one company ➤ a world of innovation

Whether you require one product or a total end-to-end solution, Molex Premise Networks is committed to assisting you in making the right choice for your business requirements.

Our team of technical experts will provide you with a true and honest assessment of your business requirements and design a customized system to support your business today, while providing the necessary performance to future-proof your requirements for tomorrow.

By choosing Molex you can be safe in the knowledge that whatever the project, our goal is to ensure that your upgrade to a new system runs smoothly. We work closely with our Business Partners to maintain the highest standards, regardless of the complexity of the project.

This commitment to our customers is reflected in our 25 year System Performance and Application Assurance Warranty and the ongoing support we provide to our business partners.

Whether you require one product or a total end-to-end solution, we are poised to deliver what you need, when you need it.

MOLEX IS COMMITTED TO PRESERVING THE GLOBAL ENVIRONMENT

e c o c a r e

We understand that preservation of the global environment is an important issue for everyone, and that our business operations have an effect on the global environment. As a responsible corporate citizen, we are committed to using environmentally conscious practices during the design and manufacture of our products. These environmental practices are designed to ensure that Molex is developing sustainability through environmental preservation activities.

- Establish and implement effective Environmental Management Systems
- Comply with all relevant environmental, health and safety, legal and other requirements
- Operate our facilities in a way that considers the efficient use of natural resources and provides a safe and healthy workplace
- Develop products that minimize environmental impact
- Continually improve our environmental, health and safety performance and operations
- Advise Molex employees and business partners of the importance of adhering to this Policy
- Reduce or eliminate emissions and discharges through pollution prevention activities: Prevent injury and illness through management practices
- Educate employees to work in an environmentally responsible and safe manner

Our worldwide manufacturing sites are certified to the ISO 14001 environmental management system standard, which requires that a broad range of environmental processes and policies be in place to minimize environmental impact and maintain compliance with environmental regulations.

Bringing Advanced Physical Layer Lifecycle Management to Enterprises Worldwide

Molex Premise Networks (MPN) commits to delivering comprehensive Advanced Physical Layer Lifecycle Management (APLLM) solutions providing enterprises with the ability to manage their Physical Layer infrastructure with a level of visibility and integration unique within the structured cabling industry. Using a combination of software, electronics, traditional data transport solutions and Infrastructure Deployment Services, APPLM allows businesses to track and manage their infrastructure investment starting from planning through to design, procurement, installation, daily management of moves, adds and changes (MAC) and the eventual upgrade of that infrastructure including attached assets.

The Technology Behind APLLM

The MPN portfolio is comprised of our innovative MIIM solutions alongside a full complement of UTP, FTP copper and fiber Data Transport Systems (DTS) - which integrate seamlessly to add exciting new dimensions to network management.

MIIM™ Solution

MIIM is a comprehensive solution focused on enhancing network management at the physical layer, network security, asset management and increased productivity and visibility.

In addition to MAC & work order management, the solution detects network device connect/disconnects regardless of power or broken cables and MIIM's Device Discovery Toolkit, including Global, Directed and Event-Driven Discovery populate the MAC and IP addresses of discovered devices to the MIIM database, enabling continuous monitoring & mapping the physical layer. Compelling MIIM differentiators include true centralized management of the channel beyond the wire closet out to remote work areas regardless of LAN topology, guided patching impervious to human error and collection/reporting/alarming of real time Layer 1 data, registering minimal impact on network resources.

Data Transport Solutions

A broad selection of standards-compliant, end-to-end structured cabling solutions including copper, fiber and free space optics that connect businesses to their mission critical applications.

IP Infrastructure Deployment Services

As demonstrated IP infrastructure experts, MPN leverages our know-how in LAN cabling to provide a suite of solution-based services which deliver value to Project Owners and Business Partners. Guided by our experience and knowledge of customer challenges and industry trends, MPN offers deployment services based on our Project Control Methodology (PCM) where real-time evidence is mapped to real-time activity by real-time on-site workers. This new capability drives unprecedented visibility and control of IP infrastructure deployments from planning and design, through to bid management, project implementation and even ongoing maintenance. In addition to PCM-based services, MPN also provides MIIM APLM implementation services.

Whatever your requirement, we have a solution that supports it.

Advanced Physical Layer Management

MIIM™

PowerCat
Patch cords
Page B-4

PID-00266

The MIIM™ solution provides the most comprehensive Advanced Physical Layer Management. Simple to implement and manage, the solution uses industry standard components and the incremental cost to the user is significantly reduced. Providing event-driven polling of attached devices, even if the device is

off, MIIM continuously monitors & maps the physical layer. It facilitates work order management, including scheduling and recording of moves, adds and changes (MACs), and enables patch guidance for technicians, with LEDs on the patch panels to indicate ports with pending work orders

MIIM Scanner

MIIM scanners monitor activity on a MIIM enabled system. Each 1U scanner can be connected to up to 48 patch panels, providing monitoring of up to 1152 separate physical channels. Standard RJ45 patch cords are used to connect scanners and patch panels.

MIIM scanners can be configured and activated independently of the software. When the MIIM application software is connected to the scanner, it "discovers" active hardware and devices on the network and uploads this information onto the MIIM application software. Scanners monitor the connection state of MIIM channels and pass state change data to the MIIM application software. This triggers MIIM's Event-Driven Discovery function which queries the associated switch and updates the software.

- Event-Driven Discovery enables continuous updating of MIIM with minimal impact to the network
- Simple scanner configuration
- Auto discovery of active hardware/devices & automatic database population
- Mission critical port disconnection alerts
- Low power consumption with no fans or cooling required
- Automatic Rediscovery/Re-synchronization after outage or system failure
- Transaction queues record events for later delivery if the scanner is disconnected from the MIIM application
- Data bus connection between the scanner and patch panel is via an industry standard RJ45 patch cord

Order No.	SAP No.	Description
IMS-00100	183240000	MIIM 576 Channel Scanner

Dimensions: 44mm H x 483mm W x 216mm D (1.75" H x 19.0" W x 8.5" D)
Shipping Weight: 4kg (8.8lbs.)

MIIM G2 Patch Panels

MIIM G2 Patch Panels are used within the MIIM System. Each 1U 24 Port Patch Panel has one data bus connection port located on the rear of the panel.

The data bus connection port connects the panel to the MIIM scanner via a standard RJ45 patch cord. The patch panel is used by the MIIM system to track connectivity in the patch zone and work area. LED status indicators on the panel show status of connectivity between the panel and the scanner and also provide panel guidance for work orders. Each panel contains 24 MIIM jacks which can be removed from the panel to be terminated individually with standard punch down tools. MIIM panels function as a standard patch panel when not connected to the MIIM system.

- 24 Ports 1U
- EIA 568A/B wired
- Standard 19" rack mount
- Two power status indicators to ensure proper connection of power supply from the scanner
- Data bus connection to the MIIM Scanner is via an industry standard RJ45 patch cord
- Integral cable management shelf ensures bend radius compliance
- International hardware kit contains both ANSI and metric hardware
- Can be terminated using industry standard punch-down tools
- RoHS Compliant

Order No.	SAP No.	Description
PID-00266	183210020	MIIM G2 Category 6A, 1U, 24 Port Patch Panel 568 A/B
PID-00268	183200013	MIIM G2 Category 6, 1U, 24 Port Patch Panel 568 A/B

Dimensions: 44mm H x 483mm W x 92mm D (1.75" H x 19.0" W x 4.25" D)
Shipping Weight: PID-00221 - 560g (1 lb. 4 oz.), PID-00231 - 840g (2 lb.)

