Ty-Rap

Fastening solutions, how it all started

When you choose a Ty-Rap cable tie, you can count on quality, performance and innovation to make your work easier.

First developed to solve the problem of bundling the hundreds of feet of wiring found inside commercial aircraft, Ty-Rap cable ties can now be found virtually everywhere - from Nascar racing engines to backyard tool sheds. Self-fastening and basically indestructible, the ground-breaking design of the Ty-Rap cable tie demonstrates how to solve a complex problem with a simple technology.

The corrosion-proof, non-magnetic stainless steel locking device inside the tie head guarantees the strongest and most durable locking you will ever find on the market. Ty-Rap can be used in the most adverse conditions: humidity, heat, cold, UV radiation, aggressive chemicals, radiation and other harsh conditions.

Engineered for labour savings and high performance, Ty-Rap cable ties are commonly used in a variety of applications.

For the cable tie, the proverbial light bulb came on over Logan's head while touring a Boeing aircraft manufacturing facility in 1956. Aircraft wiring was a cumbersome and detailed undertaking, involving thousands of feet of wire organized on sheets of 50-foot long plywood and held in place with knotted, waxcoated, braided nylon cord. Each knot had to be pulled tight by wrapping the cord around one's finger which sometimes cut the operator's fingers until they developed thick calluses or 'hamburger hands'. Logan was convinced there had to be an easier, more forgiving, way to accomplish this critical task. For the next couple of years, Logan experimented with various tools and materials.

On June 24 1958, a patent for the longlasting, easy-to-use Ty-Rap cable tie was submitted. The rest, as they say, is history.

—
 “My dad didn't have a lot of formal education, but he was the most ingenious person I have ever met”, said Robert Logan, Maurus' son. “He never thought the customary way of doing things was good enough and when he looked at anything he thought about ways to improve it. The invention of the cable tie is an excellent example of how he worked.”

Maurus Logan Ty-Rap Inventor

Ty-Rap high performance cable ties

Introduction

First patented in 1958 as a way to bundle wiring in airplanes, the Ty-Rap cable tie brand remains a benchmark of excellence and innovation in wire management

ABB's broad offering of Ty-Rap cable ties makes the task of fastening, bundling, clamping and managing wires easier and quicker for industrial applications, construction, communications, utility and OEM professionals, as well as home improvement specialists and do-it-yourself enthusiasts. When strength, aesthetics, reliability and performance are required, knowledgeable professionals turn to Ty-Rap: the original source for cable ties and accessories.

What gives a Ty-Rap cable tie its exceptional strength? The corrosion-resistant, non-magnetic stainless steel locking barb in its head grips tightly and allows for a completely adjustable fit. Its raised tail makes it easy to pick up, even with gloved hands. And the easy-grip tail surface makes it easy to pull tight, even in wet or cold conditions.

Engineered for high-performance, Ty-Rap cable ties are available in standard nylon or in materials that are specially formulated to withstand the most adverse conditions, from UV exposure to extreme cold or heat. They have even been designed to withstand the rigors of space.

Ty-Rap cable ties: The right choice when performance really matters.

ABB is a leading power and automation technology group, active in more than 100 countries with about 150,000 employees worldwide.

ABB's portfolio includes the following product lines and flagship brands:

- Wire & Cable Management – Ty-Rap and Ty-Met cable ties, Shrink-Kon® heat shrink, T&B Cabletray
- Cable Protection Systems – nylon & metallic incl. brands: PMA, Adaptaflex, Kopex, Harnessflex
- Low Power Connection & Control – Furse lightning & surge protection, Elastimold, Joslyn Hi-Voltage
- Emergency lighting – emergency lighting, battery systems incl. VanLien, Kaufel, Emergi-Lite brands
- Hazardous location products – DTS explosion proof light & boxes, Kopex-Ex conduits & fittings

Environmental considerations

Corrosive environments

Ty-Rap cable ties can endure corrosive marine environments, such as deep-ocean drilling rigs and weather-lashed wind generators.

Environmental considerations

Extreme temperatures

Ty-Rap cable ties can endure extreme temperatures and UV exposure of solar power farms.

Ty-Rap high performance cable ties

Features and benefits

When strength, aesthetics, reliability and performance are required, knowledgeable professionals turn to the original and the best source for cable ties and accessories. Ty-Rap fastening systems include a full range of cable ties, identification ties, clamps, mounting bases, harnessing aids and installing tools.

Using Ty-Rap fastening systems for all wiring jobs, large and small, will speed and improve the reliability of harnessing and wire bundling while saving you money.

Protects cables. Rounded edges, on the head and the strap, provide a comfortable handling of the ties and prevent sharp edges from damaging the cables. This gradual transition from the strap to the head protects the material against breaking at this most critical point. The edges of the head are also rounded off to offer maximum protection from injury.

Up to 3X longer life: a smooth notch-less body increases overall breaking strength and deters the deterioration of the tie in high heat and UV applications. The locking design provides an infinite positioning for the right tension every time.

“The grip of steel”
Non-magnetic stainless steel locking barb – marine grade type 316 - that firmly anchors inside the tie head, ensures a strong, reliable and long lasting fastening

Higher grip, less damage
Ribbed and stippled surface, to prevent the tie from slipping around and along the bundle under vibration conditions and external shock.

Easy handling

Angled tail (turned up) for fast and easy insertion into the locking head and ideally suited to being picked up from a flat work area.

Easy installation

Non-slip tail, for an easy grip and pulling through the head during tensioning.

Extensive range of approvals and certifications:

Germanischer Lloyd, Lloyd's Register of Shipping, VG, Mil Specification, American Bureau of Shipping (ABS); CE declaration, compliant to the low voltage directive and EN/IEC 62275 and UL 62275

Wide range of size combinations: several lengths up to 1143mm (45"), in 6 typical widths with a tensile strength up to 780N, to fasten cable bundles with a diameter up to 330mm (12.99").

Dedicated tooling, to ensure that the excess end of the Ty-Rap tie is automatically cut off and the slight over cut retracts into the head, eliminating the risk of injury from protruding sharp edges.

Most extensive choice of special materials: in addition to Polyamide 6.6 (standard, UV-resistant, heat stabilised, flame retardant, heat stabilised / UV-resistant), Polyamide 4.6 (extra high temperature) and Polyamide 12, the Ty-Rap ties are available in Polypropylene, Fluoropolymer (ECTFE), Fluoropolymer (ETFE) and the recently introduced Detectable Polyamide 6.6 and Detectable Polypropylene. UL 94 V-0, UL 94 V-2 and UL 94 HB.

Wide choice of colors:

10 standard colors are available and pre-printed customized ties in any of the standard colors can be supplied on demand.

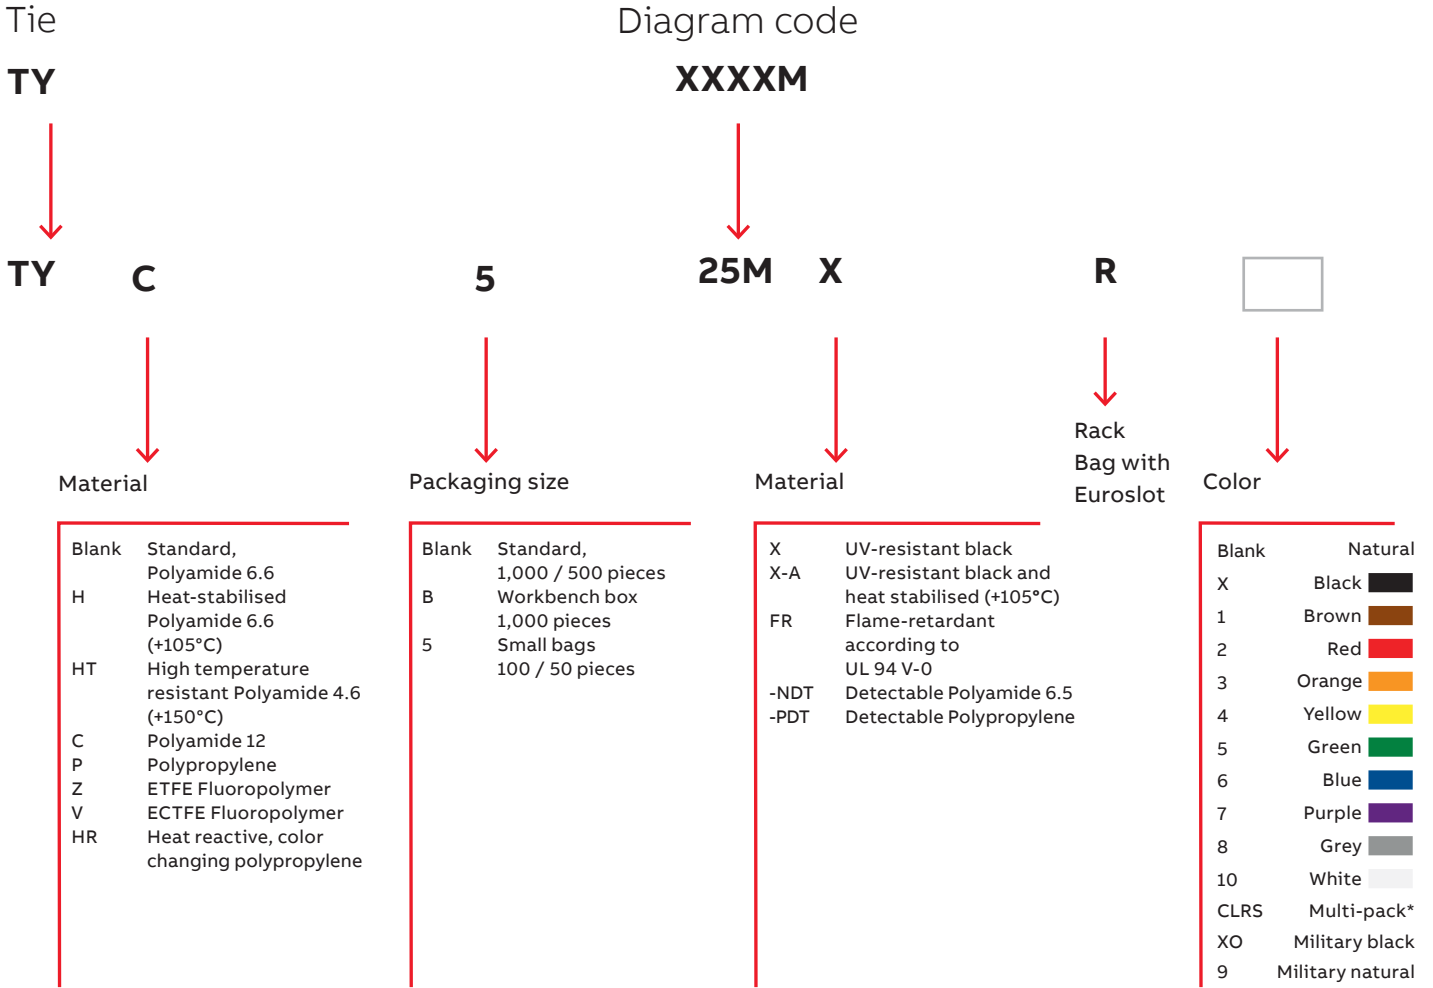

Different types of packaging, including the unique "workbench boxes" for fast working without problems or losses. Recyclable packaging for a better contribution to the environment.

Outstanding range of special ties, all with the famous stainless steel locking device: ties with mounting hole or integrated peg/nail, panel mounting ties, identification ties with integrated label...

Broad range of mounting bases and accessories.

Ty-Rap numbering structure

Note: Nylon (Polyamide) is inherently susceptible to environmental conditions. Ty-Rap cable ties are moisturised to optimum performance levels at machine-side and should be stored in cool dry areas out of direct sunlight. Cable ties are packaged in plastic bags to contain moisture and should remain sealed until ready for use.

