3M™ E-A-R™ UltraFit™ Corded Earplugs 340-4004, in Poly Bag, 400 EA/Case

3M ID 70071515772 UPC# 10080529400038

• [Print](#)

The 3M™ E-A-R™ UltraFit™ corded earplugs features a proprietary, premolded, triple-flange design that fits comfortably in most earcanals.

- Premolded, triple flange earplug s fit comfortably in a wide range of ear sizes
- No need to roll earplugs before fitting so the tips stay clean even if hands are dirty
- Soft polymer is washable and reusable, reducing both waste and costs
- Poly bag keeps each pair or earplugs available or accessible for re-use
- Noise reduction rating (NRR) 25 dB CSA Class AL
- Test compatible with 3M™ E-A-Rfit™ Validation System

Overview Documents

The 3M™ E-A-R™ UltraFit™ Corded **earplugs** feature a “no-roll”, triple-flange design that provides quick, clean, and comfortable hearing protection. Simply hold the stem and push the **earplug** into the ear. The tip stays clean even if hands are dirty or gloves are worn. The soft polymer **earplugs** are washable and reusable so they don’t need to be replaced as often, reducing waste and lowerings costs. Poly bag keeps **earplugs** clean prior to use. Recommended applications include assembly and mechanical, chipping, chiseling, cleaning, drilling, furnace operations, grinding, heavy equipment operations, machining, metal repair, painting, pouring/casting, power fastening, riveting, sanding, sawing and welding. These **earplugs** are commonly used in the following industries: construction, general manufacturing, mining, oil and gas, and transportation. These soft polymer **earplugs** have a Noise Reduction Rating (NRR) of 25 dB and are test compatible with the 3M™ E-A-Rfit™ Validation System. Not only is noise present in our daily routines and recreational activities, but millions of Americans work in hazardous noise on a daily basis. Estimates from the National Institutes of Health suggest that approximately 15 percent of Americans (26 million people) between the ages of 20 and 69 have high frequency hearing loss due to exposure to noise at work or during leisure activities. Hearing loss due to noise is almost entirely preventable by judicious use of hearing protection. *The NRR may overestimate the hearing protection provided during typical use. 3M recommends reducing the NRR by 50% for estimating the amount of noise reduction provided.

Specifications

Brand	E-A-R™
Category	Pre-Molded Ear plugs , Hearing Protection
Color	Yellow
Cord Type	Vinyl
Electrically Insulated	Yes
Hearing Protection Style	Corded
Material	Elastomeric Polymer
Metal Detectable	Yes
Moisture Resistant	Yes
Noise Reduction Rating	25 Decibel
Packaging	Poly bag
Product Line	Ear plugs
Product Series	E-A-R UltraFit
Product Type	Reusable Ear plugs

Recommended Application	Facility Maintenance, Grinding, Electrical, Machine Operations, Sanding, Welding, Demolition, Painting, Blasting, Assembly, Cleaning
Recommended Industry	Transportation, Pharmaceutical, Automotive, Military Maintenance, Repair and Operation (MRO), Mining, Metal Fabrication, Oil & Gas, General Manufacturing
Reusable	Yes
Shape	Multi-Flange
Size	One Size Fits Most
