12V INTEGRATED LED Kichler Technology

When we first entered the landscape lighting category more than 25 years ago, we had a simple goal: make things better.

Today, that history of innovation still drives everything we do. It's why Kichler® offers one of the largest landscape lighting portfolios on the market. This commitment to innovation means you never have to compromise on performance, design, quality or dependability. You can always trust you're getting the latest and best LED technologies available and backed by one of the finest warranties in the industry.

We invite you to explore all of the products we have to offer, including our high-performance integrated LED fixtures and our newest and most advanced technology: Variable Lumen Output (VLO). We think you'll agree, our integrated LED options assure you get the best in custom optics and light output, for the utmost in design versatility and flexibility.

Lighting Design Tips

The color of your light sets the tone.

Did you know that not all white light is created equal? Many of our integrated LED fixtures and LED retrofit lamps come in a variety of color temperatures – from warm white to pure white to cool white – that can enhance the colors in your home’s exterior and landscape. Known as Kelvin (K) temperature, consider these suggestions for placement:

WARM WHITE - 2700K

- Surroundings with warmer colors, like brown and cedar
- Natural colored walls or stonework
- Foliage that is red, orange or yellow (ex: highlighting oak trees)

PURE WHITE - 3000K

- Surroundings with dark materials, like deep slate, black or grey
- Foliage that is blue or purple (ex: highlighting blue spruce trees)

BRIGHT WHITE - 4000K-4200K

- Ultra contemporary homes and structures
- Commercial applications
- 120V-277V only

Beam spreads...focus light where it’s needed.

Kichler® integrated LED fixtures are available in a variety of beam spreads that allow your lighting professional to tailor the light to your specific application – creating the perfect end effect you desire.

Tall, thin beam of light ideal for grazing trees and column features.

Medium height and width beam of light suited for general accent lighting.

Short and wide beam of light useful for broad trees and wide structures.

Ideal for wall washing, grazing, and short yet wide, objects.

Our commitment to quality goes beyond product.

With professional landscape lighting projects, there's no room for do-overs. That's why we don't just think of ways to make our products better; we look for ways to make your entire Kichler® experience superior.

- Our exclusive **Advanced Product Solutions (APS) and Layout Team** is a free service that can answer your installation questions or assist with property designs and layouts.
- Every product we offer is competitively priced and backed by our domestic network of sales and service.
- Our inventory levels allow us to fill orders within 24 hours: when your installation crews need the product most.

Our Advanced Product Solutions and Layout Team employees average 14+ years with Kichler, giving them a level of pride and professionalism that you can count on at every turn. Our entire team is also Certified Low Voltage Lighting Technician (CLVLT) certified.

LAYOUT DESIGN SERVICES

Get to solutions faster & increase sales.

From answering questions to creating detailed layouts to delivering a full bill of materials – Kichler's Advanced Product Support Team is your link to getting the job done. This FREE service takes the guesswork out of any lighting need you have: determining the scope of materials required, installing a product correctly, even creating a full wiring and product layout.

Contact us at layouts@kichler.com and we'll get you started:

- 1 Email us a completed Design Request Form (available at [Kichler.com/APS](https://www.kichler.com/APS)) along with any drawings or pictures related to the project.
- 2 We'll create a bill of materials (BOM) and email it back to you that same day (for all requests received by 3:00 pm EST).
- 3 Once you confirm the BOM and pricing, we'll return a completed layout design **within 48 hours or less.**

Lighting Techniques

Wall-Wash Lighting

Directs the eye to the textures, shapes and/or height differences of items in beds, adding depth and ambiance.

Recommended fixtures: 12V LED Accent with VLO 16017 & 16020. Also 120V-277V C-Series 16210-16211, 16213-16214, 16218-16225.

Cross Lighting

Using two beams of light, it creates 360-degree visual interest on large trees, statues or other tall features.

Recommended fixtures: 12V LED Accent with VLO 16015-16016, 16018-16019. Also 120V-277V C-Series 16209-16210, 16212-16213, 16215-16216, 16218-16219.

Get the most out of a project with these professional landscape lighting techniques.

Accent Uplighting

Shines light upward to illuminate an object or surface for dramatic, attention-getting visuals.

Recommended fixtures: 12V LED Accent with VLO 16015-16020. Also 120V-277V C-Series 16209-16220.

Grazing

Adds depth and dimension to stucco, brick, stonework or architectural features of a home or building.

