

WIRING INSTRUCTIONS EASY WIRE PLUG

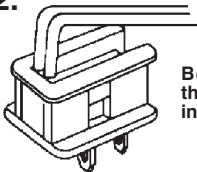

Use only with standard #18 SPT-1 parallel cord.

1.

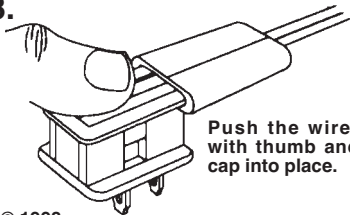

CAUTION: Cut wire flush. Separate wire 1/4". Do not strip wire.

2.

Bend the end of the wire and insert into groove.

3.

Push the wire down with thumb and slide cap into place.

CAUTION: Do not use type "TPT" cord, the extra flexible cord on electrical shavers or type "XT" cord used on Christmas light sets, or any small width cords. **Do not use on any appliance rated over 1250 watts (10 amps and 125 volts).**
