

Electrical Construction Products

Appleton and O-Z/Gedney

A complete selection of industrial location fittings, commercial construction products, cord reels and switches.

EMERSON SUPPLIES LONG-TERM, PRACTICAL AND HIGH QUALITY SOLUTIONS.

Appleton™ and O-Z/Gedney™ products are manufactured to keep you and your job site safe and efficient. Superior design standards and a wide range of options meet the needs of a variety of application driven requirements. From Commercial Fittings, Industrial Location Fittings, and Reels and Switches — Emerson delivers the best products and services along with safe reliable power where you need it.

Emerson provides commercial products that connect your wire and conduit to make electrical installations safer, more productive and more reliable. From industrial grade extension cords and GFCIs to explosion proof, weather protected and special purpose Reelites™, Emerson meets the vast scope of your needs.

Product Safety Statement

The information contained in this catalog is based on our experience to date and is believed to be reliable. All weights and dimensions are approximate. This catalog supersedes and voids all previous literature.

Information in this catalog is subject to change without notice. At times, it may be necessary to modify the materials, finishes, or other components of the product. These modifications will meet or exceed the performance or functional requirements of the product.

Appleton Group designs and manufactures a range of electrical products that meet the electrical codes of different geographic markets. Many of these products are evaluated by internationally recognized third-party product safety testing and certification agencies.

As a safety precaution, users of these products must verify the product is appropriate for their application by consulting the electrical code and safety standards for their area.

Appleton Group products should be installed in accordance with the installation instructions provided with the product and all applicable electrical codes. Additional safety requirements are indicated by appropriate Danger, Warning and Caution statements which follow the suggested format of the American National Standards Institute (ANSI).

These statements are intended to inform not only knowledgeable, sophisticated installers and users, but also those who will have casual contact with the product. Failure to follow this information could result in serious personal injury. Where appropriate these statements may appear on:

1. The product carton
2. The label attached to the product carton
3. The instruction sheet
4. The product itself in a conspicuous manner where physical space allows

Any questions with regard these statements or safety should be addressed to:

Ferrous Cast Metals

The principal cast metals used to manufacture our extensive product line are malleable iron, ductile iron or gray iron.

Malleable Iron

- Malleable Iron has excellent elongation and deformation properties, corrosion resistance and shock absorption during impact. Its castability in thin sections results in a durable impact resistant material.
- Mechanical Properties:
 - ASTM A47, 32510
 - Tensile 50,000 psi
 - Yield 32,500 psi
 - Elongation 10%
 - ASTM A-197,
 - Tensile 40,000 psi
 - Yield 30,000 psi
 - Elongation 5%

Ductile Iron

- Ductile Iron has excellent elongation and deformation properties, corrosion resistance and shock absorption during impact. In heavy sections, ductile iron produces sound, uniform castings in a durable, impact resistant material.
- Mechanical Properties:
 - ASTM A536, 654512
 - Tensile 65,000 psi
 - Yield 45,000 psi
 - Elongation 12%

Grayloy®

- Gray Iron has good corrosion resistance, excellent wear resistance and high vibration damping capacity. Yield and elongation properties are compensated with heavy wall sections.
- Mechanical Properties:
 - ASTM A-48, Class 25
 - Tensile 25,000 psi
 - ASTM A-42, Class 30
 - Tensile 30,000 psi
 - ASTM A-48, Class 45
 - Tensile 45,000 psi
- Note: The yield and elongation of gray iron is not specified because it is not a significant property of this metal.

Finish (all Ferrous Cast Metals)

- To enhance the corrosion resistance of the base ferrous metals, each product is coated with one of the following processes:
 - Zinc electroplate (also referred to as “electrogalvanize”)
 - Mechanical galvanize
 - Hot-dip galvanize
- Corrosion resistance is a function of the thickness of the protective coating of zinc over the base ferrous metal. In short, the thicker the coating, the longer the coating will remain in place to protect the base metal. Appleton offers an enhanced measure of corrosion protection through the mechanical or hot-dip galvanize method which is standard on many products.
- The minimum thickness of these unique coatings follows:
 - Zinc electroplate per UL 514B:
 - Steel (inside a box) = 00015” or 3.8 microns
 - Steel (outside a box) = 0005” or 12.5 microns
 - Iron = 00015” or 3.8 microns
 - Mechanical Galvanize = .002” or 50 microns per ASTM B695
 - Hot Dip Galvanize = .002” or 0 microns per ASTM A123.

Non-Ferrous Cast Metals

Aluminum

- Copper-free aluminum (maximum 4/10 of 1% copper) provides good corrosion resistance in a lightweight durable material.
- Mechanical Properties:
 - ASTM B26, 712.0
 - Tensile 34,000 psi
 - Yield 25,000 psi
 - Elongation 5%
 - ATSM B26, 535.0
 - Tensile 40,000 psi
 - Yield 21,000 psi
 - Elongation 13%
 - ASTM B179, A360.1
 - Tensile 46,000 psi
 - Yield 24,000 psi
 - Elongation 3.5%
 - ASTM B26,319.0
 - Tensile 27,000 psi
 - Yield 18,000 psi
 - Elongation 2%
 - ATSM B179, A413.1
 - Tensile 42,000 psi
 - Yield 19,000 psi
 - Elongation 3.5%

Aluminum Finish

- Most aluminum products have an aluminum enamel finish or a gray vinyl enamel applied over a zinc chromate wash primer.

Copper Alloys

- Copper alloys provide excellent corrosion resistance and electrical and thermal conductivity.
- Mechanical Properties:
 - CDA83600
 - Tensile 37,000 psi
 - Yield 17,000 psi
 - Elongation 30%
- Note: CDA = Copper Development Association

Copper Alloy Finish

- Copper Alloys are inherently corrosion resistant and do not require secondary protective coatings.
- Power conducting and grounding products made with copper alloys may require a tin electroplate for use with aluminum conductors (CU-AL).

Zinc Alloys

- Zinc die cast fittings are manufactured from Zamak #3 zinc alloy.

Zinc Alloy Finish

- Zinc Diecast fittings produced with Zamak #3 alloy do not require a secondary protective coating.

Cast Stainless Steel

- Grade 304
- Mechanical Properties:
 - Tensile 89,900 psi
 - Yield 47,900 psi
 - Elongation 62%

Duct Sealing Compound

Form 35™ Malleable Iron Conduit Outlet Bodies, Covers and Gaskets

For use with Rigid Steel, Rigid Aluminum and IMC Conduit.

NEC/CEC — Suitable for use in the following
Hazardous Locations:
Class I, Division 2 per NEC 501.10(B)(4)

Applications

- Serve as pulling fittings.
- Make bends in conduit system.
- Provide openings for splicing.
- Connect and change direction of conduit runs.
- Allow connections for branch runs.
- Permit access to conductors for maintenance.

Features

- Smooth, rounded integral bushings in hubs protect conductor insulation.
- Accurately tapped, tapered threads for tight, rigid joints and excellent ground continuity.
- Form 35™ malleable iron Unilets™: high tensile strength and ductility. High corrosion-resistance, high impact and shock resistance.
- Exclusive built-in easy-pulling rollers in type C (1-1/4" thru 4") and type LB (1-1/4" thru 4"): eliminate damage when cable is pulled through hubs.
- Sizes with flat-back design ideal where fitting is mounted flat against surface.
- 1/2" to 3" blank covers are domed for extra wiring space.
- Raintight when an Appleton™ cover and gasket are installed.

Standard Materials

- Bodies: malleable iron
- Blank covers: malleable iron, steel or aluminum
- Cover screws: stainless steel
- Gaskets: neoprene or composition fiber

Standard Finishes

- Malleable iron bodies and covers: triple-coat — (1) zinc electroplate, (2) chromate, and (3) epoxy powder coat
- Steel covers: zinc electroplate

NEC/CEC Certifications and Compliances

- UL Standards: 514A, 514B
- UL Listed: E2527
- CSA Standard: C22.2 No. 18.3
- CSA Certified: 065183
- NEMA Standard: FB-1

Related Products

- For explosionproof conduit outlet bodies and boxes, see *Enclosures and Junction Boxes in Protection and Control of Electrical Apparatus and Circuits Catalog*.

Form 35™ Malleable Iron Conduit Outlet Bodies, Covers and Gaskets

Threaded Type for use with Rigid Metal Conduit and IMC; Compression Type for use with Threadless Rigid Metal Conduit.

NEC/CEC — Suitable for use in the following
Hazardous Locations:
Class I, Division 2 per NEC 501.10(B)(4)

Threaded Type Dimensions in Millimeters (Inches)

Types A, C, TA, TB

Types E, LB, LL, LR, LRL

Types T, X

Spec 5 Conduit Bodies, Covers and Gaskets

For Rigid Conduit and IMC

NEC/CEC — Suitable for use in the following
Hazardous Locations:
Class I, Division 2 per NEC 501.10(B)(4)

Applications

- Serve as pulling fittings.
- Make bends in conduit system.
- Provide openings for splicing.
- Connect and change direction of conduit runs.
- Allow connections for branch runs.
- Permit access to conductors for maintenance.

Features

- Smooth, rounded integral bushings in hubs protect conductor insulation.
- Accurately tapped, tapered threads for tight, rigid joints and excellent ground continuity.
- Form 35™ malleable iron Unilets™: high tensile strength and ductility. High corrosion-resistance, high impact and shock resistance.
- Exclusive built-in easy-pulling rollers in type C (1-1/4" thru 4") and type LB (1-1/4" thru 4"): eliminate damage when cable is pulled through hubs.
- Sizes with flat-back design ideal where fitting is mounted flat against surface.
- 1/2" to 3" blank covers are domed for extra wiring space.
- Raintight when an Appleton™ cover and gasket are installed.

Standard Materials

- Bodies: malleable iron
- Blank covers: malleable iron, steel or aluminum
- Cover screws: stainless steel
- Gaskets: neoprene or composition fiber

Standard Finishes

- Malleable iron bodies and covers: triple-coat — (1) zinc electroplate, (2) chromate, and (3) epoxy powder coat
- Steel covers: zinc electroplate

Options

- For additional corrosion protection, specify Hot Dip Galvanized: add suffix -G to Malleable Iron Catalog Number.

NEC/CEC Certifications and Compliances

- UL Standards: 514A, 514B
- UL Listed: E2527
- CSA Standard: C22.2 No. 18.3
- CSA Certified: 065183
- NEMA Standard: FB-1

Related Products

- For explosionproof conduit outlet bodies and boxes, see *Enclosures and Junction Boxes in Protection and Control of Electrical Apparatus and Circuits Catalog*.

Spec 5 Conduit Bodies, Covers and Gaskets

For Rigid Conduit and IMC

NEC/CEC — Suitable for use in the following
Hazardous Locations:
Class I, Division 2 per NEC 501.10(B)(4)

Applications

- To provide access to conductors for pulling, splicing, maintenance and future changes/ upgrades.
- Allows connection of straight conduit runs, branch conduit runs and 90° bends.
- Conduit bodies are suitable for use in Class I, Division 2 hazardous locations per NEC Section 501-4(B).

Features

- Tapered threaded hubs (NPT).
- Packaged complete with cover and gasket under one catalog number.
- Ready to use.
- Raintight when a cover and gasket are installed.

Standard Materials

- Bodies: malleable iron
- Cover - Type BS steel
- Gasket - Type SGN neoprene

Standard Finishes

- Malleable iron bodies and covers: triple-coat — (1) zinc electroplate, (2) chromate, and (3) epoxy powder coat
- Covers: zinc electroplated

NEC/CEC Certifications and Compliances

- UL Standard: 514A
- UL Listed: E-18095
- CSA Standard: C22.2 No. 18
- CSA Certified: 009795
- Fed Spec: A-A-50563
- NEMA: FB-1, FB-2.10

OZGEDNEY

COMMERCIAL AND INDUSTRIAL FITTINGS: CONDUIT BODIES

FM7™ Conduit Outlet Bodies, Covers and Gaskets

For use with Rigid Steel, Rigid Aluminum and IMC Conduit.

NEC/CEC — Suitable for use in the following
Hazardous Locations:
Class I, Division 2 per NEC 501.10(B)(4)

Applications

- Serve as pulling fittings.
- Make bends in conduit system.
- Provide openings for splicing.
- Connect and change direction of conduit runs.
- Allow connections for branch runs.
- Permit access to conductors for maintenance.

Features

- Smooth, rounded integral bushings in hubs protect conductor insulation.
- Accurately tapped, tapered threads for tight, rigid joints and excellent ground continuity.
- Wedge-Lok™ Form-IN-Place covers with integral gasket are approved for use in wet locations. Grayloy-iron bodies with cast covers and gasket are approved for use in wet locations.
- Unique Wedge-Lok™ clip cover design allows easy removal at any later time, without damaging the conduit body. The cover is secured with clips, not screws.
- Completely interchangeable with Crouse-Hinds™ Form 7™ + bodies, gaskets and covers. Equivalent FM7™ and Form 7™ units have identical applications and installation dimensions.
- Flat back design provides greater cubic content for easier wire pulling, and more room for splicing. Fits flush and snug against flat surfaces for more stable installation.
- Smooth hub bushings and cover openings protect conductor insulation. Smooth hub openings allow easy conduit joining.
- Pan-head cover screws secure cover clips and provide superior screwdriver seating and torque. Cover screws and clips are captive to prevent loss.
- Hub size, body style, compliance data, maximum wire number/size and cubic capacity molded into body.

Standard Materials

- Body: Grayloy-iron or copperfree (4/10 of 1% max.) aluminum
- Covers: Grayloy-iron, copperfree (4/10 of 1% max.) aluminum or steel
- Cover screws: stainless steel

Standard Finishes

- Grayloy-iron bodies and covers: triplecoat — (1) zinc electroplate, (2) chromate, and (3) epoxy powder coat
- Cast aluminum bodies and covers: epoxy powder coat
- Steel covers: zinc electroplate
- Stamped aluminum covers: natural finish

Options

- PVC coating available on select bodies and covers. Add suffix -PVC to catalog number.

NEC/GEC Certifications and Compliances

- UL Standard: 514A , 514B
- UL Listed: E2527
- CSA Standard: C22.2 No. 18.3
- CSA Certified: 065183
- NEMA Standard: FB-1

COMMERCIAL AND INDUSTRIAL FITTINGS: CONDUIT BODIES

FM7™ Conduit Outlet Bodies, Covers and Gaskets

FM7™ Covers with Integral Form-In-Place Gasket.

NEC/CEC:
Class I, Division 2
NEMA 3R

Applications

- Cover with integral gasket for FM7™ conduit bodies.
- Can be used as replacement covers for installed bodies or in new installations.

Features

- Benefit from superior sealing, reduced inventory parts and faster installation times.
- Captive pan-head screws.
- Wedge-Lok™ clips (FM7™ only) provide superior screwdriver torque and cover seating.
- High-strength, corrosion and weather resistant.
- Approved for wet locations.
- Fits all body configurations and sizes from 1/2" thru 4".
- Operating temperature: -54 °C to +150 °C (-65 °F to +302 °F).

Standard Materials

- Stamped steel
- Stamped aluminum
- Cast grayloy-iron
- Cast aluminum
- Gasket - Urethane

NEC/CEC Certifications and Compliances

Form 7™ Iron Conduit Bodies, Covers and Gaskets

For use with Rigid Steel, Rigid Aluminum and IMC Conduit.

NEC/CEC — Suitable for use in the following
Hazardous Locations:
Class I, Division 2 per NEC 501.10(B)(4)

Applications

- Serve as pulling fittings.
- Make bends in conduit system.
- Provide openings for splicing.
- Connect and change direction of conduit runs.
- Allow connections for branch runs.
- Permit access to conductors for maintenance.

Features

- Smooth, rounded integral bushings in hubs protect conductor insulation.
- Accurately tapped, tapered threads for tight, rigid joints and excellent ground continuity.
- Wedge-Lok™ Form-IN-Place covers with integral gasket are approved for use in wet locations. Grayloy-iron bodies with cast covers and gasket are approved for use in wet locations.
- Unique Wedge-Lok™ clip cover design allows easy removal at any later time, without damaging the conduit body. The cover is secured with clips, not screws.
- Completely interchangeable with Crouse-Hinds † Form 7™ † bodies, gaskets and covers. Equivalent FM7™ and Form 7™ units have identical applications and installation dimensions.
- Flat back design provides greater cubic content for easier wire pulling, and more room for splicing. Fits flush and snug against flat surfaces for more stable installation.
- Smooth hub bushings and cover openings protect conductor insulation. Smooth hub openings allow easy conduit joining.
- Pan-head cover screws secure cover clips and provide superior screwdriver seating and torque. Cover screws and clips are captive to prevent loss.
- Hub Size (inches), body style, compliance data, maximum wire number/size and cubic capacity molded into body.

Standard Materials

- Body: Grayloy-iron or copperfree (4/10 of 1% max.) aluminum
- Covers: Grayloy-iron, copperfree (4/10 of 1% max.) aluminum or steel
- Cover screws: stainless steel

Standard Finishes

- Grayloy-iron bodies and covers: triplecoat — (1) zinc electroplate, (2) chromate, and (3) epoxy powder coat
- Steel covers: zinc electroplate
- Stamped aluminum covers: natural finish

NEC/CEC Certifications and Compliances

- UL Standard: 514A
- UL Listed: E-18095
- CSA Standard: C22.2 No. 18
- CSA Certified: 009795
- Fed. Spec: A-A-50563
- NEMA Standard: FB-1, FB-2.10

COMMERCIAL AND INDUSTRIAL FITTINGS: CONDUIT BODIES

Form 7™ Iron Conduit Bodies, Covers and Gaskets

Form 7™ Covers with Integral Form-In-Place Gasket.

NEC/CEC:
Class 1, Division 2
NEMA 3R

Applications

- Cover with integral gasket for FM7™ conduit bodies.
- Can be used as replacement covers for installed bodies or in new installations.

Features

- Benefit from superior sealing, reduced inventory parts and faster installation times.
- Captive pan-head screws.
- Wedge-Lok™ clips (FM7™ and Form 7™ only) provide superior screwdriver torque and cover seating.
- High-strength, corrosion and weather resistant.
- Approved for wet locations.
- Fits all body configurations and sizes from 1/2" thru 4".
- Operating temperature: -54 °C to +150 °C (-65 °F to +302 °F).

Standard Materials

- Stamped steel
- Stamped aluminum
- Cast grayloy-iron
- Cast aluminum
- Gasket - Urethane

NEC/CEC Certifications and Compliances

- UL Listed: E2527
- CSA Certified: 65183, Class 4413-02

FM8™ Conduit Outlet Bodies, Covers and Gaskets

For use with Rigid Steel, Rigid Aluminum and IMC Conduit.

NEC/CEC — Suitable for use in the following
Hazardous Locations:
Class I, Division 2 per NEC 501.10(B)(4)

Applications

- Serve as pulling fittings.
- Make bends in conduit system.
- Provide openings for splicing.
- Connect and change direction of conduit runs.
- Allow connections for branch runs.
- Permit access to conductors for maintenance.

Features

- Smooth, rounded integral bushings in hubs protect conductor insulation.
- Accurately tapped, tapered threads for tight, rigid joints and excellent ground continuity.
- Completely interchangeable with Crouse-Hinds⁺ Form 8™⁺ bodies, gaskets and covers. Equivalent FM8™ and Form 8™ units have identical applications and installation dimensions.
- Flat back design provides greater cubic content for easier wire pulling, and more room for splicing. Fits flush and snug against flat surfaces for more stable installation.
- Covers with gaskets are approved for use in wet locations.
- Smooth hub bushings and cover openings protect conductor insulation. Smooth hub openings allow easy conduit joining.

Standard Materials

- Bodies: grayloy-iron
- Covers: cast grayloy-iron or stamped steel
- Cover screws: stainless steel
- Gaskets: neoprene

Standard Finishes

- Grayloy-iron bodies and covers: triplecoat — (1) zinc electroplate, (2) chromate, and (3) epoxy powder coat
- Steel covers: zinc electroplate

Options

- PVC coating available on all bodies and select covers. Add suffix **-PVC** to catalog number.

NEC/CEC Certifications and Compliances

- UL Standard: 514A, 514B
- UL Listed: E2527
- CSA Standard: C22.2 No. 18.3
- CSA Certified: 065183
- NEMA Standard: FB-1

Related Products

- For explosionproof conduit outlet bodies and boxes, see *Enclosures and Junction Boxes*.

FM8™ Conduit Outlet Bodies, Covers and Gaskets

FM8™ Covers with Integral Form-In-Place Gasket.

NEC/CEC:
Class I, Division 2
NEMA 3R

Applications

- Cover with integral gasket for FM8™ conduit bodies.
- Can be used as replacement covers for installed bodies or in new installations.

Features

- Benefit from superior sealing, reduced inventory parts and faster installation times.
- Captive pan-head screws.
- High-strength, corrosion and weather resistant.
- Approved for wet locations.
- Fits all body configurations and sizes from 1/2" thru 4".
- Operating temperature: -54 °C to +150 °C (-65 °F to +302 °F).

Standard Materials

- Stamped steel
- Cast grayloy-iron
- Gasket - Urethane

NEC/CEC Certifications and Compliances

- UL Standard: 514A
- UL Listed: E2527
- CSA Standard: C22.2 No. 18.3
- CSA Certified: 065183
- NEMA Standard: FB-1

COMMERCIAL AND INDUSTRIAL FITTINGS: CONDUIT BODIES

Form 85™ Unilets™ Conduit Outlet Bodies, Covers and Gaskets

For use with Rigid Steel, Rigid Aluminum, IMC, and EMT Conduit.

NEC/CEC — Suitable for use in the following
Hazardous Locations:
Class I, Division 2 per NEC 501.10(B)(4)

Applications

- Serve as pulling fittings.
- Make bends in conduit system.
- Provide openings for splicing.
- Connect and change direction of conduit runs.
- Allow connections for branch runs.
- Permit access to conductors for maintenance.

Features

- Roomy interiors: more wiring space.
- Smooth, rounded integral bushings in hubs protect conductor insulation.
- Accurately tapped, tapered threads for tight, rigid joints and excellent ground continuity.
- Form 85 copperfree aluminum Unilets™ are lightweight, self-oxidizing, self-renewing and offer a high corrosion resistance.
- Lightweight aluminum facilitates shipping, handling and installing.
- Sizes with flat-back design ideal where fitting is mounted flat against surface.
- 1/2" to 3" blank covers are domed for extra wiring space.
- Raintight when a cover and gasket are installed.

Standard Materials

- Bodies: copperfree (max. 4/10 of 1%) aluminum
 - 1/2" thru 2": pressure cast
 - 2-1/2" thru 4": sand cast
- Blank covers: malleable iron, steel or aluminum
- Cover screws: stainless steel
- Gaskets: neoprene or composition fiber

Standard Finishes

- Aluminum bodies: epoxy powder coat
- Stamped aluminum covers: natural finish
- Cast aluminum covers: epoxy powder coat

Options

- PVC coating available on all threaded bodies and select covers.
Add suffix **-PVC** to catalog number.

NEC/CEC Certifications and Compliances

- UL Standards: 514A, 514B
- UL Listed: E2527
- CSA Standard: C22.2 No. 18.3
- CSA Certified: 065183
- NEMA Standard: FB-1

Related Products

- For explosionproof conduit outlet bodies and boxes, see *Enclosures and Junction Boxes in Protection and Control of Electrical Apparatus and Circuits Catalog*.

Conduit Body with Stamped Aluminum Cover. 2" Type C shown.

Typical Form 85 Conduit Bodies with Setscrews.
For use with Electrical Metallic Tubing (EMT).

Form 85™ Unilets™ Conduit Outlet Bodies, Covers and Gaskets

Threaded Type for use with Rigid Metal Conduit and IMC; Setscrew Type for use with Electrical Metallic Tubing (EMT).

NEC/CEC — Suitable for use in the following
Hazardous Locations:
Class I, Division 2 per NEC 501.10(B)(4)

Form 85™ Unilets™ Conduit Outlet Bodies, Covers and Gaskets

For Rigid Conduit & IMC.

NEC/CEC — Suitable for use in the following
Hazardous Locations:
Class I, Division 2 per NEC 501.10(B)(4)

Applications

- To provide access to conductors for pulling, splicing, maintenance and future changes/ upgrades.
- Allows connection of straight conduit runs, branch conduit runs and 90° bends.

Features

- Tapered threaded hubs (NPT).
- Packaged complete with cover and gasket under one Catalog Number.
- Ready to use.

Standard Materials

- Conduit Body - copperfree (max. 4/10 of 1%) aluminum
- Cover - **Type BS** Aluminum
- Gasket - **Type SGN** Neoprene

Standard Finishes

- Conduit Body - epoxy powder coat enamel

NEC/CEC Certifications and Compliances

- UL Standards: 514A
- UL Listed: E-18095
- CSA Standard: C22.2 No. 18
- CSA Certified: LR-9795
- NEMA Standard: FB-1, FB-2.10

Aluminum Conduit Bodies, Covers and Gaskets

For Rigid Conduit & IMC.

NEC/CEC — Suitable for use in the following
Hazardous Locations:
Class I, Division 2 per NEC 501.10(B)(4)

Applications

- To provide access to conductors for pulling, splicing, maintenance and future changes/upgrades.
- Allows connection of straight conduit runs, branch conduit runs and 90° bends.

Features

- Tapered threaded hubs (NPT).
- Raintight when used with gasketed covers.
- Internal volume and maximum wire clearly marked on castings.

Standard Materials

- Bodies: copperfree (max. 4/10 of 1%) aluminum
 - 1/2" thru 2": pressure cast
 - 2-1/2" thru 4": sand cast
- Blank covers: malleable iron, steel or aluminum
- Cover screws: stainless steel
- Gaskets: neoprene or composition fiber

Standard Finishes

- Aluminum bodies: epoxy powder coat
- Stamped aluminum covers: natural finish
- Cast aluminum covers: epoxy powder coat

NEC/CEC Certifications and Compliances

- UL Standards: 514A
- UL Listed: E-18095w
- CSA Standard: C22.2 No. 18
- CSA Certified: 009795
- NEMA Standard: FB-1, FB-2.10

COMMERCIAL AND INDUSTRIAL FITTINGS: CONDUIT BODIES

Aluminum Conduit Bodies, Covers and Gaskets

For Rigid Conduit & IMC.

*NEC/CEC — Suitable for use in the following
Hazardous Locations:
Class I, Division 2 per NEC 501.10(B)(4)*

Applications

- To provide access to conductors for pulling, splicing, maintenance and future changes/ upgrades.
- Allows connection of straight conduit runs, branch conduit runs and 90° bends.

Features

- Tapered threaded hubs (NPT).
- Packaged complete with cover and gasket under one Catalog Number.
- Ready to use.

Standard Materials

- Conduit Body - copperfree (max. 4/10 of 1%) aluminum
- Cover - **Type BS** Aluminum
- Gasket - **Type SGN** Neoprene

Standard Finishes

- Conduit Body - epoxy powder coat enamel

NEC/CEC Certifications and Compliances

- UL Standards: 514A
- UL Listed: E-18095
- CSA Standard: C22.2 No. 18
- CSA Certified: LR-9795
- NEMA Standard: FB-1, FB-2.10

Aluminum Conduit Bodies, Covers and Gaskets

Set Screw Type for EMT (Thinwall Conduit).

NEC/CEC — Suitable for use in the following
Hazardous Locations:
Class I, Division 2 per NEC 501.10(B)(4)

Applications

- To provide access to conductors for pulling, splicing, maintenance and future changes/ upgrades.
- Allows connection of straight conduit runs, branch conduit runs and 90° bends.

Features

- Slotted hex head steel hardened cup-point set screw for EMT.
- Internal volume and maximum wire clearly marked on castings.

Standard Materials

- Diecast copperfree (max. 4/10 of 1%) aluminum

Standard Finishes

- Aluminum enamel

COMMERCIAL AND INDUSTRIAL FITTINGS: CONDUIT BODIES

FM9™ Aluminum Conduit Outlet Bodies, Covers and Gaskets

For use with Rigid Steel, Rigid Aluminum and IMC.

NEC/CEC — Suitable for use in the following

Hazardous Locations:

Class I, Division 2 per NEC 501.10(B)(4)

Applications

- Serve as pulling fittings.
- Make bends in conduit system.
- Provide openings for splicing.
- Connect and change direction of conduit runs.
- Allow connections for branch runs.
- Permit access to conductors for maintenance.

Features

- Roomy interiors: deep body cavity provides increased volume allowing higher wiring capacity.
- Smooth, rounded integral bushings in hubs protect conductor insulation.
- Accurately tapped, tapered threads for tight, rigid joints and excellent ground continuity.
- Completely interchangeable with Crouse-Hinds[†] Mark9[†] bodies, gaskets and covers. Equivalent FM9™ and Mark9[†] units have identical applications and installation dimensions.
- Seven body styles available in 1/2" thru 4" sizes, TB's in 1/2" thru 2" and X's in 1/2" thru 1".
- Aluminum Unilets™: produced from a high-strength copperfree aluminum alloy, for light weight and high corrosion resistance.
- FM9™ covers with integral gasket are approved for use in wet locations.
- Covers are domed for extra wiring space.
- Smooth hub bushings and cover openings protect conductor insulation. Smooth hub openings allow easy conduit joining.
- Stainless steel pan-head cover screws secure cover to body and provide superior screwdriver seating and torque. Cover screws are captive to prevent loss in sizes 1/2" thru 2".
- Hub size, body style, compliance data, maximum wire number/size and cubic capacity molded into body.

Standard Materials

- Conduit bodies: copperfree (4/10 of 1% max.) aluminum
- Covers: stamped copperfree (4/10 of 1% max.) aluminum
- Cover screws: stainless steel
- Gaskets: neoprene

Standard Finishes

- Conduit bodies, covers and screws: natural

Options

- PVC coating available on all bodies and select covers. Add suffix **-PVC** to catalog number.

NEC/CEC Certifications and Compliances

- UL Standards: 514A, 514B
- UL Listed: E2527
- CSA Standard: C22.2 No. 18.3
- CSA Certified: 065183
- NEMA Standard: FB-1

FM9™ Aluminum Conduit Outlet Bodies, Covers and Gaskets

FM9™ Cover with Integral Form-In-Place gasket.

NEC/CEC:
Class I, Division 2
NEMA 3R

Applications

- Cover with integral gasket for FM9 conduit bodies.
- Can be used as replacement covers for installed bodies or in new installations.

Features

- Benefit from superior sealing, reduced inventory parts and faster installation times.
- Captive pan-head screws.
- High-strength, corrosion and weather resistant.
- Approved for wet locations.
- Fits all body configurations and sizes from 1/2" thru 4".
- Operating temperature: -54 °C to +150 °C (-65 °F to +302 °F).

Standard Materials

- Stamped aluminum
- Gasket - Urethane

NEC/CEC Certifications and Compliances

- UL Standard: 514A
- UL Listed: E2527
- CSA Standard: C22.2 No. 18.3
- CSA Certified: 065183
- NEMA Standard: FB-1

NEC 6x8x C, LB, UB, LL, LR and T Mogul Conduit Outlet Bodies, Covers and Gaskets

For use with Threaded Rigid Metal Conduit and IMC. Complete with Assembled Cover and Neoprene Gasket.

NEC/CEC — Suitable for use in the following
Hazardous Locations:
Class I, Division 2 per NEC 501.10(B)(4)

Applications

- Larger body size facilitates pulling of large and heavy conductors. Specially designed raised cast covers provide additional wiring area.
- Mogul Unilets™ for pulling straight, 45° or 90° angle turns and/or making taps and splices.

Features

- Exclusive built-in rollers facilitate cable pulling. Available on NEC 6x8x Series Moguls (C, LB and UB) in sizes 1-1/4" and up.
- Smooth, rounded integral bushing in each hub protects conductor insulation.
- Accurately tapped, tapered threads for tight, rigid joints and ground continuity.
- Covers have captive stainless steel screws to speed installation, prevent "freezing" of screws.
- LB and UB Moguls
 - Length Requirement: distance between centerline of each hub bushing (conduit stop) exceeds six times the trade diameter of the conduit per NEC 314.28(A)(2).
 - Bending Space Requirement: these moguls also meet the NEC 314.28(A)(2) Exception requirement spelled out in NEC 312.6(A) Table.
- C Moguls
 - Length Requirement: distance between centerline of each hub bushing (conduit stop) exceeds eight times the trade diameter of the conduit per NEC 314.28(A)(1).
 - Bending Space Requirement: not applicable.
- LL and LR Moguls
 - Like LB moguls, these moguls have an end hub.
 - The second hub is in the side (LL left and LR right) instead of the back.
- T Moguls
 - These are like "C" moguls (1" thru 4"), except with an additional middle side hub.
 - Distance between the centerline of each "C" hub conduit stop exceeds eight times the trade diameter of the conduit per NEC 314.28(A)(1). ①

Standard Materials

- Bodies and covers: malleable iron or copperfree (4/10 of 1% max.) aluminum
- Gaskets: neoprene
- Screws: stainless steel

Standard Finishes

- Malleable iron bodies and covers: triple-coat — (1) zinc electroplate, (2) chromate and (3) epoxy powder coat
- Aluminum bodies and covers: epoxy powder coat

NEC/CEC Certifications and Compliances

- UL Standard: 514B
- UL Listed: E2527
- CSA Standard: C22.2 No. 18.3
- CSA Certified: 065183
- NEMA Standard: FB-1

C Type NEC 8x

LB Type 1" – 2"

LB Type 2-1/2" – 4"
NEC 6x

UB Type NEC 6x

LR Type NEC 6x

LL Type NEC 6x

T Type NEC 8x

Rollers make cable-pulling easier, eliminate insulation damage

① If less than maximum conductors permitted by NEC are used, smaller wires may be used additionally through "LL", "LR" or "T" hubs. If large conductors are required to be bent in "LL", "LR" or "T" direction, order junction boxes instead. See Enclosures and Junction Boxes.

Compliances with NEC Bending Space Requirements

Bending Space Defined
NEC 314.28(A)(2) Exception.
This article applies to LB and UB Moguls, defines bending space and refers to NEC 312.6(B) Table as guideline for determining minimum bending space distance. Bending space is illustrated as Dimension "A" below:

LB Mogul 1" – 2"

LB Mogul 2-1/2" – 4"

UB Mogul 1" – 4"

Bending Space of Moguls (Dim. "A" in sketches at left)		
Mogul Size	Type	Distance
1	LB, UB	2-1/2"
1-1/4	LB, UB	3-1/2"
1-1/2	LB, UB	4"
2	LB, UB	5"
2-1/2	LB, UB	6"
3	LB, UB	8"
3-1/2	LB, UB	8"
4	LB, UB	10"

NOTE ON RADIUS TABLE: Secure cable or wire bending radius from manufacturer. Then select a mogul having this radius or more. If radius is 6-1/4", an LB 2-1/2" mogul or BUB 1-1/2" mogul is suitable.

NOTE ON NEC 312.6(B) TABLE: Because cable sizes vary, table is limited to single wire sizes. Use as guideline only for cable sizes.

Minimum Wire Bending Space
NEC 312.6(B) Table: The applicable portion of this table is shown below. Only the "1 Wire Per Terminal" column is retained, because the others are not applicable.
Example for using table below and table at right:
350MCM wire size requires 5" bending space. A 2" LB or UB Appleton™ Mogul is suitable.

