

BRAND PROFILE

- Founded in 1963

Hubbell Outdoor Lighting established its position as the high quality producer of outdoor lighting serving the full range of commercial, institutional and industrial outdoor applications. With an in-depth knowledge of the electrical distributor and contractor markets, Hubbell Outdoor Lighting has consistently combined innovative energy-saving technology, practical lighting solutions and service-oriented performance.

PRODUCT OFFERING

Hubbell Outdoor Lighting provides energy-efficient LED lighting solutions for a wide variety of outdoor applications including: floodlighting, wallpacks, landscape, parking garage, roadway, dusk-to-dawn, solar and vaportites. Hubbell Outdoor Lighting brands' luminaires integrate the latest LED advancements and deliver optical performance better than historical HID fixtures with higher lumen packages. By leveraging the advantages of solid state technology, our versatile portfolio delivers ideal outdoor lighting solutions with longer life, more visual acuity, better uniformity and reduced energy usage. All these attributes provide value-oriented, energy-saving, environmentally friendly solutions.

LED Products Guide

HUBBELL OUTDOOR

Hubbell Outdoor and Spaulding Lighting brands provide energy-efficient LED lighting solutions for a wide variety of outdoor applications from area/site, floodlighting, landscape and low level pedestrian to wallpacks. Hubbell Outdoor Lighting brands' luminaires integrate the latest LED advancements and deliver optical performance that can perform as well as, and in most cases, better than historical HID fixtures with higher lumen packages. By leveraging the advantages of solid state technology, our versatile portfolio delivers ideal outdoor lighting solutions with longer life, more visual acuity, better uniformity and reduced energy usage.

There are many factors to consider when choosing LED lighting. As leading experts in this field, we have developed performance information for each product below the ordering nomenclature. This resource will help guide you in your luminaire selection process.

PERFORMANCE INFORMATION

Each product in this guide includes complete product information in easy to read modules. Information specific to energy-efficiency, LED performance, traditional luminaire source equivalency, CCT and application is outlined below.

Percentage of energy savings over traditional light sources

Equivalent traditional light sources

Total watts consumed by luminaire

Suggested application

Voltage range options

Series Number	Equivalency			Delivered Lumens	System Watts	Lumens Per Watt	Mounting Height	CCT	Voltage	Drivers/Current
	MH	HPS	CFL							
71% SAVINGS! LMC-30L	250w	250w	2x42w	6,023	70	86	15-18 ft.	5100K	120-277V	2@700mA
77% SAVINGS! LMC-30L-035	150w+	150w+	2x42w	3,448	35	99	12-15 ft.	5100K	120-277V	1@350mA

Industry listings, energy-efficiency and environmental qualifications

Number of LEDs

Maximum lumens produced by luminaire

Luminaire efficacy

(CCT) Correlated Color Temperature

HUBBELL Outdoor Lighting

- Ultra-compact size measuring only 4.5" x 7.5" x 4"
- Wide flood NEMA 6 x 6 distribution for general purpose flood and facade lighting
- Traditional 1/2" x 14 NPS threaded adjustable knuckle mounting
- 120-277V operation (PC version 120V only)
- Rugged die-cast aluminum housing with dark bronze finish
- Vented housing isolates LED module from driver maximizing product life and performance
- High impact UV stabilized acrylic outer lens protects LEDs and allows for cleaning and debris removal
- DesignLights Consortium (DLC) qualified
- IP66, listed to UL1598 for use in wet locations
- Four color multi-language merchandising carton with application details
- Visor and vandal shield available

MHS

Miniliter® LED Series

FLOODLIGHTING

MHS YOKE MOUNT

Energy-efficient LED floodlight for sign, facade, area, accent and general security lighting

- Die-cast aluminum housing and door, rugged, corrosion resistant and compact
- Tempered, impact resistant glass lens
- Tool-free entry for easy maintenance – twin stainless steel latches
- Protective dark bronze powder paint finish
- Effective projected area (EPA) is 1.4 sq. ft.
- 30 high powered LEDs deliver up to 6200 lumens at 700mA with 88 LPW efficacy
- Different lenses offer a variety of beam spreads – Narrow, Medium, Rectangular and Wide
- 10KA, 10KV surge protection included
- 3000K, 4200K, and 5100K CCT
- Silicone lens/door gasket provides positive seal

- Electronic driver 71w system. 0.4 AMPS max, 120-277V, 50/60Hz, 0-10V dimming
- Flat glass lens protects LEDs and allows debris removal
- Steel yoke (MHS-Y) with three-hole pattern allows versatile mounting
- Cast aluminum knuckle (MHS-K) slip-fits 2 3/8" OD tenons/pipe, provides concealed wiring for appearance and safety
- Listed to UL 1598 for use in wet locations
- 4K and 5K models meet DesignLights Consortium (DLC) qualifications, consult DLC website for more details: <http://www.designlights.org/QPL>

MHS KNUCKLE MOUNT

MHS YOKE MOUNT

Magnuliter LED Floodlights

The MLED family is a large area LED floodlight designed to provide multiple NEMA distributions for best beam utilization on your application. Typical uses are area lighting for safety and security, build façade illumination, flag lighting, large sign or statuary accent.

The family includes two LED assemblies, an 80 LED engine that produces a nominal 11,000 lumens and a 40 LED engine with 5,500 lumens. Each engine is featured with three NEMA beam spreads (3x3, 5x5, 7x7) to allow the best utilization of the lumens and reduce spill light. The light engine is protected from the elements by the sealed tempered molded glass outer lens.

- LED drivers are universal 120-277V, 50/60Hz

- 40 LED floods 107w, 120-277V
- 80 LED floods 179w, 120-277V
- The lens door is sealed with four stainless steel screws and features a convex molded glass protective lens sealed with silicone gaskets
- A heavy gauge steel full yoke with aiming angle increments provided along with locking washers and stars for vibration resistance
- Listed to UL1598 for use in wet locations, IP65 rated; Some models meet DesignLights Consortium (DLC) qualifications, consult DLC website for more details: <http://www.designlights.org/QPL>

ALF

Architectural LED Floodlight/Wall Mount

FLOODLIGHTING

- ALF is excellent for small floodlighting applications such as signs, façade, landscape accent or small area illumination
- The compact, low profile size allows the flood to be easily hidden or blend into the landscape environment
- Knuckle mount: Universal 1/2" swivel knuckle has serrated teeth for sure aiming
- Wall mount: Cast aluminum cover/quick mount plate and universal adapter allows easy installation to 3 1/2 or 4" standard junction boxes; Tilt for increased forward throw
- Universal voltage driver is 120-277V, 50/60Hz, with 11 or 22 input watts
- Impact resistant tempered glass lens seals to housing with silicone gaskets
- Dark bronze durable powder paint finish
- Six or twelve 1.5w LEDs produce 510 or 1000 lumens at 5100K
- Wide 110 degree lateral spread covers three times the set back distance with uniform light
- Listed to UL 1598 for use in wet locations
AFL-6: IP65, ALF12: IP64w

The compact LED LNC is designed for perimeter illumination, available in 3 lumen packages for safety, security and general illumination applications. This compact fixture is neighbor friendly with zero uplight. Typical mounting height up to 12 feet with 40ft fixture spacing (without acrylic diffuser) and 30ft spacing with acrylic diffuser installed. Photocontrol option is available.

- IES Progress Award Winner - 2012
- Some models meet DesignLights Consortium

(DLC) qualifications, consult DLC website for more details:

<http://www.designlights.org/QPL>

APPLICATIONS

Zero uplight, IDA compliant entry/perimeter lighting. Listed to UL1598 for use in wet locations. Features long-life (60,000hr L96 rated) high CRI 5000K LEDs, quick mount adapter and designed for both recessed box or surface conduit wiring. Additional CCT/CRI options available in the larger 7L and 9L lumen packages.