MIIM Ready G2 Patch Panels

MIIM Ready G2 Category 6 Patch Panels are a cost effective solution to provide Category 6 or 6A connectivity while providing an upgrade path to full MIIM capability. The panel as delivered functions as a conventional patch panel and provides the capability to be upgraded to a fully functional MIIM panel with addition of the IMD-00001 MIIM electronics module. Each panel contains 24 MIIM jacks which can be removed from the panel to be terminated individually.

- MIIM Ready panels function as a conventional patch panel as delivered
- MIIM E-module connection with the MIIM scanner is via an industry standard RJ45 patch cord
- Field configurable for 568 A/B
- Integral cable management shelf ensures bend radius compliance
- International hardware kit contains both ANSI and metric hardware
- Can be terminated using industry standard punch-down tools

Order No.	SAP No.	Description
PID-00269	183200014	MIIM Ready G2 Category 6, 1U, 24 Port Patch Panel 568 A/B
PID-00270	183210022	MIIM Ready G2 Category 6A, 1U, 24 Port Patch Panel 568 A/B

Advanced Physical Layer Management

MIIM™

MIIM E2 Intelligent E-Module

The MIIM E2 Intelligent E-Module enables MIIM Ready G2 panels to sense adds, moves, and changes across all 24 ports on the panel. The E-module contains LED's to provide guidance for work orders on MIIM panels. Modules can be easily added to MIIM ready panels to activate full MIIM capabilities. The E-Module contains an RJ45 jack to connect it to the MIIM scanner via a standard patch cord. MIIM Panels with E-modules that are not connected to a MIIM scanner function the same as a standard patch panel.

- MIIM E-Modules provide intelligent management for MIIM G2 panels
- MIIM E-Modules are easily added and removed from any MIIM G2 panel
- LED's supply guidance for work orders and panel status
- MIIM E-modules are powered by the scanner

RFR-00300

MIIM 24 Port Duplex LC Fiber Panel

MIIM Fiber Optic enclosures are used within the MIIM System. The adapter interface is 24 duplex LC adapters. Each 1U 24 Port enclosure has one data bus connection port located on the rear of the panel that connects the panel to a MIIM scanner via a standard RJ45 patch cord. Two built-in power status indicators on the panel ensure visibility of power from the scanner. When connected to a MIIM scanner, the panels detect connection activity on each duplex LC port. The patch panel works as a conventional patch panel when not connected to the MIIM system.

- Two power status indicators to ensure proper connection of power supply from the scanner
- Uses standard RJ45 patch cords for data bus connection to the MIIM scanner
- Panel options for Singlemode and Multimode
- Slide out cable management shelf
- Recessed mounting provides adequate space for routing patch cords, even in free standing enclosures with the front door closed
- ANSI and international metric hardware kit provided

Order No.	SAP No.	Description
RFR-00300	183230000	MIIM Singlemode 24P Duplex LC Fiber Patch Panel
RFR-00301	183230001	MIIM Multimode 24P Duplex LC Fiber Patch Panel

Dimensions: 44.2mm H x 484.6mm W x 336.6mm D (19.1" H x 1.74" W x 13.25" D)
Shipping Weight: 6.5 kg

MIIM Fiber Patch Cords

MIIM Fiber Optic Patch Cords are used to connect MIIM fiber panels within the MIIM System. MIIM patch cords incorporate a monitoring cable along with contact points on the patch cord connectors that activate the detection mechanism in the MIIM patch panel. When used with the rest of the MIIM system, the patch cords will provide connectivity information to the MIIM system.

- Monitoring contact interfaces with MIIM fiber patch panels
- MIIM patch cords are constructed from two fibers contained in an outer jacket
- Available in Singlemode (OS1) and multimode (OM1, OM2, OM3) constructions

IMT-00100

MIIM Outlet Terminator

The MIIM Outlet Terminator is used at the work area outlet to allow the MIIM system to monitor the connection of the horizontal cable to the work area outlet. The MIIM Outlet Terminator is effectively a stuffer cap with in-built components that work exclusively in the Molex MIIM solution. It enables the MIIM system to determine circuit integrity to the work area outlet. Communications between the MIIM Outlet Terminator and the MIIM Scanner are transparent to the data channel and operate outside the Ethernet bandwidth. The MIIM system can function independently of the MIIM outlet terminator. However, the terminator provides enhanced functionality in terms of monitoring spare or unused channels.

- Confirms circuit integrity between the MIIM patch panel and the work area outlet
- Enables monitoring of changes and detects the presence of devices at the outlet
- Transparent to the Data Channel
- RoHS Compliant

Order No.	SAP No.	Description
IMT-00100	183220000	MIIM Category 6 Outlet Terminator (pack of 24)
IMT-00101	183220001	MIIM Category 6A Outlet Terminator (pack of 24)

Note: Pack does not include DataGate jacks

MIIM Application Software

MIIM Application Software is a client server based Software program and is the central data manager for the MIIM System. It manages OSI Layer 1 assets and provides instantaneous information to the IT Manager regarding connectivity on MIIM enabled channels. The software documents planned and unplanned changes to the network. It allows continuous monitoring of the complete physical channel from work area outlet to the active network device. It automatically monitors all connections/disconnections, updates all MACs to the database, identifies and confirms port availability and notifies the IT Manager of all unscheduled or unauthorized network changes. Event-Driven Discovery gathers device information attached to outlets and is triggered by updates to the scanner. The software allows global network access and cost effective network management.

- Hierarchical view of entire enterprise layer 1 infrastructure to the port/outlet
- Event monitoring of all connections/disconnections
- Event-Driven Discovery keeps data current and minimizes network bandwidth usage
- Monitors connectivity and devices, even if the device is turned off
- Enables guided patching
- Search feature to easily locate assets and information
- Event logs for audit trails
- Layer 1 assets linked to building maps
- Open systems architecture can link with other network management applications
- Suite of management reports available
- Unrestricted number of users per license

Advanced Physical Layer Management MIIM™ICS

Part of the MIIM™ solution, MIIM ICS enables the deployment of an intelligent solution to an existing network immediately without impacting on restricted budget or crucial resources. Businesses can easily integrate intelligent capabilities with this simple to use solution. MIIM ICS can transform any businesses in any

sector, offering all the benefits of an intelligent advanced physical layer managed network without the hassle.

MIIM ICS 1 Gigabit 24 Port Patch Panel

MIIM ICS G2 1 Gigabit Patch Panels are used within the MIIM System. Each 1U 24 Port Patch Panel includes an E-module with one data bus connection port located on the E-module. The data bus connection port connects the panel to the MIIM scanner via a standard RJ45 patch cord.