AWG or Circular-Mill. Size of Wire	1 Wire per Terminal Min. Bending Space
14-10	Not Specified
8-6	1-1/2"
4-3	2"
2	2-1/2"
1	3"
0-00	3-1/2"
000-0000	4"
250 MCM	4-1/2"
300-350 MCM	5"
400-500 MCM	6"
600-700 MCM	8"
750-900 MCM	8"
1,000-1,250 MCM	10"
1,500-2,000 MCM	12"

NEC 6x8x C, LB, UB, LL, LR and T Mogul Conduit Outlet Bodies, Covers and Gaskets

For use with Threaded Rigid Metal Conduit and IMC. Complete with Assembled Cover and Neoprene Gasket.

NEC/CEC — Suitable for use in the following Hazardous Locations:
Class I, Division 2 per NEC 501.10(B)(4)

Applicable NEC References for C, LB and UB Moguls

- Straight Pull Length Requirements:** NEC 314.28(A)(2)— C Moguls "... shall not be less than eight times the trade diameter of the largest raceway." (See table at right.)
- Angle or U Pull Length Requirements:** NEC 314.28(A)(2)— LB, UB Moguls "The distance between each raceway entry inside the box and the opposite wall of the box shall not be less than six times the trade diameter of the largest raceway." (See next page.)
- Bending-Space Requirements:** NEC 314.28(A)(2). Exception 312.6(A) Table— LB, UB Moguls "Where a conduit or cable entry is in the wall of a box or conduit body opposite to a removable cover." (See dim. "A", table right)
- Length and Bending Space Requirements:**

C Mogul— 1" thru 4"

LB Mogul— 1" thru 2"

LB Mogul— 2-1/2" thru 4"

UB Mogul— 1" thru 4"

BENDING SPACE EXAMPLE: LB with 3" hubs (Cat. No. BLB300-M) using 500 MCM wire with four conductors.

Table on next page shows that, in this example, NEC requires a bending space of 6" and that the Appleton™ 3" LB provides a bending space of 8".

Mogul Conduit Bodies, Covers and Gaskets

For Rigid Conduit and IMC

NEC/CEC — Suitable for use in the following
Hazardous Locations:
Class I, Division 2 per NEC 501.10(B)(4)

Applications

- To provide access to large and heavy conductors for pulling, splicing, maintenance and future changes / upgrades
- Allows connection of straight conduit runs, branch conduit runs and 90° bends.

Features

- Roomy interiors: more wiring space.
- Smooth, rounded integral bushings in hubs protect conductor insulation.
- Accurately tapped, tapered threads for tight, rigid joints and excellent ground continuity.
- Form 85 copperfree aluminum Unilets™ are lightweight, self-oxidizing, self-renewing and offer a high corrosion resistance.
- Lightweight aluminum facilitates shipping, handling and installing.
- Sizes with flat-back design ideal where fitting is mounted flat against surface.
- 1/2" to 3" blank covers are domed for extra wiring space.

Standard Materials

- Malleable iron
- Chromate
- Copperfree (4/10 of 1% max.) aluminum
- Gaskets: neoprene
- Cover screws: stainless steel

Standard Finishes

- Zinc electroplated
- Epoxy powder coat

Options

- For additional corrosion protection, specify Hot Dip Galvanized: add suffix **-G** to Malleable Iron Catalog Number.

NEC/CEC Certifications and Compliances

- UL Standard: 514A
- UL Listed: E-18095
- CSA Standard: C22.2 No. 18
- CSA Certified: 009795
- Suitable for wet locations when used with gasketed covers.
- Fed Spec: A-A-50563
- NEMA: FB-1, FB-2.10

① Furnished with rollers for easier cable pulling.

LBD and LBDN Pulling Fittings

UNILETS™ for use with Threaded Rigid Metal Conduit and IMC. Furnished with Cover and Gasket.

NEC/CEC:
Listed for Ordinary Locations

Features

- Serve as pulling fittings — ideal for heavy, difficult to bend conductors.
- Make 90° bends in conduit — straight pull through hubs in either direction.
- Use as service entrance fitting.
- Complete with gasketed covers.

Standard Materials

- Unilets™ and covers: malleable iron or copperfree (4/10 of 1% max.) aluminum
- LBD gasket: composition fiber
- LBDN gasket: neoprene

Standard Finishes

- Malleable iron bodies and covers: triple-coat — (1) zinc electroplate, (2) chromate and (3) epoxy powder coat
- Aluminum bodies and covers: epoxy powder coat

Options

- PVC coating available. Add suffix **-PVC** to catalog number.

NEC/CEC Certifications and Compliances

- UL Standard: 514B
- UL Listed: E2527
- CSA Standard: C22.2 No. 30
- CSA Certified: 065183

Pull Boxes with Threaded Hubs and Covers

For use with Threaded Rigid Metal Conduit and IMC.

NEC:
Listed for Ordinary Locations

Applications

- Serve as pulling fittings.
- Provide openings for splicing.
- Make straight connections and 90° bends in conduit runs.
- Permit access to conductors for maintenance.

Features

- Roomy interiors, more wiring space.
- Accurately tapped, tapered threads (NPT) for tight, rigid joints and ground continuity.

Standard Materials

- Bodies and covers: steel
- Hubs: malleable iron or steel
- Cover bolts: trade sizes 1/2" thru 1-1/2" are zinc plated; trade sizes 2" thru 6" are brass

Standard Finish

- Zinc electroplate, chromate and epoxy powder coat.

Options

- Custom lengths up to 1828.8 mm (72 in) available, contact your local sales representative.

Big-Bend Cast Pulling Elbow

Conduit Systems Installations. For use with Threaded Rigid Metal Conduit and IMC.

CEC:
Listed for Ordinary Locations

Application

- Big-Bend Pulling Elbow is installed in conduit systems to provide 90° bends in conduit runs, pull outlets for conductors, access to conductors for maintenance and openings for making splices.

Features

- Plugged 1/2" outlets top and bottom for breather and drain.
- Conductors can be pulled straight through.
- Cover easily installed.

Standard Materials

- Bodies and covers: copperfree (4/10 of 1% max.) aluminum
- Gaskets: composition
- Cover bolts: stainless steel

Standard Finishes

- Acrylic paint

CEC Certifications and Compliances

- CSA Standard: C22.2 No. 40
- CSA Certified: 043654

COMMERCIAL AND INDUSTRIAL FITTINGS: CONDUIT BODIES

NEER™ Aluminum Threaded Conduit Bodies, Covers and Gaskets

For Rigid Conduit and IMC

NEC/CEC:
Listed for Ordinary Locations

Applications

- For threaded rigid conduit or IMC.
- Provides access to the interior of the raceway for wire pulling, splicing and maintenance.

Standard Material/Finish

- LM24 Diecast aluminum/epoxy powder coat.

NEC/CEC Certifications and Compliances

- UL Standard: 514A
- UL Listed: E53330
- CSA Standard: C22.2 No. 18.3
- CSA Certified: 208044
- NEMA: FB-1

NEER™ All-In-One Threaded Conduit Bodies

For Rigid Conduit and IMC

NEC/CEC:
Listed for Ordinary Locations

Applications

- To provide access to conductors for pulling, splicing, maintenance and future changes/upgrades.
- Allows connection of straight conduit runs, branch conduit runs and 90° bends.

Features

- Threaded hubs.
- Packaged complete with cover and gasket under one Catalog Number.
- Ready to use.

Standard Material/Finish

- Conduit body: diecast LM24 aluminum/epoxy powder coat
- Cover: stamped aluminum, natural finish
- Gasket: neoprene

NEC/CEC Certifications and Compliances

- UL Standard: 514A
- UL Listed: E53330
- CSA Standard: C22.2 No. 18.3

Appleton OZGEDNEY

COMMERCIAL AND INDUSTRIAL FITTINGS: CONDUIT BODIES

NEER™ All-In-One Multi-Hub Threaded and Set Screw Conduit Bodies

For Rigid Conduit, IMC and EMT

NEC/CEC:
Listed for Ordinary Locations

Applications

- To provide access to conductors for pulling, splicing, maintenance and future changes/upgrades.
- Allows connection of straight conduit runs, branch conduit runs and 90° bends.

Features

- 1/2" thru 2" sizes have threaded and set screw hubs (SST).
- 2-1/2" thru 4" sizes have set screw hub (SS).
- Packaged complete under one catalog number.
- Ready to use.

Standard Material/Finish

- Conduit body: diecast LM24 aluminum/ epoxy powder coat
- Cover: stamped aluminum, natural finish
- Gasket: neoprene

NEC/CEC Certifications and Compliances

- UL Standard: 514A
- UL Listed: E53330
- CSA Standard: C22.2 No. 18.3
- CSA Certified: 208044
- NEMA: FB-1

COMMERCIAL AND INDUSTRIAL FITTINGS: CONDUIT BODIES

NEER™ Aluminum Set Screw Conduit Bodies and Accessories

For EMT

NEC/CEC:
Listed for Ordinary Locations

NEC/CEC:
Listed for Ordinary Locations

NEC/CEC:
Rated for Ordinary Locations

LB-SS: Aluminum Conduit Body

Applications

- Set screw type aluminum conduit bodies are used on steel EMT providing access to the interior of the raceway for wire pulling, splicing and maintenance.

Standard Material

- Diecast aluminum/epoxy powder coat

NEC/CEC Certifications and Compliances

- UL Standard: 514B
- UL Listed: E53330
- CSA Standard: C22.2 No. 18.3
- CSA Certified: 208044
- NEMA: FB-1

LB-50-SS

CC: Aluminum Covers

Applications

- Cover with screws for LB-SS Series conduit bodies..

Standard Material

- Diecast LM24 aluminum/epoxy powder coat

NEC/CEC Certifications and Compliances

- UL Standard: 514B
- UL Listed: E53330
- CSA Standard: C22.2 No. 18.3
- CSA Certified: 208044
- NEMA: FB-1

CC-50

FG: Fiber Gaskets

Applications

- Cover gasket to provide sealing for LB-SS Series conduit bodies.

Standard Material

- Fiber

EMT Adapters

NEC/CEC:
Rated for Ordinary Locations

Applications

- Adaptors are used to connect non-threaded fittings to threaded fittings.

Features

- Malleable iron clamps are exceptionally rugged and strong.
- Steel adapters offer economy and have integral formed gussets for excellent strength.

Material/Finish

- Steel/zinc electroplated

JB Conduit Outlet Boxes, Covers and Hangers

UNILETS™ for use with Threaded Rigid Metal Conduit and IMC. Furnished with Internal Ground Screw.

NEC:
Listed for Ordinary Locations

COMMERCIAL AND INDUSTRIAL FITTINGS: CONDUIT OUTLET BODIES

Applications

- Serve as pulling fittings.
- Provide openings for splicing.
- Make straight connections and 90° bends in conduit runs.
- Permit access to conductors for maintenance.

Features

- Raintight when enclosed and gasketed with hub or blank covers.
- Furnished with internal ground screw.
- Blind cover screw holes prevent conductor damage during installation, provide water-tightness.
- Available in three inside depths: 1-5/16", 2-1/16", and 3-1/8".
- Order with or without mounting lugs.
- Furnished with four tapped holes and two close-up plugs.
- Cushion fixture hangers are enclosed and gasketed.

Standard Materials

- JB conduit outlet boxes and covers and JB fixture hangers: malleable iron
- JB-A boxes and covers: copperfree (4/10 of 1% max.) aluminum
- Gaskets: neoprene

Standard Finishes

- Malleable iron conduit outlet boxes, and hub covers: triple-coat — (1) zinc electroplate, (2) chromate and (3) epoxy powder coat
- Fixture hangers, JB 1/2" hub and blank covers: triple-coat — (1) zinc electroplate, (2) chromate and (3) epoxy powder coat
- Aluminum JB conduit outlet boxes: epoxy powder coat

NEC Certifications and Compliances

- UL Standard: 514A
- UL Listed: E2527
- NEMA Standard: FB-1

① JB covers add no additional cubic inch capacity.

BKX Round Junction Boxes

CEC:

Class II, Division 1 and 2, Groups E, F, G

Class III

CSA Enclosure 4

Applications

- Serve as pulling fittings.
- Provides openings for splicing.
- Connect and change direction of conduit runs.
- When used with a gasket, BKX junction boxes are weatherproof.
- BKX junction boxes are dust-ignitionproof when supplied for Class II applications. Suitable for use in grain elevators, flour mills and other environments where dust presents a hazard.

Features

- Malleable iron Unilets™ offer high tensile strength, ductility, corrosion resistance and impact and shock resistance.
- Copperfree aluminum Unilets™ are lightweight, self-oxidizing, self-renewing and offer a high corrosion resistance.
- Roomy interiors: more wiring space.
- Smooth, rounded integral bushing in each hub protects conductor insulation.
- Accurately tapped, tapered threads for tight, rigid joints and ground continuity.
- BKX Series
 - Enclosed and gasketed boxes when used with hub or blank covers provide CSA Type 4 fit.
 - Suitable for exposed or concealed installations.
 - Boss in rear of box allows for fifth entry, factory or field entries, 1/2" or 3/4".
 - Available in three inside depths: 1-1/2", 2-1/4" and 3".
 - Furnished with four tapped holes and two close-up plugs.
 - Available in gray iron and aluminum.
 - Cushion fixture hangers are enclosed and gasketed.
 - Available for Class II, Division 1 applications.
 - Can be fitted with terminal block.

Standard Materials

- BKX junction boxes and cast covers: gray iron
- BKX-A junction boxes and cast aluminum covers: copperfree (max. 4/10 of 1%) aluminum
- BKX sheet metal covers: steel or aluminum
- Gaskets: neoprene or composition fiber

Standard Finishes

- Boxes and covers: triple-coat — (1) zinc electroplate, (2) chromate and (3) epoxy powder coat

Options

- Factory installed terminal block, add suffix **-CB** to catalog number

CEC Certifications and Compliances

- CSA Standard: C22.2 No. 18.1
- CSA Certified: 013017

SEH Conduit Outlet Boxes and Covers

UNILETS™ for use with Threaded Rigid Metal Conduit and IMC. Furnished with Internal Ground Screw.

NEC/CEC:
Listed for Ordinary Locations

COMMERCIAL AND INDUSTRIAL FITTINGS: CONDUIT OUTLET BODIES

Applications

- Provide openings for splicing.
- Make straight connections and 90° bends in conduit runs.
- Permit access to conductors for maintenance.

Features

- Accepts 4" octagon outlet box covers.
- Two 8-32 screw holes tapped on 3-1/2" centers.
- Furnished with internal ground screw.

Standard Materials

- Conduit outlet boxes: malleable iron
- Covers: steel and cast malleable iron
- Gaskets: composition fiber

Standard Finishes

- Boxes and cast covers: triple-coat — (1) zinc electroplate, (2) chromate and (3) epoxy powder coat

GS Conduit Outlet Boxes, Covers and Hangers

UNILETS™ for use with Threaded Rigid Metal Conduit and IMC.

NEC:
Rated for Ordinary Locations

Applications

- Serve as pulling fittings.
- Provides openings for splicing.
- Connect and change direction of conduit runs.
- When used with a gasket, GS junction boxes are weatherproof.

Features

- Raintight when enclosed and gasketed with hub or blank covers.
- Extra wide mating surfaces of GS box and cover provide greater gasket contact for more positive seal.
- GSU-20 accommodates connection block.
- Universal design — furnished with 4 threaded universal 3/4" hubs, four 3/4" to 1/2" reducers, and three 1/2" close-up plugs.
- Furnished with mounting lugs.
- Cushion fixture hangers are enclosed and gasketed.

Standard Materials

- Conduit outlet boxes, covers and fixture hangers: malleable iron
- Gaskets: neoprene

Standard Finishes

- Malleable iron conduit outlet boxes and covers: triple-coat — (1) zinc electroplate, (2) chromate and (3) epoxy powder coat

GS Round Junction Boxes

CEC:
Listed for Ordinary Locations

Applications

- Serve as pulling fittings.
- Provides openings for splicing.
- Connect and change direction of conduit runs.
- When used with a gasket, GS junction boxes are weatherproof.

Features

- Malleable iron Unilets™ offer high tensile strength, ductility, corrosion resistance and impact and shock resistance.
- Copperfree aluminum Unilets™ are lightweight, self-oxidizing, self-renewing and offer a high corrosion resistance.
- Roomy interiors: more wiring space.
- Smooth, rounded integral bushing in each hub protects conductor insulation.
- Accurately tapped, tapered threads for tight, rigid joints and ground continuity.
- Enclosed and gasketed boxes provide raintight fit when used with hub and blank covers.
- Extra wide mating surfaces of GS box and cover provide greater contact for more positive seal.
- Can be fitted with terminal block.
- Universal design: furnished with four threaded universal 3/4" hubs, four 3/4" to 1/2" reducers, and three close-up plugs.
- Furnished with mounting lugs.
- Cushion fixture hangers are enclosed and gasketed.

Standard Materials

- GS-A junction boxes and cast aluminum covers: copperfree (4/10 of 1% max.) aluminum
- GS flexible fixture hangers: malleable iron
- GS junction boxes and covers: gray iron
- Gaskets: neoprene

Standard Finishes

- GS Junction Boxes and covers: triplecoat
- Ferrous iron junction boxes and covers: (1) zinc electroplate, (2) chromate

Options

- Factory installed terminal block, add suffix **-CB** to catalog number

CEC Certifications and Compliances

- CSA Standard: C22.2 No. 18.1
- CSA Listed: 001472

Dimensions in Millimeters (Inches)

FS and FD Cast Hub Device Boxes

UNILETS™ for use with Threaded Rigid Conduit and IMC. All Device Boxes have Ridge Top Construction. Furnished with Internal Ground Screw.

NEC/CEC:
Listed for Ordinary Locations

Applications

- Accommodate wiring devices such as switches and receptacles.
- Provide excellent service in areas where boxes are subject to rough usage.
- Serve as pull boxes for conductors.
- Permit access to conductors for maintenance.
- Provide openings for making splices.
- Allow connections for branch conduit runs.
- Blank bodies for special conduit entrance arrangements.

Features

- Corrosion-resistant — ideal for indoor and outdoor installations.
- Weatherproof, raintight and dust-tight when used with cast gasketed covers.
- FS and FD boxes take standard flush wiring devices.
- FD boxes take devices exceeding 41.4 mm (1.63 in) in depth under fastening ears.
- Malleable iron for high tensile strength and ductility — provides greater resistance to impact and shock.
- Both malleable iron and aluminum boxes have ridge top construction for positive cover/gasket/box fit.
- Accurately tapped, tapered threads for tight, rigid joints, ground continuity.
- Complete selection of covers, receptacles, plugs, gaskets and accessories.
- Covers have captive stainless steel screws to speed installation, prevents loss of screws.
- Internal grounding screws standard.
- Available in single, two and three gang and tandem.
- Smooth, rounded integral bushing in each hub protects conductor insulation.

Standard Materials

- Boxes: malleable iron or copperfree (4/10 of 1% max.) aluminum
- Covers: malleable iron, steel, or copperfree (4/10 of 1% max.) aluminum
- Screws: stainless steel
- Gaskets: neoprene

Standard Finishes

- Malleable iron boxes and covers: triple-coat — (1) zinc electroplate, (2) chromate, and (3) epoxy powder coat
- Aluminum boxes and covers: epoxy powder coat
- Steel covers: zinc electroplate

NEC/CEC Certifications and Compliances

- UL Standard: 514A
- UL Listed: E2527
- CSA Standard: C22.2 No. 18.1
- CSA Certified: 001472
- NEMA Standard: FB-1

Illustrated Features

Gasket is designed so that it wraps around ridge top of Appleton™ aluminum or malleable iron device box. Result is a positive seal against moisture.

Gasket construction. Cover tightens on largest perimeter of gasket and fits snugly against portion of gasket that wraps around ridge top of box.

FS and FD Cast Hub Device Boxes

Wet Location Receptacle Covers Available with NEMA Configuration Receptacles or as Covers Only

Covers also accommodate Toggle Switches.

NEC:
NEMA 3R

Applications

- Meet NEC 406.8(B) and CEC receptacle requirements for wet locations: "A receptacle installed outdoors where exposed to weather or in other wet locations shall be in a weatherproof enclosure, the integrity of which is not affected when the receptacle is in use (attachment plug cap inserted)."
- For industrial, commercial or residential use as a general purpose receptacle or for powering portable equipment not exceeding medium duty ratings.
- Mounts on FS or FD device boxes or equivalents, either single gang or multiple gang with single gang openings.

Features

- Provides full protection in damp or wet locations per NEC 406.8(B) and CEC. Gasketed spring door cover closes tightly automatically to protect receptacle from moisture and dirt when not in use. With plug inserted, a heavy-duty gasket in throat of receptacle seals around it to keep out moisture and dirt.
- Receptacle interiors comply with NEMA Standards WD-1 and WD-5.
- Receptacle interiors are specification grade, back and side-wired.
- Single cover units accommodate NEMA configuration receptacles for locking or non-locking blade plugs, or toggle switches. Duplex units accommodate one receptacle and one toggle switch or any combination of the two.
- Covers open all the way, permitting easy plug insertion and withdrawal. Also permits adequate access to cover screws for easy attachment of cover to FS, FD or other device box. Large head cover screws are captivated.
- Unique design of spring door hinge provides smooth action. Duplex units have a separate hinge shaft for each spring door cover to reduce stress on the shafts.
- Spring door cover puts pressure on plug (without tilting plug) to hold plug in best position for providing optimum weatherproof seal.
- Stainless steel hinge springs are completely enclosed — inside and out — for superior resistance against corrosion.
- EPDM gaskets provide superior resistance to the weather, ozone and temperatures between -45.6 °C and +126.7 °C (-50.08 °F and +260 °F).

Duplex Cover on FS Box.

Single Cover on FS Box.

- Diecast copperfree cover assemblies with epoxy powder coat (electrostatically applied for uniform coverage) to provide protection against corrosion.
- Positive ground path assured for all exposed metal parts.
- Receptacle interiors grounded through an extra contact in all types. Self-grounded in duplex units.

Standard Materials

- Cover and faceplate: diecast copperfree (4/10 of 1%) aluminum
- Gaskets: ethylene propylene rubber (EPDM)
- Cover and device screws: stainless steel, 6—32 thread
- Hinge springs: stainless steel
- Hinge shaft: nylon
- FSK-SBA adapter: steel plate with closed cell sponged neoprene gasket

Standard Finishes

- Cover and faceplate: epoxy powder coat
- FSK-SBA adapter: zinc electroplate

NEC Certifications and Compliances

- UL Standard: 514A
- UL Listed: E2527, E3439
- NEMA Standards: FB-1, OS-1

Illustrated Features

Typical application with NEMA configuration receptacle and plug, mounted on an FS box. Gasket seals around plug, keeping out moisture and dirt. Spring door closes automatically when plug is withdrawn to protect receptacle.

Spring doors open wide for easy plug insertion and cover assembly (covers shown in open position for illustration only). This view shows gaskets that protect plugs. Gasket on bottom of cover prevents entry of moisture into device box (see gasket description).

COMMERCIAL AND INDUSTRIAL FITTINGS: CAST DEVICE BOXES

Appleton

FS and FD Cast Hub Device Boxes

UNILETS® for use with Threaded Rigid Conduit and IMC. All Device Boxes have Ridge Top Construction. Furnished with Internal Ground Screw.

NEC/CEC:
Listed for Ordinary Locations

Applications

- Accommodate wiring devices such as switches and receptacles.
- Provide excellent service in areas where boxes are subject to rough usage.
- Serve as pull boxes for conductors.
- Permit access to conductors for maintenance.
- Provide openings for making splices.
- Allow connections for branch conduit runs.
- Blank bodies for special conduit entrance arrangements.

Features

- Corrosion-resistant — ideal for indoor and outdoor installations.
- Weatherproof, raintight and dust-tight when used with cast gasketed covers.
- FS and FD boxes take standard flush wiring devices.
- FD boxes take devices exceeding 41.4 mm (1.63 in) in depth under fastening ears.
- Malleable iron for high tensile strength and ductility — provides greater resistance to impact and shock.
- Both malleable iron and aluminum boxes have ridge top construction for positive cover/gasket/box fit.
- Accurately tapped, tapered threads for tight, rigid joints, ground continuity.
- Complete selection of covers, receptacles, plugs, gaskets and accessories.
- Covers have captive stainless steel screws to speed installation, prevents loss of screws.
- Internal grounding screws standard.
- Available in single, two and three gang and tandem.
- Smooth, rounded integral bushing in each hub protects conductor insulation.

Standard Materials

- Boxes: malleable iron or copperfree (4/10 of 1% max.) aluminum
- Covers: malleable iron, steel, or copperfree (4/10 of 1% max.) aluminum
- Screws: stainless steel
- Gaskets: neoprene

Standard Finishes

- Malleable iron boxes and covers: triple-coat — (1) zinc electroplate, (2) chromate, and (3) epoxy powder coat
- Aluminum boxes and covers: epoxy powder coat
- Steel covers: zinc electroplate

Options

- For additional corrosion protection, specify Hot Dip Galvanized. Add suffix “-G” to catalog number. Contact your local representative for pricing and availability.

NEC/CEC Certifications and Compliances

- UL Standard: 514A
- UL Listed: E-18095, E2527
- CSA Standard: C22.2 No. 18
- CSA Certified: 009795
- Suitable for wet locations when used with gasketed covers.
- Fed Spec: A-A-50563
- NEMA Standard: FB-1

Illustrated Features

Gasket is designed so that it wraps around ridge top of O-Z/Gedney™ aluminum or malleable iron device box. Result is a positive seal against moisture.

Gasket construction. Cover tightens on largest perimeter of gasket and fits snugly against portion of gasket that wraps around ridge top of box.

COMMERCIAL AND INDUSTRIAL FITTINGS: CAST DEVICE BOXES

OZGEDNEY

FS and FD Cast Hub Device Boxes

UNILETS™ for use with Threaded Rigid Conduit and IMC. All device boxes have ridge top construction.

CEC:

Listed for Ordinary Locations

Applications

- Accommodate wiring devices such as switches and receptacles.
- Provide excellent service in areas where boxes are subject to rough usage.
- Serve as pull boxes for conductors.
- Permit access to conductors for maintenance.
- Provide openings for making splices.
- Allow connections for branch conduit runs.
- Blank bodies for special conduit entrance arrangements.

Features

- Corrosion-resistant — ideal for indoor and outdoor installations.
- Weatherproof, raintight and dust-tight when used with cast gasketed covers.
- FS and FD boxes take standard flush wiring devices.
- FD boxes take devices exceeding 1-5/8" in depth under fastening ears.
- Malleable iron for high tensile strength and ductility — provides greater resistance to impact and shock.
- Both malleable iron and aluminum boxes have ridge top construction for positive cover/gasket/box fit.
- Accurately tapped, tapered threads for tight, rigid joints, ground continuity.
- Complete selection of covers, receptacles, plugs, gaskets and accessories.
- Covers have captive stainless steel screws to speed installation, prevent "freezing" of screws.
- Ground screw at top of box for easy access.
- Cast Hub Boxes
 - Available in single, two, three and four gang and tandem.
 - Smooth, rounded integral bushing in each hub protects conductor insulation.
- FD Blank Bodies for Brazed Hubs or Drill and Tapped Entries
 - Available in single, two, three and four gang boxes.
 - Drill and tapped entries.
 - Brazed threaded hubs for threaded conduit from 1/2" thru 1-1/2" and brazed union hubs from 1/2" thru 1-1/4.
 - Smooth, rounded integral bushing in each hub protects conductor insulation.
 - Ground screw at top of box for easy access.

Standard Materials

- Cast hub device boxes and boxes for drilling and tapping: malleable iron or copperfree (4/10 of 1% max.) aluminum
- Brazed hubs: malleable iron
- Covers: malleable iron, steel, or copperfree (4/10 of 1% max.) aluminum

Standard Finishes

- Malleable iron boxes and covers: triple-coat — (1) zinc electroplate, (2) chromate, and (3) aluminum polymer enamel
- Aluminum boxes and covers: epoxy powder coat
- Steel covers: zinc electroplate
- Screws: stainless steel

Options

- Enclosures drilled for 347 Volt devices. Add suffix **-347**.

Gasket is designed so that it "wraps around" ridge top of Appleton™ aluminum or malleable iron device box. Result is a positive seal against moisture.

CEC Certifications and Compliances

- CSA Standard: C22.2 No. 18.1
- CSA Certified: 001472

Reference Data

- When ordering drilled and tapped openings or brazed hubs for blank bodies, refer to *FS and FD Cast Device Boxes Drilling and Tapping Information* pages.

Hub Information

Listed below are the various types of brazed hubs which may be used with the FD Unilets and the FDO box. Threaded, no-thread and union hubs may be brazed at any desired location.

It is possible to place more than five hubs on the top and bottom of three and four-gang Unilets.

Look at the chart below for the maximum hub diameter and the minimum hub spacing distance. This chart, together with the Unilet dimensions will enable you to figure the maximum number of hubs which may be used.

The hubs will be symmetrically placed about the axis of the Unilets unless exact dimensions are specified on the order.

	Size	Threaded for Rigid Conduit	No Thread for Rigid Conduit	No Thread for Electrical Metallic Tubing	Union
Maximum Hub Size	FS	1	3/4	3/4	3/4
	FD	1-1/2	1-1/4	1-1/4	1-1/4
Maximum Hub Diameter	1/2	1-1/8	1-1/2	1-1/8	1-1/2
	3/4	1-3/8	1-25/32	1-3/8	1-25/32

FS and FD Cast Hub Device Boxes

Malleable Iron, Aluminum

UNILETS™ for use with Threaded Rigid Conduit and IMC. All device boxes have ridge top construction.

CEC:
Listed for Ordinary Locations

Ordering Data

To determine the catalog numbers of Unilets with drilled and tapped entries or hubs, the following information should be shown:

1. Unilet catalog number.
2. Sketch number of entry arrangement selected from illustrations below.
3. Entry symbols taken from the table right. Start from the left on the top of the Unilet and continue in rotation clockwise around its body. Where no entry is required, the symbol X should be inserted. The three various divisions of the catalog number should be separated by dashes.

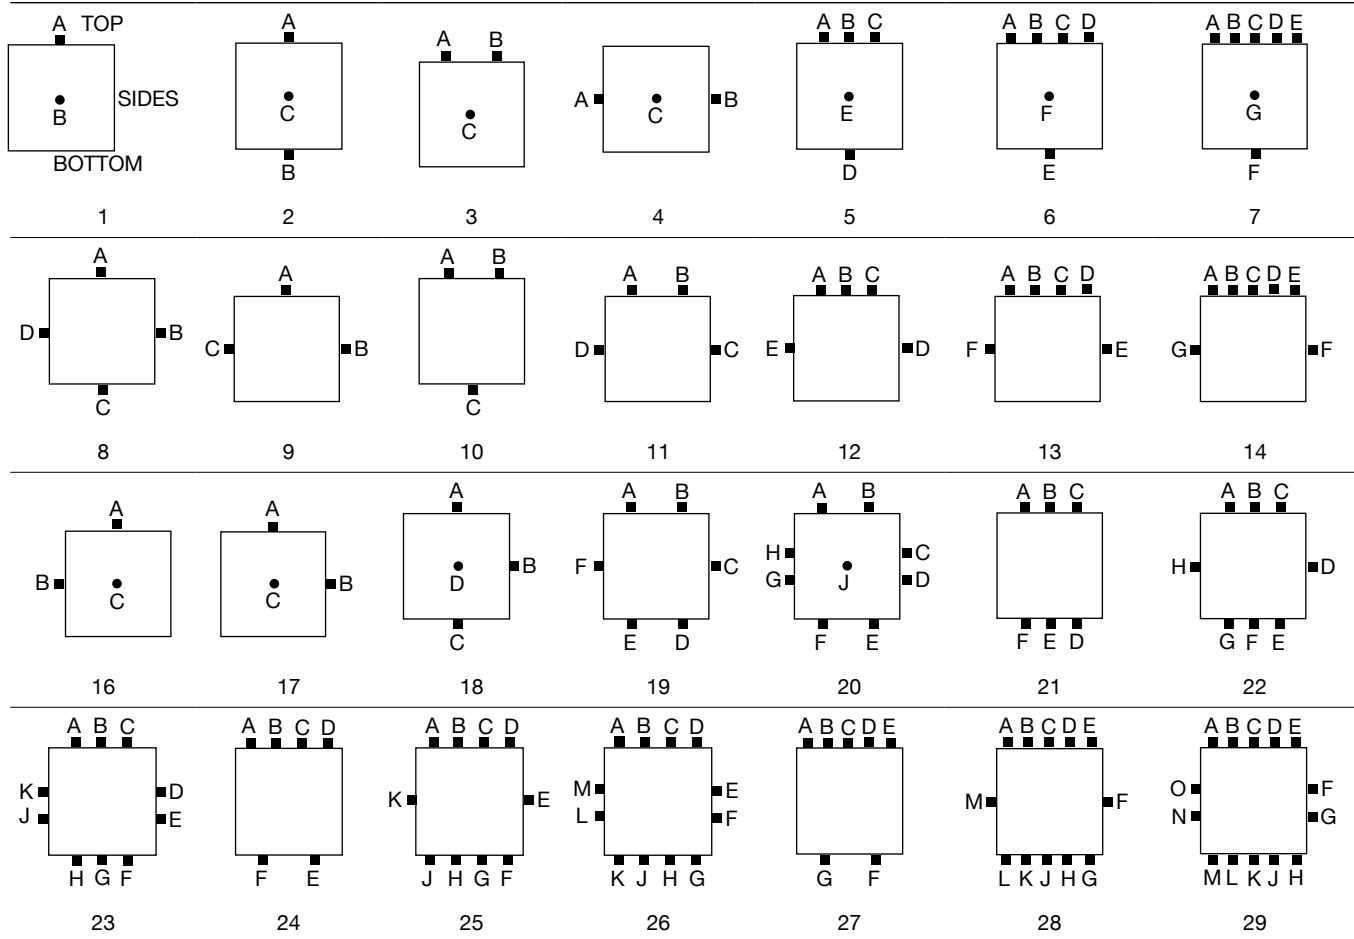

Ordering Example:

The Unilet selected is an FDO4 and the entry arrangement is sketch number 12. Entry A, B and C are to be 1/2" drilled and tapped for rigid conduit; D is to be a 1" hub and there is no entry at location E. The catalog number will be as follows FDO4-12-111CX.

COMMERCIAL AND INDUSTRIAL FITTINGS: CAST DEVICE BOXES

FDB Single and Multiple Gang Cast Device Boxes

UNILETS™ for use with Threaded Rigid Metal Conduit and IMC. Furnished with Internal Ground Screw. Threaded Drilled and Tapped Openings from 1/2" thru 1-1/2".

NEC:
Listed for Ordinary Locations

Applications

- Accommodate wiring devices such as switches and receptacles.
- Provide excellent service in areas where boxes are subject to rough usage.
- Serve as pull boxes for conductors.
- Permit access to conductors for maintenance.
- Provide openings for making splices.
- Allow connections for branch conduit runs.
- Blank bodies for special conduit entrance arrangements.

Features

- Corrosion-resistant — ideal for indoor and outdoor installations.
- Weatherproof, raintight and dust-tight when used with cast gasketed covers.
- FD boxes take standard flush wiring devices.
- FD boxes take devices exceeding 1-5/8" in depth under fastening ears.
- Malleable iron for high tensile strength and ductility — provides greater resistance to impact and shock.
- Both malleable iron and aluminum boxes have ridge top construction for positive cover/gasket/box fit.
- Accurately tapped, tapered threads for tight, rigid joints, ground continuity.
- Complete selection of covers, receptacles, plugs, gaskets and accessories.
- Internal grounding screws standard.
- Available in single, two and three gang boxes.
- All boxes have mounting lugs.

