Some Ways to Stay Safe From Arc Flash Events

Arc flash events occur every single day in the United States, and some of them result in a fatality or severe burns for the victim. The Occupational Safety and Health Administration has always required employers to provide workplaces free from recognized hazards.

What's Happening in the Industry?

Energy Program Participation Rates are Increasing

Utility-driven energy management programs are growing, although participation rates are still somewhat low, according to findings from "Trends in Energy and Demand Management," a new energy industry survey conducted by the Associations for Energy Services Professionals in partnership with Essense Partners.

the pounds, your home is sweating from increased usage - more people coming in and out, and more digital devices to charge so everyone can keep up with their favorite football team and friends. Your home's energy consumption can skyrocket, especially when the oven's working nonstop and you're pulling out kitchen gadgets to chop and puree.

DPU222R

Non-fused pullout and molded case switch devices provide personnel with a visible ON-OFF disconnecting means. While fused pullout units also perform this function, they also provide an additional level of protection for the air conditioner. Fused and non-fused devices are of a pullout design, where the user physically removes or "pulls out" a tab to break the electrical connection. A molded case switch is similar to a light switch where the user "switches" the unit to the indicated ON-OFF position.

Steel Boxes

Steel switch boxes house electrical devices, switches and outlets; available in non-gangable or gangable. Pry-outs are conveniently located at the top and bottom of each box to ensure a perfect cable entry on center. Insert cable and tighten set screw. If re-work is required, slightly turn the set screw on the MC clamp to install the cable or to back it out. No need to remove internal clamp, just loosen and tighten. Boxes certified for use in the U.S. and Canada.
