AREA LIGHTING fills in low-level areas of a landscape with light, and may be used to define perimeters, highlight areas of interest and provide a margin of safety along pathways.

DOWN LIGHTING can highlight interesting textures, greenery or statuary. It simulates natural lighting, coming from above.

BARBECUE LIGHTING is the elegant alternative to a flashlight and is indispensable to the outdoor chef.

HANGING LIGHTING is a decorative way to illuminate an outdoor area, such as a patio, deck, eave, awning or archway.

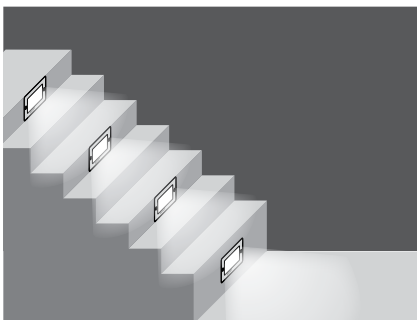

SHADOWING will cast a shadow of a foreground object onto a vertical structure behind. Placing the fixture nearer to the object will cast a larger shadow behind.

SILHOUETTING lights are placed behind an object with interesting structure and best results are obtained when the light is focused onto a vertical surface.

STEP, DECK OR BRICK LIGHTING allows the safe navigation of stairways by displaying the steps themselves as well as framing the edges of risers, walkways and decks.

SPOT LIGHTING utilizes a tight cone of light to isolate specimen objects or to generate interesting textures from greenery focusing on key elements creating high contrast.

FLOOD LIGHTING is similar to spot lighting, except it utilizes a broader spread of light for coverage over a larger area.

PATH LIGHTING is used to illuminate a safe avenue along a walkway. It may also be used to highlight ground cover and perimeters.

PUTTING GREEN LIGHTING can accentuate a golf course or private putting green.

UNDERWATER LIGHTING may be used in or out of water to dramatically enhance fountains, spillways, statues and waterfalls to best effect. It is recommended to illuminate all viewable areas.

ENHANCEMENTS

Focus is the industry leader when it comes to offering the widest variety of options to tailor a fixture to an exacting application. Depicted is just some of the many configurations with which a typical AL-04 fixture can be outfitted.

13 powder coat finishes available;
2 acid rust finishes available for copper and brass fixtures

12v. fixtures: 25 foot 16/2 fixture lead wire available; add -25F to catalog number. For use with Focus CPC or hub supplied by others.

POWDER COAT OPERATIONS

Focus Industries incorporates a state-of-the-art fully computerized powder coating system to apply an extensive array of colors to virtually any fixture. Fixtures undergo a comprehensive 7-step cleaning process to ensure superior and durable coating adhesion of the pigment, all in an environmentally-friendly process. Turnaround time is dramatically reduced compared to manufacturers with less sophisticated capabilities.

As a USA based manufacturer of exterior lighting products, FOCUS INDUSTRIES is uniquely positioned to accommodate your requirements for custom lighting fixtures.

If you have a special need, or require a signature product for a particular job, FOCUS has the personnel and resources to get the job done right. Without the headaches, hassles and delays that often accompany dealing with a foreign manufacturing source. And we get the job done on time and on budget.

Whether it's a large-scale commercial project or a single-family residence. It could be something as simple as a custom color requirement or as complex as a custom designed lighting fixture. FOCUS INDUSTRIES welcomes and encourages custom product orders.

Note: Depth, Clarity and Movement will determine width and intensity exiting beam spread quality and reach of the light beam. Not recommended for applications deeper than 4 feet. Dirty water will reduce light dramatically. Movement will cause distortions and widening of the beam spread.

THE SL-11 IS DESIGNED **FOR UNDERWATER USE ONLY.**
FAILURE TO KEEP SUBMERGED OR OPERATING ABOVE WATER WILL VOID WARRANTY.

M SERIES TRANSFORMERS SPECIFICATIONS:

