

A technical drawing of a rectangular structure, possibly a tank or container, with dimensions labeled A, B, D, and E. The drawing shows a cross-section of the structure with a hatched interior. Dimension A is the width, B is the height, D is the length of a central horizontal section, and E is the height of that section. The drawing is overlaid on a red background.

Fiberglass/Polymer Concrete & HDPE Products

The Standard to Which Others are Measured.

HIGHLINE
PRODUCTS

800 South Street

E-Mail: info@highlineproducts.com

HIGHLINE PRODUCTS is your ONE-STOP SOURCE for all your Underground Enclosures, Primary Cabinets, Transformer and Switchgear pads. Highline has been servicing our Industry for over 30 years.

We serve the following market customers:

- Electric Utilities
- Telephone Utilities
- Communication Companies
- Dept. of Transportation: Traffic Signal and Roadway Lighting
- Waterworks
- Gas
- Irrigation
- Electric Contractors

With these products:

- Transformer box pads and flat pads
- Switchgear box pads
- Primary sectionalizing cabinets
- Fiberglass pole top extensions
- HDPE plastic pull/splice boxes
- Fiberglass groundsleeves
- Fiberglass/polymer concrete handholes/splice boxes
- All polymer concrete handholes/splice boxes
- Fiberglass/polymer concrete vaults
- Polymer concrete flat transformer pads
- Valve boxes, meter boxes

This catalog contains our Fiberglass/Polymer Concrete Splice Boxes and Vaults, all Polymer Concrete Splice Boxes, Polymer Concrete Flat Pads, and HDPE Splice Boxes. Please refer to our other catalogs for additional products, or visit us on the web at www.highlineproducts.com for a comprehensive product offering.

Thank you for your interest in **HIGHLINE PRODUCTS**. Please contact us through our local manufacturers' representative or distributor, or by calling us at (781) 736-0002.

Specifications

Polymer Concrete

The pull/splice box ring and cover shall be constructed of polymer concrete consisting of sand and aggregate bound together with a polymer resin. Internal reinforcement may be provided by means of steel, fiberglass, or a combination of the two. The polymer concrete material is to have the following minimum allowable properties to be accepted for use:

Ultraviolet Exposure:	Tested in accordance with ASTM G-53 using an U.V.A. 340 bulb.
Flammability Test:	Tested in accordance with ASTM D-635.
Accelerated Service:	Tested in accordance with Procedure E, ASTM D-756.
Water Absorption:	Tested in accordance with Procedure E, ASTM D-570, Section 5, 6, 1, and 6.5.
Impact Resistance:	72 foot-pounds in accordance with ASTM D-2444 using a "C" Tup.
Compressive Strength:	11,000 psi tested in accordance with ASTM C-109 loaded at a rate between 28,000 lbs. to 41,000 lbs. per minute.
Flexural Strength:	7,500 psi tested in accordance with ASTM D-790.
Tensile Strength:	1,700 psi tested in accordance with ASTM C-496.
Skid Resistance:	0.50 coefficient of friction in accordance with ASTM C-1028.
Chemical Resistance:	Tested according to ASTM D-543, Section 7, Procedure 1 using the following chemicals: Sodium Chloride 5% Sulfuric Acid 0.1N Hydrochloric Acid 0.2N Sodium Sulfate 0.1N Sodium Carbonate 0.1N Sodium Hydroxide 0.1N Transformer Oil Per ASTM D-543 Kerosene Per ASTM D-543

Fiberglass

MATERIALS: BASE	
Thickness Tolerance	± 1/16" to 1/8"
Flexural Strength	17,000 – 18,000 psi
Flex Modulus	.59 – .65 psi x10 ⁶
Tensile Strength	9,100 – 10,500 psi
Impact Strength (notched Izod)	15 – 17 ft lbs/inch
Glass Length	1" random orientation
Glass Fiber Orientation	Non Random
Resin Type	Non-Isophthalic
Filler	Gypsum
Water Absorption	≤ 1%

Design Load Requirements

The standard product line is designed and manufactured to perform under the following load rating designations:

- **10,400 # W.U.C. 3.6** – 10,400-pound load applied over a 10" x 10" (100 square inch) area. This is in accordance with W.U.C. (Western Underground Committee recommended guide # 3.6 Non-Concrete Enclosures). For non-deliberate, incidental light vehicular traffic.
- **20,800 # W.U.C. 3.6** – 20,800-pound load applied over a 10" x 10" (100 square inch) area. This is in accordance with most Department of Transportation specifications for products installed in their right-of-way behind the curb line. For non-deliberate, incidental heavy vehicular traffic.

