the unit for wall mounting. The housing is tapped on one side for 1/2" (13mm) conduit to allow for field wiring installation.

Features and Specifications

- Convenient plug-in assembly
- Corrosion resistant heat flowed epoxy finish
- Completely assembled
- Gasket sealed
- External volume control screw
- Heavy duty die cast aluminum
- 7" (178mm) seamless steel projector
- Vibrating diaphragm
- Tungsten contacts with arc suppressor **(B-8526 and B-8599)**
- NEMA Type 4X enclosure

Horns
Projector
B93 Class

The B-KM-8130 Series is a heavy-duty, high decibel, vibrating horn signal designed for use in hazardous locations.

Two mounting lugs are provided on either side of the unit for wall mounting. The housing is tapped on one side for 1/2" (13mm) conduit to allow for field wiring installation.

Features and Specifications

- Intermittent Duty Cycle: 5 minutes on/ 5 minutes off
- Corrosion resistant electrostatic heat flowed epoxy finish
- Cast aluminum housing and ring
- Seamless steel projector
- 5" (127mm) spring steel diaphragm
- 5 1/2" (140mm) projector
- UL listed for Class 1, Div. 1 and 2, Groups C and D; Class II Div. 1 and 2, Groups E, F and G; and Class 1, Groups A and B, Div. 2 locations

Horns
Electronic
860 Series

The 860 Series are low current, high decibel, surface mount, flush or panel mount electronic horns for indoor use.

The 867 has been designed for surface mounting with the gray, corrosion resistant, surface mount box supplied with the unit. The 869 and 869D Series are designed for flush or panel mounting. The 868 Series is a low current, high decibel, surface mount, electronic horn suitable for outdoor or indoor use. It has been designed for mounting with the back box supplied.

The 868 mounts, using the supplied gasket, to the gray, corrosion resistant surface box supplied with the unit.

Features and Specifications

- Diode polarized **(869D)**
- Low current draw
- High dB output
- Terminals for easy wiring
- May be used in outdoor applications by using with 869-WPB back box
- Complete with surface back box **(867)**
- Complete with gasket and surface back box **(868)**
- Gray flame resistant housing
- Engineered thermoplastic housing
- Operating voltage: -20% to +10% of nominal voltage
- Indoor Operating Environment: 93% relative humidity at 104ºF (40ºC); 32ºF to 120ºF (0ºC to 49ºC) variable ambient **(867, 869, 869D)**
- Outdoor Operating Environment: 98% relative humidity at 104ºF (40ºC); -31ºF to 150ºF (-35ºC to 66ºC) variable ambient **(868)**
- cUL listed **(869D only)**

Titan Class

The Titan Class are low current, high performance, high decibel audible signals designed for hazardous locations. They can be mounted on any surface using three bolts. Flying leads allow for quick installation.

The 5522MD is diode polarized and primarily intended for use in hazardous location applications requiring electrical supervision of signaling circuit field wiring. These signals may also be used for unsupervised signaling applications.

Features and Specifications

- Corrosion resistant electrostatic heat flowed powder epoxy gray finish
- Fitted with factory sealed 1/2" (13mm) threaded pipe nipple for quick installation
- Diode polarized versions for supervised circuits
- Speaker swivels 180° vertically or horizontally depending on orientation of mounting bracket **(5522MD-AW)**
- 30" (762mm) wire leads
- Horn frequency - 982 Hz
- UL listed for Class I, Div. 1 and 2, Groups B, C and D

Horns
Motor Driven
Klaxet Series

The Klaxet is a motor driven horn with the unique 'Klaxon' sound. The high output, changing frequency note delivers a powerful warning tone which can be heard above background noise in industrial applications. The Klaxet is suitable for time signaling, process control alarms, telephone extension ringing and cranes. Manufactured with a cast iron housing, the Klaxet is suitable for outdoor applications.

Features and Specifications

- Powerful, high output
- 111dB @ 1m (101dB @ 10ft.)
- Cast iron construction
- IP54 rated
- Operating temperature range: -4ºF to 104ºF (-20ºC to 40ºC)

Horns
Motor Driven
A1 Series

The A1 is a motor driven horn with the unique 'Klaxon' sound. The high output, low frequency resonating sound provides a powerful warning tone. With a sound output of 120dB, it is ideal for use as a time signaling alarm or process alarm in a factory environment. In addition, the A1 is suitable for use in marine applications.

Features and Specifications

- Powerful, high output
- Rated for 2 minutes on, 5 minutes off
- 120dB @ 1m (110dB @ 10ft.)
- IP65 rated
- Die cast aluminium, zinc and mild steel construction
- ABS plastic
- Suitable for outdoor and marine applications
- Operating temperature range: -31ºF to 150.8ºF (-35ºC to 66ºC)

Horns and Sirens
Electronic
D2 Class

Edwards D2 Class devices are low current, high performance, high decibel audible signals which may be coded from an external source or used as a continuous alarm. They are designed to function as either a horn or siren by setting an internal, tamper proof switch.

The 5520D is primarily intended for use in applications requiring electrical supervision of signaling circuit field wiring. These signals may also be used for unsupervised signaling applications.

Features and Specifications

- 124dB audible signal at 1m (114dB @ 10ft.)
- Suitable for outdoor applications using 349 Back Box
- Switchable horn or siren or horn models
- Easy mounting plate speeds installation
- Diode polorized for supervised circuits **(5520D)**
- Horn frequency of 1.1 KHz
- Siren frequency rises and falls from 600 to 1300 Hz every 3 seconds
- Speaker swivels 180° horizontally and 90° vertically

Klaxon Sirens
Manual Operation
Lightweight Series

The lightweight hand operated siren is designed to provide effective warning in applications where there is no power supply such as camp sites, civil defense, mountain rescue and coast guard warning.

The siren is lightweight, can be easily transported to remote locations and folds up to a small and compact size for ease of handling.

This model comes complete with carry case, making it the ideal choice where portability is crucial.

Features and Specifications

- No power supply required
- Lightweight model for portability
- Powerful low frequency sound
- Universally recognized signal
- Carry case included
- 2 tones: continuous and warble
- 600 Hz nominal frequency (Dependent on rotation speed)

Klaxon Sirens
Motor Driven
Duplo Series

The Duplo is a powerful rugged motor driven siren which produces a very high sound output despite its physically compact construction.

Suitable for outdoor applications, the Duplo can be used for general safety warning.

Features and Specifications

- High output siren sound (127dB @ 1m/117dB @ 10ft.)
- Cast aluminum body
- ABS rotor, stator and cover
- Rugged construction for use in indoor and outdoor environments
- IP65 rated
- Long life and run time
- Mounting bracket for ease of installation
- Operating temperature range: -22ºF to 113ºF (-30ºC to 45ºC)

Klaxon Sirens
Motor Driven
Mono Series

The Mono 72 is a powerful motor driven siren which produces a clear, high output siren sound.

Suitable for indoor and outdoor applications, the Mono 72 can be used for general safety warning.

Due to its rugged construction, the Mono 72 can be used in applications such as mining and quarrying.

Features and Specifications

- High output siren sound (120dB)
- Rugged construction for use in all environments
- IP65 rated
- Mounting bracket for ease of installation
- Construction is cast aluminum body, ABS Rotor, Stator and cover
- Operating temperature range: -22ºF to 113ºF (-30ºC to 45ºC)

Klaxon Sirens
Motor Driven
Mono Series

The Mini Mono P is a small motor driven siren designed for fire and general alarm signalling.

Designed for ease of mounting, it has a separate mounting plate which connects to the main body with a bayonet locking action and has a locking screw for additional security.

The mounting plate is suitable for surface mounting or for use with a conduit box depending on installation requirements.

Features and Specifications

- High quality siren sound
- Bayonet mounting plate for ease of installation
- High impact ABS
- IP44 rated
- Operating temperature range: -22ºF to 131ºF (-30ºC to 55ºC)

Klaxon Sirens
Motor Driven
Super M Series

The Super M Series are powerful motor driven sirens which emit a very high sound output. Designed for surface mounting, they have a separate mounting bracket which may be secured in position first to allow for easy installation. In addition, they come pre-wired with 1 meter of cable.

They are suitable for outdoor applications when wall mounted.

The Super M is ideal for applications where a higher sound output is required, such as in areas of high background noise.

Features and Specifications

- High output siren sound (127dB)
- Separate mounting bracket for easy installation
- Long life and run time
- Suitable for use in indoor and outdoor applications
- ABS construction
- Operating temperature range: -22ºF to 113ºF (-30ºC to 45ºC)

Electronic Audible Signals
Multi-Tone Signal – Single Input, Single Output
Millennium Class

The Millennium Class are heavy-duty industrial, tone-selectable, signaling devices capable of producing volume-controlled, high-decibel tones. Selected models are designed to serially connect to RS485 networks. The 5530MV-485Y6 additionally has a field recordable voice feature that allows activation of voice messages over the RS485 network.

Features and Specifications

- User selectable 55 tone capability - No additional tone modules needed
- Output up to 120dB @ 1m (110dB @ 10ft.)
- Output up to 123dB @ 1m (113dB @ 10ft.) **(5530MHV Series)**
- Captive components
- RS485 models supervised
- Diode polarized for supervisory circuits **(5530MD-24AW)**
- Speaker can be rotated and locked in any horizontal direction
- 24V DC battery backup terminals provided
- NEMA Type 3R
- UL listed for Class 1, Div. 2, Groups A, B, C and D; Class II, Div. 2, Groups F and G; Class III hazardous locations

Electronic Audible Signals
Multi-Tone Signal – Two Input, Two Output
Titan Class

The 5533M and 5533MD signals are explosion-proof, heavy-duty industrial, tone-selectable, audible signaling devices capable of producing volume-controlled, high-decibel tones. The signal accepts up to two contact closures and delivers one or two audible output signals selected from the 55 tones available.

Features and Specifications

- User selectable 55 tone capability - No additional tone modules needed
- Internal volume control
- Corrosion resistant heat flowed epoxy finish
- Supplied with factory sealed 1/2" (13mm) threaded fitting for quick installation
- Diode polarized for supervised circuits **(5533MD)**
- Speaker swivels 180° vertically or horizontally depending on orientation of mounting bracket
- 30" (762mm) numbered wire leads
- Heavy duty zinc cast construction
- UL listed for Class 1, Div. 1 and 2, Groups B, C and D, hazardous locations

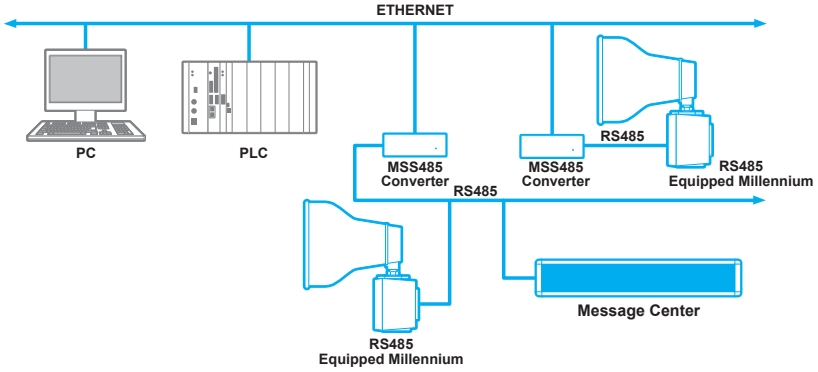
Electronic Audible Signals
Connectivity and Activation
Millennium Class

5530MV Series
Millennium

PLC Connectivity

The Millennium Class products are designed to be directly connected to a PLC (Programmable Logic Controller) that utilize the most common control voltages—24V DC and 120V AC @ 60 Hz. Each of the Millennium products list the specific signal load characteristics such as the Operating Voltage, Continuous On Input Current, Off State Leakage Current Maximum and Surge current (inrush/duration).



RS485 Activation

Select Millennium Units have been designed for serial communication and activation in RS485 networks. Refer to the list below for model numbers.

Activation Voltages

Depending on the model no., the inputs to the Millennium Class products can be activated by closing a dry contact, such as a relay or switch or by applying an externally generated voltage to the input terminals. In addition, the units may accept either 24V DC or 120V AC inputs.

The 120V AC input configuration is used on all models with "-120xx" in the suffix (where xx = the operating voltage code) and the 24V DC input configurations on models with "-24xx" in the suffix of the catalog number (where xx = the operating voltage code). When using dry contact inputs the models configured for 24V DC ("-24xx" suffix) inputs should be used. Reference "Model Activation Voltage" table below for the activation voltage for each model.

Electronic Audible Signals
System Master Panel
Millennium Class

The 5541M Millennium System Master is a fully supervised personnel notification control system for both emergency facility evacuation, and non-emergency process control and plant-wide signaling communications.

The System Master may be used for ancilliary Fire Alarm evacuation by tying into an existing fire alarm system.

The 5532M Series Speaker/Amplifier is used for sound output. Up to 200 speaker/amplifiers can be connected to the system master.

Features and Specifications

- 67 tones
- 4 zone control with zone paging
- Audio, voice and power supervision
- Microphone and external input supervision
- Up to four 5-second voice messages or one 20-second message
- Remote programming and diagnostics
- Phone paging from PBX systems
- Up to 64 satellite units addressable through RS485
- Output and trouble relays designed for fail-safe operation
- Top, side and bottom knockouts for easy wire entry
- LED alarm, standby power and status indications
- Activates LED text displays
- Easy to adjust audio output

Electronic Audible Signals
Tone Generator
Millennium Class

The 5540M Millennium Central Tone Generator provides simultaneous signaling of a high decibel, heavy duty signal. The tone generator assures a synchronous signaling sound from all remote speakers.

The 5540MV Millennium Central Tone Generator features pre-recorded voice messaging and can store 20 seconds of field recorded voice messages.

The 5540MP Millennium Central Tone Generator, when used with the 5542RPU Remote Paging Unit, provides voice paging and other audio output. The paging/voice signal is inputed into the Remote Paging Unit via either an audio pair or the 5542MIC series microphone.

Features and Specifications

- User Selectable 55 tone capability– No additional tone modules needed
- Captive Components
- Centralized programmable tone selection
- System-wide priority tone selection
- RS485 models available
- 24V DC battery backup terminals
- Short Circuit protected
- 20 sec. of field recorded Voice **(5540MV)**
- Built in Presignal tone option on first message location **(5540MV)**
- Voice paging **(5540MP)**
- NEMA Type 3R and IP44 rated
- UL listed for Class I, Div. 2, Groups A, B, C and D; Class II, Div.2, Groups F and G; and Class III hazardous locations

Electronic Audible Signals
System Speaker Amplifier
Millennium Class

Millennium Class System Speaker Amplifiers have been designed for high decibel system operation when connected to the 5540M Central Tone Generator or 5541M System Master Panel.

The 5532M-485Y6 and 5532MHV-485Y6 are designed to be connected to RS485 networks, allowing full signaling communication control.

The 5532MD-70AW is a diode polarized units designed for use in applications requiring electrical supervision of signaling circuit field wiring.

Features and Specifications

- Output up to 120dB @ 1m (110dB @ 10ft.) **(5532M and 5532MD)**
- Output up to 123dB @ 1m (113dB @ 10ft.) **(5532MHV)**
- Corrosion resistant electrostatic heat flowed epoxy finish
- Individual volume control
- Suitable for Division 2 Locations
- Captive Components
- RS485 model available
- Diode Polarized models **(5532MD)**
- 24V DC battery backup terminals
- NEMA Type 3R and IP44 rated
- UL listed for Class 1, Div. 2, Groups A, B,C and D; Class II, Div. 2, Groups F and G; and Class III hazardous locations

Electronic Audible Signals
Speaker Amp
Millennium Class

The 5560M Millennium Mini-Mi™ is a compact tone and voice generator which is completely modular in construction. The 5560M base unit is supplied with or without a 110 candela strobe. The strobe turns on when power is supplied. One of five optional modules may be installed in the base unit.

The 5560M is configured for stand-alone operation when installed with the 556T-M Tone Module Board. One tone may be dipswitch selected from a field of 55 tones and will be played whenever power is applied to the unit. When installed with the 556T-M485 Tone Module Board, any of the available 55 tones can be activated over a RS485 Network.

Features and Specifications

- Compact, modular design allows unit to be configured with tone, voice, audio coupling or RS485
- 10, 25 or 70.7VRMS audio input boards available
- Internal volume control
- Strobe and diode polarized fire alarm models
- Suitable for outdoor applications when mounted to outdoor back box
- Rugged Lexan construction tone, voice, audio coupling or RS485
- NEMA Type 3R **(Mini-Mi models only)**
- 90dB @ 1m (80dB @ 10ft.)

The 5545M Hazardous Location Remote Speaker/ Amplifier has been designed for high decibel system operation when connected to the 5540M Central Tone Generator or 5541M System Master Panel.

Features and Specifications

- Corrosion resistant electrostatic heat flowed epoxy finish
- Individual volume control
- Speaker swivels 180° vertically or horizontally depending on orientation of mounting bracket
- 30" (762mm) numbered wire leads
- Supplied with factory sealed 1/2" (13mm) threaded fitting for quick installation
- Heavy duty zinc cast construction
- 100dB @ 1m (90dB @ 10ft.)
- UL listed for Class 1, Div. 1 and 2, Groups B, C and D harzardous locations

Electronic Audible Signals
Paging Devices
Millennium Class

5542RPU Remote Paging Unit
Sends audio page to, and is powered by the 5540MP-24Y6. Input is received from a microphone input or audio pair signal source such as phone PBX. Indoor, Type 2 enclosure when flush wall mounted. Indoor, Type 12 or 2 when mounted to outdoor listed 4" square utility box. Outdoor, Type 3R and Indoor Type 12 or 2 when mounted with 5542WPK to outdoor listed 4" square utility box.

5542RPU-M Remote Paging Unit
Same as 5542RPU but includes 5542MIC-H Hand Held Microphone.

5542MIC-H Hand Held Microphone
Optional. May be plugged into 5542 RPU either permanently or as needed.

5542MIC-D Desktop Microphone
Optional. May be plugged into 5542RPU either permanently or as needed.

5542WPK Mounting Kit Optional. Intended for use with 5542RPU or 5542RPU-M to provide Type 3R outdoor protection for the 5542RPU series.

Mounting kit for use with the 5542 Series Remote Paging Unit. The mounting kit is UL Listed, CSA Certified and has a Type 3R rating when mounted to the box (included).

MR-201/C Relay
Optional. Used to enable the audio output from the 5540MP-24Y6 to override output from other sources to the same 5532B or 5532BHV series, 5532M or 5532MHV series, 5536M or 5536MHV series, and 5545B series products in the system.

Features and Specifications

- Suitable for outdoor applications when mounted with 5542WPK
- Optional Desk Microphone
- Removeable Microphones
- UL 464 and cUL C22.2 listed No. 205
- NEMA Type 3R

Yellow Rose of Texas	19.34 sec. of melody followed by 1 sec. delay & repeat	3B		X		

EDWARDS

Safety: Priority 1

"With lives at stake, there is no room for error.

In our facility, ensuring employee safety is ALWAYS our top priority.

That's why when it comes to choosing hazardous location signaling products, we always turn to Edwards.

It's that simple."

Product Index

Working in a hazardous environment is not a challenge to be taken lightly. Designed for Division 1 and 2 hazardous locations, Edwards offers UL and cUL listed signaling devices for just about any facility installation. Rigid specifications, flexibility and state-of-the-art technology provide for high performance and low maintenance operation – creating the ideal signaling solution.

Beacons: Explosionproof
Multi-Mode LED
116 Series

NEW

The 116 Series LED Beacon is suitable for use in explosionproof and hazardous location applications such as oil platforms, refineries, granaries and chemical plants. UL and cUL listed for use in Class 1, Division 1 and 2 applications, this beacon is designed for areas requiring high visibility and notification as well as low maintenance. The long life LEDs reduce maintenance requirements by up to 90% when compared to a Xenon strobe tube. The LED light emits a 360-degree beam of light with 13 user selectable flash patterns in addition to a steady-on mode.

These beacons are UL and cUL listed for outdoor use as NEMA Type 3R, 4X, and Marine Rated enclosures. Mounting options are available (ordered separately) for ceiling, wall, pendant and stanchion mounts. The unit is supplied with a guard installed over the clear dome for additional protection against impact.

Features and Specifications

- Multi-mode LED (steady-on plus thirteen flash patterns)
- LED light source
- Five lens colors
- Ceiling, pendant, wall or stanchion mounting options (ordered separately)
- NEMA Type 3R, 4X and Marine Rated enclosures
- Explosionproof: Class I, Div 1, Groups C and D; Class I, Div 2, Groups A, B, C and D; Class II, Div 1 and 2, Groups E, F and G;Class III, Div 1 and 2

NOTE: Mounting options not included (ordered separately)

Beacons: Intrinsically Safe
Flashing LED
Klaxon Syrex Series

The Syrex IS beacon is an intrinsically safe visual beacon suitable for use in hazardous area applications.

With a low current consumption, the Syrex IS beacon is ideal for both warning and process control applications.

The Syrex IS beacon must be used with a galvanic isolator specified by the system certificates.

Features and Specifications

- LED light source
- Rated for Category 1
- ATEX approved
- Ⓔx II 1G EEx ia IIC T4
- ABS flame retardant UL94V0 and 5VA housing
- IP65 rated
- Flash rate 2 Hz or 1 Hz (double flash)
- Operating temperature range: -40ºF to 140ºF (-40ºC to 60ºC)

Beacons: Explosionproof
Flashing Xenon
116 Series

NOTE: Mounting options not included (ordered separately)

Edwards 116DEXMST-FJ and 116EXMST Series Xenon strobe beacons are explosionproof, signaling devices suitable for use in hazardous indoor or outdoor applications requiring NEMA Type 3R or 4X installations. The housing is cast aluminum with a corrosion resistance epoxy powder coat, and includes a dome guard. The fluted, high-impact glass dome provides even light distribution.

The 116DEXMST-FJ Series is Diode Polarized for use in electrically supervised circuits. Both versions can be bracket, ceiling, pendant or stanchion mounted.

Features and Specifications

- Xenon strobe light source
- Flash rate 65 fpm
- High impact glass dome, dome guard included
- Quick connect for easy assembly and installation
- Diode Polarized for use in electrically supervised circuits (116DEXMST-FJ Series only)
- Suitable for indoor and outdoor hazardous applications
- Bracket, ceiling, pendant or stanchion mounting options (ordered separately)
- NEMA Type 3R and 4X enclosure
- Explosionproof: Class I, Div 2, Groups A and B, Class I, Div 1 and 2, Groups C and D; Class II and III, Div 1, Groups E, F and G; Class II and III, Div 2, Groups F and G

Beacons: Explosionproof
Flashing Xenon
116 Series

Edwards 116DEXSTC-FJ Series Xenon strobe beacons are explosionproof, signaling devices suitable for use in hazardous indoor or outdoor applications requiring NEMA Type 3R or 4X installations. The housing is cast aluminum with a corrosion resistance epoxy powder coat, and includes a dome guard. The fluted, high-impact glass dome provides even light distribution.

The 116DEXSTC-FJ Series is Diode Polarized for use in electrically supervised circuits, such as fire alarm systems. The strobe, when wall, ceiling or pendant mounted, is UL 1971 listed (ADA) for indoor visual signaling applications for the hearing impaired in non-sleeping areas. The unit can be stanchion mounted as well (non-fire alarm use).

Features and Specifications

- Xenon strobe light source
- Flash rate 65 fpm
- High impact glass dome, dome guard included
- Quick connect for easy assembly and installation
- Diode Polarized for use in electrically supervised circuits
- Suitable for indoor and outdoor hazardous applications
- Bracket, ceiling, pendant or stanchion mounting options (ordered separately)
- NEMA Type 3R and 4X enclosure
- UL 1971 Listed (ADA)
- Explosionproof: Class I, Div 2, Groups A and B; Class I, Div 1 and 2, Groups C and D; Class II and III, Div 1, Groups E, F and G; Class II and III, Div 2, Groups F and G

NOTE: Mounting options not included (ordered separately)

116 Series

NEW

NOTE: Mounting options not included (ordered separately)

Edwards 116 Series Genesis fire alarm strobe is designed for use in Class 1, Division 1 and 2 explosionproof and hazardous location applications where electrical supervision is required. The diode-polarized strobe is intended for indoor use in UL 1971 listed compatible fire alarm systems and is ADA compliant for the hearing impaired.

116 Series Genesis strobe provides 125 cd ceiling and 60 cd wall light output. With the guard installed, the strobe flashes with an output of 86 cd ceiling and 51 cd wall.

These units are UL 1638 and cUL listed for outdoor use as a NEMA Type 3R and 4X enclosure; and Canada (cUL) to Canadian standard ULC-S526-07 suitable for indoor or outdoor applications.

The strobes are designed to flash at the same rate (synchronize) when used with a compatible sychronization source, such as the EG1M-RM synchronization module, E-FSC and E-FSA fire panels, and EBPS series booster supplies.

Features and Specifications

- Xenon light source
- Flash rate 60 fpm
- Clear globe with dome guard
- Three mounting options: wall, ceiling, or pendant (ordered separately)
- Negligible in-rush current
- Approved for fire alarm applications
- NEMA Type 3R and 4X enclosures
- Can be synchronized when connected to a compatible Edwards control panel, booster power supply or synchronization module
- UL 1638, UL 1971 and cUL Listed
- Explosionproof: Class I, Div. 2, Groups A and B; Class I, Div. 1 and 2, Groups C and D; Class II, Div. 1, Groups E, F, G and Class III; Class II, Div. 2, Groups F, G and Class III.

116 Series

NEW

Edwards 116 Series mass notification strobes are designed for use in Class 1, Division 1 and 2 explosionproof and hazardous location (non fire alarm) applications where electrical supervision is required. The units feature two lenses, an outer clear globe, and an inner colored lens available in amber, red, green, blue or magenta.

This diode-polarized unit is UL 1638 and cUL listed for outdoor use as a NEMA Type 3R and 4X enclosure.The strobe has been evaluated to UL 1971 polar plot requirements with on axis light output values.

The 116 Series features an enhanced synchronization circuit to comply with the latest requirements of UL 1971, signaling devices for the hearing impaired, and the Canadian standard CAN/ULC S526. Synchronized operation requires a separately installed synchronization control module, compatible Edwards control panel or booster power supply.

Mounting options are available (ordered separately) for wall, ceiling and pendant mounts. The unit is supplied with a guard installed over the clear outer globe for additional protection against impact.

Features and Specifications

- Xenon light source
- Clear globe with dome guard
- Five lens colors
- Flash rate 60 fpm
- Three mounting options: wall, ceiling, or pendant (ordered separately)
- Negligible in-rush current
- Can be synchronized when connected to a compatible Edwards control panel, booster power supply or synchronization module
- NEMA Type 3R and 4X enclosures
- Explosionproof: Class I, Div 1, Groups C and D; Class I, Div 2, Groups A and B; Class I, Div 1 and 2, Groups C and D; Class II and III, Div 1, Groups E, F and G; Class II and III, Div 2, Groups F and G.

The Exd Beacon is a powerful Xenon beacon suitable for use in hazardous area applications. Certified to II 2G Exd IIC T6, it is suitable for use in Zone 1 and Zone 2 areas. With a choice of two lens colors (red and amber), IP67 ingress protection and rugged design, it is suitable for use in indoor and outdoor applications.

The unit is fitted with two 20mm cable entries and has terminals that accept 4mm² cable for ease of installation. Dual In/Out terminals are also available on request.

Features and Specifications

- Xenon light source
- Marine Grade LM6 aluminum construction
- Lens guard included with beacon
- IP67 rated
- Rated for Category 2 use (formerly Zone 1 & 2)
- ATEX / IECEx Approved
- Ⓔx II 2G Exd IIC T6
- Operating temperature range: -58°F to 104°F (-50°C to 40°C)

Beacons: Explosionproof
Rotating Halogen
116 Series

Edwards 116EXMRIN Series rotating beacons are explosionproof, signaling devices suitable for use in hazardous indoor or outdoor applications. The housing is cast aluminum with a corrosion resistance epoxy powder coat, and includes a dome guard. The fluted, high-impact glass dome provides even light distribution. The unit can be bracket, ceiling, pendant or stanchion mounted.

Features and Specifications

- Halogen light source
- High impact glass dome, dome guard included
- Quick connect for easy assembly and installation
- Suitable for indoor or outdoor hazardous applications
- 75 rotations per minute
- Bracket, ceiling, pendant or stanchion mounting options (ordered separately)
- NEMA Type 3R and 4X enclosure
- Marine rated
- Explosionproof: Class I, Div 2, Groups A and B; Class I, Div 1 and 2, Groups C and D; Class II and III, Div 1, Groups E, F and G; Class II and III, Div 2, Group G

Beacons: Explosionproof
Steady-On Halogen
116 Series

Edwards 116 Series steady-on beacons are explosionproof signaling devices, suitable for hazardous indoor or outdoor applications. The housing is cast aluminum with a corrosion-resistant epoxy powder coat, and includes a dome guard. The fluted, high-impact glass dome provides even light distribution.

Features and Specifications

- Halogen light source
- Cast aluminum housing with epoxy powder coat and dome guard
- Quick connect for easy assembly and installation
- Suitable for use in indoor, outdoor, hazardous and marine applications
- NEMA Type 3R and Type 4X – Marine Rated
- Cast aluminum housing
- Pendant, ceiling, bracket or stanchion mounting options (ordered separately)
- Explosionproof: Class I, Div 2, Groups A and B; Class I, Div 1 and 2, Groups C and D; Class II and III, Div 1, Groups E, F and G; Class II and III, Div 2, Group G

NOTE: Mounting options not included (ordered separately)

Multi-Status LED
105XBRi Series

NEW

Edwards 105XBRi Series XTRA-BRITE™ LED multi-status indicator is a UL and cUL listed, multicolor visual signaling device. It features a corrosion resistant NEMA Type 4X enclosure, listed for Marine use, and can be wall, surface or pipe mounted. The base is manufactured from from glass-reinforced thermoplastic polyester resin, providing high resistance to heat and high chemical resistivity. The double Fresnel lens is made of shatter resistant polycarbonate.

Features and Specifications

- LED light source
- Screw on, high-impact polycarbonate lens
- Gray Rynite® (PET) base
- XTRA-SAFE™ Technology[1] enables status indication for those who are color blind
- Dip switch settings for use with or without external control
- Flash rates
  - – Red 240 fpm
  - – Amber 120 fpm
  - – Green/Blue 65 fpm
- NEMA Type 4X enclosure
- Class I, Div. 2, Groups A, B, C and D; Class II, Div 2, Groups F and G; Class III
- Suitable for indoor and outdoor applications
- Option for wall, surface or pipe mounting
- Optional mounting not included
- Operating temperature range: -31F° to 150°F (-35°C to 66°C)

Multi-Mode LED
107XBR Series

NEW

The 107XBR hazardous location XTRA-BRITE™ LED visual signals are NEMA Type 3R and Type 4 heavy-duty visual signals suitable for use in indoor or outdoor applications. The units are available in 24V DC or 120V AC and are field configurable for steady-on or flashing (65 fpm). The inner, double fresnel lens is made of a high grade polycarbonate and is designed to magnify the super-bright LEDs inside. A clear, outer, impact-resistant glass globe also covers the lens and an optional dome guard fits over the glass dome to protect it against accidental impacts with machinery or falling objects.

The 107XBR has three different mounting configurations including the pendant mount, bracket mount and ceiling mount and can be mounted on 3/4" NPT threaded conduit.