LNC2

Compact LED Wallpack

WALLPACKS

- IES Progress Award Winner - 2013
- Building Operating Management 2014 Top Products Award - LNC2-18LU
- DesignLights Consortium (DLC) qualified, Consult DLC website for more details: <http://www.designlights.org/QPL>

The compact LED LNC2 is designed for perimeter illumination for safety, security and general lighting application. Slightly larger than the LNC, the LNC2 has greater lumens and increased performance. The LNC2 achieves up to 85% energy savings over traditional metal halide. Luminaires have no uplight and are neighbor friendly with typical mounting height up to 15 feet and 60ft fixture spacing (without

acrylic diffuser) and 40ft spacing with acrylic diffuser installed. Fixtures have protective polyester finish in five color choices.

APPLICATIONS

Zero uplight, IDA compliant entry/perimeter lighting. Listed to UL1598 for use in wet locations. Features long-life (60,000hr L96 rated), high CRI, 3000K, 4200K, and 5100K LEDs. Single SKU designed for both recessed box or surface conduit wiring, includes quick-mount adapter for ease of installation. Acrylic diffuser softens high angle output for use at entrances or pedestrian pathways.

LNC2-BB

Compact LED Wallpack Battery Back up & Motion Sensors

- BBU integral battery for 120-277V, rated for -20°C – 40°C; designed to provide minimum of 1fc in a 10' square at 10-12' mounting height
- SCO/SCP - motion sensor on/off or user programmable

The compact LED LNC2 with integral battery is designed for path of egress lighting. Luminaires have no uplight and are neighbor friendly with typical mounting height up to 12 feet and 48ft fixture spacing (without acrylic diffuser) and 32ft spacing with acrylic

diffuser installed. Fixtures have protective polyester finish in five color choices.

APPLICATIONS

Zero uplight, IDA compliant entry/perimeter lighting. Listed to UL1598 for use in wet locations. Features long-life (60,000hr L96 rated), high CRI, 3000K, 4200K, and 5100K LEDs. Single SKU designed for both recessed box or surface conduit wiring, includes quick-mount adapter for ease of installation. Perimaliter® PGM3 PVL3

Glass and Polycarbonate LED Wallpacks

WALLPACKS

PGM3

PVL3

- Perimeter lighting for safety, security and general illumination - LED units provide 60-70% energy savings over typical pulse start wallpacks. Uses include office buildings, shopping centers, restaurants, schools, warehouses, parking garages and other commercial applications
- The die-cast aluminum housing provides firm mounting over recessed junction boxes; 1/2" side hubs for surface conduit wiring; Housing includes a top hub for use with button photo controls for dusk-to-dawn control; The construction not only provides a rigid mount but an excellent heat sink for the LED system, allowing proper operating temperature for optimum performance and long life (50,000hr)
- LEDs with CCT of 5100K, 4200K and 3000K
- Two cover options are available: A cast aluminum with prismatic borosilicate glass assembly and an all polycarbonate, one-piece, vandal resistant door
- Typical mounting heights of 12-15 feet; The lateral spread allows typical spacing of three to four times the mounting height with excellent uniformity
- Available in two lumen outputs
- Listed to UL1598 for use in wet locations
- BBU integral battery option for 120-277V, rated for -20°C - 25°C; designed to provide minimum of 1fc in a 10' square at 10-12' mounting height
- SCO/SCP - motion sensor on/off or user programmable

GSL

Ceiling/Canopy/Garage LED Luminaire

NEW

- Designed for a range of applications from eight to eighteen feet for surface, box or pendant mount; Parking garage, walkway or building canopies, corridors, tunnels, large stairwells and other cover applications; Two lumen packages and optical distributions make the the GSL Series luminaire both versatile and functional
- Vertically finned cast aluminum housing for maximum heat dissipation ensuring long component life and performance
- IP65 luminaire rating
- Field configurable symmetric and asymmetric optic in a single SKU
- Gray powder coat paint finish
- CCT: 4200K (70 CRI)
- Lumens packages ranging from 4,300 – 5,500 with 15 or 21 LEDs
- Wattage: 55w or 80w
- Lumens per watt: >75
- Designed for 40° C ambient temperatures
- Listed to UL1598 for use in wet locations

Lumasquare® NRG® 4000

High Performance LED Indoor/Outdoor Lowbay Series

- Designed for illumination of commercial indoor/outdoor lowbay applications including: mechanical rooms, retail, covered loading docks and utility areas
- Rugged, die-cast housing has a durable Powder coat paint finish available in bronze, white, black and gray. Mounts over recessed J-box and features two convenient 1/2" side hubs for surface conduit mounting
- Stainless steel vandal-resistant screws standard
- Fully gasketed for weatherproof/bug-proof integrity
- 4200K CCT (70 CRI) nominal and 5100K CCT (67 CRI) nominal
- One-piece, injection-molded, clear prismatic acrylic refractor enhances space with 10% uplight; High temperature acrylic for reduced yellowing, uniform light distribution and low glare
- Listed to UL1598 for use in wet locations
- Five year limited warranty
- 10KA, 10KV surge protector standard

RM LED

Roadway

ROADWAY

- Designed for roadway, parking, area and perimeter lighting; These versatile Roadway luminaires are designed to replace existing cobra-head style fixtures from 70-150w while saving up to 50% in energy; LED luminaires feature optimum uniformity, elimination of 'hot spots' and zero uplight
- 3800 lumens at 350 mA or 6700 lumens at 700 mA
- 30 LED light engine
- Standard IES distributions of Type II, III, IV, V with up to 111 LPW efficacy
- 120-277V, 347/480V electronic dimming drivers, 2 at 700 mA, 1 at 350 mA
- Die-cast aluminum housing
- Lektrocote® finish in 2 standard and custom colors
- IP65 LED light engine assembly and drivers
- 10KA surge protector standard
- Patent pending EXO optic technology filters short wavelengths (blue light)

Wet Location LED Vaportites

VAPORTITES

- Compact size measuring only 5.2" x 10.4" (wall mount version slightly larger)
- 757 lumens, 11w system, 70 LPW
- Frosted glass lens distributes light evenly without any LED brightness or glare
- Pendant mount version accommodates traditional 1/2" x 14 NPS threaded conduit
- 120-277V operation, 50/60Hz
- Rugged die-cast aluminum housing with removable cast aluminum guard with vandal resistant set screws included, gray finish
- IP66, listed to UL1598 for use in wet locations (unit is not rated for use in hazardous locations)
- Four color multi-language merchandising carton with application details

Multi-purpose LED Luminaire

- Zero uplight design for environmentally friendly installations
- Refractor included provides enhanced security lighting and LED brightness control when installed
- 40w system with up to 3437 lumens and 86 LPW
- Symmetric lens installed standard
- Field rotatable asymmetric lens included
- 120V operation
- DesignLights Consortium qualified
- 120V twist-lock style photocontrol included
- Rugged die-cast aluminum housing with both 2-3/8" & 1-5/8" OD mast arm mount capability as well as direct wall/surface mounting
- Textured gray powder paint finish
- Four color multi-language merchandising carton with application details
- 24" (18" projection) arm included

12V LED Lightscape® System

Long Life, Easy to Install, No Maintenance Lighting System

LANDSCAPE

- LED landscape fixtures, long life, low energy consumption, no maintenance, three-year limited warranty
- Die-cast aluminum construction, professional grade, built to perform with durable design
- Powder coat polyester epoxy finish maintains lasting beauty
- 1.5w path fixtures in 7 styles; 3w flood and recessed uplight; 3000K CCT
- Path and flood fixtures are complete with stake, 4' fixture cable, and "Smart Connect" tool-free connector; Flat surface deck adapter included
- Control center is UL listed for wet locations and features non-metallic housing, grounded cord set, photocontrol, and easy cable connect

A simple system, easy to install and maintain, with low energy consumption for safety, security and property enhancement. Go Green with Hubbell Lightscape® LED products!