Recommended fixtures: 12V LED Accent with VLO 16017 & 16020. Also 120V-277V C-Series 16210-16211, 16213-16214, 16218-16225.

Lighting Techniques

Shadowing

A technique that projects the look of a tree or yard art onto a surface behind the object.

Recommended fixtures: 12V LED Accent with VLO 16015-16020. Also 120V-277V C-Series 16209-16220.

Silhouette Lighting

Draw attention to an interesting shape by lighting a vertical surface behind the object to accent that unique shape.

Recommended fixtures: 12V LED Accent with VLO 16015-16020. Also 120V-277V C-Series 16209-16220.

Mirror Lighting

Create dream-like water scenes by strategically lighting background areas around bodies of water that reflect the landscape off of the water.

Recommended fixtures: 12V LED Accent with VLO 16015-16020. Also 120V-277V C-Series 16209-16220.

Moon Lighting

Placing a lower lumen fixture high in a tree catches the details of branches and leaves, emulating the look of moonlight.

Recommended fixtures: 12V LED Accent with VLO 16016-16017, 16019-16020. Also 120V-277V C-Series 16210-16211, 16213-16214, 16218-16225.

Lighting Techniques

In-Ground Lighting

Deliver light to permanent and semi-permanent installations such as sidewalks, large mature trees, walls and flagpoles.

Recommended fixtures: 12V LED In-Ground 16030-16038.

Underwater & Water Accent Lighting

Enhance and highlight flowing water in waterfalls, streams and fountains. Create a magical mirroring effect on still waters.

Recommended fixture: 12V LED Water Accent 15711SS.

Flagpole Lighting

Two to three directional accent lights are often needed to properly illuminate the pole and the entire flag. Use the pole height and flag size to determine the right fixtures.

- The fixtures should be placed 180° apart if using two and 120° apart if using three.
- The fixtures should be located 6" to 3' from the flagpole in low-voltage (12V) residential applications. For large residential, commercial and line voltage applications (120V), fixtures should be from 12" to 3' from the base of the pole.
- Aim the fixture at the ball at the top of the flagpole.

Pole Height	Typical Flag Size	# of Fixtures	Lamp Wattage	Beam Spread	12V LED Option	120V LED Option
12' - 20'	3' x 5'	2	20W	NSP 10° to 15°	16015 (Level 2)	--
25'	4' x 6'	2	35W	NSP 10° to 15°	16015 (Level 3)	16209
30'	5' x 8'	2	35W	NSP 10° to 15°	16018 (Level 1)	16209
35'	6' x 10'	3	35W	NSP 10° to 15°	16018 (Level 1)	16209
35' +	10' +	3	50W	NSP 10° to 15°	16018 (Level 2 or 3)	16212

Xeriscape Lighting

Cacti, grasses and the stone used in xeriscape designs can benefit from a lower lumen illumination than traditional landscaping.

Recommended fixtures: 2700K fixtures, 12V LED Path 15811, 12V LED Accent with VLO 16015-16017.

Lighting Techniques

Path & Spread Lighting

Illuminate sidewalks, stone pathways and lawn walkways while adding a hint of intrigue to boulders and plant beds.

Recommended fixtures: 12V LED Path Fundamentals 16120, Lena 15820 or Dome 15810.

Hardscape Lighting

Highlight stone features, retaining walls, outdoor kitchens, steps, handrails, benches and more.

Recommended fixture: 12V 3 LED Fixture 15745.

Deck & Patio Lighting

Accentuate all of the beauty and details of decks, patios, outdoor kitchens, steps, handrails and more.

Recommended fixtures: 12V LED Half Moon 15764 (top) and 12V LED Brick Light 15773 (bottom).

Outdoor Living

Make outdoor living as comfortable, and flattering, as indoor living

Livable square footage doesn't have to stop inside a home's walls. A yard, patio and deck can provide ample space for entertaining and lounging; all it takes is the right Kichler® lighting pieces to add style, comfort and convenience.

12V Lighting

Kichler® low-voltage lighting solutions are designed to work together for a complete professional landscape lighting system. Our integrated LED systems feature options for a variety of lighting techniques, surfaces and needs – including in-ground, accent, hardscape and more – to create a total lighting solution for residential spaces.

12V Accent

Integrated LED

Accent trees, create silhouettes and illuminate dramatic features with our most versatile fixtures. Our newest options feature Variable Lumen Output (VLO) technology – allowing you to get three lumen choices, from one fixture, for incredible flexibility in the field.

