Compliance with confidence.®

USHIO

Thank-you for choosing RecyclePak®.

Why Recycle?

Since all fluorescent lamps contain trace amounts of mercury, recycling is essential at end of life to protect our environment. Federal, State and local regulations may require you to manage your spent lighting and electronic waste as hazardous waste or you may recycle under the less stringent Universal Waste Rule.

RecyclePak® is a safe, simple and cost-effective system for recycling small quantities of lighting and electronic waste.

One price includes everything you need, including the recycling container, return shipping, processing and documentation.
