

MCR SAFETY

MEMPHIS GLOVE CREWS RIVER CITY

*Exceeding Expectations...
Protecting Your Quality of Life.*

PERSONAL PROTECTIVE EQUIPMENT

MCR Safety is committed to consistently performing as a PPE market leader. As per our vision, "Exceeding Expectations... Protecting Your Quality of Life", we will fulfill our commitment by:

Delivering our customers the best total cost solution:

Our assortment of PPE offerings includes hand, eye, hearing, respiratory, clothing, and foot protection. These offerings are differentiated by the number of features which contribute to our assorted price levels of premium, plus, and value. Consider our Professional Grade PPE offerings which are engineered to provide the highest level of innovation for consumers that demand the very best in safety. Vertical integration of leather, string knit glove, and protective eyewear manufacturing assures consistent quality and competitive pricing. We currently manufacture approximately 50% of our hand protection, protective clothing, and protective eyewear offerings.

Support our Distributors with exceptional resources:

- ✓ Three distribution facilities - Tennessee services most of our 9 adjoining states with next day LTL service. California also services the west coast with next day service. Pennsylvania provides overnight service to 15 northeastern states.
- ✓ Sales Team - Sales Managers, Product Specialists, and Customer Service collectively service our customer needs and provide unmatched PPE expertise.
- ✓ SafetyLine newsletter - Market conditions for all PPE categories, safety posters and new product introductions are included on a quarterly basis to our distributors.
- ✓ MCR Safety web site - Significant investments in technology are reflected by the many automated services that are available 24/7 from our www.mcrcsafety.com web site.
- ✓ Independent Manufacturing Representative Groups - Additional sales support nationwide.

Provide marketing tools:

- ✓ Private labeling - Our catalog, sales literature plus most of our PPE product offerings and accessories.
- ✓ Product image library - log in and download our product images, logos, and model shots in the format(s) you choose.
- ✓ National advertising - Industrial and safety trade journals, magazines, and web sites.
- ✓ Trade show participation - NSCE, ASSE, World of Concrete, and various regional shows
- ✓ Lead management service - Online access for prompt sales lead fulfillment.
- ✓ Trade Associations:
 - o Afflink/SafetyLink www.afflink.com
 - o Affiliated Distributors www.adhq.com
 - o National Safety Council (NSC) www.nsc.org
 - o Industrial Glove Association (IGA) www.iga-online.com
 - o International Safety Equipment Association (ISEA) www.safetysafetyequipment.org
 - o Safety Equipment Distributors Association (SEDA) www.safetysafetycentral.org

Product knowledge expertise:

- ✓ Online Product Document Library - Specification sheets, sales sheets, and other helpful literature.
- ✓ Online Training - Training modules for distributor sales and customer service personnel with quantitative test scores.
- ✓ Online Product Reference Library - A comprehensive collection of all our PPE products with features, styles, sizes, and colors available.
- ✓ Online Cross Reference - Search by style numbers for recommended equivalent PPE competitive offering.
- ✓ Online Permeation Guide - Recommended PPE offerings for chemical environments
- ✓ Field sales training - In house distributor training.
- ✓ PPE training - Hands on training for all of our PPE offerings.

PREMIUM HAND PROTECTION

Ninja® Professional Grade Series
Professional Grade hand protection is engineered to provide the highest level of innovation. Each of the offerings in the Professional Grade Ninja® series include a unique shell and polymer combination to best take advantage of the latest hand protection technology. Our Ninja® X, Ninja® Flex, and Ninja® Max offer the greatest assortment of dexterity, sense of touch, and protection. Similar to sports and fashion gloves, our Ninja® series are more attractive and user-friendly than traditional hand protection options. Consumers are more likely to wear and thus reduce injuries.

Ninja® is the registered trademark of Midas Safety.

N9674

Ninja® X
15 Gauge Black Nylon/Spandex Shell
Black Bi-Polymer Coating on Palm and Fingertips
Sizes: L, M, S, XL

Features:

- Proprietary Bi-Polymer coating combining durability and softness
- Silicone free
- Treated with Actifresh® to kill bacteria and promote freshness.
- Each pair individually packaged for point of sale display.

