

5-BUTTON SCENE SWITCH

LMSW-105 | [Wattstopper](#)

FEATURES & BENEFITS

The LMSW-105 Digital Scene Switch is a low voltage device that sets and recalls preset lighting scenes and raises and lowers lighting levels. It is part of a Digital Lighting Management (DLM) system and controls loads connected to DLM room controllers by accessing four of the 16 scenes available in a DLM local network.

PRODUCT
ENVIRONMENTAL PROFILE

- Low voltage switch for control of four preset scenes and raise/lower control of scenes or loads
- Plugs to other components using Cat 5e cable and RJ45 connectors eliminating wiring errors
- Plug n' Go automatic configuration and Push n' Learn for personalization
- Customizable buttons with LED status indicators
- Active Dim feature enables temporary adjustment of any selected load
- IR transceiver for wireless configuration and remote control
- [DLM Switch Button Kits and Engraving](#)