12V INTEGRATED LED

Accent Lights with VLO

Kichler® is once again rewriting the rules for integrated LED flexibility and reliability with the new 12V LED Accent Light with Variable Lumen Output (VLO). VLO technology allows you to easily switch between three lumen outputs without mechanically adjusting the settings on the fixture — eliminating the increased failure risk or long-term reliability concerns associated with a mechanical adjustment.

Our Finest Integrated LED Technology

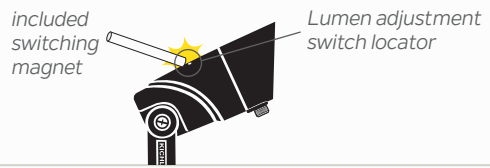

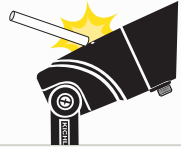

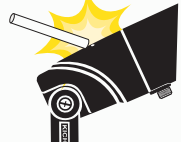

Backed by Kichler's industry-leading 15-year warranty.

VLO makes it easier than ever to design, install and service landscape lighting.

- Create more customized landscape designs while carrying less fixtures in your inventory.
- Quickly adjust the lighting design during the initial installation for the right amount of light output — or years down the road as the landscape application needs changed.
- Two discrete sized fixture platforms give all the lumen options you need without the bulk.

Incredibly easy to adjust.

Each fixture is conveniently factory-set at the most popular lumen level for maximum efficiency. To change, simply hold the included magnet over the lumen adjustment locator to begin the programming mode. The fixture will flash continuously four times and go dark before blinking to indicate which lumen level is currently programmed. Programming begins from the factory setting and adjusts up in lumens (Level 1 for Large Accent, Level 2 for Small Accent).

VLO Adjustment Settings		Small Accent	Large Accent
Level 1	1: Flashes once 	100 lm	*400 lm
Level 2	2: Flashes twice 	*200 lm	600 lm
Level 3	3: Flashes three times 	300 lm	835 lm

Versatile lighting that's at home in and out of water.

Enhance and highlight flowing water in waterfalls, streams and fountains. Create a magical mirroring effect on still waters, like ponds and water features. This integrated LED accent light features a rugged construction sealed against the elements for full submersion applications. The stainless steel housing with integrated cowl stands up to harsh environments. With a 60-degree beam spread and choice of color temperatures, you're sure to find everything you need for your application. The Out of Water Bracket accessory creates even more application possibilities beyond water features.

Power Supply for Landscape Lighting

Powerful and reliable options that can drive any professional landscape lighting system — from a simple lighting application to a sophisticated design.

Design Pro LED Controller

	Design Pro LED Controller - 100W	Design Pro LED Controller - 200W
Item Number	15DC100 - 100W	15DC200 - 200W
Zones	Up to 2 independently controlled zones	Up to 4 independently controlled zones
Weight	5.5 lbs.	8 lbs.

GENERAL SPECIFICATIONS – FOR ALL 3 CONTROLLERS

Description	All-in-one power supply and controller provides personalization, versatility and efficiencies to a professional LED installation.
Housing & Finish	UV stable and weather-proof polymeric material with textured gray finish. Non-corrosive high grade stainless steel components.
AC or DC & Output Voltage	15V constant DC
Input Voltage	108-132AC 50-60 Hz
Minimum Load & Fixture Loading	None. Use Watts (not VA) to load fixtures on controller.
Grounded Cord Type & Length	63" of usable #18-3 SJTW cord
Battery Back-up	Saves date and time only. All other settings saved to nonvolatile memory.
Terminal Lugs	Can fit up to 8, #16 GA per tap
Breaker Protection Type/Amps.	Electronically controlled 7 Amps.
Thermal Protection	Yes
Surge Protection	Primary surge protection protects against surges going down the line, unlike traditional transformers.
Event Schedules	Up to 12 programmable schedules
Vandal Resistant	Yes, with integrated locking tab – lock not included
Temperature Range	Operates at -40° F to 140° F (-40° C to 60° C)
Mounting Hardware	Included. Integrated easy-positionable keyhole slot mounts allow for a simple installation.

Design Pro LED Controller - 300W

Item Number	15DC300 - 300W
Zones	Up to 6 independently controlled zones
Weight	11 lbs.