Ty-Rap high performance cable ties

Polyamide 6.6 cable ties – Natural

Characteristics

- Standard version (Polyamide 6.6), to cover most indoor applications
- Several lengths and 6 typical widths with a tensile strength up to 780N, to cover the most demanding applications
- Packaging: OEM bulk quantities in recyclable polythene bags
- Also available in small bags with Euroslot (see page C12) and in workbench boxes (see page C15)

Technical information

- Material - Moulding: Polyamide 6.6
- Material - Locking barb: 316 grade stainless steel
- Temperature range: -60°C to +85°C (-76°F to 185°F)
- Min. Installation Temp.: -20°C (-4°F)
- Color: Natural
- Flammability rating: UL 94 V-2
- Other properties: Halogen free, Silicone free

Polyamide 6.6 cable ties – Colored

Characteristics

Ty-Rap cable ties in Polyamide 6.6 are available in 10 different colors

- Several sizes and tensile strengths are normally in stock in standard pack quantities
- Standard packaging is 100/50 pieces
- Please contact your Sales Office for product availability and minimum order quantity of bulk packages, special colors, or other cable tie sizes
- Preprinted cable ties are available in special order. Contact your local sales office for more information

Ty-Rap high performance cable ties

Polyamide 6.6 cable ties – Workbench boxes

Characteristics

- An attractive packaging option for high volume manual assembly: 1,000 pieces in a workbench box - easy to reach, hence timesaving
- This user-friendly packaging allows fast working without problems or losses

Technical information

- Material - Moulding: Polyamide 6.6
- Material - Locking barb: 316 grade stainless steel
- Temperature range:
 - 60°C to +85°C (-76°F to 185°F) (natural),
 - 60°C to +105°C (-76°F to 221°F) (black)
- Min. Installation Temp.:
 - 20°C (-4°F) (natural),
 - 30°C (-22°F) (black)
- Color: Natural or UV-resistant black (other colors see page C12)
- Flammability rating: UL 94 V-2
- Other properties: Halogen free, Silicone free, UV-resistant (black)

Ty-Rap high performance cable ties

Polyamide 6.6 cable ties – Heat stabilised + UV-resistant

Characteristics

- Heat stabilised + UV-resistant version, for outdoor applications that also require a resistance to high temperature (+105°C/221°F)
- For OEM and MRO applications like: transportation, lawn (garden/farm), construction equipment, recreational vehicles

UV-resistant

Heat resistant

Technical information

- Material - Moulding: Polyamide 6.6
- Material - Locking barb: 316 grade stainless steel
- Temperature range: -60°C to +105°C (-76°F to 221°F)
- Min. Installation Temp.: -40°C (-40°F)
- Color: Black
- Flammability rating: UL 94 V-2
- Other properties: UV-resistant, heat stabilised, Halogen free, Silicone free

Ty-Rap heat-reactive cable ties

Changes color to warn you of potentially dangerous high temperatures

ABB introduces the latest innovative addition to its line of Ty-Rap high-performance cable ties — Ty-Rap heat-reactive cable ties. These ties change color from their standard green to translucent when in contact with a high-temperature surface, providing visual indication of overheating equipment or a potential skin burn hazard.

To use Ty-Rap heat-reactive cable ties, simply wrap the tie around the surface of the item you wish to monitor, and then hand tighten or use an installation tool to ensure that the tie has complete contact with the surface (insufficient contact may limit color change indication).

A properly installed Ty-Rap heat-reactive cable tie begins to fade in color when the surface temperature reaches 40°C (104°F), with full transition to translucent (natural nylon color) at 49°C (120°F), indicating that the surface has reached a dangerous temperature for prolonged contact with skin.

Features

- Changes color from green to translucent when in contact with high-temperature surface
- Efficacy of heat-reactive polypropylene material lasts up to 24 months under normal operating conditions
- Offers all the convenience and performance benefits of standard Ty-Rap cable ties, including the Grip of Steel® type 316 stainless steel locking barb
- Available in three lengths and two tensile strengths
- Choose the ERG50 or ERG120 Ty-Rap cable tie

application tool for easy installation

Applications

Ty-Rap heat-reactive cable ties are ideal for use where visual indication of a hot surface helps identify an unsafe working environment or malfunctioning equipment. They may be secured around any surface with normal operating temperature below 40°C (104°F), including:

- Piping
- Electrical circuits
- Boiler room surfaces
- Engine compartments
- Kitchen appliances
- Other applications in which hot surfaces may be a concern

Specifications

- Material: Polypropylene
- Operating temperature: -40°C to 80 °C (-40°F to 176°F)
- Heat-activation temperature: 49°C ± 3°C (120°F ± 6°F)
- Standard color: Green
- Heat-transition color: Translucent
- Color transition life: 1,000 hours above heatactivation temperature
- UV resistance: Indoor use only; avoid exposure to UV light
- Tensile strength and installation:
 - 0.19" wide ties: 30 lbs, ERG50 setting 2–5
 - 0.31" wide ties: 60 lbs, ERG120 setting 3–6

WARNING: The Ty-Rap heat-reactive cable tie is a heat indicator only. Use appropriate measuring device to verify actual temperature.

CAUTION: Replace the Ty-Rap heat-reactive cable tie upon the first occurrence of any of the following conditions: operating temperature range is exceeded, exposure to UV light, visible fading of standard green color or 24 months.

Ty-Rap high performance cable ties

Polyamide 4.6 cable ties – Extra high temperature

Characteristics

- Extreme continuous temperature rating: -40°C to +150°C (-40°F to 302°F) (in air)
- For high temperature environments in industrial, OEM, MRO and commercial construction applications such as: metal processing, paper mills, lighting, automotive

Heat resistant

Technical information

- Material - Moulding: Polyamide 4.6
- Material - Locking barb: 316 grade stainless steel
- Temperature range: -40°C to +150°C (-40°F to 302°F)
- Min. Installation Temp.: -18°C (-0.4°F)
- Color: Light green
- Flammability rating: UL 94 V-2
- Other properties: Extra high temperature resistant, Halogen free, Silicon free

Polyamide 6.6 cable ties – UV-resistant black

UV-resistant

Characteristics

- UV-resistant version, especially recommended for outdoor applications
- Black version (2% carbon for military specifications)
- Also available in heat stabilised + UV-resistant version (contains 2% carbon according to military application), for outdoor applications that also require a resistance to high temperature (+105°C/221°F). See page C17 (TY...MX-A series)
- Several lengths and 6 typical widths with a tensile strength up to 780N, to cover the most demanding applications

- Packaging: OEM bulk quantities in recyclable polythene bags
- Also available in small bags with Euroslot (see page C12) and in workbench boxes (see page C15)

Technical information

- Material - Moulding: Polyamide 6.6
- Material - Locking barb: 316 grade stainless steel
- Temperature range: -60°C to +105°C (-76°F to 221°F)
- Min. Installation Temp.: -30°C (-22°F)
- Color: Black
- Flammability rating: UL 94 V-2

Ty-Rap high performance cable ties

Fluoropolymer cable ties – ETFE

Characteristics

- ETFE Fluoropolymer version, resistant to chemicals and to radiation
- Non-outgassing properties for zero gravity applications
- The best all around plastic material for cable ties
- Typical applications include: nuclear, power plants, space industry, etc.

UV-resistant

Radiation resistant

Technical information

- Material - Moulding: Fluoropolymer ETFE
- Material - Locking barb: 316 grade stainless steel
- Temperature range: -60°C to +170°C (-76°F to 338°F)
- Min. Installation Temp.: -60°C (-76°F)
- Color: Aquamarine
- Flammability rating: UL 94 V-0
- Other properties: Silicone free, inert to most solvents and chemicals, hydrolytically stable, radiation resistant. Non-outgassing properties for zero gravity applications.

For tooling specifications: see pages C100 to C109

Tooling

ERG50

For use with 2.3mm to 4.3mm (80N to 220N) Cable ties.
See page C100.

ERG120*

For use with 2.3mm to 6.8mm (80N to 540N) Cable ties.
See page C100.

*ERG120 not to be used on TYZ23M

L-500-EU

For use with 6.8mm (540N) Cable ties.
See page C100.

Diagrams

Ty-Rap high performance cable ties

Detectable cable ties

Characteristics

The Ty-Rap Detectable Cable Ties from ABB incorporate a unique compound (patent pending) that can be detected by X-Ray equipment, metal detectors and visual inspection equipment.

Particularly recommended for applications in food, pharmaceutical and other contamination-sensitive industries using detection systems, where cable tie installation residuals (cut tails) are not allowed in the finished product.

- Detectable by metal detectors set at minimum 1.5mm (0.06") diameter ferrous sphere
- Detectable by X-Ray equipment
- Bright blue color for an easy visual detection
- Help achieve the HACCP EU-Directive
- Available in standard Polyamide 6.6 or in Polypropylene version for liquid-processing applications
- Available in 5 different sizes in convenient small bags with Euroslot: 5 NDT, 4PDT

Technical information

- Material - Moulding: Polyamide 6.6 or Polypropylene
- Material - Locking barb: 316 grade stainless steel
- Temperature range: -40°C to +85°C (-40°F to 185°F)
- Color: Bright blue
- Flammability rating: UL 94 V-2 (Polyamide 6.6), UL 94 HB (Polypropylene)
- Other properties: Halogen free, silicone free

See page C100.

Diagrams

Ty-Fast

Ag+™ bacteria-resistant cable ties

Ty-Fast Ag+ after 24 hours of exposure to bacteria

Standard cable tie after 24 hours of exposure to bacteria

Characteristics

A breakthrough safety solution for fastening in bacteria-prone areas. A standard nylon cable tie is a harmless enough object—you install it to bundle and fasten cables, and then you forget about it. By its very design, full of notches and grooves, though, a cable tie makes an attractive home for micro-organisms to collect and reproduce.

In most applications, this isn't a concern. However, in hospitals and food processing facilities, where reducing the growth of unhealthy micro-organisms is critical, the presence of heat, moisture and organic material common in these environments can encourage the growth of bacteria, fungus and mold. In response to the needs of customers in healthcare, food processing and preparation, pharmaceuticals, medical device manufacturing and other contamination-sensitive industries, ABB introduces the industry's first bacteria resistant cable tie.

Ty-Fast Ag+ bacteria-resistant cable ties are molded from an FDA-compliant nylon resin blended with an antimicrobial silver ion additive to prevent the growth of bacteria, fungus and mold on their surface. A proven antimicrobial agent, ionized silver has been used in consumer products for years and is effective against a broad spectrum of micro-organisms, preventing their reproduction and spread.

- The industry's first cable tie that inhibits microbial growth
- Protects itself against bacteria, mold and fungus
- Helps to reduce infection rate and spread of bacteria by not hosting microbial growth

- Promotes a clean environment—99.9% effective for bacterial reduction
- Made from FDA-approved resin with EPA-registered antimicrobial
- Offers reliable Ty-Fast cable tie design for easy cable management
- UL recognized, RoHS and FDA compliant
- Patent pending

Applications

- Hospitals and other healthcare facilities
- Pharmaceutical production
- Food and beverage processing (off-line production)
- Medical equipment manufacturing

Technical information

- Material: FDA-compliant fungal-inert nylon 6.6 resin custom-blended with EPA-registered antimicrobial silver ion additive
- Operating temperature: -40°F to 185°F (-40°C to 85°C)
- Flammability rating: UL94V-2
- Certifications/ compliances:
 - Recognized to UL62275 Type 1
 - UL/EN/CSA62275 Type 2/2S rated for AH-2 plenum
 - Independent laboratory tested to ISO22196 (Measurement of Antibacterial Activity on Plastic Surfaces), equivalent to JISZ2802 (Japanese Test for Antimicrobial Activity and Efficacy)
 - Fungal inert to MIL-T-152B standard
 - RoHS compliant

Ag+ bacteria-resistant cable ties

Cat. no.	Max bundle ø		Length L		Width W		Min. tensile strength [N]	Quantity [pieces]
	[mm]	[in.]	[mm]	[in.]	[mm]	[in.]		
TY100-18-ANTI	22	0.86	104.14	4.1	22	0.86	80	100
TY175-50-ANTI	44	1.75	195.58	7.7	44	1.75	220	100
TY400-50-ANTI	102	4.00	363.22	14.3	102	4.00	220	100
TY400-120-ANTI	102	4.00	363.22	14.3	102	4.00	540	100

Note: Ty-Fast Ag+ bacteria-resistant cable ties provide no antimicrobial inhibitory activity beyond protection of the cable ties themselves. They do not provide protection against specific pathogenic organisms, nor do they prevent growth of bacteria on adjacent or nearby surfaces. The antimicrobial efficacy of the material lasts a minimum of two years from manufacture under normal use conditions.