- Heavy-duty 18 gauge brushed stainless steel NEMA 3R enclosure with hinged locking door (Lifetime warranty) MST, MLT.
- Heavy-duty aluminum enclosure 18 gauge for MAS, MAL.
- Black polyester powder coat finish standard for outer enclosure MAS, MAL.
- Rain tight enclosure, above grade (Nema 3R Type).
- Long life, high temperature (130°C) 266°F Class 'B' rated Transformers.
- Isolation/insulation type. No contact between 120v and 12v windings. Copper shield.
- 1500v Isolation between all windings and ground.
- 11 gauge cold rolled steel 'L' brackets for stable mounting.
- M19 electrical grade steel for superior electrical and magnetic properties.
- Strip copper secondary windings for lower temperature rise.
- Single phase, open core and coil.
- EL laminated windings (Linear output) vacuumed impregnated with black slate flour. Filled varnish for superior heat dissipation and noise reduction.
- 120v primary, 12.5v secondary 50/60 hertz/cycle standard.
- 6 ft. (18/3) SJT-WA weatherproof grounded powercord (120v).
- On/off control via rocker switch.
- Extra heavy-duty (75A) terminal lug easily handles extra cable sets.
- Resettable magnetic circuit breaker for overload and short circuit protection.
- UL 1838 and 1598 Listed. The Standard for Low Voltage Landscape Lighting Systems.
- All units are supplied with knock-outs for easy upgrading or adding of accessories.
- MAS/MST Series combo knockouts for 12v cable conduit feed available in 2x 1/2" or 3/4", 1x 1" & 1x 2"
- MAL/MLT Series combo knockouts for 12v cable conduit feed available in 4x 1/2" or 3/4", 2x 1" & 2x 2"
- Flip bottom. M Series has easy access wiring and large knockouts.
- Super Terminal lug system wiring advantages: Less tools required, no need for spade connector, simply place stripped wire in barrel and screw down.

WHY USE M SERIES KITS?

1. Modular design enables fast and easy field upgrades. Add or remove any control device in minutes. **NO** down time!
2. Transformer never leaves job site, makes repair work hassle-free. No return of unit to factory.
3. Add additional power modules for increased capacities. More lighting for new applications.
4. Less inventory required, stock 1 or 2 main units and kits for upgrading.
5. Saves time and money. **Keeps you and your customers happy!**

M SERIES FIELD-INSTALLED KITS:

MAS/MAL features an aluminum enclosure, MST/MLT features a stainless steel enclosure.

Note: All Field-Installed kits are plug-and-go, supplied with instructions and all hardware to make the upgrade. Plug the 1/4" quick connector to the designated terminal and enhance a new or existing landscape lighting system in minutes.

1. Mechanical Timer Kit (-T KIT)
2. Digital Timer Kit (-DT KIT)
3. Photocell Kit (-PC KIT)
4. Remote Photocell Kit (-RPC KIT)
5. Full Phase Dimmer Kit (-D KIT)
6. 12v/24v AC Relay Kit (-R KIT)

- Super Terminal Lugs with capacity of 3 x #8, 5 x #10, 7 x #12 or 9 x #14 gauge wire
- 304 Stainless Steel enclosure with #4 brushed finish
- Removable Stainless Steel hinged door is lockable and weather sealed
- Above grade, NEMA 3R rated, rain tight enclosure
- LED indicators for instant recognition of 120v and 12v power
- Timer Ready standard (for plug-in timers supplied by others)
- Optional Mechanical Timer (-T), Digital Timer (-DT) and Astro Timer (-AT) face plates can be factory or field installed
- Photocell Ready with quick connector (not -AT models)
- Supplied with two 1/2" conduit (trade size) holes & one 1-1/2" inlet with plugs
- Bottom panel plus 2 side panel 1/2" conduit (trade size) holes with plugs
- Break away bottom panel swings down for easy access wiring
- 11 gauge cold rolled steel 'L' brackets for stable mounting
- Mounting plate and hardware included

ELECTRICAL

- Long life, high efficiency 266°F (130°C) class 'B' rated transformer core
- Copper shielded isolation/insulation; No contact between 120v and 12v windings

**New Deeper Case
Accommodates
Most Popular Brands Of
Plug-In Timers**

- 1500v Isolation between all windings and ground
- Grade M19 electric grade steel for superior electrical and magnetic properties
- Single phase, open core and coil
- E.L. laminated core has concentric winding and is protected by 130°C thermal switch.
- Double vacuumed impregnated with black slate flour
- Filled varnish for superior heat dissipation and noise reduction
- 120v primary, 12.5v secondary 50/60 Hertz/cycle (standard)
- 6 foot 18/3 SJT-WA weatherproof grounded power cord (120v)
- ON/OFF control via rocker switch on 120v side
- Extra heavy duty (80 amp) terminal lugs
- Manually resettable circuit breaker for overload and short circuit protection

INTERCHANGEABLE FACEPLATES

CPC SERIES - CENTRAL POINT CONNECTIONS SPECIFICATIONS:

Designed for grouping multiple fixture lead wires into one weatherproof junction box for easy access, connections, easy voltage metering, quick installation and to help distribute equal voltage to each fixture.

For these transformers: MV (Multi Voltage 12.5, 13.5, 14.5v), HV (High Voltage 12, 13, 14, 15, 16, 18 and 21v), DB Series (Multi Voltage).