Industry Applications:
Assembly operations, general purpose manufacturing, fabrication, inspections, and packaging when maximizing dexterity and sense of touch is required.

PRO

MCR Safety's Professional Grade hand protection is engineered to provide the highest level of innovation for consumers that demand the very best in safety.

N9676G

Ninja® Max
10 Gauge, Blend of Dyneema® and Synthetic Yarn Shell
Black Bi-Polymer Coating on Palm and Finger Tips
Sizes: L, M, S, XL

Industry Applications:
Automotive, glass, injection molding, metal fabrication, and transportation.

Features:

- Proprietary Bi-Polymer coating combining durability and softness
- Silicone free
- Treated with Actifresh® to kill bacteria and promote freshness.
- Each pair individually packaged for point of sale display
- CE Score 4542; CE/EN cut level 5; CPPT cut level 3 - Provides the greatest level of cut protection within our Ninja® series.

MCR Safety is a licensed supplier of gloves made with Dyneema®.

If you demand the best... Demand Professional Grade!

N9680

Ninja® Flex
15 Gauge Red 100% Nylon Shell
Gray Textured Latex Coating on Palm and Finger Tips
Sizes: L, M, S, XL

Industry Applications:
Agriculture, durable goods assembly, recycling, and warehousing.

Features:

- Crinkle latex coating providing superb flexibility, elasticity, and durability.
- Excellent for dry grip applications.
- Treated with Actifresh® to kill bacteria and promote freshness.
- Component materials comply with all relevant federal regulations for food contact.
- Each pair individually packaged for point of sale display.

Synthetic Leather Palm and Fingers
Blue Spandex Back
Multi-layered Knuckle Protection Including Gel and Foam Pads
Vented Finger Sidewalls, Fourchettes
Velcro Wrist Closure
Sizes: L, M, S, XL

Fasguard™ multi-task hand protection styles are constructed from an assortment of premium materials. Most styles feature Clarino® or other synthetic leathers. Additionally, premium grain deerskin and goatskin styles compliment this series. Clarino® and synthetic leathers improve hand protection by providing greater function and feel by being more soft and flexible than traditional materials. These synthetic materials are also more environmentally friendly than chrome tanned leather.

Clarino® was developed in 1964 and initially used in the shoe industry as a replacement for leather. This man-made leather possesses many of the same qualities of natural leather as well as offering a launderable material with enhanced gripping properties. Today Clarino® is used in the

apparel, interior furnishings, and sporting goods industries to name a few of its diverse applications.

Clarino® and our synthetic offerings can be considered high-tech leather. In addition to breathing naturally, they feel luxuriously soft, are color fast, and have additional unique physical properties including: **comfortable** - soft and flexible micro-fiber material that insulates against heat and cold, repels stains and mildew, and resists wind and water **durable** - rivals the strength and performance of leather plus consistently provides high quality **lighter weight** - up to 3 times lighter in weight compared to leather **launderable** - hand and machine washable, or dry clean **breathable** - minimizes perspiration by allowing air flow

MULTI-TASK

902

Industry Applications
Framing, Carpentry, Heavy Machinery Operation,
Power Tool Use, Rigging, Auto Repair

which equals 100 gram weight

Industry applications include any with low-light environments or where operations are conducted before or after day-light hours. Targeted industries include airport, emergency response, law enforcement, lawn and tree service, mining, road construction, railroad, sanitation workers, and municipal utilities.

GUNN PATTERNS

3M Scotchlite™ reflective material is the most distinguishing characteristic for our Luminator™ hand protection. These styles are ANSI/ISEA 107-2004, Level II compliant for retroreflective performance. Retroreflection occurs when light rays are returned in the direction from which they came. The "level" refers to the amount of reflectivity for the material. Reflective garments may meet a "class" rating which refers to the amount of reflective material per garment.