Standard Materials

- Cast device boxes and boxes for drilling and tapping: malleable iron or copperfree (4/10 of 1% max.) aluminum

Standard Finishes

- Malleable iron boxes: triple-coat — (1) zinc electroplate, (2) chromate, and (3) epoxy powder coat
- Aluminum boxes: epoxy powder coat

NEC Certifications and Compliances

- UL Standard: 514A
- UL Listed: E2527
- NEMA Standard: FB-1

Reference Data

- When ordering drilled and tapped openings or brazed hubs for blank bodies, refer to *FDB Blank Cast Device Boxes, Drilling and Tapping Information* page.

COMMERCIAL AND INDUSTRIAL FITTINGS: CAST DEVICE BOXES

Appleton®

FDB Single and Multiple Gang Cast Device Boxes

Single, Two, and Three Gang Boxes. Drilled and Tapped Openings from 1/2" thru 1-1/2".

NEC:
Listed for Ordinary Locations

Determine catalog number as follows:

- (1) Select FDB device box catalog number;
- (2) Select "Standard Conduit Opening Arrangement Diagram" number;
- (3) Determine if your desired number and trade size of conduit entries will fit in the FDB box chosen by reviewing the "Maximum Number and Size..." table on page B-19. Select a larger box if you experience a fit problem, and
- (4) Select symbols that represent conduit opening sizes from "Symbol Table."
(Use "0" where no opening is required and separate the various divisions of the complete catalog number by dashes.)

Example

The blank body device box selected is FDB-3GL and the conduit-opening arrangement is diagram #6. Conduit opening "a" is to be 3/4"; "b", 1"; "c", no opening required; and "d", 1-1/2".

The complete catalog number will be:
FDB-3GL-6-BC0E

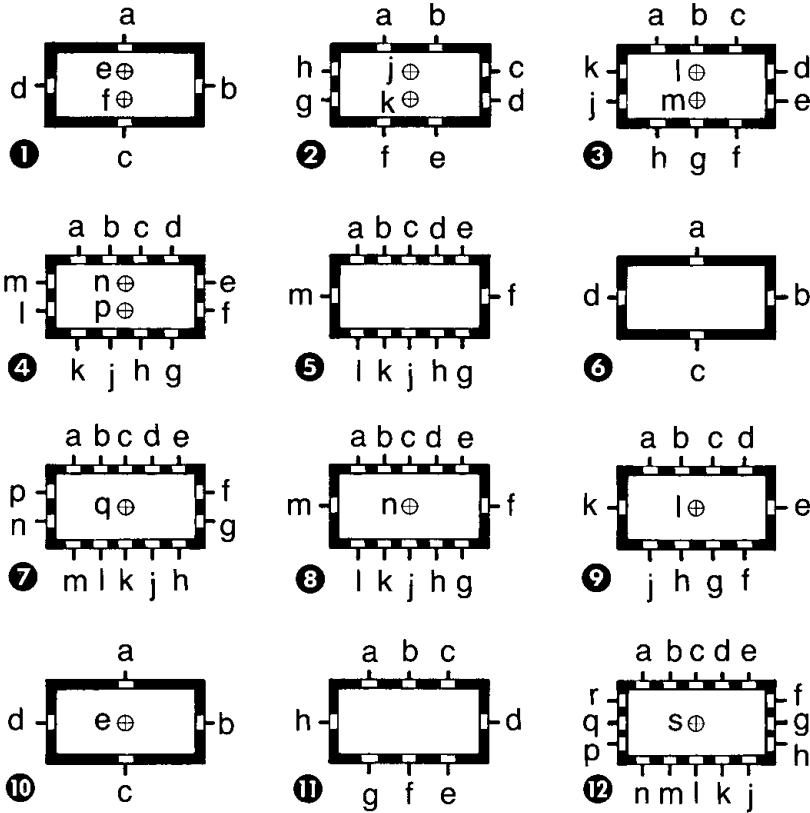

If a "Standard Conduit Opening Arrangement" is not suitable for the application, or when openings are to be more accurately spaced, submit sketch locating openings (1) from centerlines of box and (2) from outside back of box (or from mounting lug surface if lugs are supplied).

All conduit openings will be located in centerlines of walls and evenly spaced unless otherwise specified.

FDH Single and Multiple Gang Cast Device Boxes

Single-, Two-, Three-, and Four-Gang Boxes. Brazed Threaded Hubs for Rigid Conduit, 1/2" through 1-1/2"; Brazed Union Hubs, 1/2" through 1-1/4".

NEC:
Listed for Ordinary Locations

Determine catalog number as follows:

- (1) Select FDH device box catalog number;
- (2) Select "Standard Hub Arrangement Diagram" number;
- (3) Determine if your desired number and trade size of conduit entries will fit in the FDH box chosen, by reviewing the "Maximum Number and Size..." table on page B-25. Select a larger box if you experience a fit problem; and
- (4) Select symbols that represent hub sizes from "Symbol Table." (Use "0" where no hub is required, and separate the various divisions of the complete catalog number by dashes.)

Example:

The blank body device box selected is FS-3GL and the hub arrangement is diagram #8. Hub "a" is to be 1/2" BRAZED THREADED; hub "b", 1" BRAZED THREADED; hub "c", 3/4" BRAZED THREADED; hub "d", no hub is required; and hub "e", 1-1/4" BRAZED UNION.

The complete catalog number will be:
FS-3GL-8-1320U

If a "Standard Hub Arrangement" is not suitable for the application, or when hubs are to be more accurately spaced, submit sketch locating hubs (1) from centerlines of walls and (2) from outside back of box (or from mounting lug surface if lugs are supplied).

All hubs will be located in centerlines of walls and evenly spaced unless otherwise specified.

FAH Weatherproof Receptacle and Breaker Assemblies

For use with Rigid Conduit.

CEC:
Rated for Ordinary Locations

Applications

- FAH Series assemblies are used outdoors to supply power in remote areas such as:
 - Garden lighting
 - Parking lots
 - Marinas
 - Campsites
 - Trailer parks
- Recommended mounting height is 0.79 meters (2.6 feet).

Features

- These units will accommodate devices and covers normally used on single gang FS and FD unilets.
- 40° angle face uses standard covers.

Standard Materials

- Gray iron

Standard Finish

- Epoxy powder coat

OCB Outdoor Connection Box

NEC/CEC:
Listed for Ordinary Locations

Applications

- Provides a simple method of installing receptacles used for head-bolt heater outlets in cold area, recreational vehicles, parking areas, trucking terminals, etc.
- Replaces makeshift enclosures and is an easy way to install outdoor wiring devices.

Features

- Easy installation.
- Standard set-screw design provides easy slip-fit mounting on either unthreaded or threaded 4" trade size rigid or IMC conduit.
- Set screws allow permanent positioning of receptacle openings as required.
- Use with standard receptacles and covers.
- Has four standard FS openings which accommodate single, duplex and GFI receptacles and weatherproof covers.
- Internal grounding screw standard.
- Corrosion resistant construction.
- Compact profile.
- Large volume for wiring capacity to allow feed-thru and splices.

Standard Materials

- Copperfree (4/10 of 1% max.) aluminum

Standard Finishes

Aluminum Enamel

NEC/CEC Certifications and Compliances

AX Expansion Fittings

For Rigid Metal Conduit and IMC.

NEC/CEC:
Listed for Ordinary Locations

Applications

- To allow for expansion and contraction in a run of rigid metal conduit.
- For applications involving IMC a 15" min. length of rigid conduit should be used entering the expansion fitting due to the slightly smaller O.D. of the IMC
- Type AX provides for a maximum of 4" conduit movement (2" in either direction).
- Type AX-8 provides for a maximum of 8" conduit movement (4" in either direction).

Features

- Weatherproof
- Concretetight
- Includes insulating bushing
- Bonding jumpers

Standard Materials

- Malleable or ductile iron

Standard Finishes

- Hot dip galvanized

Options

- Type AX and Type AX-8 expansion fittings are available in copperfree (4/10 of 1% max.) aluminum. Add suffix **-A** after Catalog Number (Example: AX-50A). Use ABJ jumpers.

NEC/CEC Certifications and Compliances

- UL Standard: ANSI/UL 514B
- UL Listed: E-11853
- CSA Standard: C22.2 No. 18.3
- CSA Certified: 11584
- Wet or dry locations - use with Type BJ external bonding jumpers
- Wet or dry locations
- NEMA: FB-1

Type AX-8 Provides for 8" Conduit Movement

Type AX Provides for 4" Conduit Movement

TX Expansion Fittings

For Electrical Metallic Tubing (EMT).

NEC:
Listed for Ordinary Locations

Applications

- To allow for expansion and contraction in a run of electrical metallic tubing (EMT).

Features

- A maximum of 4" conduit movement is provided (2" in either direction)
- These fittings, less the EMT connectors and conduit nipple, are our Type AX expansion fittings which are listed by Underwriters Laboratories, Inc., for use with rigid conduit when used with bonding jumpers.
- Concretetight

Standard Finishes

- Basic Type AX expansion fitting is Hot Dip Galvanized. Other metal parts are Zinc Plated

Options

- Type AX and Type AX-8 expansion fittings are available in copperfree (4/10 of 1% max.) aluminum. Add suffix **-A** after Catalog Number (Example: AX-50A). Use ABJ jumpers.

NEC Certifications and Compliances

- UL Standard: ANSI/UL 514B
- UL Listed: 14895
- NEMA: FB-1

BJ Bonding Jumpers

For Rigid Steel, IMC and EMT.

NEC/CEC:
Listed for Ordinary Locations

Applications

- Type BJ - For bonding two rigid, EMT or IMC steel conduits together.

Standard Materials

- Clamps - malleable or ductile iron
- U-bolts - steel
- Braids - tin copper

Finish

- Clamps and U-bolts are hot dip galvanized

Options

- Available in custom lengths. Contact your local representative for pricing and availability.

NEC/CEC Certifications and Compliances

- UL Standard: 467
- UL Listed: E-24264

AXB Series Expansion Fittings with Integral Bond

For Rigid Metal Conduit and IMC.

NEC/CEC:
Rated for Ordinary Locations

Applications

- Accommodates expansion and contraction in a run of rigid metal conduit (RMC) and intermediate metal conduit (IMC).

Features

- The AXB series of expansion fittings simplifies and speeds installation with several industry features; vandalproof, corrosive resistant and field-inspectable.
- Disassembly is not required during installation, therefore there are no parts to drop or lose and fewer tools are required.
- Internal bonding jumper eliminates need for external jumper that can be tampered with and exposed to corrosion.

Standard Materials

- Body: ductile iron
- Bonding jumper: tinned copper
- Grommets: neoprene

Finish

- Hot dip galvanized

NEC/CEC Certifications and Compliances

- UL Standard: ANSI/UL 514B, 467
- CSA Standard: C22.2 No. 18.3, C22.2 No. 41
- U Listed: E-11853
- Wet or dry locations

DX Deflection Expansion Fittings

For Rigid Metal Conduit and IMC.

NEC/CEC:
Listed for Ordinary Locations

Applications

- To compensate for movement in any direction between two conduit ends which they connect. Type DX fittings will withstand occasional vibration transmitted to conduit by rotating equipment or vehicular traffic.
- These fittings will provide for a movement of 3/4" from the normal in all directions. Where they are used for angular movement they will allow for a deflection of 30° from the normal in any direction.
- Fittings may be used with PVC conduit by using standard adapters in each end.

Features

- Internal copper bonding jumper has the capacity to carry ground fault currents equal to the conductor sizes required by UL and the NEC
- Watertight (NEMA 4)
- Raintight
- Concretetight

Standard Materials

- End couplings: bronze
- Sleeve: neoprene
- Bands: stainless steel
- Bonding jumper: tinned copper braid

NEC/CEC Certifications and Compliances

- UL Standard: ANSI/UL 514B
- UL Listed: E-11853
- CSA Standard: C22.2 No. 18.3
- CSA Certified: 11584
- NEMA: FB-1

Type DX

1-1/2" Spacing Required

AXDX Deflection Expansion Fittings

For Rigid Metal Conduit and IMC.

NEC/CEC:
Listed for Ordinary Locations

Applications

- The assembly shown can be used where allowance for expansion and deflection must be provided but the 3/4" straight line movement in either direction which our Type DX expansion/deflection fitting permits is not sufficient.
- By combining the Type DX fitting with our Type AX expansion fitting, a straight line movement of 2" in either direction (total movement of 4") is provided.

Features

- Fitting assembly can be used embedded in concrete as shown, or can be used in exposed locations.
- Fittings include standard Type DX and AX fittings, bonding jumper, insulating bushing, and short nipple.

Standard Materials

- Sleeve - neoprene
- End couplings - bronze
- Bonding jumper - tin copper braids
- Bands - stainless steel
- All other metal parts are malleable, ductile iron or steel

Finish

- All malleable, ductile iron or steel parts are Hot Dip Galvanized

Options

- Other sizes available. Fittings can be furnished to provide additional linear conduit movement beyond 4". Specify "AX8DX" for 8" linear movement, 4" in either direction. Contact your local representative for pricing and availability.

EXPB Expansion – Pull Box Fittings

For Rigid Metal Conduit and IMC.

NEC:
Listed for Ordinary Locations

Applications

- To allow for expansion and contraction in a run of rigid conduit (2" in either direction for a total movement of 4").
- Also to provide a convenient pull box to supply an intermediate pulling point in the conduit run.
- For applications involving IMC a 15" min. length of rigid conduit should be used entering the expansion fitting due to the slightly smaller O.D. of the IMC.

Features

- Weatherproof
- Fitting supplied complete with bonding jumper, oversize sleeve and special Type A insulating bushing.
- Available in custom lengths. Contact your local representative for pricing and availability.
- Available for EMT. Contact your local representative for pricing and availability.
- The bonding jumpers furnished are of the form shown in the illustration except on the 3 1/2", 5" and 6" sizes. On these sizes the bonding jumper spans the entire fitting and, except for the length of the braid, is the same as the Type BJ.

Standard Materials

- Head - malleable or ductile iron
- Sleeve - steel
- Bonding jumpers - similar to type BJ

Standard Finishes

- Hot Dip Galvanized

Options

- Available in copperfree (4/10 of 1% max.) aluminum. Add suffix -A after Catalog number.

NEC Certifications and Compliances

- UL Standard: ANSI/UL 514B
- UL Listed: E-11853

NOTE: Extra length sleeves to provide a longer pulling opening can be furnished at a price addition. Contact your local representative giving pulling opening require.

PB and PBW Pull Box Fittings

For Rigid Metal Conduit and IMC.

NEC:
Listed for Ordinary Locations

Applications

- Fittings consist of two malleable iron end units one of which is furnished with set screws and a set of sealing rings consisting of packing, copper ground and pressure ring.
- A special Type A insulating bushing is also included. (Conduit not included.)

Features

- Two end units fitted to a purchased oversize sleeve make a convenient pull box to provide intermediate pulling points in a rigid metal conduit system to meet NEC Section 314.28(A)(1).
- Available for EMT. Contact your local representative for pricing and availability.

Standard Materials

- End units - malleable iron or ductile iron
- Sleeves - steel: sleeves must be ordered separately at an additional cost.

Standard Finishes

- Hot Dip Galvanized

NEC Certifications and Compliances

- UL Standard: ANSI/UL 514B
- UL Listed: E-11853

NOTE: PB and PBW Pull Box Fittings are not supplied with oversize sleeves. Please order sleeves from the table on next page.

NOTE: PB and PBW Pull Box Fittings are not supplied with oversize sleeves. Please order sleeves from the table above.

SCC and SSP Series Threaded Rigid Conduit and IMC Bolt-On™ Couplings

For Use with Threaded Rigid Conduit and IMC.

NEC/CEC:
Listed for Ordinary Locations

Applications

- Provides a fast inexpensive method of joining two sections of threaded rigid conduit in areas of close conduit spacing, tight clearance locations and irregular conduit bends which may normally require an expensive union.

Features

- Concretetight.
- Fast installation:
 - Slip Bolt-On™ Coupling over threaded end of one conduit section.
 - Butt the end of the second threaded conduit section to the first.
 - Slip Bolt-On™ Coupling to the center of the two conduit threads and tighten bolt(s).

Material/Finish

- Coupling: malleable iron, zinc electroplated
- Hardware: steel, zinc electroplate
- Gasket: neoprene

NEC/CEC Certifications and Compliances

- UL Standard: 514B
- UL Listed: E-14814
- CSA Standard: C22.2 No. 18.4
- CSA Certified: 702992
- NEMA: FB-1

Threaded Three Piece Couplings and Elbows For RMC and IMC

NEC/CEC:
Listed for Ordinary Locations

Applications

- Three piece couplings join two lengths of conduit when neither can be turned.
- Gasketed pulling elbows: provides a compact wire pulling point.
- Elbows provide a 90° change of direction in a conduit run.
- Male to female: for connecting threaded rigid conduit or IMC to box or enclosure.

Material/Finish

- Malleable iron/Zinc electroplate

NEC/CEC Certifications and Compliances

Type CH Space-Maker Conduit Hubs For RMC and IMC

NEC/CEC — Suitable for use in:
Class I, Division 2

Applications

- General purpose, suitable for use with heavy wall cabinets.

Features

- Female bushed nipple type.
- Female thread for rigid conduit and IMC.
- Takes less space.
- Recessed O-ring seal outside the box provides a watertight threaded hub on enclosures.
- Suitable for use with service entrance conduit.

Material/Finish

- Malleable iron/zinc electroplate
- Gasket: neoprene

Options

- For additional corrosion protection, specify Mechanically Galvanized. Contact your local representative for pricing and availability

NEC/CEC Certifications and Compliances

- UL Standard: 514B
- UL Listed: E-14814
- CSA Standard: C22.2 No. 18.3
- CSA Certified: 065178
- NEMA: FB-1

OZGEDNEY

COMMERCIAL AND INDUSTRIAL FITTINGS: RIGID AND IMC CONDUIT FITTINGS

Threaded Conduit Hubs With Bonding Screw For RMC and IMC

NEC/CEC — Suitable for use in:
Class I, Division 2

Applications

- Provides threaded termination in sheet metal enclosures.
- Suitable for service entrance.
- General purpose fitting.

Features

- Bonding locknut.
- Insulated throat.
- Recessed neoprene O-ring to assure water and dust-tight connections.

Material/Finish

- Body: 1/2 thru 1: steel, zinc electroplate; 1-1/4 thru 6: malleable iron, zinc electroplate, chromate, epoxy powder coat
- Wedge: 1-1/4 thru 4: malleable iron, zinc electroplate, chromate, epoxy powder coat
- Locknut: 1/2 thru 1, 5 thru 6: steel, zinc electroplate
- Screw: steel, zinc electroplate
- O-ring: neoprene
- Liners: nylon

Threaded Conduit Hubs

For RMC and IMC

NEC/CEC — Suitable for hazardous locations:
 Class I, Division 2; Class III, Divisions 1 and
 2 per NEC 501-4(B), 501.10(B)(4), 502-4(A)(2),
 503-3(A)

Applications

- Insulated throat form with bonding screw.
- Provides a more vibration resistant connection with assured ground continuity

Features

- Female bushed nipple type
- Female thread for rigid conduit and IMC
- Takes less space
- Recessed O-ring seal outside the box provides a watertight threaded hub on enclosures.
- Suitable for use with service entrance conduit.

Material/Finish

- Malleable iron/zinc electroplate
- Gasket: neoprene

Options

- For additional corrosion protection, specify Mechanically Galvanized. Contact your local representative for pricing and availability.

NEC/CEC Certifications and Compliances

- UL Standard: ANSI/UL 514B
- UL Listed: E-11853
- CSA Standard: C22.2 No. 18
- CSA Certified: 009795
- UL Listed as suitable for use in wet locations.
- NEMA: FB-1
 NEMA: 4
 NEMA: 12

Globally Certified Hubs

NEC/CEC:

Suitable for hazardous locations:
Class I, Division 2, Class II, Class III
Per NEC 501.10(B)(4), 502.10(A)(3),
502.10(B)(4), 503.10(A)(1).

NEC/CEC:

Suitable for hazardous locations:
AEx tb IIIC, Ex e IIC, Ex tb IIIC
-15 °C to +95 °C (+5 °F to +203 °F)

ATEX/IECEX/INMETRO:

Ex e IIC, Ex tb IIIC
-15 °C to +95 °C (+5 °F to +203 °F)

Applications

- Used to connect and ground rigid metal conduit or IMC conduit to a threadless enclosure.
- May be used in wet or dry locations, indoors or outdoors.

Features

- Globally certified
- Increased safety grounding terminal (lug) suitable for global use
- Rugged metallic construction ensures mechanical protection
- Integral hub gasket provides watertight seal
- Unique profile permits easy wrenching
- Smooth, accurately machined NPT threads facilitate flawless installation
- Watertight and corrosion resistant
- NEMA Types 2, 3, 3R, 4, 4X ①, 5, 12, 13 pending

Material/Finish

- Bodies and nuts: zinc die cast or aluminum
- Hub gasket: BUNA-N
- Throat liner: polypropylene
- Ground screw, washer, set screw: stainless steel

NEC/CEC Certifications and Compliances

- cULus Listed: E-24264
- UL: 50E, 467, 514B
- CSA: C22.2 No. 18.3 and 94.2
- UL/CSA/IEC 60079-0, 7, 31
- NEMA: FB-1

Appleton® OZGEDNEY

COMMERCIAL AND INDUSTRIAL FITTINGS: RIGID AND IMC CONDUIT FITTINGS

Aluminum Diecast Watertight Hubs

Insulated and Gasketed

NEC/CEC — Suitable for hazardous locations:
Class I, Division 2; Class II, Divisions 1 and 2;
Class III, per NEC 501.10(B)(4), 502.10(A)(3),
502.10(B)(4), 503.10(A)(1).

Applications

- Used to connect rigid metal conduit or IMC to a threadless opening in an enclosure.
- May be used in wet or dry locations, indoors or outdoors.

Features

- Rugged metallic construction ensures mechanical protection.
- Insulated throat, rated up to +105 °C (+221 °F), prevents wire abrasion.
- Integral O-ring provides watertight seal.
- HUBG provides lug for grounding conductor.
- Unique profile permits easy wrenching.
- Smooth, accurately tapped threads facilitate installation.
- Watertight and corrosion resistant.
- NEMA Types 2, 3, 3R, 4, 4X, 5, 12, 13

Standard Materials

- Bodies and nuts: copperfree (4/10 of 1% max.) aluminum diecast
- O-ring: BUNA-N
- Insulator: polypropylene
- Ground screw: stainless steel

NEC/CEC Certifications and Compliances

- UL Standard: 514B
- UL Listed: E-24264, E-11853
- CSA Standard: C22.2 No. 18.3
- CSA Certified: 065178
- NEMA: FB-1

Zinc Diecast Watertight Hubs

Insulated and Gasketed

NEC/CEC — Suitable for hazardous locations:
Class I, Division 2; Class II, Divisions 1 and 2;
Class III, per NEC 501.10(B)(4), 502.10(A)(1)(4),
502.10(B)(4), 503.10(A)(1).

Applications

- Used to connect rigid metal conduit or IMC to a threadless opening in an enclosure.
- May be used in wet or dry locations, indoors or outdoors.

Features

- Rugged metallic construction ensures mechanical protection.
- Insulated throat, rated up to +105 °C (+221 °F), prevents wire abrasion.
- Integral O-ring provides watertight seal.
- Grounding version provides positive ground for external conductor.
- Unique profile permits easy wrenching.
- Smooth, accurately tapped threads facilitate installation.
- Watertight and corrosion resistant.
- NEMA Types 2, 3, 3R, 4, 4X, 5, 12, 13

Material/Finish

- Bodies and nuts: zinc diecast
- O-ring: BUNA-N
- Insulator: polycarbonate
- Ground screw: mild steel

NEC/CEC Certifications and Compliances

- UL Standard: 514B
- UL Listed: E32539, E37337
- CSA Standard: C22.2 No. 18.3
- CSA Certified: 065178
- NEMA: FB-1

Threaded Enlargers and Nipples

For RMC and IMC

NEC/CEC:
Listed for Ordinary Locations

Applications

- Male enlargers:
 - Used to adapt an outlet hole to the next larger size of conduit.
- Offset nipples:
 - Provides box to box connection of knockouts
 - Allows misaligned knockout connection by rolling the offset nipple until aligned with each knockout
- Bushed nipples:
 - Used through knockout to connect box to conduit coupling
 - Used with a locknut to connect two boxes side by side or back to back
 - Used with a locknut to connect fixture housings and continuous runs

Material/Finish

- Male enlargers: turned steel
- Offset nipples: malleable iron/zinc plated
- Bushed nipples: malleable iron/zinc plated

NEC/CEC Certifications and Compliances

- All Models:
 - UL Standard: 514B
 - CSA Standard: C22.2 No. 18.3
 - NEMA: FB-1
- OFN Models only:
 - UL Listed: E-11853
 - CSA Certified: 065178

Appleton® O-Z/GEDNEY

COMMERCIAL AND INDUSTRIAL FITTINGS: RIGID AND IMC CONDUIT FITTINGS

Type ICC Phenolic Insulating Couplings

For Threaded Rigid Conduit and IMC.

NEC/CEC:
Rated for Ordinary Locations

Applications

- An insulating coupling having a substantial center shoulder, which prevents butting of the conduits, to assure a definite break in the metallic path.
- The Type ICC is recommended for use where high strength or resistance to moisture or acid conditions is required.

Features

- Will not melt, soften or burn
- Temperature rating +150 °C (+302 °F)
- Dielectric strength of 220 V/mil.
- Tapered threads (NPT)

Standard Materials

- Canvas base phenolic (black).

Type ICC

Threadless Compression and Set-Screw Couplings and Connectors For RMC and IMC

NEC/CEC:
Listed for Ordinary Locations

Application

- Compression couplings are used to join lengths of rigid metal conduit.
- Compression connectors are used to secure and terminate rigid metal conduit to enclosures.
- Set-screw couplings are used to join lengths of rigid metal conduit and IMC.
- Set-screw connectors are used to secure and terminate rigid metal conduit and IMC to enclosures.

NEC/CEC Certifications and Compliances

- UL Standard: 514B
- UL Listed: E-11853 (NTC 1/2 - 2) (NTCC 1/2 - 2)

Type EF and Type EFL Concrete Slab Electroform Inserts

For Threaded Rigid Conduit and IMC.

NEC/CEC:
Listed for Ordinary Locations

Application

- For conduit installed in poured concrete slabs.
- Nail, screw or tack-weld insert to concrete deck form.

Features

- Inserts available in straight or 90°

Standard Materials

- Malleable iron

Standard Finishes

- Zinc plated

NEC/CEC Certifications and Compliances

- UL Standard: ANSI/UL 514B
- UL Listed: E-11853
- CSA Standard: C22.2 No. 18
- CSA Certified: 009795

Illustrated Features

(Wood form shown)

(Wood form shown)

Shown in poured concrete slabs before wood or steel forms are removed.

Conduit End Bells

For Threaded Rigid Conduit and IMC.

NEC/CEC:

Requires no third party testing or certification

Application

- Provides a smooth transition from conduit to open conductors.

Features

- Provides a smooth, rounded pulling surface, preventing damage to cable sheath or insulation.
- Slots are provided for attaching to concrete forms.

Standard Materials

- Malleable or ductile iron

Standard Finishes

- Hot dip galvanized

NEC/CEC Certifications and Compliances

- This product serves no electrical function and therefore requires no third party testing or certification. It is considered to be a helper component.

OZGEDNEY

COMMERCIAL AND INDUSTRIAL FITTINGS: RIGID AND IMC CONDUIT FITTINGS

General Cable Support Information

NEC/CEC:
Listed for Ordinary Locations

Applications

- Used to support cables in vertical raceways or risers.
- Relieves the strain that would be placed on terminations, the interior of panels, or other devices to which the cables are connected.
- Properly designed cable supports must not only be capable of supporting a given weight of cable with a good margin of safety but must also support the cable without damaging the insulation or excessively reducing the amount of insulation over the conductor in the area where the cable is supported. O-Z/Gedney™ has been furnishing Cable Supports to the electrical industry for almost 100 years that meet these requirements.

Certifications and Compliances

- Requirements for Cable Supports in the National Electrical Code reads as follows: 300.19 Supporting Conductors in Vertical Raceways. (A) Spacing Intervals - Maximum. Conductors in vertical raceways shall be supported if the vertical rise exceeds the values in Table 300.19(A). One cable support shall be provided at the top of the vertical raceway or as close to the top as practical. Intermediate supports shall be provided as necessary to limit supported conductor lengths to not greater than those specified in Table 300.19(A).

Example:

- A 10-story building contains a vertical conduit run from the basement to the top floor, approx. 34 m (110 ft) in length. The raceway contains 4/0 copper conductors. Per Table 300.19(A), the unsupported cable length cannot exceed 25 m (80 ft). Therefore, one cable support is required at or near the top of the vertical riser, and one intermediate support is required at or near the midpoint in the conduit run, assuring that any unsupported cable length does not exceed 25 m (80 ft).

Spacing for Conductor Supports

Size of Wire	Support of Conductors in Vertical Raceways	Aluminum or Copper – Clad Aluminum Meters (Feet)	Copper Meters (Feet)
18 AWG thru 8 AWG	Not greater than	30 (100)	30 (100)
6 AWG thru 1/0 AWG	Not greater than	60 (200)	30 (100)
2/0 AWG thru 4/0 AWG	Not greater than	55 (180)	25 (80)
over 4/0 AWG - 350 kcmil	Not greater than	41 (135)	18 (60)
over 350 kcmil - 500 kcmil	Not greater than	36 (120)	15 (50)
over 500 kcmil - 750 kcmil	Not greater than	28 (95)	12 (40)
over 750 kcmil	Not greater than	26 (85)	11 (35)

Application	Recommended O-Z/Gedney™ Cable Supports
TWO or more wires - Indoors - at voltages to 600 Volt	Type S
Retrofit - TWO or more wires - Indoors - at voltages to 600 Volt	Type D
ONE or more wires - Indoors - at all voltages	Type R
Retrofit - ONE or more wires - Indoors - at all voltages	Type DR
Ventilating - ONE or more wires - Outdoors - at all voltages	Type CMT
Ventilating - Bakelite - ONE or more wires - Outdoors - at all voltages	Type V
Non-ventilating - ONE or more wires - Outdoors - at all voltages	Type C
Locking - Horizontal/Vertical - ONE or more wires - Indoors - at all voltages	Type K
Space Maker - ONE or more wires - Indoors - at all voltages	Type M
Pull Box - ONE or more wires - Outdoors at all voltages	Type W
Conduit Ventilators	Type KVF/KVM
Grounding Lugs	Type G
Wire Armored Cable - In conduit or supported by structure	Type F/FS/FT/SF1773

General Cable Support Information

NEC/CEC:
Listed for Ordinary Locations

Applications

- Two basic types of cable supports are offered for use with non-armored cable. They both utilize the pOZi-grip™ Wedging Plug. pOZi-grip™ is a unique manufacturing technique for lining the cable grooves with a coarse grain grit using a high strength epoxy adhesive. This grit improves the cable support holding power and does not injure the jacket or insulation on the cable.

One Piece Plug Type "S"

- This type consists of a metal body having an insulating liner with a knurled and tapered inside surface and a one piece impregnated hardwood wedging plug having a groove for each wire. This type support is recommended for use with all types of non-armored cables 600 Volts or less, as it is the easiest to install, impossible to install incorrectly and it provides ventilation of the conduit. This design is used in our Types S and D Cable Supports. The basic principles of their assembly are illustrated below.

Type S

1. Screw body on the end of the conduit or connector in place of the regular insulating bushing.

2. Pull wires and arrange temporary means of support.

- 3a. Remove all pulling compound from wires in the area where they pass through the cable support.
- 3b. Place the plug between the wires as close to the top of the body as possible. Care should be taken to locate each wire in the proper groove.

4. Tap the plug firmly into the support body.

Multiple Segment Plug Type "R"

- This type consists of an all metal body having a tapered inner surface and a canvas bakelite multiple segment wedging plug so constructed that each cable is supported between grooves in adjacent segments. This construction provides the uniform pressure distribution required by the softer types of insulations frequently used at higher voltages. This design is used in non-ventilating types R, DR, W, C, K and M, and Ventilating Compound Types CMT, and V. The basic principles of their assembly are illustrated below.

Type R

1. Screw body on the end of the conduit or connector in place of the regular insulating bushing.

2. Pull wires and arrange temporary means of support.

- 3a. Remove all pulling compound from wires in the area where they pass through the cable support.
- 3b. Place the segments of the plug around the wires. Where more than two segments are involved the top of each plug segment has numbers at each end and it is important that these are paired with the corresponding numbers on the adjacent plug segments.

4. Tap the plug segments evenly and firmly into the support body.

Drill Chart for Type S and D Cable Supports

NEC/CEC:
Listed for Ordinary Locations

HOW TO USE THIS CHART FOR S AND D CABLE SUPPORTS

- (1) Select your conduit size and measure your cable diameter(s) which must fit within the min/max range corresponding to the quantity of cables in the white area of this chart. (Note: S and D Cable Supports must be used with two or more cables, 600 volts maximum)
- (2) Cable diameters that fall within the gray area of this chart cannot be accommodated. Therefore a 3" Cable Support has a cable range of 0.261" up to 1.130". Cables smaller or larger cannot be considered.
- (3) Example: A 3" Cable Support will be used for 3 cables at 1.051" and 1 cable at 0.384". Refer to the 3" Conduit Size column. We can fit 4 cables between 1.011" to 1.070" therefore 3 at 1.051" will fit. The fourth cable fits between 0.361" to 0.410" within the white area in the 3" Conduit column. This drilling will work.
- (4) Using the example above but the fourth cable is smaller at 0.216", this drilling will not work. The 0.216" cable falls into the 0.211" to 0.260" range which is within the gray shaded area of the 3" conduit column. In this case, we recommend using our Cable Supports with R-type wedging plugs. See the R table below.

For combinations of cables that fall outside these parameters, please contact your local representative.

Types S and D Min/Max Cable OD	Conduit Size							
	1-1/2"	2"	2-1/2"	3"	3-1/2"	4"	5"	6"

OZGEDNEY

COMMERCIAL AND INDUSTRIAL FITTINGS: RIGID AND IMC CONDUIT FITTINGS

Type S Cable Supports

For Two or More Wires - Indoors - at Voltages to 600 Vac

For Rigid Conduit, IMC and EMT with pOZi-grip™ "S-style" Wedging Plug.

NEC/CEC:
Listed for Ordinary Locations

Applications

- For supporting non-armored electrical cables in vertical conduit risers.

Features

- Threaded for Rigid Conduit and IMC.
- Use with all types of insulations at voltages to and including 600 Volt.
- The fastest and easiest type cable support to install.
- The knurled insulating inner surface and one piece impregnated hardwood pOZi-grip plug provide positive support well in excess of code requirements.
- Body Only can be ordered separately, for installation prior to wire pulling. Plug Only can be ordered later, once wires are in place.
- If mounting on a non-metallic/non-grounded conduit, a Lay-In-Lug™ grounding lug should be mounted on cable support body.
- For Threadless Rigid Conduit, Threadless IMC, or EMT, the body can be attached to the male threads of a set-screw or compression connector.
- For PVC Conduit, use a PVC terminal adapter.