ORDERING INFORMATION

Catalog Number	Finish	Description	Weight
CONE			
CO-AB	Antique Bronze	Create a tropical image. The basic 7" dia. cone shape sits 15" high and creates a 5' lighted area with soft, indirect shielded light. Excellent for subtle illumination of plants or walkways.	2.0 lbs
CO-AG	Antique Green		
GREENVILLE			
GN-AB	Antique Bronze	A stately appearance with classic shape. Stands 16" tall with 5" dia. head. Frosted lens provides soft lighting of taller surrounding plantings with 5' coverage. Use along walkways, steps. Typical spacing 8'-12'.	2.75 lbs
GN-PT	Pewter		
REIDVILLE			
RD-AB	Antique Bronze	Bell-shaped head supported by decorative arm and sturdy staff. Full cut-off pattern provides 5' light pool on ground with no glare. Perfect for highlighting walkways, flowers and specimen plants. Typical spacing 8'-10'.	3.25 lbs
SEASHELL			
SS-AB	Antique Bronze	Large seashell with adjustable knuckle. Use as full cut-off or tilt up (45° max.) for larger area coverage.	2.0 lbs
SS-AG	Antique Green	A powerful and flexible luminaire for lighting large flower beds or building perimeter plantings.	
EYELID			
EL-AB	Antique Bronze	Round eyelid for deck post or steplighting. Can be surface mounted or semi-recessed. Use for accent or small area illumination of perimeters or stairways. 2' mounting height provides soft coverage 5' w, 2' forward. 6' fixture cable.	1.0 lbs
EL-PT	Pewter		
RECESSED			
RE-PT	Pewter	Round recessed uplight for accent lighting of trees, columns and building facades. Powerful 3w LED projection beam. Provides hidden light source.	1.5 lbs
FLOODLIGHT			
FL-AB	Antique Bronze	Powerful 3w LED projection flood with adjustable knuckle for versatile aiming. Use for accent lighting of building facades, small signs or address numbers, columns, trees and residential flags to 20'.	2.0 lbs
CONTROL CENTER			
LVT56	Black	Non-metallic case protects timer controls and 120V to 12V transformer. Surge protected with grounded cord/plug set and easy 12V cable attachment. Photocontrol triggers "time on", eliminating seasonal adjustment. UL and cETL certified. 56w capacity.	4.0 lbs
CABLE			
CB-75	Black	Low voltage #14 cable runs from LVT56 transformer down path of lighting. UV protected, burial is not required, hide with mulch if desired. Perfect fit with fixture connectors for easy installation (150' is the max. run distance from transformer location to assure best fixture operation).	4.0 lbs
CB-150	Black		6.0 lbs

NOTE: All fixtures are complete with LED light engine, 4' minimum fixture cable and "Smart Connect" tool-free connector. Path lights and floods also include ground stake and a deck mount adapter for flat surfaces. When you purchase Lightscape®, you get it all!

SOLAR LIGHTING

SOLAR

Solar power is an abundant source of energy that can be converted directly into electricity using photovoltaics (PV). The energy of the sun (solar radiation) is captured by solar panels, an array of solar cells. With the advancements in solar technology coupled with the improvements in solid-state lighting, commercial and industrial applications can now realize the benefits of solar powered lighting. Hubbell Lighting is committed to providing innovative and sustainable lighting solutions which offset the rise in energy costs and our impact on the environment.

Hubbell Outdoor and Spaulding Lighting offer sustainable solar powered lighting solutions for area/site, roadway, floodlighting, pathway and wall ceiling applications using the most popular luminaires. The available products include: Roadway LED, Cimarron area/site LED, Laramie LFS flood LED, Euroluxe® LED, Laredo LED wallpack and Tempe LED bollards. These solar powered lighting solutions offer an environmentally friendly “clean energy” solution to lighting with the potential benefits of receiving special incentives for renewable projects.

SOLAR POWERED LIGHTING FEATURES AND BENEFITS

- * Solar powered lighting offers an environmentally friendly solution to lighting
- * Security, navigation and identification lighting for areas where grid tied power may be inaccessible, unreliable or too costly
- * No trenching
- * No wires
- * No electric bills
- * Funding may exist in certain areas for renewable projects
- * Solar powered lighting system can be portable

THE SYSTEM – INTEGRATED SOLAR ELECTRIC POWER ASSEMBLIES

Energy-efficient solid state lighting fixture for variety of applications

Solar panel with self-contained electrical power assemblies – 5 to 340w

Round Straight Steel (RSS) and Round Straight Aluminum (RSA) construction poles available

Complete solar lighting solution with instant sustainable off-grid power source

Hubbell Lighting is pleased to partner with Solar Electric Power Company (SEPCO) to provide the most energy efficient and sustainable solar lighting solutions in the market. Contact your Hubbell Lighting representative for details or visit www.hubbelloutdoor.com

- The LCC solar unit is used with Hubbell Lighting solar lighting package
- Decorative die-cast aluminum housing and door; Rugged design protects internal components and provides excellent thermal management for long life
- Flat, tempered, impact-resistant glass lens protects optics
- Powder paint finishes provide lasting appearance and are available in standard finishes: Dark Bronze, Black, White, Gray and Platinum
- Two-point lag mount securely holds housing to surface; Mounting template is provided
- 12 LED system delivers 820 lumens at 12.8w for 64 lumens per watt efficiency, 5000K CCT, 12V DC system
- Designed for mounting over standard recessed junction boxes or for wiring with surface conduit; 1/2" hubs with plugs provided on top and sides for versatile access
- IDA compliant entry or perimeter lighting
- Six to twelve foot typical mounting heights
- Suitable for use in wet locations

BRLD

Euroluxe® Solar

- The Euroluxe® solar luminaire is used with Hubbell Lighting Solar Package; Using Euroluxe's two finishes and accessory trims, various styles can be created for use in both interior or exterior applications such as entry, stairwells, perimeter walls, corridors; Units can be wall or ceiling mounted
- Borosilicate glass lens sealed to housing by silicone gasket and stainless steel philips head screws; Ribbed lens uniformly spreads light for a symmetrical, soft distribution
- Die-cast aluminum housing and face trims
- Dark bronze and White finishes are offered standard
- Suitable for use in wet locations
- 6 LEDs, 15w, 12V DC, 834 lumens, 5000K, 61.5 lumens per watt efficiency
- Units are designed to operate from -35° C to 40° C ambient
- Two point lag or hickey mount to recessed junction box.

ORDERING INFORMATION (Must be ordered with Hubbell Lighting solar power assembly, see specification sheets for detailed information)

LFS

Compact Solar Flood

SOLAR

- The compact LED solar flood is used with Hubbell Lighting solar package; Laramie LFS is suited for illuminating signs, facades, small area illumination, flag poles and landscape accent
- Decorative die-cast aluminum construction
- Silicone gasketing for positive seal, 1/2" threaded knuckle for use with accessories or mounting by others
- Five standard polyester powder protective finishes plus custom color capability are offered
- Narrow beam (NEMA 1x1) provides a spot for flags, columns and accent lighting
- Medium beam (NEMA 4x4) delivers mid-range beam punch
- Wide beam (NEMA 6x6) with uniform distribution – great for close setbacks
- LED units offer long life with little maintenance and low energy consumption; 12 LEDs, 15w, 12VDC, 936-954 lumens, 5000K CCT, 64 lumens per watt efficiency
- Suitable for use in wet locations

Solar LED Bollards

- The Tempe square and round bollards are used with Hubbell Lighting's solar lighting package; These DC units are designed to illuminate walkways and courtyards
- Extruded aluminum square or round housing, with tamper resistant hardware; Single screw access for top relamping; Decorative Southwestseries cast top
- Durable Lektrocote® TGIC thermoset polyester powder coat paint finish assures long life and maintenance-free service
- Units are available in 31w and 62w configurations, 12V DC input current
- 12 LED light engine, 31w, asymmetric distribution, 3500K or 5000K color temperature
- 24 LED light engine, 62w, symmetric distribution, 3500K or 5000K
- Sealed one-piece, clear acrylic lens; Specular, anodized aluminum optical systems
- Concealed, galvanized steel anchor base; Four 1/2" x 10" anchor bolts
- Suitable for use in wet locations

BRAND PROFILE

- Founded in 1955

A complete line of luminaires and poles for area/ site lighting, wall mount, floodlighting and parking garage applications are available utilizing the latest in energy-saving technologies – LED, pulse start metal halide, compact fluorescent and traditional sources. Spaulding Lighting provides lighting solutions for applications including: parking areas, automotive dealerships, educational/ healthcare campuses, commercial developments, walkways and decorative roadway applications.

