

Installation Instructions
Please Read Before Installing

Load Specifications:

Table with columns: Control, Load Type, Min. Load, Max. Load. Rows include HWD-6D1, HWD-10D1, HWD-6ND1, HWD-10ND1, HWD-8ANS3, and HWD-2ANF4.

1 Dimmer Load Type: -6D, -6ND, -10D and -10ND are designed for use with permanently installed incandescent, magnetic low-voltage, or tungsten halogen only.

2 Low-Voltage Applications: Use -6D, -6ND, -10D and -10ND with magnetic (core and coil) low-voltage transformers only.

- Do not operate low-voltage circuits without operative lamps in place.
Replace burned-out lamps as quickly as possible.
Use transformers that incorporate thermal protection or fused transformer primary windings to prevent transformer failure due to overcurrent.

3 Switch Load Type: -8ANS is designed for use with all permanently installed lighting loads and with motor loads up to 1/4 HP (5.8 A).

4 Ceiling Fan Application (HWD-2ANF): DO: Use to control one paddle-type ceiling fan (permanent split-capacitor). Use the ceiling fan's pull chain to set its speed to the highest setting.

- Do not use to control fans that use shaded-pole motors (i.e. bath exhaust fans).
Do not use to control fans that have integrated fan speed controls (i.e. fans that have a remote control), unless the integrated control is removed from the ceiling fan.
Do not connect to any other motor-operated appliance or to any lighting load type.
Do not use to control a fan lighting load (i.e. light kit).

Designer-Style Wired Maestro® Dimmers

HWD-8ANS
Fan Speed Control
HWD-2ANF
120 V~ 50/60 Hz

Important Notes

Codes: Install in accordance with all local and national electrical codes. Note: Alternate wiring methods may be used for the Class 2 wiring connection.

WARNING - To avoid the risk of entrapment, serious injury, or death, these controls must not be used to control equipment which is not visible from every control location...

Environment: Ambient operating temperature: 32 °F to 104 °F (0 °C to 40 °C), 0% to 90% humidity, non-condensing. Indoor use only.

Spacing: If mounting one control above another, leave at least 4 1/2 in (114 mm) vertical space between them.

Wallplates: Lutron Claro® and Satin Colors® wallplates are recommended for best color match and aesthetic appearance.

Cleaning: To clean, wipe with a clean damp cloth. DO NOT use any chemical cleaning solutions.

Wallboxes: Lutron recommends using 3 1/2 in. (89 mm) deep wallboxes for easier installation.

Remotes: Use only Lutron HomeWorks Maestro Remote Dimmers (HD-RD) with -6D, -6ND, -10D, -10ND, and -2ANF controls. Use only Lutron HomeWorks Maestro Remote Switches (HD-RS) with -8ANS controls.

Prewire for System Communications: Controls have Class 2 remote-circuit wires (gray, violet) that exit at the top of the control and connect to the HomeWorks Dimmer Hub (HWI-H48).

Note: Class 2/PELV wires do not have polarity. The daisy-chain wiring method is recommended to allow for future upgradability.

Multigang Installations

In multigang installations, several controls are grouped horizontally in one multigang wallbox.

When combining controls in a wallbox, derating is required; however, no derating is required for Fan Speed Controls or Remotes.

Derating Chart

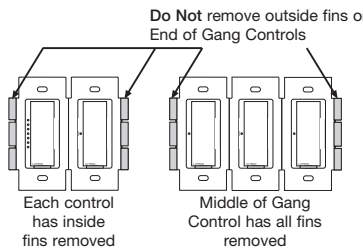

Table with columns: Control, Load Type, End of Gang, Middle of Gang. Rows include HWD-6D, HWD-10D, HWD-8ANS, and HWD-2ANF.

Note: -8ANS controls have fins that need to be removed for multigang installations. -6D, -6ND, -10D, -10ND, and -2ANF controls do not have fins that need to be removed.