MIIM ICS panels are installed in front of existing panels. Each MIIM ICS jack has a pigtail that connects the MIIM ICS port to the corresponding panel on the panel in the rack. Threaded standoffs are included with the panel to mount the MIIM ICS panel in front of the patch panel in the rack.

- Power Status LED's indicate connection and communication with the MIIM Scanner
- Port Status LED's provide guidance to complete work orders
- MIIM E-module connection with the MIIM scanner is via an industry standard RJ45 patch cord
- Jacks are field configurable for 568 A/B
- Mounting standoffs available for ANSI and metric hardware
- MIIM ICS panels attach directly to existing patch panels

PowerCat™ 6A Shielded

B

KSJ-00062-04

4 Pair
Termination Tool
Page K-2

Designed to support 10 Gigabit Ethernet (10GBase -T), Category 6A is an optimum structured cabling solution offering superior performance where speed, reliability and long term tenancy is required. It is the system of choice for Data Centers, financial institutions and enterprises requiring maximum

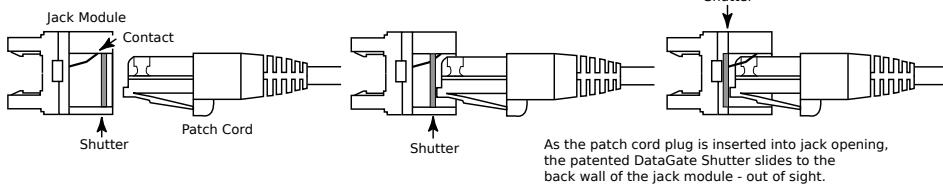

performance levels for their businesses. The solution is designed specifically for high speed data transmissions demanding little room for error, while offering exceptional alien crosstalk suppression, excellent transmission performance and protection against Electromagnetic Interference (EMI). (RoHS Compliant)

PowerCat 6A DataGate™ Shielded Jack

The DataGate Jack is the cornerstone of the Molex Premise Networks PowerCat 6A System performance. The product offers superior alien crosstalk suppression and excellent electromagnetic interference (EMI) protection by utilizing a robust die-cast zinc alloy connector body housing.

This shielded jack features a unique spring-loaded shutter that not only protects it from dust and contaminants, but the ingenious spring-loaded design also ejects improperly seated patch cords. The product is dual color coded for either 568A or 568B wiring schedules and is backwards compatible with Shielded C6 and C5e systems. Also available in side entry variation, ideal for use in work area outlet applications with limited back box space.

PowerCat 6A Shielded Patch Panels

PowerCat 6A Patch Panels features the unique DataGate shielded connector. This shielded connector offers superior alien crosstalk suppression and excellent electromagnetic interference (EMI) protection by utilizing robust die-cast zinc alloy connector body housing.

Patch Panels are made from robust sheet metal and are supplied with removable rear cable management trays for cable strain relief and neat cable dressing, front and rear port numbering and individual ports may be color coded using connector icon labels for site specific network administration.

- 24 Ports 1U & 48 Port 2U
- EIA 568A/B wired
- Standard 19" rack mount
- IDC contacts that flex not fatigue when terminated
- Pointed IDC towers to speed termination and enhance cable retention
- Integral cable management shelf ensure bend radius compliance
- Grounding screws included

Copper Solutions

PowerCat™ 6A Shielded

The PowerCat 6A system is independently tested and verified by Intertek ETL for Category 6A compliance to TIA/EIA-568 C.2 and ISO/IEC 11801:2002/Amend 1:2008

PowerCat 6A Shielded Patch Cords

Molex PowerCat 6A Shielded Patch Cords are key components of the PowerCat 6A shielded end-to-end solution. Designed to support high speed 10GBASE-T networks, they are also backward compatible with 10/100/1000BASE-T networks. The patch cable is made from high quality four pair 26 AWG stranded copper wire. Available in a range of colors and lengths, PowerCat 6A patch cords are pre-terminated with RJ45 plugs and feature anti-snag slim strain relief slip on boots.

- 4 pair 26AWG shielded stranded copper cable
- Pre-terminated with RJ45 plugs
- Slim clear anti-snag slip on boots
- Suitable for EIA 568A/B wiring applications
- PVC jacket
- 10G Performance when installed as a complete PowerCat 6A Shielded System
- RoHS Compliant

PowerCat 6A Shielded Cable

- Supports high speed data network applications such as 10-Gigabit Ethernet (10GBASE-T)
- Enhanced performance overall single foil shielded twisted pair cable construction
- Minimizes alien crosstalk, provides excellent signal isolation and provides superior electromagnetic interference (EMI) protection.
- 1000 ft. to 0 ft. markers

- ETL verified to TIA-568-C.2 Cat 6A component compliance
- Resistant to alien crosstalk
- Color coded for ease of termination
- Enhanced performance overall single foil shielded twisted pair cable construction
- Available in UL Listed CMR and CMP constructions
- RoHS Compliant

PowerCat 6 Angled Patch Panels

Angled Patch Panels are ideal for installations of high density or which utilise extensive side and end-of-the-rack cable management. The angled feature provides enhanced port access and minimizes patch cord bend radius to the rack. Each port features a patented spring-loaded shutter and can be color coded using an icon for site specific network administration. The panel provides both front and rear port number identification.

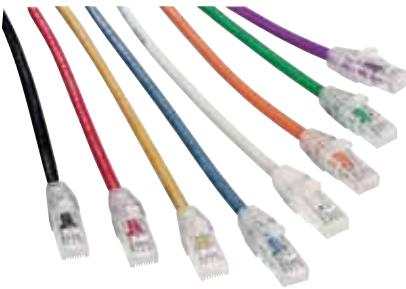

- Shuttered DataGate RJ45
- 24 Ports 1U & 48 Port 2U
- Category 6 performance
- EIA 568A/B wired
- Standard 19" rack mount
- Individually removable patch panel ports
- Integral cable rear management

PowerCat™ 6 UTP

PowerCat 6 U/UTP Patch Cords

Molex PowerCat 6 U/UTP Patch Cords are key components of PowerCat 6 U/UTP End-to-End Solution. The PowerCat 6 Patch Cords are designed to support data networks for 10/100BASE-T and 1000BASE-T applications. The patch cable is made from high quality four pair 24 AWG stranded copper wire. Available in a range of colors and lengths, PowerCat 6 Patch Cords are pre-terminated with RJ45 plugs and feature anti-snag slim strain relief slip on boots.

- 4 pair 24 AWG stranded wire
- Pre-terminated with WE8W plugs
- Slim clear anti-snag slip on boots
- Suitable for EIA 568A or 568B wiring applications
- PVC sheath
- RoHS Compliant

Copper Solutions

PowerCat™ 5e UTP

Molex's Category 5e product range is known as the PowerCat system and is designed to meet or exceed the requirements of current international standards.

The product range offers backwards compatibility with Category 5 systems, with enhanced performance.

B

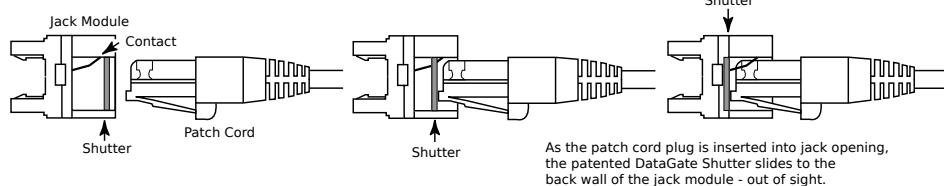

PowerCat 5e UTP DataGate™ Jack

The DataGate Jack is the cornerstone of the Molex Premise Networks PowerCat 5e System performance.