Tooling

ERG50
For use with 22mm to 102mm (80N to 540N) Cable ties. See page C100.

Diagrams

Cable support system with metallic locking barb

Pre-assembled Deltec cable ties

Characteristics

- Provides a strong, long-life and cost saving method of securing communication and overhead cables
- Double locking head with corrosion resistant locking barbs in copper alloy
- Proven years of service: designed to last a minimum of 20 years outdoor
- No sharp edges: operator friendly, cable friendly!
- Easy to install, low installation costs
- Extremely robust ties, with high tensile strength (1110N) after fastening
- Available either in pre-cut and pre-assembled lengths, or on reels with separate heads for total flexibility
- Choice of specific spacers and accessories
- Month and year of manufacture stamped into strap material

Technical information

- Material - Strap & head: Toughened weatherable acetal
- Material - Locking barb: Marine grade, corrosion-resistant copper alloy
- Temperature range: -65°C to +90°C (-85°F to 194°F)
- Flammability rating: UL 94 HB
- Color: Black
- Other properties: UV-resistant, Halogen free, superior resistance to moisture and salt environments

Pre-assembled Deltec cable ties

Special ties with steel locking barb

Integrated mounting hole cable ties

Characteristics

- Can be directly mounted onto a support with screws, bolts or rivets
- Mounting and bundling in one maintenance-friendly assembly
- Typical application: cable harness manufacture and pre- and end- mounting of bundles and parts. Maintenance friendly mounting of cables, tubes and parts in all types and sizes of machines and installations - indoor and outdoor

Technical information

- Material - Moulding: Polyamide 6.6
- Material - Locking barb: 316 grade stainless steel
- Temperature range: -40°C to +85°C (-40°F to 185°F)
- Color: Natural or UV-resistant black (see table)
- Flammability rating: UL 94 V-2
- Other properties: UV-resistant (black), Halogen free, Silicone free

Releasable cable ties

Characteristics

- For temporary but strong bundling, especially during control box wiring
- Very simple application
- Available in 2 lengths for different applications
- May be re-used many times
- No tooling necessary

Technical information

- Material: Polyamide 6.6
- Temperature range: -40°C to +85°C (-40°F to 185°F)
- Color: Natural
- Flammability rating: UL 94 V-2
- Other properties: Halogen free, Silicone free

from clip and open tie.

Special ties

Releasable lashing ties with incorporated fastener

Characteristics

- For temporary but strong bundling, especially during control box wiring
- Very simple application
- Available in 2 lengths for different applications
- May be re-used many times
- No tooling necessary

Technical information

- Material: Polyamide 6.6
- Temperature range: -40°C to +85°C (-40°F to 185°F)
- Color: UV-resistant black
- Flammability rating: UL 94 V-2
- Other properties: Halogen free, Silicone free

Diagrams

Introduce the cable tie tail into the lower slot in the head. Tighten the tie and pull it back. Slide in the tie under the catch from the side until it snaps into position.

Special ties

Releasable 2-piece lashing ties, pre-assembled version

Characteristics

- Heavy-duty lashing ties, in cut lengths with pre-assembled heads
- Also available on reel with separate heads (see page C38)
- UV-resistant Polypropylene, ideal for applications where chemical resistance is important (heads in weatherable rigid Polyamide 6.6)
- Extremely robust (670N)
- Easily releasable & reusable
- 2 types of head: type A: no mounting hole, type B: with mounting hole
- Typical applications: Indoor and outdoor fastening of cables, pipes and other parts in industry, shipbuilding, chemical industry etc

Technical information

- Material - Tie: Weatherable Polypropylene
- Material - Head: Polyamide 6.6
- Temperature range:
Head: -40°C to +85°C (-40°F to 185°F)
Tie: -55°C to +110°C (-67°F to 230°F)
- Color: UV-resistant black
- Flammability rating: UL 94 V-2
- Other properties: UV-resistant, Halogen free

Special ties with steel locking barb

Cable ties with identification tag

Characteristics

- Identification ties with incorporated label for durable marking and tying
- Label forms onto the bundle for types TY512M, TY51M and protrudes for ties TY532M and TY53M
- Series 51M is MIL (MS-3368-5) approved
- Trouble-free installation
- All edges are rounded to make installation easier
- Available in bulk packaging (500/1,000 pieces) or in small packaging (100 pieces)

Technical information

- Material - Moulding: Polyamide 6.6
- Material - Locking barb: 316 grade stainless steel
- Temperature range: -40°C to +85°C (-40°F to 185°F)
- Color: Natural
- Flammability rating: UL 94 V-2
- Other properties: Halogen free, Silicone free

Special ties with steel locking barb

Cable ties with identification tag

Characteristics

- Identification ties with incorporated label for durable marking and tying
- Label forms onto the bundle
- 5 different versions, up to 4 straps, in bulk and small packaging
- 4 versions (up to 3 straps) are Mil-specified
- Trouble free installation
- Labelling of bundles up to 102mm (4.02") diameter
- All edges are rounded and surfaces smoothed to make installation easier

Technical information

- Material - Moulding: Polyamide 6.6
- Material - Locking barb: 316 grade stainless steel
- Temperature range: -40°C to +85°C (-40°F to 185°F)
- Color: Natural
- Approvals: MIL: MS-3368 -1, -2, -3, -4
- Flammability rating: UL 94 V-2
- Other properties: Halogen free, Silicone free

Ty-Rap high performance cable ties

Cable spacers

Characteristics

- Stackable height in 12.7mm (0.5") increments, for any desired spacing and all cable sizes - no need to stock multiple sizes of individual height spacers
- Designed to retain strap on each side and cradle the cable, providing restricted movement of spacer and preventing damage to cable
- Suitable for coaxial cables

- Can be used for parallel routing or for perpendicular cables

Technical information

- Material: Weather-resistant polypropylene
- Temperature range: -40°C to +85°C (-40°F to 185°F)
- Flammability rating: UL 94 HB
- Color: Black
- Other properties: UV-resistant, Halogen free

All plastic cable ties

Ty-Fast, Col-Ty™ and Ty-Grip™

ABB offers a complete range of all plastic cable ties to cover the most demanding applications.

Ty-Fast all plastic ties

The all-plastic cable ties are available in lengths from 112mm to 1214mm (4.41" to 47.80") and widths from 2.4mm to 13.2mm (0.09" x 0.52"), offering a loop tensile strength up to 1120 N. Those cable ties will satisfy bundling requirements up to 381mm (15"). Those cable ties are halogen and silicone free Polyamide 6.6 and are available in 12 different colors.

Ty-Fast cable ties meet shipbuilding classification such as Germanischer Lloyd/DNV-GL, Lloyd's Register of Shipping, Bureau Veritas but also Mil Specification and QPL.

Ty-Fast cable ties have a CE declaration, supported by compliance to the low voltage directive and EN/IEC 62275 and UL 62275.

State-of-the-art robotic and raw material handling equipment assures product and material integrity throughout the manufacturing process. The integrally formed Polyamide pawl combines low insertion and high locking strength.

A rounded, low-profile head makes for less snags, tails have improved two-sided finger grip design that helps the operator grasp and pull ties snug. The Sure Grip tab keeps the tail from popping out while being threaded, then holds it securely for final tightening by hand or tool.

Heavy duty installation ties

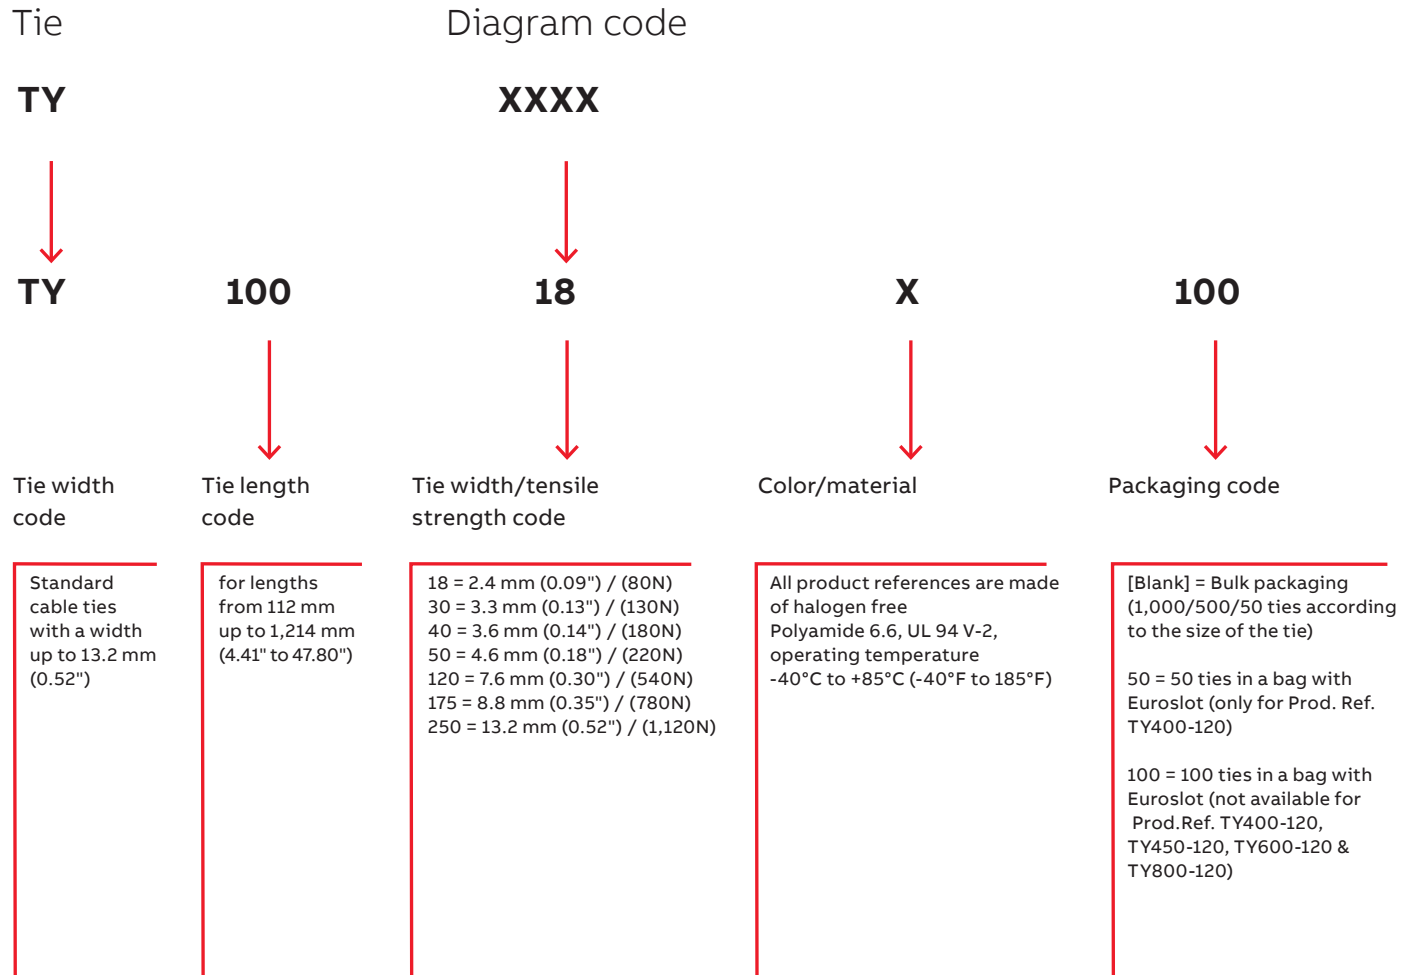

Col-Ty - the heavy installation tie - is mainly used for securing and bundling of cables in the utility and construction industries.