Removing Fins

Control Location for Ganging

Installation

WARNING: Locate and remove fuse or lock circuit breaker in the OFF position before proceeding. Wiring with power ON may result in personal injury or property damage.

Short Circuit Check: Check the installation for short circuits before installing control(s). With power OFF, install standard mechanical switch(es) between Hot and load.

- 1. Turn power OFF at fusebox or circuit breaker.
2. Using a sharp utility knife or drywall saw, create a notch (~1/4 in or 6 mm) in the drywall above the top right hand corner of the wallbox.

Figure 1: Notch the Drywall

- 3. Pull Class 2 wires from outside of the wallbox through the notch in the drywall — do not run the Class 2 wires inside the wallbox (see Figure 2).

Figure 2: Class 2 Wire Installation

- 4. Crimp the violet and gray wires of the control to the Class 2/PELV wires connected to the HWI-H48. Use the butt splices provided (see Figure 3).

Figure 3: Class 2 Wire Connection

- 5. Prepare wires. When making wire connections, follow the recommended strip lengths and combinations for the supplied wire connectors.

Wire Connector: Strip insulation 3/8 in (9.5 mm) for 14 AWG (1.5 mm²) wire. Strip insulation 1/2 in (12.7 mm) for 16 or 18 AWG (1.0 mm² or 0.75 mm²) wire.

Trim or strip wallbox wires to the length indicated by the strip gauge on the back of the control.

Push-In Terminals: Insert wires fully. Push-in terminals are for use with 14 AWG (1.5 mm²) solid copper wire only. DO NOT use stranded or twisted wire.

Screw Terminals: Tighten securely. Screw terminals are for use with solid copper wire only. DO NOT use stranded or twisted wire.

6. Wire controls as follows: Single location installation: See Wiring Diagrams 1 and 2. Multi-location installation: See Wiring Diagrams 3 and 4.

Power Booster and Interfaces: When using power boosters or interfaces, see Wiring Diagrams in the HomeWorks Technical Reference Guide (P/N 366-963).

- 7. Push all wires back into the wallbox and loosely fasten the control to the wallbox using the control mounting screws provided. Do not pinch the wires.

- 8. Attach Lutron Claro or Satin Colors wallplate adapter and wallplate.

- a. Install wallplate adapter onto front of control(s).
b. Tighten control mounting screws until wallplate adapter is flush to wall (do not over-tighten).
c. Snap wallplate onto wallplate adapter, and verify that control is aligned properly.
d. If control(s) is(are) misaligned, loosen mounting screws appropriately.

- 9. Restore power. Check for correct local operation (see Dimmer/Fan Operation and Switch Operation).

Lamp Replacement

WARNING - For any procedure other than routine lamp replacement, power must be disconnected at the main electrical panel. Working with power ON may result in personal injury or death.

¹When using controls in single location installations, tighten the blue terminal. DO NOT connect the blue terminal to any other wiring or to ground.

²Up to 9 HomeWorks Maestro Remote Dimmers/Switches may be connected to the HomeWorks Maestro Dimmer/Switch/Fan Speed Control. Total blue terminal wire length may be up to 250 ft (76 m).

³Neutral wire Dimmers/Switches/Fan Speed Controls must be connected on the Load side of a multi-location installation.

Troubleshooting Guide

Table with columns: Symptom and Cause and Action. Rows include: No lights at all or no fan response; Lights/fan turn ON when Tapswitch is pressed, then turn OFF; Light turns ON and OFF continuously; Lights/fan don't switch ON/OFF when Tapswitch on Dimmer/Switch/Fan Speed Control/Remote is pressed; Lights/fan don't switch ON/OFF from Keypad; Wallplate is warm; Control is buzzing or humming.

* Note: Refer to Application Note # 217 – "HomeWorks Maestro Controls Reference Guide" for advanced features of the HomeWorks Maestro controls.

Warranty: For Warranty information, please see the Warranty enclosed with the product, or visit www.lutron.com/resiinfo.