LINE MASTER LEATHER PROTECTORS

40009

Cow Grain Leather Protectors
Driver Pattern
Straight Thumb, Shirred Elastic Back
Sewn with Kevlar®

10" Length

40008 - Size 8

40009 - Size 9

40010 - Size 10

40011 - Size 11

FEATURES

- High quality leather and construction for durability and comfort
- Strong seams sewn with super-strong heat resistant DuPont KEVLAR® thread
- Generous size for comfortable fit over rubber insulating gloves or other applications where a "roomier" fit is needed
- Choice of styles allows maximum comfort for your application

WARNING

DO NOT USE LEATHER PROTECTORS ALONE FOR PROTECTION AGAINST ELECTRICAL SHOCK. SERIOUS INJURY OR DEATH COULD RESULT. ALWAYS USE RUBBER INSULATING GLOVES THAT ARE SPECIFICALLY DESIGNED TO PROVIDE PROTECTION AGAINST ELECTRICAL SHOCK FOR YOUR APPLICATION.

What Kind of Heat?

To select the correct glove, you must understand the types of heat:

Radiant—Generated by a source of fire or by the sun.

Ambient—The surrounding atmospheric temperature.

Conductive—Direct contact with hot surfaces.

How Much Heat Will It Take?

Check for:

Weight-of items being handled

Temperature-contact

Time-duration of exposure

POLAR OPTICS™

MCR Safety's Polar Optics® protective eyewear features polarized lens technology that reduces glare without sacrificing clarity, performance or durability. Polarized lenses function similar to window blinds by blocking vertical light from above or below your line of vision only allowing the horizontal light to pass through the lens. This feature eliminates eye stress and fatigue from any surfaces that create glare from sunlight, water, sand, snow, glass and chrome from automobiles or buildings. Polar Optics style #PZ242 meets Z87+ standard and are packaged with a black satin eyeglass bag.

Spatula temple design for a comfortable fit

Lightweight nylon frame

Universal nosebridge comfortably fits large user audience

Polarized lens to reduce glare

LENS CHART

LENS DESCRIPTIONS

Lens tints are not merely decorative, but enhance a worker's vision under various lighting conditions. Following are different lens options, their applications and percentage of **visible light transmission**. Please remember that these are general definitions only. Consult your safety director to insure the proper application.