Col-Ty is ideal for hazardous environments, low temperatures and humidity. Col-Ty has a low profile double locking head with serration on the outer side of the tie, which eliminates the risk of damage to the cable.

Hook & loop fasteners

Ty-Grip cable ties are very easy to release and re-use, making them ideal for applications where changes are anticipated or continuous access is required. There is no risk of over-tightening the cables, which makes the Ty-Grip hook & loop fasteners ideal for specific applications in fiber optics, computer network wiring, telecom cables, etc.

Ty-Fast numbering structure

Note: Nylon (Polyamide) is inherently susceptible to environmental conditions. Ty-Rap cable ties are moisturised to optimum performance levels at machine-side and should be stored in cool dry areas out of direct sunlight. Cable ties are packaged in plastic bags to contain moisture and should remain sealed until ready for use.

All plastic cable ties

Extra-long cable ties

Characteristics

- Extremely long ties (up to 1214mm/47.80")
- Robust construction (778N), for demanding applications where superior tensile strength is required
- The extra long Ty-Fast ties are available in natural color for indoor applications and in UV-resistant black for outdoor applications

Technical information

- Material: Polyamide 6.6
- Temperature range: -40°C to +85°C (-40°F to 185°F)
- Color: Natural or UV-resistant black (see table)
- Flammability rating: UL 94 V-2
- Other properties: UV-resistant (black), Halogen free, Silicone free

UL 94 V-0 flame retardant cable ties

Characteristics

- Similar to our Ty-Rap range of flame retardant ties, these all-plastic ties are made from low smoke flame retardant Polyamide 6.6 and meet the requirements of UL 94 V-0
- Ideal for use where low flammability and low smoke are necessary such as public transport / buildings, tunnels etc.

Technical information

- Material: Polyamide 6.6
- Temperature range: -40°C to +85°C (-40°F to 185°F)
- Color: Milky white
- Flammability rating: UL 94 V-0
- Other properties: Limited fire hazard (low smoke), Halogen free, Silicone free

Special all-plastic cable ties

Integrated mounting hole cable ties

Characteristics

- Cable tie can be directly mounted onto a support with screws, bolts or rivets
- Mounting and bundling in one maintenance-friendly assembly
- Cable harness manufacture and pre- and end-mounting of bundles and parts
- UV-resistant version, especially recommended for outdoor applications

Technical information

- Material: Polyamide 6.6
- Temperature range: -40°C to +85°C (-40°F to 185°F)
- Color: Natural or UV-resistant black (see table)
- Flammability rating: UL 94 V-2
- Other properties: UV-resistant (black), Halogen free, Silicone free

Special all-plastic cable ties

Releasable panel mounting cable ties

Characteristics

- Fastening and clip-mounting in one
- Fast pre- or on-site-assembly for a range of panel thickness up to 2.7mm (0.11")
- Fast and secure clip-mounting
- For use in 6.35mm (0.25") mounting hole
- Cat. no.s containing xxx-PMR-xxx are releasable

Technical information

- Material: Polyamide 6.6
- Temperature range: -40°C to +85°C (-40°F to 185°F)
- Color: Natural or UV-resistant black (see table)
- Flammability rating: UL 94 V-2
- Other properties: UV-resistant (black), Halogen free, Silicone free

Special cable ties

Ty-Grip hook & loop fasteners

FO series loop ties are ideal for wrapping pre-determined bundle diameters thanks to the convenient slotted head.

FOL series buckle ties provide added strength and stability thanks to the high performance polyamide buckle.

Characteristics

These handy ties are very easy to release and re-use, making them ideal for applications where changes are anticipated or continuous access is required.

- Quick bundling and re-adjustable tension
- No risk of over-tightening the cables, which makes the Ty-Grip Hook & Loop fasteners ideal for specific applications in fibre optics, computer network wiring, telecom cables, etc.
- Multiple colors available for identifying specific bundles
- Different sizes available to accommodate varying bundle diameters
- Screw-mount and self-adhesive mounting bases provide multiple mounting options

Technical information FO Series

- Material hook side: Polyamide
- Material loop side: Low density Polyethylene
- Temperature range: -20°C to +104°C (-4°F to 219.2°F)
- Color: Standard color: black
- Flammability rating: UL 94 HB*
- Peel-off strength: 0.8N/cm

Technical information FOL Series

- Material hook side: Polyamide
- Temperature range: -20°C to +93°C (-4°F to 199.4°F)
- Color: Standard color: black - see note after table
- Flammability rating: UL 94 HB
- Peel-off strength: 0.8N/cm

Special cable ties

Ty-Grip hook & loop fasteners

FOS series strip ties are pre-cut which makes bundling easy.

FOR series rolled hook and loop allows customers to conveniently cut pieces to desired lengths, eliminating waste.

Characteristics

These handy ties are very easy to release and re-use, making them ideal for applications where changes are anticipated or continuous access is required.

- Quick bundling and re-adjustable tension
- No risk of over-tightening the cables, which makes the Ty-Grip Hook & Loop fasteners ideal for specific applications in fibre optics, computer network wiring, telecom cables, etc.

Ty-Rap and Ty-Fast Accessories

To complement the range of premium cable ties, ABB has also developed an extensive range of mounting bases, cable clamps and other fastening accessories, to provide a professional solution to the most demanding applications in cable management.

A wide range of material is offered, from the classic Polyamide 6.6 to the high performance Fluoropolymer ETFE for applications in tough conditions.

To better suit each kind of applications, these products exist in a wide choice of shape & design, and with different mounting methods, from self-adhesive to glue and / or screw mounting.

In particular, with the new high performance mounting bases (TC345 series), ABB is now offering a mounting base that leads the industry with more features and better performance:

- new design & materials, for increased performance
- special adhesive formulation, specifically for Nylon Mounting bases

Typical applications include wiring in:

- control boxes & machine control devices
- office equipment & home appliances
- military & medical equipment
- lighting & electronic equipment

Mounting bases & accessories

Overview

- 01 Mounting bases
- 02 Cable clamps and accessories

Characteristics

Self-adhesive mounting bases and clamps for screw and rivet mounting

The main difference between a mounting base and a cable clamp is the way the cable bundle can be mounted: while the cable bundle is attached directly to the clamp, the mounting base requires a cable tie to hold the bundle.

ABB offers a wide range of mounting bases and cable clamps, which can be self-adhesive or for screw and rivet mounting.

- Standard material: Polyamide 6.6
- Available in different types / material to suit any application
- Available in a wide range of sizes
- Temperature range:
 - 40°C to 85°C (-40°F to 185°F)
 - (105°C/221°F) for short periods
- Low profile design
- Easy to install
- Extremely strong and durable adhesive
- When applicable ABB accessories are UL recognised
- Self-adhesive mounting bases allow wire and cable mounting where mounting holes can not be drilled
- Used for the adhesion on a variety of materials and for durable fixing of stamped signs and panels for the electrical industry

Typical surfaces

- Plastic
- Glass
- Wood
- Metal
- Paper
- Painted surfaces
- Ceramics

01

02

Mounting bases

2-way entry

Characteristics

- Can be used in 2-way entry style for cable ties having a width up to 7.6mm (0.30")
- For cable ties having a width up to 4.8mm (0.19"), the mounting bases can be used in 4-way entry style
- Choice of 3 materials: standard Polyamide 6.6 (natural), UV-resistant Polyamide 6.6 (black), Polyamide 6.6 flame retardant and ETFE Fluoropolymer (aquamarine)
- Supplied either on a rubber based (synthetic polymer) closed cell foam adhesive (installation: self-adhesive and/or screw) or without self-adhesive (installation: screw and/or 2-component glue*)

Technical information

TC347, TC347A, TC5347AR, TC347X and TC5347AX

- Material: Polyamide 6.6
- Temperature range: -40°C to +85°C (-40°F to 185°F)
(Self-adhesive version: 0°C to +65°C/32°F to -85°F)

- Flammability rating: UL 94 V-2
- Color: (see table)
- Other properties: UV-resistant (black), Halogen free, Silicone free

TC347FR (Flame retardant)

- Material: Polyamide 6.6
- Temperature range: -40°C to +85°C (-40°F to 185°F)
- Flammability rating: UL 94 V-0
- Color: Natural
- Other properties: Halogen free, Silicone free

TCZ347 (Fluoropolymer)

- Material: ETFE Fluoropolymer
- Temperature range: -46°C to +150°C (-50.8°F to 302°F)
- Flammability rating: UL 94 V-0
- Color: Aquamarine
- Other properties: Silicone free, inert to most solvents and chemicals, hydrolytically stable, radiation resistant

* Glue = Cat. no. TC2PA (see page C115 for specifications)

Diagrams

Mounting bases

4-way entry - high performance

Characteristics

- Design & materials, for increased performance
- Low profile shape (height: 5.1mm/0.20"), to save space and reduce the torque forces on the mounting base
- Ramped cable tie entries, for easier insertion of the cable tie
- Longer struts (up to the edges of the base), for better adhesion
- Special adhesive formulation (specifically for Nylon mounting bases) for high pull-off strength
- 2 kinds of self-adhesive material:
 - rubber-based, for immediate adhesion (15 minutes set-up time)
 - acrylic based, to have the possibility of repositioning the mounting base initially (set-up time: 24 to 72 hours)

- Two holes to have the possibility to use additional screws, for even stronger installations when required
- Supplied on two-up lining, for easy removal of the lining

Technical information

- Material - Moulding: Polyamide or UV-resistant Polyamide
- Material - Self-adhesive: Rubber based
- Temperature range: -60°C to +85°C (-76°F to 185°F)
Self-adhesive version: 0°C to +70°C (32°F to 158°F)
- Flammability rating: UL 94 V-2
- Colors: Natural or UV-resistant black (see table)
- Other properties: UV-resistant black, Halogen free, Silicone free

** Not UL Listed

Diagrams

Mounting bases

Low profile plates

Characteristics

- Low profile
- Easy to use
- Self-adhesive or to be glued with 2-component glue*

Technical information

- Material: Polyamide 6.6
- Temperature range:
-40°C to +85°C (-40°F to 185°F)
Self-adhesive version: 0°C to +65°C (32°F to 149°F)
- Color: Natural or UV-resistant black (see table)
- Flammability rating: UL 94 V-2
- Other properties: Halogen free, Silicone free, UV-resistant black

Diagrams

Mounting bases

Self-adhesive mounting cradle

Characteristics

- Accepts cable ties to 7.6mm (0.30") width
- Supplied "two-up" on closed cell foam with synthetic polymer "rubber" based adhesive
- Use M3.5 self-tapping screw for added strength if desired

Technical information

- Material: Polyamide 6.6
- Temperature range: 0°C to +65°C (32°F to 149°F)
- Color: Natural or UV-resistant black (see table)
- Mounting method: Self adhesive and/or screw
- Flammability rating: UL 94 V-2
- Other properties: UV-resistant black, Halogen free, Silicone free

Diagrams

Mounting bases

Saddle support

Characteristics

- Tie mounting bases with supporting saddle
- For screw- or rivet-mounting
- The prism-shape of the saddle prevents twisting around the fixture
- High strength through compact design
- Non-conductive, non-corrosive, resistant to fuels, lubricants and most chemicals
- Available in natural nylon, UV-resistant nylon or heat stabilised black version