PRODUCT OFFERING

LED architectural area/site, wall mount, ceiling/canopy/garage, floodlighting, post top, and bollard luminaires designed for the mid-specification and design-build markets, addressing their need for energy-savings, performance, delivery and value.

LED Design Guide

LED Optical Performance for Area/Site Lighting

LIGHTING SOLUTIONS UTILIZING LED SYSTEMS

Lighting decisions for today's commercial, retail and industrial property owners are rapidly changing. Today's lighting environment often requires businesses to look for innovative ways to dramatically reduce their overall energy costs, greenhouse gas emissions and overall operating risk. With the advancement of technology and rapidly changing criteria, business owners are often tasked with making tough decisions regarding the use of traditional light sources vs. an LED alternative solution.

Spaulding Lighting understands the importance of providing customers with the proper analysis and key data required to assist in their decision making process.

THE INNOVATIVE OPTICS OF THE SPAULDING CIMARRON LED SERIES LUMINAIRES:

- Utilize precise LED optical design and directional lens placement to maximize light delivery where it is needed
- Enable fewer fixtures to be used to deliver comparable light levels for significant energy savings
- Provide one solution to address the need to conserve natural resources without compromising safety and security
- Redistribute the light away from unwanted areas and place it where it can be better utilized
- Employ individual optics designed for maximum performance with very little wasted energy
- Offer enhanced uniformity for greater visibility

BEFORE

AFTER

LED Design Guide

LED Optical Performance for Area/Site Lighting

LED ADVANCEMENTS AND OPTICAL PERFORMANCE

With the rapid advancements of LED technology, visual acuity and better uniformity can be achieved while using less energy. Spaulding's Cimarron LED fixtures integrate the latest LED advancements and deliver optical performance that can perform as well as, and in most cases, better than historical HID fixtures with higher lumen packages.

Advancements in solid state technology have brought about the use of light sources such as LED that provide more energy efficiency and long life, and help protect the environment.

The Cimarron LED series delivers the following advantages:

- Delivers wider spacing and increased forward throw
- Improves overall uniformity
- Uses up to 50% less energy of an equivalent HID fixture at full brightness
- Bi-level control and continuous dimming options offer additional energy-savings
- Potential to reduce pole count
- Enables mounting heights from 15 ft. to over 35 ft.
- Performs virtually maintenance-free (L90 at 60,000 hours, projected per IESNA TM-21-11)
- Saves energy and reduces annual maintenance costs

FOR OUTDOOR PARKING APPLICATIONS, CONSIDERATION SHOULD BE MADE FOR THE FOLLOWING:

- Illuminance - minimum and uniformity requirements
- Energy savings
- Luminaire layout
- Maintenance
- Optical control
- Performance
- Environmental friendliness
- Total cost of ownership

CBEA Lighting Guidelines (Commercial Building Energy Alliance)	Minimum Horizontal	Uniformity
	Illuminance	Maximum: Minimum
Lighting Zone 0 Wilderness areas, parks and preserves, and undeveloped rural areas	N/A	N/A
Lighting Zone 1 Rural and low density residential areas	N/A	N/A
Lighting Zone 2 Light commercial business districts and high density or mixed use residential districts	0.50 fc	10:1
Lighting Zone 3 Large cities' business districts	0.75 fc	10:1
Lighting Zone 4 High intensity business or industrial zone districts	1.00 fc	10:1

The table above is taken from Commercial Building Energy Alliance Site Lighting Performance Specification for Exterior Parking Lots.

LIGHTING CONTROLS

The wiHUBB® control systems from HBA (Hubbell Building Automation) allow programmable control of site/parking luminaires for maximum energy savings. In-Fixture Modules feature full-range dimming capabilities into LED luminaires. Additionally, wiHUBB® Smart Pack and Preset Switch can be included for manual override control further maximizing savings (see Hubbell Building Automation pages 84 for more information)

WIHUBB® CONTROLS FEATURES AND BENEFITS

- Energy savings
- Programmable control of site luminaires wiHUBB® devices communicate utilizing the most advanced radio RF technology
- Fixture scheduling for On/Off and dimmed levels of illumination
- Lower installation costs, no additional wiring
- No rewiring or trenching on retrofit applications
- Factory installed wireless modules
- Expandable/scalable system grows as your facility and lighting needs grow

LED Design Guide

LED Optical Performance for Area/Site Lighting

APPLICATION BASED SOLUTIONS

Examples show a photometric layout designed to the Commercial Building Energy Alliances (CBEA) Lighting Zone 4 minimum horizontal luminance of 1 foot candle utilizing LED. **The advantages and cost savings with LED are summarized below.**

It is also important to consider current IESNA recommended RP20 guidelines for designing fixed lighting for parking facilities. IESNA recommendations only apply to the design of new lighting systems for parking facilities. The lighting recommendations given here are for the reasonably safe movement of vehicular and pedestrian traffic in parking facilities. These values should be considered a minimum guideline, which are subject to changes based on sound engineering judgment. Considerations on illuminance requirements of a parking facility are affected by layout, opera-

tion, and vehicular traffic safety issues, plus the visibility and security needs of pedestrians walking to or from their vehicles. More commonly, parking lots are illuminated to higher levels for safety and security reasons.

IESNA RP 20 recommended maintained illuminance values for parking lots	Basic	Enhanced
Minimum horizontal illuminance	0.2 fc	0.5 fc
Uniformity ratio, (max/min)	20:1	15:1

TECHNOLOGY COMPARISON

EXAMPLE 1

EXAMPLE 2

EXAMPLE 3

--- HYDROFORMED

--- HYDROFORMED

— SEGMENTED

--- HYDROFORMED

— CIMARRON LED

Traditional HID

The large area of excessive lumens in the center of the diagram above provides a visual representation of wasted energy.

HID shoeboxes typically use a lamp in the horizontal position, emitting most of the light straight down at 0 degrees. The excessive lumens gather directly underneath the fixture resulting in:

- Bright, hot spot
- Increase in overall average footcandle levels for poor uniformity

HID Segmented Reflectors

The diagram above illustrates how segmented reflectors redirect light where it is needed in comparison to hydroformed optics.

The use of segmented reflectors:

- Reduces the hot spot
- Enhances overall visual acuity
- Improves lumen distribution and uniformity

Depending on certain criteria, it is even possible to:

- Reduce the overall fixture count
- Save money during initial installation
- Consume less energy throughout the year

LED – Cimarron

The diagram above illustrates the performance of the Type IV Cimarron LED. Note the absence of excessive lumens directly under the fixture.