Material/Finish

- Bodies: malleable or ductile iron with hot dip galvanized finish

NEC/CEC Certifications and Compliances

- UL Standard: ANSI/UL 514B
- UL Listed: E-11853
- CSA Standard: C22.2 No.18.3
- CSA Certified: 011584

Optional Material/Finish

- For non-metallic bodies see Type D
- For Lay-In-Lug, see O-Z/Gedney™ Type G Grounding Lugs for use with cable supports.

TO ORDER SPECIFY:

- Catalog Number
- Number of conductors in conduit
- Outside diameters of each conductor

Illustrated Features

Impregnated Hardwood
pOZi-grip™ Wedging Plug

Shape and special gripping surface
of grooves in plug give maximum
support to cable.

Malleable or Ductile Iron Body

Tapered inside surface of insulating
bushing is knurled to grip cable.

① Cable support plugs will not be supplied undrilled. See Drill Chart for wire fill information.

Type D Cable Supports

For Two or More Wires Already Installed in Conduit - Indoors - at Voltages to 600 Vac

Retrofit Type Split Bakelite Body with pOZi-grip™ "S-style" Wedging Plug.

NEC/CEC:
Listed for Ordinary Locations

Applications

- For supporting non-armored electrical cables in vertical conduit risers.

Features

- Retrofit type cable support can be installed after conductors are pulled and terminated.
- Split body rests on existing bushing atop any conduit raceway.
- The two halves of the body are placed around the cables, seated on the existing bushing and securely held together by the steel band set in a groove around the body. The plug is then wedged between the cables.
- Use with all types of insulations at voltages to and including 600 Volts.
- The tapered, knurled insulating inner body surface and pOZigrip plug provide support well in excess of code requirements.

Material/Finish

- Bodies: two molded canvas bakelite halves. Inside surface is knurled to grip cables
- Band: steel/zinc plated
- Bolts and nuts: stainless steel

NEC/CEC Certifications and Compliances

- UL Standard: ANSI/UL 514B
- UL Listed: E-11853
- CSA Standard: C22.2 No.18.3
- CSA Certified: 011584

OSG EDNEY

COMMERCIAL AND INDUSTRIAL FITTINGS: RIGID AND IMC CONDUIT FITTINGS

Type R Cable Supports

For One or More Wires - Indoors - at all Voltages

For Rigid Conduit, IMC and EMT with pOZi-grip™ "R-style" Wedging Plug.

NEC/CEC:
Listed for Ordinary Locations

Applications

- For supporting non-armored electrical cables in vertical conduit risers.
- Due to the possibility of Magnetic Induction Heating, a single alternating current conductor should not be used in iron fittings.

Features

- Threaded for rigid conduit and IMC.
- Use with all types of insulations at all voltages.
- The pOZi-grip wedging plug exerts uniform pressure around the cable, providing holding force in excess of that required by code without deforming cable insulation.
- Body Only can be ordered separately, for installation prior to wire pulling. Plug Only can be ordered later, once wires are in place.
- If mounting on a non-metallic/non-grounded conduit, a Lay-In-Lug™ grounding lug should be mounted on cable support body.
- For Threadless Rigid Conduit, Threadless IMC, or EMT, the body can be attached to the male threads of a set-screw or compression connector.

Material/Finish

- Body: malleable or ductile iron with hot dip galvanized finish

NEC/CEC Certifications and Compliances

- UL Standard: ANSI/UL 514B
- UL Listed: E-11853
- CSA Standard: C22.2 No.18.3
- CSA Certified: 011584

Options

- For Lay-In-Lug, see O-Z/Gedney™ Type G Grounding Lugs for use with cable supports.
- For non-metallic bodies, see type DR.

TO ORDER SPECIFY:

1. Catalog Number
2. Number of conductors in conduit
3. Outside diameters of each conductor

Illustrated Features

Canvas Bakelite pOZi-grip™ Wedging Plug
For one wire type, the plug consists of two pieces. For two wires or more, there is one piece for each wire.

Shape and special gripping surface of grooves in plug give maximum support to each cable and distributes even pressure around its entire circumference.

Malleable or Ductile Iron Body

Inside tapered surface is machined to assure proper seating of the Wedging Plug.

Type DR Cable Supports

For One or More Wires Already Installed in Conduit - Indoors - at all Voltages

Retrofit Type Split Bakelite Body with pOZi-grip™ "R-style" Wedging Plug.

NEC/CEC:
Listed for Ordinary Locations

Application

- For supporting non-armored electrical cables in vertical conduit risers.

Features

- Retrofit type cable support can be installed after conductors are pulled and terminated.
- Split body rests on existing bushing atop any conduit raceway.
- Use with all types of insulations at all voltages.
- The pOZi-grip™ wedging plug exerts uniform pressure around the cable, providing holding force in excess of that required by code without deforming cable insulation.

Material/Finish

- Bodies: two molded canvas bakelite halves
- Wedging plug: canvas bakelite pOZi-grip™
- Band: steel/zinc plated
- Bolts and nuts: stainless steel

NEC/CEC Certifications and Compliances

Type CMT Cable Supports

Ventilating, Compound, Threaded Type. For One or More Wires - Outdoors - at all Voltages

For Rigid Conduit, IMC and EMT with pOZi-grip™ "R-style" Wedging Plug.

NEC:
Rated for Ordinary Locations

Application

- To support non-armored electrical cables in vertical conduit risers, furnish a weatherproof seal and provide ventilation at the top of the conduit.
- Due to the possibility of Magnetic Induction Heating, a single alternating current conductor should not be used in iron fittings.

Features

- Threaded for rigid conduit and IMC.
- Use with all types of insulations at all voltages.
- This device not only supports the cable, but furnishes a weatherproof seal and provides ventilation at the top of the conduit riser.
- The temperature in a conduit riser can be reduced +8 °C to 11 °C (15 °F to 20 °F) with proper venting. To obtain full effect of this decrease, the lower end of the conduit must be open or vented by use of the conduit ventilators.
- Body Only can be ordered separately, for installation prior to wire pulling. Plug Only can be ordered later, once wires are in place.
- If mounting on a non-metallic/non-grounded conduit, a Lay-In-Lug™ grounding lug should be mounted on cable support body.
- For threadless rigid conduit, threadless IMC, or EMT, the body can be attached to the male threads of a set-screw or compression connector.
- For PVC conduit, use a PVC terminal adapter.

Material/Finish

- Body: malleable or ductile iron with hot dip galvanized finish

Type V Cable Supports

Ventilating, Compound, Setscrew type. For One or more wires - Outdoors - at all voltages

All Bakelite Cable Support For Threadless Rigid Conduit and IMC with pOZi-grip™ "R-style" Wedging Plug.

NEC:
Listed for Ordinary Locations

Application

- To support non-armored electrical cables in vertical conduit risers, furnish a weatherproof seal and provide ventilation at the top of the conduit.

Features

- Use with all types of insulations at all voltages.
- A special cable support made of canvas bakelite. This support furnishes a weatherproof seal and provides ventilation at the top of the conduit riser. The temperature in a riser can be reduced +8 °C to 11 °C (15 °F to 20 °F) with proper venting. To obtain full effect of this decrease, the lower end of the conduit must be open or vented by use of the conduit ventilators.
- Body Only can be ordered separately, for installation prior to wire pulling. Plug Only can be ordered later, once wires are in place.
- Body can also be mounted on EMT in trade sizes 2-1/2 thru 4.

Material/Finish

- Body and plug: canvas bakelite

Options

- Can also be supplied for standard tapered ends of fiber conduit. Contact your local sales representative.
- For insulating compound, see O-Z/Gedney™ dOZSeal Insulating Compound page.

NEC Certifications and Compliances

- UL Standard: ANSI/UL 514B
- UL Listed: E-11853

① Cable support plugs will not be supplied undrilled. See Drill Chart for wire fill information.

Type C Cable Supports

Compound: Non-Ventilating. For One or More Wires Outdoors - at all Voltages

For Rigid Conduit, IMC and EMT with pOZi-grip™ “R-style” Wedging Plug.

NEC:

Listed for Ordinary Locations

Application

- To seal the end of conduit and support non-armored electrical cables in vertical conduit risers.
- Due to the possibility of Magnetic Induction Heating, a single alternating current conductor should not be used in iron fittings.

Features

- Threaded for rigid conduit and IMC.
- Use with all types of insulations at all voltages.
- This device not only supports the cable, but furnishes a watertight seal at the top of a conduit riser.
- Body Only can be ordered separately, for installation prior to wire pulling. Plug Only can be ordered later, once wires are in place.
- If mounting on a non-metallic/non-grounded conduit, a Lay-In-Lug™ grounding lug should be mounted on cable support body.
- For threadless rigid conduit, Threadless IMC, or EMT, the body can be attached to the male threads of a set-screw or compression connector.
- For PVC conduit, use a PVC terminal adapter.

Material/Finish

- Body: malleable or ductile iron with hot dip galvanized finish

Options

- For Lay-in-Lug, see O-Z/Gedney™ Type G Grounding Lugs for use with cable supports.
- For insulating compound, see O-Z/Gedney™ DOZSeal Insulating Compound page.

NEC Certifications and Compliances

- UL Standard: ANSI/UL 514B
- UL Listed: E-11853

Type K Cable Supports

Locking Style: Horizontal or Inverted - One or More Wires - Indoors - at all Voltages

For Rigid Conduit, IMC and EMT with pOZi-grip™ “R-style” Wedging Plug.

NEC:
Listed for Ordinary Locations

Application

- Can be installed in horizontal or inverted position.
- For supporting non-armored electrical cables in conduit.
- Due to the possibility of Magnetic Induction Heating, a single alternating current conductor should not be used in iron fittings.

Features

- Threaded for Rigid Conduit and IMC.
- Use with all types of insulations at all voltages.
- The design of this support is similar to the Type R except that it is equipped with a locking collar which securely holds the pOZi-grip™ wedging plug in place. This permits the support to be installed in any position and provides holding force against pull in either direction.
- Body Only can be ordered separately, for installation prior to wire pulling. Plug Only can be ordered later, once wires are in place.
- If mounting on a non-metallic/non-grounded conduit, a Lay-In-Lug™ grounding lug should be mounted on cable support body.
- For Threadless Rigid Conduit, Threadless IMC, or EMT, the body can be attached to the male threads of a set-screw or compression connector.
- For PVC Conduit, use a PVC terminal adapter.

Material/Finish

- Body and locking collar: malleable or ductile iron with hot dip galvanized finish

Illustrated Features

TO ORDER SPECIFY:

1. Catalog Number
2. Number of conductors in conduit
3. Outside diameters of each conductor

Options

- For Lay-in-Lug, see O-Z/Gedney™ Lay-In-Lug Grounding Lugs for use with cable supports.

① Cable support plugs will not be supplied undrilled. See Drill Chart for wire fill information.

② Includes Locking Collar and Bushing.

Type M Cable Supports

Space-Maker Style - One or More Wires - Indoors - at all Voltages

For Rigid Conduit, IMC and EMT with pOZi-grip™ "R-style" Wedging Plug.

NEC:
Listed for Ordinary Locations

Application

- Use where there is insufficient room for a cable support inside a junction box. For supporting non-armored electrical cables in vertical conduit risers.
- Due to the possibility of Magnetic Induction Heating, a single alternating current conductor should not be used in iron fittings.

Features

- Use with all types of insulations at all voltages.
- This fitting is similar to the Type R support, except that it is threaded at the top to allow fastening to a cabinet (1/4 max. thickness) with standard locknuts or threading into tapped (NPT) openings.
- Body Only can be ordered separately, for installation prior to wire pulling. Plug Only can be ordered later, once wires are in place. ①

Material/Finish

- Body: malleable or ductile iron with hot dip galvanized finish

Options

- For Lay-In-Lug, see O-Z/Gedney™ Type G Grounding Lugs for use with cable supports.

NEC Certifications and Compliances

- UL Standard: ANSI/UL 514B
- UL Listed: 11853

① For Threadless Rigid Conduit, Threadless IMC, or EMT, the body can be attached to the male threads of a set-screw or compression connector. For PVC Conduit, use a PVC terminal adapter. If mounting on a non-metallic/non-grounded conduit, a Type G grounding lug should be mounted on cable support body.

② Cable support plugs will not be supplied undrilled. See Drill Chart for wire fill information.

③ Includes two locknuts.

Type W Cable Supports

Pull Box Style - Raintite Enclosed - For One or More Wires - at all Voltages

For Threaded Rigid Conduit and IMC with pOzi-grip™ "R-style" Wedging Plug.

NEC/CEC:
Rated for Ordinary Locations

Applications

- For all types of insulations at all voltages.
- Provides intermediate support of non-armored conductors in an indoor/outdoor vertical conduit run where a junction box and/or pull point is unavailable.

Features

- Meets NEC Section 300.19(A) requirements for intermediate supports at midpoints in vertical conduit risers.
- Requires less space in conduit run than rectangular junction box. May be mounted side-by-side or staggered in multiple conduit runs.
- Type W cable support is essentially a modified type R cable support mounted within a pull box fitting.
- Lay-In-Lug™ grounding lug can be mounted on pull box end fitting.

Material/Finish

- Cable support body and pull box end fittings: malleable or ductile iron
- Oversize sleeve: steel
- Hot dip galvanized finish

Options

- For Lay-In-Lug, see O-Z/Gedney™ Type G Grounding Lugs for use with cable supports.

Type KVM and Type KVF Conduit Ventilators

For Threaded Rigid Conduit and IMC.

NEC/CEC:
Rated for Ordinary Locations

Applications

- To provide for the flow of cooling air through a conduit riser.

Features

- The Type KVF conduit ventilators when used at the bottom of a vertical conduit riser which is properly vented at the top, provides for the movement of cooling air through the riser. The temperature in a riser can thus be reduced -9 °C to -6 °C (+15 °F to +20 °F) improving the service life of the cable and increasing its load-carrying capacity.
- The Type KVM conduit ventilator has a male threaded nipple at the top and is used in conjunction with a cable terminator or other device having a female thread where ventilation is desired.

Material/Finish

- Bodies of fittings are cast Aluminum.
- Type KVM nipple is steel, zinc electroplated.

Optional Material

- KVM nipple: available in aluminum. Add suffix **-A** to catalog number.

Type G Cable Supports

Lay-In-Lug™ Grounding Lugs for use with Cable Supports

Factory Installed. For mounting on O-Z/Gedney™ fittings. Copper Plus™ Lay-In-Lug™ Grounding Wire Connectors.

NEC/CEC:
Listed for Ordinary Locations

Application

- Provides a compact means of attaching a grounding or bonding conductor to an O-Z/Gedney™ fitting.

Features

- Highly conductive tin-plated copper saddle for use with copper or aluminum conductors.
- Connector opening allows easy insertion of grounding conductor for thru or end connection.
- Low grounding connector profile.
- Spring action design maintains positive firm contact on grounding conductor.
- These grounding wire connectors are used on the specification insulated grounding bushings.
- Grounding lugs not sold separately.

Material/Finish

- Grounding Saddle/Tin Plated Copper
- Clamping Tension Body/Stainless Steel
- Screws/Stainless Steel

NEC/CEC Certifications and Compliances

- UL Standard: ANSI/UL 514B, 467
- UL Listed: E-24264
- CSA Standard: C22.2 No. 18, 41
- CSA Certified: 11584

Note:

- Type G Grounding Lugs are only furnished factory-mounted to O-Z/Gedney™ fittings.
- Grounding Lugs are not sold separately.
- Type G Grounding Lugs are not compatible with all O-Z/Gedney™ fittings in this catalog. Please review specific fittings catalog page to insure compatibility. If unsure, please contact your local representative before ordering.

Mounted on Cable Support

Mounted on PK Clamp

TO ORDER:

Place the order for each grounding lug on the next order line immediately after the fitting that the lug will be attached to. See Note prior to ordering.

Ordering Example:

Item #	Quantity	Description	Part Number
1	5	Cable Termination	PK-200
2	5	Grounding Lug	G-04S

Grounding Min.	Wire Size ① Max.	Lug Rating	Trade Size (Inches) ②	Part Number
14	4	CU only	1/2 – 6	G-04S
8	2/0	AL-CU	1/2 – 6	G-22S
6	4/0	AL-CU	2-1/2 – 6	G-24S
250	500	CU only	2-1/2 – 6	G-25S

① Solid or stranded for No. 4 AWG or smaller; stranded for No. 2 or larger

② Indicates trade sizes of fitting to which grounding wire connector can be mounted.

Type F Cable Supports

Unthreaded Conduit

For Wire Armored Cable

NEC/CEC:
Rated for Ordinary Locations

Applications

- For supporting wire armored cable in a vertical rise. Also used for supporting submarine cables up to 10,000 lbs.

Material/Finish

- Steel/Hot dip galvanized

Upper end of cable, supported by Type F Cable

Illustrated Features

Type SF 1773 Cable Supports

For Wire Armored Cable

NEC/CEC:
Rated for Ordinary Locations

Auxiliary Supports

Special auxiliary support specified for use at the lower end of a conduit riser may be provided as an added factor of safety up to 10,000 lbs. Similar types are often used as intermediate supports when armored cable is run exposed. Contact your local representative for price and availability.

Notes

- All parts to be Hot Dip Galvanized except as noted.
- All Dimensions are nominal and may vary according to normal Foundry and Manufacturing Tolerances.

Conduit Sealing Bushings

CEC:
Rated for Ordinary Locations

Details of Construction:

Pressure Discs:

- Thick metal discs with custom drilled holes to accommodate cables. Steel discs are slotted at cable holes to eliminate induction heating effect of single conductor alternating current.
- Steel discs are PVC coated for corrosion protection, to insulate cable holes and to prevent plates from bridging to other ferrous parts. Uncoated aluminum plates are available.
- Copper alloy, stainless steel or phenolic discs are available at price addition.

Screws and Washers:

- Corrosion-proof stainless steel socket head screws are used to compress the two discs against the sealing ring.
- Hex head stainless steel machine screws are available.
- PVC coated discs have stainless steel washers to prevent screws from damaging coating. (Suffix **-P** type only.)

Locking Collar:

- Malleable iron hot dip galvanized; suffix **-A** for aluminum.
- Gaskets are provided to prevent locking collar and end of conduit from damaging PVC coated disc. (Suffix **-P** type only.)

Sealing Ring:

- Thick one-piece neoprene ring custom drilled. Neoprene is specifically compounded for the following operating characteristics:
 1. Low compression modulus (the ability of the neoprene sealing ring to seal with low-tightening force).
 2. Very low compression set (maintain seal over extended period without having to retighten).
 3. Anti-oxidant (resistance to ozone attack).
 4. Anti-oxidant (resistance to weathering).
 5. Low crystallization (suitable for use at low temperatures).
 6. Fire retardant (will not support combustion).

For modifications or special requirements, contact your local representative for price and availability.

Type CSB
For use with Cab

Conduit Sealing Bushings

For Use with Insulated Wire, Cable and Rigid Metal Conduit

NEC:
Listed for Ordinary Locations

Type CSBE:

Seals against internal or external fluids or gases and to provide some support for the cables when fitting is used in vertical position as shown in illustration.

Type CSBI:

Seals against internal or external fluids or gases and prevents them from entering an enclosure.

Type CSBG:

Provides all the features of Types CSBE and CSBI and in addition prevents the sealing bushing from moving out of the end of the conduit should the internal pressure be high or if the fitting is used on conduit in an inverted position. The Type CSBG fittings are capable of sealing against gas or fluid pressure of 100 psig, (non-segmented) Type CSBI and CSBE – 50 psig (non-segmented.) Segmenting reduces above pressure in half. Can also be supplied with Lay-In-Lug grounding wire connector.

Applications

- These conduit Sealing Bushings are used for sealing the ends of conduit in applications involving higher static gas or fluid pressures than can be handled by standard sealing bushings.
- For use with IMC or EMT, a short nipple of Rigid Metal Conduit should be used to accommodate the Conduit Sealing Bushing. For Schedule 40 PVC Conduit, contact your local representative.

Features

- The complete assembly is provided with 1 or multiple holes to accommodate the size and number of cables which emerge from the conduit. When the fitting is in place and the screws are tightened, the neoprene sealing ring is compressed between the metal plates and is forced against the inside wall of the conduit and also against the cable insulation to effect a complete seal at the conduit end.
- Blank fittings are available. These are intended as abandonment devices only.
- Operating temperature -40 °C to +93 °C (-40 °F to +200 °F)

Do not field drill.

- Consult your local representative for all other applications.
- These fittings are simple to install. They eliminate the special preparation of the end of the conduit or the compounding of the conduit thread which is required on other types of sealing fittings used to seal against high pressures.

Standard Materials

- Slotted PVC coated steel discs, neoprene sealing ring and stainless steel socket head cap screws and washers.

Standard Finishes

- Locking collars on type CSBG - hot dipped galvanized, malleable or ductile iron.

Options

- Also available with aluminum or brass/ bronze pressure discs (Metal Plates) on Type CSBI and CSBE bushings. To specify, substitute suffix **-A** or **-B** for **-P** in catalog number. (Example: CSBI-200A-1) Locking Collar and Pressure Discs are also available in Aluminum or Bronze on Type CSBG Bushings. Example (CSBG-200A-1)

Consult your local representative for price and availability.

Alternate Construction: (Catalog # SEG)

Segmented Design – Segmental pressure discs and slit-neoprene sealing ring produce a come-apart design which allows the sealing bushing to be installed without having to thread it along the cable or allows installation around cables already pulled/terminated.

Also available with slit neoprene sealing ring and one piece pressure discs.

Two neoprene sealings rings provide cable support meeting NEC 300.19. (suffix **-G2**)

Certifications and Compliances

- UL Listed: E-14817
- Type CSBG with aluminum pressure disks is Listed by Underwriters Laboratories, Inc. as an outlet bushing, service entrance seal or service head.

TO ORDER SPECIFY:

1. Catalog Number
2. Conduit Size
3. Number of Cables
4. Outside Diameters of Cables Over Insulation
5. Segmented, if Required
6. Two Neoprene Sealing Rings, if required (prices on application). Suffix **-G2**.

TO ORDER SPECIFY:

1. Catalog Number
2. Conduit Size
3. Number of Cables
4. Outside Diameters of Cables Over Insulation
5. Segmented, if Required
6. Two Neoprene Sealing Rings, if required (prices on application). Suffix **-G2**.

① Minimum diameter is 0.140" OD. Five or more wires can be accommodated; contact your local representative for sizing.
 ② Blank fittings are intended as abandonment and future use devices only. Blank fittings cannot be field drilled.

Conduit Sealing Bushings

NEC/CEC:
Rated for Ordinary Locations

1. Segmental Design (Figure 1):

- Segmental pressure discs and slit neoprene sealing ring produce a come-apart design which allows the sealing bushing to be installed without having to thread it along the cable or allows installation around cables already terminated. Maximum diameter of wire or cable may need to be reduced. (Include Catalog Number "SEG"). Also available with slit neoprene sealing ring and one piece

2. Double Sealing Ring:

- A second neoprene sealing ring may be added for cable support applications. Add suffix **-G2** to catalog number. Contact your local representative for price and availability.

3. Close/Short Nipples:

- Short nipples which can be screwed into conduit hubs or couplings. Seal Fittings are then installed in the open ends of these nipples. To specify a fitting complete with nipple add "N" after Catalog Number. (Example: CSBG 200P-N).

4. Type GL Cabinet Adapter (Figure 2):

- For use with sealing bushings when exposed wires enter cabinets. Hot dip galvanized malleable or ductile iron is standard; aluminum if specified. Adapter assembly includes special smooth bore nipple, gasket and locknut. Type GL Cabinet Adapters must be ordered separately. See table for catalog numbers.
- Temperature Ratings:
Intermittent -51°C to +107°C (-60°F to +225°F)
Continuous -40°C to +93°C (-40°F to +200°F)
- Thread length on special smooth bore nipples will accommodate 1/8" thick cabinet or structure on Type CSBG (specify if thicker than 1/8"), and up to 3/4" thickness on Types CSBE and CSBI.
- These fittings are designed for use in schedule 40 Rigid Metal Conduit. For use with IMC or EMT, a short nipple of Rigid Metal Conduit should be used to accommodate the Conduit Sealing Bushing. Contact your local representative for application involving Schedule 40 or Schedule 80 PVC Conduit.
- Blank fittings are intended as abandonment and future use devices only.

Do not field drill.

① Standard fittings may be used with corresponding sizes of schedule 40 pipe or tubes and cored holes which have the same internal diameter as conduit I.D. shown above.

② Minimum diameter is 0.140" OD. Five or more wires can be accommodated; contact your local representative for sizing.

Conduit Sealing Bushings

NEC/CEC:
Rated for Ordinary Locations

Typical Applications

Type CSBI and Type CSME
Used to seal conduits entering an enclosure to prevent condensation and water from entering.

Type CSMI and Type CSMC
Core Drilled Hole Application

OZGEDNEY

COMMERCIAL AND INDUSTRIAL FITTINGS: RIGID AND IMC CONDUIT FITTINGS

Conduit Sealing Bushings

For Use with Pipe, Conduit or Tubing

NEC/CEC:
Rated for Ordinary Locations

Applications

- These Sealing Bushings are used to seal against fluid and gas pressure around mechanical pipes, casing, conduits or tubes
- They have the same details of construction and are used for the same applications as the Type CSB Series.
- In addition to sealing a pipe within a pipe, some types are specifically designed for use in core bit drilled holes or precast holes in concrete.
- Most of the options for the Type CSB are available in the Type CSM Series.

TO ORDER SPECIFY:

1. Catalog Number
2. Diameter of core bit drilled hole, precast hole or I.D. of pipe.
3. Number and O.D. of penetrating pipe, conduit or tube
4. Disc material finish: PVC Coated Steel Discs (standard); Uncoated Aluminum Discs.
5. Segmental design, if required (prices on application)
6. Two Neoprene Sealing Rings (if required) Prices on Applications. Suffix-G2.

Type CSMI Internal

Type CSMC
with steel membrane clamp
for holding existing moisture membrane

Type CSML Large Top Plate

Type CSME External

Type CSMG Gland-Locking Collar

OZGEDNEY

COMMERCIAL AND INDUSTRIAL FITTINGS, RIGID AND IMC CONDUIT FITTINGS

① Type CSMG and CSMC are not available in these sizes.
② Please add prefix before catalog number to specify fitting type.

Cable Terminators

CEC:
Listed for Ordinary Locations

Applications

- Cable Terminators and Sealing Fittings are used on conduit ends and cable ends to effectively seal the cable and conduit.

Terminator

- The Terminator body is deep enough to provide an ample compound chamber for use indoors or outdoors. A Canvas Bakelite Cover, either with or without taping cones, is provided to space and protect the cables. Instead of a cover, a female thread can be furnished for use with a short nipple or a flexible conduit adapter. The Terminator is recommended for sealing the ends of multi-conductor cables and for sealing the ends of conduit, and cables.

Compound Bushing

- The Compound Bushing is more compact than the Terminator. Its compound chamber is not as deep. No cover or top thread is provided. It is for use in protected locations where space is limited.

Sealing Bushing

- The Sealing Bushing is similar to the compound Bushing except that a compound chamber is not provided. This fitting therefore is not recommended as a cable sealing device for use at the ends of multi-conductor cable. However, the conduit end is effectively sealed around the cable by neoprene gaskets for rubber type insulations. It is widely used to seal the ends of conduit against moisture, dust, corrosive atmospheres and objectionable gases. It is also used to seal conduit against the entrance of warm humid air which would otherwise condense inside the conduit.

Conduit Sealing Bushings

- Conduit Sealing Bushings are used for sealing ends of conduit where cables emerge in applications involving higher fluid or gas pressures than can be handled by standard sealing bushings. These Conduit Sealing Bushings are compact and require only as much space inside a cabinet as an ordinary conduit bushing.

Cable Terminators

CEC:
Listed for Ordinary Locations

Applications

- There are many types of fittings containing Bakelite discs and O-rings which can be safely drilled in the field by following our detailed instructions. "These fittings will perform satisfactorily only when properly machined to the actual dimensions for the specific O.D. of cable used. Detailed instruction sheets containing layout data and special assembly procedures are supplied with blank fittings. Failure to comply may result in compound leakage and/or loss of seal around cable. O-Z/Gedney™ is not responsible for any field machined or modified fittings."

The basic principles used throughout the line of O-Z/Gedney™ Terminators covering their use with Rubber Covered Cables are clearly illustrated in this assembly.

1. After cables are prepared, Bakelite seating disc with properly drilled holes is slipped over cables and set into the conduit.

2. Neoprene rings, are placed around the cables and set into recesses in the seating disc.

3. A Canvas Bakelite pressure disc is passed over the cables and set on top of the neoprene rings, holding them firmly in place.

4. The body is then screwed directly on the conduit, clamping the discs and applying pressure to the neoprene rings.

5. Compound is heated to the proper temperature and the body filled to the height of the set screws, making a complete seal.

6. Before compound sets, Canvas Bakelite top cover is passed over the conductors, pushed down into the hot compound and secured by set screws.

Cable Terminators

With Compound Chamber For Threaded Rigid Conduit

CEC:
Listed for Ordinary Locations

Applications

- To effectively seal one or more single or multiple conductor cables and the conduit against the entrance of water, damp or corrosive atmospheres, hot or cold air or dust.

Features

- For rubber or plastic insulated cables in rigid conduit.
- Provides an ample sealing compound chamber for use indoors or outdoors.
- For applications involving IMC, EMT or PVC conduit, a short nipple of rigid conduit should be used entering the bottom threaded hub.
- Sealing Compound is not included and must be ordered separately.
- Can be field-drilled.

Standard Materials

- Body - malleable or ductile iron casting

Standard Finishes

- Body - hot dip galvanized
- Sealing disc - canvas bakelite

Options

- Fittings can be furnished for more than four wires or wires of varying sizes.
- Lay-In-Lug™ Grounding Lug can be mounted on Terminator Body.
- Type CRC terminators are available with tapping cones for sealing rubber or plastic insulated cables.
- Due to the possibility of Magnetic Induction Heating, a single alternating current conductor should not be used in iron fittings. Specify optional Aluminum material, see above.
- Contact your local representative for price and availability on above options.

CEC Certifications and Compliances

- CSA Certified: 11584

Type CRC

Cable Terminators

For Exposed Cables Entering Cabinets - with pOzi-grip™ Wedging Plug

CEC:
Listed for Ordinary Locations

Applications

- To effectively seal one or more single or multiple conductor cables against the entrance of water, damp or corrosive atmospheres, hot or cold air or dust.

Features

- For rubber or plastic insulated cables.
- Supports a vertical length of cable per NEC Section 300.19(A).
- Provides an ample sealing compound chamber for use indoors or outdoors.
- Sealing Compound is not included and must be ordered separately.
- Supplied with a locknut and neoprene sealing ring for cabinets up to 1/4" thick.
- Lay-In-Lug™ Grounding Lug can be mounted on Compound Chamber.

Standard Materials

- 1" and 1-1/4" body - steel
- Larger bodies - malleable or ductile iron
- Locknut - steel or malleable iron

Standard Finishes

- 1" and 1-1/4" body - zinc electroplated
- Larger bodies - hot dip galvanized
- Locknut - zinc electroplated
- Wedging plug - canvas bakelite

Options

- Steel Bodies 1" and 1-1/4" are available with hot dip galvanized finish.
- Fittings can be furnished for more than four wires or wires of varying sizes.
- Due to the possibility of Magnetic Induction Heating, a single alternating current conductor should not be used in iron fittings.
- Contact your local representative for price and availability on above options.

CEC Certifications and Compliances

Cable Terminators

For Ends of Threaded Rigid Conduits

CEC:
Listed for Ordinary Locations

Applications

- Provides a seal at the top of a vertical conduit for one or more single or multiple conductor cables. Excludes water, damp or corrosive atmospheres, hot or cold air or dust.

Features

- For rubber or plastic insulated cables in rigid conduit.
- Lay-In-Lug™ Grounding Lug can be mounted on Locking Collar.
- Can be field-drilled.
- For applications involving IMC, EMT or PVC conduit, a short nipple of rigid conduit should be used entering the bottom threaded hub.

Standard Materials

- Locking collar - malleable or ductile iron
- Locknut - steel or malleable iron

Standard Finishes

- Locking collar - hot dip galvanized
- Locknut - zinc electroplated
- Sealing discs - canvas bakelite

Options

- Fittings can be furnished for more than four wires or wires of varying sizes.
- Due to the possibility of Magnetic Induction Heating, a single alternating current conductor should not be used in iron fittings.
- Contact your local representative for price and availability on above options.

Cable Terminators

For Exposed Cables Entering Cabinets - with pOZI-grip™ Wedging Plug

CEC:
Listed for Ordinary Locations

Applications

- Provides cable support for one or more single or multiple conductor cables entering a cabinet or enclosure.

Features

- For rubber or plastic insulated cables.
- Supports a vertical length of cable per NEC Section 300.19(A).
- Supplied with a locknut and neoprene sealing ring for cabinets up to 1/4" thick.
- Lay-In-Lug™ Grounding Lug can be mounted on Locking Collar.
- Cable Support Plugs cannot be field-drilled.

Standard Materials

- Locking collar and body - malleable or ductile iron

Standard Finishes

- Locking collar and body - hot dip galvanized
- Pressure disc and wedging plug - canvas bakelite

Options

- Fittings can be furnished for more than four wires or wires of varying sizes.
- Due to the possibility of Magnetic Induction Heating, a single alternating current conductor should not be used in iron fittings.
- Contact your local representative for price and availability on above options.

Cable Terminators

DOZSeal Sealing Insulating Compound

For Use in Terminators, Compound Bushings and Compound Type Cable Supports

CEC:
Rated for Ordinary Locations

dOZseal 220 is a universal medium-soft asphaltic base compound having a low softening point and low pouring temperature. The compound remains plastic at low temperatures and remains viscose at the highest cable operating temperature.

Used In:

- Gasketed or Threaded Splice Fittings and Gasketed Terminators.

Use in Non-Hazardous Location With:

- Any cable having solid type insulation, such as Paper, Varnished Cambric, Rubber, Butyl, Cross-Linked Polyethylene, or High Molecular weight Polyethylene rated 34.5KV and below.

dOZseal 225 is a high ambient medium-hard asphaltic base compound having a medium-low softening point and a low pouring temperature. The compound remains plastic at medium-low temperatures and remains more viscose at the highest cable operating temperature.

Used In:

- Gasketed or Threaded Splice Fittings and Gasketed Terminators, when they are installed in hot climates or in hot exposures.

Use in Non-Hazardous Location With:

- Cables having solid type insulation, such as Paper, Varnished Cambric, Rubber, and Butyl rated 34.5KV and below.

dOZseal 230 is a hard asphaltic base compound having a high softening point and high pouring temperature. The compound remains plastic at the highest cable operating temperature.

Used In:

- Non-Gasketed Terminators or Cable Supports.

Use in Non-Hazardous Location With:

- Any cable having solid type insulation.

For shipping purposes, the approximate gross weight of the above compounds is 10 lbs. per gallon.

NOTE: When ordering Compound specify by number of units only, not quarts or gallons.