Technical information

- Material: Polyamide 6.6 or heat stabilised Polyamide 6.6
- Temperature range: -40°C to +85°C (-40°F to 186°F)
- Color: Natural or UV-resistant black (see table)
- Mounting method: Screw
- Flammability rating: UL 94 V-2
- Other properties: Halogen free, Silicone free, UV-resistant black

Diagrams

Mounting bases

Saddle-type mounting base

Characteristics

The saddle-type mounting bases allow 3 possible cable mounting:

- the cables can be attached to a flat surface on which the base is screwed
- the cable bundles can be mounted in parallel
- the cable bundles can be mounted crosswise

Can also be used for the mounting of cylindrical objects having a diameter between 12.7 and 31.8mm (0.5" and 1.25")

Technical information

- Material: Polyamide 6.6
- Temperature range: -40°C to +85°C (-40°F to 185°F)
- Color: Natural
- Mounting method: Screw
- Flammability rating: UL 94 V-2
- Other properties: Halogen free, Silicone free

Mounting bases

Screw-mounted strips for multiple bundling

Characteristics

- Tie mounting strips for up to 6 bundles simultaneously
- When mounted, the tie is guided through the clamp for fast assembly

Cat. no. TC1101 to TC1117

- Simple and strong flat mounting beams for fixing multiple cables, bundles or components
- Mil. Specified (MS-3339-....-...)
- VG approved (VG 95387, item 2)

Cat. no. TC375 and TC376

- For vertical and double-side mounting

Cat. no. TC101 and TC103

- Elongated fastening hole on one end allows greater flexibility during mounting

Technical information

- Material: Polyamide 6.6
- Temperature range: -40°C to +85°C (-40°F to 185°F)
- Color: Natural
- Mounting method: 2 screws (1 screw for Cat. no.. TC376 & TC375)
- Flammability rating: UL 94 V-2
- Other properties: Halogen free, Silicone free

Mounting bases

Weather resistant - Heavy-duty

Characteristics

- Tie mounting base for outdoor installation
- A strong, weatherproof and durable outdoor fastening solution for pipes, hoses, cables, etc.

Cat. no. TC5358 and TC5359

- Built-in plug for mounting into walls
- Easy to install: the plug is simply hammered into a hole
- The lamellar plug ensures high tensile strength and durability

Cat. no. TC5355 to TC5357

- For screw-fastening
- Ergonomically shaped for trouble-free installation

Technical information

- Material: UV-stabilised Polyamide 6.6
- Temperature range: -40°C to +85°C (-40°F to 185°F)
- Color: Black
- Mounting method: Screw (for Cat. no. TC5355 to TC5357 only)
- Flammability rating: UL 94 V-2
- Other properties: UV-resistant, Halogen free, Silicone free

Weather resistant - Heavy-duty

Mounting bases

Clip-in mounting bases for blind mounting

Characteristics

- Clip-in tie mounting bases for housings, faceplates etc
- With fastening clip for blind-mounting and two openings for 2.8mm (0.11") or 4.8mm (0.19") ties
- Low profile

Technical information

- Material: Polyamide 6.6
- Temperature range: -40°C to +85°C (-40°F to 185°F)
- Color: Natural
- Mounting method: Clip in
- Flammability rating: UL 94 V-2
- Other properties: Halogen free, Silicone free

Mounting bases

Rivet-mounted bases

Characteristics

- Low profile mounting base with integrated rivet
- Easy to install into normal or blind holes: just hammer in the expanding harbour
- Parts are color-coded according to hole diameter to avoid confusion

Technical information

- Material: Polyamide 6.6
- Temperature range: -40°C to +85°C (-40°F to 185°F)
- Color: See table
- Mounting method: Rivet mounted
- Flammability rating: UL 94 V-2
- Other properties: Halogen free, Silicone free

Mounting bases

Aluminium plates

Characteristics

- Very strong mounting base for gluing or screw mounting or self-adhesive mounting
- Low profile
- Soft material can be perfectly shaped onto any support
- Lightweight
- Does not age under extreme temperatures

Technical information

- Material: Aluminium (3003, ASTM-B-209)
- Temperature range:
-100°C to +450°C (212°F to 842°F)
Self-adhesive version: 0°C to +65°C (32°F to 149°F)
- Color: Metallic
- Mounting method: Glue (*) and / or screw or self-adhesive
- Flammability rating: Fire proof
- Other properties: UV-resistant

Cable clamps

Plain edge cable clamps

Characteristics

- 18 diameters and 2 widths with mounting holes for M4 and M5 screws
- Indoor application

Technical information

- Material: Polyamide 6.6
- Temperature range: -40°C to +85°C (-40°F to 185°F)
- Color: Black
- Mounting method: Screw
- Flammability rating: UL 94 V-2
- Other properties: Halogen free, Silicone free

Diagrams

Cable clamps

Adjustable, ladder style clamps

Characteristics

- Ladder style fastener is easily released and refastened
- Supplied “single-cut” on a rubber based closed cell foam adhesive
- In addition, can also be mounted with a screw, for improved pull-off strength

- Material: Polyamide 6.6
- Temperature range: 0°C to +65°C (32°F to 149°F)
- Color: Grey
- Mounting method: Self adhesive and / or screw-mounting
- Flammability rating: UL 94 V-2 (clamp)
- Other properties: Halogen free, Silicone free

Diagrams

Cable clamps

Latching clamps

Characteristics

- Re-usable tie mounting clamps
- For self-adhesive and / or screw- or rivet mounting
- One-piece design with integrated releasable lock
- The inner profile protects sensitive cables, fibre optics etc
- Desired height can be set in 3 or 6 ratchet steps
- The large base surface area and the strong adhesive film guarantee a high adhesive strength
- The self-adhesive film is foam backed (0.8mm/0.03") which allows durable fixing on a variety of materials

Technical information

- Material: Polyamide 6.6
- Temperature range: -40°C to +85°C (-40°F to 185°F)
Self-adhesive version: 0°C to +65°C (32°F to 149°F)
- Color: Natural
- Mounting method: Self adhesive or screw-mounting
- Flammability rating: UL 94 V-2
- Other properties: Halogen free, Silicone free

Cable clamps

Re-openable clamps

Characteristics

- Simple installation
- Can be mounted by clipping-in or gluing
- For series production or as a temporary support during wiring installation
- Clip ends are rounded for comfortable re-opening
- Cat. no. TC95 features 2-stage lock

Technical information

- Material: Polyamide 6.6
- Temperature range: -40°C to +85°C (40°F to 185°F)
- Color: Natural
- Mounting method: Clip in
- Flammability rating: UL 94 V-2
- Other properties: Halogen free, Silicone free

Cable clamps

Re-openable clamps with springs

Characteristics

- Holding clips with rubberised fabric tape
- The built-in springs hold the cable bundle safely in the desired position
- The upper clip end is rounded for easy addition of cables
- Strong fixing due to two mounting holes, aligned along the axis of the cable bundle

Technical information

- Material – Body: Polyamide 6.6
- Material – Elastic: Rayon & natural rubber
- Material – Spring: Steel
- Temperature range: -40°C to +85°C (-40°F to 185°F)
- Color: Natural
- Mounting method: 2 screws
- Flammability rating: UL 94 V-2 (body)
- Other properties: Halogen free

Cable clamps

Self-adhesive press clips

Characteristics

- Available in “full clip” version (PCNY series) or “half clip” version (HCNY series)
- 4 sizes to accommodate bundles up to 12mm (0.47")
- Clips are provided “two-up” on a rubber based closed cell foam adhesive

Technical information

- Material: Polyamide 6.6 (clip)
- Temperature range: 0°C to +65°C (32°F to 149°F)
- Color: Natural
- Mounting method: Self-adhesive
- Flammability rating: UL 94 V-2
- Other properties: Halogen free, Silicone free

Cable clamps

Self-adhesive clips for round cable

Characteristics

- Diverse cable clamps for bundle diameters from 4mm (0.16") to 13.5mm (0.53")
- Clips are provided two-up on a rubber based closed cell foam adhesive
- Flexible centre tongue for removal or addition of cables

Technical information

- Material: Polyamide 6.6 (clip)
- Temperature range: 0°C to +65°C (32°F to 149°F)
- Color: Natural or black
- Mounting method: Self-adhesive
- Flammability rating: UL 94 V-2
- Other properties: Halogen free, Silicone free

Cable clamps

Accessories for flat cables

Characteristics

- This system allows the secure and neat fixing of between 1 and 25 ribbon cables
- Clamp height adapts accurately to the desired number of ribbon cables
- Suitable for ribbon cables up to 60 conductors with a pitch of 1.27mm (76.2mm wide) (0.05" pitch/3" wide)
- Can be re-opened for later addition or removal of a cable
- Very strong hold
- All versions can be mounted with countersunk-head screws or rivets
- Some versions have an additional self-adhesive foam, for fast mounting

Technical information

- Material: Polyamide 6.6 (clip)
- Temperature range:
-40°C to +85°C (-40°F to 185°F)
Self-adhesive version: 0°C to +65°C (32°F to 149°F)
- Color: Natural
- Mounting method: Self-adhesive and / or for screw- or rivet-mounting
- Flammability rating: UL 94 V-2
- Other properties: Halogen free, Silicone free

Accessories for flat cables

Clips with flexible leg

Characteristics

- Low profile clip for single or multiple layers of flat ribbon cable
- Flexible centre leg allows for easy removal and replacement of desired cable
- Non-conductive, non-corrosive, resistant to fuels, lubricants and most chemicals
- FANY supplied "two-up" on a rubber based closed cell foam adhesive
- FSNY type has an additional mounting hole for screw mounting (M4 screw)

Technical information

- Material: Polyamide 6.6 (clip)
- Temperature range:
-40°C to +85°C (-40°F to 185°F)
Self-adhesive version: 0°C to +65°C
(32°F to 149°F)
- Color: Natural
- Mounting method: Self-adhesive or screw
- Flammability rating: UL 94 V-2 (clip)
- Other properties: Halogen free, Silicone free

Cable sleeves and spiral wraps

Bind-It®

The Cable Protection Systems (CPS) captures different products:

Wrap-around woven sleeving, braided sleeving, spiral wrap & extruded grommeting

The wrap-around sleeving – better known under the name Bind-It – is a tough but lightweight sleeve used to bundle and protect wires and cables from abrasion, sharp edges and chafing. Bind-It is a self-wrapping sleeve that is very quick and easy to install and remove. Bind-It is also available in a flame retardant version. No heat is necessary to seal the ends of this product. The ends can be secured by using Ty-Rap cable ties.

The braided sleeving is used for bundling and protecting cables. The braided sleeving is a closed sleeve available in a flame and a non-flame retardant version. This product is mainly used inside cabinets and enclosures. To stop the end of the sleeving fraying it is necessary to heat seal the ends using a “hotwire” device.

Spiral wrap is mainly used for protection of bundles. This product is available in a natural and UV-resistant version and supplied in a Euroslot bag, ideal for the distribution market.

Finally the extruded grommeting of ABB is used to line panel edges and knock-outs where the chafing of passing wires is a concern. In most applications, grommeting will grip tightly by itself.

Cable sleeves and spiral wraps

Spiral wrap

Characteristics

- For protection of bundles from 4mm to 130mm (0.16" to 5.12")
- Install gapped for greater flexibility or butted for maximum abrasion resistance, insulation and rigidity
- Counter-clockwise cut
- Delivered in bags with Euroslot
- Available in natural and UV-resistant black Polyethylene

Technical information

- Material: Polyethylene
- Temperature range: -30°C to +80°C (-22°F to 176°F)
- Color: Natural and UV-resistant black
- Flammability rating: UL 94 HB
- Other properties: UV-resistant black, Halogen free, Silicone free

Extruded grommeting

Characteristics

- Used to line panel edges and knock-outs where the chafing of passing wires is a concern
- Available in 8 stock sizes in 30.5m (100.07ft) lengths for panels from 1mm to 6.35mm (0.04" to 0.25")
- In most applications, grommeting will grip tightly by itself, if not, a touch of Epoxy will keep it in place

Technical information

- Material: Polyamide 6.6
- Temperature range: -40°C to +85°C (-40°F to 185°F)
- Color: Natural or black
- Flammability rating: UL 94 V-2
- Other properties: Halogen free, Silicone free

Molded Grommeting

Characteristics

- Meets MS21266
- Available in three materials for panel thicknesses from 0.015 in. to 0.192 in.
- Grommet is used to protect panel edges and knockouts where the chafing of passing wires is a concern
- Also available in fluoropolymer material for harsh environments
- Strip length – 12¾ in.