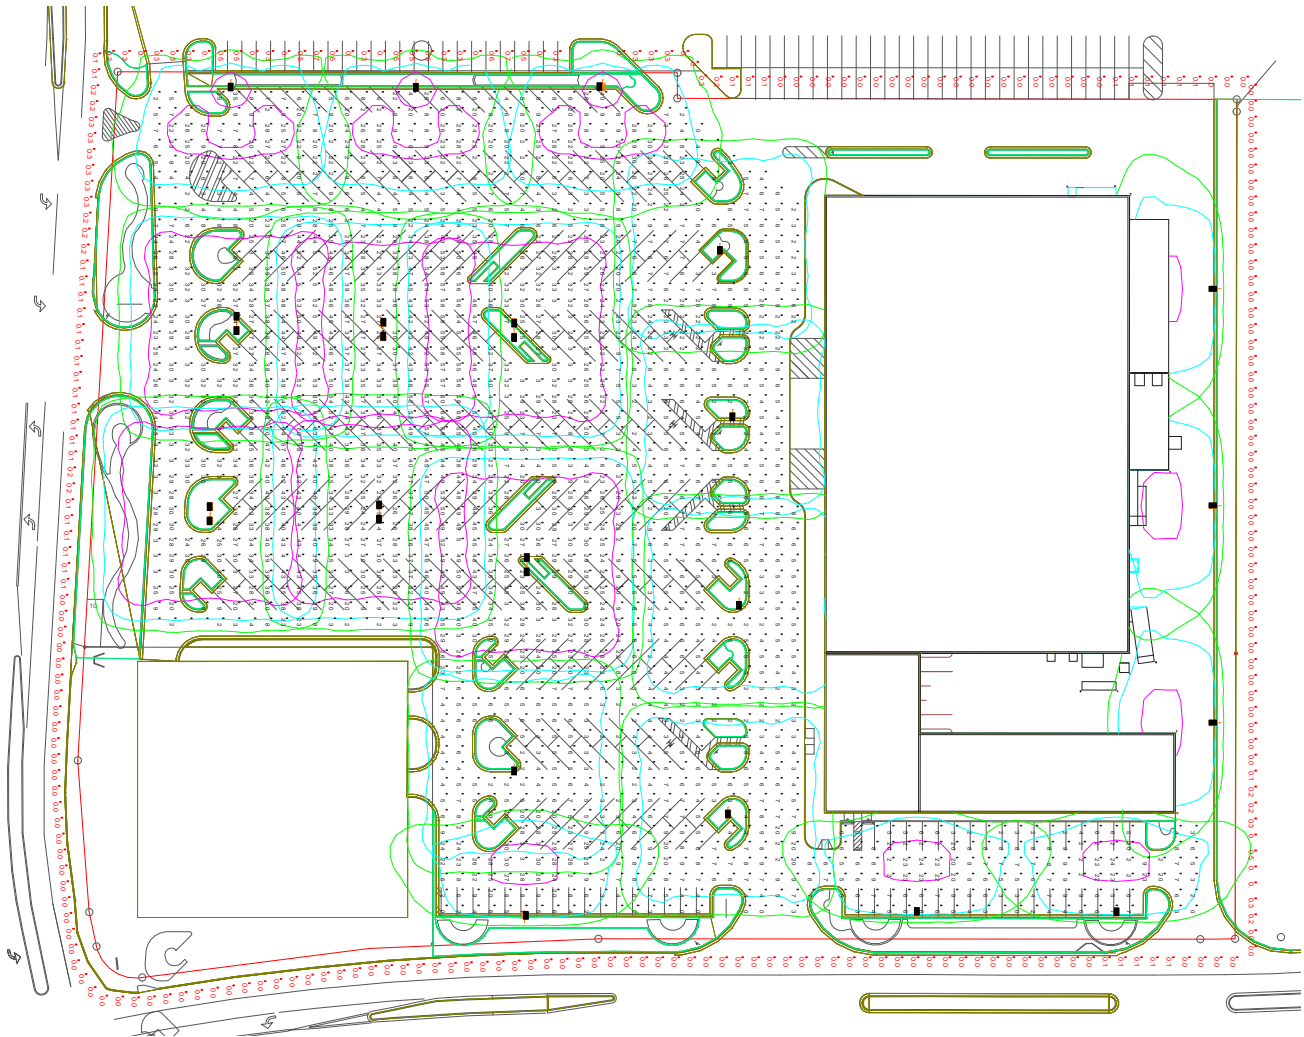

Each LED optical configuration is designed for maximum performance. The advantages of Cimarron LED include:

- Energy-efficiency
- Better uniformity
- Reduced pole and fixture count
- Long life
- Money savings during installation
- Virtually maintenance free (no re-lamping)

LED Design Guide

Large Parking Area Layout with Cimarron LED

LUMINAIRES: 90 LEDs, MOUNTED AT 34 FT.

ILLUMINATION DATA

Maximum: 7.1 fc
 Minimum: 1.0 fc
 Average: 2.39 fc
 Max/Min: 7.1
 Avg/Min: 2.39

Lamp Lumen Depreciation	.95
Luminaire Dirt Depreciation	.95
Light Loss Factor	.90

Cimarron LED cost analysis example

Quantity of luminaires/poles	26/20
Total installed cost*	\$93,450
Input watts per fixture	336
Annual hrs per fixture @ 11 hrs/day	4015
Total site annual KWH	35017
Annual energy costs @ \$0.10 per KWH	\$3,407

- Annual energy savings of 72% plus reduced maintenance offset the initial investment
- Higher KWH rate will increase cost savings and accelerate payback
- The implementation of controls provides additional cost and energy savings

Note: Large parking area layout designed with 5100K CCT Cimarron LED fixtures

*Estimated fixture, pole, base, trenching and labor; Annual maintenance costs not included

For complete LED area/site information visit: www.spauldinglighting.com

Area/Site Controls

Passive Infrared Motion Sensors

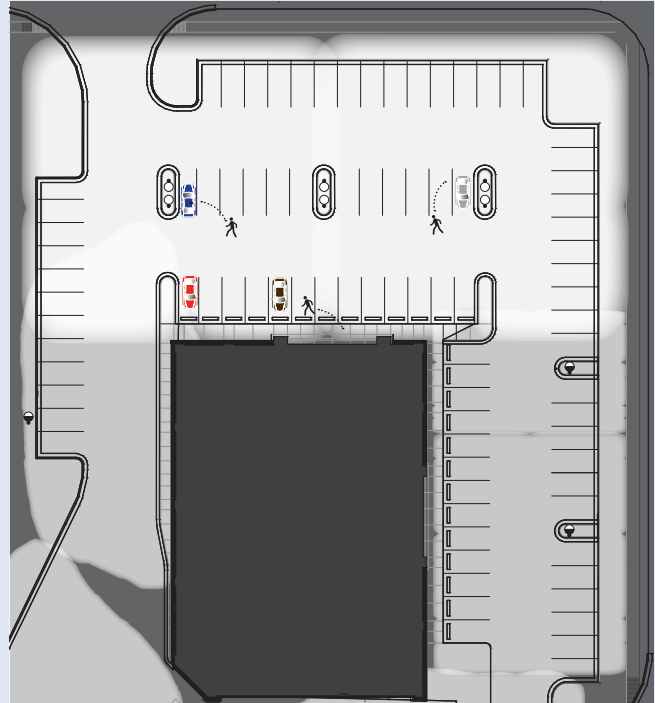

The implementation of controls in a parking lot offers many benefits such as energy savings, extending the life of the LED lamps and compliance with energy codes. By utilizing the latest in energy-saving LED technology and controls from Hubbell Lighting, building owners can reduce overall operating costs.

CONTROLS FEATURES AND BENEFITS

LED luminaires with motion sensor option can be configured to illuminate from low to high power or off to on when motion is detected. Luminaire will return to off or low when motion is no longer detected.