Features and Specifications

- Multi-mode (flashing or steady-on)
- LED XTRA-BRITE™ light source
- Flash rate 65 fpm
- Five lens colors
- 3/4" NPT threaded conduit
- High level of immunity to shock and vibration
- Three mounting options: pendant, bracket or ceiling
- UL Listed for Class I, Div 2, Groups A, B, C, D; Class II, Div 1, Groups E, F, G; Class II, Div 2, Groups F and G; Class III, Div 1

105XBR Series

NEW

Edwards 105XBR Series XTRA-BRITE™ LED beacons are heavy-duty, multi-mode signaling devices, available in steady-on with the built-in option of switching to flashing mode via dipswitch. These signals are designed for use in industrial applications or applications where a NEMA Type 4X enclosure is required. The base is manufactured from glass-reinforced thermoplastic polyester resin and the double fresnel lens is made of shatter resistant polycarbonate. The unit can be panel, conduit or wall mounted.

Features and Specifications

- Multi-mode (flashing or steady-on)
- LED light source
- Flash rate 65 fpm
- Gray Rynite® (PET) base
- Option for panel, conduit or wall mounting
- NEMA Type 4X enclosure
- UL Listed for Marine applications
- Class I, Div 2, Groups A, B, C and D; Class II, Div 2, Groups F and G; Class III

Flashing Xenon
105 Series

Edwards 105 Series Xenon strobe beacons are heavy-duty visual signals suitable for use in indoor and outdoor applications where a corrosion resistant NEMA Type 4X enclosure is required. Base material is gray, manufactured from glass-reinforced thermoplastic polyester resin and features brass hardware. The double fresnel lens is made of shatter-resistant polycarbonate.

The 105DHISTC-FJ high intensity strobe is designed for use in compatible fire alarm system and other applications requiring electrical supervision of signaling circuit field wiring.

Features and Specifications

- Xenon strobe light source
- Flash rate 65 fpm
- Shatter-resistant double fresnel polycarbonate lens
- Gray Rynite® (PET) base with brass hardware
- Suitable for indoor, outdoor and marine applications
- For outdoor use, lens should face up
- Option for panel, conduit or wall mounting
- NEMA Type 4X enclosure
- Class I, Div 2, Groups A, B, C and D; Class II, Div 2, Groups F and G; Class III

Beacons
Flashing Xenon
96 Series

Edwards 96DV2 Series Xenon strobe beacons are light duty visual signals suitable for use in industrial, commercial and institutional applications where short term intermittent visual signaling is required. Optically designed fresnel lenses improve viewer perception for indoor, outdoor and wet locations requiring Division 2 and NEMA Type 4X specifications.

The 96DV2 Series can be panel or conduit mounted. Trigger and timing circuits are included as integral parts of the power supply. Replacement costs are reduced, as it is necessary to replace only the strobe tube.

Features and Specifications

- Xenon strobe light source
- Flash rate 65 fpm
- Optically designed fresnel lenses
- Resistant to shock and vibration
- Suitable for indoor and outdoor applications
- For outdoor use, lens should face up
- NEMA Type 4X enclosure
- Class I, Div 2, Groups A, B, C and D; Class II, Div 2, Groups F and G; Class III
- Option for panel or conduit mounting
- Operating temperature range: -31°F to 150°F (-35°C to 66°C)

Flashing Xenon
94 Series

Edwards 94 Series Xenon strobe beacons are heavy-duty visual signals suitable for use where more frequent and longer lasting signaling cycles may be required. Optically designed fresnel lenses improve viewer perception for indoor and outdoor applications. The base is cast metal and can be utilized as a junction box.

The 94DV2 Series Division 2 Xenon strobe beacons are high profile visual signals suitable for outdoor and wet locations requiring a UL Listed, NEMA Type 4X enclosure. The 94DDV2 Series is Diode Polarized for use in electrically supervised circuits. Both versions can be conduit mounted.

Features and Specifications

- Xenon strobe light source
- Cast base can function as a junction box
- Optically designed fresnel lenses
- Suitable for indoor and outdoor applications
- For outdoor use, lens should face up
- Conduit mounting
- NEMA Type 4X enclosure
- Class I, Div 2, Groups A, B, C and D; Class II, Div 2, Groups F and G; Class III

Flashing Xenon
107 Series

Edwards 107DDV2 and 107DV2 Series Xenon strobe beacons are signaling devices designed for installation in Division 2 environments requiring a NEMA Type 3R or 4X installation. Rigid specifications and state-of-the-art technology provide for high visual output and low maintenance.

The 107DDV2 Series is Diode Polarized for use in electrically supervised circuits. Both versions can be bracket, ceiling or pendant mounted.

Features and Specifications

- Xenon strobe light source
- Flash rate 65 fpm
- High impact glass dome
- Dome Guard (Optional)
- NEMA Type 3R and 4X enclosure
- Suitable for indoor, outdoor and marine applications
- Option for bracket, ceiling or pendant mount
- Class I, Div 2, Groups A, B, C and D; Class II, Div 1, Groups E, F and G; Class II, Div 2, Groups F and G; Class III

Beacons
Steady-On Halogen
105 Series

Edwards 105 Series steady-on Halogen beacons are NEMA Type 4X signaling devices, suitable for indoor or outdoor applications where a continuous (steady-on) light source is required. Base material is gray, manufactured from glass-reinforced thermoplastic polyester resin and features brass hardware. The double fresnel lens is made of shatter-resistant polycarbonate.

Features and Specifications

- Halogen light source
- Shatter-resistant double fresnel polycarbonate lens
- Gray Rynite® (PET) base with brass hardware
- Suitable for use in indoor, outdoor and marine applications
- NEMA Type 4X and Marine rated
- Option for panel, conduit or wall mounting
- Class 1, Div 2, Groups A, B, C and D; Class II, Div 2, Groups F and G; Class III

Rotating Halogen
58 Series

Edwards 58 Series rotating beacons are heavy-duty visual signals suitable for use in hazardous indoor and outdoor applications where a corrosion resistant NEMA Type 4X enclosure is required. Features a bayonet base and a polycarbonate dome allows for easy cleaning. Ideal for use in high ambient noise applications where audible or visual signals are difficult to distinguish.

Features and Specifications

- Halogen light source
- Motor driven reflector
- Bayonet base lamp socket
- 3/4" NPT conduit or surface mounting
- Suitable for indoor or outdoor hazardous applications (with conduit mounting)
- For outdoor use, lens should face up
- NEMA Type 4X enclosure
- Class I, Div 2, Groups A, B, C and D; Class II, Div 2, Groups F and G; Class III, Div 1
- Operating temperature range: -31°F to 150°F (-35°C to 66°C)

Klaxon Sounder Beacons: Intrinsically Safe
Electronic Tone
Syrex Series

The Syrex IS sounder/beacon is an intrinsically safe alarm which provides an audible and visual warning signal in hazardous area applications.

With three alarm stages and a low current consumption, the Syrex IS sounder/beacon is ideal for both fire and process control applications.

The Syrex IS sounder/beacon must be used with a galvanic isolator specified by the system certificates.

Features and Specifications

- LED light source
- Choice of 49 tones
- Choice of lens colors
- Flash rate 2Hz or 1Hz (double flash)
- Auto synchronized sound output
- ABS flame retardant UL94V0 and 5VA housing
- Volume control
- IP65 rated
- Rated for Category 1
- Ⓔx II 1G EEx ia IIC T4
- Operating temperature range: -40ºF to 140ºF (-40ºC to 60ºC)

Bells: Explosionproof
Single Stroke
330EX Series

Edwards 330EX Series single stroke bells produce a clearly defined note for timing, scheduling, paging and general alarm applications. Coded, intermittent current may be used to cause the striker to gong, pause and strike again for any specified period of time. Designed for use in hazardous locations, they have a NEMA Type 4 housing.

Features and Specifications

- Single stroke or coded intermittent stroke
- Completely assembled
- Sealing fitting for 3/4" (19mm) conduit and wire leads for power connections
- Mounts directly on surface
- Self-compensating solenoid plunger
- Low power drain for efficient operation over long wire runs
- Available with 6" or 10" gongs
- Corrosion resistant heat flowed epoxy finish
- Suitable for use in outdoor applications
- NEMA Type 4 housing
- UL Listed for Class I, Divisions 1 and 2, Groups B, C & D; Class II, Divisions 1 and 2, Groups E, F & G; and Class III

Bells: Explosionproof
Vibrating
340EX and 435EX Series

Edwards 340EX and 435EX hazardous location bells are vibrating bells that produce a long, continuous ringing sound. The striker continues to strike the gong in rapid-fire as long as current is applied. They feature an explosionproof, NEMA Type 4 housing.

Features and Specifications

- 6", 8" and 10" gong sizes
- Completely assembled
- Corrosion resistant finish
- Mounts directly on any solid surface
- Low power draw for efficient operation over long runs
- Suitable for use in outdoor applications
- Adjustment free self-compensating solenoid plunger
- UL listed for Class I, Divisions 1 and 2, Groups B, C and D; Class II, Divisions 1 and 2, Groups E, F and G; Class III
- NEMA Type 4 enclosure

Bells: Explosionproof
Vibrating
439DEX Series

Edwards 439DEX Series hazardous location fire alarm bells are DC vibrating bells that produce a long, continuous ringing sound. The striker continues to strike the gong in rapid-fire as long as current is applied. Diode polarized models are available for use in electrically supervised circuits.

Features and Specifications

- 6", 8" and 10" gong sizes
- Completely assembled
- Corrosion resistant gray epoxy finish
- Suitable for use in indoor applications
- Mounts directly on any solid surface
- Low power draw for efficient operation over long runs
- Adjustment free self-compensating solenoid plunger
- Wire leads and sealing fitting for connection to 3/4" conduit
- UL listed for Class I, Divisions 1 and 2, Groups B, C and D; Class II, Divisions 1 and 2, Groups E, F and G; Class III

Klaxon Bells: Explosionproof
Vibrating
Syrex Series

The Klaxon Bell is designed for use in Zone 1 and 2 areas and is suitable for outdoor applications. The Syrex Series Bells are IP66 rated and certified to ATEX II 2G Exd e IIC T6.

With a sound output of up to 105dB, it provides a clear signal which stands out against background noise.

The housing is manufactured from glass fiber reinforced polyester with stainless steel fittings. In addition, all DC versions are equipped with a non-wearing electronic contact breaker.

Features and Specifications

- Clear audible signal designed to penetrate background noise
- Glass fiber reinforced polyester construction with stainless steel fittings
- IP66 rated
- Rated for Category 2 use (formerly Zone 1 & 2)
- ATEX approved
- II 2G Exd e IIC T6
- Operating temperature range: -4°F to 104°F (-20°C to 40°C)

Buzzers: Explosionproof
Vibrating
B93 Series

The B-KM-8140 and B-8141 series are quality, heavy duty AC and DC buzzers designed for use in hazardous locations. The sound is produced by the hammer action of a vibrating armature against the cover. The buzzers are provided with two mounting lugs for wall mounting.

Features and Specifications

- Cast aluminum housing and cover
- Corrosion resistant heat flowed powder epoxy finish
- UL listed for Class 1, Div. 1 and 2, Groups C and D, Class 1, Zones 1 and 2, Groups II A and II B, Class II, Div. 1 and 2, Groups E, F and G.

Buzzers: Explosionproof
Klaxon
Syrex Series

The Klaxon Buzzer is an explosion proof buzzer designed for use in hazardous areas where a distinctive signal is required. Certified to ATEX II 2G Exd e IIC T6, it is suitable for use in Zone 1 and Zone 2 areas.

Producing a tone with low frequency, it cuts through background noise more effectively than many other devices of a similar output.

Mounted in a rugged reinforced polyester case and rated to IP66, it is suitable for use in outdoor applications.

Features and Specifications

- Heavy duty buzzer
- Rugged construction
- Glass Fiber reinforced polyester construction
- IP66 rated case
- Rated for Category 2 use (formerly Zone 1 & 2)
- ATEX approved
- Ex II 2G Exd e IIC T6

Klaxon Sounders: Intrinsically Safe
Electronic
Syrex Series

The Syrex IS Sounder is an intrinsically safe alarm sounder which provides an audible warning signal in hazardous area applications.

With three alarm stages and a low current consumption, the Syrex IS Sounder is ideal for both fire and process control applications.

The Syrex IS sounder must be used with a galvanic isolator specified by the system certificates.

Features and Specifications

- Choice of 49 tones
- Auto synchronized sound output
- ABS flame retardant UL94V0 and 5VA housing
- IP65 rated housing
- Volume control
- Operating temperature range: -40ºF to 140ºF (-40ºC to 60ºC)

Klaxon Sounders
Electronic
Syrex Series

The EXD-3 is an electronic sounder designed for potentially explosive atmospheres and harsh environmental conditions. Certified to II 2G EExd IIC T4, it is suitable for use in Zone 1 and 2 areas.

With an ingress protection rating of IP67 and a choice of tones including those covering PFEER/ UKOOA requirements, it is suitable for use in almost any application. The EXD-3 gives the user a choice of the 1st stage alarm tone with stages 2 and 3 fixed at manufacture.

The unit features two 20mm cable entries and has terminals that accept 4mm² cable for ease of installation.

Features and Specifications

- Choice of 32 tones
- Suitable for outdoor applications
- Volume control
- Marine grade LM6 aluminium construction
- Operating temperature range: -58ºF to 131ºF (-50ºC to 55ºC)
- IP67 rated
- ATEX / IECEx Approved
- Rated for Category 2 use (formerly Zone 1 & 2)
- EXII 2G Exd IIC T4

Horns: Explosionproof
Vibrating
870EX Series

The 870EX Series vibrating horns are heavy-duty, explosion-proof, high decibel horns designed for use in hazardous locations.

Diode polarized versions are also available. They are intended for use in hazardous locations requiring electrical supervision of signaling circuit field wiring. May also be used for unsupervised signaling applications.

Two mounting brackets are provided on either side of the unit for wall mounting. The housing is tapped on one side for 3/4" conduit to allow for field wiring installation.

Features and Specifications

- Corrosion resistant heat flowed epoxy finish
- Low current drain
- Operating voltage range -20% to +10% of nominal voltage
- Power connection wires embedded in sealing compound
- Not recommended for temperatures below 25°F (-3.9°C)
- Diode Polarized versions
- NEMA Type 4X rated
- UL listed for Class I, Div. 1 and 2, Groups B, C and D; Class II, Div. 1 and 2, Groups E, F and G; and Class III locations

Electronic
Titan Class

The Titan Class are low current, high performance, high decibel audible signals designed for hazardous locations. They can be mounted on any surface using three bolts. Flying leads allow for quick installation.

The 5522MD is diode polarized and primarily intended for use in hazardous location applications requiring electrical supervision of signaling circuit field wiring. These signals may also be used for unsupervised signaling applications.

Features and Specifications

- Corrosion resistant electrostatic heat flowed powder epoxy gray finish
- Fitted with factory sealed 1/2" (13mm) threaded pipe nipple for quick installation
- Diode polarized versions for supervised circuits
- Speaker swivels 180° vertically or horizontally depending on orientation of mounting bracket **(5522MD-AW)**
- 30" (762mm) wire leads
- Horn frequency - 982 Hz
- UL listed for Class I, Div. 1 and 2, Groups B, C and D

Horns: Explosionproof
Projector
B93 Class

The B-KM-8130 Series is a heavy-duty, high decibel, vibrating horn signal designed for use in hazardous locations.

Two mounting lugs are provided on either side of the unit for wall mounting. The housing is tapped on one side for 1/2" (13mm) conduit to allow for field wiring installation.

Features and Specifications

- Intermittent Duty Cycle: 5 minutes on/ 5 minutes off
- Corrosion resistant electrostatic heat flowed epoxy finish
- Cast aluminum housing and ring
- Seamless steel projector
- 5" (127mm) spring steel diaphragm
- 5 1/2" (140mm) projector
- UL listed for Class 1, Div. 1 and 2, Groups C and D; Class II Div. 1 and 2, Groups E, F and G; and Class 1, Groups A and B, Div. 2 locations

Horns
Vibrating
870EX2 Series

NEW
Coming Soon

The 870EX2 Series are heavy-duty, high decibel, Class 1, Div. 2 vibrating horns designed for use in indoor or outdoor hazardous locations.

Diode polarized versions are also available. They are intended for use in hazardous locations requiring electrical supervision of signaling circuit field wiring. May also be used for unsupervised signaling applications.

Two mounting brackets are provided on either side of the unit for wall mounting. The housing is tapped on one side for 3/4" conduit to allow for field wiring installation.

Features and Specifications

- Corrosion resistant heat flowed epoxy finish
- Suitable for use in indoor or outdoor hazardous locations
- 100-107dB @ 1m (90-97dB @ 10ft.)
- Low current drain
- Operating voltage range -20% to +10% of nominal voltage
- Power connection wires embedded in sealing compound
- Diode Polarized versions
- NEMA Type 4X rated **(878DDIV2, 879DDIV2, 878DIV2, 879DIV2)**
- UL listed for Class I, Div. 2, Groups B, C and D; Class II, Groups F and G; and Class III locations
- Operating temperature range: 25ºF to 104ºF (-4ºC to 40ºC)

Sirens: Explosionproof
Electronic
Titan Class

The Titan Class devices are low current, high performance, high decibel audible signals designed for hazardous locations. They can be mounted on any surface using three bolts. Flying leads allow for quick installation.

5523M Series are primarily intended for use in hazardous location applications requiring electrical supervision of signaling circuit field wiring. These signals may also be used for unsupervised signaling applications.

Features and Specifications

- Corrosion resistant electrostatic heat flowed powder epoxy gray finish
- Fitted with factory sealed 1/2" (13mm) threaded pipe nipple for quick installation
- Diode polarized version for supervised circuits
- Speaker swivels 180° vertically or horizontally depending on orientation of mounting bracket **(5523MD-AW)**
- 30" (762mm) wire leads
- Siren frequency - rises and falls from 600 to 1250 Hz every 8 seconds
- UL listed for Class I, Div. 1 and 2, Groups B, C and D

Ordering Information

Description	Cat. No.	Operating Voltage[1]	Current	dB at 1m/10ft.

Electronic Audible Signals: Explosionproof
Multi-Tone Signal – Two Input, Two Output
Titan Class

The 5533M and 5533MD signals are explosion-proof, heavy-duty industrial, tone-selectable, audible signaling devices capable of producing volume-controlled, high-decibel tones. The signal accepts up to two contact closures and delivers one or two audible output signals selected from the 55 tones available.

Features and Specifications

- User selectable 55 tone capability - No additional tone modules needed
- Internal volume control
- Corrosion resistant heat flowed epoxy finish
- Supplied with factory sealed 1/2" (13mm) threaded fitting for quick installation
- Diode polarized for supervised circuits **(5533MD)**
- Speaker swivels 180° vertically or horizontally depending on orientation of mounting bracket
- 30" (762mm) numbered wire leads
- Heavy duty zinc cast construction
- UL listed for Class 1, Div. 1 and 2, Groups B, C and D, hazardous locations

Electronic Audible Signals: Explosionproof
Speaker Amp
Titan Class

The 5545M Hazardous Location Remote Speaker/ Amplifier has been designed for high decibel system operation when connected to the 5540M Central Tone Generator or 5541M System Master Panel.

Features and Specifications

- Corrosion resistant electrostatic heat flowed epoxy finish
- Individual volume control
- Speaker swivels 180° vertically or horizontally depending on orientation of mounting bracket
- 30" (762mm) numbered wire leads
- Supplied with factory sealed 1/2" (13mm) threaded fitting for quick installation
- Heavy duty zinc cast construction
- 100dB @ 1m (90dB @ 10ft.)
- UL listed for Class 1, Div. 1 and 2, Groups B, C and D harzardous locations

Electronic Audible Signals
Multi-Tone Signal – Four Input, Four Output
Millennium Class

The Millennium Class are heavy-duty industrial, tone-selectable, audible signaling devices capable of producing volume-controlled, high-decibel tones. In addition, the 5531MV Series can produce up to 20 seconds of field recorded voice messages.

Features and Specifications

- User selectable 55 tone capability - No additional tone modules needed
- Output up to 120dB @ 1m (110dB @ 10ft.) **(5531M and 5531MV)**
- Output up to 123dB @ 1m (113dB @ 10ft.) **(5531MHV)**
- Suitable for Division 2 Locations
- Built-in cascading priority system
- Captive components
- Speaker can be rotated and locked in any horizontal direction
- NEMA Type 3R and IP44 rated
- UL listed for Class 1, Div. 2, Groups A, B, C and D; Class II, Div. 2, Groups F and G; Class III hazardous locations

Electronic Audible Signals
Tone Generator
Millennium Class

The 5540M Millennium Central Tone Generator provides simultaneous signaling of a high decibel, heavy duty signal. The tone generator assures a synchronous signaling sound from all remote speakers.

The 5540MV Millennium Central Tone Generator features pre-recorded voice messaging and can store 20 seconds of field recorded voice messages.

The 5540MP Millennium Central Tone Generator, when used with the 5542RPU Remote Paging Unit, provides voice paging and other audio output. The paging/voice signal is inputed into the Remote Paging Unit via either an audio pair or the 5542MIC series microphone.

Features and Specifications

- User Selectable 55 tone capability– No additional tone modules needed
- Captive Components
- Centralized programmable tone selection
- System-wide priority tone selection
- RS485 models available
- 24V DC battery backup terminals
- Short Circuit protected
- 20 sec. of field recorded Voice **(5540MV)**
- Built in Presignal tone option on first message location **(5540MV)**
- Voice paging **(5540MP)**
- NEMA Type 3R and IP44 rated
- UL listed for Class I, Div. 2, Groups A, B, C and D; Class II, Div.2, Groups F and G; and Class III hazardous locations

Intercoms
Industrial
5570 Series

The Edwards 5570M intercom is a heavy-duty UL and cUL listed signal appliance designed for use in industrial and hazardous location applications.

The 5570M can be configured by means of a slide switch. The AC line has a 1/2 amp 250-volt type GMC fuse. Operating selections include balanced or unbalanced line operation and modes of Master or Satellite can be selected.

The unit features a transformer isolated audio input and a choice of one of four selectable alert tones. For indoor applications where ambient noise is high, a hand-held noise cancelling microphone kit is available.

Features and Specifications

- Suitable for use in indoor and outdoor hazardous locations
- Balanced or unbalanced line operation
- Master or satellite modes
- Four selectable alert tones
- Marine rated
- UL Class 1, Div. 2, Groups A, B, C and D
- Operating temperature range: -31°F to 150°F (-35°C to 66°C)

Speakers
Notification Appliances
Millennium Class

The Edwards 5553 Series Speakers are UL Listed, Class 1, Div. 2 hazardous location audible signaling appliances for use in conjunction with compatible control equipment. They produce audible emergency and protective signals as well as voice messages. They accept system audio input levels of 25 or 70 volts RMS.

The Edwards 5553 Series comply with the requirements of UL Standard 1480, Fire Protective Signaling Speakers. The speakers are suitable for outdoor use with a UL1480 wet locations rated enclosure. They include a supervisory capacitor and are suitable for installation in systems employing supervised circuitry.

Speaker direction is adjustable and the output wattage is adjustable via an internal rotary switch.

Features and Specifications

- Suitable for use in outdoor and hazardous locations
- Speaker swivels
- Adjustable up to 15 watts maximum
- 113 dB at 1 meter/103 dB at 10 ft.
- Frequency range 400Hz to 4000Hz
- UL listed for Class I, Div. 2, Groups A, B, C and D; Class II, Div. 2, Groups F and G; Class III, Div. 1 and 2
- Operating temperature range: -40ºF to 104ºF (-40ºC to 40ºC)

Conventional Fire Alarms : Explosionproof
Heat Detectors, Rate Compensation
302 Series

Box mount

Edwards Series 302 heat detectors are suitable for use in indoor environments and explosive atmospheres. They are normally-open devices designed to close an electrical circuit upon activation. All models feature rate compensation and are available with either 135°F (57.2°C) or 194°F (90°C) ratings. These self-restoring, hermetically sealed detectors are shock-, corrosion- and tamper-resistant.

Features and Specifications

- Rate compensation offsets thermal lag
- Self-restoring – no manual reset required
- Explosionproof, Class 1, Groups C and D; Class 2, Groups E, F and G
- Box mount

Conventional Fire Alarms: Explosionproof
Harsh Environment Pull Stations
MPSR Series

The Edwards MPSR1-D45WX-GE is an explosion-proof manual pull station constructed of die-cast material. All components are pre-painted or have plated surfaces to inhibit corrosion, and are suitable for outdoor use.

The pull station is rated for Class I, Group B (hydrogen), C and D; Class II, Groups E, F and G; and Class III environments.

The pull station is single action with a key reset and a set of double-pole (double throw) alarm contacts rated for 10 amps. The pull station can be converted to double action with the addition of the MPSR-LP double action cover.

Features and Specifications

- Solid corrosion-resistant construction
- Surface mount backbox and gasket, suitable for outdoor use, included
- Positive activation
- Terminals for wire connections
- NEMA 4X enclosure
- Operating temperature range: -30°F to 150°F (-35°C to 66°C)
- Single-action convertible to double-action operation
- Key lock reset
- Double pole contacts

Conventional Fire Alarms
Hazardous Location Smoke Detector
V9006 Series

The V9006-0001-013 Hazardous Location Smoke Detector is suitable for use in hazardous industrial and commercial locations.

It uses a solid state infrared emitting diode (IRED) and a light sensing photovoltaic cell arranged in a labyrinth assembly. A recessed photodiode provides voltage for amplification to “alarm signal” level. The main enclosure of the detector contains the electronics, alarm relay, supervision relay and facilities for connection to system wiring.

Each detector contains one set of Form A (SPST) N/O contacts for connection to the alarm initiating circuit and a set of (SPST) N/C power supervision contacts.

The detector locks in on alarm and has a lock-in alarm indicator (LED) on the outer surface of the housing. Detector reset is achieved by momentary interruption of power.

Features and Specifications

- Labyrinth assembly
- Self-checking components
- Infrared (IRED) light emitting diode as light source
- CSA certified for use in Class I, Div. 2, Groups A, B, C and D locations
- Residual ripple less than 2% of DC input
- Operating temperature range: -4ºF to 140ºF (-20°C to 60°C)

EDWARDS

Minutes Matter

"I rest easier knowing that Edwards devices are installed throughout the Assisted Living Center that I manage.

Those pull cords and call for assistance stations can become a lifeline for our residents in urgent need of help after a fall or other unexpected emergency.

When every minute matters, I choose Edwards."

Product Index

Edwards' call for assistance devices come as simple as a wall switch with a pull string, to the call notification of a horn/strobe outside a public restroom. Edwards provides emergency communication products that offer security and peace of mind.

Call for Assistance Kits
CFA Series

The Edwards 6538-G5 24 volt Call For Assistance Kit is designed for areas where a call-for-help or an emergency switch is required. The kit consists of a 6536-G5 horn/strobe for audible and visual notification, a 6537 emergency pull cord station, and a 592 transformer. Each component may also be ordered individually.

6536-G5 Horn/Strobe

The 6536-G5 Horn/Strobe is designed for use in a single gang 2" (51mm) x 4" (102mm) box typically located over the door. Each unit contains an audible horn signal which generates an 82 dBA sound pressure level at 10 ft. and a 50 cd strobe. See page 6-12.

592 Transformer

The Edwards 592 transformer is used to power the horn/strobe. It is equipped with a grounding wire and is suitable for installation in both plastic and metal boxes. See section 7, page 7-25.

6537 Pull Cord Switch

The 6537 pull cord station provides emergency call activation and reset. It has a stainless steel face plate with a DPST switch. See page 6-14.

Features and Specifications

- Kit includes 6536-G5 Horn/Strobe, 592 Transformer and 6537 Pull Cord Switch
- Double pole single throw switch
- Neutral white color
- Fits single gang box
- UL 1638 listed - Horn/Strobe

Call for Assistance Kits
CFA Series

The Edwards 7008B-N5 120 volt Call For Assistance Kit is designed for areas where a call-for-help device is required. The kit consists of a 7007B-N5 buzzer/strobe for audible and visual notification and a 6537 emergency pull cord station for activation. Each component may also be ordered individually.

7007B-N5 Buzzer/Strobe

The 7007B-N5 buzzer/strobe is designed for installation in a single gang 2" (51mm) x 4" (102mm) box located over doors. Each unit contains an audible signal which generates an 82 dBA sound pressure level at 10 ft. and a 150 cd strobe. The unit draws 115 mA.

6537 Pull Cord Switch

The 6537 pull cord switch provides emergency call activation and reset. It has a stainless steel face plate with a DPST switch.

Features and Specifications

- Kit includes 7007B-N5 Buzzer/Strobe and 6537 Pull Cord Switch
- Double pole single throw switch
- Neutral white color
- Fits single gang box
- 92dB buzzer at 1 meter/82dB at 10ft.

Hotel Room Annunciator
CFA Series

The Edwards 7005-G5 24 volt Hotel Room Annunciator is for use in hotel rooms and other areas designed to assist those with audible, visual, or physical impairments. The kit consists of a 6536-G5 horn/strobe for audible and visual signaling, a 620 push button, a 147-10 mounting plate, and a 592 transformer. Each component may also be ordered individually.

6536-G5 Horn/Strobe

The 6536-G5 Horn/Strobe is designed for use in a single gang 2" (51mm) x 4" (102mm) box located over the door. Each unit contains an audible horn signal which generates an 82 dBA sound pressure level at 10 ft. and a 50 cd strobe.

592 Transformer

The Edwards 592 transformer is used to power the horn/strobe. It is equipped with a grounding wire and is suitable for installation in both plastic and metal boxes.

620 Push Button

The 620 push button station provides call activation when installed in the 147-10 mounting plate (page 6-10). The plate has a stainless steel face. The switch is momentary.

Features and Specifications

- Kit includes 6536-G5 Horn/Strobe, 592 Transformer and 620 Push Button
- Neutral white color
- Fits single gang box
- 92dB buzzer at 1 meter/82dB at 10ft.
- UL 1638 listed - Horn/Strobe

EDWARDS

Hear to Stay

"I just read somewhere that Edwards was the first company to introduce an electric door bell in 1896. And they also patented the first electric bell in 1904.

It's no surprise that Edwards has been in business for 140 years. They make superior quality products that people really trust to do the job.

Reliable, dependable people and products that I trust . . . for me, that's Edwards."

Push Buttons
Low Voltage
59 Series

Edwards 59 Series is a low voltage, high amperage push button designed for 3/4" (19mm) hole force fit. Flat white button center prevents accidental operation.

Features and Specifications

- Snap fit for 3/4" (19mm) hole
- Normally open momentary contacts

Ordering Information

Push Buttons
Low Voltage
250 Series

The 250 is a low voltage, high amperage push button designed for simultaneous operation of two or three devices from one central point.

The 255 is a low voltage, high amperage push button designed for use where the simultaneous breaking of one circuit and the making of another is required.

Features and Specifications

- Fully insulated
- Multiple contacts
- Momentary contacts
- 250 has 3 normally open contacts
- 255 has 1 normally open,1 normally closed contact

Push Buttons
Low Voltage
600 Series

These low voltage, panel mount push buttons feature large terminals and normally open momentary contacts. Models with an illuminated center for use in unlighted areas are available.

They may be used with the 147-1 mounting plate or 147-10 room annunciator mounting plate.

Features and Specifications

- Polished chrome or brass
- Insulated for mounting on metal cabinets
- Snap fit
- Normally open momentary contacts
- Illuminated and non-illuminated models

Push Buttons
Low Voltage
600 Series

Low voltage, panel mount push buttons with three types of centers: recessed, flush, or protruding. Each button has a phosphor bronze contact spring with a long duration wiping action. The button back is constructed of Zytel 101 nylon.