This jack features a unique spring-loaded shutter that not only protects it from dust and contaminants, but the ingenious spring-loaded design also ejects improperly seated patch cords. The product is dual color coded for either 568A or 568B wiring schedules.

- Dual Color coding allows 568A/B wiring
- Patented IDC V-Shaped contacts that flex not fatigue when terminated
- Patented spring-loaded shutter
- RJ-11 compatible
- Accepts color coded port identification labels
- Molex 4 Pair Termination Tool or industry standard 110 termination tool compatible

PowerCat 5e DataGate Patch Panel

PowerCat 5e Patch Panels are the premier Molex Premise Networks patch panel product line, and are a key product used in Both Category 5e link and channel gigabit ethernet applications. PowerCat Category 5e DataGate Panels feature the shuttered DataGate connector, with its patented spring-loaded shutter and can be color coded to match jack outlets. Offering both front and rear labeling options, the patch panel is constructed of cold-rolled steel for additional strength and durability. These panels come with integral rear cable management trays and are available in 24 and 48 port versions.

- 19" Shuttered DataGate Category 5e Panel
- Each port features the patented spring-loaded shutter:
 - prevents incomplete mating
 - protects from dust and contaminants
- Patented IDC V-shaped contacts that flex, not fatigue, when terminated
- EIA 568A/B color coded
- Integral cable management tray
- Graphite gray finish

PDS Solutions Category 6

The Category 6 Premise Distribution System (PDS) incorporates a unique pair separation design on the 4 Pair connector. This unique design feature enables 96 pairs to a base, making it one of the highest density Category 6 pair management blocks on the market.

The Molex Category 6 PDS system is independently tested and verified by ETL Semko to ensure compliance to channel and component performance criteria according to international standards.

Category 6 4 Pair IDC Connectors

The 4 Pair IDC block is a high-performance connector capable of providing high-speed data transmission. The design utilizes split-pair technology to provide Category 6 performance.

- High performance IDC
- Independently tested
- Gas tight termination

PDS Solutions

Category 6

Category 6 PDS Patch Cords

Category 6 PDS Patch Cords are available as 4 Pair to 4 Pair assemblies or 4 Pair to RJ45 variants. The Category 6 PDS Patch Cord is polarized to prevent accidental reversal of the cord. A molded-in arrow on the top of the connector provides a visual indication of the correct orientation. Integral strain relief holds the cable in place during lacing and provides proper cable retention for the terminated Category 6 PDS connector.

- 4 Pair - 4 Pair & 4 Pair - RJ45 variations available
- Circuits can be easily changed by untrained personnel without using a punch down tool
- Available in 1, 2, 3 and 5m lengths

Fiber Optic Solution

Lightband™

Cable

Molex manufactures some of the most comprehensive fiber systems in the structured cabling market. Molex offers total fiber solutions, ideal for either Backbone or To-The-Desk applications.

Building Distribution Cable

- Easy strip buffers enable fast, consistent stripping for termination
- Flexible, small diameter cable with high tensile strength for cable routing and installation
- Listed OFNR/FT4, OFNP/FT6 and also available in low smoke zero halogen
- RoHS compliant

NON-PLENUM-OFNR

Cable

Armored Building Distribution Cable

Molex Lightband Fiber Optic armored building distribution cable utilizes 900 μm buffered fibers surrounded by aramid yarn strength members with a flame-retardant outer jacket incorporated in a jacketed interlocked armor encasing. These cables are ideal for interbuilding backbone, data center and horizontal installations. Molex armored building distribution cable is available in 50 μm , 62.5 μm Multimode and Singlemode fibers.

- Flexible jacketed armor maintains fiber bend radius during installation
- Armored design provides robust mechanical protection including over ten times the crush resistance of standard buffered fiber cable
- Small OD, single-pull cost effective alternative to innerduct and/or conduit permitting significant installation and material cost savings
- Listed OFNR/FT4 , OFNP/FT6
- Available with Laser Optimized 10 Gigabit Ethernet fiber

Fiber Optic Solution

Lightband™

Cable

Indoor/Outdoor Loose Tube Cable

Molex Lightband Fiber Optic Loose Tube Indoor/Outdoor cables utilizes dry water blocking technology utilizing super absorbent polymers rather than traditional petroleum based gels both inside the fiber tubes and the core of the cable. Molex offers designs for both plenum (OFNP) flame rated and non-plenum (riser/OFNR) flame rated applications while meeting the demanding requirements for outside plant installations. The versatile design allows users to install a single cable for both their indoor and outdoor environments without mechanical or optical compromise. Molex Loose Tube Indoor/Outdoor cables are available in 50 μ m, 62.5 μ m Multimode and Singlemode fibers.

- All Dielectric cable construction requires no grounding or bonding
- Totally dry water blocked cable requires no cleaning of gels while fully meeting water blocking requirements of gel filled cables
- No transition required from outside plant cable to tight buffered flame rated indoor cable
- No transition means material cost savings, labor savings and optical loss budget savings
- RoHS compliant

Fiber Optic Solution

Lightband™

Cable

Armor Loose Tube Fiber Optic Cable

Molex Lightband Armor Loose Tube consist of indoor/outdoor rated fiber optic loose tube cables encased with aluminum or steel spirally wrapped armor in an interlocking configuration. The armored cable is then covered with a plenum rated jacket to prevent snags during installation.

- Eliminates the need for conduit or plenum innerduct
- Significant cost savings in both materials and labor - up to 25%
- Accommodates last minute relocations or pathway changes
- Provides a higher concentration of cables in an area than conduit
- Armor provides crush protection and protection from rodent attacks

Light Armored Loose Tube Outside Plant Fiber Optic Cable

All dry single jacket, single armor cable combines durability and ease of handling for a rugged, easy-to-install outside plant cabling solution.

- Dry water-blocking technology for a more craft-friendly, jelly-free cable core and buffer tubes
- Variety of fiber types available & PE coated electrolytically chrome- sheathed steel (ECCS) armor
- Medium-density polyethylene (MDPE) outer jacket, HDPE jacket available on request
- Minimum Bend Radius 15x cable outer diameter during installation; 10x cable outer diameter post installation
- Operating Temperature Range -40°F to 158°F (-40°C to 70°C)

Patch Cords

Molex's advanced manufacturing process provides exceptional performance in patch cord assemblies. Molex maintains strict control over the ferrule endface surface.

Fiber Optic Patch Cords

Molex offers a comprehensive range of Fiber Optic Patch Cords in both standard and custom construction. Refer to the Special Construction Matrix Model to configure custom patch cords.