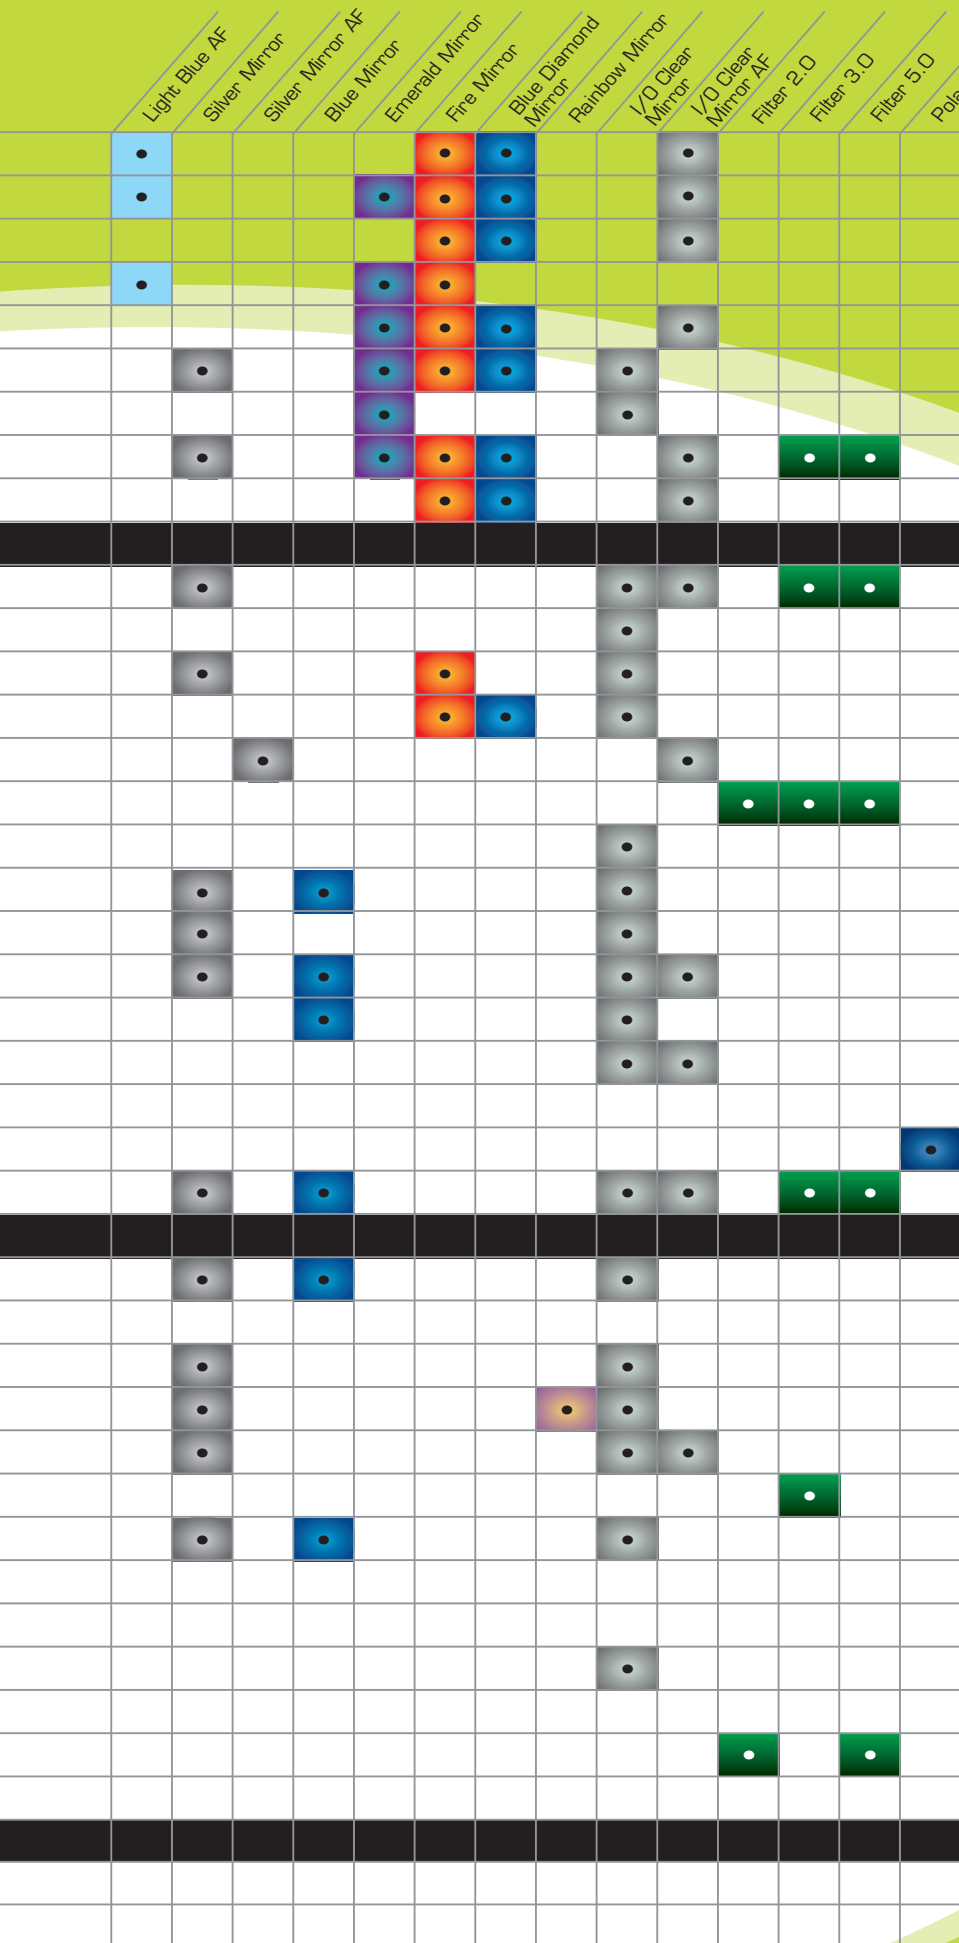

Duramass® AF4 Anti-fog Coating: Provides excellent fog prevention in high humidity environments where sudden shifts in temperature occur.