Product Test Procedures

The following test methods have been used in evaluating the physical and chemical properties of the hybrid fiberglass/polymer concrete product line.

Impact Properties (Izod)	ASTM D 256	ASTM D 2444
Compressive Strength	ASTM C 109	
Tensile Strength	ASTM C 190	
Flexural Strength	ASTM C 293	
Chemical Resistance	ASTM D 543	
Simulated Sunlight	ASTM D 1501	
Vicat Softening Temperature		ASTM D 1525
Water Absorption	ASTM D 570	
Ultra Violet Resistance	ASTM G 53	
Brittleness Temperature	ASTM D 746	
Flammability	ASTM D 635	
Static Coefficient of Friction		ASTM C 1028

Polymer Concrete and Fiberglass Polymer Concrete Products

HIGHLINE PRODUCTS underground enclosures are designed for use in pulling, splicing, and storing cable, as well as for access to underground power, communications, CATV, or water lines. They are an **alternative to traditional concrete service boxes and vaults**. Such products have been proven for over 30 years.

HIGHLINE PRODUCTS concrete-alternative underground enclosures come in two styles:

1. **Hybrid:** polymer concrete cover and supporting ring for traffic bearing molded to a fiberglass body for light weight.
2. **All polymer concrete.**

Traditional concrete and polymer concrete both consist basically of sand, aggregate, and a bonding material. In traditional concrete, the bonding material is Portland cement and water; in polymer concrete, it is resin epoxy.

The polymer concrete is also reinforced with fiberglass which results in a product that is three times the strength of traditional concrete with the additional advantage of much less weight than traditional concrete.

Why choose concrete-alternative enclosures?

1. **Lightweight** - as much as 90% lighter than concrete enclosures of the same size.
2. **Cost effective** - usually lower installed cost and low life cycle costs.
3. **Non-conductive and non-flammable** - polymer concrete and fiberglass do not conduct electricity, therefore affording a high degree of safety.
4. **Corrosion resistant** - laughs at acids, oils, gasoline, weathering and other forms of deterioration.
5. **Stable under freeze-thaw conditions.**
6. **Capable of withstanding non-deliberate traffic** of 20,000 pounds and more.

The standard of the industry is **Western Underground Committee Guide 3.6 (WUC 3.6)**. This document spells out the specifications concerning load ratings and other performance requirements of non-traditional concrete products Enclosures made by **HIGHLINE PRODUCTS** meet these specifications.

This catalog contains our complete product offering for your selection of boxes and vaults for your project:

1. **The hybrid (polymer concrete ring and cover with fiberglass body) handhole series through 30" x 48":** CHA.
2. **The hybrid series of larger vaults from 30" x 48" through 48" x 96":** CVA.
3. **The all-polymer concrete (ring, cover, and body) series of handholes through 30" x 48":** PHA.
4. **The all-polymer concrete series of larger vaults from 30" x 48" through 48" x 96":** PVA.
5. **Polymer concrete flat pads.**

Fiberglass/Polymer Concrete Flushmount Pull Boxes

10 x 15 x 12

10 x 15 x 18

PRODUCT FEATURES

- Lightweight.
- 10K and 20K load ratings available.
- Loading characteristics conform to the Western Underground Committee recommended guide WUC 3.6.
- Non-conductive.
- Constructed of fire-retardant materials.
- Cable entrances available or are easily cut in field.
- Skid resistant covers.
- Logo as required.
- Penta or hex head bolts.
- Flared design for nestability.
- Can be manufactured in decorative colors.
- Interchangeable covers.
- Available with solid base and gaskets upon request.