May be used with 147-1 mounting plate.

Features and Specifications

- AC or DC up to 48 volts
- Recessed, flush or protruding button models
- Polished, anodized aluminum shell
- Snap fit or locknut type mounting
- Normally open momentary contacts

AC

Push Buttons
High Voltage
800 Series

The 850 and 854 Push Buttons are rugged, fast make and break contact push buttons that operate regardless of how pressure is applied or released. The buttons have insulated, protective sleeves and phosphor bronze, self cleaning contacts that withstand shock and vibration.

Both push buttons panel mount in a 7/8" (22mm) hole using the supplied locknut. Also mounts in a 7/8" (20mm) hole that has been tapped with straight pipe threads.

May be used with 149-1 mounting plate.

Features and Specifications

- Locknut mounting
- Convenient screw terminals
- Normally open contacts (**850**)
- Normally closed contacts (**854**)
- Momentary contacts
- 3" wire leads (**850**)
- UL registered (**850**)

Push Buttons
High Voltage
800 Series

The Edwards 851 Push Button is a high voltage pendant type button. Its shell is constructed out of shock resistant polypropylene. The pendant will fast make and break regardless of how pressure is applied.

Features and Specifications

- Quick make and break
- Shock resistant polypropylene construction
- High voltage - up to 250 volts
- Vibration resistant phosphor bronze, self cleaning contacts
- 6" (152mm) No.16 pigtail leads

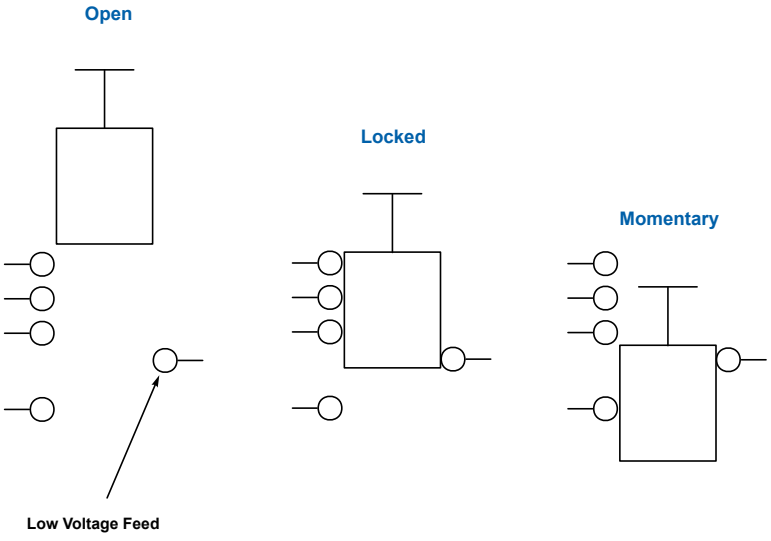
Contact Arrangements



Transformers
AC - Class 2
590 Series

Edwards 590 Series Class 2 Signaling Transformers are easy to install, low voltage power sources for residential, commercial, and industrial uses.

Mounts in a standard 1/2" (13mm) knockout or surface mounts using the provided foot mounts. These transformers are suitable for mounting in both plastic and metal back boxes. May also be used with the 593 transformer plate for enclosed mounting in a standard two gang outlet box.

The 591 transformer is suitable for standard doorbells and chimes in residential and commercial applications requiring 16 volts AC.

The Edwards 598, 598Y, 599 and 599Y transformers offer high power for long wire runs or for applications requiring greater power such as door openers.

Features and Specifications

- Non-regenerative thermal overload protection
- Grounding wire
- Pre-stripped primary side pigtails
- Screw terminal connections on secondary

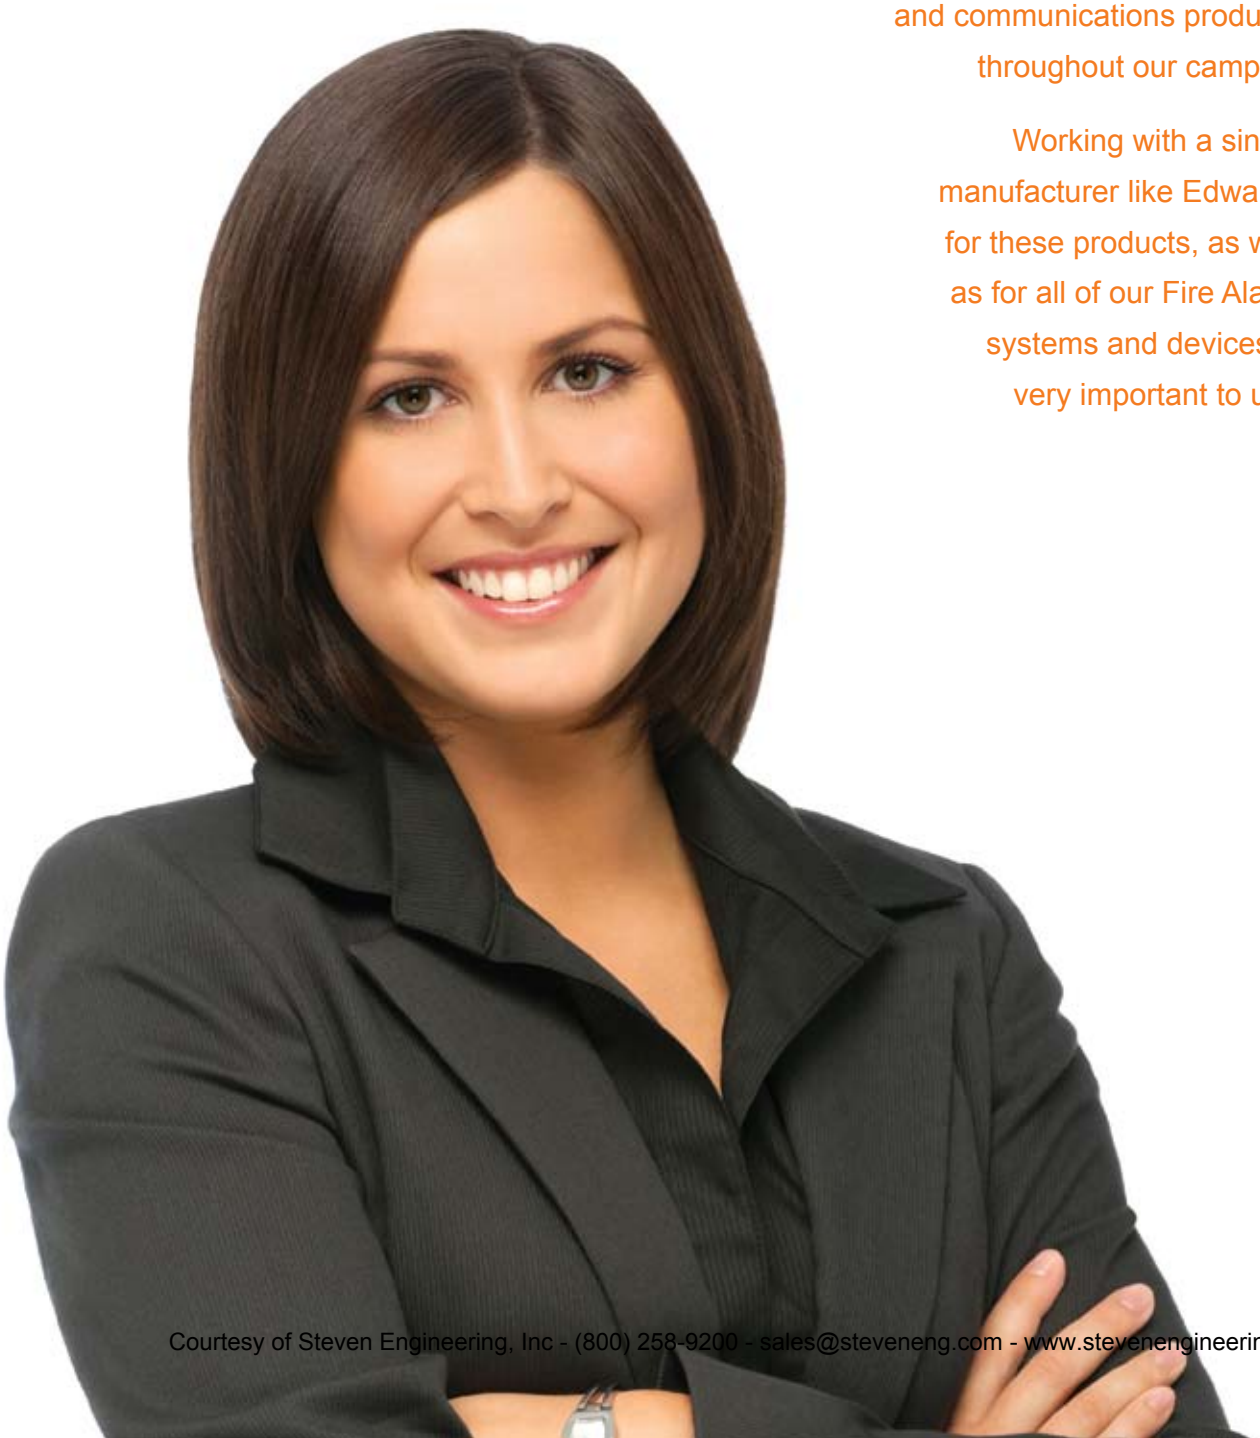
Sound Logic

"For many years we have standardized on Dukane sound and communications products throughout our campus.

Working with a single manufacturer like Edwards for these products, as well as for all of our Fire Alarm systems and devices is very important to us."



Courtesy of Steven Engineering, Inc - (800) 258-9200 - sales@steveneng.com - www.stevenengineering.com

Product Index

When it comes to sound and communications technology, the Dukane brand has long been regarded as a leader. Our products are engineered for high performance and flawless operation. Now for the first time, the full line of Dukane over-the-counter products is available through Authorized Edwards Signaling Distributors.

Intercoms
Industrial
5570 Series

The Edwards 5570M intercom is a heavy-duty UL and cUL listed signal appliance designed for use in industrial and hazardous location applications.

The 5570M can be configured by means of a slide switch. The AC line has a 1/2 amp 250-volt type GMC fuse. Operating selections include balanced or unbalanced line operation and modes of Master or Satellite can be selected.

The unit features a transformer isolated audio input and a choice of one of four selectable alert tones. For indoor applications where ambient noise is high, a hand-held noise cancelling microphone kit is available.

Features and Specifications

- Suitable for use in indoor and outdoor hazardous locations
- Balanced or unbalanced line operation
- Master or satellite modes
- Four selectable alert tones
- Marine rated
- UL Class 1, Div. 2, Groups A, B, C and D
- Operating temperature range: -31°F to 150°F (-35°C to 66°C)

Speakers
Re-Entrant
Millennium Class

The 5552 speaker is a high-efficiency, double re-entrant loudspeaker that delivers 15-watts of continuous power. It is suitable for use in fire alarm and life safety applications and is UL 1480 listed as a fire protective signaling speaker.

The 5552 speaker includes a versatile, two-way, 25/70.7 V line transformer that meets a variety of distributed system needs. The transformer is adjustable by means of a convenient seven-position, watts/impedance selection switch that is screwdriver adjustable and includes a protective cover with built-in cable strain relief.

The 5552 speaker includes a mounting bracket that, with a single adjustment, provides positioning in both the vertical and horizontal planes. It also allows the 5552 to be installed on conventional surfaces or strap-mounted on I-beams or pillars.

Features and Specifications

- High intelligibility for voice and tone signaling
- 120dB at 1 meter/110dB at 10 ft.
- Suitable for installation on supervised circuits
- Suitable for use in indoor and outdoor applications
- Available in gray or red finish
- Epoxy-coated metal and ABS plastic components
- Includes 25/70.7 transformer for line applications
- Sensitivity:
  - –120dB at 15 watts (peak)/1 meter
  - –116dB at 15 watts/1 meter (avg.)
  - –106dB at 1 watt/1 meter (avg.) 500-600 Hz
- 1/2" conduit connection
- 70° dispersion
- Adjustable bracket for precise positioning
- Operating temperature range: -30°F to 150°F (-35°C to 66°C)

Speakers
Notification Appliances
Millennium Class

The Edwards 5553 Series Speakers are UL Listed, Class 1, Div. 2 hazardous location audible signaling appliances for use in conjunction with compatible control equipment. They produce audible emergency and protective signals as well as voice messages. They accept system audio input levels of 25 or 70 volts RMS.

The Edwards 5553 Series comply with the requirements of UL Standard 1480, Fire Protective Signaling Speakers. The speakers are suitable for outdoor use with a UL1480 wet locations rated enclosure. They include a supervisory capacitor and are suitable for installation in systems employing supervised circuitry.

Speaker direction is adjustable and the output wattage is adjustable via an internal rotary switch.

Features and Specifications

- Suitable for use in outdoor and hazardous locations
- Speaker swivels
- Adjustable up to 15 watts maximum
- 113 dB at 1 meter/103 dB at 10 ft.
- Frequency range 400Hz to 4000Hz
- UL listed for Class I, Div. 2, Groups A, B, C and D; Class II, Div. 2, Groups F and G; Class III, Div. 1 and 2
- Operating temperature range: -40ºF to 104ºF (-40ºC to 40ºC)

Phone Relays
Surface Mount - Indoor
B93 Class

The Edwards B93 Class electro-mechanical, pressed steel, telcode relays are designed to activate horns, buzzers and bells. The unit's windings are rated in ohms rather than volts. Wire size and number of turns vary with resistance requirements.

The B-8316 Series relay is supplied with a capacitor; the B-8315 Series is not.

Unit mounts to any flat surface using the mounting holes on 3 3/8" (86mm) centers. 1/2" (13mm) and 3/4" (19mm) knockouts are provided for input and output wiring.

Relays operating on AC ringing voltage and used on common battery circuits require capacitors. Relays operating on DC ringing voltages do not require capacitors unless energized by a common battery.

Features and Specifications

- Long-life tungsten contacts
- Gray finish
- High grade copper coils
- Hinged cover
- Normally open circuit relay
- Two shading coils prevent armature chatter
- Designed for POTS (plain old telephone service) operation
- FCC approval (B-8316 Series only)

B93 Class

The Edwards B93 Class, electro-mechanical telcode relays are designed to activate horns, buzzers and bells. The unit's windings are rated in ohms rather than volts. Wire size and number of turns vary with resistance requirements.

The B-8323 Series relay is supplied with a capacitor; the B-8322 Series is not.

Unit mounts to any flat surface using the mounting lugs on 6 3/4" (171mm) centers. Use 1/2" (13mm) conduit for input and output wiring.

Relays operating on AC ringing voltage and used on common battery circuits require capacitors. Relays operating on DC ringing voltages do not require capacitors unless energized by a common battery.

Electronic
B93 Class

The Edwards B-ER-2000 electronic telcode relay is designed to activate remote extension signals such as horns, bells, strobes, or similar devices. The relay is activated by the line ringing voltage of the telephone; operation of the connected signal matches the telephone ringing cycle. The unit is designed for indoor use only.

The unit mounts to any flat surface using the supplied hardware. All telephone, power input, and signal output connections are made internal to the unit.

Features and Specifications

- Hardwired unit
- Suitable for use in indoor applications
- AC or DC activation voltage
- Suitable for use in indoor applications

Phone Signals
Remote Phone Bell
B93 Class

The Edwards B-KBH-5040-N5 phone bell provides remote indication of telephone operation. The unit is powered by 120V 60 Hz and does not draw current on the phone circuit.

The unit is activated by a solid state, voltage sensing relay and responds to a 16-70 Hz ringing frequency. Operation of the unit matches the ringing cycle of the telephone.

Installs with three screws using the three external mounting lugs.

Features and Specifications

- Suitable for use in indoor applications
- Completely self-contained
- Steel gong
- Solid state relay
- Strain relief connectors for telephone line and 120V power cord
- Designed for POTS (plain old telephone service) operation
- AC or DC activation

Speakers and Speaker Assemblies
Speakers
5A Series

The 5A531 Loudspeaker is well suited for classrooms, offices, meeting rooms, paging and music systems, and most applications requiring a number of eight-inch loudspeakers. This model has a mounted transformer matching 25-volt lines and is tapped at ½ watts of power prior to shipment.

The 5A606 and 5A607 Speaker Assemblies are designed for use in small area music distribution, paging, and intercom systems. Model 5A607 features extended high frequency response, made possible by an additional cone.

Model 5A451 Loudspeaker is a dual voice-coil type designed to work with the 12A957 Emergency Audio Communication System. The second voice coil is provided specifically for that system's electronic supervision feature. The 12A957's trouble detection alarm will be triggered if either physical or electrical damage is done to the speakers.

Features and Specifications

5A531
- 8-inch loudspeaker and assembly with zinc-plated finish
- Efficient magnet structure
- Preassembled with transformer
- Standard EIA mounting dimensions

5A606
- Efficient magnetic structure
- Built for long and continuous use
- Cadmium-plated finish

5A607
- Low mounting profile
- Efficient magnet structure
- Additional cone for extended high frequency response
- Preassembled with transformer
- Standard EIA mounting dimensions
- Cadmium-plated finish

5A451
- Dual voice-coil 8" loudspeaker
- Low mounting profile
- Efficient magnetic structure
- Standard EIA mounting dimensions
- Cadmium-plated finish

Speakers and Speaker Assemblies
Speaker/Transformer Assembly
5A543 Series

The Dukane Model 5A543 Speaker/Transformer Assembly is designed for use where supervision of speaker wiring is required. The 5A543 is equipped with a DC-blocking capacitor for direct current end-of-line supervision.

Features and Specifications

- Capacitor for direct current “end-of-line” supervision
- Low mounting profile
- Standard EIA mounting dimensions
- Cadmium plated finish

Speakers and Speaker Assemblies
Coaxial Loudspeaker
5A700 Series

Photo Not Available

The Dukane Model 5A700 is a multi-purpose 8-inch diameter, 16-watt coaxial loudspeaker for voice transmission, music and signal reproduction. It has a post-mounted tweeter, which adds strength to the assembly. A broad, uniform dispersion pattern of 120° provides highly intelligible sound reproduction and distribution for high-quality sound systems.

The 5A700 combines a full-size 8" (203 mm) diameter low-frequency reproducer and a 3" (76 mm) high-frequency reproducer. The two sections are coupled using a built-in crossover network. The 5A700 mounts to a wide variety of sound baffles and enclosures, with the optimum sealed enclosure size of 0.36 cu. ft.

Features and Specifications

- 70 Hz - 15.5 kHz, ±5dB frequency response
- 120° uniform dispersion pattern
- Woofer has 10 oz ceramic magnet
- Tweeter has 2.35 oz ceramic magnet
- Mounts to wide variety of sound baffles and enclosures

Speakers and Speaker Assemblies

High Plenum Sound Masking Speaker Assembly

6A530B

The Dukane Model 6A530B Background Sound Masking Speaker Assembly is specially designed and built for background sound masking systems. Two 8" flame-retardant speakers are mounted in an 0.8 cubic foot prism shaped enclosure which is constructed of 20 gauge steel. The 25 or 70.7 volt input is fed to an impedance matching transformer.

The bi-directional configuration of the speakers and prism shape of the enclosure provide for optimum angular dispersion of the masking sound. This unit is designed for high plenum areas in excess of 36 inches (.91 m). If the plenum height is 36 inches (.91 m) or less, Model 6A603 should be used. Wiring of the assembly can be altered for out-of-phase operation to provide an area of reduced sound pressure directly below the unit. In this mode of operation, the sound pressure level on the null will be at least 15 dB down from the on-axis pressure

Features and Specifications

- Adjustable polar pattern
- Flame retardant cone
- Variable power taps
- 20 gauge steel construction
- Flat black finish
- Pigtail terminations
- S-hook and chain mounting (chain not supplied with unit)

Ordering Information

Description	Cat. No.	Operating Voltage	Sensitivity
Sound Masking Speaker Assembly	**6A530B**	25V or 70V	96 dB average 1/3 octave readings between 200 and 4000 Hz at 1 meter and 0.5 watts/speaker.

		Width (in.)	Height (in.)	Length (in.)
6A530B	15.0	13	11.75	19

Speakers and Speaker Assemblies

Low Plenum Sound Masking Speaker Assembly

6A603

The Dukane Model 6A603 Sound Masking Speaker is designed for sound masking applications in shallow depth or limited plenum areas. Dual 5-inch (12.7 cm) high efficiency speakers are mounted on a folded aluminum baffle designed to maximize low frequency response from a minimum height installation dimension.

The 6A603 is not hampered by "hot spots" directly below the speaker units, since its design employs the bottom surface of the baffle as an acoustic shield.

This assembly is designed for use in areas where the plenum area height is 36 inches (91.4 cm) or less. If the plenum area exceeds this height, Model 6A530B should be used.

Features and Specifications

- Low frequency response
- Bidirectional sound
- Defined rectangular sound pattern
- Dual voltage transformer with variable power taps
- 9 ft. by 23 ft. rectangular response pattern (minimum of 200 $ft.^2$)
- S-hook and chain mounting (chain not supplied with unit)
- Natural aluminum finish

Speakers and Speaker Assemblies
Speaker Baffle Assembly
6A650

The Dukane Model 6A650 is a speaker, transformer, and speaker baffle assembly. The loudspeaker has an additional whizzer cone for extended high frequency response. The speaker baffle is constructed of steel. The assembly includes a dual voltage 70- and 25-volt matching transformer with taps of 1/2, 1, 2, and 4 watts at 70 volts, and 1/2, 1, and 2 watts at 25 volts.

Features and Specifications

- 8” seamless cone
- 25 and 70-Volt line operation
- Transformer taps: 1/2, 1, 2, and 4 watts at 70 volts; 1/2, 1, and 2 watts at 25 volts
- Cold-rolled steel speaker baffle with white epoxy finish
- Low mounting profile
- Additional whizzer cone for extended frequency response

Amplifiers and Sound Accessories

Audio Power Amplifier, 125 Watts

Model 1B3125

The 1B3125 Power Amplifier is rated at 125 Watts continuous (RMS) power and it contains circuitry for 24 Vdc backup. The Amplifier mounts in a standard 19 in (483mm) rack. Output voltage may be 25 or 70 VRMS. Supply voltage is 120/240 V, 50/60 Hz, or optionally 24-28 Vdc. The Amplifier contains electronic protection safeguards against overloads or shorted output. A thermal overload protection circuit is also included that opens the primary power circuit if the unit overheats. Both protection circuits are self-restoring. The system may incorporate a Standby Amplifier as a backup against any unit failure.

Features and Specifications

- 24 Vdc battery backup
- Broad frequency response
- Low distortion
- Thermal circuit breaker
- Electronic protection
- UL listed under standards 1711, 1480 and 813
- ULC listed

Specifications

Power Output	125 Watts continuous (RMS)
Harmonic Distortion	Less .5% 45 to 20 kHz at rated output
Frequency Response	20 to 20 kHz (+0, -1 dB) per EIA Standard SE 101-A
Signal to Noise Ratio	Greater than -90 dB below rated output (20 to 20 kHz bandwidth)
Input Sensitivity	1 VRMS at 1 kHz for rated output
Input Impedance	75 kOhm
Output Load (Voltage)	75 kOhm (70.7 V) balanced 2.5 kOhm (25 V) balanced 25 V center tap 8 Ohm (31.6 V) balanced
Output Regulation	Better than 1 dB, zero load to full load
Controls	Input level control, rear panel
Terminations	Screw terminal strips, barriers on output
Indicators	LED power, LED Thermal Overload
Power Source	120/240 Volts, 50/60 Hz; 24-28 Vdc
AC Power Required	3.0 Amps (120 V)/ 1.5 Amps (240 V), 0.22 Amps at idle
DC Power Required	11.5 Amps at rated output
Fuse	4 Amp, slow blow; 15 Amp (DC)
Finish	Charcoal, baked enamel
Dimensions	5-1/4 in (133mm) high, 19 in (483mm) wide, 6-5/8 in (168mm) deep

Amplifiers and Sound Accessories

Audio Power Amplifier, 250 Watts

Model 1B3250

Photo Not Available

The 1B3250 Power Amplifier is rated at 250 Watts continuous (RMS) power and it contains circuitry for 24 Vdc backup. The Amplifier mounts in a standard 19 in (483mm) rack. Output voltage may be 25 or 70 VRMS. Supply voltage is 120/240 V, 50/60 Hz, or optionally 24-28 Vdc. The Amplifier contains electronic protection safeguards against overloads or shorted output. A thermal overload protection circuit is also included that opens the primary power circuit if the unit overheats. Both protection circuits are self-restoring. The system may incorporate a Standby Amplifier as a backup against any unit failure.

Features and Specifications

- 24 Vdc battery backup
- Broad frequency response
- Low distortion
- Thermal circuit breaker
- Electronic protection
- UL listed under standards 1711,1480, and 813
- ULC listed

Specifications

Power Output	250 Watts continuous (RMS)

Audio Power Amplifier

Model 1A4060, 1A4125, 1A4250

The Model 1A4xxx Power Amplifier is rated at 60, 125, or 250 watts (rms), depending on the model. They mount in a standard 19-inch (48.3 cm) wide equipment rack and can be shipped mounted in a rack. These amplifiers can be used in sound reinforcement, general paging, and school communication systems applications. They are UL 813 listed.

Features and Specifications

- Broad frequency response
- Low distortion
- Dual independent electronic protection circuits
- Self-resetting heat sink thermal circuit breaker (1A4060, 1A4125)
- Self-resetting power transformer thermal circuit breaker (1A4060, 1A4125)
- Self-resetting thermal cutouts (1A4250)
- Transformer and direct coupled outputs (1A4250)
- UL 813 listed

Specifications	
1A4060 Power Amplifier	
Power Output	60 watts (rms)
Frequency Response (@ 9dB below rated output[1])	20Hz to 20kHz (+0/–1dB)
Power Response	45Hz to 20kHz, +0/–1dB (0dB = 60 watts), THD 0.5%
Harmonic Distortion	0.5%, 45Hz to 20kHz (bandwidth limited 20Hz to 30kHz) @ 1kHz at rated output (THD typically <0.05%)
Signal-to-noise Ratio	Better than 96dB below rated output
Input Sensitivity	0.5V (rms) at 1kHz for rated output
Input Impedance	20k Ohms
Outputs (All fully transformer isolated)	70.7V (83 Ohms) 25V (10 Ohms) balanced 25V center tap 8 Ohms (22V)
Output Regulation (no load to full load voltage change)	Better than 1dB
Control	Rear panel input level control
Terminations	Screw terminal strips (w/ barriers and wire capture plates on outputs)
Indicator	Power-on LED
Power Source	120Vac, 60Hz
AC Power Required	1.4A (120Vac) at rated output 0.18A at idle
Fuse	1.5A, slow-blow
Finish	Baked charcoal enamel
Dimensions	5-1/4" (13.3 cm) high, 19" (48.3 cm) wide, 6-1/4" (15.9 cm) deep

[1]Per EIA Standard

17A365 Regulated DC Power Supply

The Model 17A365 Regulated DC Power Supply is a rack-mounted, regulated DC power supply that operates from a 105 - 125Vac primary source, and provides 24Vdc at 3.2 amps with overload protection. Operating under an electronic foldback principle, the output is self-restoring when the overload or short condition is removed.

17A437 Power Supply

The Model 17A437 Power Supply is designed to be used with the Model 1A881 Remote Microphone Preamplifier, 2A68A Mixer/Preamplifier, 2A95 Line Amplifier, and the 15A266A Multi-Tone Generator. It is a compact plug-in DC power supply, intended for use where 24Vdc (nominal) at 80mA maximum is required. It comes with a 6-foot (1.8 m) cord.

Features and Specifications

17A365 Regulated DC Power Supply

- Continuous duty operation
- Regulated 24Vdc @ 3.2A
- Wide input voltage range
- Electronic foldback output protection
- Standard rack mounting

17A437 Power Supply

- Convenient plug-in construction
- Underwriters' Laboratories listed

Specifications

17A365 Regulated DC Power Supply	
Rated	24Vdc at 3.2A
Output dimensions	3-1/2" (8.9 cm) high, 19" (48.3 cm) wide, 5-1/2" (14.0 cm) deep
Power required	105Vac to 125Vac, 50/60Hz at 170W nominal
Net weight	12 pounds (5.4 kg)
Regulation	Less than 2%
Finish	Charcoal-colored, baked enamel
Ripple	Less than 10mV (rms)
Terminations	Screw terminals
17A437 Power Supply	
Output voltage	24Vdc +/–1V
Input voltage	120Vac, 60Hz
Output current	80mA
Output cord	6' (1.8 m) long +/–1" (2.5 cm) strip, with 1/2" (1.3 cm) tin ends
No load voltage output	32Vdc maximum
Cord polarity	Positive: black/white or equivalent; Negative: black
Ripple	120mVac +/–10%, with 300 Ohm load
Net weight	8 oz (227 g)

Amplifiers and Sound Accessories
Microphone
7A766

The Edwards Model 7A766 Touch-To-Talk Microphone and Stand is a desk unit ideal for paging and communications in applications such as bowling lanes, restaurants, schools, and dispatching operations. The microphone has an on/off switch operated via a fingertip control bar that provides momentary or locking switch operation. For momentary operation, press the bar and pull it forward. Moving the bar back and releasing it unlocks the switch. The on/off switch includes a set of contacts prewired for remote relay operation. The height of the microphone is adjustable and it is made of high impact ARMO-DUR® which will not crack, peel, rust, or dent. The microphone can be used in high or low impedance applications and has a switch on the underside of the base for selecting the impedance required.

Features and Specifications

- Dual impedance with selector switch
- Adjustable microphone height
- ARMO-DUR® base and microphone case
- Fingertip control bar-locking or non-locking action

Specifications

Type	Controlled Magnetic
Switch Circuits	Microphone: normally closed Relay: normally open
Polar Pattern	Omni-directional
Dimensions	9-19/64” (23.6 cm) high, 4” (10.2 cm) wide, 5-11/16” (14.4 cm) deep; 11-53/64” (30 cm) high when fully extended
Frequency Range	200Hz to 5,000Hz
Finish	Two-tone gray ARMO-DUR
Impedance	225 Ohms or high
Net Weight	1 lb 10 oz. (736 g)
Output Level (At 1000hz)	Open Circuit Voltage: 0.14mV (–77.0dB) low impedance 1.78mV (–55.0dB) high impedance (0dB = 1 volt per microbar)
Shipping Weight	2 lb 4 oz (1,020 g)
Controls	Touch-to-talk control bar with lock-on operation, wired for remote relay operation; high/low impedance selector switch
Termination	7’ (2.1 m) cable (four conductor, two shielded), non-detachable

Paging Monitor and Relay Equipment
Model 9A1687, 9A1685B, 9A1535

9A1687 Amplified Monitor Panel
The Edwards Model 9A1687 Amplified Monitor Panel provides facilities for both aural and visual monitoring of up to 12 channels of 1V, 25V and 70V line level signals. The LED level display allows the level of the line being monitored to be accurately adjusted or checked. The monitor speaker provides an aural reproduction of the program material being monitored.

9A1685B Monitor Panel
The 9A1685B Monitor Panel allows aural and visual monitoring of 25V or 70V output sources. The VU meter provides visual monitoring of the output level, while the speaker provides an audio reproduction of the program material being monitored. The monitor panel allows dual channel monitoring. When used in association with the Model 4A1445 Universal Selector Panel, it also allows multi-output monitoring.