Braided Sleeving

01

02

01 Polyethylene Terephthalate (P.E.T.)

02 F – Flame Retardant Polyethylene Terephthalate (P.E.T.)

Characteristics

ABB braided wire protection sleeving is used to bundle and protect wires and cables from abrasion and excessive wear. Its flexible, lightweight, open weave construction installs easily over a variety of bundle diameters and shapes. The sleeving is resistant to chemicals, fungus, fuels, UV sunlight, and has an indefinite shelf life. It's easily cut with a hot knife, which seals the end, preventing fraying. Ends can be secured using Ty-Rap cable ties.

- Handy mini spools or bulk reels
- Eight sizes from 1/8 in. (3.18 mm) to 2 1/2 in. (63.5 mm) nominal I.D. size
- Solid or wraparound hook and loop braided expandable wire sleeving
- Meets UL94V-1
- Meets Federal Motor Vehicle Standard No. FMV SS 302

Technical information

Polyethylene Terephthalate (P.E.T.)

- Black polyester monofilament material
- 0.010 in. (0.25mm)
- Designed for indoor and outdoor applications
- Rated for continuous operating temp. -75°C to 125°C (-103°F to 257°F)

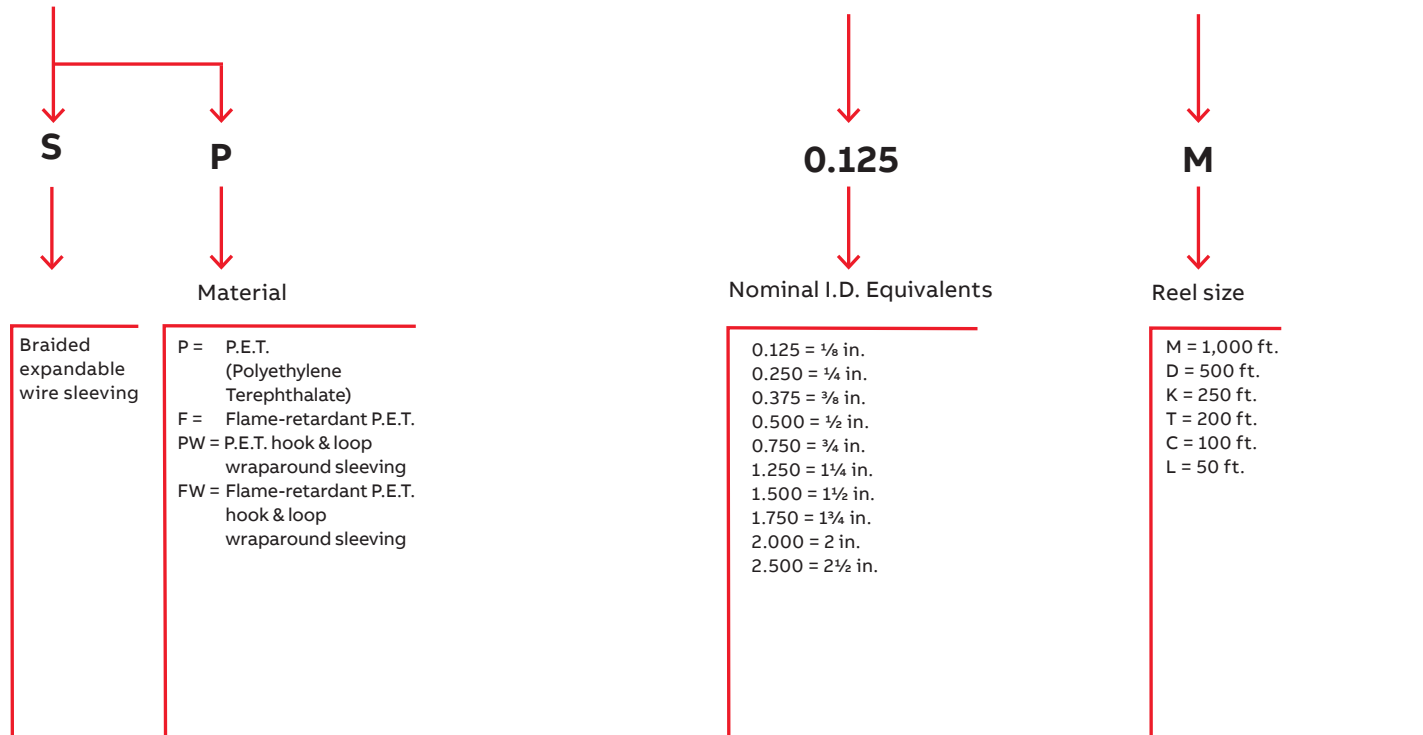

Technical information

F – Flame retardant polyethylene terephthalate (P.E.T.)

- Self-extinguishing polyester monofilament material
- 0.010 in. (0.25 mm)
- Can be used indoors and outdoors
- Provided in black with white tracer for identification
- Rated for continuous operating temp. -75°C to 125°C (-103°F to 257°F)
- Meets UL 94V-1 Flammability Rating

Cable tie tooling

Ty-Rap and Ty-Met tooling

ABB offers a comprehensive range of tooling to complement the full range of cable ties. The range includes low-cost tools for maintenance and small batch requirements, as well as robust and ergonomic tools with tension setting and automatic cutting, now also in pneumatic version

In particular, the ERG50 and ERG120 hand tools, as well as the new ERG50P pneumatic tool, provide a superior level of reliability and performance, combined with enhanced ergonomics and comfort of use.

These ergonomic tools, with adjustable tension and automatic cutting, are ideally suited for efficiently installing all kinds of plastic cable ties in industrial (Original Equipment Manufacturers, Maintenance and Repair Organisations, etc) and construction applications.

ERG50, ERG50P & ERG120

Superior reliability and performance

- Developed to meet the market needs for a more rugged and longer lasting tool
- Designed to integrate the greatest number of features in the market

Enhanced ergonomics and comfort of use

- First class design and materials, for maximum convenience
- As a result, the operator is subject to less stress, less fatigue and less risk of trauma due to long term use (such as Carpal Tunnel Syndrome)
- The pneumatic version (ERG50P) provides an even increased comfort of use

Increased efficiency

- Exclusive features for quick set-up and fast installation
- Confidence to achieve a highly professional result, installation after installation

Cable tie tooling

Selection guide

Tooling for plastic ties

	Cat. No.	Features	Tensioning	Cutting	For cable ties
	ERG50	Ergonomic hand tool with superior level of reliability and performance	adjustable	automatic	2.4mm - 4.8mm (0.04" - 0.19")
	ERG120	Ergonomic hand tool with superior level of reliability and performance	adjustable	automatic	4.8mm - 7.6mm (0.19" - 0.30")
	ERG50P	Ergonomic pneumatic tool with superior level of reliability and performance	adjustable	automatic	2.4mm - 4.8mm/ (0.04" - 0.19")
	WT199	Semi- automatic MIL specified hand tool (MIL. Nr. MS-90387-1)	adjustable	automatic	2.4mm - 4.8mm (0.04" - 0.19")
	WT1-TB	Basic tensioning tool, intended for maintenance and small batch use	basic	twist cut	2.4mm - 4.8mm (0.04" - 0.19")
	WT197	Semi-automatic MIL specified hand tool (MIL. Nr. MS-90387-2)	adjustable	automatic	4.8mm - 7.6mm (0.19" - 0.30")
	WT2-TB	Basic tensioning tool, intended for maintenance and small batch use	basic	twist cut	4.8mm - 7.6mm (0.19" - 0.19")
	DAS250	Adjustable tension settings	adjustable	automatic	7.87mm (0.31")
	WT3D	Robust metal body with plastic hand-grips, designed for tensioning and cutting heavy-duty cable ties	basic	twist cut	7.6mm - 12.7mm (0.30" - 0.5")

Cable tie tooling

Selection guide

Tooling for Ty-Met stainless steel ties

	Cat. No.	Features	Tensioning	Cutting	For cable ties
	CT1-TB	Tensioning hook provides extra-leverage for tensioning the ties by hand	basic	no cutting	Releasable, ladder type & strap type
	CT2-TB	Basic hand tool	basic	no cutting	Releasable, ladder type & strap type
	WT3S	A robust metallic hand tool with rubber grips	basic	no cutting	Ladder type & strap type
	CT3	Economic tensioning tool	basic	manual	Ladder type, strap type & ball-Lock type. Width up to 12mm (0.47")
	L-600	Tensioning tool	basic	manual (twist cut)	Ball-lock type. Width: 4.6mm & 7.9mm (0.18" & 0.31")
	CT4-TB	Bantam tool, unique 3-way handle can be used in various positions. Especially useful in tight areas with minimal access	basic	manual	Releasable, ladder type & strap type
	CT5	Adjustable tension setting tool with automatic cutting	adjustable	automatic	Ladder type & strap type
	CT6	Adjustable tension setting tool with automatic cutting	adjustable	automatic	Ball-lock type. Width: 4.6mm & 7.9mm (0.18" & 0.31")
	CT7	Tensioning and cutting tool, ratchet type	basic	manual	Ball-lock type. Width: 12mm & 16mm (0.47" & 0.63")
	CT8	Tensioning and cutting tool, ratchet type	basic	manual	Bands on reel (all widths)

Cable tie tooling

Tools for plastic cable ties: ERG50, ERG120 and ERG50P

ERG50

ERG120

ERG50P

Characteristics

The ergonomic tools from ABB provide a superior level of reliability and performance, combined with enhanced ergonomics and comfort of use. With their adjustable tension and automatic cutting, they are ideally suited for efficiently installing all kinds of plastic cable ties in industrial (Original Equipment Manufacturers, Maintenance and Repair Organisations, etc) and construction applications. They are available in hand tool version (ERG50 and ERG120) and in pneumatic version (ERG50P) for higher volumes of installation without muscle strain.