Design Pro LED Controller

	Remote	Range Extender	#14-2 Wire	#16-2 Wire
Item Number	16080 BK	16081 WH	16088 BK	16089 BK
Description	Allows the user to independently control lighting zones based on pre-defined programs. This enables the homeowner to temporarily override schedules on individual zones by turning the lights on/off at any given time. Can also be used as a secondary programmer. Compatible with Vera Plus and Edge Gateways.	Allows for wireless range extension (additional 300') between wireless devices (ex: power supply to power supply). Plugs into any standard 120V outlet (dry location). Compatible with Vera Plus and Edge Gateways.	Now 14 and 16 gauge direct burial wire can now be used with Kichler's Design Pro LED Controller. Available in 250' EZ Pull boxes for added convenience. To be used only with the Kichler DesignPro LED Controller. See Kichler DC voltage drop calculator to calculate wire runs.	
Input Voltage	Internal lithium battery charges via provided USB cable	108-132AC 50-60 Hz		
UL Listing		UL listed for dry location; must be used indoors or put in an approved enclosure	UL listed for 12V outdoor lighting applications. UV stabilized PVC insulated. For direct burial.

HOW IT WORKS

Mobile Device

Download the Vera™ app to any smartphone, tablet or computer.

Wi-Fi

Plug in the Vera™ gateway and link to the home's Wi-Fi system.

Sync

The Vera™ app will locate the Kichler Pro LED Controller and link it wirelessly to the Vera™ gateway.

Take Control

Using a Wi-Fi or cellular connection, homeowners can confidently control their landscape lighting anytime and anywhere. Secure cloud servers, powered by MIOS, safely broker the connection between the homeowner and their home.

ACCESSORIES for LOW-VOLTAGE TRANSFORMERS

Along with a wide variety of transformers, Kichler® offers a full compliment of control accessories. Used separately or in tandem; light may be controlled as desired.

Photocells allow the intensity of daylight to define transformer operation. Timers can be used for more exacting requirements.

15557 BK

Mechanical Transformer Timer

Plug-in timer suitable for outdoor temperatures when enclosed in an outdoor transformer enclosure. For use in all Professional Series, Contractor Series and Plus Series transformers.

15565 BK

Plug-in Transformer Photocell

Plug-in photocell is for use with all Professional Series, Contractor Series and Plus Series transformers.

15556 WH

Digital Transformer Timer

Battery backup included. Straight-forward programming and easy day light savings change over. For use with all Professional Series, Contractor Series and Plus Series transformers.

15511 BK

Synchronizer Device

Synchronize all transformers used in a landscape setting so they turn on and off at the same time. Jumper wire (not included) should be a minimum of 24 gauge.

15534 BK

Plug-in Transformer Remote Photocell

Plug-in photocell with 10' cord is for use with all Professional Series, Contractor Series and Plus Series transformers.

For warranty information, visit Kichler.com/Warranty.

600W, 900W and 1200W Transformer models are manufactured in intervals of 300W (VA) circuits.

National Electric Code and Underwriters Laboratories require that wiring, where concealed or extended through a building wall, must be enclosed in conduit. All transformers are for use with outdoor low-voltage lighting.

All Kichler transformers are listed or certified to ANSI/UL 1838. The listing/certification agency may vary.

12V Retrofit Accent

Retrofit with LED Lamps

When an existing system needs an update or upgrade, Kichler offers a variety of LED or incandescent accent lights that deliver professional results.

Retrofit Accent

“ ...As we are replacing all of the older lights, this has better quality and an improved lighting affect... Very good build quality, and nice brightness to the LEDs... ”

12V Lamps

LED, Incandescent and more

LED or incandescent choices are designed to illuminate and perform with Kichler dependability. Superior optics and fully potted electronics generate consistent light output across a 9V to 15V operating range.

12V LED LAMPS

Features

- Potted and/or coated electronics protect against moisture
- Generate consistent light output for systems with an operating range from 9V to 15V with no loss in light output
- Designed and listed for outdoor use in enclosed fixtures/damp locations **D** or wet locations **W**
- Cast aluminum heat sink, anodized black, for increased thermal management
- Integrated, high-output LEDs are tightly binned for high CRI, color consistency and color quality
- 30,000 hour life in an enclosed fixture
- FCC compliance ensures no interference with other electronic devices
- High total lumens and lumens per watt (efficacy)
- Custom optics deliver center-to-edge beam uniformity
- 6-year warranty

Photometrics: 12V LED Lamps

The curves indicate the illuminated area and the average illumination when the luminaire is at different distances. Stated footcandles are for bare lamps only. For additional photometrics, visit Kichler.com/Landscape.