OZGEDNEY

COMMERCIAL AND INDUSTRIAL FITTINGS, RIGID AND IMC CONDUIT FITTINGS

Thru Wall Floor Seals

For New Installation

NEC/CEC:
Rated for Ordinary Locations

The O-Z/Gedney™ Thruwall and Floor Seals provide a positive means of sealing pipe, conduit or tube where they pass through a concrete foundation of a structure below grade or below ground water level or at entry points through a concrete wall or floor which must be sealed. The usual methods of making installations, such as using straight sleeves or pitch pockets, are generally not satisfactory for their effectiveness depends upon the skill and care of the installer. If the installation is not effective, leakage will occur. Considerable time and effort may be required to remake the seal. The O-Z/Gedney™ Thruwall and Floor Seals assure watertight installations by providing the following features:

I. Prevention of Seepage

- Seepage is eliminated between A and B by the blockage points C created by the shrinkage of the concrete on the body fins.

II. Pressure Tight Seal

- a) When the extra thick Neoprene Grommet 4 is compressed, it provides a watertight seal between the Body 5 and the entering pipe, conduit or tube withstanding pressures in excess of a 50 ft. head of water without leakage.
- b) The Neoprene Grommet compensates for a plus or minus variation in the outside diameter of the entering pipe, conduit or tube.
- c) The Neoprene Grommet will provide a proper seal even if the entering pipe, conduit or tube is forced off the center line of the fitting or is tilted because of the pressure exerted on the pipe by the back fill.

Features:

III. Pressure Tight and Concrete-Tight Housing

- To further insure a pressure tight and concrete-tight housing a neoprene ring 2 is provided to effect a seal between the Body 5 and the Oversize Sleeve 7.

IV. Easy to Install

- a) Nail holes are provided for attaching the fitting to the concrete forms, or the fitting can be installed by the use of positioning rods which pass through the forms and the inside of the fitting.
- b) To accommodate walls or floors of varying thicknesses the Oversize Sleeve 7 can be field-cut by using Marker Strip 8.
- c) Small hand wrenches are used to tighten the exposed hex head bolts 6 to compress the sealing assembly. No special wrenches are required. Hand wrenches allow tightening when space is limited. They also facilitate retightening if they were insufficiently tightened initially.
- d) An easy means of attaching a ground wire 3 is available, if required.

Thru Wall Floor Seals

For New Installation

NEC/CEC:
Rated for Ordinary Locations

Order of Assembly

Fig. 1

- A If wall or floor thickness is less than 14", cut length of oversize sleeve to suit. Use marker strip provided.
- B Secure assembly of body and oversize sleeve to concrete forms by using the nail holes provided, or by using positioning rods which pass thru the forms and the inside of the fitting.
- C If fitting is to be grounded, attach grounding wire using ground pad assembly which is furnished only when specified.

Note: The sealing assembly parts, which are used later in Step F, are contained in a separate package and should be stored until they are needed.

Fig. 2

- D After concrete has been poured and the forms have been taken down, remove the protective cover from the fitting. (This cover is installed temporarily to keep concrete out of tapped holes and out of fitting.)
- E Pass cable, conduit or tube thru the fitting.

- F Slip one of the pressure rings, the neoprene sealing grommet, the other pressure ring and the pressure clamp over the end of entering cable, conduit or tube as shown and insert these parts into the end of the body.
- G Insert hex head cap screws into screw holes, and tighten until neoprene sealing grommet is sufficiently squeezed between the two pressure rings to seal around the cable, conduit or tube and the inside of body.
- H DO NOT OVER TIGHTEN. At a later date if it is found that the sealing Assembly was not tightened sufficiently, it may be retightened to stop leakage or seepage.

Supplementary Instructions for Installing Sealing Ring

- Sealing ring is coated with rubber lubricant at factory to ease the passage of the oversize sleeve. If the oversize sleeve should be difficult to insert, apply additional rubber lubricant to the sealing ring and/or chamfer the end of the sleeve.

Note: Installation instructions are included with each fitting.

Typical Installation Instructions

Thru Wall Floor Seals

For New Installation

NEC/CEC:
Rated for Ordinary Locations

General Information

Design

The Thruwall and Floor Seal performs two functions:

1) TO PROVIDE A WATERTIGHT BLOCKAGE BETWEEN POURED CONCRETE AND THE FITTING BODY. Watertight blockage is accomplished by special designed fins cast on the outside of the Body, which permit the concrete, when it cures, to shrink around these fins, preventing water from creeping along the outside of the body.

2) TO PROVIDE A PRESSURE SEAL BETWEEN THE FITTING BODY AND THE OUTSIDE DIAMETER OF ANY ROUND CASING PENETRATING A WALL, FLOOR OR CEILING. Pressure sealing is based on an engineering principle that solid rubber-like materials are incompressible. If properly selected material is confined and is compressed, the material will flow to fill all voids, providing a very effective, long lasting seal. The sealing grommet is a shock absorber between the fitting and the casing. It allows axial movement of the casing, removing stresses from the casing. The PVC coated steel rings provide cathodic protection as it insulates the sealing fitting from the casing.

Applications

- Type FSK and WSK Thruwall Sealing Fittings are used where a single casing penetrates the fitting. The FSC and WSC Thruwall Sealing fittings are used where multiple casings penetrate through one fitting.

- The Type FSK and Type FSC fittings are used for most sealing applications. They consist of a body and sealing assembly located on the inside of the structure, and an oversize sleeve which extends from the fitting to the outside of the structure wall. After the foundation is poured, the concrete forms are removed and the round casing is inserted into the body, providing a pressure-tight seal between the round casing and the body of the fitting. The sealing assembly is always available on the inside of the structure for retightening, in the event that sufficient tightening was not utilized during the initial installation.
- The WSK and the WSC fittings are the same as the Type FSK and FSC fittings except that they have a body and sealing assembly on both sides of the oversize sleeve. This provides a pressure seal on both sides of the wall. The Type WSK and WSC fittings can be used on applications where a seal is required on each side of the wall. The body and sealing assembly on the outside of the wall can also be used as a throttle to limit the pressure on the sealing assembly on the inside of the structure. This practice is used where applications require future provisions for replacing the inside sealing assembly when there is a high pressure on the outside wall.
- Another purpose for the Type WSK and WSC fitting is to keep the round casing in the center of the fitting and not have it deflect in the oversize sleeve in the event of earth movement in the back fill.
- Sealing grommets have an expected life in excess of 20 years.

Type FSK

Thru Wall Floor Seals

For New Installation

NEC/CEC:
Rated for Ordinary Locations

General Information

Material Specifications

- 1) BODIES AND PRESSURE CLAMPS are high strength malleable or ductile iron coated with a high organic zinc sacrificial conductive epoxy coating.

Exception: Bodies of FSK 60 and larger are cast iron, malleable iron and cast iron are both inherently corrosion resistant.

- 2) PRESSURE RINGS are closely sized to fitting inside diameter and outside diameter of casing. They are thick steel plates that have a heavy durable PVC coating, utilizing the very effective fluid bed process. PVC coating provides an insulation between the sealing assembly, and the casing to provide cathodic protection by eliminating stray electrical currents from flowing between the fitting and the casting.

Exception: Multi-hole Type FSC and WSC sealing assemblies are furnished with low water-absorbing high-impact thick phenolic plates in electrical applications to eliminate eddy current effect when single conductor AC currents pass through magnetic metal.

- 3) BOLTS are - Hex head cap bolts zinc electroplated.
- 4) NEOPRENE SEALING GROMMETS are molded or drilled to accommodate casing outside diameters. The neoprene is specifically compounded for the following very desirable operating characteristics:
 - Low compression modulus (the ability of the neoprene sealing ring to flow with low-tightening force).
 - Very low compression set (maintain seal over extended period without having to retighten).
 - Anti-oxidant (resistant to ozone attack).
 - Anti-oxidant (resistance to weathering).
 - Low crystallization (suitable for use at low temperatures).
 - Fire retardant (will not support combustion).
- 5) OVERSIZE SLEEVES have a marker strip to facilitate field-cutting of sleeves to accommodate walls or floors of varying thicknesses and are furnished in the following material:
 - On FSK10 through FSK40 - High strength, high-impact, durable PVC pipe.
 - On FSK60 - Steel pipe coated with a high organic zinc conductive Epoxy coating.
 - On FSK100 and larger - High strength, high-impact, thick polyethylene pipe.

Special Features Available at Price Addition

- 1) Bodies and pressure clamps can be furnished hot dip galvanized.
- 2) Pressure rings can be furnished in Type 304 stainless steel, uncoated or coated with PVC.
- 3) Sealing grommets can be furnished in materials other than Neoprene; such as Silicone, for high temperature hot water and steam pipe applications to 400°F.
- 4) Oversize sleeves, other than standard, can be furnished in other materials that are available having the same outside diameter as the sleeves used. Oversize sleeves longer than standard are also available.
- 5) Tightening bolts can be furnished in steel with hot dip galvanized finish, or Stainless Steel Type 316 (standard zinc plated steel).
- 6) Provisions for connecting grounding wire.
- 7) FSKA Adapters (used on oversize sleeve with type FSK and FSC) to clamp membrane material around casing penetration.
- 8) Adapters to clamp membrane to Thruwall and Floor Seal body when the membrane is on the same side of the wall or floor as the Body.

WARNING Blank fittings are intended for use as abandonment plugs and for sealing openings reserved for future use. DO NOT FIELD DRILL. O-Z/Gedney™ will not be responsible for any device that has been modified in the field.

Type WSK

Thru Wall Floor Seals

For New Installation

NEC/CEC:
Rated for Ordinary Locations

Order of Assembly

- 1 Bodies and oversize sleeve as a unit is mounted in concrete forms.
- 2 Pour concrete.
- 3 Remove forms, pass conduit thru fitting and install sealing assembly parts.

Applications

- Where conduit, pipe or tubing enters a building through the concrete foundation below grade or ground water level, or where it is necessary to seal around a conduit, pipe or tubing where it passes through a concrete floor or wall.
- These fittings are designed so that each body size will accept several different size sealing assemblies which are made to fit the standard sizes of conduit, steel or cast iron pipe, or copper tubing.
- If desired, this design permits the purchase of the fitting less the sealing assembly for mounting in the concrete forms before the concrete is poured.
- At a later date the sealing assembly can be ordered and the installation completed.

Features

- The installation of these fittings is simplified by the use of hex head screws on the sealing assembly.

- Ordinary wrenches are used for tightening, which is desirable especially where space is limited.
- The standard fittings up to the "FSK-40-450" are furnished with a PVC oversize sleeve and the "FSK-60-480" thru "FSK-60-663" sizes have a steel sleeve. (Steel sleeves can be furnished on the sizes up to FSK-40-450.)
- All the standard sleeves will accommodate a wall or floor up to 14" thick and a marker strip, divided in inches, is provided on the sleeve to facilitate field cutting for wall less than 14".
- Longer sleeves for use in walls or floors of greater thickness are available.

Standard Materials

- Castings - malleable or ductile iron
- FSK 60 Series bodies - cast iron
- Grommet - neoprene
- Pressure rings - steel

Standard Finishes

- Castings - alkyd enamel coating, hot dip galvanized available
- Pressure rings - PVC coated

WARNING: Blank Fittings are intended as abandonment plugs. DO NOT FIELD DRILL.

OZGEDNEY

COMMERCIAL AND INDUSTRIAL FITTINGS, RIGID AND IMC CONDUIT FITTINGS

For Thruwall Seals for LARGE SIZE MECHANICAL PIPES up to 14" O.D., please see Type FSK and WSK - For Large Size Mechanical Pipes. Grounding connection on one end can be furnished if required. Please refer to Commercial Products - Type G Cable Supports, for ordering information. Ground Lug must be ordered on separate line immediately following FSK.

- ① Upsize sleeve can be ordered to accommodate wall thickness over 14". To order, specify actual wall thickness (not desired sleeve length).
- ② "Fitting Only" consists of the following parts, malleable or ductile iron bodies, oversize sleeve and sealing rings. (Except FSK 60 Series.)
- ③ Furnished with a "Sealing Assembly" consisting of the following parts: pressure clamp, hex head cap screws, pressure rings and sealing grommet.
- ④ A set of pressure rings and sealing grommet only is available separately.

Thru Wall Floor Seals

For New Installation

NEC/CEC:
Rated for Ordinary Locations

Order of Assembly

- 1 Bodies and oversize sleeve as a unit is mounted in concrete forms.
- 2 Pour concrete.
- 3 Remove forms, pass conduit thru fitting and install sealing assembly parts.

Applications

- Where conduit, pipe or tubing enters a building through the concrete foundation below grade or ground water level, or where it is necessary to seal around a conduit, pipe or tubing where it passes through a concrete floor or wall.
- These fittings are designed so that each body size will accept several different size sealing assemblies which are made to fit the standard sizes of conduit, steel or cast iron pipe, or copper tubing.
- If desired, this design permits the purchase of the fitting less the sealing assembly for mounting in the concrete forms before the concrete is poured.
- At a later date the sealing assembly can be ordered and the installation completed.

Features

- The installation of these fittings is simplified by the use of hex head screws on the sealing assembly.

- Ordinary wrenches are used for tightening, which is desirable especially where space is limited.
- The standard fittings up to the "WSK-40-450" are furnished with a PVC oversize sleeve and the "WSK-60-480" through "WSK-60-663" sizes have a steel sleeve. (Steel sleeves can be furnished on the sizes up to WSK-40-450.)
- All the standard sleeves will accommodate a wall or floor up to 16" thick and a marker strip, divided in inches, is provided on the sleeve to facilitate field cutting for walls less than 16".
- Longer sleeves for use in walls or floors of greater thickness are available.

Standard Materials

- Castings - malleable or ductile iron
- WSK 60 Series bodies - cast iron
- Grommet - neoprene
- Pressure rings - steel

Standard Finishes

- Castings - alkyd enamel coating, hot dip galvanized available
- Pressure rings - PVC coated

WARNING: Blank Fittings are intended as abandonment plugs. DO NOT FIELD DRILL.

For Thruwall Seals for LARGE SIZE MECHANICAL PIPES up to 14" O.D., please see Type FSK and WSK - For Large Size Mechanical Pipes. Grounding connection on one end can be furnished if required. Please refer to Commercial Products - Type G Cable Supports, for ordering information. Ground Lug must be ordered on separate line immediately following FSK.

- ① Oversize sleeve can be ordered to accommodate wall thickness over 14". To order, specify actual wall thickness (not desired sleeve length).
- ② "Fitting Only" consists of the following parts, malleable or ductile iron bodies, oversize sleeve and sealing rings. (Except FSK 60 Series.)
- ③ Furnished with a "Sealing Assembly" consisting of the following parts: pressure clamp, hex head cap screws, pressure rings and sealing grommet.
- ④ A set of pressure rings and sealing grommet only is available separately.

Thru Wall Floor Seals

For New Installation

NEC/CEC:
Rated for Ordinary Locations

Application

- Where direct burial cables located below grade or ground water level enter a building through the concrete foundation or for sealing around exposes cables passing through a concrete wall.
- If desired, this design permits the purchase of the fitting less sealing assembly, for mounting in the concrete forms before the concrete is poured.
- At a later date, the sealing assemblies to accommodate the specific size and number of wires can be ordered and the installation completed.

Features

- The installation of these fittings is simplified by the use of hex head screws on the sealing assembly.
- Ordinary wrenches are used for tightening, which is desirable especially where space is limited.
- Where it is desirable or convenient to have a sealing assembly on both sides of the wall Type "WSCS" should be specified.
- The standard fittings up to the "FSC 5055" and "WSC 5055" are furnished with PVC sleeve and the "FSC 7080" and "WSC 7080" sizes have a steel sleeve. (Steel sleeves can be furnished on the sizes up to "FSC 5055" and "WSC 5055" at an additional charge.)

- The standard sleeve will accommodate a wall or floor up to 14" thick on the Type "FSC" fittings and up to 16" thick on the Type "WSC" fittings and a marker strip, divided in inches is provided on the sleeve to facilitate field cutting for walls or floors less than 14" or 16" thick.
- Longer sleeves for fittings for use in walls or floors of greater thickness are available at an additional charge.

Standard Materials

- Castings - malleable or ductile iron
- FSCS 7080 Series bodies - cast iron
- Pressure rings - phenolic

Standard Finishes

- Castings - alkyd enamel coating, hot dip galvanized available

WARNING: Blank Fittings are intended as abandonment plugs. DO NOT FIELD DRILL.

For sizes other than those shown above, consult factory.

Grounding Connection on one end can be furnished if required. Ground Lug must be ordered on separate line immediately following FSK.

① Oversize sleeve can be ordered to accommodate wall thickness over 14". To order, specify actual wall thickness (not desired sleeve length).

② "Fitting Only" consists of the following parts, malleable or ductile iron body (2 on type "WSCS"). Sealing ring(s) and oversize sleeve.

③ "Sealing Assembly" consists of the following parts: pressure clamp, hex head cap screws, pressure rings and sealing grommet. The type "WSCS" is furnished with two sealing assemblies.

Clamp, hex head cap screws, pressure rings and sealing grommet. The type "WSCS" is furnished with two sealing assemblies.

Fitting similar to those shown above are available for use with cable in asbestos cement duct. Fibre, plastic or unthreaded steel conduit. Refer to factory.

④ If a single alternating current conductor is used, a non-ferrous fitting must be specified. Refer to factory.

⑤ Fittings can be furnished for more than four wires or for wires of varying sizes.

Thru Wall Floor Seals

Controlled Environment Vault Cable Seal

For Cable Penetrations of Underground Vaults

NEC/CEC:
Rated for Ordinary Locations

Applications

- To seal cable penetration of controlled environment vaults.
- For use as a future use fitting.

Features:

- Cast iron durability.
- Integral water barrier.
- Seals tightened with standard 3/4" wrench.
- Easy, craft friendly installation.
- Hub with NPT thread.
- Withstands 50 ft. head of water pressure without leakage.
- Fitting seal always accessible for retightening.

Standard Materials

- Sealing grommet - low compression modulus neoprene
- Hex head bolts: zinc plated steel
- Pressure discs: steel

Standard Finishes

- Pressure discs - PVC coated

Options

- Pressure Discs - stainless steel PVC coated
- Bolts - galvanized or stainless steel
- Sealing grommet available for multiple cables of varying sizes

Cable Sealing Assembly Consists of

- Two pressure discs drilled to size
- One sealing grommet to fit cable O.D.

TO ORDER SPECIFY:

- Catalog Number
- Number of Cables
- Maximum Diameter of Individual Cables
- Optional Material, if required

Grommet Characteristics

- Neoprene sealing grommets are molded or drilled to accommodate cable outside diameters.
- The Neoprene is specifically compounded for the following very desirable operating characteristics:
 - Low compression modulus (the ability of the neoprene to flow with low-tightening force)
 - Very low compression set (maintain seal over extended period without having to retighten)
 - Anti-oxidant (resistance to weathering and ozone attack)
 - Low crystallization (suitable for use at low temperatures)
 - Fire retardant (will not support combustion)
 - An expected life in excess of 20 years

WARNING: Blank fittings are intended as abandonment and future use devices.
DO NOT FIELD DRILL.

OZGEDNEY

COMMERCIAL AND INDUSTRIAL FITTINGS: RIGID AND IMC CONDUIT FITTINGS

Order of Assembly:
 1. Body and oversize sleeve as a unit is mounted to concrete forms
 2. Pour concrete
 3. Remove Forms, pass conduit through fitting and install sealing assembly parts

Type FSK

NEER™ Zinc Bushed Conduit Nipples

NEC/CEC:
Listed for Ordinary Locations

Applications

- Use through knockout to connect box to conduit coupling.
- Use with a locknut to connect two boxes side by side or back to back.
- Use with a locknut to connect fixture housings to continuous runs.

Features

- Male hub threads — NPS.
- Available with insulated throat.

Material/Finish

- Zinc diecast

NEC/CEC Certifications and Compliances

- UL Standard: 514B
- UL Listed: E-14814
- CSA Standard: C22.2 No. 18
- CSA Certified: 065178
- NEMA: FB-1

NEER™ Zinc Offset Nipples and Three Piece Couplings

NEC/CEC:
Listed for Ordinary Locations

NEC:
Listed for Ordinary Locations

RN: 3/4" Offset

Applications

- To provide an offset connection between two outlet boxes or enclosures.

Material/Finish

- Zinc diecast

NEC/CEC Certifications and Compliances

- UL Standard: 514B
- UL Listed: E32539
- CSA Standard: C22.2 No. 18.3
- CSA Certified: 70872
- NEMA: FB-1

RN-50

TPC: Three Piece

Applications

- Provides threaded coupling between lengths of rigid conduit and IMC conduit elbows, where neither can be rotated.

Material/Finish

- Malleable iron/zinc plated

NEC Certifications and Compliances

- UL Standard: 514B
- UL Listed: E163167
- NEMA: FB-1

TPC - 50

NEER™ Zinc Pulling Ells

Threaded for Rigid Conduit and IMC

NEC/CEC:
Listed for Ordinary Locations

HL: 90° Female/Female Pulling Ells

Applications

- Threaded 90° corner pulling elbows are used to facilitate pulling conductors through a sharp bend in a run of threaded rigid conduit or IMC.

Features

- Raintight (wet locations).
- The removable cover gives ample access so that wire pulling can be achieved without any obstructions.

Standard Material

- Zinc diecast

NEC/CEC Certifications and Compliances

- UL Standard: 514B
- UL Listed: E32539
- CSA Standard: C22.2 No. 18.3
- CSA Certified: 208044
- NEMA: FB-1

Beam Clamps, Straps, Clamps and Clamp Backs for Rigid Metal Conduit or IMC

CEC:
Listed for Ordinary Locations

Applications

- Beam clamp: provides support for conduit hanging systems.
- Two-Hole Straps: used to support rigid metal conduit and IMC.
- Clamp Backs: provide spacing from mounting surface when used with pipe clamps.

CEC Certifications and Compliances

- CSA Standard: C22.2 No. 18.4
- CSA Certified: 065178

Material/Finish

- Beam clamps: malleable iron/hot dip galvanized
- Straps: steel/zinc electroplate

Beam Clamps, Straps, Clamps and Clamp Backs for Rigid Metal Conduit or IMC

CEC:
Listed for Ordinary Locations

CEC:
Listed for Ordinary Locations

CEC:
Listed for Ordinary Locations

Type 14-S

Application

- To support Rigid Conduit and IMC.

Features

- Snap type - double ribbed

Standard Materials

- Steel

Standard Finishes

- Zinc plated

CEC Certifications and Compliances

- Fed. Spec: FF-S-760

Type THR

Application

- To support Rigid Conduit and IMC.

Features

- Snap type - double ribbed

Standard Materials

- Steel

Standard Finishes

- Zinc plated

CEC Certifications and Compliances

- CSA Standard: C22.2 No. 18.3
- CSA Certified: 104691
- Fed. Spec: FF-S-760

Type 14-G

Application

- To support Rigid Conduit and IMC.

Standard Materials

- Malleable iron

Standard Finishes

- Hot dipped galvanized

CEC Certifications and Compliances

- CSA Standard: C22.2 No. 18.3
- CSA Certified: 009795

Beam Clamps, Straps, Clamps and Clamp Backs for Rigid Metal Conduit or IMC

CEC:
Listed for Ordinary Locations

Application

- Provides spacing from mounting surface when used with malleable iron pipe straps.

Standard Materials

- Malleable iron

Standard Finishes

- Hot dip galvanized

NEC/CEC Certifications and Compliances

- CSA Standard: C22.2 No. 18
- CSA Certified: 009795

Beam Clamps, Straps, Clamps and Clamp Backs for Rigid Metal Conduit or IMC

NEC/CEC:
Listed for Ordinary Locations

Application

- Provide support for conduit hanging systems.

Standard Materials

- Malleable iron clamp
- Steel screw, case hardened

Standard Finishes

- Clamp - hot dip galvanized
- Screw - zinc electroplated

Rigid Metal Conduit, IMC or EMT “K-Clamps”

CEC:
Listed for Ordinary Locations

Applications

- Designed to secure rigid metal conduit, IMC or EMT across, parallel or perpendicular to beam, channel and angle supports.

Features

- Easily installs.
- Capable of withstanding heavy loads.

Material/Finish

- Castings: malleable iron/hot dip galvanized
- Hardware: steel/mechanically galvanized

CEC Certifications and Compliances

- CSA Standard: C22.2 No. 18.4
- CSA Certified: 065178

Rigid Metal Conduit, IMC or EMT Pipe Hangers

NEC/CEC:
Rated for Ordinary Locations

COMMERCIAL AND INDUSTRIAL FITTINGS: RIGID AND IMC CONDUIT FITTINGS

Applications

- Unique design accommodates more sizes of conduit with fewer clamps for lower inventories.
- Suitable for Rigid, IMC and EMT.
- Suitable for conduit runs on vertical and horizontal beams.

Material/Finish

- Malleable iron/zinc plated

Illustrated Features

Single line of conduit running parallel to beam using "CH" hanger.

Doubles lines of conduit running perpendicular to beam using "CHD" hanger.

CTC Conduit Cable Tray Clamps

For Rigid Conduit, IMC and EMT.

NEC/CEC:
Listed for Ordinary Locations

COMMERCIAL AND INDUSTRIAL FITTINGS: RIGID AND IMC CONDUIT FITTINGS

Applications

- For connecting and grounding rigid conduit, IMC, or EMT to cable trays.
- Secures and bonds metal conduit (rigid steel or aluminum, IMC and EMT) to the side rails of steel or aluminum cable trays without drilling or welding the tray. On the 1 1/2" through 4" sizes, conduits can attach to the tray from any angle up to 120°, allowing large power or control cables to be routed easily.

Features

- Fast Installation
- Low Product Cost
- Excellent Grounding Continuity
- Variable Conduit Entry 1 1/2" - 4" sizes
- High Mechanical Strength
- Compact Design
- Meets NEC 392.60(B)(A) Bonding Requirements

Standard Materials

- Malleable Iron
- U-Bolts and Nuts: Steel

Standard Finishes

- Mechanically Galvanized

Options

- PVC coating available on select aluminum bodies and covers. Add suffix **-PVC** to catalog number.

NEC/CEC Certifications and Compliances

- UL Standard: 467
- UL Listed: E-24264
- CSA Standard: C22.2 No. 18.
- CSA Certified: 009795 for rigid and EMT only

Type CTC-0507 and Type CTC-1012
12" — 114" Sizes
Right Angle to Tray

Type CTC-150 and Type CTC-400
112" — 4" Sizes
Variable Angle to Tray

Type CTGC

Cable Tray Grounding clamps for use on most types of cable trays.

TCC Single TCCD Double Conduit Cable Tray Clamps

NEC:
Listed for Ordinary Locations

COMMERCIAL AND INDUSTRIAL FITTINGS: RIGID AND IMC CONDUIT FITTINGS

Application

- For supporting rigid conduit to cable tray flange at each location where tray cable exits the tray and is run through rigid conduit raceway to control panel boards, motor starters and other electrical devices.

Features

- Clamps mount on all types of tray configurations (inside, outside or double flange).
- Exclusive design provides full 360° swivel, allowing exit conduit positioning at any angle, eliminating the need for separate inside or outside flange clamps, and field modification.
- Unique clamp mounting provides greater cable capacity and working area within the tray by reducing internal clamp obstruction.
- Type TCCD feature exclusive double conduit clamps conserve to space where multiple cables exit the tray at one location.
- Only four clamps are necessary to handle a conduit range from 1/2" thru 4".
- Fewer catalog numbers reduce jobsite inventory.

Standard Materials

- Base and conduit clamp: malleable iron
- Nuts, bolts and other hardware: steel
- Cable tray grounding clamp: aluminum

Standard Finishes

- Base and conduit clamp: hot dip galvanized
- Nuts, bolts and other hardware: mechanically galvanized

NEC Certifications and Compliances

- UL Standard: 467
- UL Listed: E-24264

TH-1800: Two Hole Snap-On

Applications

- Snap-on type two hole straps for rigid conduit and IMC are used where higher load bearing supports are desired.

Material/Finish

- Steel/zinc plated

NEC/CEC Certifications and Compliances

- UL Standard: 2239
- UL Listed: E333806
- CSA Standard: C22.2 No. 18.4
- cUL Listed: E333806

NEER™ Conduit Hangers

With Bolts and Nuts

NEC:
Listed for Ordinary Locations

Application

- Secure and suspend rigid conduit, IMC, EMT or PVC conduit from overhead supports.

Features

- Furnished with carriage bolt.

Standard Material/Finish

- Steel/zinc plated

NEC Certifications and Compliances

- UL Standard: 2239
- UL Listed: E333806

NEER™ Beam Clamps, Jack Chain and S Hooks

NEC/CEC:
Rated for Ordinary Locations

NEC/CEC:
Rated for Ordinary Locations

NEC/CEC:
Rated for Ordinary Locations

TBC: Beam Clamps

Applications

- Clamp on to the mounting structure to provide mounting means for the attachment of conduit hangers either directly or by means of threaded rod.

Features

- 1/4-20 threaded holes.
- Jaw opening 5/8".

Material/Finish

- Stamped steel/zinc plate

JC: Steel Jack Chain

Applications

- For suspending lighting fixtures, etc.

Feature

- Standard weight maximum working load: 29#.

Material/Finish

- Galvanized steel

Note:

- Order in 30.5 meter (100 foot) increments.

JC-12-S

SH: Standard and Heavy S Hooks

Applications

- For terminating end of jack chain, used to suspend lighting fixtures, etc.

Material/Finish

- Steel/zinc plated

Installation Features of ST™, STB, STN and STL Connectors and Hubs

For Liquidtight Flexible Metal Conduit

NEC/CEC:
Listed for Ordinary Locations

Using hacksaw, cut liquidtight flexible conduit making certain that the jacket and conduit are flush. (A) Place compression nut over conduit. (B) Screw ferrule onto the spiralled steel inner wall of the conduit. The firm grip of the ferrule threading against the inner conduit wall provides a continuous, permanent, positive metal-to-metal ground. There are no sharp edges to cause injury to wire during or after installation. (C) Place the liquidtight flexible conduit with the ferrule into connector body. (D) Tighten compression nut as far as it will go. This will assure correct collaring of the conduit—the end of the metal edge of the ferrule will curve out slightly. (E) This prevents damage to the conduit jacket itself at the time of installation, and also insures against future damage from frequent flexing, jarring or vibration.

COMMERCIAL AND INDUSTRIAL FITTINGS: LIQUIDTIGHT CONDUIT FITTINGS

Sealing Gasket
Neoprene sealing gasket eliminates common connection problems and assures a liquidtight installation. Seals against oil, water, dirt and chemicals.

Space Saving Hex-Hub Wedge Adapter
Male shank of unique Appleton™ hex-hub wedge adapter “finger tightens” into connector body. Flared surface of adapter wedges box wall against locking edge of body. Forms full 360° contact on both sides of box wall.

Insulated Throat
Insulating insert recessed into hex-hub wedge adapter protects against wire damage...without reduction in throat diameter. Perfect for extreme vibration conditions. Nothing to come loose, deteriorate, crack or break!

Liquidtight ST™ Series Plain Throat and STB Series Insulated Throat Connectors

For Liquidtight Flexible Metal Conduit

NEC/CEC — Suitable for use in:
Class I, Division 2

Applications

- Provides a dependable connection for liquidtight flexible metal conduit.

Features

- ST Series has plain throat.
- STB Series has insulated throat to protect against wire damage.
- Seals out oil, water, dust, dirt and fumes.
- Unique long ferrule with more pronounced threads provides over four times UL pull-out requirements.
- Ferrule provides maximum surface contact for better sealing and a continuous, permanent, positive metal-to-metal ground.
- Polypropylene sealing ring with locknut standard.
- Liquidtight/raintight/oiltight/concretetight.
- Suitable for wet locations.
- Full, machined tapered threads (NPT).
- Compact design with small turning radius.
- Straight, 45° and 90° styles available in trade sizes 3/8" thru 4"

ST-38

Standard Material/Finish

- 3/8" thru 1" straight: steel body and compression nut
- 1-1/4" thru 4" straight: malleable iron body and compression nut
- 3/8" thru 4" 45° and 90°: malleable iron body
- 3/8" thru 1" 45° and 90° caps: steel
- 1-1/4" thru 4" 45° and 90° caps: malleable iron
- 3/8" thru 1" ferrule: steel
- 1-1/4" thru 4" ferrule: aluminum
- Steel: zinc electroplate
- Malleable iron: zinc electroplate, chromate and epoxy powder coat/zinc electroplate
- Sealing ring: polypropylene

NEC/CEC Certifications and Compliances

COMMERCIAL AND INDUSTRIAL FITTINGS: LIQUIDTIGHT CONDUIT FITTINGS

Liquidtight STF Connectors with Threaded Hubs

For Liquidtight Flexible Metal Conduit. Female ST Connectors.

NEC/CEC — Suitable for use in:
Class 1, Division 2

Applications

- For use with liquidtight flexible metal conduit when making connection to threaded rigid conduit and IMC.

Features

- Female ST connectors have a unique long ferrule with more pronounced threads that provide over four times UL pull-out requirements. The ferrule also provides maximum surface contact for better sealing and a continuous, permanent, positive metal-to-metal ground.
- Liquidtight/raintight/oiltight/concretetight.
- Suitable for wet locations.
- Full, machined tapered threads (NPT).
- ST connectors have compact design with small turning radius.

ST-38F

Standard Material/Finish

- 3/8" thru 1": steel with steel ferrule; 1-1/4" thru 4": malleable iron with aluminum ferrule
- Steel: zinc electroplate
- Malleable iron: zinc electroplate, chromate and epoxy powder coat/zinc electroplate

NEC/CEC Certifications and Compliances

- UL Standard: 514B
- UL Listed: E-14814
- CSA Standard: C22.2 No. 18.3
- CSA Certified: 065178
- NEMA: FB-1

Liquidtight Flexible Metal Conduit Connectors with Wire Mesh Strain Relief

For Liquidtight Flexible Metal Conduit. STB, STN, and Female ST Types.

NEC/CEC — Suitable for use in:
Class I, Division 2

Applications

- For use with liquidtight flexible metal conduit subjected to flexure, vibration, motion, or strain. “STB” Type connects to threaded hubs. “STN” Type is for connections to sheet metal enclosures. Female ST Type connects to threaded rigid conduit and IMC.

Features

- Unique long ferrule with more pronounced threads provides over four times UL pull-out requirements.
- Ferrule also provides maximum surface contact for better sealing and a continuous, permanent, positive metal-to-metal ground.
- Stainless steel wire mesh prevents pull-out of flexible conduit from fitting and alleviates flexing stress at liquidtight connection.
- Insulated throat (STB and STN Series) protects against wire damage.
- STN Type has space-saving hex hub wedge adapter that fits nearly flush against inside walls of enclosures, providing maximum wiring room.
- Liquidtight/raintight/oiltight/concretetight.
- Suitable for wet locations.
- STB Series has full, machined tapered threads (NPT).

Standard Material/Finish

- Straight STB, STN, and Female ST connectors: 3/8" thru 1" are steel, 1-1/4" and over are malleable iron
- 45° and 90° connectors: all sizes are malleable iron
- Ferrule: 3/8" thru 1" are steel; 1-1/4" and over are aluminum
- Wire mesh: stainless steel
- Steel: zinc electroplate
- Malleable iron: zinc electroplate, chromate and epoxy powder coat/zinc electroplate

NEC/CEC Certifications and Compliances

- UL Standard: 514B
- UL Listed: E-14814
- CSA Standard: C22.2 No. 18.3
- CSA Certified: 065178
- NEMA: FB-1

COMMERCIAL AND INDUSTRIAL FITTINGS: LIQUIDTIGHT CONDUIT FITTINGS

Appleton

Liquidtight ST™ Series Plain Throat and STB Series Insulated Throat Connectors and External Grounding Lugs

For Liquidtight Flexible Metal Conduit

NEC/CEC — Suitable for use in:
Class I, Division 2

Applications

- For use with liquidtight flexible metal conduit where an external, visible equipment bonding jumper is desired.