-  **Clear:** Provides excellent optics for general applications where impact protection is required. 85% VLT.
-  **Light Grey:** Serves the same purpose as grey lens, yet allows more visible light through the lens for indoor/outdoor use. Reduces glare from artificial light such as halogen and fluorescent. 62% VLT
-  **Grey:** For outdoor applications where light and glare can cause eye strain and fatigue. 12% VLT.
-  **Gradient:** For outdoor use where overhead glare may interfere with visual acuity. 18% VLT.
-  **Amber:** Blocks the blue portion of the visible light spectrum, creating maximum contrast enhancement, particularly in low light. 85% VLT.
-  **Dark Green:** A general purpose lens that protects from excessive glare and ultraviolet radiation. 12% VLT.
-  **Fire, Blue Diamond, Emerald, Rainbow, Blue, Silver, Banana Mirror and Copper:** For outdoor use where sunlight and glare cause eye strain and fatigue. "Mirror" coating reflects light, reducing the amount of light that passes through the lens. 9% VLT.
-  **Brown:** Outdoor applications where sunlight and glare cause eye strain and fatigue. Meets color traffic signal recognition requirements. 12% VLT.
-  **Indoor/Outdoor Clear Mirror:** Allows more visible light through the lens for indoor/outdoor use. Reduces glare from artificial light such as halogen and fluorescent. 55% VLT.
-  **Vermilion:** Enhances contrast while reducing all colors equally for optimum color recognition. Ideal for indoor inspection. 55% VLT.
-  **Light Blue:** Allows more visible light through the lens for indoor/outdoor use. Reduces glare from artificial light such as halogen and fluorescent. 70% VLT.
-  **Blue Ice:** Protects from excessive glare, high levels of hazardous visible light and ultraviolet radiation in outdoor applications. 33% VLT.
-  **Filter Shades:** Protects against ultraviolet and infrared radiation generated when working with molten metal, and in welding, cutting, soldering and brazing.
-  **Polarized:** For use outdoors to protect from excessive glare that can cause eye fatigue.

WELDING FILTER SHADE SECTION

| OPERATION | RECOMMENDED FILTER SHADE |
|-----------------------------------|--------------------------|
| Torch Soldering | 2 |
| Torch Brazing | 3 |
| Light Cutting up to 1" | 3 |
| Medium Cutting 1" to 6" | 5 |
| Heavy Cutting more than 6" | 5 |
| Gas Welding, light, up to 1/8" | 5 |
| Gas Welding, medium, 1/8" to 1/2" | 5 |

*Indicates thickness of material to be cut

HI-VIS SAFETY VESTS

ANSI/ISEA 107-2004 Standards

CLASS III VESTS

MCR Safety, as a member of the International Safety Equipment Association (ISEA), is committed to providing workers the very best in high-visibility apparel. The ANSI/ISEA 107-2004 establishes a set of performance criteria for high-visibility apparel.

Class 3 Protection Work Conditions

For occupational activities where risk levels exceed those of a Class 2, such as where workers are exposed to significantly higher vehicle speeds and/or reduced sight-distances while the worker and vehicle operator have high task loads, clearly placing the worker in danger. Class 3 could also be used in applications where the wearer must be conspicuous through the full range of body motions at a minimum of 1280 feet (390 Meters) and must be identifiable as a person.

Class 3 Industry Applications:

- emergency response personnel
- survey crews
- roadway construction personnel
- flagging crews
- utility workers

Should you need assistance in determining the most appropriate garment for any application, please contact MCR Safety (www.mcrcsafety.com) or ISEA (www.safetysafetyequipment.org).

CL3ML

Class 3, 100% Polyester Mesh Safety Vest Velcro Front Closure, 2 Pockets

SURVL

Class 2, 100% Polyester Surveyor Vest with four front pockets, two inside pockets and zipper for front closure. 3" Orange/Silver reflective stripes. Fluorescent Lime M-X4

Class 2 Protection Work Conditions
For occupational activities where risk levels exceed those of a Class 1, such as where greater visibility is desired during inclement weather conditions, and complex backgrounds are present; where employees are performing tasks which divert attention from approaching vehicle traffic; and the vehicles or moving equipment speeds exceed 25 mph; or work activities take place in closer proximity to vehicle traffic.