PRODUCT FEATURES

- 10K and 20K load ratings available.
- Loading characteristics conform to the Western Underground Committee recommended guide WUC 3.6.
- Non-conductive.
- Constructed of fire-retardant materials.
- Skid resistant covers.
- Logo as required.
- Penta or hex head bolts.
- Can be manufactured in decorative colors.
- Interchangeable covers.
- Available with solid base and gaskets upon request.
- Straight wall design for minimal excavation.
- Stackable.

Fiberglass/Polymer Concrete Flush Mount Underground Vaults

PRODUCT FEATURES

- Constructed of fire-retardant materials.
- Skid resistant covers.
- Pulling eyes and cable racking installed upon request.
- Cable entrances available or are easily cut in field.
- Logo as required.
- Two piece and three piece covers on large size vaults.
- Penta or hex head bolts.
- 10K and 20K load ratings available.
- Loading characteristics conform to the Western Underground Committee recommended guide WUC 3.6.
- Non-conductive.

Applications:

- Pulling, splicing, and storing cable
- Waterworks installations

Consult factory for all Polymer Concrete Vaults.

CVA = Vault and cover assembly

Add "S" after Model Number for standard 10K cover/box.

Add "H" after Model Number for heavy duty 20K cover/box.

Custom sizes available upon request.

Available options for all vaults include: Custom Logo, EMS Marker, Terminators, Cable Racks, Knockouts, Pulling Eyes, Mouseholes, Solid Vault & Base.

Fiberglass/Polymer Concrete Flat Pad PBP Series

PRODUCT FEATURES

- Constructed of fire-retardant materials.
- Light weight, high strength.
- Molded-in unistrut, or star insert eliminates the need for precise unit positioning.
- Has greater tensile and compression strength than concrete.
- Exceptional resistance to weathering and chemicals.
- Will not absorb moisture. Unaffected by freeze/thaw cycles.
- For single phase and three phase pad mount transformers.

Highline Products has a complete line of Fiberglass Box Pads and Equipment Pads. Please see our other catalog or visit us on the web for these products.

Fiberglass/Polymer Concrete Barrel for Fiber Cable Splicing and Storage - PHH Series

PRODUCT FEATURES

- Used for off-road applications requiring 45,000lb load rating.
- Certified per ASTM C857-87 for an A-16 loading.
- Approved by N.J. DOT Bureau of Electrical Engineering.
- Round design facilitates coiling and storage.
- Non-conductive.
- Constructed of fire-retardant materials.
- Stainless steel hardware.
- Quick release stainless coiling brackets standard.
- Skid resistant covers.
- Logo as required.
- Penta or hex head bolts.
- Exceptional resistance to weathering and chemicals.

Ordering Information

Fiberglass/Polymer Concrete Ordering Information

Flat Pad Ordering Information

HDPE Products

General Specification Information for HDPE Boxes

Specifications

- Enclosures shall be injected molded polyofin plastic with ultra-violet additives ASTM-D-V1248
- Box shall have adequate soil surface to prevent setting in firm soil
- Product shall comply to ASTM-D-635 or UL-94 (flammability of plastic articles)
- Cover to have anti-skid surface

Ordering

- Specify: part number, color, quantity, lid type
- Cover marking and locking method, hex or penta bolt
- "Ship to" and "bill to" location

Products Available in:

- Green
- Gray
- Lavender
- Black
- Tan

Cover Markings Include:

- Irrigation control valves
- Water
- Sewer
- RCV
- Electric
- CATV
- Telephone
- Reclaimed Water
- Street Lighting
- Blank

Physical & Chemical Properties

Description	ASTM	Values
Polyethene	D-1248	—
Impact Strength (12lb. wt, "C" tup)	D-1244	38ft/lbs
Effect of acids and alkalies	D-543	Very resistant
Tensile Strength	D-638	4415 PSI
Deflection Temp. @ 66 PSI	D-648	159°F
Flexural Modulus	D-790	191,000 PSI
Flammability (horizontal cm/min)	D-635	1.59 cm/min
Resistance to ultra-violet light	G-26-92	7-9 yrs**
Xenon-arc >35 w/m ² /NM Band @ 340 NM		

Plastic boxes should not be installed in concrete or asphalt without adequate rubber or felt expansion barriers. Special product load data available on request.