- Digital Passive Infrared (PIR) sensor with dual element pyrometer and spherical fresnel lens for detection of major human motion/activity; The pyro detects the difference in the IR energy radiated from the background versus the moving object. The lens divides the coverage area into multiple zones. Detection is dependent on movement between zones (see coverage pattern below). Objects in path of sensor line of sight can limit coverage.
- High/low or on/off capability available
- User programmable low settings of 70, 60, 50, 20 percent of power; Factory default is 50% of power
- 360° sensor range (less pole shadow)
- Two lenses available: High for mounting up to 30 ft. and wide for mounting up to 16 ft.
- Low temperature (-30°C to 40°C maximum) indoor-outdoor sensors
- User programmable sensor setting mode (test/normal)
- Time out delay is field adjustable; User programmable settings of 4, 6, 8 & 30 min; Factory default setting is 8 minutes
- All units equipped with daylight harvesting which can be user enabled. Factory default setting is disabled; Ambient light range is user selectable from 1-50 FC; Daylight harvesting feature has precedence over motion detection turning fixture completely on or off

- Sensor conforms to UL Standard 508, UL Standard 244A & IP65
- Conforms to California Title 24/ASRAE 90.1/CBEA

Luminaires with passive infrared sensor control

- High 100% light output
- Low light output

EXAMPLES & DESIGN CONSIDERATIONS

- Start up delay from initial motion detection to fixture illumination is approximately 1-2 seconds.
Note: Extreme heat or cold temperatures may limit detection.
- Vehicle detection is possible however less reliable than human detection; Vehicle detection is dependent upon the following: rate of speed, mounting height of luminaire and vehicle temperature.

Luminaires installed at a 30 ft mounting height results in a 42 ft detection radius (84 ft. diameter). A vehicle moving 10 mph travels a distance of 15 ft per second. As a result illumination would occur when the vehicle is 20'-25' from the luminaire.

HIGH LENS

WIDE LENS

Building Mount Controls

Passive Infrared Motion Sensors

Lighting controls for building mount applications can provide significant energy savings by lowering light levels or only lighting the application area where and when it's needed. Similar to pedestrian walkway applications, design considerations for building mount applications include proper light level requirements for safety due to higher volume of activity and architectural lighting requirements.

CONTROLS FEATURES AND BENEFITS

LED wallpack luminaires with motion sensor option can be configured to illuminate from low to high power or off to on when motion is detected. Luminaire will return to off or low when motion is no longer detected.

- Digital Passive Infrared (PIR) sensor with dual element pyrometer and spherical fresnel lens for detection of major human motion/activity; The pyro detects the difference in the IR energy radiated from the background versus the moving object. The lens divides the coverage area into multiple zones. Detection is dependent on movement between zones (see coverage pattern below). Objects in path of sensor line of sight can limit coverage.
- High/low or on/off capability available
- User programmable low settings of 0 - 9.8 volt; Factory default is 1 volt
- 180° sensor range (wall mount)
- 20 ft. maximum mounting height with 1:1 sensor range
- Operating temperature: -40°-104°F (-30°C to 40°C)
- User programmable sensor setting mode (test/normal)
- Time delay is field adjustable; User programmable settings of 30 seconds, 5-30 minutes; Factory default setting is 5 minutes
- All units equipped with daylight harvesting which can be user disabled; Factory default setting is 4 FC; Ambient light range is user selectable from 1-250 FC, Daylight harvesting feature has precedence over motion control turning fixture completely on or off
- High and low dimmed light levels are fully adjustable via handheld wireless configuration tool;
- Sensor conforms to UL Standard 508, UL Standard 244A & IP65
- Conforms to California Title 24/ASRAE 90.1/CBEA

Wallpack Luminaires with passive infrared sensor control

EXAMPLES & DESIGN CONSIDERATIONS

- Start up delay from initial motion detection to fixture illumination is approximately 1-2 seconds
- Detection is dependent upon the following: rate of speed, mounting height of luminaire and ambient temperature (see coverage pattern below). Detection of rapidly moving objects such as bicycles, motorized vehicles, etc. is possible however less reliable than human movement at normal walking speeds.

A luminaire installed at a 20 ft mounting height results in a 20 ft detection radius. A bicycle moving 10 mph travels a distance of 15 ft per second. As a result, illumination would occur when the object is under or past the luminaire.

A luminaire installed at a 20 ft mounting height results in a 20 ft detection radius. A pedestrian moving 3 mph travels a distance of 4.5 ft per second. As a result, illumination would occur when the pedestrian is 11'-15' from the luminaire.

Cimarron CL1S

Pedestrian Site Lighting

RECTANGULAR LUMINAIRES

FEATURES

- Stylish vertically finned die-cast solid top housing and lower heat sink optimize heat dissipation
- Decorative integral arm houses two stage hinge mechanism
- Features quick-mount plate and quick-connect wiring for easy installation
- Drivers have greater than 90% power factor and less than 20% THD
- Optional 0-10VDC continuous dimming to 10%
- Automatic thermal self protection
- Surge protection standard
- -40 deg C to 40 deg C ambient operation
- Lekrocote TGIC polyester powder coat finish
- Stainless steel bezel mechanically compresses gasketed light engine for IP66 rating
- New EXO-Optic technology available
- Nominal 3000K, 80 CRI; 4200K, 70 CRI; 5100K, 67 CRI, turtle friendly Amber
- Choice of 54 high brightness LED configurations with individual acrylic lenses aimed to produce IES type II, III, IV and V distributions
 - Backlight control option reduces spill light behind pole by 85%, doesn't change fixture appearance or EPA
 - Patent pending EXO optic technology filters short wavelengths (blue light)
- Features exclusive wiHUBB technology
 - Wireless system for On/Off and 0-10VDC dimming control to 10% light output
 - Programmable autonomous operation
- DesignLights Consortium qualified
- Listed to UL1598 and CSA C22.2#250.0 24 for wet locations
- IES Progress Award Winner – 2013

RECTANGULAR LUMINAIRES

FEATURES

- Stylish vertically finned die-cast solid top housing and lower heat sink optimize heat dissipation;
- Isolated electrical compartment with integral heat sinking for cooler operation and longer driver life
- Drivers have greater than 90% power factor and less than 20% THD
- Optional continuous dimming to 10% or dual circuitry available
- Automatic thermal self protection
- Surge protection standard
- 60,000 hours life (L90 @ 40°C)*
- Shipped with upswept or straight arm for uniform look and ease of installation
- -40 deg C to 40 deg C ambient operation
- Lektrocote TGIC polyester powder coat finish
- 3000K, 80 CRI; 4200K, 70 CRI; 5100K, 67 CRI
- Stainless steel bezel(s)
- Choice of 3 high brightness LED configurations with individual acrylic lenses aimed to produce IES type II, III, IV and V distributions
- Patent pending EXO optic technology filters short wavelengths (blue light)
- Backlight control option reduces spill light behind pole by 85%, doesn't change fixture appearance or EPA
- Features exclusive wiHUBB technology
 - Wireless system for On/Off and 0-10VDC dimming control to 10% light output
 - Programmable autonomous operation
- IP65
- Listed to UL1598 and CSA C22.2#250.0-24 for wet locations
- Increased lumen output with use of 1050mA driver (90L only)
- DesignLights Consortium qualified
- Turtle friendly Amber available

 3 Fuse option not available with universal voltage
 4 Select F3 fusing option for 220V
 5 Photocell receptacle not available with BL or WIH options
 6 Recommended for Type II, III or Type IV distributions only
 7 Select only when using voltage specific option (F or WIH)
 8 Available in 350mA drive current only, Type IV, 5m only
 9 Available in Type III and 5M only
 10 Available with 120V, 277V, 347V or 480V
 11 E3D only available with 90L; Dynamic EXO configuration consists of 30 EXO optics, 60 clear optics (Consult factory for control options)