- Available with popular SC, LC and ST connectors
- Flexible, small OD 2mm x 4.1mm mini cordage
- Insertion Loss - Singlemode: 0.40 dB per connector Multimode: <0.30 dB per connector
- All assemblies are 100% factory tested
- Test results included with all patch cords
- RoHS compliant

Specification Grade Fiber Enclosures

Specification Grade Fiber Optic Enclosures are a configurable rack mount unit for storing and terminating incoming fiber cable. Designed to accommodate both the needs of the installer for the initial assembly and the end user for access, maintenance and fiber protection. Great care has gone into the design to protect fiber optic cables and patch cords from damage and to maintain stable optical integrity throughout the life and use of the enclosure.

- Standard 19" rack mount
- Lightweight, lockable, and removable aluminium hinged front and rear doors provide security
- Externally mounted cable strain relief bracket mounts to accommodate cable routing from above or below
- Labelling incorporated on hinged, drop-down metal front door
- 1U Fiber Enclosure - accommodates up to 4 6, 12 or 24 fiber plates, 4 ModLink™ Cassettes & 2 Splice Trays
- 2U Fiber Enclosure - accommodates up to 8 6, 12 or 24 fiber plates, 8 ModLink Cassettes & 8 Splice Trays
- 4U Fiber Enclosure - accommodates up to 24 6, 12 or 24 fiber plates, 24 ModLink Cassettes & 12 Splice Trays

Standard Grade Wall Mount Fiber Enclosure

The Standard Grade Wall Mount enclosures are configurable wall mount units for storing and terminating incoming fiber cables.

- Accommodates up to four (4) 6 or 12 fiber Adapter Plates
- Divided and individually opened input and output demarcation areas
- 2 cable management spools
- Top and bottom cable entry points
- Low profile and lockable
- RoHS compliant

1U Multi-Function Fiber Enclosure

The 1U Multi-Function Fiber Enclosure is a configurable rack mount unit for storing and terminating incoming fiber cable. The fiber enclosure has been designed to accommodate various termination types and adapter configurations. The floor of the enclosure is constructed to allow maximum flexibility in routing fibers. The enclosure incorporates a heavy duty ball bearing slide mechanism, allowing easy access to fibers. The interchangeable front plate facilitates upgrades as required. The enclosure has an optional front locking kit and an optional front cable management to securely route patch cords.

- Accommodates up to 4 ModLink Quick Connect Cassettes which allows 12-24 fiber connections per cassette with various interfacing adapters
- Accommodates up to 4 Modular Splice Cassettes which allows 6-24 fiber connections per cassette. The cassettes allow for splice termination while protecting individual fibers
- Compatible with preloaded adapter plates in various fiber counts and adapter configurations
- Self-Adhesive fiber management hub is stackable and can be segmented providing individualization of fiber routing
- Optional 24 fiber splice tray available to maximize port capacity while providing fiber management for excess fiber
- Optional front cable management allows for secure routing of patch cords and can be retrofitted
- Optional locking kits provide security
- Compatible with Molex's 6 Fiber Adapter plates that allow 6-24 fiber connections per plate, 72 Fiber MTP connections and 3 x DataGate Copper/Synergy connections per plate
- Rugged steel construction in graphite finish
- Compatible with Molex 3 x DataGate Jack UTP or C6A Adapter Plate for Multimedia applications

WM-12

The WM-12 is a wall mounted steel enclosure that provides up to 18 fiber ports in a minimum of space. The WM-12 has an integral configurable panel that accepts up to 6 USO II modules. Its design also guarantees that all of the media will be protected and proper fiber bend radius is maintained.

- Fully configurable using fiber or copper modules
- Up to 12 Ports
- Available with a fully lockable steel cover

Order No.	SAP No.	Description
WFR-00018	180090008	WM-12 Wall Mounted Steel Enclosure

601 Fiber Enclosure

The 601 Fiber series wall mount system interface products are compact units for fiber optics. Available in ST, Duplex SC and LC versions they provide either 6, 8 or 12 fiber ports. The 601 fiber enclosure has a low profile design and provides the proper internal fiber management to ensure the integrity of the optical network. There is also provision for a user supplied seal for added security.

- Compact unit - 184mm x 127mm x 38mm
- Up to 24 Ports
- Available in Singlemode and Multimode fiber versions
- Available in ST, Duplex SC & LC versions
- Accepts up to 8 fusion or mechanical splices
- Top, bottom and rear access

MMI-R

The MMI-R is a compact wall mounted unit for storing and protecting optical fiber. The internal storage spool easily holds 1.5 meters of up to 12 fibers with 900 micron buffers. Both units accept up to 6 USO II modules (ordered separately) and can be configured for multimedia using a combination of UTP, ST, and coax adapters, placing all outlets in one centrally located unit. Ideal for fiber-to-the-desk consolidation point for clustered furniture. The MMI-R has a graphite gray powder coated steel cover that overhangs and protects the lower module positions.

■ RoHS compliant

Xtreme Density System

The Xtreme Density System is a configurable rack mount unit for storing and terminating incoming fiber cable. The chassis is available in a 1U 5 Cassette Module and 2 U 12 Cassette Module Chassis – delivering from 124 to 288 fiber via 24 Fiber Plug N Play LC/MTP modules connected 24 Fiber MTP/MTP Optical Cables.

The system is ideal for Data Center, SAN, Enterprise/Campus and Telco central office applications.

- 24 fiber LC/MTP Plug & Play Cassettes – provides 124 Fibers (1U) and 288 Fibers (2U)
- Future Proofing – Low Loss OM3, OM4 and OS2 cabling and cassettes offered as standard
- 24 Fiber MTP/MTP cable assemblies – reduced cable weight and footprint with lower impact on cable routing requirement and HVAC interference
- Rack Mount Chassis configurable with a combination of front door and rear cable management options.
- Optional Sliding Management and Storage Tray available
- Quick Release Tab on Cassettes – allows for tool-less and easy removal from chassis. Mounting tabs on side of cassette lock into the panel. Intermediate lock position locks forward the cassette of the chassis for patch cord installation
- Slide Out Port Labeling - standard with modules
- High Density LC Quad Adapter Footprint – No extraction tool need for patch cord installation. Revised footprint improves front space management and port access.
- Internal fiber management inside the cassettes – ensures effective cable management guaranteeing performance

Hybrid Pre-Terminated Cable Assemblies

Molex Pre-Terminated Fiber Optic Cable Assemblies offer premium factory-controlled optical performance on a variety of connectors that enable fast, economical installation.

Pre-Terminated Cable Assemblies are ideal for mission-critical backbone applications such as Data Center tie cables and low optical loss backbone riser cables.