9A1535 Zone Relay Panel
The Edwards Model 9A1535 Zone Relay Panel is a custom switching panel which may be expanded from 1 relay circuit to 10 relay circuits. Each relay module is a four-pole, double-throw type with contacts rated for 3 amps at 28Vdc or 115Vac. The flexibility of the relay panel design allows its use in various functions such as zone switching, amplifier substitution, and system control.

Features and Specifications

9A1687 Amplified Monitor Panel
- Accommodates Up to 12 Inputs
- Monitors 1 V, 25 V or 70 V lines
- Aural and Visual Monitoring
- Color-Coded, Calibrated LED Level Display
- Protective Polycarbonate Panel Overlay
- Rack-Mount or Table-Top

9A1685B Monitor Panel
- Protective Polycarbonate Panel Overlay
- Easy-to-Read VU Meter
- 25 or 70 Volt Output Monitoring
- Allows Aural and Visual Monitoring

9A1535 Zone Relay Panel
- Easy Expandability
- Multi-Purpose
- Precious Metal Relay Contacts
- Long-Life Relays

Amplifiers and Sound Accessories

AM-FM Tuner/CD and MP3 Player with Mixer/PreAmp

RCD350P

Dukane AM-FM Tuner/CD and MP3 Player with Mixer/PreAmp is an auxiliary music and sound source for paging and intercom systems. It can be installed in a standard 19 inch rack or as a desktop unit by removing the rack mounting hardware.

Features and Specifications

CD Player

- Supports most common CD audio formats: including CD, MP3 and WMA
- Aux stereo input jack (3.5 mm) allows for play-back of MP3 devices and their pre-recorded music or announcements
- Three-band equalizer with six preset tone curves
- Single line text LCD display with 8-character text
- MP3 ID3 Tag Display (Title, Artist, Album)- shows tuner band, elapsed playback time, track number, type of disc, (when repeat play and local seek tuning are activated) - displays time when not in use
- Remote control for tuner included

Mixer/Preamp Unit

- Priority enable circuit
- Two low Z microphone inputs
- Two AUX inputs
- One bridge input

Specifications

Tuners	
AM Tuner	Frequency range selectivity: 530kHz to 1710kHz 40dB (+/–10kHz) Maximum sensitivity: 14dB/mV (5mV at 0.5W)
FM Tuner	Frequency range alternate channel selectivity: 87.9MHz to 107.9MHz 75dB Usable sensitivity stereo separation: 15.2dBf (1.6mV, 75W) 35dB at 1,000Hz 50dB quieting sensitivity image response ratio: 17.2dBf (2.0mV, 75W) 50dB Frequency response if response ratio: +/– 3dB 30Hz–15,000Hz 100dB Capture ratio signal-to-noise ratio: 1.5dB 70dB
CD Player	
WMA (.wma)	Encoded by Windows Media Player Bit rate: 48 Kbps to 320 kbps (CBR), 48 kbps to 384 kbps (VBR)
WAV (.wav)	Compatible format: Linear PMC (LPCM). MS ADPCM Quantization bits: 8 and 16 (LPCM), 4 (MS ADPCM) Sampling frequency: 16 kHZto 48 kHZ (LPCM), 22.05 kHz and 44.1 kHz (MS ADPCM)
MP3 (.mp3)	Bit rate 8 kbps to 320 kbps Sampling frequency: 16 kHz to 48 kHz (32,44,1,48 kHz for emphasis) Compatible ID3 tag version: 1.0, 1.1, 2.2, 2.3, 2.4 (ID3 Tag Version 2.x is given priority over Version 1.x; M3u playlist: No; MP3i (MP3 interactive), mp3 PRO: No
Disc	Playable folder hierarchy: up to eight tiers (A practical hierarchy is less than two tiers) Playable folders: up to 99; Playable files: up to 999 File systems: ISO 9660 Level 1 and 2, Romeo, Joliet Multi-session playback: Yes; Packet write data transfer: No; Regardless of the length of blank section between the songs of the original recording, compressed audio discs play with a short pause between songs.

AM-FM Tuner/CD and MP3 Player with Mixer/PreAmp
RCD350P

Specifications	Continued
Overall Data	
Power requirements	+12Vdc, 700mA maximum
Inputs	2 low-impedance microphones, 2 auxiliary inputs, built-in AM/FM/CD/MP3 Player
Audio line output	3Vrms maximum
Controls (front)	POWER on/off switch, MASTER volume control, MONITOR speaker volume, control, 5 source selector/mixer bank
Controls (AM-FM tuner/ CD Player)	Function, EQ/Loud, SCR/Off, Station Program Buttons (6). Eject (CD), Audio, Clock set, Disp/SCRL, Band/ESC, Curser ControlScan; Tuning (manual or preset, five AM and ten FM preset stations available)
Controls (rear)	5 source preset input level adjustments, 1 monitor preset level adjustment, 1 bar graph level adjustment
Indicators/displays	Master Power LED; Preamp output level bar graph
Terminations	Preamp out (screw terminal); Power (screw terminal); AUX (RCA pin jack); MIC input (screw terminal); Bridge (RCA pin jack); Priority Enable Input and Output (screw terminal); Antenna (F-81C female for RG59 coaxial cable, 75 ohms)
Housing	Metal rack mount panel finished in textured charcoal-colored powdercoat. Can be converted to tabletop.
Dimensions	19" (48.3 cm) wide x 3.5" (8.9 cm) high x 10.25" (26 cm) deep When used as a table top configuration, the dimensions are: 14" (36 cm) wide x 2.75" (7 cm) high x 10.25" (26 cm) deep
Antenna termination	F-81C female for RG59 coax cable 75 Ω
Wiring Preamp out	Twisted pair, 22 AWG min.

Amplifiers and Sound Accessories
Preamps and Preamp Mixers
2A37, 2A40, 2A45, 2A68A, 2A96A

2A40 and 2A45 Preamps
The Edwards Model 2A40 Dual Stereo Summing Input Module provides auxiliary level inputs to any Edwards modular audio component from two stereo sources (left and right). The Edwards Model 2A45 Dual Input Module is a dual input, dual level, auxiliary input module, and provides selectable gain (1V or 0.1V) on each input.

2A96A Mixer-Preamplifier
The Edwards Mixer/Preamplifier Model 2A96A has the capacity of accepting eight program inputs (four Edwards Input Modules) and a bridging input. The Mixer/Preamplifier has the latest circuit technology to maintain low distortion (THD) and signal-to-noise ratio. Dual, single-ended outputs can be converted into an active, balanced output. The dual outputs are desirable for driving individual channel amplifiers. The Mixer/Preamplifier allows for priority muting.

The unit's mounting brackets can be removed for table-top mounting in a finished enclosure. The Mixer/Preamplifier has eight individual level controls, bass and treble controls, master volume control, lighted AC power switch and a tone control bypass switch.

2A68A Remote Powered Mixer-Preamplifier
The 2A68A Remote Powered Mixer-Preamplifier provides facilities for two low Z microphone inputs, one auxiliary input, and a bridging input. The microphone inputs are transformer-coupled, and the unit is protected from radio frequency interference. The panel provides a single-ended audio output of 1Vrms (nominal) and is powered by a remote DC power supply with a minimum capacity of 50mA. The controls include individual microphone level controls, an auxiliary fader control, bass and treble controls, and a master volume control.

Features and Specifications

2A37 Input Module
- Excellent frequency response
- Dual input module
- Selectable inputs
- Low frequency roll-off

2A40 Dual Stereo Summing Input Module
- Excellent frequency response
- Dual stereo inputs

2A45 Dual Input Module
- Selectable gain
- Excellent frequency response
- Dual input module

2A96A Mixer-Preamplifier
- Modular Concept
- Master/Slave Architecture
- Low Distortion and Noise
- Priority Muting
- Protective Polycarbonate Panel Overlay
- Color-Coded, Calibrated LED Level Display
- Rack Mount or Table-Top

2A68A Remote Powered Mixer-preamplifier
- Low distortion and noise
- Transformer-coupled microphone inputs
- Protected from radio frequency interference
- DC Powered

Specifications

Preamps	
Model 2A37	
Microphone Gain (nominal)	45dB
Inputs	Two selectable microphone/auxiliary
Input Sensitivity	Microphone input: 300 microvolts Auxiliary input: 0.1V or 1V
Input Terminations	Screw terminals for microphones, RCA pin jacks for auxiliary
Frequency Response	20Hz to 20,000Hz, +/–1dB
Signal-to-noise Ratio	Microphones: +/- 60dB Auxiliaries: +/- 65dB
Source Impedance	Microphone: 150 Ohms to 200 Ohms, transformer-isolated Auxiliary: 10k Ohms
Selectable Frequency Roll-off	Flat or 320Hz at 6dB/octave roll-off
DC Power/Current	+/–15Vdc @ 10mA
Switches	Two input selection, two low-frequency roll-off
Dimensions	3" (7.6 cm) wide by 3" (7.6 cm) high and 5-1/4" (13.4 cm) deep
Weight	10.5 oz (297.7 g)
Finish	Charcoal-gray baked enamel on faceplate
Load Impedance	10k Ohms

Specifications Continued

2A40 Dual Stereo Summing Input Module	
Input Sensitivity	500mV
Frequency Response	20Hz–20kHz, +/- 1dB
Inputs	input 1 left / right, input 2 left / right
Input Termination	RCA phono jack
Signal-to-noise	75dB, (20Hz–20kHz band limiting)
Ratio Power Requirement	+/- 15Vdc @ 10mA
Input Impedance	100k Ohms
Dimensions	2.8" (7.1 cm) high x 2.9" (7.4 cm) wide x 4.8" (12.2 cm) deep
Weight	12.5 ounces (354 g)
Controls	None
Finish	Charcoal gray faceplate

Amplifiers and Sound Accessories
Preamps and Preamp Mixers
2A37, 2A40, 2A45, 2A68A, 2A96A

Specifications Continued

2A45 Dual Input Module

Inputs	Inputs 1 and 2: Dual Level Aux
DC Power Circuit	+/–15Vdc @ 10mA
Input Sensitivity	0.1V or 1V
Dimensions	3” (7.6 cm) wide by 3” (7.6 cm) high by 5-1/4” (13.3 cm)
Frequency Response	20Hz–20kHz (+/–1dB)
Weight	12.5 oz (354 g)
Signal-to-noise Ratio	0.1V Aux: ≥ 75dB 1V Aux: ≥ 75dB Bandwidth limited 20Hz–20kHz
Finish	Charcoal-gray baked enamel on faceplate
Source Impedance	Auxiliary: 10k Ohms
Load Impedance	5k Ohms
Input Termination	Auxiliaries: Screw terminals

2A96A Mixer-Preamplifier

Rated Output	Dual single-ended outputs, 6Vrms (+18.0dBm). Active balanced output, 12Vrms (+24dBm)
Output Load Impedance	600 ohms or greater, single-ended or balanced
Frequency Response	+/—1/2dB, 20Hz to 20,000Hz (tone controls flat)
Distortion	Less than 0.50%, 20Hz to 20,000Hz
Sensitivity	(Dependent on input module) Typical: Microphone = 300mV (Lo Z) Auxiliaries = 0.1V/1V
Noise Level	MICROPHONE: Greater than —60dB AUXILIARY: Greater than —65dB MASTER CONTROL OFF: Greater than —85dB
Input Impedance	Bridging = Approximately 6k ohms (Dependent On Input Module)
Tone Controls	+/—10dB (Boost and Cut). Bass @ 100Hz. Treble @ 10,000Hz.
Muting	Inputs 3 through 8 muted. “Master/Slave” allows all inputs muted Greater than 50dB
Controls	Eight Input level controls Bass and treble controls Master volume control Lighted power switch Tone control bypass switch (rear)
Power Requirements	120Vac, 60Hz, 6 watts
Temperature Range	-10° C to +60° C (12° F to 140° F)

Specifications Continued

2A96A Mixer-Preamplifier

Terminations	RCA phono jacks (master/slave, output 1, output 2, and bridging). Screw terminals (mixer outputs and muting)
Dimensions	3-1/2" (8.9 cm) high x 19" (48.3 cm) wide x 11" (27.9 cm) deep Desktop mounting (mounting brackets removed)
Weight	12 pounds (5.44 kg)
Finish	Cover: Textured, charcoal-colored baked enamel Chassis: Charcoal, baked enamel Front: Gray polycarbonate panel overlay
Associated Equipment	2A Series Edwards Input Modules 2A37, 2A40 and 2A45 input Modules.

2A68A Remote Powered Mixer-preamplifier Panel

Rated Output	Maximum +18dBm (600 Ohms load, single-ended) Nominal 1Vrms (+2dBm)
Distortion	Less than 0.25%, 20Hz to 20,000Hz
Frequency Response	+/–1dB, 20Hz to 20,000Hz (tone controls flat)
Sensitivity	Microphone: 0.25mV; Auxiliary: 0.1Vrms
Noise Level	Microphone: better than –63dBv (@ –67dBv input, BW 20,000Hz) Auxiliary: better than –75dBv (@ 0.1Vrms input, BW 20,000Hz) Master control off, –85dBv (@ nominal output)
Input Impedance	Microphone: 200 Ohms or less (for source impedances of 250W or less), balanced input Auxiliary: 100k Ohms (minimum), single-ended Bridging input: 100,000 Ohms (minimum), single-ended
Load Impedance	600 Ohms or greater, single-ended
Tone Controls	+/–12dB (boost and cut) bass 50Hz, treble 10,000Hz
Power Requirements	24Vdc to 30Vdc, 50mA
Dimensions	1-3/4” (4.5 cm) high, 19” (48.3 cm) wide, 8-1/2” (21.6 cm) deep
Finish	Charcoal-colored, baked enamel
Connections	Screw terminals and RCA phono jacks at rear of panel

Amplifiers and Sound Accessories
Graphic Equalizer
3A242A

The Edwards Model 3A242A One-Third Octave Graphic Equalizer has 31 active filters at the ISO frequencies from 20Hz to 20,000Hz, with "Constant Q" filtering. The 31 slide potentiometers control each individual frequency band through a range of plus and minus 12dB. Grounded, detented center-tap positions on each level control assure positive flat position of each filter section. Adjustable high and low pass shelving filters are continuously variable. The equalizer has a frequency response of +/—0.5dB and distortion of less than 0.1% @ 1Vrms with all filter controls flat.

The unit's balanced low impedance output is capable of 6Vrms (+18.0dBm) and has a nominal output of 1Vrms (+3.0dBm) into 600 ohms or greater load impedance. A 10-segment, calibrated LED display facilitates monitoring of the equalizer output level.

A lighted front panel power switch allows the input and output to be tied together to allow a fail-safe bypass circuit when the switch is OFF. A front panel equalizer bypass switch also allows for equalizer bypass with power ON. The equalizer fits a standard 19" (48.3 cm) mounting enclosure.

The optional Edwards Model 110-1976A pink noise generator can be mounted internally for use as a sound masking generator or a noise source for the equalization process.

Features and Specifications

- Constant Q topology
- Precision, center-tapped, slide attenuators
- Adjustable high/low shelving filters
- 12 dB cut or boost
- Color-coded, calibrated LED display

Specifications

3A242A One-third Octave Graphic Equalizer	
Input Impedance	Greater than 15,000 Ohms
Output Impedance	Approximately 100 Ohms
Gain	Unity gain (+/—1dB), filters off
Frequency Response	20Hz to 20kHz, +/—1/2dB
Distortion	Less than 0.1% @ 1Vrms, all filter controls @ 0
Noise	Greater than —90dB below full output Greater than —80dB below 1Vrms (bandwidth limited), input shorted, controls flat)
Boost/cut Range	+/—12dB @ ISO center frequencies
Rated Output	6Vrms (+18.0dBm) maximum into 600 Ohms; 1Vrms (+3.0dBm) nominal, balanced
Shelving Filters	High/Low slope of 12dB/octave: High pass tuning range of 10Hz to 400Hz, +/—5%; Low pass tuning range of 10kHz to 30kHz, +/—5%
Controls	Thirty-one 1/3 octave slide controls Equalization bypass switch Output level control Low pass control High pass control Lighted power switch

Specifications Continued

3A242A One-third Octave Graphic Equalizer	
Level Indicator	10-segment, calibrated LED level display
Terminations	Screw terminals and RCA jacks
Power Requirements	120Vac, 60Hz, 100mA
Dimensions	3-1/2" (8.9 cm) high x 19" (48.3 cm) wide x 11" (28 cm) deep
Weight	12 lbs (5.44 kg)
Finish	Cover: Textured, charcoal-colored baked enamel Chassis: Baked charcoal enamel Front: Gray polycarbonate panel overlay
110-1976A Pink Noise Generator Card	
Pink Noise Frequency Range	30Hz to 16kHz
Nominal Output Level	0dBm, +/—1dB
Output Impedance	Less than 100 Ohms
Power	Received from 3A242A

Universal Selector Panel
Model 4A1445

The Dukane Model 4A1445 Universal Selector Panel performs various switching functions. This panel can switch any of 11 inputs to a single output. The switching configuration allows a twelfth selector pushbutton to bypass its associated panel to additional selector panels, providing unlimited input selection capability.

All switches are interlocking press-to-lock pushbuttons. The switch mechanisms are high quality, precision constructed, low noise, silver plated copper alloy contact selector switches capable of handling audio power or low level audio. The panel can accommodate the wiring needed to operate optional light bulbs which illuminate the pressed pushbuttons. These light bulbs are replaceable from the front without removing the panel from the rack. The pushbuttons also allow identifying legends to be installed. The bypass pushbutton is accentuated with a red insert for easy recognition.

Features and Specifications

- Select Any One of Eleven Inputs
- Precision Construction
- Positive Switching Action
- Reliable

Specifications

Capacity	Selects one of eleven inputs to the panel output
Switches	Eleven press-to-lock selector switches, plus one press-to-lock panel bypass switch
Dimensions	1-3/4" (4.5 cm) high by 19" (48.3 cm) wide and 4-1/2" (11.4 cm) deep
Net Weight	2 lb, 14 oz (1.3 kg)

Baffles, Back Boxes and Transformers
Speaker Baffles
6A328, 6A338, 6A342B, 6A530B, 6A603, 6A625A, 6A630, 6A633, 6A634, 6A635, 6A636, 6A650 and 6L100

6A338

Speaker Baffles and Baffle Assemblies are ideally suited for use in classrooms, lobbies, stores, restaurants, and other commercial and educational establishments. Flush mount models available with white or brushed aluminum finish. Wall mounted assemblies have walnut-grained vinyl finish.

Features and Specifications

6A328 Square Speaker Baffle
- Wall mount or Ceiling mount
- Sturdy Steel
- Finished folded edges
- No speaker screws visible

6A338 Flush Speaker Baffle
- Molded of high impact styrene
- No speaker screws visible
- Will not chip or mar
- Ceiling or wall mounting

6A342B, 6A625A Flush Speaker Baffle
- Steel construction
- Simple lines that blend with modern interiors
- Epoxy finish will not chip or mar (6A342B)
- No speaker screws visible (6A625A)

6A633, 6A634, 6A630, 6A635, 6A636 Speaker Baffle Assembly
- Speaker-matching transformer for either 25-Volt or 70-Volt line
- Reduced installation time and cost through pre-assembly
- High impact styrene baffle (6A630, 6A635, 6A636)
- Volume control (6A635 - recessed; 6A636 - exposed)

6A650 Speaker Baffle Assembly
- 25 and 70-Volt line operation
- Brushed aluminum or white steel speaker baffle
- Low mounting profile
- Additional whizzer cone for extended frequency response

6A603 Sound Masking Speaker Assembly
- Excellent low frequency response and reflection patterns
- Flame retardant cones
- Defined rectangular sound pattern
- Dual voltage transformer with variable power taps

6L100 Special Purpose Baffle
- Bi-Directional Radiation
- Ideal Corridor Baffle
- Sturdy Construction

Descriptions

6A328, 6A335, 6A338, 6342B, 6A625A Flush Speaker Baffles
These models are ideally suited where flush speakers are required in classrooms, lobbies, stores, restaurants, and other commercial and educational establishments.

6A633, 6A634 and 6A630 Speaker Baffle Assemblies
These units consist of a Model 5A606 loudspeaker with 25 Volt or 7Volt Speaker Line transformer. These assemblies are especially well suited for use in the classroom, small meeting rooms and other areas. Mounting hardware is furnished, and preassembly reduces time and expense.

6A650 Speaker Baffle Assembly
The 6A650 are high quality speaker, transformer, and speaker baffle assemblies. The loudspeaker has an additional speaker cone for extended high frequency response. The speaker baffle, constructed of steel, has simple, tasteful lines that blend well with all modern interiors. The assembly includes a dual voltage 70- and 25-volt matching transformer. The transformer has taps of 1/2, 1, 2, and 4 watts at 70 volts, and 1/2, 1, and 2 watts at 25 volts. Quality reproduction provides for use in many installations.

6A635, 6A636 Speaker Baffle Assembly With Volume Control
The Model 6A635 and 6A636 Speaker Baffle Assemblies with Volume Control each provide a complete speaker baffle assembly with a self-contained control for individual speaker volume adjustment. This assembly, with a speaker providing a low level, wide frequency range, is ideal for music and/or paging systems in offices or other applications where individual, variable volume levels are required. Model 6A635, the volume control is recessed, screwdriver adjustable to discourage unauthorized adjustment. Model 6A636, the volume control is exposed for convenient adjustment. A complete speaker baffle assembly means the assembly includes a transformer compatible with either 25V or 70V speaker lines. The baffle finish will accept any good latex paint to match the mounting surface where required. The preassembly of speaker, baffle, and transformer reduces installation time and cost.

6A603 Sound Masking Speaker
The Model 6A603 Sound Masking Speaker is scientifically designed for sound masking applications in shallow depth or limited plenum areas. Dual 5-inch (12.7 cm) high efficiency speakers are mounted on a folded aluminum baffle designed to maximize low frequency response from a minimum height installation dimension. Unlike most contemporary assemblies, the 6A603 is not hampered by “hot spots” directly below the speaker units, since its innovative design employs the bottom surface of the baffle as a highly effective acoustic shield. This assembly is designed for use in areas where the plenum area height is 36 inches (91.4 cm) or less. If the plenum area exceeds this height, Sound Masking Speaker Assembly Model 6A530B should be used.

Baffles, Back Boxes and Transformers
Speaker Baffles
6A328, 6A338, 6A342B, 6A530B, 6A603, 6A625A, 6A630, 6A633, 6A634, 6A635, 6A636, 6A650 and 6L100

Specifications

6A603 Sound Masking Speaker Assembly	
Construction	0.032" (.81 mm) aluminum
Response Pattern	9' by 23' (2.7 m x 7 m) rectangle (approx.) at least 200 square feet (18 sq. m)
Sensitivity	97.5dB at average 1/3 octave readings between 200Hz and 400Hz at 3.3" (1 m) and .5W per speaker
Mounting	"S" hooks for suspending assembly from chains; plastic foam strips on bottom of each end for resting baffle on ceiling
Finish	Natural aluminum
Dimensions	12" by 25" x 6" (30.5 cm x 63.5 cm x 15.2 cm)
Weight	4-1/2 lb (2 kg)
6A530B Background Sound Masking Speaker Assembly	
Sensitivity	96 dB average 1/3 octave readings between 200 and 4000 Hz at 1 meter and 0.5 watts/speaker
Construction	20 gauge steel
Cubic Content	0.8 feet (241 mm)
Finish	Flat black
Terminations	Pigtails
Mounting	"S" hooks and chain (chain not supplied with unit)
Dimensions	13" (5.16 cm) wide, 11-3/4" (4.66 cm) high, 19" (7.54 cm) long. (Prism shaped.)
Weight	15 pounds (6.75 kg)
6L100 Corridor Baffle	
For Speakers	Dukane 8" (20.3 cm) speakers
Finish	Brushed, satin-finished aluminum
Net Weight	2 lb (900 g)
Dimensions	4" (10.2 cm) by 4" (10.2 cm)
Backbox Required	4" (10.2 cm) by 4" (10.2 cm) standard outlet box

Flush Speaker Baffles	6A338	6A342B	6A625A	6A328
Speakers	For use with speakers 5A606 or 5A607			
Recommended Backbox Number	145-226 or 8A301			145-222 or 145-223
Finish	Solid white	22 gauge, cold- rolled steel, embossed with "Dukane," finished with a baked-on white powdered epoxy		Flat White
Suspended Ceiling Support Channel	677-67			
Net Weight	7.5 oz (210 g)	20 oz (560 g)	13 oz (364 g)	36 oz (1021 g)

Speaker Baffle Assembly	6A650	6A635, 6A636 (with volume control)
Speaker Diameter	8" (20.3 cm)	8" (20.3 cm) PM type
Overall Dimensions	12-7/8" (32.7 cm) diameter, 3" (7.6 cm) deep	12-5/8" (32.1 cm) in diameter, 3-1/4" (8.3 cm) deep
Frequency Range	30 to 20,000Hz	-
Frequency Response	—	90-15,000Hz
Finish	Cold rolled 22 gauge steel, embossed with "Dukane," finished with a baked on white powdered epoxy	Cadmium plated with solid white, molded, high impact styrene baffle
Control	—	Potentiometer, 50W, wire wound
Power Rating	15W normal, 25W program	8W normal, 12 W program
Terminations	Transformer leads	—
Voice Coil Impedance	8 Ohms	
Transformer Taps	25V: 1/2, 1, and 2W; 70V: 1/2, 1, 2, and 4W	
Voice Coil Diameter	1" (2.5 cm)	3/4" (2 cm)
Net Weight	2 lb, 12 oz (1.2 kg)	2 lb, 12.5 oz (1.3 kg)
Magnet Assembly	10 oz (283 g), ceramic	4.8 oz (134 g), ceramic
Associated Equipment	145-226 Backbox 677-67 Suspended Ceiling Support Channel	
Axial Sensitivity	95dB (1 m [3.3 ft]/1W)	91dB at 1 m (3.3 ft)/ 1W input

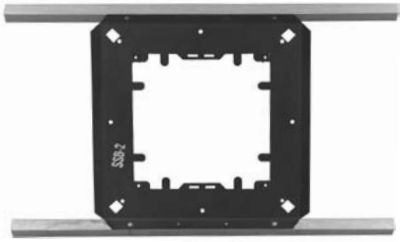
Model	Description
6A328	Flush (wall or ceiling) square speaker baffle, 121/2 inch square, white.
6A338	Flush (wall, ceiling) Speaker Baffle, 12-5/8 in. (32.1 cm) dia. White.
6A342B	Flush Speaker Baffle, 12-7/8 in. (32.7 cm) dia. White.
6A625A	Flush Speaker Baffle, 12-3/4 inches (32.4 cm) in diameter. White.
6A634	Speaker Baffle Assembly, Steel coated with baked-on white powdered epoxy
6A630	Speaker Baffle Assembly, Solid white, molded, high impact styrene
6A633	Speaker Baffle Assembly, Steel painted flat white
6A635	Speaker Baffle Assembly with recessed volume control
6A636	Speaker Baffle Assembly with volume control knob
6A650	Speaker Baffle Assembly
6A603	Sound Masking Speaker Assembly
6L100	Corridor Baffle, brushed, satin-finished aluminum. No back box required.

Baffles, Back Boxes and Transformers
Speaker Backbox
677-67



The Edwards speaker support bridge is a universal loudspeaker mounting device that eliminates tile sag caused by the weight of the installation on suspended ceilings and reduces the required installation time. The support bridge eliminates the need for stocking different mounting devices to match various baffle and backbox configurations. The bridge accepts most of the industry's popular round or square baffles with or without most backboxes, and any 8-inch torsion spring baffle with most round backboxes. The design of the Model 677-67 bridge makes installation faster and easier than other bridges. Locating tabs on the center plate simplify positioning of the loudspeaker on the ceiling and prevents the bridge from moving during installation. In addition, the bridge mounts with an easy to cut square ceiling hole, rather than the round hole required for most other bridges. The hole dimension is well within the baffle dimension, so even a miscut mounting hole will be completely hidden by the baffle. The unique design of the bridge permits nesting of the bridges for reduced storage space and easier handling.

Features and Specifications

- Universal loudspeaker mounting device
- Eliminates tile sag
- Makes speaker installation faster and easier

Specifications

Material	22-gauge galvanized steel
Net Weight	1-1/2 lb (0.7 kg)
Finish	Durable protective coating
Mounting Bridge Dimensions	23.75 (60.3 cm) long; 15.5 (39.4 cm) wide
Mounting Options Dimensions (see diagram)	A. Four J-nuts #8-32 bolts required

Speaker Transformers
710-3090, 710-3092

Photo Not Available

The 710-3090 and 710-3092 Speaker Matching Transformers are professional sound, quality transformers which have operating characteristics to match the best sound systems being manufactured today. Model 710-3090 is furnished with 7-inch (17.8 cm) color-coded leads for easy installation with twist nuts or solder. The high quality, grain-oriented laminations permit a flat response, within ± 1dB, at full output over the range of 50- to 15,000Hz. Distortion is less than 1 percent, and insertion loss is less than 2.0dB.

Features and Specifications

710-3090 Speaker Matching Transformer
- Excellent frequency response
- Very low distortion
- Complete range of power
- 70-Volt line

710-3092 Speaker Matching Transformer
- Excellent frequency response
- Very low distortion
- 70- And 25-volt lines
- High efficiency at all wattage taps

Engineers' Specification for 710-3092

Watts	Primary	Secondary (8 Ohms)

1	Blue & Blk	Blk & Wht
2	Yellow & Blk	Blk & Wht
4	White & Blk	Blk & Wht

Specifications

710-3090 Speaker Matching Transformer	
Primary Taps (70.7V Line)	8, 4, 2, 1, and 1/2W
Dimensions	2-5/16" (5.9 cm) high, 1-15/16" (4.9 cm) wide, 1-5/8" (4.1 cm) deep
Secondary	8 Ohms
Mounting Holes	2-3/8" (6.0 cm) center to center, 0.187" (4.7 mm) diameter
Insertion Loss	1.2dB or less
Terminations	Color-coded leads, 7" (17.8 cm) Leads also identified on transformer coil
Frequency Response	50Hz to 15,000Hz ± 1.5dB
Weight	1 lb (0.45 kg)
Distortion	Less than 1%
710-3092 Speaker Matching Transformer	
Speaker Line Voltage	70V or 25V
Mounting Holes	2" (50.8 mm) center to center, 0.187" (4.7 mm) diameter
Capacity	2W (25V), 4W (70V)
Terminations	Color-coded leads, ½" stripped and tinned
Secondary	8 Ohms (nominal)
Taps Finish	Cadmium plate
Frequency Response	100Hz to 10,000Hz ± 2dB
Dimensions	1-7/16" (3.7 cm) high, 2-13/32" (6.1 cm) wide, 1-9/16" (3.9 cm) deep
Insertion Loss	2.0dB or less
Weight	6 oz (170 g)

Time is Money

"Precise and on time is the way I like to see things run. The wide range of Dukane Timekeeping solutions from Edwards makes that possible.

Dukane Power-over-Ethernet clocks plug directly into standard Ethernet jacks to provide network-wide synchronized time. And they draw time updates and power from standard network cables so there's no need for a separate power source at each mounting site.

With Dukane PoE clocks from Edwards, time really is money."

Product Index

From the clock you patiently watched just before recess at school, to the synchronized time system displayed from the break room to the manufacturing floor, Edwards probably had a hand in putting it there. Edwards' clock systems deliver the accuracy, choices, convenience, styling, and unique features that your facility is looking for, all at a price you can afford.

