Overview

The zone wallstations are pre-engraved low-voltage switches that operate on 24 VDC power supplied by the Room Controller or DLVP power module. Each wallstation is designed to fit in a standard decorator opening and has two RJ45 ports for local network connections to eliminate wiring errors.

Features

- Low-voltage control for ON/OFF and dimming loads
- Pre-terminated control cable ready with RJ45 ports eliminate wiring errors
- Available in 2, 3, 4, 5, 6 button models designed to fit in decorator wallplates (included)
- Wallstations can be used for multi-way control
- Custom engraving options available - buttons may be replaced in the field

Operating Environment	Temperature: 32°F to 104°F (0°C to 40°C) Relative humidity: Less than 95%, non-condensing For indoor use only
Size	4.75"H x 3.25"W (121mm x 83mm)

Standards
UL 508 Listed  US

Description/Operation

The zone wallstations are pre-terminated control cable (ordered separately) ready and work immediately upon power up. Zone wallstations for office, classroom, patient room, conference room and general areas are available and are fully functional out-of-the-box removing the need for field programming and reducing installation time.

Installation

Low-voltage devices are connected using provided pre-terminated control cables (ordered separately).