Class 2 Industry Applications:

- law enforcement personnel
- survey crews
- school crossing guards
- forestry workers
- accident site investigators
- railway workers
- roadway construction workers
- utility workers
- parking and/or toll gate personnel
- emergency response personnel
- airport baggage handlers/ground crew

Class 2, Solid 100% Polyester Safety Vest with Velcro front closure and 3 pockets. 2" Reflective Stripes. Fluorescent Lime L-X4

PSV200

Public Safety Vest, ANSI 207-2006, Tear Away, Polyester Mesh with Velcro front closure and 1 inside pocket. 2" Silver Reflective Stripes. Solid panel on back for logo imprint. Fluorescent Lime M-X4

INCIDENT COMMAND VESTS

Many of today's environments require the quick identification of individuals coordinating or involved with site activities. Although, incident command vests were initially designed for responders to disasters or hazardous situations, they are used in a wide variety of applications. These vests are used to help quickly identify the person or persons responsible for a particular area. (i.e. Red for First Aid or Green for Foreman).

ICV208

Cotton/Polyester vest with velcro tab front closure and elastic side straps. 1" white vinyl reflective stripes. Front and back slot to insert interchangeable title information

- ICV203** Blue One Size: 18"x47"
- ICV204** Red One Size: 18"x47"
- ICV207** Black One Size: 18"x47"
- ICV208** Green One Size: 18"x47"

GENERAL PURPOSE SAFETY VESTS

General Purpose Class Protection Work Conditions
 General purpose vests do not meet the requirements for performance level classification by ANSI standards. GP Vest are to be used for occupational activities where Class 1 protection is not necessary. GP vests are designed to give the wearer additional visual conspicuity beyond that of normal attire.

General Purpose Class Industry Applications:

- Yard maintenance workers
- Crowd control
- Warehouse workers
- Construction
- Parking lot attendants

MCR Safety recommends the use of Value Series Class 2 vests for any Class 1 requirement.

Should you need assistance in determining the most appropriate garment for any application, please contact MCR Safety (www.mcrsafety.com) or ISEA (www.safetysafetyequipment.org).

RAINWEAR GUIDE

PREMIUM STYLES:

Luminator - Our hi-vis Luminator offerings are available in different materials and these styles: Classic, Challenger, Wizard, and Navigator. Excellent for any application where visibility is top priority, Sanitation Workers, Police, Road Crews, and Airlines.

Challenger (7368) - .54mm, Nylon/PVC over PVC/Nylon. Multiple layer construction with over twice the thickness of our original challenger in a reversible raincoat.

Hydroblast (840) - .35 mm, Neoprene/Nylon. Suits specially designed for hydroblasting. Excellent for any clean-up operation. Velcro closures ensure water tight seals at all openings.

Concord (800) - .35 mm, Neoprene/Nylon. Mining industry, petroleum related industries, logging and ship building organizations.

Harvester (900) - .45mm, PVC/Cotton. Vegetable growers and shipping industry.

Dominator II (368) - .45mm PVC/Polyester. Flame resistant, green PVC/polyester suit used in chemical environment.

Dominator (388) - .42mm PVC/High Tensile Polyester/PVC. Flame resistant, green PVC/High Tensile Polyester/PVC is quickly identified for chemical applications including chemical plants, refineries, and environmental clean-up.

Navigator (550) - .22mm Polyurethane/Nylon. Flame resistant, lightweight taffeta fabric.

PLUS STYLES:

Cyclone (400) - .35mm PVC/Nylon/PVC. Flame resistant, poultry and meat packing plants, concrete plants, any abrasive situation.

Wizard (300) - .28mm PVC/Nylon/PVC. Flame resistant, chemical protection, fertilizer plants, trucking industry, D.O.T.'s, sanitation workers, and paper mills.