ECL1PSE

Backlight Control

For those LED projects that require minimal light behind the pole, Spaulding Lighting has a solution – ECL1PSE Backlight Control. This unique system, designed specifically for LED lighting, will virtually eliminate the light spill behind the pole and is available on Cimarron LED CL1 and CL1S models. (See CL1 and CL1S page(s) for ordering information)

- Reduce light 85% behind the pole – industry leading performance
- No change to fixture appearance or EPA
- Achieves impressive Backlight-Uplight-Glare (BUG) rating
- Neighbor-friendly lighting
- 2012 IES Progress Report Award winner

Type IV with Backlight Control

Type IV without Backlight Control

ARCEOS ARF1

Ultra Compact Architectural Floodlight

FLOODLIGHTS

NEW

- Ultra compact LED flood with a variety of NEMA distributions for lighting applications such as safety/security, accent, flag pole, columns, facade, area, or signs
- NEMA distributions include: - N (3x3), M (4x4), RM (5x4) and W (6x6)
- 10 high powered LEDs deliver up to 2,285 lumens at 25w
- 5100K CCT 67 CRI, 4200K 70 CRI, 3000K 80 CRI
- Vented housing isolates LED module from driver, maximizing product life and performance
- High impact UV stabilized acrylic outer lens protects LEDs and allows for cleaning and debris removal
- Rugged die-cast aluminum housing with dark bronze finish
- Traditional 1/2" x 14 NPS threaded adjustable knuckle mounting
- Visor and vandal lens available
- Listed to UL1598 for use in wet locations
- DLC Qualified (4200K and 5100K CCT models only); Consult DLC website for more details: <http://www.designlights.org/QPL>

Architectural Wallpacks

- Architectural wallpack in three stylish shapes with contours to accentuate building architecture
- Provides excellent illumination and uniformity
- Durable die-cast aluminum construction
- Energy-efficient LED produces up to 5,062 lumens with up to 105 LPW efficacy
- Type II, III and IV (Forward Throw) distributions
- Quick-mount adapter for J-boxes for easy installation
- LED color temperature 3000K, 4200K, and 5100K nominal
- 4K and 5K models meet DesignLights Consortium (DLC) qualifications, consult DLC website for more details: <http://www.designlights.org/QPL>
- Occupancy control and photocell options available
- BBU integral battery option for 120-277V, rated for -20°C – 25°C; designed to provide minimum of 1fc in a 10' square at 10-12' mounting height
- Listed to UL1598 for use in wet locations
- Zero uplight, dark sky, neighbor friendly

DIMENSIONS

Laredo LMC

Medium-Size Wallpack

Laredo 30 LED medium size wallpack offers both wide spacing and excellent uniformity. The 30 LED unit is available in lumen packages ideal for mounting heights from 12 to 18 feet, providing spacings of up to five times the mounting height. The 30 LED unit is available in a Type II, III or forward throw Type IV beam.

The fixture is constructed of durable die-cast aluminum housing and door. The Laredo features a quick-mount adapter that allows installation without ever opening the fixture. Save on installation time, fixture maintenance and energy!

LMC-30LU Egress Wallpack:

Designed to meet strict 1fc minimum requirements. At 12ft mounting height 1fc covers 16x16ft area, well beyond the 10x10ft standard. 43.5w - 350mA drives 30LEDs at 2700 lumens at full power/ 2046 average lumens in battery mode. Outer clear impact resistant glass lens protects LED lenses. No uplight, external test button, quick mount, wet location listed.

APPLICATIONS

Zero uplight, IDA compliant perimeter lighting. Listed to UL1598 for use in wet locations when mounted aimed down.

Surface/Ceiling/Garage Luminaire

CEILING/SURFACE/GARAGE

- For ceiling mount, parking garage, tunnel and walkway applications from an 8-18 foot mounting height; A wide range of lumen packages and optical distributions are available making the ARS Series luminaire both versatile and functional
- Die cast aluminum housing features horizontal and vertical fins for two directional air flow that maximizes heat dissipation and ensures long electrical component life and luminaire performance
- Individual LED lenses offer three distribution types: Type V Square (5M), Type V Rectangular (5R) or Type IV (4)
- The ARS's hexagonal LED cluster design provides optical flexibility and light level scalability from a compact luminaire
- Choice of multiple light outputs based on quantity of hexagonal LED arrays: 3 = 18 LEDs, 4 = 24 LEDs or 6 = 36 LEDs hexagonal LED modules, lumen range 4,000-8,600
- 0-10V dimming drivers
- Lumens per watt > 92-102
- Choice of 7 finishes provides durable and lasting appearance
- IP65, Listed to UL 1598 for use in wet locations
- Occupancy, photocell, and wiHUBB wireless controls available for complete on/off and dimming operation

ARCEOS ARS Controls

ARS LED luminaire with passive infrared motion sensor control option (individual luminaire control)

CEILING/SURFACE/GARAGE

LED luminaires with motion sensor option can be configured to illuminate from low to high power or off to on when motion is detected. Luminaire will return to off or low when motion is no longer detected.

Examples & Design Considerations

- Digital Passive Infrared (PIR) sensor with dual element pyrometer and spherical fresnel lens for detection of major human motion/activity; The pyro detects the difference in the IR energy radiated from the background versus the moving object. The lens divides the coverage area into multiple zones. Detection is dependent on movement between zones (see coverage pattern below). Objects in path of sensor line of sight can limit coverage.
- High/low or on/off capability available
- User programmable low settings of 70, 60, 50, 20 percent of power; Factory default is 50% of power
- 360° sensor range
- 16 ft. maximum mounting height indoors (wide lens standard)
- Low temperature (-30°C to 40°C maximum) indoor-outdoor sensors
- User programmable sensor setting mode (test/normal)
- Time out delay is field adjustable; User programmable settings of 4, 6, 8 & 30 min; Factory default setting is 8 minutes
- All units equipped with daylight harvesting which can be user enabled. Factory default setting is disabled; Ambient light range is user selectable from 1-50 FC; Daylight harvesting feature has precedence over motion control turning fixture completely on or off
- Sensor conforms to UL Standard 508, UL Standard 244A & IP65
- Conforms to California Title 24/ASRAE 90.1/CBEA

Examples & Design Considerations

- Start up delay from initial motion detection to fixture illumination is approximately 1-2 seconds
- Vehicle detection is possible however less reliable than human detection; Vehicle detection is dependent upon the following: rate of speed, mounting height of luminaire and vehicle background temperature (see coverage pattern below)

Sensor Range

Luminaire with passive infrared sensor control

High 100% light output

Low light output

Examples

- Luminaires installed at a typical 8 ft mounting height results in a 24 ft detection radius (48 ft. diameter). A vehicle moving 10 mph travels a distance of 15 ft per second. As a result illumination may not occur until vehicle is under luminaire.
- A pedestrian moving 3 mph travels a distance of 4.5 ft per second. As a result illumination would occur when pedestrian is within 15-20 ft of the luminaire.

Ordering Information

ARS luminaires offers the following motion sensor options:

SCO – On/Off control - No light output when no motion detected
Reference ARS specification page for additional ordering information

SCP – High/Low control – user programmable; Factory default is 50%

Peachtree PT

Post Top Luminaire

- Spun aluminum hood, hinges up for relamping
- Cast aluminum base and slipfitter with steel rods to secure lens and hood
- Borosilicate glass refractors provide Type III or V round light patterns; Polycarbonate refractor provides Type V round light pattern
- Cast aluminum fitters for 3" OD pole top or 2.375" OD tenon; secured by set screws in fitter
- 28 high brightness LEDs at 700mA delivers symmetric distribution at 64w, providing up to 4010 delivered lumens; 4200K and 5100K color temperatures
- 50,000 hour LED rating L70 at 25°C
- Universal voltage driver (120-277V) with +/- 10% tolerance, starting temperature rate -20°F
- Durable Lektrocote® TGIC thermoset polyester powder coat paint finish assures long life and maintenance-free service
- Listed to UL1598 for use in wet locations

Poles

POLES

Spaulding's complete line of poles offers simple solutions for all your lighting needs from 8 to 60 feet in height. Pole applications include general floodlighting, sports lighting, auto dealerships commercial site lighting, and roadways. Mounting configurations include tenon top, side mount, pad mount, or open top models to match any luminaire style.

