WARNING SYMBOLS

Safety alert symbol: Indicates a hazard.

Always ensure that you and the persons in the vicinity wear approved eye protection.

NOT insulated. Plastic-dipped or slip-on plastic handles are NOT intended for protection against electrical shock.

It is important that users of these products read, understand, and follow all instructions, cautions, and warnings that are attached to and/or packed with the product.

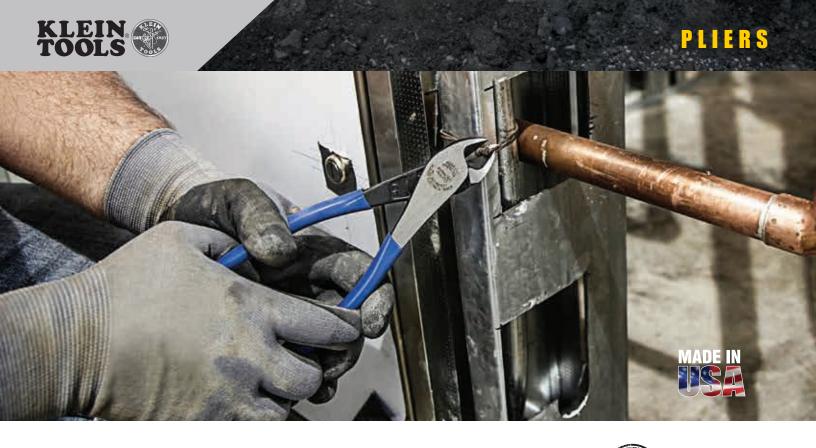

Ironworker's Pliers

Use to twist and snip soft annealed rebar tire wire. The knurled jaws also aid in easy twisting and turning. These pliers feature a hook-bend in the handle for added grip and leverage. Unique handle tempering helps absorb the "snap" when cutting wire. Split ring for tethering available on "TT" Series.

High-Leverage Pliers

Available in side or diagonal-cutting models, these pliers feature a high-leverage design. The rivet is closer to the cutting edge for greater cutting and gripping power than other plier designs. The 2000 Series have heavy-duty cutting knives for ACSR, screws, nails and most hardened wire. The angled head on the diagonal cutters easily gets into tight spaces. The "TT" series feature a split ring for tethering the pliers when working at height.

Why is it important?

In private industry, falling objects accounted for 10% of worker fatalities in 2013 and are the third leading cause of disabling workplace injuries. In 2012, falling objects caused 18% of contractor deaths, a 7% increase from 2011.

OSHA ranks being "struck by objects" as the third leading cause of disabling workplace injuries.

- · Inspect for wear before each use.
- · Do not use for human support.
- · Maximum Working Capacity 10 lbs. (4.5 kg). Never connect over 5 lbs. (2.3 kg) to a person.
- Do not use around moving or rotating equipment.

△WARNING:

- Tether extends to length of 5' (1.5 m). Rig to avoid contact with objects below.
- · Always ensure cinch remains snug while in use.
- · Always attach carabiner end to anchor point.
- · Do not attach tether back onto itself. Do not tie knots in tether.

Steel Bull Pins

Broad Head

- Forged, heat-treated steel increases efficiency by providing a larger striking surface.
- Angled head and smooth blending of radii increase strength and reduce the danger of chipping.
- Below the head, squared-off shoulders forged to provide a surface for applying wrench to loosen wedged bull pins.
- Added resistance to "mushrooming" permits longer use then conventional designs and the even taper reduces binding and hang-up.
- "TT" Series feature tether hole for working at height.

Standard and Barrel-Type Drift

- Machined from quality alloy steel.
- Heat-treated for strength, black oxide finish for rust resistance.

Erection Wrenches

- Forged from select alloy steel to withstand high-leverage and heavy loads.
- Extra-heavy-duty head area gives maximum strength and durability.
- Continuous taper of handle makes lining up bolt holes easy and works on a range of bolt-hole sizes without binding.
- Extra-large hub area works on larger diameter holes better than other wrenches.
- Catalog number, bolt size and nominal opening size are stamped on every wrench for easy identification.
- "TT" Series feature tether hole to secure tool when working at height.

Grizzly™ Bar

64306

- A heavy, strong, multi-purpose tool that saves time and effort on the job.
- The 3" (76 mm) width protects concrete when stripping forms.
- Efficient blade angle and 55-1/2" (141 cm) total length provide high leverage as a crow bar, as well as a nail and spike puller.
- Blade is forged and hardened alloy with keyhole nail-pulling slot in center and "V" notch in tapered edge.
- Can be used to help align walls during tilt-up construction, to roll and align large pipe, to remove shingles and flooring, and for many other stripping and prying tasks.