Clocks
Digital
1900 Series

The Edwards 1900MS12-24 is an accurate long-life LED time display piece that can be operated in a synchronized clock system. It reports time in 12 hour or 24 hour formats with hour and minute that may be dimmed with a switch. An 18 foot cord is connected to a Class 2 transformer which plugs into a standard wall outlet. It is suitable for use in indoor applications.

Features and Specifications

- Built-in serial interface for networking and time synchronization in a clock system
- Field selectable 12 or 24 hour format
- Hour and minute display
- 100,000 hour LED lamp technology
- Two week memory retention
- Master/Satellite field selectable
- Two levels of brightness
- Suitable for use in indoor applications
- Operating temperature range: 32º to 120ºF (0ºC to 49ºC)

Synchronized Wired Clock Systems
Master Time/Program Clock

The Edwards Models 24A715 and 24A715M Master Time/Program Clocks are compact, microprocessor-controlled clocks capable of maintaining the correct time for Edwards analog and digital secondary clocks and for many third-party secondary clocks.

The basic clock consists of a display unit and power/relay unit that can be assembled in a surface, semi-flush, or rack mount configuration. The display unit has a digital display that shows the date and time and also provides programming menus to guide the user through programming and operating modes. A 12-button key pad is used to manually enter commands and programming instructions. The front panel LEDs indicate control relay status and, in master clocks with the modem option (24A715M), display the modem communications status.

All wiring to AC power and secondary equipment (such as clocks, bells, and zone controls) connects to terminal blocks within the power/relay unit backbox using quick connects supplied with the master clock.

Time base synchronization is derived from the AC line frequency. The clock automatically detects the selection of 50Hz or 60Hz. During power failures (or when AC power is shut off manually via an internal toggle switch), accurate time is maintained by a quartz crystal time base supported by lithium battery backup. When AC power is restored, the clock's microprocessor calculates the amount of time lost by the secondary clocks and re-synchronizes them.

In addition to hourly and periodic 12-hour synchronization of secondary clocks, the master clock can automatically adjust for daylight saving time (DST) with support for over 70 countries, as well as custom DST schedules.

Standard Features

- User programmable
- Eight program schedules
- 64 time events per schedule
- Automatic adjustment for daylight savings time
- Four-digit time/event display
- 12-hour AM/PM indication
- 10-year battery backup
- Surface, semi-flush or rack mountable
- Model 24A715 is UL/cUL listed

Synchronized Wired Clock Systems
Master Time/Program Clock

Specifications	
Input Voltage	120 or 220/240Vac @ 50 Hz or 60 Hz
Input Power	50VA maximum (less than 0.5A @ 120V)
Memory/quartz Time Backup	10-year (nom.) lithium battery
Signal And Clock Circuit Relays	Eight electromechanical, 10A (plug-in) Note: Edwards digital clocks require one solid-state plug-in relay, purchased separately by ordering the Model 438-860 kit
Operating Temperature	32°–175° F (0°–80° C)
Weight	Approximately 12 Lb (5.4 Kg)
Dimensions	Rack Mount—5-1/4 in (13.3 cm) high x 19 in (48.3 cm) wide x 6 in (15.2 cm) deep Wall Mount—6-1/4 in (15.9 cm) high x 13 in (33 cm) wide x 4-1/2 in (11.4 cm) deep Backbox—12 in (30.5 cm) wide x 6 in (15.2 cm) high x 3-3/8 in (8.6 cm) deep Face Plate—13 in (32.5 cm) wide x 5-1/4 in (13.3 cm) high x 1 in (2.5 cm) deep
Mounting Options	Semi-flush, surface, 19 in (48.3 cm) rack, or remote
Secondary Clocks Supported	Supports most brands of traditional analog and digital clocks See Secondary Clocks Supported below
Bell/control Zones And Schedules	Up to eight zones (decreased to 6 zones with one clock output, or 4 zones with two clock outputs) Eight schedules, each with 64 multi-function events/schedule Daylight saving time—supports DST standards of over 70 countries
Remote Communications with Atomic Clock	Internal modem (option) dial in/dial out
Certifications/Registrations	Model 24A715 is UL/cUL Listed FCC Part 15, Class A/Industry Canada ICES-003, Class A

Secondary Clocks Supported	
The master clock is supplied with a removable EPROM programmed and capable of operating and controlling the following types of secondary clocks:	
Edwards	24SS Series, 24ISC, 24F200, 24750, 24F750A, 24D20, 24D20A, 24D40, 24D40A, 240 Series, Synchronous Wired

Synchronized Wired Clock Systems
Power-over-Ethernet (PoE) Clocks
24IP Series

EST brand 24IP Series PoE Clocks plug directly into standard Ethernet jacks to provide network-wide synchronized time. Power-over-Ethernet technology allows these clocks to draw both time updates and power from standard network cables. This eliminates the need for a separate power source at each mounting site. Time is automatically set by a time server via Simple Network Time Protocol (SNTP). No master clock or serial connection is required.

24IP Clocks are configurable by means of a standard Telnet session, which configures the SNTP server address, time zone and daylight saving time options, display format (12- or 24-hour), and clock status reporting.

Both digital and analog models are available. Digital clocks have four- or six-digit LED displays and are visible from 150 feet (50 meters). Analog clocks are visible from 100 feet (30 meters).

Standard Features

- Power over Ethernet (PoE) technology derives power and synchronized time updates from your existing network
- Highly visible at over 100 feet
- Energy-efficient design
- No master clock or serial connection required
- Analog and digital formats available
- Automatic adjustment for Daylight Saving Time

Synchronized Wired Clock Systems
Wired Clock Systems and Accessories

Edwards clocks and accessories are high-performance timekeeping devices that offer a wide range of options and features. Edwards offers reliable clocks, controllers, and accessories compatible with centrally-controlled and self-correcting systems. Several of these work in combination with Dukane StarCall and MCS350 communication systems to provide a total timekeeping and communications solution.

Wired Clock Systems and Accessories

Dual-faced Digital Clock and Speaker Housing

110-788

- 110-788 Dual Faced Clock/Speaker Housing
- 110-3822 2-inch Clock/Speaker Baffle
- 8-inch Speaker/Transformer

The Edwards Dual Faced 2-inch Digital Clock/Speaker Baffle Housing, model 110-788, allows mounting of two 110-3822 Clock/Speaker Baffles and one or two 5A606 8-inch Speakers and makes a great assembly for Ceiling mount. The unit is designed for corridors and large rooms and is ceiling mounted from the top of housing to a 2-gang back box. The enclosure is 14-1/4" high, 14-1/4" wide, 6-3/4" deep made with 18-gauge cold rolled steel with baked-on, platinum white enamel finish.

Double Faced Digital Secondary Clock Housing

110-1674

- 110-1674 2-inch Digital Clock Dual Wall Mount Enclosure.
- 110-1675 2-inch Digital Clock Dual Ceiling Mount Enclosure.
- Mounts on 2-gang back box.

The Edwards Model 110-1674 Dual Wall Mount or 110-1675 Dual Ceiling Mount with two model 24ZB20 2-inch Digital Clocks makes a single compact unit. Designed for corridors or large rooms, the clocks are equipped with 2-inch high digital display. The clocks trimplates constructed of high impact,on-conductive, flame-retardant, charcoal colored material and a mounting frame finished in white, baked enamel.

Digital Clock/ Speaker Housing

- 110-3822 2-inch Digital Clock/ Speaker Baffle
- 8-inch Speaker/Transformer
- 145-192 Back-Box

The Edwards Model 110-3822 2-inch Digital Clock/Speaker Baffle is an attractive unit when mounted with a Edwards Model 5A606 Speaker/Transformer. The Clock/Speaker baffle assembly is black, perforated metal grille within a dark gray aluminum frame with overall dimensions 14-1/4" high. 14-1/4 wide, 3" deep including speaker. It can be flush mounted using the Edwards Model 145-192 backbox.

24SS Series Secondary Analog Clock

- Attractively finished
- Multiple sizes
- Controlled by master
- Easy installation
- Underwriters' Laboratories listed

The Edwards Model 24SS Series Synchronous Secondary Analog Clocks are available in round 12-inch (30.5 cm) and 15-inch (38.1 cm) sizes. The dials and hands are protected by a convex glass lens. An optional shatterproof Lexan® lens is available for the 12-inch size only. The clocks are mounted semi-flush, surface, or double, with the double mounting from either wall or ceiling. The clock markings are in Arabic numerals displayed in Helvetica font. The synchronous-wired clocks are designed to work with the Edwards Model 24A715 or 24A715M master clocks, as well the Dukane StarCall and MCS350 communication systems. All clocks are mounted on a 22-gauge steel housing and finished in matte charcoal gray.

Specifications: 24SS Series Secondary Analog Clock	
General Description	Round clock, 12 in (30.5 cm), or 15 in (38.1 cm) diameter Arabic (1-12 or 0-23 hour) clock face Matte charcoal-gray case
Connections	Each clock is furnished with a cable assembly 18 in (45.7 cm) long with a polarized plug and mating socket.
Wiring	Red (correction coil) Black (run motor) White (common return) Green/Shield (safety ground)
Frequency and Power Requirements	
Correction	Minute hand corrects hourly Hour hand corrects every 12 hours
Coil Input Voltage	115Vac, 24Vac, or 24Vdc
Motor Input Voltage	115Vac or 24Vac
Coil Input Frequency	60Hz or DC
Motor Input Frequency	60Hz
Coil Input Power	4 Watts
Motor Input Power	4W (8W for double faced)
Mounting	
Surface	Mount to RACO 695 single-gang backbox or equal (order separately).
Semiflush	24SS mounts to a 8-SAM0576 custom backbox. (Order backboxes separately.) Dimensions: 8 in (20.3 cm) high, 6 in (15.2 cm) wide, 3 in (7.6 cm) deep.
Double Faced	Mount to a 4-inch (10.16 cm) by 4-inch (10.16 cm) dual gang backbox (order separately). Adapter plates are furnished with each assembly for wall or ceiling mount. Specify wall or ceiling mount when ordering.

24SS Series Secondary Analog Clock

Clock Type Face	Dimensions	Outside Dimensions (A)	Distance Protrude (B)	Backbox Above Clock Ctr (C)	Backbox Depth (D)	SC Series Ship Weight
12 RF RD-Semi Flush	12.12 in (30.79 cm)	13.12 in (33.32 cm)	1.62 in (4.11 cm)	Approximate Center	3 in (7.6 cm)	11.9 lb (5.36 kg)
15 RF RD-Semi Flush	15.75 in (40.0 cm)	16.75 in (42.55 cm)	1.75 in (4.45 cm)	Approximate Center	3 in (7.6 cm)	14.3 lb (6.44 kg)
12 RS RD Surface	12.12 in (30.79 cm)	14.5 in (36.83 cm)	3.87 in (9.83 cm)	4.62 in (11.73 cm)	3.5 in (8.89 cm)	9.5 lb (4.28 kg)
15 RS RD-Surface	15.75 in (40.0 cm)	18.25 in (46.36 cm)	4 in (10.16 cm)	6.5 in (16.51 cm)	3.5 in (8.89 cm)	11.6 lb (5.22 kg)

Notes:
1. Use Model 8-SAM0576 backbox for 24SS clocks (order separately).
2. Use RACO #695 single-gang box or equivalent (order separately).

When mounting a double-faced clock, use the Edwards Model 23D Assembly Kit. Items with an * are included in the 23D.

*1. Two 12 RD/E or 15 RD/E Clock Assemblies
D = Wall Mount E = Ceiling Mount
*2. Outside Case Assembly
*3. Retaining Clips
*4. Case Adapter Plate
*5. 4 in x 4 in Wall Box or Ceiling Box
*6. Wall/Ceiling Adapter Plate
*7. Miscellaneous Mounting Hardware

24CC10 Clock Controller

User-friendly front panel controls

- Controls Edwards two-inch or four-inch digital clocks
- Operating modes: 12 or 24-hour clock; count down timer; elapsed timer; score board; code blue elapsed timer
- Operates independently or as slave to master clock
- Timer display settings: hours/minutes; minutes/seconds
- Operates from 15Vdc or 24Vac
- Mounts in standard three-gang backbox

The Edwards Model 24CC10 Clock Controller is a compact, microprocessor-controlled unit that enables an Edwards 24ZB20 Two-Inch Digital Secondary Clock or 24ZB40 Four-Inch Digital Secondary Clock to be used for count up timing, count down timing, score keeping and code blue timing. The digital clock serves as the time indicator and display for the clock controller in the room. The digital clock is mounted for optimum visibility, while the clock controller is mounted in a convenient location that allows access to its controls.

The Model 24CC10 Clock Controller is designed for ease of use, with logical button groupings, intuitive labeling, and LED function guidance. When a particular operating mode is selected, related LEDs illuminate to indicate the commands available in that mode. A lockout feature allows the front panel controls to be disabled, preventing unauthorized use. The 24CC10 and its associated digital clock can operate as a stand-alone clock/timer or as a secondary clock under the corrective control of an Edwards Model 24A715 or 24A715M Master Time/Program Clock. The 24CC10 can also operate under the corrective control of a Dukane StarCall or MCS350 communication system. The 24CC10 is powered by a separate 10 to 24Vac or 10 to 15Vdc power source. The 24CC10 has five operating modes:

Clock Mode displays the time on the Edwards digital clock in 12- or 24-hour format. In clock mode, the clock controller operates under the control of a master clock. In the absence of a master clock, the clock controller can operate in stand-alone mode, governing the time for its associated Edwards digital clock. Stand-alone mode does not provide battery backup for the clock display, therefore Edwards recommends that a master clock be used.

Count Down Timer Mode counts down to zero from a user-selected start time. The timer can count down by minutes and hours or by seconds and minutes. It can also be set to run silent, to beep when the timer runs down to zero, to chirp once per minute and beep at zero, or to chirp once per minute and once per second and beep at zero. During the count down sequence the timer can be stopped, restarted, and reset to its original target value.

Count Up Timer Mode measures the duration of an event. The timer can count up by hours and minutes or by minutes and seconds. It can also be set to run silent, to chirp once per minute, or to chirp once per minute and once per second. During the count up sequence the timer can be stopped, restarted, and reset to the initial timer value.

Score Board Mode uses the digital clock as a simple score board. The two left digits of the clock display the score of team 1 and the two right digits display the score of team 2.

Code Blue Timer Mode shows the elapsed time from when a code blue call is placed to when the STOP button is pressed on the clock controller. The code blue timer overrides anything currently displayed on the digital clock. This mode requires a contact closure from a separate device that initiates code blue calls.

Specifications: 24CC10 Clock Controller	
Operating Voltage	24Vac nominal—recommended (10Vac min. to 30Vac max.) —or— 15Vdc nominal (10Vdc min. to 30Vdc max.)
Current Consumption	91mA @ 10Vac, 50mA @ 24Vac —or— 110mA @ 10Vdc, 75mA @ 15Vdc
Terminations	Two pigtail connectors with 8 leads each (provided) One pigtail connector with 2 leads (for code blue; provided)
Operating Temperature	32°–90° F (0°–32° C)
Dimensions	4-1/8 in (10.5 cm) high x 8 in (20.3 cm) wide x 1-1/2 in (3.8 cm) deep
Weight	Approximately 9 ounces (252 g)
Mounting	Flush mounts into RACO 3-gang backbox, 2.5 in (6.4 cm) deep
Finish	Bezel—textured gray ABS Panel—textured gray polycarbonate

110-3902 Dual Four-inch Digital Clock Housing

- Designed for Edwards four-inch digital secondary clocks
- Adaptable for wall or ceiling mounting

The Edwards Model 110-3902 Dual Four-Inch Digital Clock Housing is designed for corridors or large rooms requiring a front and rear digital clock display. The enclosure houses two Edwards 24ZB40 Four-Inch Secondary Digital Clocks (purchased separately), and uses the trimplates that come with the digital clocks.

The dual digital clock housing can be wall or ceiling-mounted. For mounting to a cement or cinder block wall, the housing mounts to a standard RACO two-gang masonry box. Optionally, the housing can be flush-mounted to a ceiling or suspended below the ceiling using conduit extensions. Although not recommended, the housing can also be mounted to a stud wall if additional structural support is provided, or mounted to the ceiling after creating a support frame out of 2x4s.

Specifications: 110-3902 Dual Four-inch Digital Clock Housing	
Dimensions	7 in (17.8 cm) high, 19 in (48.3 cm) wide, 4-1/2 in (11.43 cm) deep
Weight	4.4 lbs (2 kg), less backbox and clocks
Mounting	Wall-mounted using two-gang masonry box Ceiling-mounted using conduit extensions
Finish	Charcoal gray

24ZB20 Two-Inch Digital Secondary Clock

- Highly visible two-inch LED
- 24 Vac operation
- Selectable LED display intensity
- 12- or 24-hour display
- High efficiency
- Can replace model 24F750A clocks for easy upgrades
- ESD-hardened
- Wireless Capable (24ZB20)

24ZB20
Digital Secondary Clock

The Edwards Model 24ZB20 Two-Inch Digital Secondary Clock provides a highly visible, even-intensity, long-life display of time in selectable formats. It can be operated in either 12- or 24-hour format, and at either Bright or Normal intensity levels. The time display on the secondary clock updates to the master clock time at one-minute intervals. This ensures that all system clocks are in precise synchronization, and that every clock in the system is as accurate as the master clock. The high-efficiency 24 Vac design allows many clocks to be operated at great distances from low cost 24 Vac power supplies.

- For new installations, the 24ZB20 can be flush-mounted into a standard four-gang backbox, and can be operated from a 24 Vac power supply.
- In retrofit installations, the 24ZB20 can be surface-mounted using the 8A225 Surface Backbox, and can be operated from 24 Vac.
- In repair situations, the 24ZB20 can directly replace the 24F750A digital clock. The 24ZB20 fits into the 24F750A's existing six-gang backbox and operates from the existing 24F750A's 15Vdc power supply. The pigtail connector of the existing installation can be directly applied to the new 24ZB20 installation without rewiring. (Check power supply reserve capacity before upgrading.)

Compliance with FCC Part 15 Class A emissions rules has been verified. As a result, the Model 24ZB20 clock meets the requirements for installation in educational, institutional, and commercial sites. The installed clock is ESD-hardened to IEC 801-2 Standards.

Specifications: 24ZB20 Two-Inch Digital Secondary Clock

Mounting	**New Installations (flush-mount):** RACO #693, 4-gang masonry backbox, 2-1/2" (6.4 cm) deep, or RACO #698, 3-1/2" (8.9 cm) deep, or approved equal. **Retrofit Installations (surface mount):** Dukane 8A225, Two-Inch Surface-Mount Backbox, 1-3/4" (4.4 cm) deep, or approved equal. **Repair Installations (to replace 24F750A clocks):** RACO #960, 6-gang masonry backbox, 3-1/2" deep (8.9 cm), or approved equal.
Power Requirements	24Vac (+/– 5 Vac)—NOT TO EXCEED 30 Vac 122 mA in Bright display mode. (3W) @ 24Vac 67mA in Normal display mode (1.6W) @ 24Vac
For replacement of 24F750A clocks:	15Vdc (+ 0/–2Vdc) 125mA in Bright display mode @ 15Vdc 60mA in Normal display mode @ 15Vdc
Note: When replacing a 24F750A clock, the pigtail plug from the previous clock can be directly connected to the 24ZB20 without rewiring. The rated current consumption of the 24F750A is 300mA, allowing direct replacement at either Bright or Normal intensity settings.	
Viewing Distance	110' (33.5 m) in Bright intensity mode with normal lighting 100' (30.5 m) in Normal intensity mode with normal lighting
Display Size	2" (5.1 cm)
Electrostatic Discharge	Installed clock is ESD-hardened to IEC 801-2 requirements (+/– 8kV direct, +/– 15kV air discharge)
Terminations	Pigtail leads color-coded
Lens	Anti-glare clear acrylic
Dimensions	4-1/2" (11.4 cm) high by 11-15/16" (30.3 cm) wide by 1-3/4" (4.4 cm) deep
The Model 24ZB20 Two-Inch Digital Secondary Clock can be controlled by any of the following master clock products: Edwards Models 24A715 or 24A715M Master Time/Program Clock. Note: Correction by a Dukane MCS350 system, or CPC-E based StarCall system may require use of Model 110-3836 Digital Clock Sync Module.	
24A715	Edwards Master Clock
24A715M	MCS350 Dukane Intercom System with Master Clock
SCR	Dukane StarCall Platform Integrated Communications Systems

24ZB40 Four-inch Digital Secondary Clock

- Highly visible four-inch LED
- 24Vac operation
- Selectable LED display intensity
- 12- or 24-hour display
- High efficiency
- Can replace Edwards model 24D20 and 24F750A clocks for easy upgrades
- ESD-hardened
- Wireless capable (24ZB40)

The Edwards Model 24ZB40 Four-Inch Digital Secondary Clock provides a highly visible time display. It can be operated in either 12- or 24-hour format, and at either Bright or Normal intensity levels. Each minute the time display on the secondary clock updates to the master clock time. This ensures that all clocks in the system are in exact synchronization, and that every clock in the system is as accurate as the master clock. See the Associated Equipment list for the appropriate master clocks.

Installation of the Model 24ZB40 clock offers the following options:

- For new installations, the 24ZB40 can be mounted into either a standard 4-gang masonry backbox or an 8A425 Surface-Mount Backbox, and can be operated from a 24Vac power supply.
- For upgrade installations, the 24ZB40 can directly replace a Model 24D20A Two-Inch Digital Clock. Both units fit into a standard 4-gang backbox and share the same pigtail connector. (Check power supply reserve capacity before upgrading.)
- In existing installations, the 24ZB40 clock can directly replace the Edwards Model 24F750A Digital Clock. The 24ZB40 fits into the same six-gang backbox and operates from the existing 15Vdc power supply. The pigtail connector of the existing installation can be directly applied to the new 24ZB40 installation without rewiring. (Check power supply reserve capacity before upgrading.)

Compliance with FCC Part 15 Class A emissions rules has been verified. As a result, the Model 24ZB40 clock meets the requirements for installation in educational, institutional, and commercial sites. The installed clock is ESD-hardened to IEC 801-2 Standards.

Specifications: 24ZB40 Four-inch Digital Secondary Clock	
Mounting	New Installations (flush mount): RACO #693, 4-gang masonry backbox, 2-1/2 in (6.4 cm) deep, or RACO #698, 3-1/2 in (8.9 cm) deep, or approved equal Retrofit Installations (surface mount): Edwards 8A425, Four-Inch Digital Clock Surface-Mount Backbox, 1-1/2 in (3.8 cm) deep, or approved equal Upgrade Installations (to replace 24F750A clocks): RACO #960, 6-gang masonry backbox, 3-1/2 in deep (8.9 cm), or approved equal
Power Requirements	24Vac (+/– 5Vac) NOT TO EXCEED 30Vac 350mA in Bright display mode @ 24Vac 250mA in Normal display mode @ 24Vac For replacement of 24F750A: (see Note below) 15Vdc (+ 0/-2Vdc) 350mA in Bright display mode @ 15Vdc 250mA in Normal display mode @ 15Vdc
Note: When replacing 24F750A clocks, the pigtail plug from the previous clock can be directly connected to the 24ZB40 without rewiring. The rated current consumption of the 24F750A is 300mA, allowing direct replacement at the Normal intensity setting. If the Bright setting of the 24ZB40 is to be used, the existing loading on the power supply must be measured to see if there is sufficient supply capacity.	
Viewing Distance	160 ft (48.8 m) in the Bright intensity mode with normal lighting 150 ft (45.7 m) in the Normal intensity mode with normal lighting
Display Size	4 in (10.2 cm) high by 10 in (25.4 cm) wide
Electrostatic Discharge	Installed clock is ESD-hardened to IEC 801-2 requirements (+/– 8kV direct, +/– 15kV air discharge)
Terminations	Pigtail leads color-coded
Lens	Anti-glare Acrylic
Dimensions	5.8 in (14.7 cm) high by 19.0 in (48.3 cm) wide by 2.5 in (6.4 cm) deep
Weight	2.5 lbs (1.1 kg) (without packaging)
Mounting	Wall-mounted using two-gang masonry box Ceiling-mounted using conduit extensions
Finish	Charcoal gray
Bezel	Charcoal gray ABS plastic, 5.8 in (14.7 cm) high by 19.0 in (48.3 cm) wide by 0.94 in (2.4 cm) deep
8A425	Surface Mount Clock Backbox, 19 in (48.3 cm) long by 7 in (17.8 cm) high by 1.5 in (3.8 cm) deep, charcoal gray enamel finish. Low profile box allows the 24ZB40 to be mounted on an existing wall surface.
110-3693	AC Clock Power Supply, 5 amps (rms), mounts in a 145-184-SC Power Supply Backbox with either a 110-2190-SC flush-mount door or a 110-2191-SC surface-mount door (order separately according to your application's requirements). Three power supplies maximum per backbox.
110-3902	Four-inch Digital Clock Dual Enclosure, Wall or Ceiling Mount
The Model 24ZB40 Four-Inch Digital Secondary Clock can be controlled by any of the following master clock products: Edwards Models 24A715 or 24A715M Master Time/Program Clock. Note: Correction by a Dukane MCS350 system, or CPC-E based StarCall system may require use of Model 110-3836 Digital Clock Sync Module.	
24A715, 24A715M	Edwards Master Clock (rack-mount)
MCS350	Dukane Intercom System with Master Clock
SCR	Dukane StarCall Platform Integrated Communications Systems

24SC12R-SPL and 24SC15R-SPL Analog Secondary Clock

The Edwards Model 24SC12/15R-SPL Secondary Analog Clock combines the advantages of a long-life quartz movement with microprocessor technology to provide a round 12- or 15 inch analog clock with contemporary styling. The 24SC12/15R-SPL is a direct replacement for the Edwards 24SS Series synchronous secondary analog clock. It can also be directly connected to the wiring for Edwards Model 24D20A or 24D40A digital clocks. The 24SC12/15R-SPL allows the use of both analog and digital clocks on the same line and it can emulate the correction schemes of many popular analog secondary clocks from various manufacturers. The desired emulation mode is selected using a simple DIP switch setting. This allows the 24SC12/15R-SPL to be used as a replacement for failed clocks in many systems, regardless of their original manufacturer.

The 24SC12/15R-SPL is designed to be flush- or surface-mounted while requiring no special backboxes or mounting hardware. It can be mounted as a ceiling or wall double-face clock using third-party hardware. The Shatter Resistent 24SC12/15R-SPL is provided with a single piece black metal rim with a convex acrylic lens. Clock face time markings are Arabic numerals in a 12-hour format with black hour and minute hands and a red second hand. This clock works with the Edwards Model 24A715 or 24A715M master clocks, as well the Dukane StarCall and MCS350 communication systems. The 24SC12/15R-SPL complies with FCC Part 15 Class A and meets the requirements for installation in educational, institutional, and commercial sites. The installed analog clock is ESD-hardened to IEC 801-2 standards.

Specifications: 24SC12/15R-SPL Analog Secondary Clock	
Diameter	12 in (30.5 cm) or 15 in (38.1 cm)
Shape	Round
Face	Black Arabic numerals (1-12) on a white background
Rim	Steel, single piece (no welds), matte black painted finish
Connections	Each clock is furnished with an analog and digital cable pigtail assembly, each 12 inches (30.5-cm) in length with a polarized plug Analog Wiring: Red (correction) Black (run motor) White (common, return) Green/shield (safety ground) Digital Wiring: Black (common) Brown (reset) Blue (24Vac) Blue/White (24Vac) Orange (clock)
Correction	Depends on DIP-switch selected master clock compatibility
Frequency And Power Requirements	Input Current: 50mA @ 24Vac Input Voltage: 24Vac/60 Hz 120Vac/60 Hz (requires Model 110-3950 120V Adapter Kit—sold separately)
Mounting	Flush: Mount to a RACO 696 two-gang masonry backbox or equal (sold separately) Surface: Clock provided with a wire mold knockout. Extend wire mold from a RACO two-gang masonry back box mounted above ceiling (wire mold and electrical box sold separately). Double Faced: Follow third-party manufacturers' mounting instructions.
Notes: New installations may require either a Model 110-3900 Mounting Plate or 110-3950 120Vac Adapter Kit. See Associated Equipment, below.For more detailed information, refer to the latest revision of document number 3100673, the Model 24SC12R Installation Manual.	

9A1900 Elapsed Timer Start Button

- Single switch operation
- Stainless steel wallplate
- Precious metal contacts
- Works with model 24CC10 clock controller

The Edwards Model 9A1900 Elapsed Timer Start Button is used with the Edwards Model 24CC10 Clock Controller. When the PRESS TO START TIMER pushbutton is pressed, it provides a momentary contact closure that automatically starts the clock controller's "Count Up Timer" function, overriding all other active clock controller functions.

Specifications: 9A1900 Elapsed Timer Start Button	
Switch Type	SPDT momentary pushbutton (spring-action return)
Designation	PRESS TO START TIMER
Dimensions	4-1/2 in (11.4 cm) high, 2-3/4 in (7 cm) wide, and 7/8 in (2.2 cm) deep
Terminations	Pigtail Leads
Net Weight	2 oz (56 grams)
Finish	Satin-finished stainless steel
Mounting	Standard flush-mounted single-gang backbox more than 2 in (5.1 cm) deep

110-3693 AC Clock Power Supply

- Continuous duty operation
- Easily accessible fuses
- Screw terminal outputs
- Includes correction coil relay
- Outputs permit class 2 wiring

The AC Clock Power Supply provides a convenient 24Vac source for operating synchronous clocks and bells. The low voltage and current output of this power supply allows Class 2 wiring to be used. An onboard relay allows clock correction coils to be easily interfaced with Edwards master clocks. This supply mounts with the standard Edwards power supply backbox and doors.