- Available in: Low Loss OS1/2, OM3 and OM4
Standard Loss available in OS1/2, OM1, OM2, OM3 and OM4
- 12 and 24 cores standard (high core counts up to 144 fibers available)
- 2mm ruggedized tails and 900 μ m tails available
- Customised Tail Length and Configuration options available
- OFNP cable jacket
- ROHS Compliant
- Ideal for: Internal short optical links
Front panel/equipment connections
Data center infrastructure
Storage Area Network (SAN)

Part No. Matrix: Substitute the correct code number or letter to determine the assembly construction

Xtreme Density System

Xtreme Density Cables

- OFNP rated ribbon cables are factory terminated on both ends with multi-fiber MTP® connectors for maximum fiber density
- Round, flexible outer jacket is easy to bend, route and install
- Patented flexible transition sleeve maintains the routing feature of the round cable, absorbs vibration shock and provides an ideal surface to secure the MTP connector

- Xtreme Density fiber optic cables are 100% tested
- Pulling eyes installed to protect the assembly during installation
- 4.5mm o.d.
- Standard and Low Loss versions available
- Cables shipped with Polarity A
- Polarity B and C available upon request
- Industry-leading low insertion loss (0.35dB Maximum Insertion Loss for Laser Optimized OM3/4 Cables and OS1/2 Cables, 0.10dB Typical)

Part No. Matrix - Substitute the correct code number or letter to determine the assembly construction

For Example: To order a 12 Core MTP-MTP Cable Assembly, Polarity A, Female to Female, OM3 50/125µm - OFPN aqua, the part number would be 91-X2122-6L001

Optical Fiber Patch Cords Uniboot LC Low Loss

The Uniboot LC Low Loss Patch Cords are slim-line patch cords, ideal for high density/high speed applications. Using a uniboot patch cord provides a 50% space saving when compared to traditional optical patch cords. Ideal for Data Centre, SAN, Enterprise/Campus and Telco central office applications.

- Full Duplex in a single 3mm cable
- Available in Low Loss OM3, OM4 and OS1/2 Fiber Types
- Listed OFNP/FT6
- Reduces space required in cable ways and racks improving access and HVAC performance

Fiber Optic Solution Lightband™ Connectors

Molex offers a comprehensive range of adapters and connectors in both Multimode and Singlemode variants. Designed to the highest performance specifications, meeting international standards and providing low insertion loss, the connectors are available as

heat-cured, cold cured and field terminable variants. The adapters feature either snap or flange mount fixings and are designed with the latest polymer and ceramic materials.

Connectors - Oven Cure

LC Connectors

Order No.	SAP No.	Description	MM/SM	Ferrule	Boot	Color	Action
18262-0041	182620041	LC Oven Cure Connector	SM	Zirconia	900µm	Blue	Epoxy

Connectors - Xpress

The Molex Xpress Connectors provide quick, cost effective and reliable field terminations for fiber optic LAN's. These connectors do not require power or special tooling and can be terminated on site with the use of off-the-shelf adhesive.

- Typical insertion loss: 0.32dB
- Minimal tooling required
- Typical termination time: 2 minutes
- 25 connector kits per bulk pack

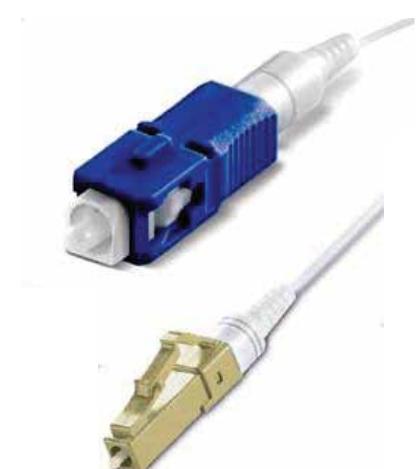

Order No.	SAP No.	Description
106079-1010	1060791010	Xpress Termination SC Kit MM with 900µm and 3mm boots (25 per pack) - Beige

106024-2800	1060242800	Xpress Termination LC Kit SM with 900µm boot (25 per pack) - Blue

Connectors - Pre-Polished, Pre-Assembled, Xpress G2

Molex's Xpress G2 (second generation) Pre-Polished, Pre-Assembled Connectors provide quick reliable terminations and are easy to use.

- Each kit includes 10 connectors with boots and 1 fiber holder and assembly jig
- Quick assembly
- Low tooling investment - only strip and cleaving tool required
- Reliable performance - same environmental endurance as conventional connectors
- Multiple formats available - SC and LC form factors
- Available in Singlemode, Multimode, Angled Polish in 900µm & 250µm format

12 Fiber Keyed LC Adapter Plates

Molex's Keyed LC Adapters used in conjunction with compatible connectors provides mechanical security and prevent cross connection while allowing for high density layouts without performance compromise.

Molex's Keyed LC Fiber Optic Adapter Plates are a modular platform compatible with various Molex Enclosures and Fiber Splicing Systems. The Molex Plates require no tools for installation.

- Available in 7 different Keyed LC Adapter types
- Available in Singlemode & Multimode versions
- Upgradeable - can be used with Molex's standard fiber optic splicing options or with our new Modular Splice Cassette
- 100% factory tested - guaranteed performance

Keyed LC Connectors - Secure Connectors

Molex Keyed LC Connectors used in connection with the Keyed LC Adapters, provide mechanical security and prevent inadvertent cross connection while allowing for high density layouts without performance compromise.

- Seven keyed color connector combinations
- Small form factor

Modular Splice Cassettes

Molex's Modular Splice Cassette is an excellent way of managing vulnerable fiber optics, protecting them from dust and damage as a result of routine maintenance. The modular design is upgradeable and reusable. The Cassette is available in a number of pre-loaded kits or in a unloaded configuration.

- Fully integrated into Molex's Specification Grade Enclosures
- Pre-loaded kits include color coded fiber pigtailed
- Maximizes density - maximum 24 fiber capacity
- Provides perfect bend radius for splices
- Integrated cable management - prevents damage

Universal Splice Trays & Fusion Splice Protectors

The Universal Splice Tray is a configurable enclosure for both mechanical and fusion splices. Loose tube cable is routed into and out of the tray through adjustable tube grips located at each corner. Grips eliminate the need for cable ties and can be tightened and loosened preventing over-compression of the loose tube cable.

- Accepts mechanical and fusion splices
- Adjustable grips on each corner
- Prevents over-compression of the loose tube cable
- Accommodates up to 12 splices
- Fusion Splice Protectors are available in 45mm and 61mm lengths

Fiber optic Breakout Kits

Fiber Optic Breakout Kits are for use on multi-fibers-per-tube loose tube cables to modify the cable for direct termination. Each kit breaks out 250µm fibers from a multi-fiber loose tube into individual 900µm buffer tubes. The fibers can then be terminated using the connector manufacturer's recommended termination procedures for 900µm tight buffered fibers. Each kit is individually packaged in a sealed plastic bag.

Pre-Terminated Solutions

ModLink™ Fiber

Plug & Play

E

ModLink is an ideal solution for mission critical applications such as Data Centers and Storage Area Networks, where fast installation is paramount and where moves adds and changes are frequent or managed in-house.

ModLink is also a viable tool for rapid deployment of an alternate data recovery system. In the event of damage or failure to a vital fiber backbone, the link can be quickly re-established without the need of technicians.

12 Port LC ModLink Cassettes

ModLink Cassettes provide a cost-effective, quick and easy fiber system, for backbone and to-the-desk applications. 12 Port LC ModLink Cassettes provide premium factory-controlled optical performance, enabling flexible system configuration and fast, economical installation. Simply plug the cable into the rear of the unit and the link is operational - an excellent solution for fast-track installations.

