INSTALLATION AND SAFETY INSTRUCTIONS

FOR YOUR SAFETY **HC-256**

WARNING: Be sure the electricity to the system you are working on is turned off; either the fuse removed or the circuit breaker set at off.

PLEASE KEEP AWAY FROM COMBUSTIBLE MATERIALS.

A. Determine socket location and spacing, minimum 2" center to center.

B. Attach track (not included) or wire clips to surface with either nails, screws or staples.

C. FOR OUTDOOR APPLICATIONS:
Run 12/2, 105˚C cable by pressing cable into wire clips.
FOR INDOOR APPLICATIONS:
Run 10/2, 105˚C cable by pressing cable into track (not included).

D. Press socket staight down onto cable and wire clip, or track, until socket snaps into place.

E. Install bulbs (not included), 5 watt maximum.

F. Center of socket must not be closer than 1 1/2" to closed ends (wall surfaces, partitions).

022503

WARNING: Use of other manufacturers components will void warranty, U.L. listing and create a potential safety hazard.