110-3693 AC Clock Power Supply System	
Rated Outputs	24Vrms @ 5A unregulated total (two separate 2.5A outputs)
Rated Input	120Vac, 60 Hz, 1.4A
Relay Input/ output	Coil rated 24Vdc @ 40mA Contacts rated 10A resistive with 240Vac or 30Vdc maximum
Net Weight	AC Clock Power Supply: 7 lb, 1 oz (3.4 kg) 110-2190 Flush Mt Door: 3 lb, 13 oz (1.7 kg) 110-2191 Surface Mount Door: 3 lb, 7 oz (1.6 kg) 145-184 Backbox: 8 lb, 7 oz (3.8 kg)

Model	Description
24CC10 Clock Controller and Associated Equipment	
24CC10	Clock Controller
24A715M	Master Time/Program Clock (M= Modem optional) StarCall or MCS350 System
24ZB20	Two-Inch Digital Secondary Clock
24ZB40	Four-Inch Digital Secondary Clock
9A1900	Digital Clock Controller Remote Start Button
110-3693	24Vac Clock Power Supply (for use with additional digital secondary clocks)
17A437	24Vdc Clock Power Supply (80mA, plug-in, low power supply for use with one 24CC10)
Four-inch Digital Clock Housing and Associated Equipment	
110-3902	Dual Four-inch Digital Clock Housing
8A425	4 inch Surface Mount backbox
RACO Model 696	Two-gang masonry box, 3-3/4 in (9.5 cm) high, 3-25/32 in (9.6 cm) wide, 3-1/2 in (9 cm) deep
24ZB40	Two-inch Digital Secondary Clock (wireless optional)
24ZBM2040	Wireless Module for 24ZB40
Digital Clock/Speaker and Associated Equipment	
110-3822	Digital Clock Speaker Housing This housing has the opening and capability for mounting a standard 8 in (20.3 cm) round speaker.
145-192	Backbox, flush mount. Overall dimensions: 13-3/4 in (35 cm) wide, 12-3/4 in (32.4 cm) high, 3-1/4 in (8.3 cm) deep. Rear of box dimensions: 12-1/2 in (31.8 cm) wide, 12-3/4 in (32.4 cm) high.
110-788	Surface or Double face Clock/Spk Enclosure
5A606	Speaker W/Transformer
Analog Secondary Clock and Associated Equipment	
24SC15R-SPL	15" Smart Analog Clock
24SC12R-SPL	12" Smart Analog Clock
24A715	Master Program Clock
24A715M	Master Time/Program Clock (M= Modem optional) StarCall or MCS350 System
	StarCall Master Program Clock
110-3900	Mounting Plate (required if 110-3950 is not used)
110-3950	120Vac Adapter Kit
110-3693	Power Supply (Class II), 24Vac
145-184-SC	Flush Mount Door for Model 145-184 Backbox
110-2191-SC	Surface Mount Door for Model 145-184 Backbox
145-184-SC	Backbox, surface or flush mount (holds three Model 110-3693 Power Supplies)

Ordering Information Continued

Model	Description
AC Clock Power Supply and Associated Equipment	
110-3693	AC Clock Power Supply (1, 2, or 3 employed)
145-184-SC	Backbox (Up to three power supplies can be mounted in a single backbox)
110-2190-SC	Door (Flush Mount)
110-2191-SC	Door (Surface Mount)
Digital Clock Sync Module and Associated Equipment	
24ZB20	Two-Inch Digital Secondary Clock
24ZB40	Four-Inch Digital Secondary Clock
110-3693	24Vac Clock Power Supply Assembly
110-3521A	CPC-E Central Processor Card (StarCall)
110-3542	Power Supply Module (StarCall)

Synchronized Wireless Clock Systems
Wireless Timekeeping Equipment

Edwards wireless clock solutions comprise a reliable master/slave cascading network that synchronizes clocks from a central on-site master controller. The master clock receives highly accurate time signals from an NTP or GPS source and relays timecodes to local slave clocks via wireless signals.

Each clock in the system is capable of receiving and transmitting the wireless signal which allows it to be used as a repeater while boosting the data stream and sending along the system. With this dual capability there is no limit to the number of clocks that can be installed throughout highrises, sprawling facilities, and small buildings alike.

Because the signal fans out and is repeated by a cascading number of devices, a single clock will typically receive its data from a number of different angles. This dramatically reduces the effect of obstructions, noise sources, or long distances on the reliability of the system. Furthermore, if an individual clock looses its signal, it will link to a nearby clock and automatically synchronize with that new source.

The cascading network also reduces system setup and installation costs, thanks to the relatively low signal strength that is necessary for it to function efficiently. This eliminates the expense and time required to obtain an FCC license.

The Dukane Model 24ZB20 and 24ZB40 Secondary Clocks provide a highly visible, even-intensity, long-life display of time in selectable formats. They can be operated in either 12- or 24-hour format, and at either Bright or Normal intensity levels. The time display on the secondary clock updates to the master clock time at one-minute intervals. These cost-effective digital clocks can be used in a wired timekeeping system or, with the addition of the optional ZigBee module 24ZBM2040, can be installed on a wireless system. See data sheet 85098-0003 for more product information and mounting options.

Standard Features

- ZigBee open protocol cascading wireless network
- Master clock supports GPS or NTP time source
- Slave clocks act as signal repeaters for enhanced reliability
- Easy to install: low voltage power and signaling; no wiring, no FCC radio license required
- Intuitive browser-based setup
- Digital clocks support count-up/count-down timers and message actuation via wall button (Edwards-24ZB266 and Edwards 24ZB456 only) or via remote, or event timing
- Date and time clocks support English, French and Spanish formatting
- Digital clocks are powered via plug-in 110 Vac transformer
- Analog clocks may be powered by plug-in 110 Vac transformer or by batteries.
- Master Clock V2.3 program digital secondary clocks to countdown class change or break times

110-3693 AC Clock Power Supply

The AC Clock Power Supply provides a convenient 24Vac source for operating synchronous clocks and bells. The low voltage and current output of this power supply allows Class 2 wiring to be used. An onboard relay allows clock correction coils to be easily interfaced with Edwards master clocks. This supply mounts with the standard Edwards power supply backbox and doors.

Standard Features

- Continuous duty operation
- Easily accessible fuses
- Screw terminal outputs
- Includes correction coil relay
- Outputs permit class 2 wiring

Synchronized Wireless Clock Systems
Wireless Timekeeping Equipment

Hardware Specifications	
Master Clock	
Operating Current	Powered by an AC Adapter from 120VAC to 19V 3A UL/CSA, CE approved AC cord with U.S. type 3 prong grounded plug, or directly from AC24V
Storage & Operating Environment	50 to 120° F (10 to 49° C); Humidity: 10% to 95% non-condensing
Agency Listings	UL /CSA, FCC
Construction and Finish	Black metal
Master Clock Mounting	Configured as a 19" Rack mount. “Computer Server Black” metal case, 435mm (W), x 295mm (D), x 45mm (H)
Transmitting power from master clock	Approximately 0.06W at 2.450~2.480Ghz.
Synchronization time from master to slave clock and slave-to-slave clock (one repeater jump)	Not to exceed 0.007 seconds (7mS), maximum jump time is 19; maximum delay 0.13 seconds (133mS)
Time Synchronization	NTP or GPS Master Clocks are synchronized every second; the system has an internal oscillator that maintains plus or minus one second per day between synchronizations so that clock accuracy does not exceed plus or minus 0.2 seconds.
Relay Contacts	4 relay dry contact O/P (NC, C, NO), 5A, Programmable timer for bell operation or lamp on/off control
Scheduling	Supports an interface for a software application to manage bell/tone schedules and count down time breaks of class changes
Master clock	Supports the synchronization of an unlimited number of slave clocks or digital displays.
GPS Antenna	Operating temperature: 50 to 104° F (10 to 40° C); Humidity: 0% to 95% non-condensing, Length of signal cable: 4.5 meters optional 50 meter extension cable, window or roof mounted
Regulatory information	North American standards: FCC Part 15, Subpart A, Subpart C; Canadian ICES-003; CSA C108.8; UL 863 Additional rules and guidelines: ZigBee Alliance (http://www.zigbee.org/en)
Digital Clocks	
Mounting	Wall mount and ceiling mount
Daylight Saving Rules	Factory set. Reconfigurable to any new rule without a hardware update.
Slave clocks	Act as repeaters. Maximum repeat time is 19; average transmission range should be 100 meters. Line of Sight (LOS) range (nothing blocking) will be 200 meters. It is expected that there will be one slave clock on each floor, within close proximity to each other, when supporting a multi-floor configuration. Synchronization time from master to slave clock and slave-to-slave clock (one repeater jump) shall not exceed 0.007 seconds (7mS), maximum jump time is 19; maximum delay should be 0.13 seconds (133mS). The slave digital clock colon stays lit when the clock is synchronized. If more than seven minutes elapse with no data received from the master clock, the slave clock will run on its time based (crystal) and the colon will flash.
Code Blue	Edwards 24ZB266 and Edwards 24ZB456 interface to Nurse Call systems that support relay pulse interface to start code blue count up. When invoked, a relay/pulse is sent to the timer, which triggers it to begin counting up. If a code blue status is in effect, it will take priority and the timer’s previous task will run in the background until the code blue function is stopped. A switch control allows the user to operate the timer in multiple modes. (3.0mA max. @ 5vac/dc–120vac/dc)
Analog Clocks: see list below for part numbers	
Self running accuracy	Within two seconds per day.
Adjustment	Sensors automatically position hands. No manual adjustment necessary.
ZigBee transmission frequency	2.475GHz
FCC & IC approval wireless module	FCC ID:RF2IPLINK12235142, IC ID:8576AIPLINK5142
Antenna	Internal
Working time on battery power	Four years or more. AC power and central power options also available.
Physical	12" (345mm) dia X 61mm depth 1.0 Kg or 15" (430mm) dia X 45mm depth 2.0 Kg
Frame	Plastic or metal with shatter proof plastic face
110-3693 AC Clock Power Supply System	
Rated Outputs	24Vrms @ 5A unregulated total (two separate 2.5A outputs)
Rated Input	120Vac, 60 Hz, 1.4A
Relay Input/output	Coil rated 24Vdc @ 40mA Contacts rated 10A resistive with 240Vac or 30Vdc maximum

Accessories

Cat. No.	Description
24ZBIFR	IR Count Down Clock Actuator Infrared transmitter distance: max. 10 meters (face to the clock), Operating battery: 1.5V x 2 size AAA, Operating time: about 2 years (depends on how often it is used). Also used to adjust or set LED brightness and to set language displayed.
24ZBMCGPS	GPS Receiver with 4.5 m Antenna Cable (Includes Edwards-MC-040)
24ZBMCGPSEXT	50 Meter Extension cable for GPS antenna
24ZBDEMO1A	Demo carrying Kit, in aluminum carrying case with casters, containing each a 24ZBMC100, GPS receiver w/.4.5M ant. Cable & mount hardware, AC adaptor (KPA-060K), 24ZB266D w/AC adaptor, 24ZB456 w/AC adaptor & 4-tap AC receptacle, GE-IFR-2 clock actuator
24ZBDEMO1B	Demo carrying Kit with aluminum carrying case with casters for analog wireless clocks, containing a 24ZB12R and 24ZB212R with AC adaptors Requires 24WCD-01 (A) Demo Kit
24ZBDCELL-2	2 Alkaline D Cell batteries for 24ZBP12R and 24ZBP212R
24ZB2040 ADAPT	AC Power adapter for 24ZB20 and 24ZB40
24ZBPSCABLE-10	Central power cable for 24ZB15R, 24ZB12R, 24ZB212R, 24ZB20, and 24ZB40; Package of 10 cables
24ZB12VDC2A-10	Optional AC Adapter for 24ZBP12R, 24ZBP212R, 24ZB12R, 24ZB212R, 24ZB15R and 24ZB215R (10 Adapters per Package)
24ZBM2040	Optional Mini ZigBee Module for wireless transmitter and receiver on Models 24ZB20 and 24ZB40
24ZBWG1215R	Analog Clock Wire Guard for 24ZBP12R, 24ZBP212R, 24ZB12R, 24ZB212R and 24ZB15R
24ZBWG266	Metal Wire Guard for 24ZB266 digital clock
24ZBWG456	Metal Wire Guard for 24ZB456 digital clock
110-3900	2-gang analog clock hanger plate-optional

Information Age

"There's no doubt that we're living in the Information Age. But all that competition for our attention creates very real challenges when communicating critical messages in real-time.

This is where LED Message Displays from Edwards 'really shine'.

These displays are the most effective way for our company to deliver complex factory-floor information with no ambiguity."

LED Message Displays

The need for clear and concise communication has become increasingly important in both the industrial and commercial business environment. LED message displays have transformed the way companies communicate with both their customers and employees. Whether it is the time and temperature on the local bank sign, confirmation of your order at the local drive thru or traffic warnings and announcements on the overpass, LED message displays have become increasingly valuable in today's world.

Edwards offers custom LED message center solutions in addition to standard off the shelf products. Edwards has the message center to fit your needs. We offer a variety of displays in different sizes that can be used as single stand-alone units or be networked into a plant wide communication system. Designed for indoor or outdoor communication in commercial and industrial environments, Edwards' message centers can display production goals and performance, safety goals and performance, changes in employee benefits, company announcements and achievements as well as boost morale through employee recognition. They can also be applied in commercial establishments from retail stores to restaurants as a way to communicate special offers, announcements or specific messages as required.

Applications

- Lean manufacturing measurements on the shop floor, call center or any workplace environment that monitors productivity and advocates continuous improvement
- Display real-time status information and alerts
- Communicate to customer in lobby or waiting area(s)
- Communicate messages directly to supervisory personnel in the office, plant, shipping/receiving etc. regarding meetings, announcements, schedule changes, policy updates, sales and quality reports and more
- Display critical real-time productions information such as efficiency levels, production schedules/changes, system status information and alerts and other select information
- Transmit emergency announcements, department objectives, financial and sales goals, weather updates, etc.
- Communicate operation instructions
- Warehouse environment messaging:
  - — Inventory management, storage, receiving, picking, and shipping.
  - — Improved coordination of orders, parts, priorities and flow
  - — Improved inventory accuracy
  - — Visible tracking of order status, changes and priorities
  - — Prioritization of orders
  - — Visibly display performance information

Call Edwards Signaling Technical Sales Support today to find out more about LED Message Displays at 1-800-336-4206.

Networking Software is also available to assist in creating, scheduling and running ads, announcements and messages. Features include:

Features

- **Message Editor:** Create and preview messages for your LED display
- **Site Manager:** Configure and run an entire network of LED displays, set up schedules and send messages
- **Communication Manager:** Select wireless, LAN, or modem interfaces and monitor activity logs
- **Active X Control:** Manage variable updates and locations on your real-time data displays

EDWARDS

Fail Safe

"Electromagnetic door holders are a vital part of the systems we have installed in our facility to keep our personnel safe.

All doors remain open until they receive a release signal from our fire alarm system, strategically placed heat or smoke detectors, or electrical switches.

These rugged, good-looking switches silently do their part to keep us safe day-in and day-out."

Door Holders
Electromagnetic
1500 Series

The Edwards 1500 Series electromagnetic door holders feature housings finished with durable baked polyester powder paint. The floor or wall section houses the electromagnet while the contact plate attaches to the door. The contact plate has a shock absorbing nylon (swivel) ball that allows the plate to adjust to any door angle. Floor units are available in single-door or double-door (back to back) versions. Wall units are available in flush or surface mounted versions.

If power fails, doors are released automatically but may be opened or closed manually at any time. All units are free of moving parts, are self-contained and require no maintenance.

The device holders hold a door open while energized. When de-energized by a relay controlled by the fire alarm system or other switch, the door is released to a closed position.

Features and Specifications

- Floor and wall mounted styles
- Baked polyester powder paint finish
- Low power consumption
- Silent operation
- 25 Lbf (111N) nominal holding force
- Adjustable, swivel contact plate
- Single-door or double-door (back to back) versions – floor mounted
- Flush or surface mounted versions – wall mounted
- Operating temperature range: 32°F to 120°F (0°C to 49°C)

AC DC

Door Openers
Mortise
150 Series

The 154 mortise type door opener is a long service device, providing the security and convenience of remote control door-lock operation. This unit flush mounts in place of the regular door strike plate. The door remains locked until the opener is electrically actuated by a remote contact device. For AC models, use appropriate Transformer. See below table.

Features and Specifications

- Painted brass faceplate and nosing
- Fits left and right hand doors
- Easy installation
- Rugged, heavy duty construction
- For use in wood jambs and gating systems

Ordering Information

AC DC AC/DC

Door Openers
Mortise
170 Series

The 170 Series mortise type door openers are long service devices, providing the security and convenience of remote control door-lock operation. These units flush mount in place of the regular door strike plate.

With the non-reverse acting units, the door remains locked until the opener is electrically actuated by a remote contact device. For reverse acting units, the door remains unlocked (with current off). When energized through a timer or manual switch, the unit keeps the door locked.

For AC operation, use with either an 88-50, 596, or 592 Transformer.

Continuous Duty Operation
The 177-RG5 and 178-RG5 are suitable for continuous duty operation. However, when operated from 24V AC, they must be connected through the SR-1 Silencing Assembly. They may also be operated directly from 24V DC.

Features and Specifications

- Fits left and right hand doors
- Easy installation
- Rugged, heavy duty construction
- For use in wood and metal jambs
- Continuous duty operation (**177-RG5** and **178-RG5**)

Ounce of Prevention

"Each year in the U.S., fires claim thousands of lives and cause billions of dollars in damage.

Fire Detection and Alarm Equipment represent one of the most important investments any organization will ever make. I know. I see the devastation fires can cause every single day.

Edwards Fire Alarm Systems are protecting people and property every day, from casinos in Las Vegas to the Library of Congress. Need I say more?"

Conventional Fire Alarms
Panels
E-FSC Series

The Edwards E-FSC fire alarm family consists of 3, 5 and 10 zone conventional fire alarm control panels, an integrated DACT/Dialer, serial annunciator modules, and serial remote relay modules. All of these components are microprocessor-controlled. The E-FSC family is suitable for both new and retrofit installations.

E-FSC Series Panels incorporate features designed to simplify installation, operation and maintenance. These include front panel programming, one person walk testing, and selectable IDC and NAC types. In addition, when used with Edwards CleanMe® -compatible smoke detectors, E-FSC provides analog type features such as remote maintenance alert and automatic drift compensation that reduces false alarms and simplifies maintenance calls.

E-FSC502 and E-FSC1004 panels support Class A operation by combining pairs of on-board initiating circuits (IDCs) or notification circuits (NACs) to provide the necessary Class A circuits.

Features and Specifications

- Available in 3, 5, and 10 IDC models
- IDC or NAC pairs convertible to single Class A circuits (10 and 5 IDC panels only)
- Combination Waterflow and Supervisory IDCs reduces wire and zone counts
- NACs programmable by zone and individually selectable for Genesis, continuous, temporal outputs, or coded
- Front panel programmable
- Optional fully integrated DACT/Dialer for remote PC programming
- Genesis option allows precision synchronization and audible silence over two wires without additional modules
- On-board relays for Alarm, Supervisory and Trouble
- Optional serial bus relay modules are programmable for common or zone activation
- Optional serial bus remote annunciator family
- Expandable power supply on 10 IDC panel
- Trim ring available for semi-flush mounting
- Supports 2M, “SC", 2400, 500, and 700 series detectors
- Operating temperature range: 32ºF to 120ºF (0°C to 49°C)

Conventional Fire Alarms
Smoke Detectors
500 Series

The Edwards 511C is a conventional photoelectric, direct-wire smoke detector with drift compensation, and features a low profile and self-diagnostics. This two-wire detector meets NFPA 72 field sensitivity requirements without the need for external meters.

The 511C continually monitors its own sensitivity and operational status, and provides a visual indication if it drifts out of the sensitivity range or fails internal diagnostics. Drift compensation allows the detector to automatically adjust its sensitivity over time as it becomes dirty, increasing the time between cleaning, and the life of the detector. The patented field replaceable optical chamber simplifies cleaning.

Normal sensing occurs every 9 seconds. This rate doubles when a signal exceeding the alarm threshold value is sensed. Two additional successive signals above the threshold level will initiate an alarm.

Features and Specifications

- Built-in drift compensation
- Field-replaceable optical chamber
- Small, low-profile design
- White color
- Meets NFPA 72 field sensitivity testing without the need for external meters
- Includes mounting base
- Operating temperature range: 32°F to 100°F (0°C to 37.8°C)

Conventional Fire Alarms
Smoke Detectors
500 Series

Edwards 500 Series two-wire conventional photoelectric smoke detectors work on a light-scattering principle. A pulsed infrared light-emitting diode serves as the light source, and a high-speed photo diode as the sensing element. This design protects against nuisance alarms caused by dust, insects, RF interference, and ambient light. Built-in drift compensation allows the detector to automatically adjust its sensitivity over time as it becomes dirty.

The 500 Series optical chamber is field replaceable. In the event of a confirmed alarm the LED will light continuously. The unit indicates trouble by flashing the LED every second. This meets the NFPA 72 field sensitivity testing requirements.

The 500 Series offers sounders in two-wire applications, specifically to meet residential code requirements. Units with built-in 85dBA sounders emit a temporal 3-3-3 tone pattern when in alarm and will emit a steady tone when the input power is reversed. All wiring terminates in clamp-type screw terminals. The detectors mount to a standard single-gang electrical box, a four-inch octagonal, four-inch square electrical box, or WIREMOLD No. 5739 fixture box.

Features and Specifications

- Self-diagnostic capability continually monitors operation
- Remote maintenance (CleanMe) reporting and built-in drift compensation
- Field-replaceable optical chamber
- Low-profile design blends into the ceiling
- Optional auxiliary functions include:
  - Integral sounder; 85dB @ 10ft.
  - Fixed/Rate-of-Rise heats
- White color
- Includes mounting base
- Operating temperature range: 32°F to 100°F (0°C to 37°C)

Conventional Fire Alarms
Smoke Detectors
700 Series

The Edwards photoelectric smoke detector is an interchangeable head and base detector with a light-scattering optical sensor. A pulsed infrared LED light source and a high-speed photodiode-sensing element are housed in an omni-directional sensing chamber protected by an insect screen. The chamber is not affected by ambient light. The detector features a field-replaceable optical chamber to simplify cleaning. The 721UT photoelectric detector includes integral fixed temperature heat detectors.

Edwards 700 Series smoke detectors are suitable for use in commercial and industrial environments. If the detector drifts out of its UL Listed sensitivity range or fails internal diagnostics, the alarm LED flashes once a second to indicate trouble. This meets NFPA 72 field sensitivity testing requirements without the need for external meters.

Applying a magnet near the detector's integral reed switch activates a self-diagnostic routine that provides visual indication of sensitivity level, or if service is required.

Built-in drift compensation allows the detector to automatically adjust its sensitivity over time as it becomes dirty.

Features and Specifications

- Self-diagnostic capability continually monitors operation
- Built-in drift compensation
- Field-replaceable optical chamber
- Low-profile design blends into the ceiling
- Advanced nuisance alarm immunity
- Meets NFPA 72 field sensitivity testing without the need for external meters
- Extensive two-wire compatibility listings
- White head and base
- Operating temperature range: 32°F to 120°F (0°C to 49°C)

Conventional Fire Alarms
Smoke Detectors
SC Series

The SC Series ionization smoke detectors have a dual chamber design, so they automatically compensate for environmental changes such as atmospheric pressure, humidity and ambient temperature.

A red LED indicator situated on the detector molding provides clear indication when the unit is in alarm.

SC10U-3 detectors plug into the CSBU-1 base unit by a simple twist and lock action. In order to prevent unauthorized removal, a site selectable option is provided to lock the detector into its base. Once applied, the unit can only be removed by means of a special tool.

All SC10U-3 detectors are monitored for detector removal. When a detector (or detectors) is removed from its base, a fault condition is detected.

Features and Specifications

- LED alarm indication
- Sensitivity test feature with use of C-PST test tool
- Tamper resistant with site selectable lock
- White molded high impact fire retardant plastic
- Advanced dual chamber
- Surface mount technology
- Operating temperature range: 32ºF to 100ºF (0°C to 37.8°C)

Conventional Fire Alarms
Hazardous Location Smoke Detector
V9006 Series

The V9006-0001-013 Hazardous Location Smoke Detector is suitable for use in hazardous industrial and commercial locations.

It uses a solid state infrared emitting diode (IRED) and a light sensing photovoltaic cell arranged in a labyrinth assembly. A recessed photodiode provides voltage for amplification to "alarm signal" level. The main enclosure of the detector contains the electronics, alarm relay, supervision relay and facilities for connection to system wiring.

Each detector contains one set of Form A (SPST) N/O contacts for connection to the alarm initiating circuit and a set of (SPST) N/C power supervision contacts.

The detector locks in on alarm and has a lock-in alarm indicator (LED) on the outer surface of the housing. Detector reset is achieved by momentary interruption of power.

Features and Specifications

- Labyrinth assembly
- Self-checking components
- Infrared (IRED) light emitting diode as light source
- CSA certified for use in Class I, Div. 2, Groups A, B, C and D locations
- Residual ripple less than 2% of DC input
- Operating temperature range: -4ºF to 140ºF (-20°C to 60°C)

Conventional Fire Alarms
Beam Detectors
5000 Series

The EC5000R beam detector features a transmitter and receiver in a single enclosure. The transmitter emits an invisible, reflected infrared light beam that is detected by the receiver and analyzed. Smoke in the beam path will reduce the received infrared light proportionally to the density of the smoke. The detector analyzes this and initiates an alarm condition when a predetermined level of obscuration is reached.

The EC5000R System features advanced innovations such as auto-alignment, which indicates the optimal location of the reflector by means of an integrated laser. Once installed, the system automatically steers and maintains the beam to the optimum position for reliable performance.

Features and Specifications

- Range of 26.25 to 330 ft. (8m to 100m)
- Light gray/black ABS housing
- Ground level controller with LCD display
- Up to four detector heads reporting to one controller
- Laser-assisted reflector mounting
- Automatic beam alignment
- Contamination compensation to reduce nuisance alarms
- Building shift compensation
- Separate alarm and trouble contacts
- Built-in electronic UL/ULC obscuration accepted fire test
- Password protected settings
- Programmable fire thresholds
- IP54 rated
- Operating temperature range: 32ºF to 100ºF (0ºC to 37.8ºC)

Conventional Fire Alarms
Duct Detectors, Two-Wire
SuperDuct Series

Less than two inches deep, SuperDuct two-wire smoke detectors are suitable for installation in ductwork, where space is limited. SuperDuct detectors feature removable dust filters, conformally coated circuit boards, and optional water-resistant gaskets to keep contaminants away from components. They include industry standard sampling tube mounting holes to simplify retrofit applications.

SuperDuct detectors use differential sensing to prevent gradual environmental changes from triggering false alarms. A rapid change in environmental conditions, such as smoke from a fire, causes the detector to automatically signal an alarm condition but dust and debris accumulated over time does not change alarm sensitivity.

The relay output may be configured for operation independent of the duct detector. A dedicated dirty/trouble LED on each unit offers immediate at-a-glance information even when the cover is closed.

Remote Test/Reset stations are available to provide alarm testing and indication from a remote location. Two-wire SuperDuct detectors are also compatible with EC-LED remote alarm LEDs.

Features and Specifications

Smoke Sensor

- PCB mounted photoelectric detector with onboard intelligence
- Environmental compensation with differential sensing for reliable, stable, and drift-free sensitivity
- Wide 0.79% to 2.46% obscuration/ft. smoke sensitivity

Detector Assembly

- Less than 2" deep
- Status LEDs remain visible through clear assembly cover
- Cover monitor switch for added security
- Standard sampling tube spacing
- Sampling tube can be installed with or without the cover in place; can be rotated in 45° increments
- On-board Alarm, Trouble, and Dirty LEDs
- Magnet-activated test switch
- One Form C auxiliary alarm relay for controlling ancillary equipment (e.g., HVAC controls)
- Easy access to field connection terminals
- Operating temperature range: -4°F to 158°F (-20°C to 70°C)

Duct Detectors, Four-Wire
SuperDuct Series

Less than two inches deep, SuperDuct four-wire smoke detectors are suitable for installation in ductwork, where space is limited. SuperDuct detectors feature removable dust filters, conformally coated circuit boards, and optional water-resistant gaskets to keep contaminants away from components. They include industry standard sampling tube mounting holes to simplify retrofit applications.

SuperDuct detectors use differential sensing to prevent gradual environmental changes from triggering false alarms. A rapid change in environmental conditions, such as smoke from a fire, causes the detector to automatically signal an alarm condition but dust and debris accumulated over time does not change alarm sensitivity.

The relay output may be configured for operation independent of the duct detector. A dedicated dirty/trouble LED on each unit offers immediate at-a-glance information even when the cover is closed.

The controller can be installed up to 15 feet from detector and one controller can support up to two detectors. Up to 15 controllers can be interconnected for multiple fan shutdown.

Remote Test/Reset stations are available to provide alarm testing and indication from a remote location. Two-wire SuperDuct detectors are also compatible with 5956A remote alarm LEDs.

Features and Specifications

Detector Assembly

- Less than 2" deep
- PCB mounted photoelectric detector with on-board intelligence
- Environmental compensation with patented differential sensing
- 100 ft./min. to 4,000 ft./min. air velocity rating
- Standard RJ45 modular interconnection
- Status LEDs visible through clear cover
- Cover tamper reed switch for added security
- Standard sampling tube and mounting holes
- Install in tandem with the controller assembly, or remotely from it
- Magnet-activated test/dirty/reset switch
- No need to open the detector for installation
- Operating temperature range: -4°F to 158°F (-20°C to 70°C)

Controller

- One controller for up to two detectors
- Standard connections for easy migration
- Status LEDs visible through clear cover
- Alarm contact, trouble contact, and two 10 amp auxiliary contacts
- Interconnect up to 15 controllers for multiple fan shut-down

Smoke Detectors
ReadySET Series

NEW

The ReadySET air aspirating (sampling) smoke detector is a central detection unit that actively draws air from a protected area through its sampling pipe and monitors the stream for the presence of smoke and other products of combustion. It can accommodate up to 10 sampling holes along a maximum pipe length of 164 ft (50 m).

The ReadySET Series smoke detectors have a NEMA 1 rated enclosure, and are resistant to dust and dirt. Forward scattering optical detection adds early warning capability. Predefined application scenarios diagram how to lay out the pipe and where to drill the air intake holes. Field-configurable via internal DIP switches for a range of settings, it connects to any fire alarm control panel through dry contact relays.

ReadySET is designed for mission critical settings like assembly areas and laboratories, as well as large spaces like atria, and applications where concealed detection is desired.

Features and Specifications

- Laser light scattering mass detection
- 2500 square foot (232 square meter) coverage area
- Environmental compensation
- Alarm, pre-alarm and fault relays
- Wall mounting via three screws
- Optional serial interface for PC-based diagnostics
- Operating humidity range: 0-90% non-condensing
- Operating temperature range: 32°F to 100°F (0°C to 38°C)

Conventional Fire Alarms
Heat Detectors
280 Series

280B-PL Series heat detectors offer fixed temperature or combination rate-of-rise and fixed temperature detection.

A temperature increase at the sensor of 15°F (9°C) or more per minute activates the rate-of-rise feature, closing the contacts in the sensor to transmit the alarm condition to the fire alarm control panel. When the rate-of-rise element alone has been activated, the sensor is self-restoring.

If the temperature of the center disk rises to the sensor's rated temperature, the fixed temperature element activates, closing contacts in the sensor and transmits an alarm condition to the fire alarm control panel. The fixed temperature element is non-restorable and, when activated, the detector must be replaced. The need for replacement is indicated when the center disk has fallen free from the detector.

Edwards 280B series heat sensors come standard with a white plastic reversible mounting plate. The plate is designed for surface or flush mounting and installs directly to a standard North American 3 ½ or 4 inch octagon box. Once the mounting plate is fixed, a simple twist will lock the sensor in place. It can be removed using a screwdriver to release the tamper-resistant locking finger.

Features and Specifications

- UL listed for 50 ft. (15.2m) spacing
- Single pole — normally open contact
- Low profile with mounting plate
- Pure white finish
- Mounting flexibility with screw terminals
- Easy twist-on installation
- On-site testing of rate-of-rise feature
- Positive operating indication — for fixed temperature element
- Operating temperature range: -22°F to 100°F (-30°C to 37.8°C) (281B-PL and 283B-PL); -22°F to 150°F (-30°C to 65.6°C) (282B-PL and 284B-PL)

[1]Maximum detector coverage has been determined by UL to provide detection time equal to sprinkler devices spaced at 10 ft (3.05m) intervals on a smooth ceiling 15 feet 9 inches (4.8m) high. Higher ceilings may adversely affect detection time. Earlier detection may be obtained by reducing the spacing between sensors. (See NFPA 72, Chapter 5)

Conventional Fire Alarms
Heat Detectors, Rate Compensation
302 Series

Edwards Series 302 heat detectors are suitable for use in indoor and outdoor environments and explosive atmospheres. They are normally-open devices designed to close an electrical circuit upon activation. All models feature rate compensation and are available with either 135°F (57.2°C) or 194°F (90°C) ratings. These self-restoring, hermetically sealed detectors are shock-, corrosion- and tamper-resistant.