*Ideal for side mount path, deck/step, wall wash fixtures and more.

Multiply fixture VA by the number of fixtures used to determine size of transformer.

Stated lumens are for bare lamps only. Using lamps in enclosed fixtures can result in up to 30-40% loss in lumen output based on test data.

All lamps are listed or certified by UL, ETL, and/or CSA to the appropriate ANSI/standard for both the United States and Canada and have tested for FCC compliance, assuring they won't interfere with other home electronic devices. So, you don't have to worry about inadvertent interference.

Kichler Landscape Flag Marker 	15507 ONG	A great tool for designing your landscape lighting system. Plot out your landscape lighting needs with these green marker flags.
Corrosion Preventative Compound 	15670 BK	Specially formulated, non-conductive sealant and corrosion preventative for all types of electrical contacts. Its grease-like consistency helps prevent intrusion of dust, moisture and rust. Apply to socket shell and bulb base. Acts to increase bulb and socket life. 2-oz. tube.

120V Lighting

Kichler® 120V integrated LED and incandescent lighting is available in accent, flood and in-ground options for a variety of new or retrofit commercial landscape lighting applications. Each offers exceptional durability, a clear and clean quality of light, sleek designs, and incredible energy savings: all while keeping your project budget in line.

120V-277V Accent

Integrated LED C-Series (Commercial)

You can count on our LED fixtures to pay for themselves on average in less than two years with a lower cost of ownership than traditional light sources. Incandescent options provide additional solutions to meet client demands.

LED Commercial Outdoor Lighting that lives up to the Kichler name – and your reputation.

ACCENT & FLOOD LIGHTING

Center-to-edge optics

C-Series Accents and Floods offer center-to-edge optics for precise and uniform beam spread with no artifacts. In addition, each fixture is designed with 3-step binning to deliver a consistent color from fixture to fixture.

Potted driver

is fully potted to protect against water ingress, which ensures long-lasting performance.

Plugged knuckle cavity with strain relief

and internal cord grip system prevents movement to reinforce a secure connection at the source.

Multi-layer front lens seal

ensures a moisture-resistant seal.

Dual cavity design

with cast aluminum housing divided into two independent compartments to protect the optical chamber and the LED from the operating heat of the driver.

Internal thermal management

happens with internal cast heat sinking to repel heat from the driver to maximize lifetime and performance.

Machined threads

and lock nuts for simple installations and adjustability.

Durable knuckle

with deep grooved teeth for stronger engagement that is less likely to wear down.

Built-in draining

designed to prevent water from pooling on the face of the fixture.

The sturdy design of the Kichler C-Series line delivers years of quality light performance.

Exceptionally Engineered

The C-Series line provides 120V-277V universal voltage from one fixture and contains built-in surge protection (4kV). The durable knuckle features clean-cut, deep ridges for a stronger engagement and comes equipped with vandal-resistant hardware for extended durability. And, our sleek designs feature die-cast, all-metal housings finished with a polyester powder coating that stands up to environmental demands.

Designed for Performance

Our C-Series LED fixtures feature the latest in LED technology with center-to-edge optics for a precise beam spread that is uniform and crisp. Our 3-step binning process also assures the color you choose – 3000K or 4000K – is consistent from fixture to fixture.

Sleek and coordinating designs

Thick-gauge, cast metal housings

Textured powder coat finish

Center-to-edge optics

These integrated fixtures come in a variety of beam spreads.

Use the 15-degree beam spread for tall, thin applications, 40-degree for medium height and width elements, and 55-degree for short, wide beams on broad structures or trees.

120V-277V Lamps

LED & Incandescent, plus Photometrics

Potted/coated electronics protect against moisture while the cast aluminum construction assures proper thermal management. Operating range from 120V to 277V with 30,000 hour life (in an enclosed fixture) for years of performance.

120V-277V LED LAMPS

Features

- Potted and/or coated electronics protect against moisture
- Operating range from 120V to 277V
- Design & listed for wet location & enclosed fixtures
- Can be used in open fixtures or outdoor sockets
- Cast aluminum heat sink, anodized black, for increased thermal management
- Integrated driver and transformer with high output LEDs tightly binned for high CRI, color uniformity and color quality
- 30,000 hour life in an enclosed fixture
- FCC compliance ensures no interference with other electronic devices
- High total lumens and lumens per watt (efficacy)
- Custom optics deliver center-to-edge beam uniformity and glare reduction
- Interior use as well
- 6-year warranty