Hydroblast (390) - .28mm, PVC/Nylon/PVC. Suits specially designed for hydroblasting. Excellent for any clean-up operation. Velcro closures ensure water tight seals at all openings.

Challenger (700) - .16mm PVC/Nylon. Used in amusement parks, golf courses, company recognition, and safety awards.

Classic (200) & Classic Plus (240) - .35mm PVC/Polyester. All around "Classic" foul weather gear, construction industry, utilities, municipalities, airlines, environmental clean-up. Resists most oils, acids, and solvents.

Commodore (600) - .40mm PVC/Non-Woven Polyester/Nylon. All weather suit, provides warmth in winter, absorbs perspiration in summer, protects against industrial oils and solvents.

Schooner II (2000) - .35mm PVC/Polyc. For recreational purposes including sporting events, concerts, hunting and fishing.

VALUE STYLES:

Vortex (150) - .30mm Single Layer PVC. Similar applications as 100 series with the addition of a comfortable corduroy collar.

Stowaway (100) - .25mm Double Layer PVC. Construction industry, excellent for temporary workers or where price is a factor.

Tempest (090) - .20mm Double Layer PVC. Price conscious customers, construction, refinery clean-up, and environmental clean-up.

Squall (070) - .20mm Single Layer PVC. Refinery clean-ups, day labor situations, general maintenance, theme parks, & prisons.

Eagle (060) - .15mm Single Layer PVC. Disposable complete suit used for light splash, general maintenance, and day labor situations.

Zodiac (050) - .10mm Single Layer PVC. For light splash protection, day labor situations, and any disposable need.

Schooner (040) & Schooner Jr. (020) - Schooner 040 is .10mm PVC, and Schooner Jr. is .02mm Polyethylene. For recreational purposes including sporting events, concerts, hunting and fishing.

Aprons and Sleeves (063,073) - 6 & 8 mil Vinyl. Used in meat, poultry, and vegetable processing plants.

| Sizing is Denoted | Men's | | Ladies | |

PERK Kit

Personal Emergency Response Kit Contains: 1 Covtech™ Disposable protective coverall, 1 pair safety goggles, 5 N95 Valved flat fold respirators (individually wrapped), 5 pair medical grade nitrile disposable gloves, 2 pair non-skid shoe covers, 4 purell hand sanitizing wipes, and 1 hazard guideline.
Size: M, L, XL

COVTECH™

- Antistatic material (compliant to test method EN1149-1)
- Self-adhesive zipper cover flap (more protection and better seal)
- Easy size recognition (sizing appears in two places on the garment and on the package)
- Silicone-free (ideal for use in critical areas to reduce the risk of contamination)
- Soft breathable fabric (helping prevent heat stress and providing a more comfortable working condition)
- Ultra-low linting
- Superior tear resistance
- Excellent abrasion resistance
- Elastic waist in back
- Serged & bound seams on entire suit (encases all seams and adds strength)
- Barrier protection against dust, hazardous particles, water-based liquid chemicals, and aerosols
- Excellent flex-cracking resistance
- Larger gusset than industry standard (provides greater comfort and range of motion)
- Excellent tensile strength
- Basic Features common to disposable clothing
- Premium CovTech™ Features

RPN951 & RPFN951

- Adjustable metal nose band
- Low-profile design with smooth inner lining provides a secure seal and comfortable fit
- Dual fixed strap
- RPFN951 folds for easy storage

RPDM1

- Nuisance mask
- Single elastic fixed strap

SAFETY FENCING

Orange Safety Fence

Polypropylene safety fence, 4' tall, top of fence with smooth edge.

SF101R 14 lb., 100' long rectangle openings in material 2 1/4" wide x 4" long, each roll packed in a clear poly bag.

Diamond openings in material 2" wide x 1 3/4" long.

SF051D 50' long, 15 lb.

SF101D 100' long, 30 lb.

HEARING PROTECTION

MCR Safety's hearing protection is tested according to ANSI S3.19-1975 test standards. Hearing protection is an important addition to our PPE products. OSHA states in the CFR29-1910.95 standard that whenever an employee's noise exposure equals or exceeds an 8-hour time-weighted average (TWA) sound level of 85 decibels measured in the A slow scale, a hearing conservation program must be administered.

