CUSTOM IS HERE

This year, we've seen a real desire for customization. Designers want color temperature options, adjustable optics and accessories, lighting that can seamlessly integrate into unique environments, and custom sizes and finishes.

We are committed to delivering the highest performing products with the fastest turnaround. Our teams of over 100 designers and engineers regularly invent and create new technical and decorative luminaires in a few short months, not years. We now also offer full custom capabilities.

Since we thoroughly test our luminaires and manufacture them with a zero-landfill promise, you can rest assured the best LED technology and designs are incorporated in the sustainable solutions we provide.

YOU'RE GETTING WARMER

If we're being honest, we love the warm glow of incandescent lights, but LEDs are much more superior in every regard. What if we said you can have the best of both worlds—the high performance of LED and the intimate warmth of incandescence?

• With a lightweight, ultra-thin 1/8" profile, Pixels requires very little space
• Even illumination of translucent surfaces from as little as 1½" behind
• May be field-cut vertically or horizontally, in unique shapes or around obstructions
• Powers easily by daisy chaining with integral push-in connectors or power from any square at soldering points provided

• **Versatile mounting options:**
  3M-construction adhesive adheres to most surfaces (flat or curved), or open rectangles indicate where it can be stapled through
• Can be installed in either exposed or fully enclosed spaces
• Specially rated for installation in the storage area of a clothes closet