Features

- ST-L Series has plain throat.
- STB-L Series has insulated throat to protect against wire damage.
- Unique long ferrule with more pronounced threads provides over four times UL pull-out requirements.
- Ferrule provides maximum surface contact for better sealing and a continuous, permanent, positive metal-to-metal ground.
- Adequately sized bonded lugs provide excellent grounding continuity and allow for visible ground path inspection.
- Liquidtight/raintight/oiltight/concretetight.
- Suitable for outdoor use.
- Full, machined tapered threads (NPT).

ST-38L

Standard Material/Finish

- 3/8" thru 1" straight: steel body and compression nut
- 1-1/4" thru 5" straight: malleable iron body and compression nut
- 3/8" thru 4" 45° and 90°: malleable iron body
- 3/8" thru 1" 45° and 90° caps: steel
- 1-1/4" thru 4" 45° and 90° caps: malleable iron
- 3/8" thru 1" ferrule: steel
- 1-1/4" thru 4" ferrule: aluminum
- Steel: zinc electroplate
- Malleable iron: zinc electroplate, chromate and epoxy powder/zinc electroplate

COMMERCIAL AND INDUSTRIAL FITTINGS: LIQUIDTIGHT CONDUIT FITTINGS

Appleton®

Aluminum Liquidtight ST™ Series Connectors with Plain Throat

For Liquidtight Flexible Metal Conduit

NEC/CEC — Suitable for use in:
Class I, Division 2

Applications

- Provides a dependable connection for liquidtight flexible metal conduit.

Features

- Lightweight aluminum construction facilitates installation.
- Seals out oil, water, dust, dirt and fumes.
- High corrosion resistance.
- Unique long ferrule with more pronounced threads provides over four times UL pull-out requirements.
- Ferrule provides maximum surface contact for better sealing and a continuous, permanent, positive metal-to-metal ground.
- Liquidtight/raintight/oiltight/concretetight.
- Suitable for wet locations.
- Full, machined tapered threads (NPT).
- Compact design with small turning radius.

Standard Materials

- Copperfree (4/10 of 1% of copper or less) aluminum

NEC/CEC Certifications and Compliances

- UL Standard: 514B
- UL Listed: E-14814
- CSA Standard: C22.2 No. 18.3
- CSA Certified: 065178
- NEMA: FB-1

COMMERCIAL AND INDUSTRIAL FITTINGS: LIQUIDTIGHT CONDUIT FITTINGS

Appleton

Liquidtight STN Insulated Connectors for Liquidtight Flexible Metal Conduit

Straight and 90° for Liquidtight Flexible Metal Conduit Connections to Sheet Metal Enclosures.

NEC/CEC — Suitable for use in:
Class I, Division 2

Applications

- For use with liquidtight flexible metal conduit in sheet metal enclosure installations.

Features

- Unique long ferrule with more pronounced threads provides over four times UL pull-out requirements.
- Ferrule provides maximum surface contact for better sealing and a continuous, permanent, positive metal-to-metal ground.
- Flame resistant, insulating insert recessed into hex-head wedge adapter protects against wire damage, without reduction in throat diameter.
- Space-saving hex-hub wedge adapter fits nearly flush against inside walls of enclosures, providing maximum wiring room.
- Liquidtight/raintight/oiltight/concretetight.
- Suitable for wet locations.

STN-38

Standard Material/Finish

- 3/8" thru 1" straight: steel
- 1-1/4" thru 4" straight and 3/8" thru 1" 90°: malleable iron
- 3/8" thru 1" ferrule: steel; 1-1/4" thru 4" ferrule: aluminum
- Steel: zinc electroplate
- Malleable iron: zinc electroplate, chromate and epoxy powder coat/zinc electroplate

NEC/CEC Compliances and Certification

- UL Standard: 514B
- UL Listed: E-11853
- CSA Standard: C22.2 No. 18.3
- CSA Certified: 065178
- NEMA: FB-1

COMMERCIAL AND INDUSTRIAL FITTINGS: LIQUIDTIGHT CONDUIT FITTINGS

Liquidtight Flexible Nonmetallic Conduit Connectors

Featuring "Floating Sleeve" Design.

NEC/CEC:
Listed for Ordinary Locations

Illustrated Dimensions

1. Floating sleeve self-aligns to minor conduit variations and protects seal from conduit flexing.
2. Nylon ferrule's deep-biting threads prevent pull-out.
3. Compression nut squeezes conduit tightly between sleeve and ferrule.
4. Connector body prevents conduit from twisting and binding.
5. Locknut bites in for vibration-proof connection.
6. Insulated throat protects conductor insulation.
7. "O" ring forms tight seal to metal surfaces.

Assembly Instructions

1. Slide compression nut with captive floating sleeve over end of Type A conduit (exposing about one inch of conduit). Sleeve self-aligns to compensate for minor conduit surface irregularities or non-uniform conduit wall thickness. Nut moves freely over sleeve, which doesn't rotate. Nut can't bind...conduit can't twist during assembly or disassembly.

2. Use connector body as "wrench" to thread rugged nylon ferrule into inner wall of conduit. (The octagonal head of the ferrule mates precisely with the matching octagonal recess in the connector body.) The ferrule threads bite deeply into the conduit wall for a positive seal. Provides superior pull-out resistance.

3. Wrench-tighten until nut contacts shoulder on body to complete assembly. This tightly compresses conduit between sleeve and ferrule for a positive liquidtight seal. When tightened, floating sleeve extends beyond compression nut to protect connection from strain of flexing.

Liquidtight STNM™ Type A Flexible Nonmetallic Conduit Connectors

NEC/CEC — Suitable for use in:
Class I, Division 2

Applications

- STNM™ connectors with exclusive "floating sleeve" reduces installation time when connecting to Type A nonmetallic flexible conduit.

Features

- Eliminates common connection problems and assures a liquidtight, concretetight seal against oil, water, dirt and chemicals.
- The positive, pull out proof seal formed by a STNM™ connector begins with its deep-threaded ferrule that bites into the inner wall of the conduit.
- The sleeve separates the STNM™ series apart from ordinary connectors. The sleeve is held captive within a compression nut that allows it to move freely and self-align with the conduit having a slightly irregular surface or varying wall thickness.
- The nut rides only on the sleeve and not on the conduit. It cannot bend or twist the conduit, and thereby protects wiring. When fully tightened, the flared sleeve extends beyond the nut, providing additional protection from flexing.

- Ease of assembly and disassembly of STNM™ connectors permits make-up of harnesses in advance for fast, simple connections during production line assemblies.
- Available in straight and 90° styles from 3/8" thru 2". Insulated throats are standard on all connectors. Connectors are furnished with locknut and neoprene "O" ring for a liquidtight seal to JIC boxes.

Standard Material/Finish

- Body: steel
- Compression nut: steel
- Sleeve: steel
- Ferrule: nylon
- Wire mesh: stainless steel
- "O" ring: neoprene

NEC/CEC Certifications and Compliances

- UL Standard: 514B
- UL Listed: E-11853
- CSA Standard: C22.2 No. 18
- CSA Certified: 065178

PG and ISO Metric Thread Liquidtight Insulated Connectors

For Liquidtight Flexible Metal Conduit

NEC/CEC:
Listed for Ordinary Locations

Applications

- Provides a dependable connection for liquidtight flexible metal conduit.

Features

- Unique long ferrule with more pronounced threads provides over four times UL pull-out requirements. The ferrule also provides maximum surface contact for better sealing and a continuous, permanent, positive metal-to-metal ground.
- Insulated throat protects against wire damage.
- Liquidtight/raintight/oiltight/concretetight.
- Suitable for wet locations.
- Full, machined metric threads.
- Compact design with small turning radius.

PG 3811-STB

Standard Material/Finish

- 3/8" thru 1" straight: steel
- 1-1/4" thru 2" straight and 3/8" thru 2" 90°: malleable iron
- 3/8" thru 1" ferrule: steel; 1-1/4" thru 2" ferrule: aluminum
- Insulators: nylon
- Steel: zinc electroplate
- Malleable iron: zinc electroplate, chromate and epoxy powder coat/zinc electroplate

NEC/CEC Certifications and Compliances

- UL Standard: 514B
- UL Listed: E-11853
- CSA Standard: C22.2 No. 18.3
- CSA Certified: 65178
- PG Metric Thread — German Industry Std. DIN 40430
- ISO Metric Thread — British Standard BS3643 Part 2

COMMERCIAL AND INDUSTRIAL FITTINGS: LIQUIDTIGHT CONDUIT FITTINGS

Liquidtight Accessories

For Liquidtight Flexible Metal Conduit

NEC/CEC:
Listed for Ordinary Locations

Applications

- STG sealing gaskets: gaskets provide a positive seal between shoulder of connector and sheet metal enclosure.

Features

- STG sealing gaskets in sizes 1/4" and 3/8" are one piece elastomeric gaskets. Size 1/2" thru 2" have unique bonded gasket/retaining-ring assembly for easy installation. Sizes 2-1/2" thru 5" have separate gasket and retaining ring. 1/4" and 3/8" available in thermoplastic material.

Wire Mesh Strain Relief

The ST-SR Series with cap can be substituted for any related trade size ST Series cap to convert it to a Liquidtight connector with wire mesh strain relief.

Trade Size (Inches)	Weight per 100 kg (lb)	Catalog Number
3/8	2.45 (5.40)	ST-SR38
1/2	4.85 (10.70)	ST-SR50
3/4	7.30 (16.10)	ST-SR75
1	8.48 (18.70)	ST-SR100
1-1/4	9.71 (21.40)	ST-SR125
1-1/2	12.11 (26.70)	ST-SR150
2	14.56 (32.10)	ST-SR200
2-1/2	26.67 (58.80)	ST-SR250
3	38.78 (85.50)	ST-SR300

COMMERCIAL AND INDUSTRIAL FITTINGS: LIQUIDTIGHT CONDUIT FITTINGS

Appleton

4Q Straight Liquidtight Connectors

NEC/CEC — Suitable for use in the following Hazardous Locations:

- Class I, Division 2 per NEC 501.4(B)
- Class I, Zone 2 per NEC 505.15(C)(2)
- Class II, Division 1 per NEC 502.4(A)(1)(e)
- Class II, Division 2 per NEC 502.4(B)(2)

NEC/CEC — Suitable for use in the following Hazardous Locations:

- Class III, Division 1 per NEC 503.3(A)(2)
- Class III, Division 2 per NEC 503.3(B)
- Intrinsically Safe per NEC 504.20

Applications

- To secure, ground and seal liquidtight flexible metal Conduit, Type LFMC, to boxes and enclosures..

Features

- Tapered threaded male hub — NPT
- Compact, slim diameter with small turning radius
- Furnished with locknut and KO sealing ring.
- Liquidtight/Raintight/Oiltight/Concretetight
- UL Listed NEMA Type 4 when installed into a NPT threaded entry or UL Listed conduit hub (sizes 1-1/2" and larger require thread sealant).
- Suitable for grounding through 1-1/4" trade size per NEC Section 250.118(7)
- For trade sizes 1-1/4" and larger, an internal or external equipment bonding conductor is required. See 4Q-L Series with external ground lug.
- Bonding wedge locknuts are recommended in hazardous locations. See 101 Series.
- Suitable for wet locations
- Long ferrule prevents pullout and tight bend conduit "pop-out"
- Reusable ferrule
- Inspection windows in ferrule to ensure full engagement
- See our patented ferrule wrench which makes ferrule installation easy.

Standard Materials

- Malleable iron body and nut
- Steel ferrule

Standard Finishes

- Zinc electroplated

Options

- Available hot dip/mechanically galvanized.

Type 4Q-38 — Type 4Q-200

Type 4Q-250 — Type 4Q-600

4Q Straight Liquidtight Connectors

Hot-Dip/Mechanically Galvanized with Insulated Throat

NEC/CEC — Suitable for use in the following

Hazardous Locations:

Class I, Division 2 per NEC 501.4(B)

Class I, Zone 2 per NEC 505.15(C)(2)

Class II, Division 1 per NEC 502.4(A)(1)(e)

Class II, Division 2 per NEC 502.4(B)(2)

NEC/CEC — Suitable for use in the following

Hazardous Locations:

Class III, Division 1 per NEC 503.3(A)(2)

Class III, Division 2 per NEC 503.3(B)

Intrinsically Safe per NEC 504.20

Applications

- Secures, grounds and seals liquidtight flexible metal conduit and terminates bonding conductor run externally alongside liquidtight conduit to threaded rigid conduit and IMC.

Features

- Positive grounding type.
- Liquidtight flexible metal conduit to threaded rigid conduit and IMC.
- Female hub — NPT.
- Grounding lug is cast as an integral part of malleable iron gland nut. Provides high ground fault withstand capability.
- Compact, slim diameter with small turning radius.
- Furnished with locknut and KO sealing ring.
- Liquidtight/Raintight/Oiltight/Concretetight.
- UL Listed NEMA Type 4 when installed into a NPT threaded entry or UL Listed conduit hub (sizes 1-1/4" and larger require thread sealant).
- Long ferrule prevents pull-out and tight bend conduit "pop-out".
- Inspection windows in ferrule to ensure full engagement.

Standard Materials

- Malleable iron body and nut
- Steel ferrule

Standard Finishes

- Zinc electroplated

Options

- Hot dip or mechanical galvanize, add suffix **-G** to catalog number. Contact your local representative for pricing and availability.

NEC/CEC Certifications and Compliances

- UL Listed: E-24264
- CSA Certified: 9795

4Q 45° and 90° Liquidtight Connectors

Hot-Dip/Mechanically Galvanized with Insulated Throat

NEC/CEC — Suitable for use in the following

Hazardous Locations:

- Class I, Division 2 per NEC 501.4(B)*
- Class I, Zone 2 per NEC 505.15(C)(2)*
- Class II, Division 1 per NEC 502.4(A)(1)(e)*
- Class II, Division 2 per NEC 502.4(B)(2)*

NEC/CEC — Suitable for use in the following

Hazardous Locations:

- Class III, Division 1 per NEC 503.3(A)(2)*
- Class III, Division 2 per NEC 503.3(B)*
- Intrinsically Safe per NEC 504.20*

Applications

- To secure, ground and seal Liquidtight Flexible Metal conduit, Type LFMC, to boxes and enclosures.

Features

- Tapered threaded male hub NPT.
- Compact, slim diameter with small turning radius.
- Furnished with locknut and KO sealing ring.
- Liquidtight/Raintight/Oiltight/Concretetight
- UL Listed NEMA Type 4 when installed into a NPT threaded entry or UL Listed conduit hub (sizes 1 1/4" and larger require thread sealant).
- Suitable for grounding through 1-1/4" trade size per NEC Section 250.118(7)
- For trade sizes 1-1/2" and larger, an internal or external equipment bonding conductor is required.
- Suitable for use in the following Hazardous Locations:
- Bonding wedge locknuts are recommended in hazardous locations. See 101 Series.
- Suitable for wet locations.
- Long ferrule prevents pullout and tight bend conduit "pop-out".
- Inspection windows in ferrule to ensure full engagement.
- Provided with insulated throat.

Standard Materials

- Malleable iron
- Steel ferrule

Standard Finishes

- Malleable iron - galvanized
- Steel ferrule - zinc electroplated

Options

- Available hot dip/mechanically galvanized.

4Q-FM Liquidtight Combination Couplings

For Threaded RMC and IMC

NEC/CEC — Suitable for use in the following Hazardous Locations:
 Class I, Division 2 per NEC 501.4(B)
 Class I, Zone 2 per NEC 505.15(C)(2)
 Class II, Division 1 per NEC 502.4(A)(1)(e)
 Class II, Division 2 per NEC 502.4(B)(2)

Suitable for use in the following Hazardous Locations:
 Class III, Division 1 per NEC 503.3(A)(2)
 Class III, Division 2 per NEC 503.3(B)
 Intrinsically Safe per NEC 504.20

Applications

- Secures, grounds and seals liquidtight flexible metal conduit to threaded rigid conduit and IMC.

Features

- Female hub — NPT for connection to threaded conduit
- Liquidtight/Raintight/Oiltight/Concretetight
- UL Listed NEMA Type 4 when installed into a NPT threaded entry or UL Listed conduit hub (sizes 1 1/4" and larger require thread sealant).
- Suitable for grounding through 1-1/4" trade size per NEC Section 250.118(7)
- For trade sizes 1-1/2" and larger, an internal or external equipment bonding conductor is required. See 4Q-L Series with external ground lug.
- Bonding wedge locknuts are recommended in hazardous locations. See 101 Series.
- Suitable for wet locations
- Long ferrule prevents pullout and tight bend conduit "pop-out"
- Reusable ferrule
- Inspection windows in ferrule to ensure full engagement.

Standard Materials

- Malleable iron
- Steel ferrule

Standard Finishes

- Zinc plated

Options

- Hot dip or mechanical galvanize, add suffix **-G** to catalog number. Contact your local representative for pricing and availability.

4Q-WM Wire Mesh Liquidtight Connectors with Wire Mesh Strain Relief

With Wire Mesh Grips and Insulated Throats

NEC/CEC — Suitable for use in the following Hazardous Locations:
 Class I, Division 2 per NEC 501.4(B)
 Class I, Zone 2 per NEC 505.15(C)(2)
 Class II, Division 1 per NEC 502.4(A)(1)(e)
 Class II, Division 2 per NEC 502.4(B)(2)

NEC/CEC — Suitable for use in the following Hazardous Locations:
 Class III, Division 1 per NEC 503.3(A)(2)
 Class III, Division 2 per NEC 503.3(B)
 Intrinsically Safe per NEC 504.20

Applications

- To secure, ground and seal liquidtight flexible metal conduit to enclosures and prevent conduit pull-out when subject to motion or strain.

Features

- Tapered threaded male hub NPT
- Furnished with locknut and KO sealing ring.
- Provided with insulated throat
- Wire mesh prevents pull-out and tight end conduit “pop-out”
- Liquidtight/Raintight/Oiltight/Concretetight
- UL Listed NEMA Type 4 when installed into a NPT threaded entry or UL Listed conduit hub (sizes 1-1/4” and larger require thread sealant).
- Suitable for grounding through 1-1/4” trade size per NEC Section 250.118(7)
- For trade sizes 1-1/2” and larger, an internal or external equipment bonding conductor is required. See 4Q-L Series with external ground lug.
- Bonding wedge locknuts are recommended in Hazardous Locations. See 101.
- Suitable for wet locations
- Inspection windows in ferrule to ensure full conduit engagement
- Stainless steel single weave design.

Standard Materials

- Malleable iron body and nut
- Steel ferrule
- Stainless steel

Standard Finishes

- Zinc electroplated
- Wire mesh

Type 4Q-WM

Illustrated Dimensions

Options

- Consult your local representative for 45°, 90°, FM and L (Ground-Tite style) applications.

4Q Liquidtight Sealing Ring Assemblies

With Wire Mesh Grips and Insulated Throats

NEC/CEC:
Rated for Ordinary Locations

Applications

- Provides a positive seal between shoulder of fitting and enclosure

Standard Materials

- Steel Retaining Ring
- Neoprene Gasket

Standard Finishes

- Zinc electroplated

Type 4Q-G

Ground-Tite® 4Q Grounding Liquidtight Connectors

NEC/CEC — Suitable for use in the following Hazardous Locations:
 Class I, Division 2 per NEC 501.4(B)
 Class I, Zone 2 per NEC 505.15(C)(2)
 Class II, Division 1 per NEC 502.4(A)(1)(e)
 Class II, Division 2 per NEC 502.4(B)(2)

NEC/CEC — Suitable for use in the following Hazardous Locations:
 Class III, Division 1 per NEC 503.3(A)(2)
 Class III, Division 2 per NEC 503.3(B)
 Intrinsically Safe per NEC 504.20

Applications

- Secures, grounds and seals liquidtight flexible metal conduit and terminates bonding conductor run externally alongside liquidtight conduit.

Features

- Positive grounding type.
- Tapered threaded male hub NPT.
- Grounding lug is cast as an integral part of malleable iron gland nut. Provides high ground fault withstand capability.
- Compact, slim diameter with small turning radius.
- Furnished with locknut and KO sealing ring.
- Liquidtight/Raintight/Oiltight/Concretetight
- UL Listed NEMA Type 4 when installed into a NPT threaded entry or UL Listed conduit hub (sizes 1 1/4" and larger require thread sealant).
- Bonding wedge locknuts are recommended in hazardous locations. See 101 Series.
- Long ferrule prevents pull-out and tight bend conduit "pop-out".
- Inspection windows in ferrule to ensure full engagement.

Standard Materials

- Malleable iron body and nut
- Steel ferrule

Standard Finishes

- Zinc electroplated

Options

- Hot dip or mechanical galvanize, add suffix **-G** to catalog number. Contact your local representative for pricing and availability.

4Q Liquidtight Connectors

Hot-Dip/Mechanically Galvanized with Insulated Throat

NEC/CEC — Suitable for use in the following Hazardous Locations:

*Class I, Division 2 per NEC 501.4(B)
Class I, Zone 2 per NEC 505.15(C)(2)
Class II, Division 1 per NEC 502.4(A)(1)(e)
Class II, Division 2 per NEC 502.4(B)(2)*

NEC/CEC — Suitable for use in the following Hazardous Locations:

*Class III, Division 1 per NEC 503.3(A)(2)
Class III, Division 2 per NEC 503.3(B)
Intrinsically Safe per NEC 504.20*

Type 4Q — TG

Standard zinc electroplated fittings offer more than adequate protection in areas relatively free of highly corrosive fumes and liquids. However, in an atmosphere where severe contaminants are present, a heavy coating of zinc galvanize offers one of the best protections against corrosion. In the processes of hot-dipping or mechanically galvanizing, a large amount of zinc is deposited on the surface of the base metal to a minimum of .002" or about 10 times the usual electroplating thickness.

In the Series 4Q-TG, mechanically galvanized finish is provided on small sizes through 2" on angle connectors and through 4" on straights. Hot-dip galvanized finish is provided on sizes 2 1/2" and larger on angle connectors and 5" and larger on straights. Mechanical galvanizing provides coating thickness and corrosion protection comparable to the hot-dip process but offers the additional advantage of providing heavy plating on threaded surfaces as well. Mechanical galvanizing meets the performance criteria of ASTM A-153 Class D and B-695 Class 50.

The Process of Mechanical Galvanizing on Smaller Parts Provides:

- Excellent coating uniformity on all surface areas, particularly on threads.
- Complete coating assurance with proper mating of threaded parts.
- A heavier coating than is possible with conventional methods of electroplating.
- Quality and thickness comparable to the hot-dip galvanizing method.
- Favorable comparison with the hot-dip process of parts tested in salt spray and industrial atmospheres.

4QS Straight, 45° and 90° Steel Liquidtight Fittings

NEC/CEC— Suitable for use in the following Governed Locations:
 Class I, Division 2 per NEC 501.10(B)(4)
 Class I, Zone 2 per NEC 505.15(C)(2)
 Class II, Division 2 per NEC 502.4(A)(1)(e)
 Class II, Division 2 per NEC 502.4(B)(2)

NEC/CEC— Suitable for use in the following Governed Locations:
 Class III, Division 1 per NEC 503.3(A)(2)
 Class III, Division 2 per NEC 503.3(B)

Application

- 4QS liquidtight connectors and liquidtight flexible metallic conduit are used in applications where conditions of installation, operation or maintenance require flexibility or protection from liquids, vapors or solids such as: machine tool building, motor and transformer terminations, robotics assembly, air conditioning equipment installation and Class I, Division 2 wiring.

Features

- Tapered threaded male NPT hub.
- Compact, slim diameter with small turning radius.
- Furnished with locknut and sealing ring.
- Liquidtight/Raintight/Oiltight.
- UL Listed liquidtight flexible metal conduit fittings from 3/8" thru 1-1/4" trade sizes are suitable for grounding per NEC 250.118(7).
- Suitable for wet locations.
- Long ferrule prevents pullout and tight bend conduit "pop-out".
- Reusable ferrule.

Standard Material/Finish

- 3/8" thru 1": steel/zinc plated
- 1-1/2" thru 4": malleable iron
- Ferrule: steel/zinc plated
- Sealing ring: nylon

NEC/CEC Certifications and Compliances

- UL Standard: 514B
- UL Listed: 11853
- CSA Standard: C22.2 No.18.3
- CSA Certified: 009795
- NEMA: FB-1

Related Products

- Bonding locknuts are recommended in hazardous locations

COMMERCIAL AND INDUSTRIAL FITTINGS: LIQUIDTIGHT CONDUIT FITTINGS

Appleton OZGEDNEY

4QSS Straight, 45° and 90° Stainless Steel Liquidtight Connectors

NEC/CEC — Suitable for use in the following Hazardous Locations:
 Class I, Division 2 per NEC 501.10(B)(2)
 Class I, Zone 2 per NEC 505.15(C)(2)
 Class II, Division 2 per NEC 502.10(B)(1)

NEC/CEC — Suitable for use in the following Hazardous Locations:
 Class III, Division 1 per NEC 503.10(A)(3)
 Class III, Division 2 per NEC 503.10(B)
 Intrinsically Safe per NEC 504.20

Applications

- 4QSS high grade stainless steel liquidtight connectors and liquidtight flexible metallic conduit are used in applications where conditions of installation, operation or maintenance require flexibility or protection from liquids, vapors or solids such as: machine tool building, motor and transformer terminations, robotics assembly, air conditioning equipment installation and Class I, Division 2 wiring.

Features

- Superior corrosion resistance.
- Liquidtight/Raintight/Oiltight.
- Suitable for wet locations.
- Tapered threaded male NPT hub.
- Furnished with locknut and sealing ring.
- Compact, slim diameter with small turning radius.
- UL Listed liquidtight flexible metal conduit fittings from 3/8" thru 1-1/4" trade sizes are suitable for equipment grounding per NEC article 250.118.
- Long ferrule prevents pullout and tight bend conduit "pop-out".
- Reusable ferrule.

Standard Material

- Body and nut 316 grade stainless steel
- Ferrule: Nickel plated steel
- Sealing rings: nylon

NEC Certifications and Compliances

- UL Standard: 514B
- cULus Listed: E-11853
- CSA Standard: C22.2 No.18.3

COMMERCIAL AND INDUSTRIAL FITTINGS: LIQUIDTIGHT CONDUIT FITTINGS

 **Apleton** OZGEDNEY

NEER™ Zinc Straight Liquidtight Connectors

For Liquidtight Flexible Metal Conduit and Type B Nonmetallic Conduit.

NEC/CEC:
Suitable for use in Class I, Division 2

Applications

- Terminate and seal liquidtight flexible metal conduit to either oiltight, liquidtight, or raintight box or enclosure.
- Connectors can be used with tapered thread female entry or unthreaded knockout.

Features

- Furnished with locknut and sealing ring.
- Liquidtight/raintight/oiltight.
- Suitable for grounding 3/8" thru 1-1/4".
- Suitable for wet locations.

Standard Material

- Zinc diecast

NEC/CEC Certifications and Compliances

COMMERCIAL AND INDUSTRIAL FITTINGS: LIQUIDTIGHT CONDUIT FITTINGS

Applenton OZGEDNEY

NEER™ Nylon Liquidtight Connectors

For Type B Nonmetallic Conduit.

NEC:
Listed for Ordinary Locations

NEC:
Listed for Ordinary Locations

Applications

- Terminate and seal liquidtight flexible Type B nonmetallic conduit, to either oiltight, liquidtight, or raintight box or enclosure.
- Connectors can be used with tapered thread female entry or unthreaded knockout.

Features

- All nylon construction resists salt water, weak acids, gasoline, alcohol, oil, grease and common solvents.
- No disassembly required; push the conduit or tubing onto the ferrule, then tighten the domed sealing nut.
- Connectors are reusable.
- Furnished with locknut and sealing ring.
- Suitable for wet locations.
- Liquidtight/raintight/oiltight.

Standard Material

- Nylon: gray

NEC Certifications and Compliances

Aluminum and Steel Liquidtight Strain Relief Cord and Cable Connectors

NEC/CEC — Suitable for use in:
 Class I, Division 2
 Class II, Division 1 and 2
 Class III,
 NEMA 3R

Application

- Provide a liquidtight and strain relief termination for flexible type neoprene, hypalon, and PVC jacketed power or control cord and cable.
- For use in wet or dry locations sealing electrical connections against dust and dirt, oil, water or other atmosphere containing moisture.

Features

- Available in straight or 90°, aluminum or steel construction to meet the requirements of rugged service on all types of equipment and in all non-hazardous areas.
- Color coded identification label clearly states the catalog number and minimum-maximum cable diameter range for which the connector is designed.
- Neoprene sealing grommet firmly but safely grips cable jacket providing strain relief while protecting internal wiring connections against external tension on cable or cord.
- Steel or Teflon® washer reduces friction between grommet and connector cap providing even pressure distribution, eliminating leakage resulting from grommet distortion.
- Large aluminum connectors 1-1/2" thru 4" and all steel connectors are constructed with hex head cap.
- For particularly harsh applications, wire mesh strain reliefs may be used with cord and cable connectors.
- CG Series in aluminum construction is available in straight type from 1/4" thru 4", 90° type from 3/8" thru 1-1/4".
- CG Series in steel construction is available in straight type from 1/4" thru 2" and 90° type from 3/8" thru 1-1/4".
- Silicone free.

Standard Materials

- Aluminum connectors
 - Straight body: aluminum
 - 90° body: cast aluminum
 - Cap: copperfree (4/10 of 1% or less) aluminum
 - Sealing grommet: neoprene
 - Washer: steel or Teflon®
 - Wire mesh strain relief: stainless steel
 - Cap on wire mesh: copperfree (4/10 of 1% or less) aluminum
- Steel connectors
 - Straight body: machined steel
 - 90° body: malleable iron
 - Cap: machined steel
 - Sealing grommet: neoprene
 - Washer: steel or Teflon ①
 - Wire mesh strain relief: stainless steel
 - Cap on wire mesh: steel, zinc plate

Options

- PVC coating available on select connectors. Add suffix -PVC to catalog number.

NEC/CEC Certifications and Compliances

- UL Standard: 514B
- UL Listed: E14817
- CSA Standard: C22.2 No. 18.3
- CSA Certified: 065178

Stainless Steel and Nickel Plated Aluminum Liquidtight Cable and Cord Connectors

NEC/CEC — Suitable for use in:
Class I, Division 2
Class II, Division 1 and 2
Class III, Division 1 and 2
NEMA 3R

Application

- Provide a liquidtight and strain relief termination for flexible type neoprene, hypalon, and PVC jacketed power or control cord and cable.
- For use in washdown areas or high moisture environments in: food processing plants, petrochemical facilities, wastewater treatment plants, pulp and paper mills and chemical manufacturing facilities.

Features

- Straight connectors available in 3/8" thru 2" hub sizes (NPT).
- Straight connectors with strain relief available in 3/8" thru 1" hub sizes (NPT).
- Exceptional tensile strength.
- High levels of durability in severely corrosive environments filled with saltwater, acids or chemicals.
- Combination tightening surface includes both a hex area and knurled surface on nickel plated aluminum only.
- Embedded O-Ring is standard on stainless steel connectors only.
- Anti-friction washer fits between the nut and bushing for easier compression on the nickel plated aluminum connectors only.

Standard Materials

- Stainless steel connectors
 - Body and compression nut: type 304 stainless steel
 - O-Ring: Viton [Ⓢ]
 - Wire mesh strain relief: stainless steel
- Nickel plated copper free (4/10 of 1% max.) aluminum connectors
 - Body and compression nut: nickel plated aluminum
 - Wire mesh strain relief: stainless steel

NEC/CEC Certifications and Compliances

- UL Standard: 514B
- UL Listed: E14817
- CSA Standard: C22.2 No. 18.3
- CSA Certified: 065178

Grip-Tite® Strain Relief Connectors

NEC/CEC:
Listed for Ordinary Locations

Applications

- To secure and seal cords or cables entering enclosures or raceways.

Features

- Grip-tite style - 2-piece internal design features a nylon gripper for exceptional pullout protection and a neoprene grommet for a moisture-proof seal (up to 1" dia. cord range).
- Dual-grommet style - for over 1" dia. cord range. Removable insert allows for wider range of cable diameters within single fitting.
- Simple installation, cord can be installed without disassembly of the fitting.
- Liquidtight/Oiltight/Raintight.
- UL Listed NEMA 4, 6 and 12 when installed into a NPT threaded entry or UL Listed conduit hub (sizes 1 1/4" and larger require thread sealant).
- Rated at +90 °C (+194 °F).
- Suitable for NEMA 4 enclosures and other wet locations
- Male tapered thread NPT.
- Slim diameter profile allows close spacing between connectors.
- Furnished complete with sealing ring and locknut.
- Colored gripper allows for easy identification.

Straight
Type SR-50-250

Standard Materials

- Malleable iron body and gland nut, nylon gripper, neoprene grommet, PVC or Buna-N Sealing ring, steel locknut

Standard Finishes

- Body, gland nut and locknut — zinc plated

Options

- Mechanical Galvanized. Contact your local representative.

NEC/CEC Certifications and Compliances

- UL Standard: ANSI/UL 514B
- UL Listed: E-11857
- CSA Standard: C22.2 No. 18
- CSA Certified: 009795
- Fed. Spec: W-F-406E

① Remove enough jacket to get conductors through Throat I.D.

② UL Listed NEMA 4, 6 and 12 when installed into a NPT threaded entry or UL Listed conduit hub.

Gold Seal Strain Relief Connectors

NEC/CEC:
Listed for Ordinary Locations

Features

- Tapered threaded male hub NPT.
- Watertight/Oiltight.
- UL Listed NEMA 4 and 6 when installed into a NPT threaded entry or UL Listed conduit hub (sizes 1 1/4" and larger require thread sealant).
- Rated at +90 °C (+194 °F).

Standard Materials

- Malleable iron
- Grommets – PVC

Standard Finishes

- Zinc plated

Illustrated Dimensions

90° Connector
Type SR9-502

NEC/CEC Certifications and Compliances

- UL Standard: ANSI/UL 514B
- UL Listed: E-11857
- CSA Standard: C22.2 No. 18
- CSA Certified: 009795
- Fed. Spec: Commercial Item Description A-505-52

① Remove enough jacket to get conductors through Throat I.D.

② UL Listed NEMA 4, 6 and 12 when installed into a NPT threaded entry or UL Listed conduit hub.

Type CGA Aluminum Straight Strain Relief Cord Grip Connectors

NEC/CEC:
Listed for Ordinary Locations

Features

- Tapered threaded male hub NPT.
- Watertight/Oiltight.
- With neoprene grommets.
- Rated at +90 °C (+194 °F).

Standard Materials

- Copperfree (4/10 of 1% max.) aluminum

NEC/CEC Certifications and Compliances

- UL Standard: ANSI/UL 514B
- UL Listed: E-14817
- CSA Standard: C22.2 No. 18
- Fed. Spec: Commercial Item Description A-505-52

Type CGA Aluminum 90° Strain Relief Cord Grip Connectors

NEC/CEC:
Listed for Ordinary Locations

Features

- Tapered threaded male hub NPT.
- Watertight/Oiltight.
- With neoprene grommets.
- Rated at +90 °C (+194 °F).