**Surface discoloration varies with area condition AATCC test method 16E 1976.

PRODUCT FEATURES

- Box and cover shipped fully assembled.
- Twist lock cover.
- High top-load strength.
- Lightweight, simplified storage and handling.
- U.V. stable for longer field life.
- Primary usage drip irrigation.

Special color & cover markings available.

1.00" metal locator available in cover on special orders.

6" STD. • 16 per sleeve • 256 per pallet

Series 608 - 6" Round Econo Series 610 - 6" Round

PRODUCT FEATURES

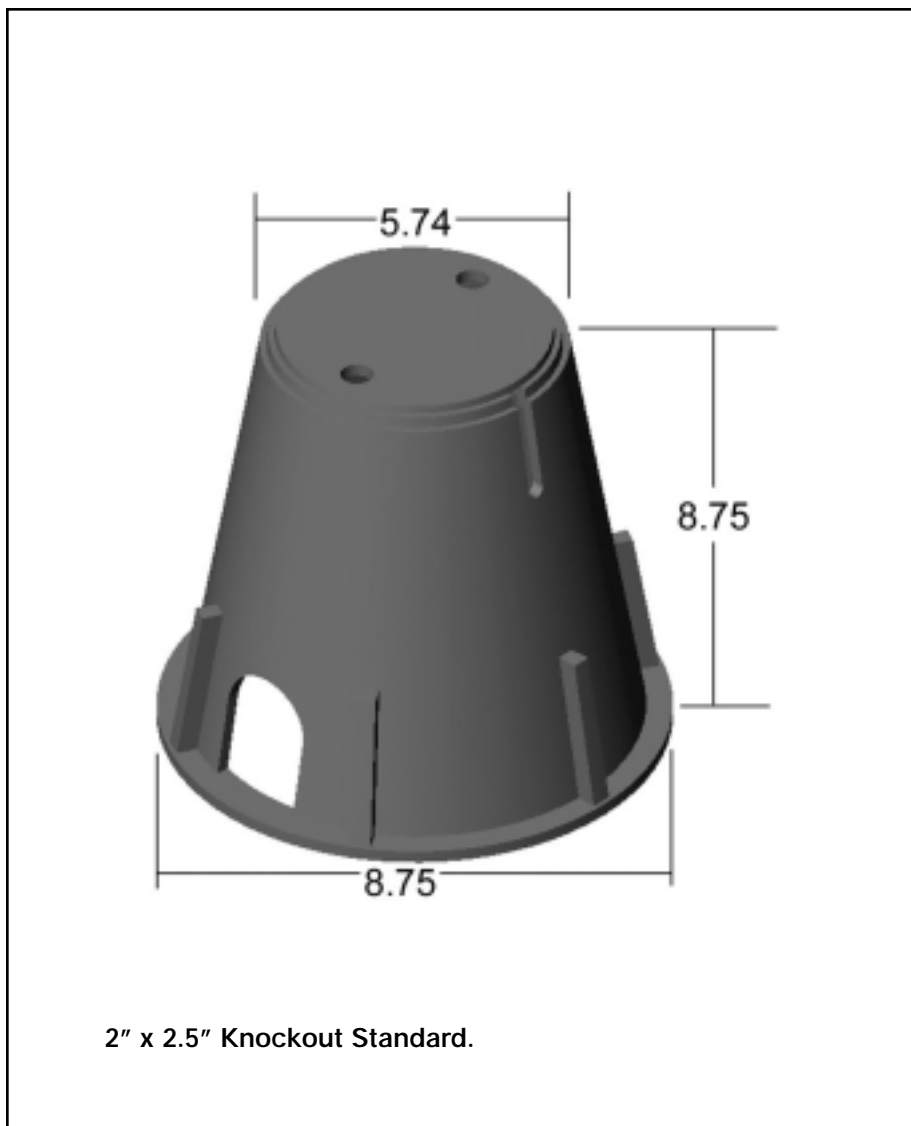

- Twist lock cover.
- Greater working area.
- High top-load strength.
- Lightweight, simplified storage and handling.
- U.V. stable for longer field life.

