## PlugTail® Self-Test GFCIs – The fastest, most consistent and reliable wiring devices – ever.

The new Pass & Seymour® PlugTail Hospital Grade Self-Test GFCI receptacle with SafeLock® Protection conducts an automatic test every three seconds, ensuring it's always ready to protect. If the device fails the test, the indicator light flashes to signal that the GFCI should be replaced. It also has our proven SafeLock Protection feature: if critical components are damaged and protection is lost, power to the receptacle is disconnected.

For Hospital Grade PlugTail Self-Test GFCIs, refer to SF721R4.

### FEATURES & BENEFITS

**Patented SafeLock® Protection** – if critical components are damaged and ground fault protection is lost, power to the receptacle is disconnected.

**Zinc-plated steel mounting strap.**

**The indicator light flashes** if the device fails the self-test, signalling that the GFCI should be replaced.

**The most durable GFCI available.** Exceeds UL943 voltage surge requirements.

**Tamper-resistant automatic shutter system** prevents young children from inserting common household objects.

**High-impact-resistant, thermoplastic construction** for superior strength and durability.

PT2097TRLA

**Meets Federal Specification requirements and 2015 UL requirements.**

**Built-in connector** features large brass terminal blades to ensure consistent, reliable electrical connections to PlugTail Connector.

**GFCI works with the existing three-wire PlugTail connectors** creating a non-feed thru application for facility owners. At rough-in, just install the same right-angle connector for GFCI and receptacle openings.

**Large crimped and welded brass contacts** snugly terminate on device blade terminals. Audible snapping latch assures connection, allows release.

**Ultrasonically welded polycarbonate connector housing** secures terminations and conductors in a UL Listed, finger-safe housing.

**No exposed terminals** create a finger-safe application before, during, and after installation.

**Auto-ground clip** assures a positive ground to metal box.

## PlugTail® Spec Grade Self-Test GFCIs

### 15 & 20A, 125VAC

#### TECHNICAL SPECIFICATIONS

#### 3rd Party Compliance

cULus Listed File Number E42190 and E140596, Standard UL498 Attachment Plugs and Receptacles, UL943 GFCIs. Federal Specification WC596. Standard CSA C22.2 No. 42 General Use Receptacles, CSA C22.2 No. 144 GFCIs. Conforms to NEMA WD-1 and WD-6.

#### Performance

##### Electrical

Dielectric Voltage	Withstands 1500V minimum
Trip Level	4 to 6 mA
Trip Time	.025 Second Nominal
Frequency	60 Hz
Maximum Working Voltage	125VAC
Voltage Range	102-132VAC

##### Mechanical

PlugTail Connector Identification	#12 AWG, THHN, copper conductor, 6" leads, stripped, solid or stranded, for use with PlugTail Receptacles only
Product Identification	Ratings are a permanent part of the device

##### Environmental

Operating Temperature	-35°C to +66°C
Maximum Humidity	95%
Flammability	UL94 V2