Features and Specifications

- Rate compensation offsets thermal lag
- Self-restoring – no manual reset required
- Explosionproof versions available. Class 1, Groups C and D; Class 2, Groups E, F and G
- Some versions suitable for outdoor applications
- No back box required on some outdoor-suitable versions
- Box mount and surface mount versions

Conventional Fire Alarms
Heat Detectors, Double Contact
CF/CR Series

CR/CF Series heat detectors offer fixed temperature or combination rate-of-rise and fixed temperature detection.

A temperature increase at the sensor of 15°F (9°C) or more per minute activates the rate-of-rise feature, closing the contacts in the sensor to transmit the alarm condition to the fire alarm control panel. When the rate-of-rise element alone has been activated, the sensor is self-restoring.

If the temperature of the center disk rises to the sensor's rated temperature, the fixed temperature element activates, closing contacts in the sensor and transmits an alarm condition to the fire alarm control panel. The fixed temperature element is non-restorable and, when activated, the detector must be replaced. The need for replacement is indicated when the center disk has fallen free from the detector.

Edwards CR/CF Series heat sensors come standard with metal mounting plate. The plate is designed to install directly to a standard North American 3 ½ or 4 inch octagon box. Once the mounting plate is fixed, a simple twist will hold the detector in place.

Features and Specifications

- UL recommended for 70 ft. (21.3m) spacing
- Double pole — normally open contacts
- Low profile with mounting plate
- Aluminum finish
- Mounting flexibility with screw terminals
- Easy twist-on installation
- Positive operating indication — for fixed temperature element
- 70 ft. spacing **(CR models only)**

Conventional Fire Alarms
Heat Detectors
SC Series

The Edwards SC20FTU-3 is a fixed temperature heat dectector, with an alarm threshold, operating at 135°F (58°C).

The SC20RRU-3 has an alarm threshold of 135°F (58°C) and operates on the rate of rise of 15° or greater per minute.

A red LED indicator situated on the detector molding provides clear indication when the unit is in alarm. For ease of removal, these detectors plug into the CSBU-1 base unit by a simple twist and lock action. In order to prevent unauthorized removal, a site selectable option is provided to lock the detector into its base. Once applied, the unit can only be removed by means of a special tool.

Features and Specifications

- 135°F (58°C) and 180°F (82°C) fixed temperature models
- 135°F (58°C) rate of rise model
- LED alarm indication
- Tamper resistant with site selectable lock
- White molded high impact fire retardant plastic
- Surface mount technology
- All components conformally coated to seal against dust and moisture
- Operating temperature range: 32ºF to 100ºF (0°C to 37.8°C)

Conventional Fire Alarms
Pull Stations
270 Series

Edwards 270 Series non-coded single-action fire alarm stations are sturdy, attractive, and designed for economical installation. The station provides a single action, break glass, initiating operation. It is available with normally open (N.O.), normally closed (N.C.) or combination N.O./N.C. contacts. The 270 Series have screw terminals for field connection. The 270A Series Manual Stations have 6 inch (150mm) wire leads.

All non-coded stations are designed for either flush or surface mounting. For flush mounting a 4-inch standard North American square box with single gang plaster cover should be used.

Features and Specifications

- Single action models
- Pull lever for simple, positive operation
- Break glass operation
- Terminals or wire leads for field connections
- Surface or flush mounting
- Red finish
- Less than 5 lb pull force complies with ADA
- Solid, die-cast metal construction
- Operating temperature range: 32°F to 120°F (0°C to 49°C)

Conventional Fire Alarms
Pull Stations
270 Series

The Edwards 276B/277B series non-coded, single-action fire alarm stations are UL listed, contemporary-styled Lexan stations. The 276B series feature terminals for field wiring connections, and the 277B series use 6" (150mm) wire leads for field wiring connections.

All types are available with single pole alarm contacts that can be normally open, normally closed or a combination of both. Either a key or tool (depending on station selected) is required to reset mechanism. Where a manual station is installed on a circuit that also includes smoke detectors, a resistor can be added in series with the alarm initiating contacts on the station so the operation of the station does not extinguish alarm LEDs on operated detectors.The 276-R resistor kits permit field installation of the series resistor on applicable stations.

For semi flush mounting, use a standard North-American 4 inch square box with single gang plaster cover having an overall minimum depth of 2-1/4 inches (57mm). For surface mounting use a 276B-RSB surface back box.

Features and Specifications

- Single action models
- Single pole contacts
- Terminals or wire leads for field connections
- Key lock or tool reset
- Break glass operation
- Surface or semi flush mounting
- Red finish
- Contemporary styling
- Rugged Lexan construction
- Latch action until reset
- Operating temperature range: 32°F to 120°F (0°C to 49°C)

Conventional Fire Alarms
Harsh Environment Pull Stations
MPSR Series

Edwards MPSR Series manual pull stations are non-coded fire alarm stations constructed of die-cast material. All components are pre-painted or have plated surfaces to inhibit corrosion. MPSR Series manual stations are suitable for outdoor use and feature a NEMA 4X enclosure.

Single-and double-action MPSR models are available with either single-pole (normally open) or double-pole (double throw) alarm contacts. Dependent on the model, access to the unit for resetting purposes is gained with either a keylock or hex screw. All models feature terminal block connections and 10 amp contacts.

Explosionproof MPSR Series manual stations are rated for Class I, Group B (hydrogen), C and D; Class II, Groups E, F and G; and Class III environments.

Features and Specifications

- Solid corrosion-resistant construction
- Surface mount backbox and gasket, suitable for outdoor use, included
- Positive activation
- Terminals for wire connections
- NEMA 4X enclosure
- Operating temperature range: -30°F to 150°F (-35°C to 66°C)

Non-explosion proof models:
- Single and double action models
- Single or double pole contacts
- Key lock or hex screw reset

Explosionproof models
- Single-action models convertible to double-action operation
- Key lock reset
- Double pole contacts
- Class I, Group B, C and D,; Class II, Groups E, F and G; Class III

Conventional Fire Alarms
Pull Station Covers
STI Series

The STI Series Pull Station Covers help to prevent false fire alarms without restricting legitimate alarms. They consist of a tamper-proof, clear Lexan polycarbonate shield and frame that fits easily over manual pull stations. Some models offer a piercing warning horn when cover is lifted.

Features and Specifications

- Fits virtually all pull stations
- Tested and approved by wide range of fire prevention and testing authorities
- Guards against physical damage to manual pull station
- Optional gasket for outdoor use is available
- Optional battery-powered horn (9-volt alkaline battery included)

Conventional Fire Alarms
Carbon Monoxide Detector
260 Series (Replaces 250 Series)

NEW

The Edwards SafeAir™ 260-CO carbon monoxide (CO) detector is a device designed to alert building occupants of potentially dangerous levels of CO in the protected area. The internal electro-chemical sensor communicates with an on-board microprocessor which tracks CO levels over time. The 260-CO self-adjusts for indoor environmental changes and monitors its own performance, automatically compensating for sensitivity drift throughout the course of its service life.

An integrated temporal four-horn provides local signaling capability for the 260-CO. The 260-CO can also be connected in tandem so that multiple detectors will sound when any one alarms. It interfaces with any listed intrusion or fire alarm system by means of its 150mA output relay.

The 260-CO features a ten-year end-of-life timer that will automatically trigger a warning, locally, at the control panel, and optionally, at a central monitoring station, indicating that the device should be serviced.

The 260-CO complies with UL 2075 requirements, making it suitable for use in residential and commercial applications.

Features and Specifications

- Long-life ten-year sensor
- Electro-chemical sensing technology
- Self-diagnostics
- SafeTest™ functional test feature enables full functional test with CO gas
- Built-in trouble/power supervision relay
- 150mA relay contact configurable for normally open or normally closed operation
- Transmits sensor end-of-life to the control panel and central station if the system is monitored
- Complies with UL 2075 CO standard
- One-touch TEST/HUSH button
- Integrated 85 dBa temporal 4-sounder for local notification
- On-board LED provides local alarm and trouble indication
- Can be connected in tandem
- Operating temperature range: 40°F to 100°F (4.4°C to 37.8°C)

Addressable Fire Alarms
Panels
E-FSA Series

NEW

E-FSA64

The Edwards Signaling E-FSA64 life safety system offers the reliability of analog/addressable fire detection for small to mid-sized applications. Built for long service, this system offers rotary device addressing, optional Ethernet® connectivity, and a full line of easy-to-configure option cards and modules.

The E-FSA64 provides one Class B analog/addressable device loop that supports up to 64 device addresses, and two Class B Notification Appliance Circuits (NACs). Optional Class A NAC wiring with the use of a separate module. The E-FSA64 supports a wide range of accessories and related equipment, including intelligent modules and pull stations, intelligent detectors, and bases remote annunciators and option cards that expand system capacity and extend system capabilities.

Features and Specifications

- One loop (expandable to two) that supports up to 64 analog/addressable devices of any type and two Class B NACs
- Form C contacts for alarm and trouble, Form A for supervisory
- Rotary addressing
- Optional Ethernet port for diagnostics, programming and system reports
- Two programmable switches with LEDs and custom labeling
- Supports horn silence over two wires and UL 1971-compliant strobe synchronization
- Optional Class A wiring
- Supports up to eight serial annunciators, (LCD, LED-only, and graphic interface)
- Use existing wiring for most retrofit applications
- Upload/download remotely or locally
- Two-level maintenance alert reporting
- Pre-alarm and alarm verification by point
- Adjustable detector sensitivity
- 4 x 20 character backlit LCD display
- Operating temperature range: 32°F to 120°F (0°C to 49°C)

Option Cards

Edwards Signaling panels are supported by a complete line of modules and related equipment that enhance performance and extend system capabilities. Option cards are easy to install and set up. They simply plug directly into the control panel main circuit board or are connected to it with a ribbon cable. After installation, terminals remain easily accessible for quick connection of field wiring. The cabinet provides ample room for wire routing, keeping wiring neat and easy to service at all times.

SA-CLA Class A Module
The SA-CLA card provides Class A capability for NAC wiring. Its terminal block provides the wiring connection for NAC return wiring. The SA-CLA is also required for "Class A" communications to R-Series remote annunciators. E-FSA250 panels are Class A ready. The SA-CLA is installed directly to the control panel circuit board using its plastic standoffs and plug connection.

SA-232 RS-232 Interface
The SA-232 card provides an RS-232 interface with Edwards Signaling panels. It can be used for connecting a printer to the control panel to print system events. The card also can be used for connecting a computer to download a configuration program from the FSA-CU to the control panel.

The RS-232 card is installed on the plastic assembly and connects to the main circuit board via a ribbon cable.

SA-ETH Ethernet Interface Card
The SA-ETH card provides a standard 10/100 Base T Ethernet network connection for connecting to an intranet, a local network, or the Internet. The card can be used to download configuration programming from the FSA-CU to the panel over the network.

The Ethernet card is installed on the plastic assembly and connects to the main circuit board via a ribbon cable.

Addressable Fire Alarms
Panels
E-FSA Series

SA-DACT Dialer
The SA-DACT provides communications between the control panel and the central station over a telephone line system. It transmits system status changes (events) to a compatible digital alarm communicator receiver over the public switched telephone network. The dialer is capable of single, dual, or split reporting of events to two different account and telephone numbers. The modem feature of the SA-DACT can also be used for uploading and downloading panel configuration, history, and current status to a PC running the FSA-CU.

The SA-DACT queues messages and transmits them based on priority (alarm, supervisory, trouble, and monitor). Activations are transmitted before restorations.

The SA-DACT is installed on the plastic assembly and connects to the main circuit board via a ribbon cable.

Addressable Fire Alarms
Panels
E-FSA Series

E-FSA250

The Edwards Signaling E-FSA250 life safety system offers the reliability of analog/addressable fire detection for small to mid-sized applications. Built for long service, this system offers rotary device addressing, optional Ethernet® connectivity, and a full line of easy-to-configure option cards and modules.

The E-FSA250 provides one Class A or Class B analog/addressable device loop that supports up to 127 devices. A second 127-point loop may be added to the E-FSA250 to expand total system capacity to up to 254 device addresses. The panel includes four Class B NACs that can be configured as two Class A NACs.

The E-FSA250 supports a wide range of accessories and related equipment, including intelligent modules and pull stations, intelligent detectors, and bases remote annunciators and option cards that expand system capacity and extend system capabilities.

Features and Specifications

- One loop (expandable to two) that supports up to 127 (expandable to 254) analog/addressable devices
- Supports intelligent modules, pull stations, detectors, and bases
- Four Class B NACs or two Class A NACs
- Form C contacts for alarm and trouble, Form A for supervisory
- Rotary addressing on all intelligent addressable devices
- Optional Ethernet port for diagnostics, programming and system reports
- Two programmable switches with LEDs and custom labeling
- Supports horn silence over two wires and UL 1971-compliant strobe synchronization
- Standard Class A wiring
- 1,000-event panel history log
- Supports up to eight serial annunciators, (LCD, LED-only, and graphic interface)
- Use existing wiring for most retrofit applications
- Upload/download remotely or locally
- Two-level maintenance alert reporting
- Pre-alarm and alarm verification by point
- Adjustable detector sensitivity
- 4 x 20 character backlit LCD display
- Operating temperature range: 32°F to 120°F (0°C to 49°C)

Option Cards

E-FSA250 panels are supported by a complete line of modules and related equipment that enhance performance and extend system capabilities. Option cards plug directly into the control panel main circuit board or are connected to it with a ribbon cable. After installation, terminals remain accessible. The cabinet provides ample room for wire routing, keeping wiring neat at all times.

SA-ETH Ethernet Interface Card
The SA-ETH card provides a standard 10/100 Base T Ethernet network connection for connecting to an intranet, a local network, or the Internet. The card can be used to download configuration programming from the FSA-CU to the panel over the network.

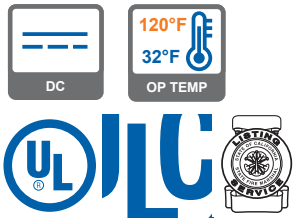
The Ethernet card is installed on the plastic assembly and connects to the main circuit board via a ribbon cable.

XAL127 Loop Expander Card
The XAL127 Loop Expander Card provides an additional device loop on the control panel. The card expands the control panel's device capacity to 254 total device addresses, 127 per loop.

The card is compatible with Class B or Class A wiring. It is compatible with E-FSA250 control panels only.

The loop expander card connects to connector J7 on the main circuit board.

SA-DACT Dialer
The SA-DACT provides communications between the control panel and the central station over a telephone line system. It transmits system status changes (events) to a compatible digital alarm communicator receiver over the public switched telephone network. The dialer is capable of single, dual, or split reporting of events to two different account and telephone numbers. The modem feature of the SA-DACT can also be used for



uploading and downloading panel configuration, history, and current status to a PC running the FSA-CU.

The SA-DACT queues messages and transmits them based on priority (alarm, supervisory, trouble, and monitor). Activations are transmitted before restorations.

The SA-DACT is installed on the plastic assembly and connects to the main circuit board via a ribbon cable.

SA-232 RS-232 Interface

The SA-232 card provides an RS-232 interface with E-FSA250 panels. It can be used for connecting a printer to the control panel to print system events. The card also can be used for connecting a computer to download a configuration program from the FSA-CU to the control panel.

The RS-232 card is installed on the plastic assembly and connects to the main circuit board via a ribbon cable.

Addressable Fire Alarms
Remote Annunciators
E-FSA Series

Edwards R-Series are remote annunciators that provide status indication and common controls for compatible fire alarm control panels, including E-FSA-Series small analog fire alarm systems. Models are available with LCD or LED annunciation, and the LCD models are available with and without common controls. An LED-based expander module can be connected to any annunciator to extend its capabilities.

All annunciator models include status LEDs and an internal buzzer. Two models have an LCD text display, and one has 16 pairs of LEDs for zone annunciation. LCD models feature a large back-lit LCD display.

R-Series annunciators and expanders are mounted on a standard 4-inch square electrical box, using the included mounting ring. They can also be surface mounted in locking steel enclosures.

Features and Specifications

- 4 x 20 character backlit LCD display **(LCD models)**
- 16 pairs of LEDs for zone annunciation **(LED models)**
- Expander extends capability with 24 pairs of LEDs
- Up to two expanders may be wired to each annunciator
- Status LEDs and internal buzzer standard on all models
- Common controls available for LED and LCD display models
- Available keyswitch for disabling common controls
- Standard 4-inch square electrical box mounting
- Class B or Class A RS485 wiring standard
- One-, two-, and three-position enclosures available
- Graphic Annunciator interface, includes common control, indicators and 32 LEDS
- No programming required, set the address and unit receives all information from panel
- Operating temperature range: 32°F to 120°F (0°C to 49°C)

Addressable Fire Alarms
Detectors and Bases
E-Series

Edwards E-Series Addressable Detectors are available in three versions: The E-HD is a selectable rate of rise or fixed-temperature heat detector with an alarm threshold of 135ºF (57ºC). The E-PHD houses an optical sensing chamber that detects smoke, as well as a fixed-temperature sensor that detects heat. The detector analyzes data from both sensors to determine when an alarm is initiated. The E-PD houses an optical sensing chamber that detects smoke.

E-Series detectors resist air movement caused by heating and air conditioning and feature comprehensive self-diagnostic capability. E-PD and E-PHD optical detectors continuously adjust their sensitivity reference value to compensate for changes in the environment such as the presence of dirt, temperature, and humidity. These detectors issue a dirty sensor warning when they reach their preset limit.

E-Series detectors have a twist-and-lock design to simplify installation and maintenance operations. A plastic breakout on the detector housing prevents removal from the base except with a special tool. A red LED flashes red when the detector is in alarm.

Features and Specifications

- Optical, heat, and multi-sensor models
- Up to 100dB @ 1m/90dB @ 10ft.
- Field replaceable optical chamber
- Compatible standard, relay, isolator, and audible bases
- Bases mount to standard North American two-gang or 4" square electrical boxes
- Twist-and-lock installation
- LED alarm indication
- Tamper-resistant feature
- Self-diagnostic capability with on-board storage of results
- Optical detectors feature automatic rate compensated sensitivity adjustment, as well as dirty sensor warnings
- Conformally coated components resist dust and humidity
- Automatic detector test
- Operating temperature range: 32ºF to 120ºF (0ºC to 49ºC)

Addressable Fire Alarms
Detectors and Bases
E-Series

The Edwards E-PDD Duct Smoke Detector provides early warning of an impending fire and shuts down the HVAC unit in order to prevent smoke from circulating throughout the building. The duct smoke detector is designed for use in duct applications where temperatures can exceed standard detector capabilities.

The E-PDD Duct Smoke Detector features removable dust filters, conformally coated circuit boards, and optional water-resistant gaskets to keep contaminants away from components. When cleaning is required, the assemblies easily come apart and snap back together.

Features and Specifications

- Less than 2" deep
- 100 ft./min. to 4,000 ft./min. air velocity rating
- Low current drain
- Status LEDs remain visible through clear assembly cover
- Cover monitor switch for added security
- Standard sampling tube spacing
- Sampling tube can be installed with or without the cover in place; can be rotated in 45° increments
- Magnet-activated test switch
- One programmable Form C auxiliary alarm relay for controlling ancillary equipment (e.g., HVAC controls)
- Environmental compensation with differential sensing for reliable, stable, and drift-free sensitivity
- Wide 0.79% to 2.46% obscuration/ft. smoke sensitivity
- Identification of dirty or defective detectors
- Operating temperature range: 32ºF to 120ºF (0ºC to 49ºC)

Addressable Fire Alarms
Modules and Pull Stations
E-Series

E-IDC2B

E-IDC1B

Edwards Signaling modules are addressable devices designed for use in small buildings, and are uniquely identified on the system by means of rotary switches. Once registered, they share data and update status information that determines how the system behaves and how connected devices interact with one another.

E-Series modules feature a unique ground fault detection that pinpoints the specific module where the wiring problem has occurred.

Each E-Series device contains a microprocessor to distribute intelligence throughout the system so that command decisions are made instantly at the individual module, rather than at the control panel. This feature helps to speed event processing.

Features and Specifications

- **Analog Class A single input module:** Used to connect a normally open, alarm, supervisory, or monitor type dry contact initiating device circuit to the Edwards Signaling control panel
- **Analog single input mini module:** Connects a normally open, alarm, supervisory, or monitor type dry contact initiating device circuit (IDC) to the Edwards Signaling control panel. For Class B circuit operation.
- **Class A-B two-wire module:** Acts as an interface between conventional two-wire smoke detectors and the Edwards Signaling control panel
- **Analog dual input module:** Connects two normally open, alarm, supervisory, or monitor type dry contact initiating device circuits to the Edwards Signaling control panel
- **Analog dual input waterflow, supervisory module:** Connects normally open waterflow alarm and supervisory initiating device circuits to the Edwards Signaling control panel. For Class B circuit operation.
- **Analog NAC module:** Connects supervised output circuit to a signal riser
- **Analog contact relay module:** Provides one Form C dry relay contact and can be configured to provide polarity reversal of its output
- **Analog SLC fault isolator module:** Protects Class A SLC from total collapse due to wire-to-wire short circuits
- Operating temperature range: 32ºF to 120ºF (0ºC to 49ºC)

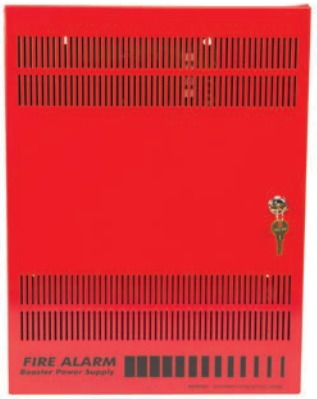
Conventional and Addressable Accessories
Booster Power Supplies
EBPS Series



The Edwards EBPS Series Booster Power Supply is UL 864, 9th Edition listed. It is a 24V DC filtered-regulated, and supervised unit that can easily be configured to provide additional notification appliance circuits (NACs) or auxiliary power for Mass Notification/ Emergency Communication (MNEC), as well as life safety, security, and access control applications.

The EBPS contains circuitry to monitor and charge internal or external batteries. Its steel enclosure accommodates up to two 10 ampere-hour batteries. It has four Class B (convertible to two Class A) NACs that can be activated in one or two groups from its unique dual input circuits.

The EBPS is available in 6.5 or 10 ampere models. Each output circuit has a capacity of three amperes.

Features and Specifications

- Provides for Genesis and Enhanced Integrity notification appliance synchronization
- Supports coded output operation
- Self-restoring overcurrent protection
- Multiple signal rates
- Can be cascaded or controlled independently
- Easy field configuration
- On-board diagnostic LEDs identify wiring or internal faults
- Standard Edwards keyed lockable steel cabinet with removable door
- Accommodates 18 to 12 AWG wire sizes
- Optional tamper switch
- Dual battery charging rates
- Operating temperature range: 32ºF to 120ºF (0ºC to 49ºC)

Wall Horns and Strobes
Genesis Series

The Genesis line of wall-mount horns and strobes are small, compact audible-visible life safety signaling devices. Protruding no more than one inch from the wall, Genesis horns and horn-strobes feature textured housings in white or red.

Edwards Genesis strobes do not require bulky specular reflectors and lenses. The patented cavity design conditions light to produce a highly controlled distribution pattern. FullLight strobe technology produces a smooth light distribution pattern. This ensures the entire coverage area receives consistent illumination from the strobe flash.

The strobes are designed to flash at the same rate (synchronized) when used with a compatible synchronization source such as the EG1M-RM and EG1M synchronization modules, E-FSC and E-FSA fire panels, and EBPS series booster supplies.

Genesis strobes and horn-strobes feature selectable candela output with a switch located on the bottom of the device. The candela setting is visible even after the device is installed. Models are also available with fixed 15/75 cd output.

Features and Specifications

- Xenon light source
- Clear lens
- White or red housing
- Low profile design
- Field selectable candela output via switch
- 99dB @ 1m/89dB @ 10ft. output
- Field selectable for high or low dB horn output and temporal or steady horn output (-HD models)
- Fits standard single gang electrical boxes – no extension ring or trim plate required
- Operating temperature range: 32°F to 120°F (0°C to 49°C)

Conventional and Addressable Accessories
Ceiling Horns and Strobes
Genesis Series

Genesis life safety ceiling strobes are small, compact, visible emergency signaling devices. Protruding no more than 1.6" (41mm) from the ceiling, Genesis strobes feature housings in neutral white or life safety red.

Edwards Genesis ceiling strobes do not require bulky specular reflectors and lenses. The patented cavity design conditions light to produce a highly controlled distribution pattern. FullLight strobe technology produces a smooth light distribution pattern. This ensures the entire coverage area receives consistent illumination from the strobe flash.

The strobes are designed to flash at the same rate (synchronized) when used with a compatible synchronization source such as the EG1M-RM synchronization module, E-FSC and E-FSA fire panels, and EBPS series booster supplies.

Genesis Series include models 15 to 95, or 95 to 177 candela output that is selectable with a conveniently located switch. The candela output setting remains clearly visible and locked into place after final installation.

Features and Specifications

- Xenon light source
- Clear lens
- White or red housing
- Low profile design
- Field selectable candela output via switch
- Fits all standard 4" square electrical boxes – no extension ring or trim plate required
- Operating temperature range: 32ºF to 120ºF (0ºC to 49ºC)

Ceiling Horns and Strobes
Genesis Series

Genesis ceiling horn-strobes are small, compact, audible-visible emergency signaling devices. Protruding no more than 1.6" (41mm) from the ceiling, Genesis horn-strobes feature textured housings in neutral white or life safety red.

Edwards Genesis strobes do not require bulky specular reflectors and lenses. The patented cavity design conditions light to produce a highly controlled distribution pattern. FullLight strobe technology produces a smooth light distribution pattern. This ensures the entire coverage area receives consistent illumination from the strobe flash.

The strobes are designed to flash at the same rate (synchronized) when used with a compatible synchronization source such as the EG1M-RM synchronization module, E-FSC and E-FSA fire panels, and EBPS series booster supplies.

Genesis Series include models 15 to 95, or 95 to 177 candela output that is selectable with a conveniently located switch. The candela output setting remains clearly visible and locked into place after final installation.

Features and Specifications

- Xenon light source
- Clear lens
- White or red housing
- Low profile design
- Field selectable candela output via switch
- 95dB @ 1m/ 85dB @ 10ft. output
- Fits all standard 4" square electrical boxes – no extension ring or trim plate required
- Operating temperature range: 32°F to 120°F (0°C to 49°C)

Outdoor/Indoor Horns and Strobes
Genesis WG4 Series

Genesis WG4 Series horns and horn-strobe appliances have field-configurable light and sound output settings and optional FIRE markings. These appliances are suitable for indoor and outdoor applications.

WG4 Series appliances feature a piezoelectric sounder. The multi-candela strobes are available with clear lenses in two output categories – standard and high-output. They meet UL 1971 synchronization standards, and are field-configurable for one of four candela intensities. Candela settings are viewable even after installation through a sealed viewport display.

The WG4 Series are available for mounting on the ceiling or the wall, and an optional full backplane sealing gasket permits installation to recessed (in-the-pour/block) electrical boxes. WG4 notification appliances also mount to suitable surface boxes. Optional color-matched trim skirts are available. All appliance wiring is accomplished room-side for easy installation.

Features and Specifications

- Horn only and horn-strobe options
- Xenon strobe light source
- Suitable for indoor and outdoor applications
- Wall or ceiling mount
- Field-selectable settings
- Standard and high-output strobe intensities
- Operating temperature range: -40°F to 151°F (-40°C to 66°C)

Conventional and Addressable Accessories
Outdoor/Indoor Horns and Strobes
2400 Series

Edwards 2400 Series temporal horns and temporal horn-strobes are designed for use with compatible life safety communication and control equipment to alert occupants of a life safety event. The horn emits up to a 95dB (@ 1meter) low frequency sound, and must be connected to signal circuits that output a constant (not pulsed) voltage. A diode is used to allow full signal circuit supervision.

The strobes are designed to flash at the same rate (synchronize) when used with a compatible sychronization source, such as the EG1M-RM synchronization module, E-FSC and E-FSA fire panels, and EBPS series booster supplies.

The plastic housing is made from durable and fire retardant, high impact plastic with a slightly textured surface. The mounting plate firmly holds the device in place with a single screw. A separate trim plate is not required. Terminals accept up to #12 AWG (2.5mm^2) wire for polarized connections.

2400 Series strobes are shipped with standard wall mount style “FIRE” lens markings. Where ceiling orientation, other languages, or different lens markings are required, Edwards offers optional 2440KTW and 2440KTC series Lens Marking Kits.

Features and Specifications

- Xenon strobe light source
- Flash rate 60 fpm
- Suitable for use in indoor and outdoor applications
- Adjustable audible output: 92-95dB @ 1m (82-85dB @ 10ft.)
- Red or white front plate
- Field interchangeable markings with optional lens kits
- Flush mount to standard North American 4” square or two-gang box
- UL 1971 and UL 1638 listed
- Operating temperature range: -31ºF to 150ºF (-35ºC to 66ºC)

Conventional and Addressable Accessories
Outdoor/Indoor Horns and Strobes
CS405 Series

CS405 Series strobes are designed for use with compatible life safety communication and control equipment to alert the hearing impaired of a life safety event. Strobes are available with 15/75 cd and 110 cd effective flash intensity, and are fully compatible with Genesis signals. The flash from CS405 Series strobes can be noticed from almost any position in the room, corridor, or large open space.

The strobes are designed to flash at the same rate (synchronize) when used with a compatible sychronization source, such as the EG1M-RM synchronization module, E-FSC and E-FSA fire panels, and EBPS series booster supplies.

CS405 Series must be connected to signal circuits that output a constant (not pulsed) voltage. A diode is used to allow full signal circuit supervision and polarized connections are made to terminals that accept up to 12 AWG wire.

The strobe front plate is of steel construction finished with durable baked epoxy polyester powder-coat paint.

Features and Specifications

- Xenon light source
- Flash rate 60 fpm
- Suitable for use in indoor and outdoor applications
- UL 1971-listed as signaling devices for the hearing impaired and UL 1638-listed as protective visual signaling appliances.
- Genesis-compatible
- Red steel front plate with epoxy polyester powder-coat paint
- Rated for wall or ceiling installation
- Field changeable markings
- Fits 4-inch square flush box
- Operating temperature range: -40°F to 150°F (-40°C to 66°C)

Chimes and Strobes
Genesis Series

The Genesis line of chimes and strobes are audible-visible emergency signaling devices. Protruding no more than one inch from the wall, Genesis chimes and chime-strobes feature textured housings in white or red. Genesis strobes are designed to channel and condition light to produce a highly controllable distribution pattern.

Chime-strobes feature selectable candela output with a switch located on the bottom of the device. The candela setting is visible even after the device is installed.

The strobes are designed to flash at the same rate (synchronize) when used with a compatible sychronization source, such as the EG1-M and EG1M-RM synchronization module, E-FSC and E-FSA fire panels, and EBPS series booster supplies.

Genesis Series chimes 60 strokes per minute when steady voltage is applied, or may be field-configured for temporal output. When installed with a EG1M Signal Master Module, the chime may also be field-configured for coded operation. Chimes may be set for low dB output with a jumper cut that reduces sound output.

Features and Specifications

- Xenon light source
- Clear lens
- White or red housing
- Low profile design
- Field selectable candela output via switch
- 81dB @ 1m/71dB @ 10ft. output
- Fits standard single gang electrical boxes – no extension ring or trim plate required
- Operating temperature range: 32°F to 120°F (0°C to 49°C)

Bells
430D Series

Edwards 430D Series fire alarm bells are diode polarized, vibrating bells for use with fire alarm equipment. They operate in conjunction with an installed fire alarm panel and detection devices. The steel alloy gongs are red epoxy powder finish and produce a loud, resonant tone required in fire alarm systems.

