# LED RIBBON/TAPE LIGHTING

Create the ambience your client desires

LEDR Series LED ribbon is a precision accent lighting system with flexible application abilities to enhance architectural design. The LEDs used are high output, engineered with a flex circuit board for effective heat control to ensure long LED Ribbon life.

LEDR ribbon offers user friendly connectors for simple installation eliminating the need for field soldering.

LEDR ribbon lasts an average of 50,000 hours compared to a typical incandescent that might only last 2,000 hours

and will therefore reduce maintenance costs. When high output LEDs are used, they can reduce energy consumption up to 90% when compared to incandescent linear lighting. Our LED Ribbon is available in a wide range of color temperatures so designers have various choices from residential friendly warm white to high tech, attention grabbing cool white. LEDR ribbon is also available in Green, Blue, Yellow and multiple color RGB.

LEDR ribbon is also engineered with different insulating materials for applications where a water resistant fixture needed.