Standard Materials

- Copperfree (4/10 of 1% max.) aluminum

NEC/CEC Certifications and Compliances

- UL Standard: ANSI/UL 514B
- UL Listed: E-14817
- CSA Standard: C22.2 No. 18
- Fed. Spec: Commercial Item Description A-505-52

Type CGA Aluminum Straight and 90° Strain Relief Cord Grip Connectors With Wire Mesh Grips

NEC/CEC:
Listed for Ordinary Locations

Features

- With neoprene grommets.
- Stainless steel wire mesh grips for superior cable pullout resistance.
- Tapered threaded male hub NPT.
- Watertight/Oiltight.
- Rated at +90 °C (+194 °F).

Standard Materials

- Copperfree (4/10 of 1% max.) aluminum

Bus Drop Cable Supports and Clamps

NEC/CEC:
Rated for Ordinary Locations

Applications

- “Bus-Drop” cable clamps designed for exposed branch feeder installations.
- Supports cable in flexible connecting circuits used to feed equipment. Cable is run in fixed overhead bused structures to a point directly above equipment then dropped with a 90° bend. At the point of drop, the cable clamp is installed to support the cable.
- Mooring cable clamps are used to attach a guy wire to the cable where it leaves bus structure, thus preventing wire terminal strain and possible conductor breakage.

Features

- Clamps provide maximum versatility of installation where equipment is likely to be moved from one location to another. Installation is fast and modification is simple.
- One clamp covers entire range of cable sizes and can be used for one 90° bend.
- Two clamps, back to back, allow for an additional loop providing extra cable footage when a machine is likely to be moved.

Types A, ABB, BB and BBL Insulating Bushings

For Threaded Rigid Conduit and IMC.

NEC/CEC:
Listed for Ordinary Locations

NEC/CEC:
Listed for Ordinary Locations

Type A

Applications

- To insulate end of threaded rigid and IMC.

NEC/CEC Certifications and Compliances

- UL Listed: E-11853
- CSA Certified: 065183

Type A

Types A, ABB, BB and BBL Insulating Bushings

For Threaded Rigid Conduit and IMC.

NEC/CEC:
Listed for Ordinary Locations

Type ABB

Applications

- A combination of Type "A" and "BB" Bushings. For insulating cables passing through metal boxes or troughs.

Features

- High impact black thermosetting phenolic bushings, with at +150 °C (+302 °F) UL temperature rating, that will not soften, melt or burn.

NEC/CEC Certifications and Compliances

- UL Listed: E-20933
- CSA Certified: 011584
- UL Standard: ANSI/UL 514B
- CSA Standard: C22.2 No. 18
- NEMA Standard: FB-1

Types B, HB, AB, RB, SB and SBT Specification Grade Insulated Bushings

For Rigid Metal Conduit, IMC and EMT.

NEC/CEC:

Listed for Ordinary Locations

Applications

- To protect insulated conductors from abrasion during pulling and from mechanical vibration.
- To provide voltage gradient between live conductors and ground at point of electrical and mechanical stress on conductor/insulation.

Features

- Molded-on high impact phenolic thermosetting insulation.
- UL insulation temperature rating 150°C.
- Positive metallic conduit stop.

Standard Materials

For Threaded Rigid and IMC

- **Type B:**
 - 1/2" and 3/4" - Steel
 - 1" to 6" - Malleable iron
- **Type HB:**
 - 1/2" and 3/4" - Steel
 - 1" to 6" - Malleable iron
- **Type AB:** Aluminum Bushing
- **Type RB:** Bronze, for highly corrosive atmospheres

For Threadless Rigid and IMC

- **Type SB:**
 - 1/2" and 3/4" - Steel
 - 1" to 6" - Malleable iron

For EMT

- **Type SBT:**
 - 1/2" and 3/4" - Steel
 - 1" to 6" - Malleable iron

Standard Finishes

Type B:

- 1/2" and 3/4", 1" to 6" - Zinc plated

Type HB:

- 1/2" and 3/4", 1" to 6" - Mechanical/Hot dip galvanized

Type AB: Aluminum Bushing

Type RB: Bronze, for highly corrosive atmospheres

Type SB:

- 1/2" and 3/4", 1" to 6" - Zinc plated with stainless steel screws

Type SBT:

- 1/2" and 3/4", 1" to 6" - Zinc plated with stainless steel screws

Options

- Type B insulated bushings are also available for threadless rigid and IMC in the following materials:
- Type HSB: Malleable Iron or Steel Mechanical/Hot Dip Galvanized
- Type ASB: Aluminum
- Type RSB: Bronze

NEC/CEC Certifications and Compliances

- UL Standard: ANSI/UL 514B
- UL Listed: E-11853
- CSA Standard: C22.2 No. 18
- CSA Certified: 011584
- NEMA: FB-1

OZGEDNEY

COMMERCIAL AND INDUSTRIAL FITTINGS: BUSHINGS AND LOCKNUTS

Types BLG, HBLG, ABLG and RBLG Specification Grade Insulated Grounding Bushings

For Threaded Rigid Conduit and IMC.

NEC/CEC:
Listed for Ordinary Locations

Applications

- To provide a compact means of grounding conduit through an Insulated Bushing.
- To protect insulated conductors from abrasion during pulling and mechanical vibration.
- To provide voltage gradient between line conductors and ground at point of electrical and mechanical stress on conductor insulation.

Features

- Tin plated copper saddle for use with copper or aluminum conductors from #8 to 4/0.
- Copper conductor only for #14-4 lug and 250-500 lug.
- Allows easy insertion of grounding conductor for thru or end connection.
- Low grounding connector profile.
- Spring action design maintains positive firm contact on grounding conductor.
- Set screw provides fixed alignment and positive ground continuity.
- Phenolic insulation, with 150 °C U.L. rating, molded on over metallic conduit stop will not shatter or shrink at sub-zero temperatures.
- Lugs not sold separately.

Standard Materials

Type BLG:

- 1/2" and 3/4" - Steel
- 1" to 6" - Malleable iron

Type HBLG:

- 1/2" and 3/4" - Steel
- 1" to 6" - Malleable iron

Standard Finishes

Type BLG:

- 1/2" and 3/4", 1" to 6" - Zinc plated with stainless steel screws

Type HBLG:

- 1/2" and 3/4", 1" to 6" - Mechanical/Hot dip galvanized with stainless steel screws

Options

- Type BLG grounding bushings are also available for use on threaded conduit in Malleable Iron/Hot Dip Mechanically Galvanized - Specify Type HBLG. Contact your local representative for pricing and availability.

NEC/CEC Certifications and Compliances

- UL Standard: ANSI/UL 514B, 467, 468
- UL Listed: E-24264
- CSA Standard: C22.2 No. 41
- CSA Certified: 015978
- NEMA: FB-1

① Solid or stranded for No. 4 awg or smaller; stranded for No. 2 or larger. Copper conductor only for #14-4 lug and 250-500 lug.

Types BLG, HBLG, ABLG and RBLG Specification Grade Insulated Grounding Bushings

For Threaded Rigid Conduit and IMC.

NEC/CEC:
Listed for Ordinary Locations

Applications

- To provide a compact means of grounding conduit through an Insulated Bushing.
- To protect insulated conductors from abrasion during pulling and mechanical vibration.
- To provide voltage gradient between line conductors and ground at point of electrical and mechanical stress on conductor insulation.

Features

- Tin plated copper saddle for use with copper or aluminum conductors from #8 to 4/0.
- Copper conductor only for #14-4 lug and 250-500 lug.
- Allows easy insertion of grounding conductor for thru or end connection.
- Low grounding connector profile.
- Spring action design maintains positive firm contact on grounding conductor.
- Set screw provides fixed alignment and positive ground continuity.
- Phenolic insulation, with 150°C U.L. rating, molded on over metallic conduit stop will not shatter or shrink at sub-zero temperatures.
- Lugs not sold separately.

Standard Materials

Type ABLG:

- Aluminum bushing with stainless steel screws

Type HRBLG:

- Bronze bushing with stainless steel screws

Options

- Type ABLG grounding bushings are also available for threadless conduit in bronze and/or aluminum. Specify: Type RSBLG for bronze bushings or Type ASBLG for aluminum bushings. Contact your local representative for pricing and availability.

NEC/CEC Certifications and Compliances

- UL Standard: ANSI/UL 514B, 467
- UL Listed: E-24264
- CSA Standard: C22.2 No. 41
- CSA Certified: 015978
- NEMA: FB-1

① Solid or stranded for No. 4 awg or smaller; stranded for No. 2 or larger. Copper conductor only for #14-4 lug and 250-500 lug.

Type SBLG Specification Grade Insulated Grounding Bushings

For Threadedless Rigid Conduit and IMC.

NEC/CEC:

Listed for Ordinary Locations

Applications

- Provides a compact means of grounding conduit through an insulated bushing.
- Protects insulated conductors from abrasion during pulling and mechanical vibration.
- Provides voltage gradient between line conductors and ground at point of electrical and mechanical stress on conductor insulation.

Features

- Tin plated copper saddle for use with copper or aluminum conductors.
- Copper conductor only for #14-4 lug and 250-500 lug.
- Allows easy insertion of grounding conductor for thru or end connection.
- Low grounding connector profile.
- Spring action design maintains positive firm contact on grounding conductor.
- Set screw provides fixed alignment and positive ground continuity.
- Phenolic insulation, with 150°C UL rating, molded on over metallic conduit stop will not shatter or shrink at sub-zero temperatures.
- Lugs not sold separately.

Standard Materials

- Bushings 1/2" and 3/4" - Steel
- Bushings 1" to 6" - Malleable iron
- Grounding Saddle - Tin plated copper
- Clamping tension body - Stainless steel
- All Screws - Stainless steel

Standard Finishes

- Bushings 1/2" and 3/4" - Zinc plated
- Bushings 1" to 6" - Zinc plated

Options

- Type SBLG grounding bushings are also available for use on threadedless conduit in Malleable Iron/Hot Dip Mechanically Galvanized - Specify Type HSBLG. Contact your local representative for pricing and availability.
- Caps to prevent entry of foreign matter into conduit prior to pulling cables are available. See Type PPC.

NEC/CEC Certifications and Compliances

Conduit Bushings for Rigid Metal Conduit and IMC

NEC/CEC:
Listed for Ordinary Locations

Applications

- Used with a locknut to terminate rigid metal conduit or IMC conduit to a box or enclosure.

Features

- Provides a smooth pulling surface.

Material/Finish

- BU: malleable iron/zinc electroplated
- BBU: impact resistant plastic or thermoplastic

NEC/CEC Certifications and Compliances

- UL Standard: 514B
- UL Listed: E-11853,
- CSA Standard: C22.2 No. 18.3
- CSA Certified: 065178
- NEMA: FB-1

Insulated Grounding Bushing for Threadless and Threaded RMC IMC

GIB-LS-AC and IBC-LS-AC Series - with Aluminum Lay-In-Lug™ for Copper or Aluminum Conductors.

NEC/CEC:
Listed for Ordinary Locations

Applications

- GIB-LS Series insulated bushings fasten and ground threadless rigid metal conduit to an enclosure.
- GIB-L Series insulated bushings fasten and ground threaded rigid metal conduit to an enclosure.
- Can be used with a locknut to terminate conduit at an enclosure.
- Lug used to connect bonding jumper to a neutral bus bar.

Features

- Temperature rating +150 °C (+302 °F).
- Insulating liner material is self-extinguishing.
- The plastic liner is tough. It won't chip, crack, swell or shrink. It resists corrosion, chemicals and temperature extremes. Surface friction is so low that wires can be pulled with virtually no abrasion on the cable insulation.

- GIB-LS Series is provided with a set-screw allowing fitting to lock bushing in any desired position.
- UL listed for use with copper or aluminum grounding conductors.
- Lugs not sold separately.

Material/Finish

- Body: malleable iron/zinc plated
- Lug: aluminum/tin plated or bronze/bright dip
- Clamping and set screw: steel/zinc plated

NEC/CEC Certifications and Compliances

- UL Standard: 467
- UL Listed: E6581
- CSA Standard: C22.2 No. 41
- NEMA: FB-1

NEER™ Zinc Bushings

NEC:
Listed for Ordinary Locations

NEC/CEC:
Listed for Ordinary Locations

GB: Insulated

Applications

- Used with a locknut to terminate rigid and IMC conduit to a box or enclosure.
- Provides a smooth pulling surface.

Features

- Plastic throat liner prevents damage to wire insulation.
- Insuliner rated at 150 °C (302 °F).

Material/Finish

- Zinc diecast

NEC Certifications and Compliances

- UL Standard: 514B
- UL Listed: E32539
- NEMA: FB-1

PB-D: Insulating

Applications

- Threaded plastic bushings are used at the end of threaded conduit, or conduit connector, to provide smooth well rounded bearing surface for wires or cables as required by the National Electrical Code.

Features

- Temperature rating is 105 °C (221 °F).

Material/Finish

- Gray polypropylene

NEC/CEC Certifications and Compliances

- UL Standard: 514B
- UL Listed: E61301
- CSA Standard: C22.2 No. 18.3
- CSA Certified: 229356

NEER™ Zinc Grounding Type Insulated Bushings

For Rigid Conduit and IMC

NEC/CEC:
Listed for Ordinary Locations

Applications

- Used with a locknut to terminate rigid metal conduit or IMC conduit to a box or enclosure.

Features

- Threaded (NPS) for rigid conduit and IMC.
- Temperature rating 150 °C.
- Low surface friction permits pulling of wires with virtually no abrasion on the cable insulation.
- Set screw provided with each fitting locks bushing in any desired position.
- For use with copper or aluminum grounding conductors.

Material/Finish

- Body: zinc
- Lug: aluminum/tin plated
- Clamping screw: steel/zinc plated
- Set screws: steel/zinc plated

NEC/CEC Certifications and Compliances

- UL Standard: 467
- UL Listed: E37337
- CSA Standard: C22.2 No. 41
- CSA Certified: 208044
- NEMA: FB-1

NEER™ Standard Conduit Locknuts

NEC/CEC:
Listed for Ordinary Locations

NEC/CEC:
Rated for Ordinary Locations

L-D: Zinc Diecast

Applications

- For securing threaded conduit or connectors with tapered or straight thread to a knockout or unthreaded slip hole.

Features

- Single cast thread eliminates cross-threading.
- UL Listed as a fittings locknut and stand alone rigid conduit locknut.
- All locknuts are symmetrical and can be assembled from either side.
- Conical flange on either side enters the knockout creating a 360° ground path.

Material/Finish

- Zinc diecast

NEC/CEC Certifications and Compliances

NEER™ Standard Conduit Locknuts

NEC:
Listed for Ordinary Locations

NEC:
Listed for Ordinary Locations

GL: Bonding Wedge

Applications

- Used with bushings to bond threaded rigid conduit and IMC to boxes, cabinets or other enclosures where locknut is exposed.

Features

- Threaded for rigid conduit and IMC.

Material/Finish

- Steel/zinc plated

NEC Certifications and Compliances

- UL Standard: 467
- UL Listed: E37337
- NEMA: FB-1

LS: Bonded with Neoprene Gasket

Applications

- Provides a wet location/raintight seal when securing threaded conduit or connectors with tapered or straight thread, to a knockout or unthreaded slip hole of a box or enclosure.

Material/Finish

- Stamped steel/zinc plated

NEC Certifications and Compliances

- UL Standard: 514B
- UL Listed: E32539
- NEMA: FB-1

Ground Clamps

Cable Tray

NEC/CEC:
Listed for Ordinary Locations

Applications

- Terminates ground wire to cable tray.

Features

- For aluminum or copper conductors.
- 1/4" hex wrench tightens both tray and conductor set screws.
- Tray-gripping serrations bite through insulating oxide on surface of aluminum tray.
- For 1/2" max. straight tray rail, or 1/4" 90° tray rail.
- Conductor size #6 to 250 MCM

Standard Materials

- Clamp - extruded aluminum
- Screws - steel

Standard Finishes

- Clamp - tin plated
- Screws - zinc electroplated

Options

Stainless steel screws are available - add suffix **SS**

NEC/CEC Certifications and Compliances

- UL Standard: 467
- UL Listed: E-24264
- CSA Standard: C22.2 No. 41
- CSA Certified: 009795
- For copper conductors only

Ground Clamps

Universal Ground Clamp System

NEC/CEC:
Listed for Ordinary Locations

Applications

- For connecting grounding conductors to cold water ground pipe in sizes 1-1/4" through 12".

Features

- Standard built-in ground wire connector for #8 Sol. through #2 Str. AWG wire.
- Cast Bronze clamps are suitable for direct burial and wet locations.

Standard Materials

- Catalog Numbers with suffix "G" - malleable iron
- Catalog Numbers with suffix "B" - bolts and nuts - steel
- Catalog Numbers with suffix "B" - cast bronze

Standard Finishes

- Catalog Numbers with suffix "G" - Hot dip galvanized
- Catalog Numbers with suffix "B" - bolts and nuts - silicon bronze

NEC/CEC Certifications and Compliances

- UL Standard: 467
- UL Listed: E-24264
- CSA Standard: C22.2 No. 18
- CSA Certified: 009795
- Fed. Spec: W-F-406E

Ground Clamps

Commodity Grade

NEC/CEC:
Listed for Ordinary Locations

Applications

- To ground a conductor to metallic pipe, tubing or ground rod.

Features

- High strength cast copper alloy.
- Screws electroplated to resist corrosion.
- GC: Bare wire clamp from #10 solid to #3 stranded AWG.
- GCA: Armored cable or rigid conduit clamp from #8 solid to #4 stranded AWG.
- GCH: Rigid conduit clamp from #10 solid #4 stranded AWG.
- GCA and GC-100-02B are reversible for attachment to ground rods.

Standard Materials

- Casting - copper alloy
- Screws - steel

Standard Finishes

- Copper alloy - natural finish
- Screws - zinc electroplated

NEC/CEC Certifications and Compliances

- UL Standard: 467
- UL Listed: E-24264
- CSA Standard : C22.2 No. 41
- CSA Certified: 057250

Ground Connectors

All Copper Alloy — Specification Grade

NEC/CEC:
Listed for Ordinary Locations

Applications

- For cable connection parallel or at right angles to pipe or rod.

Features

- A high strength corrosion-resistant copper alloy ground connector connecting a ground wire either parallel or at right angles to a ground rod or pipe.
- A positive ground is assured by the clamping pressure that can be applied by the high strength silicon bronze U-bolt, nuts and lock washers.
- Type ABG connectors are suitable for direct burial.
- For ground pipe larger than 1 1/2" use Type CG Ground Connector.

NEC/CEC Certifications and Compliances

- UL Standard: 467
- UL Listed: E-24264
- CSA Standard : C22.2 No. 41
- CSA Certified: 015978

Ground Connectors

All Copper Alloy — Specification Grade

NEC/CEC:
Listed for Ordinary Locations

Applications

- For cable connection either parallel or at right angle to pipe.
- A high strength corrosion-resistant copper alloy ground connector having a reversible contact plate which permits the ground wire to be connected either at right angles or parallel to a ground pipe.
- The fitting is designed so that the saddle can be installed before the ground connection is made.
- High strength silicon bronze hardware permits high clamping pressures to be applied.
- For ground pipe smaller than 2" use Type ABG.
- Type CG connectors are suitable for direct burial and wet locations.

Type CG

Ground Connectors

All Copper Alloy — Specification Grade

CEC:
Listed for Ordinary Locations

Applications

- This ground connector is used for grounding “H” column fence posts. Its design eliminates the need for drilling the post.
- To attach, loosen the nut sufficiently to allow the end of the “J” bolt to slip over the flange, assemble the cable into the fitting and then tighten.

Standard Materials

- Current carrying parts - cast copper alloy

Standard Finishes

- “J” bolt, nut and washer - hot dip galvanized steel

CEC Certifications and Compliances

- CSA Standard : C22.2 No. 41
- CSA Certified: 015978

Type TG

Ground Connectors

All Copper Alloy — Specification Grade

NEC/CEC:
Rated for Ordinary Locations

Applications

- An economical ground connector for connecting a ground wire to any flat surface.
- Copper alloy body and silicon bronze bolt, nut and lock washer combine strength and corrosion-resistance to insure a positive ground connection.
- HEX-CUP construction of the fitting simplifies installation by requiring only a single wrench for tightening.

Type KGM
One-Piece Design

Illustrated Dimensions

Ground Connectors

All Copper Alloy — Specification Grade

NEC/CEC:
Listed for Ordinary Locations

Applications

- For connecting two parallel cables of the same or varying sizes to any flat surface.
- Installation of connectors is simplified by HEX-CUP construction.
- Cables are gripped by the interlocking clamp, used throughout the line of ground devices.
- Copper alloy body and silicon bronze bolts, nuts and lock washers make a completely corrosion resistant fitting and permit high pressure to be applied - insuring a positive ground connection.

NEC/CEC Certifications and Compliances

- UL Standard: 467
- CSA Standard : C22.2 No. 41
- CSA Certified: 015978
- Suitable for direct burial

NOTE: Bolts furnished will fasten connector to plate 1/4" thick. Longer bolts will be furnished when necessary if plate thickness is specified. Contact your local representative.

XTP and XTPC Solderless Combination T and Parallel Taps

NEC:
Listed for Ordinary Locations

Applications

- XTP - A combination connector for use as either a "T" or Parallel Tap, designed to take a wide range of wire sizes on main or tap.
- One piece construction eliminates detachable parts and permits easy assembly.

Features

- Each fitting takes a range of cable sizes.
- Equipped with brass screws and brass or bronze pressure plates. Wide brass compression set screws, with rounded ends, covering the full width of the conductor cavity are used.
- Castings are of high conductivity copper alloy and are so designed, that high clamping pressure can be exerted, and maximum surface contact is provided with the wires throughout the specified range.

Standard Materials

- XTP - High conductivity copper alloy body - Brass socket set screws with brass or copper alloy pressure plates
- XTPC - Canvas bakelite phenolic with stainless steel spring clips. No taping is required

NEC Certifications and Compliances

- UL Standard: 486A
- UL Listed: E-7512
- Fed. Spec: W-S-610

Type XTP as a Parallel Tap

Type XTP as a "T" Tap

Type XTP Connector

Type XTPC Cover

Type XTPC Cover as a Parallel Tap

Type XTPC Cover as a "T" Tap

TO ORDER COVER SPECIFY:

- Catalog number.
- Outside diameter of cables.
- If covers are for "T" or parallel connection.

XTP and XTPC Solderless Combination T and Parallel Taps

① Slotted Set Screws furnished for this size.

Type XLH Solderless Connectors Combination Type Lugs

NEC:
Listed for Ordinary Locations

Features

- Each fitting takes a range of cable sizes.
- Type XL and XLH are identical except that the type XL has a socket set screw, while the type XLH has a hex head screw. Both types are equipped with brass screws and brass or bronze pressure plates on XL011 and XLH011 and larger. Wide brass compression set screws, with rounded ends, covering the full width of the conductor cavity are used on the XL041.
- Castings are of high conductivity copper alloy and are so designed, that high clamping pressure can be exerted, and maximum surface contact is provided with the wires throughout the specified range.

Standard Materials

- Cast copper alloy body and brass screws

NEC Certifications and Compliances

- UL Standard: 486A
- UL Listed: E-7512
- Fed. Spec: W-S-610

NEER™ Ground Clamps

NEC/CEC:
Listed for Ordinary Locations

NEC/CEC:
Listed for Ordinary Locations

GC: Bronze Clamps

Application

- Ground clamps for bare copper conductor.
- Used on water pipes, conduits or pipe electrodes.
- For insulated or bare conductor wire, copper AWG #10 solid to #2 stranded, aluminum #8 stranded to #2 stranded.
- Clamp is reversible.

Standard Material/Finish

- Cast bronze alloy
- Screws: steel/zinc plated

NEC/CEC Certifications and Compliances

- UL Standard: 467
- UL Listed: E37337
- CSA Standard: C22.2 No. 41
- CSA Certified: 208044
- NEMA: FB-1

Type PK Armored/Metal Clad Cable Connectors

For Non-Jacketed Metal Clad Cable

NEC/CEC:
Listed for Ordinary Locations

For Non-Jacketed Metal Clad Cable such as interlocked armor, corrugated metal sheath, smooth aluminum sheath and similar types. Non-watertight for dry locations.

Applications

- Use with any type of metal clad cable to terminate and ground the armor and secure the cable where it enters a cabinet (max. 1/4" thick), through a standard knockout, slip-hole or D and T entrance. These terminators accommodate a wide range of cable armor diameters in a given fitting by simply inserting fibre rings to provide armor stops having smaller diameters. An armor clamp having clamping pieces on each side allows the cable to be centered in the fitting and provides full contact with the armor to insure a positive ground. The armor clamp on the 1-1/4" through 5" trade sizes consists of two clamping pieces (one on each side) as shown in illustration. The 3/4", 1" and 6" trade sizes have one clamping piece located on one side only.

Standard Materials

- Type PK - malleable iron

Standard Finishes

- Type PK - zinc electroplated
- Furnished complete with phenolic insulating bushing, electroplated steel screws and plated steel or malleable iron locknut.

Options

- Optional Type G Lay-In-Lug grounding wire connectors are available. See Cable Supports section for more details and the chart below for available options. Contact your local representative for price and availability.

NEC/CEC Certifications and Compliances

- UL Standard: ANSI/UL 514B
- UL Listed E-36853
- CSA Standard: C22.2 No.18
- CSA Certified: 15553

Type PG Armored/Metal Clad Cable Connectors

For Jacketed Metal Clad Cable

NEC/CEC:
Listed for Ordinary Locations

Applications

- Use with jacketed armored cable.
- To terminate and ground the armor, and to secure and seal cable entrance into a cabinet or terminal box through a standard knockout, slip-hole or DandT entrance.

Features

- Suitable for wet locations
- Gland type (with grounding sleeve and set-screws)

Standard Materials

- **Type PG** - malleable or ductile iron.
- They are supplied with electro-plated grounding screws and pressure ring.
- They are available with stainless steel grounding screws and pressure ring. Contact your local representative for price and availability.

Standard Finishes

- Fittings - zinc plated

Options

- All fittings can be supplied with neoprene gasket, locknut and insulating bushing. (Add Suffix **-LGB.**) Contact your local representative for price and availability.

NEC/CEC Certifications and Compliances

Cable Connectors

For Armored Cable, Flexible Metal Conduit, Interlocked AC-38 Cables, NM and SE Cable

NEC/CEC:
Listed for Ordinary Locations

Applications

- To ground and secure Armored Cable, Flexible Metal Conduit and Interlocked Metal Clad Cables to boxes and enclosures.
- To secure NM and SE Cables to boxes and enclosures.

Features

- Available with insulated throats.
- Male hub threads — NPS.
- All center stopped.
- Provided with locknuts.

Standard Materials

- Malleable iron

Standard Finishes

- Zinc electroplated

NEC/CEC Certifications and Compliances

- KC-50, KC-50T, KC-51 UL Listed for metal clad, armored cable, flexible metal conduit, sheathed cable, SE cable: E-11852
- KC-75, KC-75T, KC-76 UL Listed for, armored cable, flexible metal conduit, sheathed cable, SE cable: E-11852
- KC-100, KC-100T, KC-125, KC-125T UL Listed for flexible metal conduit: E-11853
- KC-100, KC-100T, KC-125, KC-125T UL Listed for sheathed cable: E-23237
- KC-100, KC-100T, KC-125, KC-125T UL Listed for SE cable: E-11858
- KC-150 through KC-400 and KC-150T through KC-400T UL Listed for flexible metal conduit: E-11853
- KC-500 and KC-500T: UL and CSA Listing is not applicable
- UL Standard: ANSI/UL 514B
- CSA Standard C22.2 No. 18
- CSA Certified: 009795
- NEMA: FB-1

Cable Connectors

For Armored Cable and Flexible Metal Conduit

COMMERCIAL AND INDUSTRIAL FITTINGS: ARMORED CABLE, METAL CLAD, FLEXIBLE METAL CONDUIT AND NONMETALLIC CONNECTORS

NEC/CEC:
Listed for Ordinary Locations

Application

- To ground and secure Armored Cable and Flexible Metal Conduit to boxes and enclosures.

Feature

- Male hub threads — NPS
- Available with insulated throat.
- Furnished with locknuts.

Standard Materials

- Malleable iron

Standard Finishes

- Zinc electroplated

NEC/CEC Certifications and Compliances

- C-5 through C-8 UL Listed for armored cable: E-11852
- C-8, 24-34 through 24-300 UL Listed for flexible metal conduit: E-11853
- UL Listed flexible metal conduit fittings are suitable for use in Hazardous Location under NEC 501-4(b), Class I, Division 2, and suitable as a grounding means under NEC 350-5.
- CSA Certified for Armored Cable: 009795

**Type C-5

Cable Connectors

For Armored Cable

COMMERCIAL AND INDUSTRIAL FITTINGS: ARMORED CABLE, METAL CLAD, FLEXIBLE METAL CONDUIT AND NONMETALLIC CONNECTORS

NEC/CEC:
Listed for Ordinary Locations

Applications

- To ground and secure armored cable to boxes and enclosures.

Features

- Male hub threads — NPS.
- Cable stop.
- UL Listed for armored cable.
- Furnished with locknuts..

Standard Materials

- Malleable iron

Standard Finishes

- Zinc electroplated

NEC/CEC Certifications and Compliances

- UL Standard: ANSI/UL 514B
- UL Listed: E-11852
- CSA Standard C22.2 No. 18
- CSA Certified: 009795
- NEMA: FB-1

Cable Connectors

For Non-Metallic Sheathed Cable

COMMERCIAL AND INDUSTRIAL FITTINGS: ARMORED CABLE, METAL CLAD, FLEXIBLE METAL CONDUIT AND NONMETALLIC CONNECTORS

NEC/CEC:
Listed for Ordinary Locations

Applications

- Type C-11LS - to secure non-metallic sheathed cable to boxes and enclosures.
- Type 806 and Type 906 Series - to secure non-metallic sheathed cable, service entrance cable and flexible cords to boxes and enclosures.

Features

- Available with insulated throats.
- Furnished with locknuts.
- Male hub threads — NPS.

Standard Materials

- Malleable iron

Standard Finishes

- Zinc electroplated

NEC/CEC Certifications and Compliances

- UL Standard: ANSI/UL 514B
- UL Listed: E-11856

SPEED-LOCK™ Steel Box Connectors and SPEED-LOCK™ Zinc Snap Connectors

Type AMC

COMMERCIAL AND INDUSTRIAL FITTINGS: ARMORED CABLE, METAL CLAD, FLEXIBLE METAL CONDUIT AND NONMETALLIC CONNECTORS

NEC/CEC:
Listed for Ordinary Locations

Applications

- To ground and secure MC, AC and flexible metal conduit to boxes and enclosures.
- For steel box installations.

Features

- No locknut required.
- Single-unit or duplex construction with captive clamp.
- Connects over 100 sizes of MC, AC or flexible metal conduit with just four fittings.
- Easy to install. Just tilt, insert and snap down.
- Single-unit construction eliminates loose component parts.
- Integral red plastic insulated throat busing provides maximum protection for wire insulation.

Standard Material/Finish

SPEED-LOCK™ Steel Box Connectors and SPEED-LOCK™ Zinc Snap Connectors

COMMERCIAL AND INDUSTRIAL FITTINGS: ARMORED CABLE, METAL CLAD, FLEXIBLE METAL CONDUIT AND NONMETALLIC CONNECTORS

NEC/CEC:
Listed for Ordinary Locations

Applications

- To ground and secure steel or aluminum AC, MC, MCI, MCI-A, HFC-MCI, FMC and RWFMC flexible metal conduit to boxes and enclosures in dry locations.
- For 1/2" knockout.

Features

- Patented design installs in seconds without the use of tools or locknut.
- Significantly reduces labor.
- Single, duplex or 90 degree construction.
- Design eliminates loose component parts.
- Superior pullout protection.
- Easily removable for reuse.
- Integral red plastic insulated throat +105 °C (+221 °F) rated provides maximum protection for wire insulation.
- Concrete tight when tapped.

NEER™ Zinc Cable and Conduit Connectors

For Flexible Metal Conduit

NEC/CEC:
Listed for Ordinary Locations

SC: Straight Squeeze Type Connector

Application

- These squeeze type connectors are used to terminate flexible metal conduit to a 1/2" knockout in a dry location box or enclosure.

Features

- Male hub threads — NPS.
- 1/2" and 3/4" available with insulated throat.
- Furnished with locknut.
- Combination head screws on SC-38, SC(l)-50 and SC(l)-75.

Standard Material

- Zinc diecast

NEC/CEC Certifications and Compliances

- UL Standard: 514B
- UL Listed: E32539

NEER™ Zinc Cable and Conduit Connectors

For Armored Cable, Flexible Metal Conduit and Metal Clad Cable

COMMERCIAL AND INDUSTRIAL FITTINGS: ARMORED CABLE, METAL CLAD, FLEXIBLE METAL CONDUIT AND NONMETALLIC CONNECTORS

NEC/CEC:
Listed for Ordinary Locations

AC: 90° Two Screw Clamp

Application

- To make a 90° termination of conduit or cable to a knockout or unthreaded slip hole in a dry location box or enclosure.

Features

- Male hub threads — NPS.
- All center stopped.
- Furnished with locknut.
- Available with insulated throat.
- Combination head screws on AC(I)-90 thru AC(I)-96.

Standard Material/Finish

- Body: zinc diecast
- Cover: steel/zinc plated

NEC/CEC Certifications and Compliances

- UL Standard: 514B
- UL Listed: E25014
- CSA Standard: C22.2 No. 18.3
- CSA Certified: 208044
- NEMA: FB-1

NEER™ Zinc Cable Connectors

NEC/CEC:
Listed for Ordinary Locations

NEC/CEC:
Listed for Ordinary Locations

TA-38: Saddle Clamp

Application

- To terminate armored cable, metal clad cable or nonmetallic sheathed cable in a 1/2" knockout in a dry location box or enclosure.

Feature

- Furnished with locknut.

Standard Material

- Zinc diecast

NEC/CEC Certifications and Compliances

- UL Standard: 514B
- UL Listed: E25014
- CSA Standard: C22.2 No. 18.3
- CSA Certified: 208044
- NEMA: FB-1

Note:

- C-550 is listed for use with 14-2 AWG (nominal O.D. 11.7mm (0.46in) to 10-2 AWG (nominal O.D. 15.2mm (0.60in) steel armored cable (AC) and 14-2 AWG (nominal O.D. 11.9mm (0.47in) to 10-3 AWG (nominal O.D. 15.2mm (0.60in) steel interlocking metal clad cable (MCI).

NEER™ Connectors for Nonmetallic Sheathed Cable

NEC/CEC:
Listed for Ordinary Locations

Application

- Open throat type for nonmetallic sheathed cable.

Features

- Furnished with locknut.
- Male hub threads — NPS.

Standard Material/Finish

- Body: zinc diecast
- Clamp: steel/zinc plated
- Screw: steel/zinc plated

NEC/CEC Certifications and Compliances

- UL Standard: 514B
- UL Listed: E25015
- CSA Standard: C22.2 No. 18.3
- CSA Certified: 208044

1	13.0 (0.51)	28.2 (1.11)	38.4 (1.51)	10-3 to 4-2	C-1001-R

Note:

- All connectors listed for use with a single cable only except for the C-500 which is also listed for use with two 14-2 AWG or two 12-2 AWG NM cables. C-500 also listed for flexible cord with a diameter range of 0.29in./ 7.4mm. to 0.45in./11.4mm.