Features and Specifications

- 6", 8" and 10" gong sizes
- Heavy duty die cast housing
- Steel alloy gong with red epoxy powder coating
- Back box available for use in outdoor applications
- Under dome mechanism
- Available in red

Bell Strobe Adaptors
2400 Series

The Edwards 2400 Series Bell/Strobe Adaptor Plate contains a 30, 15/75, or 110 candela strobe. The unit is specifically designed for use with the 439D-AW-R series of 6" (152mm), 8" (203mm) and 10" (254mm) red fire alarm bells (ordered separately).

The strobes are designed to flash at the same rate (synchronize) when used with a compatible sychronization source, such as the EG1M-RM synchronization module, E-FSC and E-FSA fire panels, and EBPS series booster supplies. Wire leads are provided for easy installation of the strobe. The units are suitable for indoor use. The strobes require a continuous (non-pulsed) DC source.

The 2400 Series is designed for indoor wall mounting on a variety of standard, flush mounted, North-American electrical boxes.

Features and Specifications

- Available in red
- Clear Lexan lens (strobe)
- Low current draw synchronous strobe
- 60 flashes per minute (fpm)
- Marked "FIRE" on both sides
- Strobe: UL 1971 Listed for the Hearing Impaired; UL 1638
- Meets NFPA and ADA requirements
- Operating temperature range: 32ºF to 120ºF (0°C to 49°C)

Hazardous Location Signals
870EX Series

The Edwards 870EX Series are diode polarized, heavy-duty, high decibel, vibrating horn signals. They are intended for use in indoor hazardous locations requiring electrical supervision of signaling circuit field wiring, including fire alarm systems. May also be used for unsupervised signaling applications.

Two mounting brackets are provided on either side of the unit for wall mounting.

Features and Specifications

- Diode polarized
- Red corrosion resistant heat flowed epoxy finish
- Low current drain
- Wide operating voltage range -20% to +10% of nominal voltage
- Power connection wires embedded in sealing compound
- UL listed for Class 1, Div. 1 and 2, Groups B, C and D; Class II, Div. 1 and 2, Groups E, F and G; Class III locations
- Operating temperature range: 25ºF to 104ºF (4ºC to 40ºC)

Hazardous Location Signals
Millennium Class

The Edwards 5553 Series Speakers are UL Listed, Class 1, Div. 2 hazardous location audible signaling appliances for use in conjunction with compatible control equipment. They produce audible emergency and protective signals as well as voice messages. They accept system audio input levels of 25 or 70 volts RMS.

The Edwards 5553 Series comply with the requirements of UL Standard 1480, Fire Protective Signaling Speakers. The speakers are suitable for outdoor use with a UL1480 wet locations rated enclosure. They include a supervisory capacitor and are suitable for installation in systems employing supervised circuitry.

Speaker direction is adjustable and the output wattage is adjustable via an internal rotary switch.

Features and Specifications

- Suitable for use in outdoor and hazardous locations
- Speaker swivels
- Adjustable up to 15 watts maximum
- 113 dB at 1 meter/103 dB at 10 ft.
- Frequency range 400Hz to 4000Hz
- UL listed for Class I, Div. 2, Groups A, B, C and D; Class II, Div. 2, Groups F and G; Class III, Div. 1 and 2
- Operating temperature range: -40ºF to 104ºF (-40ºC to 40ºC)

Hazardous Location Signals
439DEX Series

Edwards 439DEX Series hazardous location fire alarm bells are DC vibrating bells that produce a long, continuous ringing sound. The striker continues to strike the gong in rapid-fire as long as current is applied. Diode polarized models are available for use in electrically supervised circuits.

Features and Specifications

- 6", 8" and 10" gong sizes
- Completely assembled
- Suitable for use in indoor applications
- Corrosion resistant gray epoxy finish
- Mounts directly on any solid surface
- Low power draw for efficient operation over long runs
- Adjustment free self-compensating solenoid plunger
- Wire leads and sealing fitting for connection to 3/4" conduit
- UL listed for Class I, Divisions 1 and 2, Groups B, C and D; Class II, Divisions 1 and 2, Groups E, F and G; Class III

Hazardous Location Signals
116 Series

NOTE: Mounting options not included. (Ordered separately)

Edwards 116 Series Genesis fire alarm strobe is designed for use in Class 1, Division 1 and 2 explosionproof and hazardous location applications where electrical supervision is required. The diode-polarized strobe is intended for indoor use in UL 1971 listed compatible fire alarm systems and is ADA compliant for the hearing impaired.

116 Series Genesis strobe provides 125 cd ceiling and 60 cd wall light output. With the guard installed, the strobe flashes with an output of 86 cd ceiling and 51 cd wall.

These units are UL 1638 and cUL listed for outdoor use as a NEMA Type 3R and 4X enclosure; and Canada (cUL) to Canadian standard ULC-S526-07 suitable for indoor or outdoor applications.

The strobes are designed to flash at the same rate (synchronize) when used with a compatible sychronization source, such as the EG1M-RM synchronization module, E-FSC and E-FSA fire panels, and EBPS series booster supplies.

Features and Specifications

- Clear globe with dome guard
- Three mounting options: wall, ceiling, or pendant
- Negligible in-rush current
- Approved for fire alarm applications
- NEMA Type 3R and 4X enclosures
- 60 flashes per minute (fpm)
- Can be synchronized when connected to a compatible Edwards control panel, booster power supply or synchronization module
- UL 1638, UL 1971 and cUL Listed
- Class I, Div. 2, Groups A and B; Class I, Div. 1 and 2, Groups C and D; Class II, Div. 1, Groups E, F, G and Class III; Class II, Div. 2, Groups F, G and Class III.

Conventional and Addressable Accessories
Hazardous Location Signals
105 Series

Edwards 105 Series Xenon strobe beacons are heavy-duty visual signals suitable for use in indoor and outdoor applications where a corrosion resistant Type 4X enclosure is required. Base material is gray, manufactured from glass-reinforced thermoplastic polyester resin and features brass hardware. The double fresnel lens is made of shatter-resistant polycarbonate.

The 105DHISTC-FJ high intensity strobe is designed for use in compatible fire alarm system and other applications requiring electrical supervision of signaling circuit field wiring.

Features and Specifications

- Xenon strobe light source
- Shatter-resistant double fresnel polycarbonate lens
- Gray base with brass hardware
- Flash rate 65 fpm
- Suitable for indoor, outdoor and marine applications
- For outdoor applications, lens should face up
- Option for panel, conduit or wall mounting
- NEMA Type 4X enclosure
- Class I, Div 2, Groups A, B, C and D; Class II, Div 2, Groups F and G; Class III

Conventional and Addressable Accessories
Door Holders
1500 Series

The Edwards 1500 Series electromagnetic door holders feature housings finished with durable baked polyester powder paint. The floor or wall section houses the electromagnet while the contact plate attaches to the door. The contact plate has a shock absorbing nylon (swivel) ball that allows the plate to adjust to any door angle. Floor units are available in single-door or double-door (back to back) versions. Wall units are available in flush or surface mounted versions.

If power fails, doors are released automatically but may be opened or closed manually at any time. All units are free of moving parts, are self-contained and require no maintenance.

The device holders hold a door open while energized. When de-energized by a relay controlled by the fire alarm system or other switch, the door is released to a closed position.

Features and Specifications

- Floor and wall mounted styles
- Baked polyester powder paint finish
- Low power consumption
- Silent operation
- 25 Lbf (111N) nominal holding force
- Adjustable, swivel contact plate
- Single-door or double-door (back to back) versions – floor mounted
- Flush or surface mounted versions – wall mounted
- Operating temperature range: 32°F to 120°F (0°C to 49°C)

Relays
MR Series

MR101/C

MR104T

The MR Series Multi-Voltage Control Relays offer SPDT or DPDT 10 Amp contacts that may be operated by one of four input control voltages. A single relay may be energized from a voltage source of 24V DC, 24V AC, 115V AC or 230V AC by wiring to appropriate input terminals.

Each relay position contains a red light emitting diode (LED) that indicates the relay coil is energized. Relays may be "snapped apart" from a standard four-module assembly and used independently.

These devices are suitable for applications where local contacts are required for system status and remote contacts for control of electrical loads and general purpose switching, such as HVAC, temperature control, fire alarm, security, energy management and lighting control systems.

Features and Specifications

- May be energized from one of four input voltages
- Contains red LED which illuminates when the coil is energized
- Single, or quad relay modules may be "snapped apart" from a standard four-position master
- SPDT or DPDT relays available
- Available in dustproof metal enclosures with LED viewing port
- Track mounting hardware to facilitate installation in standard cabinets
- Operating temperature range: 32ºF to 120ºF (0ºC to 49ºC)

Conventional and Addressable Accessories
Relays
MR Series

The Edwards MR-199 Heavy Duty Power Relays are designed for control applications where 30 Amp DPDT contacts are required. Two models are available; 115V AC coil and 24V DC coil, each of which may be mounted in a rugged steel enclosure.

Features and Specifications

- Heavy duty 30 Amp DPDT contacts
- 24V DC or 120V AC models available
- Sturdy metal enclosure
- Operating temperature range: 32ºF to 120ºF (0ºC to 49ºC)

Conventional and Addressable Accessories
Relays
PAM Series

The PAM1 Relay is an encapsulated multi-voltage device providing 10 Amp Form C contacts. The relay may be energized by one of three input voltages: 24V AC, 24V DC, or 115V AC. A red light emitting diode (LED) that indicates the relay coil is energized.

The PAM1 may be mounted by using the double-sided adhesive tape, the self-drilling screw, or loosely placed in a back box.

The PAM1 is suitable for applications where remote relays are required for control or status feedback, such as HVAC, temperature control, fire alarm, security, energy management and lighting control systems.

Features and Specifications

- Completely encapsulated 10 Amp relay
- Relay may be energized by one of three input voltages
- Red LED illuminates when relay coil is energized
- May be mounted by double-sided adhesive tape, self-drilling screw or placed in back box
- 6 in (150mm) wire leads for electrical connections
- Operating temperature range: 32ºF to 120ºF (0ºC to 49ºC)

Audio Evacuation
Amplifiers
ANS Series

The Edwards ANS Series of products are audio notification systems that provide voice evacuation capability that meet the Emergency Voice Alarm requirements of NFPA 72 for UL listed fire alarm applications. ANS panels include an amplifier, tone generator, digital message repeater (DMR), and supervisory interface.

The ANS Series products are self-contained systems with field-configurable features. A range of accessory equipment provides application for new and retrofit installations.

ANS systems are designed for use with Edwards E-FSC and E-FSA fire alarm control panels when emergency voice alarm service is required. All ANS systems are compatible with Edwards Genesis® line of field-configurable speakers and speaker-strobes.

Features and Specifications

- Meets NFPA 72 Emergency Voice Alarm requirements
- Dead-front construction
- Integrated digital message repeater
- Four-minute message capacity
- 25, 50, or 100 Watt models
- Field selectable for either 25 or 70 Vrms speakers
- 120V AC power supply and battery charger included
- Paging microphone overrides message and tone
- Built-in alarm and alert signals
- Compatible with E-FSC and E-FSA control panels
- 24 hour backup with two 12V, 7 AH batteries
- Operating temperature range: 32ºF to 120ºF (0ºC to 49ºC)

Ceiling Speakers and Strobes
Genesis Series

Genesis life safety ceiling speakers are small, compact, audible emergency signaling devices. Protruding no more than 1.6" (41mm) from the ceiling, Genesis speakers feature textured housings in neutral white or life safety red.

Edwards Genesis speakers feature 1/4 W to 2 W operation that is selectable with a conveniently located switch. The wattage tap setting remains clearly visible and locked into place after final installation.

All Genesis ceiling speakers include a DC blocking capacitor to allow electrical supervision of the audio distribution circuit.

Features and Specifications

- Low profile design
- Red or white housings
- 1/4, 1/2, 1, and 2 watt selections via switch
- Up to 100dB @ 1m/90dB @ 10ft. output
- Fits all standard 4" square electrical boxes – no extension ring or trim plate required
- Operating temperature range: 32ºF to 120ºF (0ºC to 49ºC)

Audio Evacuation
Ceiling Speakers and Strobes
Genesis Series

Genesis life safety ceiling speaker-strobes are small, compact, audible-visible emergency signaling devices. Protruding no more than 1.6" (41mm) from the ceiling, Genesis speaker-strobes feature textured housings in neutral white or life safety red.

Edwards Genesis strobes do not require bulky specular reflectors and lenses. The patented cavity design conditions light to produce a highly controlled distribution pattern. FullLight strobe technology produces a smooth light distribution pattern. This ensures the entire coverage area receives consistent illumination from the strobe flash.

Genesis Series include models 15 to 95, or 95 to 177 candela output that is selectable with a conveniently located switch. The candela output setting remains clearly visible and locked into place after final installation.

The strobes are designed to flash at the same rate (synchronize) when used with a compatible sychronization source, such as the EG1M-RM synchronization module, E-FSC and E-FSA fire panels, and EBPS series booster supplies.

Features and Specifications

- Xenon light source
- Clear lens
- White or red housing
- Low profile design
- 1/4, 1/2, 1, and 2 watt selections via switch
- Field selectable candela output via switch
- Up to 101dB @ 1m/91dB @ 10ft. output
- Fits all standard 4" square electrical boxes – no extension ring or trim plate required
- Operating temperature range: 32°F to 120°F (0°C to 49°C)

Wall Speakers and Strobes
Genesis Series

The Genesis line of speakers and strobes are audible-visible emergency signaling devices. Protruding no more than one inch from the wall, Genesis speakers and speaker-strobes feature textured housings in white or red. Genesis strobes are designed to channel and condition light to produce a highly controllable distribution pattern.

Speaker-strobes feature selectable candela output with a switch located on the bottom of the device. The candela setting is visible even after the device is installed.

All Genesis speakers include a DC blocking capacitor to allow electrical supervision of the audio distribution circuit. The speaker has a sealed back construction for extra durability and improved audibility.

The strobes are designed to flash at the same rate (synchronize) when used with a compatible sychronization source, such as the EG1M-RM synchronization module, E-FSC and E-FSA fire panels, and EBPS series booster supplies.

Features and Specifications

- Xenon light source
- Clear lens
- White or red housing
- Low profile design
- Field selectable candela output via switch
- 1/4, 1/2, 1, and 2 watt selections via switch
- Up to 99dB @ 1m/89dB @ 10ft. output
- DC blocking capacitor for audio circuit supervision
- Fits all standard 4" square electrical boxes – no extension ring or trim plate required
- Operating temperature range: 32ºF to 120ºF (0ºC to 49ºC)

Outdoor/Indoor Speakers and Strobes
Genesis Series

The Genesis WG4 line of speakers and speaker-strobe appliances are audible-visible emergency signaling devices that are rated for indoor and outdoor use in a wide range of wet and harsh environment applications. They have field-configurable light and sound output settings, and can be mounted on ceilings or walls.

The Genesis WGW line features a full backplane sealing gasket for installation in recessed (in-the-pour/block) electrical boxes. WG4 signals also mount to suitable surface boxes served by raceways. All appliance wiring is accomplished room-side for easy installation.

WG4 Series appliances have dual-voltage mylar-cone loudspeakers with field-selectable output taps and multi-candela strobes with standard and high output. Wattage and candela settings are viewable after installation through a sealed viewport display.

The strobes are designed to flash at the same rate (synchronize) when used with a compatible sychronization source, such as the EG1M-RM synchronization module, E-FSC and E-FSA fire panels, and EBPS series booster supplies.

Features and Specifications

- Suitable for outdoor and indoor applications
- Xenon light source
- Clear lens
- White or red housing
- Low profile design
- Wall or ceiling mount
- Field-selectable speaker wattage, voltage, and strobe candela settings
- Standard and high-output strobe
- 1/4, 1/2, 1, 2 watt taps
- Up to 100dB @ 1m/90dB @ 10ft. output
- Room-side wiring accepts 18 to 12 AWG (0.75 to 2.5 mm^2)
- Operating temperature range: -31ºF to 151ºF (-35ºC to 66ºC)

Standalone Detection
Smoke Detectors
517 Series

Edwards 517 Series Single Station Smoke Detectors feature a solid state piezo signal and a strobe with "FIRE" lettering.

The 517TCS/517TCSB Series provides the 3 pulse temporal pattern evacuation tone as a standard feature. The smoke alarm operates on the light scattering principle, using a pulsing LED light source and a photodiode sensor in a fully screened sensing chamber. Upon activation, the alarm will emit a local audible signal and activate the high intensity strobe.

They are designed for ceiling or wall mounting on a 4" (102mm) square mounting box using a universal mounting plate, and have a quick-disconnect plug connection.

Features and Specifications

- Quadra-port smoke entry
- 3 position functional test switch
- Solid-state LED condition indicator
- Quick disconnect wiring harness
- 9V DC alkaline battery back-up
- Tandem connection up to 6 alarms per system
- Dry contacts will activate from the tandem wire
- Temporal pattern evacuation sounding device
- 100dB @ 1m/90dB @ 10ft.
- Operating temperature range: 40ºF to 100ºF (4.4ºC to 37.8ºC)

Standalone Detection
Smoke Detectors
517 Series

The Edwards 517 Series Smoke Detectors are designed for multi-family, residential and institutional occupancies defined by NFPA 101, in compliance with UL 217 and NFPA 72.

The Edwards 517 Series provides a three position test feature that simulates actual smoke conditions. It also provides a maintenance indicator and makes the 100% testing requirement easy.

The temporal pattern evacuation tone is a standard feature.

It is designed for ceiling or wall mounting on a standard electrical box and can tandem wire up to 12 units (or 6 with relay) to form a system.

Features and Specifications

- Solid-state non-latching piezo horn
- Pulsing LED sensing chamber
- 3 position functional test switch
- Solid-state LED condition indicator
- Quick-disconnect wiring harness
- Mounting hardware adapts to standard junction boxes
- Dust cover
- 3 pulse temporal pattern evacuation sounding device
- 5-to-1 signal-to-noise ratio
- Operating temperature range: 40ºF to 100ºF (4.4°C to 37.8°C)

Emergency Systems

"When disaster strikes, whether it's in a single building or across a sprawling complex, we need to communicate with those affected quickly, efficiently and accurately.

Warning and Notification Systems from Edwards help us do just that."

Product Index

Ideal for overcoming high levels of industrial noise, Edwards provides outdoor warning and communication systems that provide high intensity warning signals over a wide area. Offering industrial and commercial solutions for mass notification, Edwards Warning and Notification Systems are the premier signaling choice.

Warning and Notification Systems
System Design Criteria

The Edwards Difference

Since 1872 Edwards has been dedicated to producing the finest Signaling Equipment available. Edwards Warning Systems are shaped by continuous quality, perfomance, durability and reliability. Each siren is hand built in the United States by signaling professionals and then tested to exacting standards. We use only American made, industrial quality, continuous duty motors, for the ultimate in reliability. Edwards sirens are rated by the Nuclear Regulatory Commission at 53 years of trouble free use.

Edwards decoders are field programmable and field serviceable and Edwards will work with your local service technicians to ensure any repairs are completed correctly. All siren parts are made from non-corrosive metals and are powder-coated to provide additional protection form the elements. Sound projection from all but one of Edwards sirens is Omni-Directional resulting in full decibel output in all directions at all times.

The OMNI-Directional Advantage

It is a common misconception to directly compare the dB rating of a rotating siren with that of an Omni-Directional siren. Because the siren rotates, it spends much of its on-time facing away from any given point, where the dB level has dropped. When a siren survey is done for a given area, the siren's output is considered, and a circle is drawn on a map to estimate the area that the siren should cover. However, with a rotating beam type siren, the area is covered only 25% of the on-time by the maximum beam output, and 75% of the on-time by a lesser beam output. Therefore, the rotating beam siren presents its maximum output to your ear only 1/4 of the time.

Furthermore, the survey map does not consider the effect that the rotation has on the sound of the signal to the human ear. The effect of the sound rotating toward, and then away from any given point causes a "peaking" and "ebbing" of the sound - and a potentially dangerous problem. Imagine for a moment that your town uses a series of signals to warn its populace: one steady blast for a tornado, and a warbling tone for "all clear." Now consider what the rotating siren's "steady" tone will sound like with its peaking and ebbing effect. The result can be a very confused populace and a resulting disastrous situation.

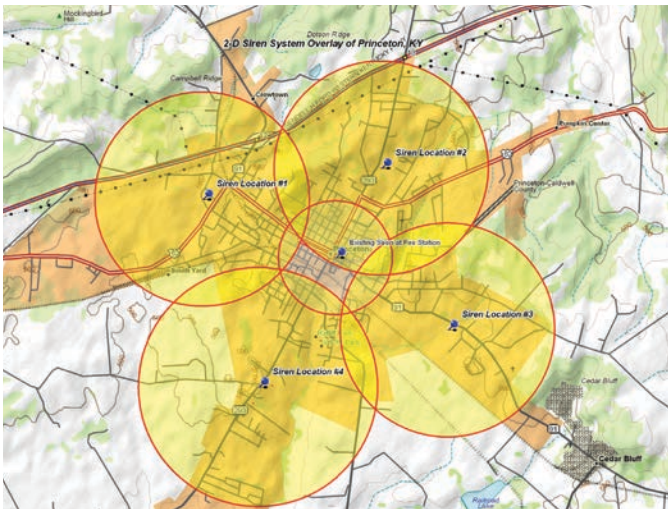
Edwards Omni-Directional sirens project the same decibel level in all directions simultaneously. They provide 360 degrees of coverage and, if you use multiple sirens, there will not be the distortion that occurs with a rotating siren.

Custom Siren Survey

At Edwards, we specialize in designing custom siren systems to best fit any given project. Our no charge, no obligation Siren Survey will take away the guesswork. Just call and we will connect you to a site designer who will produce a scale, topographical map of your project, complete with suggested siren placement, siren models, activation equipment, and estimated costs. Let us know what you want to do and Edwards will help make your project a reality. See Map 1 and Map 2 on the following page for examples of 2-D and 3-D project maps.

Omni-Directional Warning Siren
8 Horn, Equal Length, Single Row
EWS-V3 and EWS-V10 Series

Siren Activation Systems



Map 1: 2-D Image for topographical study

Map 2: 3-D Image for topographical study

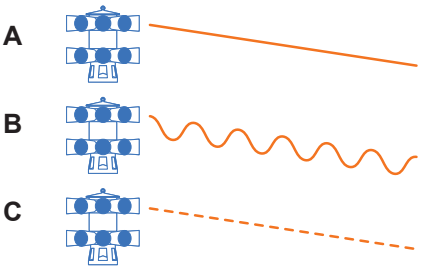
Examples Of Standard Siren Output Signals:

A. Alert (Civil Defense), Steady blast for three minutes

B. Attack (Civil Defense), Warbling signal for three minutes

C. Fire Typically 15 sec. on, 15 sec. off; bursts for three minutes but is field programmable

D. Cancel Stops all functions (all timing is adjustable)



Radio Activation:

VHF-Band Decoder (150-174 MHz)

UHF-Band Decoder (450-470 MHZ)

Available with the following pre-programmed signal packages (please see “Standard Siren Output Signals” above)

1. A, B, C, D

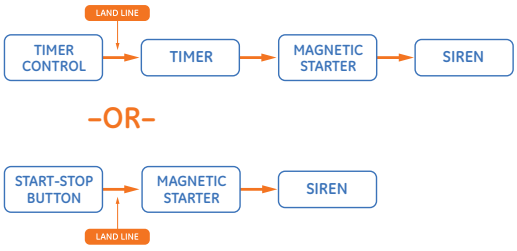
2. A, B, D

3. C, D

4. CHOOSE ONE ONLY—A, B, OR C

Land Line Activation (Used to Achieve Siren Timing Functions Without Radio Equipment)

GEN-1	Multi-function Push Button controller
Model EWS-SWM	Start button (momentary) (operator controlled)
Model EWS-SW	Start/Stop button (on & off functions only) (operator controlled)
Model EWS-CL	Clock. Use alone or in conjunction with another activation system. Allows (for example) a daily blast at noon, or blasts at 7 a.m., noon, and 5 p.m. Field programmable, activates magnetic starter directly, and acts independently from other activation systems.



Outdoor Warning Systems
Omni Directional
EWS Series

The EWS Series feature a non-corrosive, cast aluminum fan that is powered by a 5 Hp motor in your choice of single or three-phase power. All exposed siren components are made of zinc plated, steel construction, which are “powder coated” for a durable finish. The fan and housing are both made of non-corrosive cast aluminum.

The EWS-V2 Series uses projectors to distribute and organize sound. Rated at 109 dB, the EWS-V2 is an omni-directional siren that produces continuous 360˚ coverage.

Features and Specifications

- Omni-directional
- Continuous duty motor
- Port tone frequency 460 cps
- Skirted horn design - **EWS-V1 Series**
- 8 horn, equal length, single row - **EWS-V2 Series**
- Powder coated exterior
- 5 Hp singe phase or three phase motor

Outdoor Warning Systems
Omni Directional
EWS Series

The EWS-V3 is available in single phase or three phase and is a single tone siren, producing 460 cycles per second, for optimal sound penetration. All exposed siren components are of metal construction, which are “powder coated” for a durable finish. The fan and housing are made of non-corrosive cast aluminum

The EWS-V3 is rated at 112 dB and is Omni-Directional. The EWS-V10 is a battery-powered version of the EWS-V3. The EWS-V10 includes a motor starter, charging system and battery box.

Features and Specifications

- Omni-directional
- Continuous duty motor
- Port tone frequency 460 cps
- 8 horn, equal length, single row
- Powder coated exterior
- 7.5 Hp single phase or three phase motor

Outdoor Warning Systems
Omni Directional
EWS Series

The EWS-V4 Series is an omni-directional siren which produces continuous 360˚ coverage. Staged horn projectors help organize sound for even distribution over a large radius.

The EWS-V4 is available in either single or three phase power and is a single tone siren, producing 460 cycles per second. All exposed siren components are of metal construction, which are "powder coated" for a durable finish. The fan and housing are made of non-corrosive cast aluminum.

Features and Specifications

Outdoor Warning Systems
Omni Directional
EWS Series

The EWS-V6 is an omni-directional siren that produces continuous 360° coverage. The. EWS-V9 is a battery-powered version of the EWS-V6. The EWS-V9 includes a motor starter, charging system and battery box.

The EWS-V6 is available in either single or three phase power. Both the EWS-V6 and EWS-V9 are dual tone sirens, employing two rotors with different numbers of ports to produce a greater range of frequency. One rotor produces 460 cycles per second, and the other produces 920 cycles per second. All exposed siren components are of metal construction, which are "powder coated" for a durable finish. The fan and housing are made of non-corrosive cast aluminum.

Features and Specifications

- Omni-directional
- Dual tone sirens
- Port tone frequency 460 cps and 920 cps
- Continuous duty motor
- 8 horn, equal length, dual row
- Powder coated exterior
- 15 Hp three phase motor
- Two 7.5 Hp 230 volt single phase motors

EWS Series

The EWS-V7 is an omni-directional siren which produces continuous 360° coverage

The EWS-V7 is available in either single or three phase power, and is a dual tone siren, employing two rotors with different numbers of ports to produce a greater range of frequency. One rotor produces 460 cycles per second, and the other produces 920 cycles per second. All exposed siren components are of metal construction, which are "powder coated" for a durable finish. The fan and housing are made of non-corrosive cast aluminum.

Features and Specifications

- Omni-directional
- Continuous duty motor
- Dual tone sirens
- 8 horn, equal length, dual row
- Powder coated exterior
- Port tone frequency 460 cps and 920 cps
- 20 Hp three phase motor
- Two 10 Hp 230 volt single phase motors

Outdoor Warning Systems
Omni Directional
EWS Series

The EWS-V8-3 produces continuous 360° coverage. The EWS-V8-3 is available in three phase power only, and is a dual tone siren, employing two rotors with different numbers of ports to produce a greater range of frequency. One rotor produces 600 cycles per second, and the other produces 850 cycles per second.

All exposed siren components are of galvanized steel construction, which are powder coated for a durable finish. The fan and housing are made of non-corrosive cast aluminum.

Features and Specifications

- Omni-directional
- Continuous duty motor
- 5 horn, equal length, dual row
- Powder coated exterior
- Port tone frequency 600 cps and 850 cps
- 40 Hp three phase motor

High Power Speaker Arrays
MN Series

The MN-GVD Series Directional High Power Speaker Arrays consist of a single or multiple 400 Watt speakers that can be aimed where sound energy is needed. These re-entrant speakers are suitable for outdoor applications and are made of durable, powder-coated spun aluminum. Units are available with 90, 180, 270 or a full 360-degree horizontal angle of dispersion.

All units operate on 24V DC, and can be charged from line power and/or solar arrays. The Electronic Control Cabinet (ECC) has a lockable, tamper-resistant NEMA 4X enclosure, and is powered from rechargeable batteries that are contained in a separate and lockable NEMA 4X enclosure.

Features and Specifications

- Suitable for outdoor applications
- Modular electronics
- Mounting options include pole-mount, roof-mount and wall-mount
- Electronic Control Cabinet is NEMA 4X rated
- Operating temperature range: -40°F to 140°F (-40°C to 60°C)

Air Horns
KB Series

Photo Not Available

These units are available featuring our KMJ-4 air horn and consist of a motor directly connected to a rotary compressor. They are designed featuring a horizontal bell with horizontal diaphragm head so that water will drain away from the diaphragm seal.

KB Series air horns are cast in light weight corrosion-resistant aluminum. All fasteners are corrosion proof stainless steel. No adjustment to diaphragm is necessary.

They are compliant with collision regulation standards for sound signal appliances at sea (72 COLREGS). These models meet or exceed the current IMO / Coast Guard collision regulations for Class IV; vessel length less than 20m; and Class III vessel length 20m to 75m.

Features and Specifications

- Cast in light weight aluminum
- Corrosion resistant
- Stainless steel fasteners
- Effective range - 1/4 mile (.4km)[1]
- Single tone frequency
- Operating range - 15 to 120 PSIG
- 1/2" (12mm) inlet NPT

[1] Subject to environmental and geographical conditions, these models have a typical effective range of 1/4 mile (.4 km) assuming an ambient background level of 60dB, a line pressure of 60 psi (7.03 kg/sq cm) and temperature of 60°F (15.6°C). Derated per FEMA guidelines @ 10 dB per distance doubled.

Outdoor Warning Systems
Air Horns
KB Series

Photo Not Available

The KB Series air horns generate sound by means of a vibrating diaphragm that modulates the flow of compressed air into a resonating projector. All horn shapes are mathematically calculated to amplify sound while closely retaining its fundamental frequency and natural harmonics.

The signal is designed so that moisture naturally drains away from the diaphragm seat.

Designed for mounting on air supply piping, supplying between 50 and 150 PSIG (3.5 and 10.5 kg/sqcm).

Features and Specifications

- Cast marine aluminum horns - primed and painted
- Stainless steel diaphragm
- Effective range - 1 1/4 mile (2 km)[1]
- Single tone frequency
- Operating range - 50 to 150 PSIG (3.5 to 10.5 kg/sq cm)
- 3/4" (19mm) inlet NPT

All about Uptime

"As the Electrical Maintenance Supervisor in a busy manufacturing plant that operates 24/7, my job is filled with challenges. I need to keep the place up and running, no matter what.

I sleep just a little easier knowing that whenever we need genuine replacement parts quickly, our local Edwards Signaling Distributor is just a phone call way.

In my world, UPTIME is everything."
