 Status:
 Active

Channel Spring Nut, Size 1/4-20 Inch, Thickness 3/16 Inch, Stainless Steel, for use with 1-1/2 Inch Deep Channels

- Kindorf self aligning channel nuts are designed to provide resistance to pull out and resistance to side slip in excess of the full strength of the channels with which they are used.
- The extreme resistance to side slip results from the unique design of the alternate teeth, spaced and designed to develop a wedging action that increases with pressure or load

| North American Specifications (UNSPSC) | |