- Self-contained fiber optic patching enclosures convert the MTP/MPO interface to a standard LC, SC, MT-RJ or ST coupler
- Industry-leading low insertion loss for OS1/2, OM3 & and OM4 Cassettes
- Available in Singlemode & Multimode versions
- Front port identification plus labelling field on cassette top for fiber documentation
- For use within Molex's Fiber Management Systems

Pre-Terminated Solutions

ModLink™ Copper Plug & Play

CMP-00007

E

Factory terminated Plug & Play solutions offer enterprises a number of advantages over traditional cabling systems. Deployment is faster, performance is guaranteed, on site testing is eliminated. Plug and Play solutions are ideal for installations where quality and speed of implementation are paramount, and are ideal for

high density environments such as Data Centers, Storage Area Networks (SAN's) and Server rooms. The ModLink Copper Plug & Play solution when installed in a channel configuration has been certified by ETL Semko as compliant with IEE 802.3ab-1999 for Zero Bit Rate 1000 Base-T transmission.

Copper ModLink Panels

The 48 port ModLink Copper Panel consists of 4 12 port ModLink Copper cassettes loaded into a 1U Rack Mount Enclosure. The cassettes slide easily in and out of the panels, allowing speedy installation. Simple cassette design allows for fast upgrades or expansion of systems with minimum installation time. All cassettes are 100% factory tested, enabling flexible configuration and cost effective installation, while minimizing the need for on-site testing.

- Utilizes the patented Molex iPass™ connector, providing reliable 10/100/1000BASE-T performance
- Modular Cassettes convert the iPass interface to a standard RJ45 interface
- ModLink panels are modular in design and accept up to 4 ModLink cassettes
- Panels feature integral rear cable management
- Cassettes are configured with 12 ports (2 rows x 6 RJ45 ports)
- 100% factory tested

CMP-00009	183170008	12 Port Copper ModLink Cassette

Hydra Cable Assemblies

Hydra Cable assemblies are comprised of 6 RJ45 plugs to an iPass connector on the other end. They are specifically designed to connect Molex's range of ModLink copper cassettes from panel to panel or from the switch to the panel links.

- Hydra cable assemblies feature patented iPass high density, robust die-cast connectors on one end & 6 RJ45 plugs on the other end
- 100% factory tested
- Custom cable assembly lengths in increments from 1m - 90m, enabling flexible configuration and cost effective installation

Pre-Terminated Solutions

ModLink™ Copper

Plug & Play

Distribution Cables

Distribution Cables provide speeds up to 1000 BASE-T and are specifically designed to connect Molex's range of ModLink copper cassettes.

Utilizing Molex's patented iPass™ connector, Distribution Cables are used as the interconnection cable between cassettes and are made as iPass to iPass cable assemblies.

- Utilizes the patented Molex iPass™ connector
- The iPass connector supports 6 X RJ45 ports
- 100% factory tested
- CMR or CMP cable sheaths

Molex's Synergy Wallplate system is a family of wallplates providing a sleek, curved, and low profile appearance, for use in an industrial setting.

The wallplates are available in vertical orientation (114mm x 71mm) and square orientation (86mm x 86mm) making them ideal for use in most offices.

Synergy Wallplates

- Low profile for inconspicuous network connecting
- Clear concise labelling
- Rear loading to reduce tampering
- Angled version to ensure proper cable bend radius

- Standard color white
- RoHS compliant
- Accommodates DataGate™ jacks
- Accommodates SC, LC and ST single and dual bezel fiber modules
- Accommodates Media Configurable modules

USO II UNI-FIT Modular Furniture Outlets

The USO II Uni-Fit modular furniture outlet features adjustable latches that accommodate most standard and non-standard modular furniture openings - providing flexibility for hard-to-fit openings. Simply attach the base plate onto the furniture and adjust latches to the opening, slip on the cover, and snap in a USO II module. Each Uni-Fit accommodates up to four voice or data channels (2 modules).

- Low profile for inconspicuous network connecting
- Clear concise labelling
- Easily configured/reconfigured from the front
- Accommodates DataGate jacks
- Accommodates SC, LC, ST single and dual position fiber modules
- Accommodates Media Configurable modules
- RoHS compliant

MSY-00040

Molex offers a comprehensive range of fiber-to-the-desk modular systems to suit all applications and market requirements. Elegantly designed, these products offer a low profile and versatile modular construction, allowing the user to easily expand the network as it grows.

Supporting SC, LC, ST and MT-RJ fiber adapters, Molex's work area solutions are suitable for both Singlemode and Multimode installations and include Molex's unique "shuttered" technology protecting the user from harmful light emissions.

Single Synergy Fiber Modules

Designed for use within the Molex Synergy range of wallplates and surface blocks, SC jacks are available in five colors and provide singlemode and multimode performance.

- Synergy family
- Multimode & Singlemode configuration
- Designed to fit into Synergy, Streamline & USO™ II system of wallplates and surface blocks - See Page F-1
- Standard color white
- SC adapter available with or without shutter
- RoHS compliant

Double Synergy Fiber Modules

Double Synergy modules are versatile, industrially designed inserts for use across a broad range of Molex products, including wallplates, patch panels and modular furniture outlets. Double Synergy modules are front loading.

- Multimode & Singlemode configuration
- Designed to fit into Synergy wallplates and surface blocks
- Available in 2 colors
- RoHS compliant

USO II Modules

The USO II multimedia outlet system is a comprehensive group of modular products which can be easily configured and reconfigured without removing the faceplate bezel. For maximum versatility, USO™ II outlets have a three-part design: bezel, fascia and jacks. USO II bezels fit all standard US 1 and US 2 wall boxes. USO II modules make it easy to customize outlets for any UTP or fiber application. Modules can be purchased either pre-configured or can be built by purchasing either 1U 1 Port or 1U 2 Port fascia and inserting DataGate™ Jacks.

Compatible with:

- USO II family
- Uni-Fit Modular Furniture Outlets
- Modular Furniture Outlets, Boxes & MUTO
- USP Panels
- RoHS compliant

Media Configurable

Frequently, the need arises to integrate multiple media types within the one cabling system. It is becoming common for example for UTP, fiber optics, audio and video media to be used in the same environment.

To support these situations, Molex has designed a range of wiring closet and work area products, which accommodate UTP, fiber optics, audio and video media types using modular designs.

Audio & Video Modules

Audio and Video modules are versatile modules for unique applications where pre-terminated cables must be mated. Single Position Modules fit into Molex's configurable panels and wallplate systems that accept Molex's DataGate™ jack.

- Enables line extensions for legacy cabling systems
- Single Position Modules are designed to fit into Molex's Synergy & USO™ II system of wallplates and surface blocks

Multi User Telecommunications Outlet (MUTO)

The Multi User Telecommunications Outlet (MUTO) is the ideal solution for high-density fiber or copper requirements in the office environment. This sleek product holds up to twelve 25 x 50mm Euromod Modules or USO II fascias and is easily mounted near file servers, active devices, and workstations. The MUTO can also accommodate up to six 50 x 50mm Angled Fiber Modules.