Constructed with exacting standards, both our aluminum and steel poles meet

strict guidelines for quality, strength, and finish. Protecting your investment is our Lektrocote paint or galvanized finish. Both guarantee your investment for years. From shaft cutting through painting, quality control inspections are conducted throughout a highly automated process.

Lastly, to ensure the finish is not damaged during shipment, all poles are protected with a durable yet easily removed material.

LUMINAIRE MOUNTING TYPE

- AX⁴ Side - single
- BX⁴ Side - double at 90°
- CX⁴ Side - double at 180°
- DX⁴ Side - triple at 90°
- EX⁴ Side - triple at 120°
- FX⁴ Side - quad at 90°
- P1 Pad mount - spider type
- P2 Pad mount - yoke type
- P3 Pad mount - yoke type (Proformer XL only)
- TR⁹ Removable tenon (2 3/8 x 4 1/4)
- TA Tenon (2 3/8" OD)
- TB Tenon (2 7/8" OD)
- OT Open top (for post top luminaires)
- CD Concord top (use with Concord luminaires only)

OPTIONS

- Q55 Internal coating (Hubbell seal)
- Q18⁵ 20A GFCI receptacle and cover
- Q22⁵ Extra hand hole
- Q26⁵ 1/2" coupling
- Q27⁵ 3/4" coupling
- Q30⁵ 2" coupling
- Q32⁵ Mid-pole luminaire bracket
- Q41 Fast mode vibration damper
- Q42 Second mode vibration damper
- Q45⁶ Square base cover
- Q46⁷ Round base cover
- LAB Less anchor bolts
- CSA⁸ CSA Certified (consult factory)

MATERIAL

- S Steel
- A Aluminum

SHAFT THICKNESS

- 1 Steel - Standard (11 GA / .119)
- 7 Steel - Heavy (7 GA / .179)
- 3 Steel - Extra heavy (3 GA / .226 - .250)
- A Aluminum - Standard (.125)
- B Aluminum - Heavy (.188)
- C Aluminum - Extra heavy (.220 - .250)

FINISH

- DB Dark Bronze
- BL Black
- WH White
- GR Gray
- PS Platinum Silver
- RD Red (premium color)
- FG Forest Green (premium color)
- CC Custom Color (consult factory)
- PR Primer Only
- GL Hot Dip Galvanized
- NA Natural Aluminum (aluminum poles only)

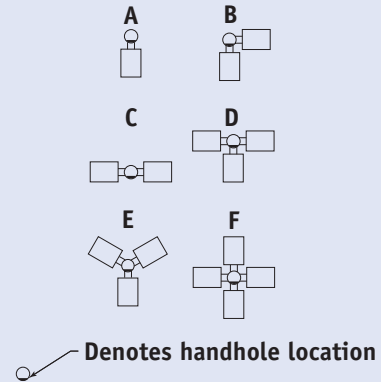

- 1 Round tapered steel poles only
- 2 Round Straight Poles only
- 3 Tapered Poles only
- 4 DRILL PATTERNS: Consult specific pole pages
- 5 Specify option location using logic found in pole introduction pages; The location of all options must start a minimum of six inches above the hand hole and be located one foot apart from one another; Consult factory for any exceptions
- 6 Optional base cover only needed when not provided as standard
- 7 Optional round base cover
- 8 SSS & RSS poles only
- 9 Removable tenon used in conjunction with side arm mounting on SSS series poles; First specify desired arm configuration followed by "TR" notation
Example: SSS-25-40-7-C6-TR-DB

✗ This pole logic is for reference use only. The appropriate pole table should be used when sizing and ordering poles. Please visit spauldinglighting.com for complete pole information including EPA, wind maps and AASHTO ratings

LUMINAIRE MOUNTING

SIDE MOUNTING LOCATIONS

ANCHOR BOLT DETAIL BASE DIAGRAM

OPTION ORIENTATION

Follow the logic below when ordering location specific options.

For each option, include its orientation (in degrees) and its height (in feet). Example: Option Q26 should be ordered as:

SSS-20-40-1-A1-DB-Q26-0-15
(1/2" coupling on the hand hole/arm side of pole, 15 feet up from the pole base)

STANDARD ANCHOR BOLTS (Included with pole purchase)

TAB-15	1/2 x 15 x 3" (Non-galvanized) qty: 4
TAB-17-M38	3/4 x 17 x 3" (Galvanized) qty: 3
TAB-30-M38	3/4 x 30 x 3" (Galvanized) qty: 4
TAB-36-M38	1 x 36 x 4" (Galvanized) qty: 4
TAB-42-M38	1 1/4 x 42 x 6" (Galvanized) qty: 4

REPLACEMENT NUT/WASHER KIT

8003324902	3/4" TAB30 Set
8003325902	1" TAB36 Set
8003659903	1 1/4" TAB42 Set

Note Fabricated from high tensile steel, each anchor bolt has two nuts and two washers; Galvanized anchor bolts are hot dipped; (Galvanizing includes threaded portion plus six inches minimum); Anchor bolt template included with pole purchase

POLE BASE COVERS

Catalog Number	Description
Pole Base Covers for Square Poles	
SBC-4-XX ¹	10 1/2" Sq x 5" Deep (use on 4" sq poles)
SBC-4L-XX ¹	12 1/4" Sq x 5" Deep (use 4" sq poles)
SBC-5-XX ¹	12 1/4" Sq x 5" Deep (use on 5" sq poles)
SBC-6-XX ¹	12 1/4" Sq x 5" Deep (use on 6" sq poles)
Pole Base Covers for Round Poles	
SBC-3R-XX ¹	9" Sq x 5" Deep (use on 3" round poles)
SBC-4R-XX ¹	10 1/2" Sq x 5" Deep (use on 4" round poles)
SBC-45R-XX ¹	10 1/2" Sq x 5" Deep (use on 4 1/2" round poles)
SBC-5R-XX ¹	10 1/2" Sq x 5" Deep (use on 5" round poles)
SBC-6R-XX ¹	10 1/2" Sq x 5" Deep (use on 6" round poles)
RBC-4R-XX ¹	10.91" Dia. x 5" Deep (use on 4" round poles)
RBC-45R-XX ¹	10.91" Dia. x 5" Deep (use on 4 1/2" round poles)
RBC-45RL-XX ¹	14.35" Dia. x 5" Deep (use on 4 1/2" round poles)
RBC-5R-XX ¹	11.91" Dia. x 5" Deep (use on 5" round poles)
RBC-5RL-XX ¹	14.35" Dia. x 5" Deep (use on 5" round poles)
RBC-6R-XX ¹	11.91" Dia. x 5" Deep (use on 6" round poles)
RBC-6RL-XX ¹	14.35" Dia. x 5" Deep (use on 6" round poles)
RTS-2065-XX -Q45 ¹	13" Sq x 5" Deep (use on 6 1/2" round poles)
RTS-2570-XX -Q45 ¹	13" Sq x 5" Deep (use on 7" round poles)
RTS-3080-XX -Q45 ¹	13" Sq x 5" Deep (use on 8" round poles)
RTS-3585-XX -Q45 ¹	13" Sq x 5" Deep (use on 8 1/2" round poles)
RTS-3990-XX -Q45 ¹	13" Sq x 5" Deep (use on 9" round poles)

¹ Replace XX with color choice, eg.: DB for Dark Bronze