HERE'S HOW IT WORKS:

1. Use a FOCUS MV (12.5v - 14.5v) or HV transformer (12v - 21v) output or higher.
2. Deliver from the transformer 1 to 3 12/2, 10/2 or 8/2 main cables into the CPC unit.
3. Bring each fixture lead wire (16/2) 25 feet into the CPC and connect together as shown. Do not cut or reduce the length of 16/2 fixture wire.
4. Recommended for the following layouts: 3 to 6 20w fixtures with 25F leads (16/2) or 2 to 4 35w fixtures with 25F leads (16/2).
5. The distance from the transformer to the CPC unit and fixture load will determine the tap or voltage needed at the transformer.
6. Make sure all loads (fixtures are wired/connected) to determine final voltage needed.
7. Pack connections with 3 inches of 3M die-electric sealing tape after tightening plugs (figure 1).
8. Do not exceed 200 watts per CPC connector.
9. Do not cut or shorten fixture lead wires. They must remain the same length to ensure equal voltage to each fixture.
10. All fixtures must be the same wattage, otherwise voltage will vary to each fixture.

HW-12-75W HARDWIRE TRANSFORMER SPECIFICATIONS:

- 120v input/11.5v output - 75w - electronic
- Flame retardant high temperature housing
- No audible noise
- Light weight, compact design
- Electronic short circuit and overload protection
- Moisture and shock resistant
- 25 KHz operating frequency, 95% efficiency
- 10w minimum load required
- Minus 25°C starting capability

APPLICATIONS:

- Retrofit existing 120v junction boxes to 12v
- Converting to 12 volt allows fixtures to mount to top of J-box or cable distribution on the back or bottom of J-box for additional fixtures.

NOTE: 1 HW unit per single gang weatherproof J-box. For a 2 gang J-Box, 2 units or 150w can be used.

Do not exceed 10 ft from transformer. There is 1v drop for each 10 feet from unit.

HW-12-75

PI-12-75W PLUG-IN TRANSFORMER SPECIFICATIONS:

- 120v input, 11.5v output, 75w - electronic
- Black flame retardant high temperature housing
- No audible noise
- Light weight, compact design
- Electronic short circuit and overload protection
- Moisture and shock resistant
- 25 KHz operating frequency, 95% efficiency
- 10w minimum load required
- Minus 25° C starting capability
- Nickel plated hospital grade 120v grounded plug
- 10 ft. 18/2 lead wire supplied

APPLICATIONS:

- Instant conversion of 120v receptacle to 12v-75w.
- Single or multiple fixtures can be used (not to exceed 75w).
- Hotel lobbies, atriums, gazebos; wherever there is a receptacle.
- For highlighting single or multiple objects from a concealed power supply.
- For interior or exterior uses. If used outdoors, must be enclosed in a weatherproof receptacle cover.

Do not exceed 10 ft from transformer. There is 1v drop for each 10 feet from unit.

PI-12-75

DB SERIES - DIRECT BURIAL TRANSFORMERS SPECIFICATIONS:

- Bronze high temperature fiberglass reinforced composite box and cover (heavy duty)
- Nema 12: below grade enclosure for direct burial applications
- 2 ft. 12/2 cable lead wire for low voltage connections (1 per circuit or voltage)
- Magnetic circuit breaker protection of all models
- 1/2" NPS mounting hubs on cover. Must specify which hole(s) to tap at time of order, if needed.. Ships standard without tapped access holes
- 120v primary, 12.5v secondary, 50/60 hz/cycle standard

1. Photocell (-PC) attached.
2. 12v / 24v VAC Relay Control (-R).
3. Multi-Voltage output (-MV); 12.5v, 13.5v and 14.5v taps. Available 60w, 300w, 600w, 900w, 1200w
4. Top Mount Fixture (for 1-3 fixtures) or photocell. Specify at time of order.
5. For 220v, 240v or 277v add (-220v) (-240v) or (-277v) to catalog number. (12.5v output only) in 300 watt increments.

SAFETY FEATURES

- Long life, high temperature (130° C) transformers.
- Isolation/insulation type, no contact between 120v and 12v windings.
- Single phase, open core and coil.
- Completely potted for longer life, more efficiency and reduced noise.
- Must be installed by a licensed electrical contractor per local codes.