NEER™ Connectors for Nonmetallic Sheathed Cable

NEC/CEC:
Rated for Ordinary Locations

NEC/CEC:
Listed for Ordinary Locations

RX: Two Piece Nonmetallic Sheathed Cable Two Screw Connector

Applications

- To terminate one or more nonmetallic sheathed cables to a knockout in a dry location box or enclosure.
- Used in "old work" locations.

Standard Material/Finish

- Steel/zinc plated

RX-50

NST: Plastic Nonmetallic Sheathed Cable Connector

Applications

- These PVC connectors are used to terminate nonmetallic sheathed cable to 1/2" knockout in a dry location box or enclosure.

Standard Material

- PVC

NEC/CEC Certifications and Compliances

ETP™ 5000US Steel EMT Set Screw Couplings

NEC/CEC:
Listed for Ordinary Locations

Application

- To ground and secure EMT raceway sections together.

Features

- Made in the U.S.A.
- Heavy steel walls.
- Concretetight when taped.
- Pre-set/pre-staked set screws.
- Three-way combination screws 1/2" thru 2".
- Hexhead screws 2-1/2" thru 4".

Material/Finish

- Steel/zinc plated 1/2" thru 2"
- Malleable Iron 2-1/2" thru 4"

NEC/GEC Certifications and Compliances

- UL Standard: 514B
- UL Listed: (1/2 - 2) E14815
- CSA Standard: C22.2 No. 18.3
- cUL Listed: (1/2 - 2) E14815
- NEMA: FB-1

ETP™ 7000US Series Steel EMT Compression Connectors

NEC/CEC:
Listed for Ordinary Locations

Application

- To ground and secure EMT raceways to boxes and enclosures.

Features

- Made in the U.S.A.
- Male hub threads — NPS.
- Available with insulated throat.
- Concretetight.
- Insulated throat temperature rated +90 °C (+194 °F).

Materials/Finish

- Steel/zinc plated 1/2" thru 2"
- Malleable Iron 2-1/2" thru 4"

ETP™ Raintight 700GSR Series Gland Compression Connectors

NEC/CEC:
Listed for Ordinary Locations

Application

- To ground and secure EMT raceway to boxes and enclosures in wet conditions.

Features

- UL Listed Raintight.
- Green compression nut identifies the fitting as raintight.
- No disassembly required.
- Male hub threads — NPS.
- Available with and without insulated throat.
- Concretetight.

Materials/Finish

- Body and nut: steel
- Knockout sealing ring: EPDM rubber
- Body and nut: zinc electroplate

NEC Certifications and Compliances

- UL Standard: 514B
- cULus Listed: E-14895

EMT Transition Couplings

Combination, Straight, 90°

NEC:
Listed for Ordinary Locations

Application

- Couplings are used to join lengths of steel EMT to various raceway systems.
- Connectors are used to secure and terminate steel EMT to knockouts and concrete tight box.

Features

- Compact design.
- No locknut required on the two piece connectors.
- Quick installations.

Material/Finish

- Steel/malleable iron - Zinc electroplated
- Zinc diecast - natural finish

NEC Certifications and Compliances

- UL Standard: 514B
- UL Listed: E-14895 (TWLL), E-14814 (TWCC)
- NEMA: FB-1

NEER™ Zinc 90° Corner Pulling Elbows

For EMT.

NEC/CEC:
Rated for Ordinary Locations

THL: 90° Female/Female

Application

- 90° corner pulling elbows are used to facilitate pulling conductors through a sharp bend in a run of EMT. The removable cover gives ample access so that wire pulling can be achieved without any obstructions.

Material/Finish

- Zinc diecast

NEC/CEC Certifications and Compliances

- UL Standard: 514B
- CSA Standard: C22.2 No. 18.3

EMT Clamps and Straps

NEC/CEC:
Rated for Ordinary Locations

Application

- Clamps and straps are used to secure oval/round cables or support runs of rigid metal conduit, IMC and EMT.

Features

- Malleable iron clamps are exceptionally rugged and strong.
- Steel clamps and adapters offer economy and have integral formed gussets for excellent strength.

Material

- Steel or malleable iron

① Suitable for use with rigid conduit or IMC.

② Cast Iron.

NEER™ Conduit Hangers

With Bolts and Nuts

NEC:
Listed for Ordinary Locations

Application

- Secure and suspend rigid conduit, IMC, EMT or PVC conduit from overhead supports.

Features

- Furnished with carriage bolt.

Standard Material/Finish

- Steel/zinc plated

NEC Certifications and Compliances

- UL Standard: 2239
- UL Listed: E333806

Capacity of Steel Boxes and Covers

NEC/CEC:
Listed for Ordinary Locations

314.16 Number of Conductors in Outlet, Device, and Junction Boxes, and Conduit Bodies. Boxes and conduit bodies shall be of sufficient size to provide free space for all enclosed conductors. In no case shall the volume of the box, as calculated in 314.16(A), be less than the fill calculation as calculated in 314.16(B). The minimum volume for conduit bodies shall be as calculated in 314.16(C).

The provisions of this section shall not apply to terminal housings supplied with motors.

FPN: For volume requirements of motor terminal housings, see 430.12.

Boxes and conduit bodies enclosing conductors 4 AWG or larger shall also comply with the provisions of 314.28.

(A) Box Volume Calculations. The volume of a wiring enclosure (box) shall be the total volume of the assembled sections and, where used, the space provided by plaster rings, domed covers, extension rings, and so forth, that are marked with their volume or are made from boxes the dimensions of which are listed in Table 314.16(A).

(1) Standard Boxes. The volumes of standard boxes that are not marked with their volume shall be as given in Table 314.16(A).

(2) Other Boxes. Boxes 1650 cm³ (100 in.³) or less, other than those described in Table 314.16(A), and Nonmetallic boxes shall be durably and legibly marked by the manufacturer with their volume. Boxes described in Table 314.16(A) that have a volume larger than is designated in the table shall be permitted to have their volume marked as required by this section.

(B) Box Fill Calculations. The volumes in paragraphs 314.16(B)

(1) through (B) (5), as applicable, shall be added together. No allowance shall be required for small fittings such as locknuts and bushings.

① Where no volume allowances are required by 314.16(B)(2) through (B)(5).
Reproduced with permission NFPA. - All National Electrical Code
references are from the 2008 edition.

(1) Conductor Fill. Each conductor that originates outside the box and terminates or is spliced within the box shall be counted once, and each conductor that passes through the box without splice or termination shall be counted once. A looped, unbroken conductor not less than twice the minimum length required for free conductors in 300.14 shall be counted twice. The conductor fill shall be calculated using Table 314.16(B). A conductor, no part of which leaves the box, shall not be counted.

Exception: An equipment grounding conductor or conductors or not over four fixture wires smaller than 14 AWG, or both, shall be permitted to be omitted from the calculations where they enter a box from a domed luminaire (fixture) or similar canopy and terminate within that box.

(2) Clamp Fill. Where one or more internal cable clamps, whether factory or field supplied, are present in the box, a single volume allowance in accordance with Table 314.16(B) shall be made based on the largest conductor present in the box. No allowance shall be required for a cable connector with its clamping mechanism outside the box.

(3) Support Fittings Fill. Where one or more luminaire (fixture) studs or hickies are present in the box, a single volume allowance in accordance with Table 314.16(B) shall be made for each type of fitting based on the largest conductor present in the box.

Table 314.16(B) Volume Allowance Required per Conductor

Size of Conductor (AWG)	Free Space Within Box for Each Conductor cm ³ (in. ³)
18	24.6 (1.50)
16	28.7 (1.75)
14	32.8 (2.00)
12	36.9 (2.25)
10	41 (2.50)
8	49.2 (3.00)
6	81.9 (5.00)

(4) Device or Equipment Fill. For each yoke or strap containing one or more devices or equipment, a double volume allowance in accordance with Table 314.16(B) shall be made for each yoke or strap based on the largest conductor connected to a device(s) or equipment supported by that yoke or strap.

(5) Equipment Grounding Conductor Fill. Where one or more equipment grounding conductors or equipment bonding jumpers enter a box, a single volume allowance in accordance with Table 314.16(B) shall be made based on the largest equipment grounding conductor or equipment bonding jumper present in the box. Where an additional set of equipment grounding conductors, as permitted by 250.146(D), is present in the box, an additional volume allowance shall be made based on the largest equipment grounding conductor in the additional set.

406.8 Receptacles in Damp or Wet Locations.

(B) Wet Locations.

(1) 15- and 20-Ampere Receptacles in a Wet Location. 15- and 20-Ampere, 125- and 250-Volt receptacles installed in a wet location shall have an enclosure that is weatherproof whether or not the attachment plug cap is inserted.

(2) Other Receptacles. All other receptacles installed in a wet location shall comply with (B)(2)(a) or (B)(2)(b).

(a) A receptacle installed in a wet location, where the product intended to be plugged into it is not attended while in use, shall have an enclosure that is weatherproof with the attachment plug cap inserted or removed.

(b) A receptacle installed in a wet location where the product intended to be plugged into it will be attended while in use (e.g., portable tools) shall have an enclosure that is weatherproof when the attachment plug is removed.

Outlet and Switch Boxes

Material, Finish, Knockouts, Fire-Rated Assemblies, Compliances, Groundskeeper Raised Ground Boss

NEC/CEC:
Listed for Ordinary Locations

Material/Finish

- AISI/SAE 1008
- Pre-galvanized G60, 183.09 g/sq m (0.60 oz/sq ft)
- Thickness: 0.0625" minimum

Concentric and Eccentric Knockouts

- Boxes with concentric or eccentric knockouts are suitable for bonding without any additional bonding means where used in circuits above or below 250 V. Unless otherwise noted all concentric or eccentric knockouts are 1/2" – 3/4" combinations.

Use in Fire-Rated Assemblies

- Single and double gang metallic outlet and switch boxes are acceptable for use in two-hour fire rated walls. For additional information refer to the UL guide card information for metallic outlet boxes, QCIT.

Groundskeeper Raised Ground Boss

- Groundskeeper raised ground feature on boss inside box provides one or two #10-32 tapped hole, allowing a 3/8" long green ground screw to be threaded into box without contacting mounting surface. Other boxes provided with flat ground tapped hole, except Plenum Boxes.

NEC/CEC Compliances and Certifications

- UL Standard: 514A, 514B, 514D
- UL Listed: E2527, E14817
- NEMA: FB-1, OS-1

Weatherproof Boxes, Covers, Lampholders and Lighting Fixtures

NEC/CEC:

Listed for Ordinary Locations

Applications

- Use in branch circuit wiring for wet, damp or dry locations.
- May be used as a junction box or a device box for switches, receptacles, GFCIs, etc.
- Lampholders are for use in exterior and interior applications to provide safety and security for driveways, doorways and walkways.
- Lighting fixtures are for use in areas where moisture ingress is a concern such as construction sites, tunnels, bridges and subways.

Features

- Rugged continuous and seamless diecast construction prevents entry of dirt, dust and moisture.
- Polyester powder coating is applied for uniform cosmetic coating and weatherproof durability.
- Mounting can be achieved with mounting lugs (provided) or by using the integral mounting knockouts.
- Smooth, accurately tapped hubs prevent wire abrasion.
- Clear UL marking and volumetric marking cast into each box and extension ring facilitate electrical inspection.
- Continuous box and cover compression ensure complete sealing at gasket interface to prevent moisture entry.
- Lockable covers and covers with integral devices are offered.
- Closure plugs (2), mounting lugs (2) and green ground screw provided with each box.
- Mounting hardware and gasket provided with each cover.
- Locking swivel knuckle on lampholders permits positive lamp positioning and accurate directional aiming.
- Lampholders are supplied with all hardware including locknuts, porcelain sockets and internal gaskets for reliability and weather protection.
- Photocells and lampholders are supplied with long leads (4" from the end of the knuckle) to facilitate wiring.
- Lighting fixtures are factory assembled and fully gasketed to ensure fast and easy installation.
- Complete installation instructions are provided with each item.
- In-Use covers include patented inserts and comply with NEC requirements.
- Lighting fixtures are individually boxed, labeled and bar coded for ease of handling and identification.

Standard Materials

- Boxes, extensions, covers, lamp-holders, lighting fixtures, and closure plugs: diecast aluminum
- In-use covers: polycarbonate or diecast aluminum
- Lugs: stamped aluminum (one- and two-gang boxes), integrally cast (round boxes)
- Cover screws: plated steel
- Gaskets: closed cell foam (covers), fiber (lampholders), closed cell foam or fiber (lighting fixtures)
- Glass: annealed glass
- Sockets: porcelain (lampholders and lighting fixtures)

NEC/CEC Certifications and Compliances

- UL Standard: 514A, 514D, 1598 as applicable
- UL Listed: E2527, E53330
- CSA Standard: C22.2 No. 18.1, C22.2 No. 250.0 as applicable
- cUL Listed: E2527
- NEMA: FB-1, OS-1

Most of the boxes, covers and lampholders are individually shrink wrapped, labeled and bar coded for ease of handling and identification.

Sturdy corrugated boxes with easy lift-off top with shrink wrapping facilitate merchandising.

WCIU1 and WCDIU1 Inserts 3 inserts produce 14 configurations

Single gang In-Use inserts can be used in both vertical and horizontal applications, by simply changing the hinge points.

① Provided with inserts, devices not included.

Weatherproof Boxes, Covers, Lampholders and Lighting Fixtures

One-Gang Weatherproof In-Use Covers with Inserts

NEC/CEC:
Listed for Ordinary Locations

Applications

- For use in damp or wet locations.

Features

- Extra-Duty rated per the requirements of the NEC.
- Provides weather protection with cover closed and cords plugged in.
- Multi-height lever adjusts to create a cover depth of 2-3/4" or 3-1/2".
- Impact rated.
- Adhesive sealing gasket factory installed to ease installation.
- Reinforced hinge withstands 40 lbs. stress test.
- Device inserts snap into place without the use of tools.
- Extra-large cord opening for heavy gauge cords.
- Sleek industrial design.
- Lockable.

Standard Materials

- Body/cover: diecast aluminum
- Lever: stamped steel

Standard Finishes

- Lever: zinc plated

NEC/CEC Certifications and Compliances

Weatherproof Boxes, Covers, Lampholders and Lighting Fixtures

Non-Metallic Weatherproof Boxes, Covers and Lampholders

NEC/CEC:
Listed for Ordinary Locations

Applications

- Marine rated boxes and covers are ideal for use in highly corrosive areas, beaches, docks, pools, or other wet location areas.
- Use in branch circuit wiring for wet, damp or dry locations.
- May be used as a junction box or a device box for switches, receptacles, GFCI's etc.
- Lampholders are for use in exterior and interior applications to provide safety and security for driveways, doorways and walkways.

Features

- Rugged PVC or polycarbonate construction prevents entry of dirt, dust and moisture.
- Resistant to impact, heat or low temperature distortion, and mold.
- Mounting can be achieved with formed in place mounting lugs.
- Smooth, accurately tapped hubs prevent wire abrasion.
- Clear UL marking and volumetric marking cast into each box facilitate electrical inspection.
- Continuous box and cover compression ensure complete sealing at gasket interface to prevent moisture entry.
- Lockable covers.
- Closure plugs (2) provided with each box.
- Remaining hubs are knockout (KO) design. No closure plugs required.
- Mounting hardware and gasket provided with each cover.
- Locking swivel knuckle on lampholders permits positive lamp positioning and accurate directional aiming.
- Lampholders are supplied with locknuts, porcelain sockets and internal gaskets for reliability and weather protection.
- Complete installation instructions provided with each item.

Standard Materials

- Boxes: PVC
- Covers: PVC or polycarbonate
- Cover screws: Nickel plated steel
- Gaskets: closed cell foam
- Sockets: porcelain (lampholders)

NEC/CEC Certifications and Compliances

- UL Standard: 514C, 514D, 1598 as applicable
- cULus Listed: E109438, E477255
- CSA Standard: C22.2 No. 18.2 (2008), C22.2 No. 42.1, C22.2 No. 42.1

Most of the boxes, covers and lampholders are individually shrink wrapped, labeled and bar coded for ease of handling and identification.

Sturdy corrugated boxes with easy lift-off top with shrink wrapping facilitate merchandising.

Weatherproof Boxes, Covers, Lampholders and Lighting Fixtures

Non-Metallic Weatherproof Boxes, Covers and Lampholders

Closure plugs and mounting lugs included.

Service Entrance Heads

Threaded For Rigid Conduit or IMC

NEC/CEC:
Listed for Ordinary Locations

Applications

- Provides a weather-resistant termination of a Service Entrance Conduit Riser at utility connection point.

Features

- Weather resistant.
- Phenolic Insulator has predrilled holes to slip over conductors.
- Easy to assemble onto conduit riser.

Standard Materials

- Malleable or ductile iron
- Phenolic insulator

Standard Finishes

- Hot dip or mechanically galvanized

NEC/CEC Certifications and Compliances

- UL Standard: ANSI/UL 514B
- UL Listed: E-14817
- CSA Standard: C22.2 No. 18
- CSA Certified: 9795

Service Entrance Heads

Clamp-Type For Rigid Conduit or IMC

NEC:
Listed for Ordinary Locations

Applications

- Provides a weather-resistant termination of a Service Entrance Conduit Riser at utility connection point.

Features

- Bar type pressure clamp in body.
- Screw does not bear directly on conduit.
- Weather resistant.
- Phenolic Insulator has predrilled holes to slip over conductors.
- Easy to assemble onto conduit riser.

Standard Material

- Malleable iron
- Brass screws in hood
- Phenolic insulator

Standard Finishes

- Hot dip or mechanically galvanized

NEC Certifications and Compliances

Watertight Service Entrance and UF Cable Connectors

NEC:
Listed for Ordinary Locations

Applications

- For securing and sealing service entrance and UF cable entering an enclosure or conduit hub.

Features

- Tapered male threads (NPT).
- Suitable for use in wet locations.
- Locknuts, Sealing Locknuts and Sealing Ring Assemblies available for use in sheet metal knockouts.

Standard Materials

- Body: malleable iron
- Grommet: PVC
- Compression washer: steel

Standard Finishes

- Body: zinc electroplated
- Compression washer: zinc electroplated

NEC Certifications and Compliances

- UL Standard: ANSI/UL 514B

COMMERCIAL AND INDUSTRIAL FITTINGS: SERVICE ENTRANCE FITTINGS

OZGEDNEY

Non-Watertight Service Entrance Connectors

NEC/CEC:
Listed for Ordinary Locations

Applications

- To secure SE/SEU Flat Cable, Non-Metallic Sheathed Flat Cable and other oval (flat) non-metallic cables to boxes and enclosures.

Features

- 2-screw double clamp - open throat type.
- Furnished with locknut.
- Male hub threads — NPS.

Standard Materials

- Body - malleable iron
- Screws and locknut - steel

Standard Finishes

- Zinc electroplated

NEC/CEC Certifications and Compliances

- UL Standard: ANSI/UL 514B
- UL Listed: E-23237
- CSA Standard C22.2 No. 18
- CSA Certified: 11584
- Fed. Spec: W-F-406E
- NEMA: FB-1

GEDNEY

NEER™ Aluminum Service Entrance Pulling Ells

For Threaded Rigid Conduit and IMC

NEC/CEC:
Listed for Ordinary Locations

NEC/CEC:
Listed for Ordinary Locations

SLB: Pulling Ells

Applications

- To provide access to the inside of a service raceway.
- For wire pulling where the raceway changes direction 90 degrees.
- Limited to No. 6 AWG maximum wire size. The maximum quantity of conductors is based on the maximum conductor fill for the trade size of the raceway (conduit).

Features

- Cover and gasket included.
- Hub in back sits flat on wall.

Standard Material/Finish

- Diecast aluminum/epoxy powder coat
- Gasket: fiber

NEC/CEC Certifications and Compliances

- UL Standard: 514B
- UL Listed: E53330
- CSA Standard: C22.2 No. 18.3

NEER™ Duct Sealing Compound

NEC:
Listed for Ordinary Locations

NEER™ Duct Sealing Compound

Applications

- NEER™ sealer is used primarily by the building and specifically by the electrical trade to seal around junction boxes, flashings and service mast entries. It can be shaped by hand to any form and reused if necessary. NEER™ duct seal has countless other applications in the refrigeration, heating and cooling, plumbing and metal-fabrication fields. It is an excellent general purpose sealant around the home.

Features

- FDA Approved as listed in CFR, Title 21 being composed of ingredients acceptable for packaging and transporting food.
- Chemically acceptable to the U.S.D.A. for use in meat and poultry processing areas under Federal Inspection.
- Dielectric strength: approximate 100 volts per mil (ASTM D149-64).
- Resistivity: 1.5.1 @ 100 °C (212 °F)/. 4.8 x 109 ohm-cm 1.5.2 after 96 hours @ 115 °C (239 °F). 4.8 x 1010 ohm-cm (ASME power test code of 1965, Section 40.5).
- NEER™ duct seal may be painted immediately after application and will not bleed through the dry paint film.
- Non-corrosive: will not corrode metal.
- Non-irritant: no irritation to eyes or skin as listed in CFR, Title 16, "Appraisal of the safety of chemicals in food, drugs and cosmetics."
- This sealer is a gray, permanently soft, non-toxic, non-volatile compound which will adhere to most clean, dry surfaces.

DC-10

Physical and Chemical Characteristics

- Base: non-drying synthetic polymers and oils.
- No unpleasant odor.
- Temperature tolerance range: -34.4 °C (-30 °F) to +79.4 °C (+175 °F). Will not slump at +135 °C (+275 °F) for brief periods.
- Fillers: saturated mineral fillers and other inert ingredients.
- Cone penetration: (ASTM D217-52T) modified to total moving load of 300 gm., 5 sec. @ +25 °C (+77 °F); 100-115 mm/10.
- Non-volatile (solids): 100.
- Specified gravity: 1.65 to 1.7 (ASTM D71-72).
- Temperature usage range (recommended): -3.9 °C (+25 °F) to +48.9 °C (+120 °F).
- Shelf life: unlimited.

7S Continuous Swivel 7P Portable Series

Available with or without handlamps

Furnished with 18-3 (2 wire plus safety ground) yellow SJOOW-A cord.

NEC/CEC:
Listed for Ordinary Locations

Applications

- A safe and convenient source of retractable power cord for:
 - Portable lighting
 - Power supply
 - General utility service

Features

- 7S and 7SV Series
 - Enclosed construction.
 - Furnished with 7.6 meters (25 feet) of yellow, extra flexible, 18-3 SJOOW-A cord (2-conductor plus safety ground).
 - High quality, double copper brushes.
 - Locking ratchet holds cord at desired length.
 - Adjustable ball stop controls return limit of retractable cord.
 - Hubs in all covers have integral bushings to protect conductor insulation from damage. Hub plate openings are smooth.
 - Continuous 360° patented swiveling action without power interruption or tangling of cord.
 - 7S Series offers choice of hand-lamps available as accessories.
 - 7SV Series includes NEMA 4X (enclosed and gasketed) handlamp to accommodate up to 100 Watt lamp, 6.1 meters (20 feet) of SJOOW-A cord.
 - Models available with built-in automatic switch which activates light when cord is pulled out.
 - Convenient flush type mounting ring fits 4" octagonal outlet box or fuse bracket.
 - Accessory bracket permits wall mounting.
 - Supplied with handlamp to accommodate up to 100 Watt lamp.

Standard Materials

- Reels: steel construction
- Cord: type SJOOW-A, yellow thermoset jacket, oil-resistant, 300 Vac rating

Standard Finishes

- Gray hammer epoxy/polyester powder coat

NEC/CEC Certifications and Compliances

- UL Listed: E4961
- UL Standard: 355
- CSA Listed: LR3060
- Meets OSHA requirements

RL5000 Heavy Duty Commercial Industrial Cord Reels

NEC/CEC:
Listed for Ordinary Locations

Applications

- Commercial/industrial, 15.2 meter (50 foot) portable cord reel to safely transfer a continuous retractable power supply, portable lighting or general utility service.
- All steel construction for dry location application and suitable for base down, ceiling or wall mounting.
- Typical applications include industrial/MRO, warehouse, loading docks, commercial building, OEM machinery and equipment, OSHA regulated service garages, muffler and oil change shops, institutions and state agencies.
- Design options for single or three phase power source 250 Vac maximum and supplied with #16 or #14 gauge three conductor or #14 gauge four conductor SJOOW-A, 300 Vac cord.
- Reel models are available with cable only or with various handlamp and accessory options.

Features

- All steel construction provides added strength for rugged commercial/industrial dry location service.
- Available in 15.2 meter (50 foot)/ #16 gauge- 3 conductor, 15.2 meter (50 foot) #14 gauge- 3 conductor, and 13.7 meter (45 foot) #14 gauge- 4 conductor. All with high visibility, yellow 300 Vac jacket, UL and CSA approved oil resistant thermoset cord.
- Collector ring and brush assembly rated at 15 Amp, 250 Vac, three conductor (single phase) and four conductor (three phase) construction.
- 0.9 meter (3 foot) lead in power cord provides portable connection installation.
- Compact design offers long cable capacity in a small unit, advantageous to the OEM manufacturers.
- Overhung drum design offers simple field cable tension adjustment without cable disconnection.
- Adjustable cable guide provides for various reel mounting positions.
- Cable locking ratchet (included as standard) holds cable at desired length. Ratchet can be disengaged when constant cable tension is desired.
- Reels having handlamp without switch in the handle are operated by an internal automatic switch located inside the reel. Power to the handlamp is actuated when cable is pulled out at any length and ratchet is locked. Power is automatically turned off when all cable is retracted back into the reel.

Standard Materials

- Base, drum, spring cartridge cover and cable guide arm: steel
- Brush cover: aluminum
- Cable outlet guide: Acetal
- Collector rings: brass
- Brushes: high density copper graphite
- Cord: high visibility yellow type SJOOW-A thermoset, 300 Vac rating

Standard Finishes

- Base and housing: gray hammer epoxy/polyester powder coat
- Drum: black epoxy powder coat

Options

- Combination mounting base converts to a 330° ceiling swivel or a 100° wall pivot base.
- Power outlet box of non-conductive rubber and plastic construction complete with two duplex 3-wire, 15 Amp, 125 Vac receptacles.
- Three handlamps available, 100 Watt incandescent with reflector, switch and receptacle, 100 Watt incandescent (OSHA approved), and 13 Watt fluorescent with ballast and switch in handle.

NEC/CEC Certifications and Compliances

- UL Listed: E4961
- UL Standard: 355
- Reels with handlamps are UL Listed.
- Reels without handlamps are UL Recognized Components.
- CSA Listed: LR3060

McGill™ 8600 AUTO-LOC Cord Reels

NEC/CEC:
Listed for Ordinary Locations

Applications

- Weather-tight, dust-tight construction for heavy-duty industrial applications.
- Ideal for hoists, electric tools, and moving equipment.

Features

- Corrosion resistant.
- Sufficient spring tension to provide no more than 10% sag when cable is stretched horizontally.
- Fully adjustable four roller cable guide to minimize cable wear.
- Long life, self-contained mainspring.
- Furnished with black SO cable 3 and 4 conductors.
- Models available with and without handlamp.
- Removable ratchet for application flexibility.
- 30 Amp, 600 V modular collector ring designed for long service life.
- 330° pivot bases available.
- 1" NPT line entry in junction box.

Standard Materials

- Aluminum die cast/yellow polyester powder coat

McGill™ Nyloc Safety Grip Plugs Connectors

NEC:
Listed for Ordinary Locations

Applications

- Ideal for fast, easy wiring.

Features

- Durable yellow nylon construction with nylon cord grip eliminates need for exposed metal, enhancing safety and durability.
- Non-metallic cord grips.

Certifications and Compliances

- UL Listed: E44590
- Meets OSHA requirements
- Meets NEMA and ANSI specifications

515C and 515P

Appleton® OZGEDNEY

REELS AND SWITCHES: ORDINARY LOCATION POWERCORDS

McGill™ Ground Fault Circuit Interrupters

NEC/CEC:
Listed for Ordinary Locations

Applications

- Protects people and equipment by interrupting electrical power when loads have a potentially lethal ground current in excess of 6 milliamps.
- The portable construction enables use of these devices in a variety of applications, such as power tools or hand lamps.
- Indoor/Outdoor usage.

Features

- Manual reset is required after trip (fault) condition or power outage occurs to prevent unmonitored equipment start-up.
- 15 and 20 Amp, 120 and 240 Volt, 60 Hz models available.
- 4-6 milliamp trip level.
- Provides protection in 3 wire circuits.
- Mechanical trip indicator to show power "ON".
- Rugged construction for long lasting durability.
- Grounded neutral — 4 ohms typical.
- Open neutral protection.
- Radio frequency interference suppression to protect against nuisance tripping.

NEC/CEC Certifications and Compliances

- UL Listed: E165783
- CSA Approved

① 2 of the 4 receptacles are T-slotted to allow both 15 and 20 amp tools, with either NEMA 5-15 or 5-20 plugs.

McGill™ Sensing–Safti–Gard Motor Controls

NEC/CEC:
Listed for Ordinary Locations

Applications

- These motor controls help prevent accidental machine start up after a voltage drop or power interruption.
- It is intended for installation on equipment that is driven by a small electrical motor, operating on 120 Vac or 240 Vac (single phase) and is connected to electrical power by means of 14 gauge, 3 wire flexible cord.
- Upgrades small machines to the latest safety requirements by preventing automatic restart accidents following voltage drop or power interruption.
- Replaces old, frayed, dangerous, and ungrounded power cords.

Features

- An added sensor won't allow the Sensing-Safti-Gard to reset until your equipment switch has been turned off.
- Permits use of machine ON/OFF switch.
- Easy installation.
- Meets OSHA, NEC, and NFPA safety standards.

NEC/CEC Certifications and Compliances

- UL and cUL Recognized
- UL Listed: E78258

506

	Electrical Rating	Catalog Number
508 mm (20") cord on equipment switch end; 2.44 m (8') cord w/molded plug on power end	120 Vac, 15 Amp, 3/4 HP motor max., 50/60 Hz	506
508 mm (20") cord on equipment switch end; 2.44 m (8') cord on power end (no plug)	120 Vac, 18 Amp, 1 HP motor max., 50/60 Hz	507
508 mm (20") cord on equipment switch end; 2.44 m (8') cord on power end (no plug)	200-240 Vac, 15 Amp (single phase), 2 HP motor max., 50/60 Hz	508
356 mm (14") cord on male plug end; 305 mm (12") cord on female receptacle end	120 Vac, 15 Amp, 3/4 HP motor max., 50/60 Hz	509

There is no direct replacement for previous Catalog Number 505, as the new case size does not allow it to be plugged into a duplex type outlet. Choose Catalog Number 506 or, for new machines with a good power cord, choose Catalog Number 509.

McGill™ LOCKBOX Electrical Plug Lockout

NEC/CEC:
Rated for Ordinary Locations

Applications

- Provides a positive lockout of the plug for cord connected electrical equipment when performing maintenance and service activities.
- LOCKBOX is a lockable enclosure that allows personnel to work safely and confidently on electrical equipment without fear of unexpected or unauthorized start-up.

Features

- Provisions for up to two locks.
- Accepts padlocks up to 3/8" shackle diameter.
- OSHA compliant when installed according to instructions.
- Indoor or outdoor use.
- Highly visible, safety yellow body.
- Holes for optional I.D. tag to indicate ownership.

Standard Materials

- High impact U.V. polymer

McGill™ 0852/0862 Series Rocker Switches

NEC/CEC:
Listed for Ordinary Locations

Applications

- The 0852/0862 Series rocker switches are available in single pole (0852) and double pole (0862), unlighted and lighted models. These switches are equipped with nylon snap-in brackets. They are Vac rated switches also suitable for low voltage Vdc applications.

Features

- Designed to fit full-size rectangular cutouts. Angled corners are suggested for optimum fit, but standard rectangular cutouts are acceptable.
- Curved rockers with illuminated single or dual lens to fit your style and functional requirements.
- 1/4" Quick connect terminals standard on all switches.
- Rocker style: curved/smooth face matte.
- Bracket style: smooth face matte.
- 125 Vac Incandescent lamp.
- 12 Vdc or 28 Vdc Neon lamp.

Standard Materials

- Contacts: silver plate
- Terminals: brass or copper
- Base: phenolic +150 °C (+302 °F)
- Rocker/bracket: nylon 66 +105 °C (+221 °F)

NEC/CEC Certifications and Compliances

- UL Recognized Component
- UL File Number: E335442
- UL Standard: 1054, Guide WORY2
- CSA File Number: 249055
- CSA Standard: C22.2 No. 55
- RoHS Compliant

McGill™ 0801/0821 and 0811/0831 Series Rocker Switches

NEC/CEC:
Listed for Ordinary Locations

Applications

- Suitable for 20 Amp, 12 Vdc applications.
- Recognized for reliable, long service life by appliance manufacturers and manufacturers of industrial and commercial equipment.

Features

- Designed to fit full-size rectangular cutouts. Angled corners are suggested for optimum fit, but standard rectangular cutouts are acceptable.
- 1/4" Quick connect terminals standard on all switches.
- Multiple mounting styles - offset cover plate, metal snap-in bezel, nylon snap-in bezel.
- A wide variety of circuits are available to meet your specific requirements.
- McGill™ ensures extra reliability through mechanical excellence and a margin of electrical capacity - up to 20 Amps.
- White serrated gloss rocker style.

Standard Materials

- Contacts: silver plate
- Terminals: brass or copper
- Base: phenolic +150 °C (+302 °F)
- Rocker and nylon bracket: nylon 66 +105 °C (+221 °F)
- Spring steel snap-in nickel plated bezel
- Black gloss nylon snap-in bezel

NEC/CEC Certifications and Compliances

McGill™ 4125/90 Series Single Pole Toggle Switches

NEC/CEC:
Listed for Ordinary Locations

Applications

- McGill™ full-size, single pole toggle switches are available in several electrical ratings to meet a variety of requirements.
- Ruggedly constructed with metallic toggle and threaded bushing to ensure extended service life.
- Marine, food service, generator, industrial control and office automation markets.
- Appropriate for use in low voltage DC applications.

Features

- A variety of circuits are available.
- Available with screw, solder, and 1/4" Quick connect terminals.
- Mounting hardware and terminal screws (where applicable) furnished unassembled.
- Mounting hardware consists of nickel plated hex nut and knurled nut.
- Indicating plate is furnished for maintained ON-OFF circuits.

Standard Materials

- Base: phenolic +150 °C (+302 °F)
- Bat handle: nickel plated brass
- Bushing: nickel plated brass

McGill™ 0121/0140 Series Multi-Pole Toggle Switches

NEC/CEC:
Listed for Ordinary Locations

Applications

- McGill™ full-size, single pole toggle switches are available in several electrical ratings to meet a variety of requirements.
- Ruggedly constructed with metallic toggle and threaded bushing to ensure extended service life.
- Marine, food service, generator, industrial control and office automation markets.
- Appropriate for use in low voltage Vdc applications.

Features

- A variety of circuits are available.
- Available with screw, solder, and 1/4" quick connect terminals.
- Mounting hardware and terminal screws (where applicable) furnished unassembled.
- Mounting hardware consists of nickel plated hex nut and knurled nut.
- Indicating plate is furnished for maintained ON-OFF circuits.

Standard Materials

- Base: phenolic +150 °C (+302 °F)
- Bat handle: nickel plated brass
- Bushing: nickel plated brass

0121-0009N

0121-0010N

NEC/CEC Certifications and Compliances

- UL Recognized Component
- UL File Number: E335442
- UL Standard: 1054, Guide WORY2
- CSA File Number: 249055
- CSA Standard: C22.2 No. 55
- RoHS Compliant