Developed to meet the market needs for a more rugged and longer lasting tool, and to integrate the greatest number of features in the market:

- 360° rotating nose (patented), allows the tool to be used in any position
- Tension adjustment lock, for constant tension setting
- Quick tension-adjustment wheel located towards the front for easy access and fast changes
- Adjustable handle span (for hand tools only) fits large and small hands
- Anti-recoil mechanism (patented) reduces vibration shock
- First class design and materials: ergonomic shape with rounded edges, soft rubber handles, well balanced center of gravity
- Longest stroke length on the market (25.4mm/1"), meaning less tensioning cycles, for time and cost saving
- High / low force setting (patent pending), for a selection between "high force & long stroke" or "low force & short stroke" (for hand tools only)
- The cable tie is cut flush to the head, with no remaining protrusion, and the cut tail remains captive in the tool for a cleaner installation
- Easy access to spare blade nest, always a spare blade at hand (each tool is supplied with a spare blade)

As a result, the operator is subject to less stress, less fatigue and less risk of trauma due to long term use (such as Carpal Tunnel Syndrome)

ERG50P tool in use

Technical information

ERG50

- Tool type: Ergonomic hand tool
- Nose color: Black
- For type of cable tie: Plastic ties
- For tie width: 2.4mm - 4.8mm (0.09" - 0.19")
- Features: Adjustable tension setting, automatic cutting, retraction of the strap end after application of Ty-Rap cable ties
- Weight: 260g
- Diagrams [L x W x H]: 178 x 127 x 38mm (7.01 x 5 x 1.50")
- Replacement blades: Cat. no. ERG50B

ERG120

- Tool type: Ergonomic hand tool
- Nose color: Orange
- For type of cable tie: Plastic ties
- For tie width: 4.8mm - 7.6mm (0.19" - 0.30")
- Features: Adjustable tension setting, automatic cutting, retraction of the strap end after application of Ty-Rap cable ties
- Weight: 278g
- Diagrams [L x W x H]: 178 x 127 x 38mm (7.01 x 5 x 1.50")
- Replacement blades: Cat. no. ERG120B

ERG50P

- Tool type: Ergonomic pneumatic tool
- Nose color: Black
- For type of cable tie: Plastic ties
- For tie width: 2.4mm - 4.8mm (0.09" - 0.19")
- Features: Adjustable tension setting, automatic cutting, retraction of the strap end after application of Ty-Rap cable ties, double hangers, supplied with pneumatic hose (2.7 metre/8.86ft)
- Operating air pressure: 6 to 7 bar non-lubricated air
- Weight: 415g (without pneumatic hose)
- Diagrams [L x W x H]: 245 x 155 x 40mm (9.65 x 6.10 x 1.57")
- Replacement blades: Cat. no. ERG50B

Cable tie tooling

Military certified installation tools

Cat. no.: WT199

Characteristics

- Semi-automatic hand tool
- MIL. Nr. MS-90387-1
- Tension setting to ensure product consistency
- Robust metal construction
- Ideal for industrial mass finishing applications like cable tree assemblies, for example in the military industry

Technical information

- Tool type: Semi-automatic hand tool
- For type of cable tie: Plastic ties
- For tie width: 2.4mm - 4.8mm (0.09" - 0.19")
- Features: Adjustable tension setting, automatic cutting, MIL specified (MS-90387-1)
- Weight: 410g
- Diagrams [L x W x H]: 163 x 134 x 24mm (6.42" x 5.28" x 0.94")

Cat. no.: WT197

Characteristics

- Semi-automatic hand tool
- MIL. Nr. MS-90387-2
- Tension setting to ensure product consistency
- Robust metal construction
- Ideal for industrial mass finishing applications like cable tree assemblies, for example in the military industry

- Tool type: Semi-automatic hand tool
- For type of cable tie: Plastic ties
- For tie width: 4.8mm - 7.6mm (0.19" - 0.30")
- Features: Adjustable tension setting, automatic cutting, MIL specified (MS-90387-2)
- Weight: 420g
- Diagrams [L x W x H]: 165 x 135 x 29mm (6.50" x 5.31" x 1.14")

Technical information

Cable tie tooling

Tool for heavy duty plastic cable ties

Cat. no.: WT3D

Characteristics

- Designed for tensioning and cutting heavy-duty cable ties
- Robust metal body with plastic hand-grips

Technical information

- Tool type: Hand tool for Deltec ties, Col-Ty installation ties and other wide cable ties
- For type of cable tie: Plastic ties
- For tie width: 7.6mm - 12.7mm (0.30" - 0.5")
- Features: Tensioning, manual cutting (by twisting the tool)
- Weight: 225g
- Diagrams [L x W x H]: 178 x 112 x 20mm (7.01" x 4.41" x 0.79")

Cable tie tooling

Tool for heavy duty stainless steel cable ties

Cat. no.: DAS250

Characteristics

- Installs Ty-Rap stainless steel cable ties
- Rugged stainless steel construction
- Pistol-type installation tool
- Adjustable tension settings

Technical information

- Tool type: Hand tool
- For type of cable tie: Plastic ties, stainless steel multi-lok, ball lok and roller back lok ties
- For tie width: 7.87mm (0.31")
- Features: Adjustable tension setting, automatic cutting, rugged stainless steel construction, pistol type installation tool
- Weight: 630g

Cable tie tooling

Tools for plastic cable ties

Cat. no.: WT1-TB

Characteristics

- Twist-and-cut tensoning tool in plastic, intended for maintenance and small batch use

Technical information

- Tool type: Low-cost hand tool
- Color: Orange
- For type of cable tie: Plastic ties
- For tie width: 2.4mm - 4.8mm (0.09" x 0.19")
- Features: Basic tensoning, twist cut
- Weight: 28.4g
- Diagrams [L x W x H]: 134 x 55 x 27mm (5.28" x 2.17" x 1.06")

Cat. no.: WT2-TB

Characteristics

- Twist-and-cut tensoning tool in plastic, intended for maintenance and small batch use

Technical information

- Tool type: Low-cost hand tool
- Color: Black
- For type of cable tie: Plastic ties
- For tie width: 4.8mm - 7.6mm (0.19" x 0.30")
- Features: Basic tensoning, twist cut
- Weight: 28.4g
- Diagrams [L x W x H]: 134 x 55 x 27mm (5.28" x 2.17" x 1.06")

Cable tie tooling

Tools for stainless steel ties

Cat. no.: CT1-TB

Characteristics

- Tensioning hook suitable for releasable type, ladder type and strap type stainless steel ties
- Provides extra-leverage for tensioning the ties by hand

Technical information

- Tool type: Hand tool
- For type of cable tie: Releasable type, Ladder type & Strap type stainless steel ties
- Features: Tensioning, no cutting
- Weight: 50g
- Diagrams [L x W x H]: 85 x 106 x 15mm (3.35" x 4.17" x 0.59")

Cat. no.: CT2-TB

Characteristics

- Cable tie tensioner suitable for releasable type, ladder type & strap type ties
- Tensions the ties to their optimum holding power with a simple squeeze: a flick of the wrist and they're locked tight

Technical information

- Tool type: Hand tool
- For type of cable tie: Releasable type, ladder type & strap type stainless steel ties
- For tie width: Up to 12mm (0.47")
- Features: Tensioning, no cutting
- Weight: 300g
- Diagrams [L x W x H]: 195 x 90 x 30mm (7.68" x 3.54" x 1.18")

Cat. no.: WT3S

Characteristics

- A robust metallic hand tool with rubber grips designed for tensioning ladder type & strap type stainless steel ties
- After tensioning, the stainless steel ties can easily be cut with side-cutters

Technical information

- Tool type: Hand tool
- For type of cable tie: Ladder type & strap type stainless steel ties
- For tie width: Up to 12mm (0.47")
- Features: Tensioning, no cutting
- Weight: 225g
- Diagrams [L x W x H]: 178 x 112 x 20mm (7.01" x 4.41" x 0.79")

Cable tie tooling

Tools for stainless steel ties

Cat. no.: CT3

Characteristics

- Cost-effective tensioning tool
- Cut-off by hand-activated lever

Technical information

- Tool type: Hand tool
- For type of cable tie: Ladder type, strap type & ball lock type stainless steel ties, coated and uncoated
- For tie width: Up to 12mm (0.47")
- Features: Tensioning, manual cutting
- Weight: 550g
- Diagrams [L x W x H]: 210 x 155 x 35mm (8.27" x 6.10" x 1.38")

Cat. no.: L-600

Characteristics

- Tensioning tool with twist cut

Technical information

- Tool type: Hand tool
- For type of cable tie: Ball lock type stainless steel ties, coated and uncoated
- For tie width: 4.6 - 7.9mm (0.18" - 0.31")
- Features: Tensioning, manual cutting (by twisting the tool)
- Weight: 600g
- Diagrams [L x W x H]: 200 x 140 x 40mm (7.87" x 5.51" x 1.57")

Cat. no.: CT4-TB

Characteristics

- Bantam tool, suitable for releasable type, ladder type & strap type stainless steel ties
- Unique 3-way handle can be used in various positions. Especially useful in tight areas with minimal access

Technical information

- Tool type: Hand tool
- For type of cable tie: Releasable type, ladder type & strap type stainless steel ties
- Features: Tensioning, manual cutting
- Weight: 1200g
- Diagrams [L x W x H]: 156 x 180 x 80mm (6.14" x 7.09" x 3.15")

Cable tie tooling

Tools for stainless steel ties

Cat. no.: CT5

Characteristics

- Suitable for coated and uncoated ladder type & strap type stainless steel ties
- Adjustable tension settings
- Automatic cutting once desired tension has been reached

Technical information

- Tool type: Tension setting hand tool
- For type of cable tie: Ladder type & strap type stainless steel ties, coated and uncoated
- For tie width: Up to 12mm (0.47")
- Features: Adjustable tension setting, automatic cutting
- Weight: 430g
- Diagrams [L x W x H]: 173 x 158 x 22mm (6.81" x 6.22" x 0.87")

Cat. no.: CT6

Characteristics

- Suitable for coated and uncoated ball-Lock type stainless steel ties
- Adjustable tension settings
- Automatic cutting once desired tension has been reached

Technical information

- Tool type: Tension setting hand tool
- For type of cable tie: Ball-lock type stainless steel ties, coated and uncoated
- For tie width: 4.6 - 7.9mm (0.18" x 0.31")
- Features: Adjustable tension setting, automatic cutting
- Weight: 430g
- Diagrams [L x W x H]: 173 x 158 x 22mm (6.81" x 6.22" x 0.87")

Cat. no.: CT7

Characteristics

- Tensioning and cutting tool, ratchet type
- Suitable for coated and uncoated ball-lock type stainless steel ties, having a width of 12mm and 16mm (0.47" x 0.63")

Technical information

- Tool type: Hand tool, ratchet type
- Weight: 1300g
- Diagrams [L x W x H]: 270 x 170 x 60mm (10.63" x 6.69" x 2.36")

Cat. no.: CT8

Characteristics

- Tensioning and cutting tool, ratchet type
- Suitable for the bands on reel, in all widths
- The long nose leaves an excess of 45mm after the tie is cut, for an easy installation of the band on reel

Technical information

- Tool type: Hand tool, ratchet type
- For type of cable tie: Bands on reel
- For tie width: All widths (up to 19.1mm)
- Weight: 1570g
- Diagrams [L x W x H]: 310 x 200 x 60mm (12.20" x 7.87" x 2.36")

Material specifications

Material selection and specifications

General

There is a number of factors to be considered when choosing the proper materials for a specific environment. It is extremely difficult to provide data on all the possible combinations or conditions that can occur and therefore, it is recommended that this information be used as a guideline and that cable tie samples be tested in the intended application, by the user, to determine suitability.

How to use the table

If your application is in an extremely cold environment, three materials will answer your need: ETFE Fluoropolymer, Polyamide 12 and stainless steel. If you also require high tensile strength, then stainless steel is your best choice. Where high strength is not required, Polyamide 12 might be your choice as it is the less costly.

This information is based on data provided by the manufacturers of the specific materials listed and is provided only as a general guide. No specific recommendation is intended. As each application may vary, testing should be conducted by the user in the intended environment.

Table 1 gives relative performance ratings of the different materials we offer. Chemical resistance is shown in Table 2.

Table 1: Information on cable tie materials

Material code	Polyamide 6.6 weather resistant*		Polyamide 6.6 heat stabilised	Polyamide 6.6 heat stabilised UV resistant	Polyamide 6.6 flame retardant

Guidelines

Material specifications

UL flammability ratings

—
Nylon 6.6 = Polyamide
6.6 is Halogen-free
and Silicone-free.

Flammability ratings for selecting cable ties

Note: Flammability ratings of cable tie materials per UL as follows. These tests for flammability of plastic material are intended to serve as a preliminary indication of acceptability with respect to flammability for particular applications.

UL 94 vertical burn test procedures

Test specimens of the material, with Diagrams 127 x 12.7mm (5"x 1/2"), with the thickness intended for use in the end product, are tested in both the manufactured condition and in the aged state. The test requires that the specimen be supported in a vertical fixture and a precisely controlled flame applied for a 10 second period. The flame is removed and the duration of flaming is noted. If the flame extinguishes, a second exposure to flame for 10 seconds is applied and duration of flaming is again noted. It is observed and recorded whether or not test specimens drip flaming particles that ignite a cotton swab.