EPDU32

Disposable Uncorded Soft Polyurethane (PU) Foam Earplug. Contoured design Expandable for comfortable fit. Polybagged by the pair. 200 pair per dispenser box 10 boxes/case (2000 pair)

EPDC32

Disposable Corded Soft Polyurethane (PU) Foam Earplug. Attached cord allows for greater accessibility when not in use. Contoured design Expandable for comfortable fit. Polybagged by the pair. 100 pair per dispenser box 20 boxes/case (2000 pair)

EPRU25

Reusable Uncorded Molded Silicone Earplug. Special flange design allows for maximum comfort. Polybagged by the pair. 100 pair per dispenser box 4 boxes/case (400 pair)

EPRC25

Reusable Corded Molded Silicone Earplug. Attached cord allows for greater accessibility when not in use. Special flange design allows for maximum comfort. Polybagged by the pair. 100 pair per dispenser box 4 boxes/case (400 pair)

FEATURES

- Soft P/U Foam or molded silicone options
- corded or uncorded
- Noise Reduction Rating (NRR) of 32db and 25db

Hand Protection Test Methods

EUROPEAN DIRECTIVES FOR PERSONAL PROTECTIVE EQUIPMENT

A European Directive establishing harmonized standards for all PPE items used in the European Union went into effect during 2004. Many of our hand protection offerings reflect the CE logo and a 4 digit performance rating that measure abrasion, cut, tear, and puncture resistance (ACTP). Listed below are the four physical tests that are required for protective gloves under European Standard EN388 and the results necessary to obtain each performance level rating.

| Criteria | | Performance Guide for EN 388: Mechanical Hazards | | | | | |
|----------|-------------------------------|--|------|------|-------|-------|-------|
| | Performance Level | 0 | 1 | 2 | 3 | 4 | 5 |
| A | Abrasion Resistance (Cycles) | < 100 | 100+ | 500+ | 2000+ | 8000+ | N/A |
| C | Blade Cut Resistance (Index) | < 1.2 | 1.2+ | 2.5+ | 5.0+ | 10.0+ | 20.0+ |
| T | Tear Resistance (Newtons) | < 10 | 10+ | 25+ | 50+ | 75+ | N/A |
| P | Puncture Resistance (Newtons) | < 20 | 20+ | 60+ | 100+ | 150+ | N/A |

A glove's overall performance score is indicated by a series of four numbers (0-4). Note cut resistant scores can reflect 5 as their highest ranking. These four numbers represent (in order) the four test criteria listed above. The higher the numbers, the better the performance. Manufacturers may use an "X" to indicate not tested.

CPPT

ANSI/ISEA 105

In effort for our hand protection industry to have a standard performance level analysis, the International Safety Equipment Association (ISEA) in conjunction with American National Standards Institute (ANSI) created test protocol known as ASTM F1790-97. Many of our cut resistant products reflect scores  based on the portion of this standard for cut resistance which was developed in 1997. This cut protection performance test is often referred to as CPPT. Changes to the cut resistant protocol are pending at this time and may be adopted. The pending test protocol may require revisions to our advertised scores.

This test method is significantly different than the CE cut resistant method. Cut resistance with a weighted gram load is measured in relation to distance to cut. A total of fifteen cuts (each with a new blade) are conducted. Five cuts each are made at three different gram loads. Test values are scaled based on the blade performance with a neoprene rubber material.

Recognize performance levels for CE and ANSI/ISEA 105 are different test methods and are calculated differently. Grams are used for the ANSI/ISEA 105 and the EN388 uses an "index" with a different scale for scoring. Test methods cannot be directly related. Different standards mean different performance at the same "level".

| | Level 0 | Level 1 | Level 2 | Level 3 | Level 4 | Level 5 | |
|----------------------|--------------|---------|---------|---------|---------|---------|--------|
| ANSI/ISEA 105 | | | | | | | |
| Cut | Grams | < 200 | > 200 | > 500 | > 1000 | > 1500 | > 3500 |