Special color & cover markings available.

STOCK COVER IDENTIFICATIONS

- Irrigation control valve (ICV)
- Water (solid or meter door)
- Electric (green or gray)
- Reclaimed water (green or lavender)
- Blank (no cover marking)
- Sewer
- CATV
- Telephone
- Street lighting

When ordering, please specify color and cover identification. For use in non-vehicle traffic areas. Not recommended for installation in concrete or asphalt without felt expansion joint.

Series 608 • 6" STD. • 16 per sleeve • 256 per pallet

Catalog Number	Description	Color	Weight
608-1B2G	Body & Solid Cover	Black Body with Green Cover	1.25 Lbs.
608-1B	Body Only	Black	1.00 Lbs.
608-2G	Cover Only	Green	.25 Lbs.

Series 610 • 6" STD. • 16 per sleeve • 256 per pallet

Catalog Number	Description	Color	Weight
610-1G2G	Body & Solid Cover	Black Body with Green Cover	1.55 Lbs.
610-1B	Body Only	Black	1.30 Lbs.
610-2G	Cover Only	Green	.25 Lbs.

PRODUCT FEATURES

- Lightweight.
 - Security lock.
 - Stronger load strength.
 - U.V. stable for longer field life.
 - Available in three standard colors: green, gray, black.
 - Stainless steel hardware hex head or penta head bolt.
 - Box and lid shipped fully assembled.
- Special color & cover markings available.

STOCK COVER IDENTIFICATIONS

- Irrigation control valve (ICV)
- Water (solid or meter door)
- Electric (green or gray)
- Reclaimed water (green or lavender)
- Blank (no cover marking)
- Sewer
- CATV
- Electric
- Street lighting

When ordering, please specify color, cover identification, and bolt down type. For use in non-vehicle traffic areas. Not recommended for installation in concrete or asphalt without felt expansion joint.

Series 1015 - 6" High Box

PRODUCT FEATURES

- For use with shallow pipe installation.
- Lightweight.
- U.V. stable.
- Nestable for storage or shipping.
- High top-load strength.
- Stainless steel hardware hex head or penta head bolt.
- Available in four standard colors: green, gray, black, or lavender.

STOCK COVER IDENTIFICATIONS

- Irrigation control valve (ICV)
- Water (solid or meter door)
- Electric (green or gray)
- Reclaimed water (green or lavender)
- Blank (no cover marking)
- Sewer
- CATV
- Telephone
- Street lighting

When ordering, please specify color, cover identification, and bolt down type. For use in non-vehicle traffic areas. Not recommended for installation in concrete or asphalt without felt expansion joint.

6" RECTANGULAR • 60 per pallet

Catalog Number	Description	Color	Weight
1015-6G2G	6" Body & Solid Cover	Green Body with Green Cover	6.0 Lbs.
1015-6G	6" Body Only	Green	4.0 Lbs.
1015-2G	Solid Cover Only	Green	2.0 Lbs.
1015T-2G	Solid T Cover	Green	2.25 Lbs.

PRODUCT FEATURES

- Stainless steel hardware hex head or penta head bolt.
- High top-load strength; lightweight.
- Reduced side angle for easier readjust to grade.
- Single or double pipe ports available.
- U.V. stable for longer field life.
- Nestable for storage or shipping.
- Available in four standard colors: green, gray, black, or lavender.
- Box and lid ship fully assembled.

STOCK COVER IDENTIFICATIONS

- Irrigation control valve (ICV)
- Water (solid or meter door)
- Electric (green or gray)
- Reclaimed water (green or lavender)
- Blank (no cover marking)
- Sewer