- Aluminium main body
- Two metal end caps (angled)
- Two plastic end caps (flat)
- Four end cap screws
- Two plastic end plugs (for metal end caps)
- Two Snapz™ icon trees (alpha)
- Accommodates 25 x 50mm USO II fascias, enabling Category 5e or Category 6 performance
- Accommodates ST, SC, MT-RJ & LC Euromod 25 x 50mm and 50 x 50mm Angled Fiber Modules

Keystone Jack

Utilizing patented IDC V-shaped contacts that flex not fatigue when terminated, the RJ-45 Keystone Jack is compatible with any product that accepts the standard keystone profile.

- Dual Color coding allows 568A/B wiring
- Patented IDC V-Shaped contacts that flex not fatigue when terminated
- Features pointed IDC towers to speed termination and enhance cable retention
- RJ-11 & RJ-12 compatible
- Molded category identification on jack face
- Molex 4 Pair Termination Tool or industry standard 110 termination tool compatible

Industrial Solutions

84700-0001

Molex's Industrial Solutions are specifically designed for installations within harsh environments. Ideally suited for manufacturing facilities, water treatment plants, transportation hubs and food and beverage facilities, the industrial solution features a unique bayonet

latching system that ensures network performance is constantly maintained.

Industrial Copper Assemblies

Enabling side and rear entry termination, the Industrial Ethernet Connectors are housed within a rugged Polyester covering and feature a bayonet style latch receptacle for quick and easy connection and proper mating depth. The latching mechanism provides one sealing surface which protects the plug from dust, moisture, dirt, vibration, chemicals, electromagnetic interference and temperature extremes - reducing the likelihood of product failure.

- Category 5e
- One sealing surface
- Bayonet style latch receptacle
- Suitable for extreme environments
- Water and dust tight for functional integrity
- IP 67 and NEMA 6P ratings

Order No.	SAP No.	Description

106259-0200

Industrial LC Adapter

The LC Industrial Adapter is housed within a rugged Polyester covering. The adapter features a bayonet style latch receptacle for quick and easy connection and proper mating depth. The latching mechanism provides one sealing surface which protects the connector from dust, moisture, dirt, vibration, chemicals, electromagnetic interference and temperature extremes, reducing the likelihood of product failure.

- Available in Singlemode & Multimode versions
- 100% optically tested to ensure quality performance
- LC connector designed to Telcordia GR-326-CORE
- Suitable for indoor and outdoor applications
- One Sealing Surface
- Bayonet style latch receptacle
- IP 67 and NEMA 6P ratings
- Suitable for extreme environments
- Water and dust tight for functional integrity
- Potted/Sealed version available for extra durability

Cable Management Solutions

Cable Management is an important part of any installation. Combining aesthetics with functionality, the Molex range of rack mountable cable management products offer cable management with minimal effort, ensuring long term manageability of the wiring closet.

Vertical Rack Manager (VRM)

Used in conjunction with the Molex 45U, 19 inch Open Bay Rack, or equivalent, the VRM provides a robust and efficient way of managing cables and patch cords. Its ergonomic design ensures the necessary support for bundled patch cords, moving them from panels to the frame, maintaining bend radii at all times. Cable routing is flexible, and rapid re-routing can be achieved via the Quick Fit cable spools. Quick snap finger grooves enable flexible equipment management, and allow for expansion from 1U to whatever size required.

- Fits EIA standard 19" open bay racks
- Allows for upgrading current installations while maintaining current investment in hardware
- Maximizes building Infrastructure
- Excels in space utilization, by increasing density and freeing up valuable floor space
- Strong & flexible poly carbonate finger guides
- Robust but light-weight construction holds cables perfectly aligned against each individual patch panel maintaining critical bend radii
- Snap grooved finger guides allow easy modification to 2/3 U configuration. With replacement finger guides ensures ongoing flexibility for future fit-out requirements
- Cable retainers click on to the end of finger guides - ideal for holding cables horizontally in place while undertaking maintenance
- A quick lock door allows for fast easy access by allowing instantaneous left or right door opening with flush mounted handles
- Quick fit spool which allows easy single handed fit and removal of spools saving time and effort
- The design allows flexibility in fit out with additional spools and door kits available

31.0011

31.0012

DataGate™ 4 Pair Termination Tool

The Molex DataGate 4 Pair Termination Tool is a robust and reliable product that offers faultless gas-tight terminations of all four pairs simultaneously. The tool frame is manufactured from high grade steel with die-cast termination heads. Designed specifically for use with Molex DataGate™, MOD-Clip™ and Keystone style jacks, the 4 Pair Termination Tool Frame is supplied unloaded into which either the UTP Termination Head (for termination of the UTP DataGate and Keystone jacks) or the C6A Termination Head (for termination of the C6A shielded DataGate and MOD-Clip jacks) is fitted.

Operation is uncomplicated and efficient. The jack is placed over the four cables that have been securely seated in the Termination Head. The Termination Head and jack are then pivoted into the cutting position and the handles depressed, resulting in cables that are firmly and accurately seated and neatly trimmed in one simple operation.

- Designed specifically for the DataGate, MOD-Clip, Keystone and C6A Shielded Jacks
- Simple to operate
- Cables are terminated and neatly trimmed in one operation
- Tool Frame supplied unloaded. UTP and C6A Termination Heads supplied separately

SLT3S™ Single Line Tester

The SLT3 Tester is a rugged, lightweight product designed to verify the integrity of 1, 2, 3, and 4 pair UTP channels. Incorporating a unique 3-in-1 design, this tester features built-in modular jacks for USOC, EIA 568A and 568B wiring sequences.

Simply connect the master and slave unit to each end of the cable under test, and the SLT3 automatically verifies correct cable sequence, as well as open and short circuits.

- Innovative 3-in-1 design features modular jacks for testing USOC, EIA 568A and 568B cabling systems
- Accurately verifies the continuity and sequence of 1, 2, 3 and 4 pair UTP and Shielded channels
- Continuously-sequencing LED display provides a diagnostic read-out that immediately detects shorts, opens, reversals and mis-wires at a glance
- Available in UTP and Shielded versions
- RoHS compliant

Order No.	SAP No.	Description
33-100	180390001	SLT3 UTP Single Line Tester

Dimensions: Set Dimensions - 146mm H x 58mm W x 38mm D, Master or Remote - 109mm H x 58mm W x 38mm D
Shipping Weight: Set - 224g, Master - 140g, Remote - 84g

Multi-Pair Category 6 PDS IDC Connector Termination Tool

The multi-pair termination tool is designed to terminate the Molex Category 6 4 Pair IDC connector providing a gas tight, reliable, high impact termination.

The uniquely designed Molex Category 6 IDC connector can only be terminated with the specifically designed Molex multi-pair termination tool.

For terminating individual pairs, a standard 110 style termination tool can be used.

- For use solely with Molex Category 6 PDS 4 Pair IDC Connector
- Provides gas tight, reliable, high impact termination
- Tool head compatible with standard 110 handle

Order No.	SAP No.	Description
KPD-00087	181980070	Category 6 110 Style Multi-Pair Termination Tool with Head and Handle
KPD-00086	181980069	Category 6 110 Style Multi Pair Termination Tool Replacement Head

Dimensions: KPD-00087 - 165mm W (with blade), KPD-00086 - 38.1mm H x 31.75mm W x 22.35mm D
Shipping Weight: KPD-00087 - 168g, KPD-00086 - 48.4g