Materials classed 94 V-0:

A material classed 94 V-0 shall:

- A. Not have any specimens that burn with flaming combustion for more than 10 seconds after either application of the test flame
- B. Not have a total flaming combustion time exceeding 50 seconds for the 10 flame applications for each set of five specimens
- C. Not have any specimens that burn with flaming or glowing combustion up to the holding fixture
- D. Not have any specimens that drip flaming particles that ignite the dry absorbent surgical cotton located 304.8mm (12") below the test specimen
- E. Not have any specimens with glowing combustion that persists for more than 30 seconds after the second removal of the test flame

Materials classed 94 V-1:

A material classed 94 V-1 shall:

- A. Not have any specimens that burn with flaming combustion for more than 30 seconds after either application of the test flame
- B. Not have a total flaming combustion time exceeding 250 seconds for the 10 flame applications for each set of five specimens
- C. Not have any specimens that burn with flaming or glowing combustion up to the holding fixture

- D. Not have any specimens that drip flaming particles that ignite the dry absorbent surgical cotton located 304.8mm (12") below the test specimen
- E. Not have any specimens with glowing combustion that persists for more than 60 seconds after the second removal of the test flame.

Materials classed 94 V-2:

A material classed 94 V-2 shall:

- A. Not have any specimens that burn with flaming combustion for more than 30 seconds after either application of the test flame
- B. Not have a total flaming combustion time exceeding 250 seconds for the 10 flame applications for each set of five specimens
- C. Not have any specimens that burn with flaming or glowing combustion up to the holding fixture
- D. Be permitted to have specimens that drip flaming particles that burn only briefly, some of which ignite the dry absorbent surgical cotton placed 304.8mm (12") below the test specimen
- E. Not have any specimens with glowing combustion that persists for more than 60 seconds after the second removal of the test flame

UL 94 horizontal burn (HB) test procedures

The test uses a ½ inch x 5 inches (12.7mm x 127mm) specimen held at one end in a horizontal position with marks at 1 inch (25.4mm) and 5 inches (127mm) from the free end. A flame is applied to the free end for 30 seconds or until the flame front reaches the 1 inch (25.4mm) mark. If combustion continues the duration is timed between the 1 inch (25.4mm) mark and the 5 inch (127mm) mark. If combustion stops before the 5 inch (127mm) mark, the time of combustion and the damaged length between the two marks are recorded. A set of three specimens are tested.

Materials classed 94 HB

A material that is less than 0.118 inch (3mm) in thickness will be classified 94HB if it has a burning rate of less than 3 inches (76.2mm) per minute or stops burning before the 5 inches (127mm) mark. If one specimen from the set of three fails to comply, then a second set of three are tested. All three of this second set must comply. HB rated materials are considered "self-extinguishing". This is the lowest (least flame retardant) UL94 rating.

Material specifications

Adhesive material specifications

Installation instructions for self-adhesive mounting bases

- Mounting surfaces should be cleaned with alcohol based (IPA) cleaner before application
- The self-adhesive mounting bases have a double-sided adhesive tape made of synthetic foam, covered by a protecting foil
- To install the self-adhesive mounting base, remove the protecting foil and press the mounting base onto the cleaned surface
- The thickness of the self-adhesive foam (0.8mm) compensates the irregularities of the application surfaces and allows installations on structured surfaces of cabinet doors, on sheet metal, on machines, etc
- The adhesion is achieved immediately during the installation, which means that later repositioning is not possible

surfaces

- UV resistant

Technical information

- Description: 2 component glue
- Weight: 0.21 kg

Installation instructions for Cat. no.:

TC2PA (2 component glue)

- Mounting surfaces should be cleaned before application
- The liquid adhesive in the tube is to be spread onto the mounting surface. It can be used on most rough surfaces (like concrete)
- The activator liquid is then spread onto the surface of the mounting base
- Place the surface of the mounting base in contact with the surface where it has to be mounted, position the mounting base correctly and then press firmly
- Repositioning the mounting base remains possible only for a few seconds
- Do not use the mounting base immediately after installation. The Acrylic-based adhesive requires a set-up time that can be influenced by factors such as temperature (allow 24 - 72 hours for maximum performance)
- Temperature of installation needs to be above +20°C (68°F)

Cat. no.: TC2PA

Characteristics

- 2 component glue
- Consists of one tube each of adhesive and activator
- Easy application
- Stable and durable adhesion
- Applicable on all Polyamide and Aluminium mounting bases and cable clamps
- Also applicable on concrete and other porous

Adhesive material specifications

Property	Method	Unit of measure	Rubber based (self-adhesive)	Acrylic based (2 component glue)

Material specifications

Material selection and specifications

Selecting the right material for your applications

ABB offers cable ties and accessories in a wide variety of materials, each suited for specific environments. The purpose of this document, therefore, is to assist in choosing the best material for a particular application.

The effects of weathering, flame, chemicals, extreme temperatures and radiation on the different materials is clearly presented in tabular form. This will facilitate the choice of the best material for the application.

Having determined the most suitable material, one can choose from the wide variety of cable ties, identification ties, mounting bases, lashing ties, etc., offered by ABB.

Polyamide 6.6

- Thermoplastic material used in cable ties for universal applications in the industry
- Excellent resistance to shocks, chemicals, oils and temperature fluctuations
- High surface hardness and a small coefficient of friction
- Flammability rating: UL 94 V-2
- Halogen free and Silicone free
- Indoor applications
- Ty-Fast ties in standard Polyamide 6.6 are available in natural color and in a wide range of colors
- Ty-Rap ties in standard Polyamide 6.6 are available in natural color only

Material specifications

Note: Nylon (Polyamide) is inherently susceptible to environmental conditions. Polyamide 6.6 cable ties are moisturised to optimum performance levels at machine-side and should be stored in cool dry areas out of direct sunlight. Cable ties are packaged in plastic bags to contain moisture and should remain sealed until ready for use.

Polyamide 6.6, weather resistant

- Similar to Polyamide 6.6, but recommended for outdoor applications
- UV-resistant
- Halogen free and Silicone free
- Ty-Fast ties in weather resistant Polyamide 6.6 are available in black color only (with 2% carbon for military specifications)
- Ty-Rap ties in weather resistant Polyamide 6.6 are available in black color (with 2% carbon for military specifications) and in a wide range of colors (except natural)
- Flammability rating: UL 94 V-2

UV-resistant

Weather-proof

Material specifications

Material selection and specifications

Polyamide 6.6, heat stabilised

- Similar to Polyamide 6.6, but increased operating temperatures, up to 105°C (221°F)
- Excellent tensile strength
- High temperature resistance
- Color: natural (may have a greenish tint)
- Flammability rating: UL 94 V-2

Heat resistant

Polyamide 6.6, flame retardant

- Excellent flammability rating: UL 94 V-0
- Ideal in areas where human life is at risk
- Color: white

Flame retardant

Polyamide 6.6, heat stabilised and UV-resistant

- Similar to Polyamide 6.6, but recommended for outdoor applications and/or high temperature applications, up to 105°C (221°F)
- Combines the features & benefits of Polyamide 6.6, weather resistant and Polyamide 6.6, heat stabilised
- Color: black
- Flammability rating: UL 94 V-2

UV-resistant

Weather-proof

Heat resistant

Polyamide 6.6, detectable

- Similar to Polyamide 6.6, but contains a compound detectable by metal detectors (tested and rated at 1.5mm (0.06") diameter ferrous sphere setting) and X-ray equipment
- Color: bright blue, also contributes to visual detection
- Especially recommend for the food industry, and for any other contamination sensitive industry using detection equipment
- Halogen free and silicone free
- Flammability rating: UL 94 V-2

Detectable

Polyamide 4.6, extra high temperature (150°C)

- Similar to Polyamide 6.6, but outstanding resistance to high temperatures up to 150°C (221°F)
- Halogen free and silicone free
- Color: light green
- Flammability rating: UL 94 V-2

Heat resistant

Polyamide 12, weather resistant

- Extremely flexible, also at low temperatures
- Ages better than Polyamide 6.6
- UV-resistant and weatherproof
- Better chemical resistance than Polyamide 6.6
- Color: black
- Flammability rating: UL 94 V-2

UV-resistant

Weather-proof

Low temperature flexibility

Chemically resistant

Material specifications

Material selection and specifications

Polypropylene, weather resistant

- Resistant against inorganic acids, polyhydric alcohols, neutral and basic salts
- Resists a number of other chemicals
- UV resistant
- Lower tensile strength than Polyamide 6.6
- Color: black
- Flammability rating: UL 94 HB

UV-resistant

Weather-proof

Chemically resistant

Polypropylene, detectable

- Similar to standard Polypropylene, but contains a compound detectable by metal detectors (tested and rated at 1.5mm (0.06") diameter ferrous sphere setting) and X-ray equipment
- Color: bright blue, also contributes to visual detection
- Especially recommend for the food industry, and for any other contamination sensitive industry using detection equipment
- Halogen free and silicone free
- Flammability rating: UL 94 HB

Detectable

ETFE Fluoropolymer

- Tensile strength slightly lower than Polyamide 6.6
- ETFE Fluoropolymer is inert to most solvents and chemicals, hydrolytically stable, UV and weather resistant
- Radiation resistant (meets IEEE383) and approved for nuclear plant use
- Non-outgassing properties for zero gravity applications
- Very high temperature resistance
- Flammability rating: UL 94 V-0
- The best all around plastic material for cable ties
- Color: aquamarine

UV-resistant

Flame retardant

Heat resistant

Low temperature flexibility

Weather-proof

Radiation resistant

Chemically resistant

ECTFE Fluoropolymer

- Similar to ETFE Fluoropolymer in performance
- Outstanding characteristic: lower smoke density when burnt
- Recommended for applications where smoke generation is a concern, such as plenum areas
- Color: maroon
- Flammability rating: UL 94 V-0

UV-resistant

Flame retardant

Heat resistant

Low temperature flexibility

Weather-proof

Low smoke

Chemically resistant

Material specifications

Material selection and specifications

Toughened weatherable acetal

- Excellent resistance to a wide variety of solvents, esters, oils, greases, gasoline and other petroleum hydrocarbons
- Resistant to weak acids and bases
- Excellent resistance to UV (weatherable acetal)
- Limited self-extinguishing properties
- Color: black
- Flammability rating: UL 94 HB

UV-resistant

Weather-proof

Chemically resistant

Heat Reactive Polypropylene

- Material: Polypropylene
- Heat Activation Temperature: 49°C (+/- 3°C) (120.2°F (+/- 3°F))
- Standard Color: Green
- Heat transition color: Translucent (Natural)
- Tensile Strength: 4.8mm (0.19") – 30lb / 7.9mm (0.31") – 60lb
- Operating temperature: -40°C to 80°C (-40°F to 176°F)
- Color transition life: 1,000 hours above heat activation temperature
- UV Resistance: Indoor use only, avoid exposure to UV light
- Installation: 4.8mm (0.19") – ERG50 setting 2 to 5, 7.9mm (0.31") – ERG120 setting 3 to 6
- Warning: Product is a heat indicator only. Use appropriate measuring device to verify temperature.
- Applications: Where visual indication of a hot surface helps identify an unsafe working environment or malfunctioning equipment. May be secured around any surface where normal operation is below 40°C (104°F), such as: piping, electrical circuits, boiler room surfaces, engine compartments, kitchen appliances and anywhere hot surfaces may be a concern.

302/304 Stainless Steel, 316 Stainless Steel

- Superior corrosion resistance
- Excellent tensile strengths at extreme temperatures
- High resistance to chemicals, acids and radiation
- 316 grade has a better resistance to saltwater corrosion and can be supplied with a halogen free coating
- Extensively used in offshore, rail and petrochemical industries

UV-resistant

Flame retardant

Heat resistant

Low temperature flexibility

Weather-proof
