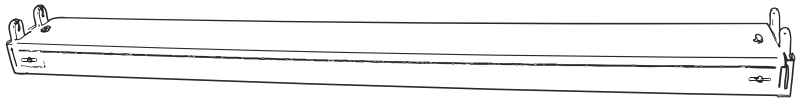
Strip Fixture Retro Kit —Installation

TECHBRITE
Saving energy in the best possible LIGHT



Shown above is a 4ft strip ÿxture with ballast cover. End socket brackets are placed at each end of the ÿxture. 8ft ÿxtures (at right and bottom) contain middle socket brackets as well.

FIGURE 5

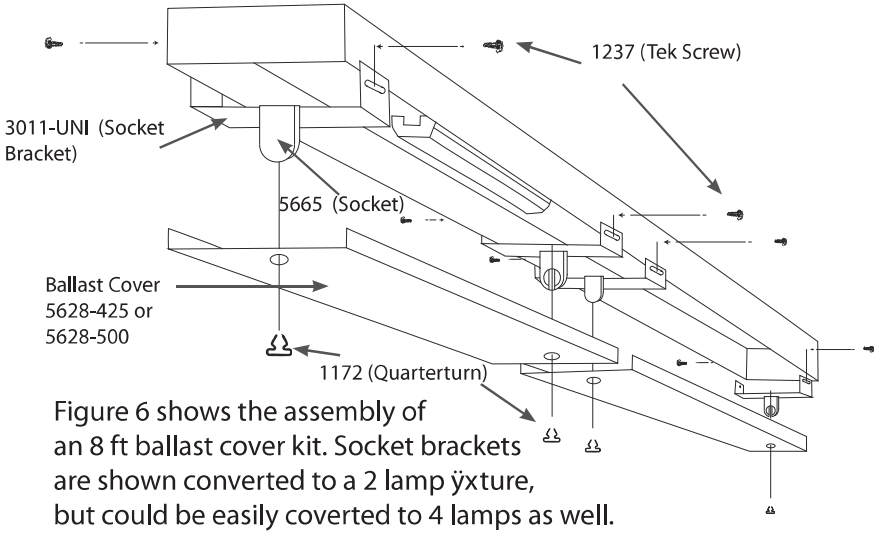


Figure 6 shows the assembly of an 8 ft ballast cover kit. Socket brackets are shown converted to a 2 lamp ÿxture, but could be easily coverted to 4 lamps as well.

FIGURE 6

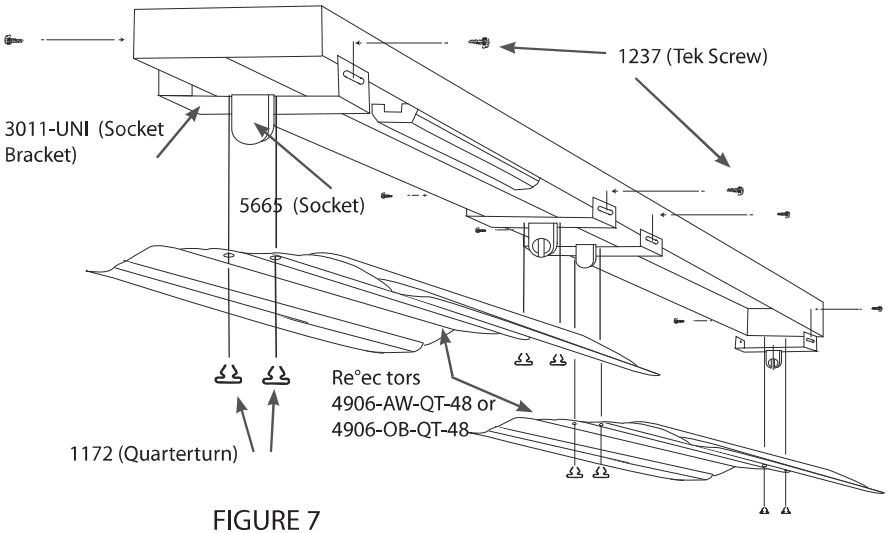

FIGURE 7

Figure 7 at left shows the assembly of an 8ft re°ec - tor kit. The only di¸ erence is the use of re°ec tors instead of ballast covers. Plastic aligner clips are also placed on adjoining re°ec tors allowing them to remain even.

Figure 8, at right, shows placement of the aligning clip which is used to maintain even edges on adjoining re°ec tors.