- Duplex receptacle with LED power indicator.
- Ground Fault Interrupted Circuit (GFI) protection.
- For use with 1 (-TMS1) or 2 (-TMS2) transformers (specify).
- Put power where you need it.
- Reduces expensive cable runs.
- Reduces voltage drop to fixtures.
- Non-corrosive ABS mounting pedestal supplies years of trouble-free operation.
- Available in Black (-BLT)(Standard) or Bronze (-BRT)
- Quick installation.
- Photocell option available add (-PC) to catalog number

CERTIFIED LED RETROFIT KITS

Easily convert any incandescent or fluorescent surface fixture to energy saving LED with **FOCUS Surface LED Retrofit Kits**

There are millions of energy wasting surface fixtures in hallways, corridors, stairwells and entrances that need to be replaced. **FOCUS** has the **LED SOLUTION**.

Available with 12v, 120v, 240v or 277v Drivers & 3000K Warm White or 52000K Cool White Color:

LED ENERGY SAVINGS

Lifetime Cost: LED vs Standard Light Bulb

Save 80% on energy and 50% on total lifetime cost with Focus LED systems. Plus additional savings on installation time, maintenance & setup charges

SYSTEM COMPONENTS	STANDARD LANDSCAPE LIGHTING SYSTEM	FOCUS LED SYSTEM
FIXTURES	\$1,000.00	\$2,000.00
TRANSFORMERS & CABLE	\$1,375.00	\$750.00
REPLACEMENT BULBS & SERVICE CHARGES	\$2,000.00	\$0.00
ELECTRICITY	\$2,880.00	\$576.00
TOTAL	\$7,255.00	\$3,326.00

80% Energy Savings!

54% Total Savings!

System costs based on average landscape of 2,000 square foot home illuminated with 600 watts of incandescent/halogen lighting. Electricity costs based on 40,000 hours at \$0.12 per kilowatt hour (national average). **The sooner you convert to LED, the sooner you will realize increased savings.**

COST OF ELECTRICITY

THE AVERAGE COST OF ELECTRICITY ROSE 33% BETWEEN 2002 AND 2012 AND CONTINUES TO RISE

PERFORMANCE COMPARISONS

FOCUS LED SYSTEM CONSUMES ABOUT 80% LESS ELECTRICITY THAN INCANDESCENT HALOGEN SYSTEM WITH SIMILAR LIGHT OUTPUT

ENERGY USE

22+ YEARS OF HIGH LUMEN OUTPUT

Based on 6 hours per night usage

Focus ARROW MR16 LED is rated for 50,000 hours L7 (L7 is the time, in hours, for LEDs to reach 70% of the initial lumen output)

All LED's depreciate in lumen output over time.

Focus ARROW LED's minimize this degradation by using only the highest grade LED chips and superior thermal management.

Based on 6 hours per night usage

4.5% degradation after 2.3 years (5,000 hours of usage)

6.0% degradation after 4.6 years (10,000 hours of usage)

9.0% degradation after 11.5 years (25,000 hours of usage)

Less than 30% degradation after 22.8 years (50,000 hours of usage)

Degradation calculations based on 6 hours per night usage under normal operating conditions

LIMITED WARRANTY

All aluminum and composite fixtures manufactured by FOCUS INDUSTRIES are warranted to be free from defects in workmanship and materials, as manufactured for a period of three (3) full years. Brass, copper or stainless steel fixtures carry a limited lifetime warranty for finishes/cosmetic defects.

Electrical/mechanical components carry a three (3) year warranty. All direct burial transformers manufactured by FOCUS INDUSTRIES are warranted to be free from defects in workmanship and materials, as manufactured, for a period of three (3) full years. MST, MLT, RXT and HV Series stainless steel transformers carry a limited lifetime warranty on enclosure and ten (10) year warranty on electrical components, excluding all time clocks. Weatherproof transformers five (5) years; all transformers with integral timers, three (3) years; and hardwire and plug-in transformers one (1) year from the date of FOCUS INDUSTRIES invoice. Light bulbs and ballasts are covered by manufacturers trade warranty. Our warranty covers only replacement or repair at our factory or authorized repair facility of the defective part(s), to the original purchaser and excludes any responsibility for labor or freight expense incurred by the purchaser or others, for servicing any such claim during the warranty period. FOCUS INDUSTRIES reserves the right to issue credit, repair or replace defective merchandise at our option, upon receipt of written notification by the purchaser of the alleged defect, within the warranty period. FOCUS INDUSTRIES further reserves the right to examination of the alleged defective product, or other proof, satisfactory to FOCUS INDUSTRIES, of the defect. This warranty is in lieu of all other warranties, expressed or implied. FOCUS INDUSTRIES further reserves the right to refuse to honor the above warranty for consequential damages. FOCUS INDUSTRIES further reserves the right to refuse to honor the above warranty for any product(s) altered, improperly installed, or installed in applications for which they are not intended.
